Section C – 0100000
General Information

0100000 – General Information		
Spec Item	Title	Description
1	General Information	
1.1	Outline of Services	Except where otherwise stated, the Contractor shall furnish all labor, supervision, management, tools, materials, equipment, facilities, transportation, incidental engineering, and other items necessary to provide the services outlined below and described in this Performance Work Statement (PWS) at Marine Corps Reserve Training Center, Kaneohe Bay, HI, where there is potential for either Recurring Work may be added to the contract or Non-Recurring work issued and outlying areas supported by this installation by means of a performance-based contract that is comprised of both Recurring Work and Non-Recurring Work Items. The PWS is organized into annexes. Annex 1 is "General Information". Annex 2 contains the on-site project management and administration requirements. Annexes 3 through 18 contain the technical requirements. The annex numbers are identified as 1 through 18 in the description column, but the fully expanded annex numbers include seven digits. Annex 1 General Information Annex 2 Management and Administration Annex 3 thru Annex 14 - Not Applicable Annex 15 Facilities Support Sub-annex 1503010 – Custodial Sub-annex 1503020 – Pest Control Sub-annex 1503050 – Grounds Maintenance Sub-annex 1503060 – Pavement Clearance Annex 16 thru 18 - Not Applicable
1.2	Acquisition of Additional Work	The Government reserves the right to acquire additional services at additional locations, within the scope of the annexes and areas included in Spec Item 1.1 Outline of Services, in addition to the services and locations identified in the requirements of this contract. Additional services will be incorporated into the contract in accordance with the CHANGES clause, SECTION I or ordered under the non-recurring work provisions of the contract. Items of work not covered by this contract but within the general intent are considered in the scope of this contract.
1.3	Background Information	This contract will include services for Marine Corps Reserve Training Center (MCRTC). All the buildings are staffed with full-time personnel and one weekend per month each unit conducts training where 150-200 reservists muster.
1.4	Navy PBSA Approach	The Navy's approach to performance-based service acquisition (PBSA) includes four component parts, which are 1) performance outcomes, 2) measurable standards, 3) consideration of incentives, and 4) performance assessment plan.
1.5	Standard Template	Key to implementing the PBSA approach is using a standard template that ensures Navy-wide consistency yet affords appropriate tailoring to meet local needs. The standard template contains 18 standard annexes. Annex 1 will always contain General Information that is relevant to the entire scope of the contract. Annex 2 contains Management and Administration requirements that are relevant to the entire scope of the contract. Annexes 3 through 18 and their associated sub-annexes contain the General Information, Management and Administration requirements, Performance Objectives, Related Information, and Performance Standards that are relevant to that

Section C – 0100000
General Information

0100000 – General Information		
Spec Item	Title	Description
		technical annex. Except where otherwise stated, Annexes 3 through 18 and their associated sub-annex requirements are not relevant to one another. Within each technical annex and sub-annex, the organization of information and requirements are also standardized. Specification Item 1 will always contain General Information. Specification Item 2 will always contain the Management and Administrative requirements. Specification Item 3 will always contain the Recurring Work requirements. Specification Item 4 will always contain the Non-Recurring Work requirements. Requirements and standards for higher level specification items apply to all subordinate specification items, e.g., Specification Item 3 standards apply to all recurring work specification items. Specification Item 3.1 is applicable to all 3.1 subordinate specification items. Specification Items 3.2 and 3.3 are not considered subordinate to 3.1 nor are they considered subordinate to one another. All costs associated with Annexes 1 and 2 and Specification Items 1 and 2 shall be priced, and their price shall be allocated pro rata share to the Exhibit Line Items.
1.6	Related Information	There are four types of Related Information that can be found in the Description and Related Information columns of the specification as follows: Informational Notes as used throughout this PWS provides additional information to offerors' to be used in developing a thorough understanding of the work to be performed in this contract. Any block of text marked "Informational Notes" throughout Annexes 1 through 18 and their associated sub-annexes are subject to this disclaimer. Offerors' may not rely upon the "Informational Notes" as material representations of the Government. Information provided in "Informational Notes" does not create a contractually binding requirement on either party. Clarifying Information describes client expectations in a more detailed manner than the Performance Objective and Performance standard alone. Constraining Information describes limitations to the work performed to meet the Performance Objective and Performance Standard. Requirement Information further describes client requirements associated with each Performance Objective.
1.7	Verification of Workload and Conditions	Throughout the PWS, the workload data is generally referred to as being located in Sections C and J. Section C provides data such as descriptions, specifications, and the statement of work. Section J provides data such as system descriptions, maps, floor plans, and tables to represent the type and location of services to be provided. All facilities, systems, and assets identified in this contract shall be accepted by the Contractor in "AS-IS" condition. The Contractor is fully responsible for all work up to and including the limits of liabilities specified. As prescribed in FAR 52.237-1, offerors' or quoters are urged and expected to inspect the site where services are to be performed and to satisfy themselves regarding all general and local conditions that may affect the cost of contract performance, to the extent that the information is reasonably obtainable. In no event shall failure to inspect the site constitute grounds for a claim after contract award.

Section C – 0100000
General Information

0100000 – General Information		
Spec Item	Title	Description
1.8	Contractor's Knowledge	The Navy expects to receive insightful management from its contractors. This management shall include the knowledge, skills, authority and willingness to use contractor resources to find better ways of serving Navy clients' strategic and operational goals and objectives. The Navy's use of performance-based objectives evidences this principle. Although performance work statements will typically contain several levels of performance assessment, the Navy wants its contractors to exercise maximum discretion within bounds of prudent risk management to adjust processes and resources needed to reach specified objectives at the highest performance level.
1.9	Technical Proposal Certification	The Contractor warrants that its proposal including, but not limited to, proposed approaches, staffing, methodology, or work plans, will meet the performance objectives and standards set forth in this contract during execution thereof. The Contractor is not excused from meeting such performance objectives and standards in the event such proposal proves inadequate as conceived or executed to meet such performance objectives and standards. The Contractor understands that it bears all of the cost and performance risk associated with adopting acceptable additional (and/or alternative) means or methods of meeting the performance objectives and standards.

Section C – 0200000
Management and Administration

0200000 - Management and Administration		
Spec Item	Title	Description
2	Management and Administration	
2.1	Definitions and Acronyms	Definitions and Acronyms are listed in 0200000-01.
2.2	General Information	
2.2.1	Government Regular Working Hours	The Government's regular working hours are from 0700-1600, five days per week, Monday through Friday, except observed Federal holidays. Exceptions to the regular hours of operation are detailed in subsequent sections of this PWS. Work in certain annexes or sub-annexes require Contractor continuous operations, 24 hours a day, every day of the year including holidays. The performance of other work requirements shall be accomplished within the Government's regular working hours unless the specific work requirement specified herein necessitates otherwise. Any other work outside Government regular working hours must be authorized by the KO prior to commencement of work.
2.2.1.1	Observed Federal Holidays	The Government observes the following holidays: New Year's Day, Martin Luther King Jr.'s Birthday, President's Day, Memorial Day, Juneteenth, Independence Day, Labor Day, Columbus Day, Veterans' Day, Thanksgiving Day, and Christmas Day.
2.2.1.2	Restriction to Contractor Working Hours	If the Contractor wishes to work outside of the Government's regular working hours for the Contractor's convenience, the Contractor shall submit a written Request to Work Outside Government's Regular Working Hours per Attachment 0200000-15 Deliverables. Excludes work to be performed during specified hours.
2.2.2	Wage Determinations	Wage Determinations are included in 0200000-02.
2.2.3	Requirements Hierarchy	Requirements or definitions specified in each spec item of this contract apply to subordinate paragraphs. For example, requirements shown in spec item 3.1 would apply to spec items 3.1.1, 3.1.2, 3.1.2.1 and so on. Likewise, Performance Standards specified at a lower digit level (i.e. spec item 3.1.1, 3.1.2, 3.1.2.1) apply when performance is assessed at a higher tier (i.e., spec item 3.1) based on the composite work requirements.
2.3	General Administrative Requirements	
2.3.1	Required Conferences and Meetings	The Contractor shall provide sign-in sheets and prepare minutes of all meetings and submit per Attachment 0200000-15 Deliverables for review and comments. Comments received within two working days shall be incorporated into the minutes and a copy of the final revision shall be submitted per Attachment 0200000-15 Deliverables for concurrence.
2.3.2	Training for Maintenance and Operation of New and Replacement Systems and Equipment	When construction, renovation, or repair work is performed by means other than this contract, the Contractor shall attend Government provided training, as applicable, for maintenance and operation of new and replacement systems and equipment at no additional cost to the Government.
2.3.3	Partnering	The Government requires cohesive partnerships with its Contractors and subcontractors. Key stakeholders, including the supported commands who may receive services, principal individuals from NAVFAC, the performance assessment team, and representative(s) of the installation(s) will be invited to

Section C – 0200000
Management and Administration

0200000 - Management and Administration		
Spec Item	Title	Description
		participate in the partnering process. Key members of the prime and sub-contractor teams, including senior management personnel, must participate. The partnership will draw on the strength of each organization to achieve quality contract services done right the first time, within the contract price, as scheduled, and without any safety mishaps. NAVFAC P-204 Facility Support Contracts Partnering Guide contains the framework necessary for consistent implementation of partnering for Facility Support Contracts (FSCs).
2.3.3.1	Informal Partnering	The Contracting Officer shall organize the initial Partnering Meeting with key personnel on the project team, including Contractor's personnel and Government personnel. The initial session will be scheduled to be concurrent with the Pre-Performance Conference and will be held no later than 30 days after award and will be held at a Government provided facility as designated by the KO. The Initial Informal Partnering Session will be conducted and facilitated using electronic media (a video and accompanying forms) provided by Contracting Officer. The senior Government stakeholder present will lead the meeting; however, the Contractor's PM or senior representative is encouraged to participate as co-lead. The Partners will determine the frequency of the follow-on sessions.
2.3.3.2	Contract Partnering Administration	Upon award, the ACO will contact the Contractor, supported command(s), Region, and Installation(s) stakeholders, and the performance assessment team to discuss implementation of partnering. The ACO will commence discussions with the Contractor to select a facilitator and location that are acceptable to both partners. A partnership agreement, The Charter, should be in place as early as possible so issues arising, even before work begins, can be resolved using the issues resolution process. As part of the partnership agreement a project governance structure shall be established following the guidelines of P-204 Facility Support Contracts Partnering Guide. Replacement of Core Management Team members (stakeholders who attended the initial session and manage the contract work day-to-day) is discouraged since it will disrupt the synergy that has been developed. If replacement of a team member proves to be unavoidable, a follow-on partnering session must be held to officially turn the responsibilities of the position over to the new member. The Core Management Team consisting of the attendees below must be present during the initial and all follow-on partnering sessions. These are the core mandatory attendees. Other stakeholders may attend if they desire or as recommended by the partners.
2.3.3.3	Contract Partnering Session Attendees	The Contractor shall bring the necessary personnel to successfully partner on this contract. Asterisk indicates mandatory personnel. President/Vice President * Project Manager * Quality Manager Site Safety and Health Officer

Section C – 0200000
Management and Administration

0200000 - Management and Administration		
Spec Item	Title	Description
2.3.4	Permits and Licenses	The Contractor shall obtain all required permits, licenses, and authorizations to perform work under this contract and comply with all the applicable Federal, state and local laws and regulations. The Contractor shall submit copies of Permits and Licenses Attachment 0200000-15 Deliverables.
2.3.5	Insurance	The Contractor shall submit a Certificate of Insurance Attachment 0200000-15 Deliverables as evidence of the existence of the following insurance coverage in amounts not less than the amounts specified below in accordance with the FAR Clause 52.228-5, INSURANCE – WORK ON A GOVERNMENT INSTALLATION. This insurance must be maintained during the performance period.
2.3.5.1	Certificate of Insurance	The Certificate of Insurance shall provide for at least 30 calendar days written notice to the KO by the insurance company prior to cancellation or material change in policy coverage. Other requirements and information are contained in the aforementioned insurance clause.
2.3.5.2	Minimum Insurance Amounts	The Contractor shall procure and maintain, during the entire period of performance under this contract, the following minimum insurance coverage: Comprehensive General Liability: \$500,000 per occurrence Automobile Liability: \$200,000 per person, \$500,000 per occurrence, for bodily injury, \$20,000 per occurrence for property damage Workmen's Compensation: As required by Federal and state worker's compensation and occupational disease statutes Employer's Liability coverage: \$100,000, except in states where worker's compensation may not be written by private carriers Other as required by state law
2.3.6	Protection of Government Property	During execution of the work, the Contractor shall protect Government property. The Contractor shall return areas damaged as a result of Contractor negligence under this contract to their original condition at no cost to the Government.
2.3.7	Directives, Instructions, and References	Department of Defense (DoD), Secretary of the Navy (SECNAV), Chief of Naval Operations (OPNAV), and other applicable Directives, Instructions, and References are listed in 0200000-03. The Contractor shall comply with the most current version of directives, instructions, and references including versions published during the term of the contract.
2.3.8	Invoicing Procedures	Refer to Invoice Form in 0200000-04 for sample. Invoices shall be submitted in a format compatible with the most recent Government installed Microsoft Office Version (currently 2010). Invoice data shall be capable of being sorted by CLIN, annex/sub-annex, spec item, spec item title, and ELIN/Sub-ELIN.
2.3.9	Forms	Forms referenced in this Annex, e.g. accident reporting, and damage reporting are included among the Forms in 0200000-05.
2.4	Government-Furnished Items	Except for items identified below as Government-Furnished, the Contractor shall furnish all labor, supervision, management, tools, materials, equipment, facilities, transportation, incidental engineering, and other items necessary to provide the services described in this Performance Work Statement (PWS).

Section C – 0200000
Management and Administration

0200000 - Management and Administration		
Spec Item	Title	Description
		Government-Furnished Items will be provided in "AS-IS" condition and their use is at the option of the Contractor. The total or partial breakdown or failure of Government-Furnished Items shall not relieve the Contractor of the responsibility to perform the requirements of this contract. The Contractor shall provide periodic servicing, maintenance, and repair of the Government-Furnished Items accepted for use at no additional cost to the Government. Servicing, maintenance, and repair shall be provided in accordance with the manufacturer's recommendations. The Contractor shall generate work orders in NAVFAC Maximo per Spec Item 2.6.8 for all servicing, maintenance, and repair activities performed on Government-Furnished Items. At the completion of the contract, all Government-Furnished Items shall be returned to the Government in the same condition as received, except for reasonable wear and tear. Government-Furnished Items, which becomes worn out due to normal wear and tear, shall be returned to the Government and its replacement shall be the responsibility of the Contractor at no additional cost to the Government. The Contractor shall be responsible for the cost of any repairs or replacement caused by Contractor negligence or abuse. The Government may inspect Government-Furnished Items at any time and without notice.
2.4.1	Government-Furnished Property (GFP)	Not Applicable.
2.4.2	Government-Furnished Facilities	The Government will make available to the Contractor certain facilities for use in connection with this contract. The use of these facilities for any other purposes is prohibited. The Contractor shall be responsible and accountable for the facilities accepted for use and shall take adequate precautions to prevent fire hazards, odors, and vermin. Janitorial and refuse collection services for the facilities shall be provided by the Contractor. The Contractor shall obtain written approval from the KO prior to making any modifications or alterations to the facilities.
2.4.3	Government-Furnished Vehicles and Equipment	Not applicable.
2.4.4	Government-Furnished Utilities	The Government will make available water and electricity at existing outlets, required for the work to be performed under the contract. The Contractor shall provide and maintain, at its expense, the necessary service lines from the existing Government outlets to the work site. Provide and maintain backflow prevention devices on connections to domestic water lines and electrical transformer provisions on connections to electric lines. Meet all Federal, State, local, and installation codes and regulations for backflow prevention devices and electrical transformer provisions. Services required by the Contractor, for which there are no available Government outlets, shall be provided by the Contractor at no cost to the Government.
2.5	Contractor-Furnished Items	Except for items identified as Government Furnished, the Contractor shall provide all equipment, materials, parts, supplies, components, and facilities to perform the requirements of this contract. The KO may inspect Contractor-

Section C – 0200000
Management and Administration

0200000 - Management and Administration		
Spec Item	Title	Description
		furnished items for adequacy and compliance with contract requirements. Inadequate or unsafe items shall be removed and replaced by the Contractor at no cost to the Government. Materials containing asbestos, lead, and polychlorinated biphenyls (PCBs) shall not be brought onsite. Energy efficient tools and equipment shall be used when available. The KO may at any time require Samples, Safety Data Sheets (SDS) or Manufacturer's Data Cut Sheets of Materials used in this contract.
2.6	Management	The Contractor shall manage the total work effort associated with the services required herein to meet the performance objectives and standards. Such management includes but is not limited to planning, scheduling, cost accounting, report preparation, establishing and maintaining records, and quality assurance. The Contractor shall provide a staff with the necessary management expertise to ensure performance objectives and standards are met.
2.6.1	Safeguarding Information	The Contractor shall safeguard controlled unclassified information and information associated with Government property in accordance with the latest revision of CNSSI 1253, DoDI 8582.01, NIST SP 800-53, NIST SP 800-171, SECNAV Defense Industrial Base (DIB) Memo, and applicable contract clauses. At a minimum, this information shall be protected at the moderate confidentiality level as defined in NIST SP 800-171. Contractor information and data systems that contain information associated with Government property shall comply with DoD Risk Management Framework (RMF). The Contractor shall develop Plans of Action and Milestones (POA&Ms) per NIST SP 800-171, track accomplishment, and submit to the Government Attachment 0200000-15 Deliverables. If a cybersecurity incident is encountered or suspected related to any (Contractor or Government) Information Technology (IT) or Operating Technology (OT) systems, including Monitoring and Control Systems, the Contractor shall notify the Government Attachment 0200000-15 Deliverables.
2.6.2	Dissemination of Information	If certain information cannot be provided to the public, state what information cannot be provided, when it will be provided, and to whom, e.g., DoD policy limits the dissemination of certain information. Instructions, Directives, and References not releasable to the public, e.g., Floor Plans, Maps, Post Orders, and Standard Operating Procedures, will be made available after contract award to the successful offeror with appropriate credentials and a need to know.
2.6.3	Work Reception	The Contractor shall provide the capability to receive, prioritize, correspond, and respond to trouble/service calls and task orders during Government regular working hours and provide a point of contact at a local or toll free number who can perform the above function during other than Government regular working hours.
2.6.4	Work Control	The Contractor shall implement all necessary work control procedures to ensure timely accomplishment of work requirements, as well as to permit tracking and reporting of work in progress. The Contractor shall plan and schedule work to assure material, labor, and equipment are available to complete work requirements within the specified time limits and in conformance with the quality standards established herein. Verbal scheduling

Section C – 0200000
Management and Administration

0200000 - Management and Administration		
Spec Item	Title	Description
		and work status updates shall be provided when requested by the Government. A status update of any item of work must be provided within two hours of the inquiry during regular working hours, and by 0800 the following work day for inquiries after regular working hours. The Contractor shall provide work schedules for both Recurring and Non-Recurring Work Attachment 0200000-15 Deliverables. At a minimum, work schedules shall include: • Description of service(s) to be accomplished • Location • Date service(s) are scheduled to be accomplished
2.6.5	Work Schedule	The Contractor's work shall not interfere with normal Government business. In those cases where some interference is unavoidable, the Contractor shall minimize the impact and effects of the interference. The Contractor shall provide advance access of all its work schedules to the Government. The Contractor shall provide written notification of any difficulty in scheduling work due to Government controls, Attachment 0200000-15 Deliverables. At a minimum, the notification shall include the following: • The date and time the work was initially coordinated. • The name and phone number of the Government person with whom the work was initially coordinated. • The name and phone number of the Government person who prevented the work from being performed as previously coordinated. • The alternative date and time, the Government person requested the work be accomplished.
2.6.6	Deliverables	Except where otherwise stated, deliverable requirements are specified in Sections C, F, H, I, J, and within the Directives, Instructions, and References. The Contractor shall submit accurate and complete documents within the specified timeframes. The Contractor shall revise/modify deliverables, as directed by the KO, at no additional cost to the Government. Except where otherwise specified, all deliverables shall be submitted electronically in a Microsoft Office Version 2010 compatible format. Deliverables shall include the company name, contract number, contract title, date, and shall be unprotected and capable of being sorted by CLIN, work order number, asset number, section, annex/sub-annex, spec item and ELIN/Sub-ELIN or clause. All formulas shall be traceable. Government acceptance of deliverables shall not relieve the Contractor of responsibility for any error or omission which may exist in the deliverable, as the Contractor is responsible for all requirements of this contract. The Contractor shall establish and maintain a secure website for posting an electronic copy of all deliverables listed in Section F. The Contractor shall allow only authorized Government and Contractor personnel to access the website. Government personnel access shall be limited to viewing and downloading of deliverables but restricted from posting to the website. The Contractor shall notify the Government by email whenever there are new or updated deliverables posted to the website. Each deliverable posting on the website and each email notification shall include the title of the deliverable, the spec item requiring the deliverable, and the date and time the deliverable

Section C – 0200000
Management and Administration

0200000 - Management and Administration		
Spec Item	Title	Description
		was posted. All deliverables shall be available to authorized Government personnel 24 hours/day and 365 days/year for the duration of the contract.
2.6.7	Service Interruptions	If any utilities or other services must be discontinued (even temporarily) due to scheduled contract work, the Contractor shall notify the KO, COR, affected tenants, and customers in accordance with local procedures. If the discontinued service is due to an emergency breakdown the Contractor shall notify the KO, COR, affected tenants, and customers as soon as practicable and provide the status of repairs, as directed by the KO, until normal operation is restored. Scheduled utility outages and interruptions to equipment, system(s) operation, or other services shall be scheduled after hours of operation. The Contractor shall shutdown, restart, and perform operational checks on all equipment affected by both scheduled and unscheduled utility outages and service interruptions, at no additional cost to the Government.
2.6.8	NAVFAC Maximo	Not applicable
2.6.8.1	NAVFAC Maximo Data	Not applicable
2.6.8.2	NAVFAC Maximo Method of Data Entry	Not applicable
2.6.8.3	NAVFAC Maximo Access	Not applicable
2.6.8.4	NAVFAC Maximo Training	Not applicable
2.6.9	Quality Management System (QMS)	The Contractor shall establish and maintain a complete QMS program in accordance with the provisions specified herein. The Contractor's QMS program shall provide an effective and efficient means of identifying and correcting problems throughout the entire scope of operations. The Contractor's QMS program shall address: • Accurate documentation of work processes, procedures, and output measures. • A systematic procedure for assessing compliance with performance objectives and standards. • Accurate documentation of quality inspections and surveillance conducted throughout the execution of work. • Assessment-driven corrective actions and process adjustments as appropriate in a timely manner.
2.6.9.1	Quality Management (QM) Plan	The Contractor shall develop and submit a QM Plan per Section F. The QM Plan shall describe the QMS methodology and approaches used under this contract. If any changes are made during the period of performance, the Contractor shall submit the revised QM Plan for acceptance, per Section F. The Contractor's QM Plan shall include, at a minimum, the following: • Policy and objectives of Quality Management System (QMS) • Quality organization ○ List of personnel ○ Responsibilities & lines of authority ○ Training and qualifications

Section C – 0200000
Management and Administration

0200000 - Management and Administration		
Spec Item	Title	Description
		• Approach to assuring quality of services provided and conformance with performance objectives and standards • Methods and procedures for effective planning, operation and control of processes and performance of work • Procedures for inspection and surveillance of services to include all contractual requirements. ○ Scheduling and performance of inspection and surveillance ○ Measurement, data collection and analysis ○ Corrective action, preventive action, and continuous improvement ○ Oversight of subcontracted work • Documentation and records management • Communication with government (customers)
2.6.9.2	Quality Inspection and Surveillance	The Contractor shall establish and maintain an inspection and surveillance system in accordance with the FAR Clause 52.246-4, INSPECTION OF SERVICES – FIXED PRICE, to ensure that the work performed conforms to the contract requirements. The Contractor shall document and maintain a file of all scheduled and performed inspections and surveillances, inspection and surveillance results, and dates and details of corrective and preventive actions. The quality inspection and surveillance file shall be the property of the Government and made available during the Government’s regular working hours. The file shall be submitted to the COR after completion/termination of the contract per Section F.
2.6.9.3	Quality Inspection and Surveillance Report	The Contractor shall submit a copy of the Contractor Quality Inspection and Surveillance Report per Section F. The Contractor Quality Inspection and Surveillance Report shall include a narrative of events, a tabulated summary and results of the quality inspection and surveillance events performed, inspection-driven corrective actions taken and the results attained, and management process adjustments during the previous month. The Government may adjust the frequency of the submittal based on the Contractor’s quality of performance.
2.6.10	Property Management Plan	The Contractor shall establish and maintain a plan that meets the contract clause requirements of Specification Item 2.4, Government-Furnished Items, of this Annex. This plan shall identify the Contractor’s policies, procedures, and practices in receiving and performing physical inventories, key control, repairing and maintaining, preserving and protecting, and reporting the disposition of accepted government property in its possession. The Property Management Plan shall be submitted per Section F.
2.6.11	System and Equipment Replacement	The Contractor shall maintain the integrity and performance of existing energy saving, water conservation or other sustainability design features of systems and equipment in the performance of repair and replacement work. Except where otherwise specified, replacement components shall be of the same model/style or equivalent as the component being replaced. Substitutes for replacement components must be accepted by the KO prior to use. The KO will furnish available information for the existing systems and equipment.
2.7	Personnel Requirements	The Contractor shall comply with the personnel requirements stated below:
2.7.1	Key Personnel	The Contractor shall submit a List of Key Personnel and Qualifications per Section F. The Contractor shall provide any additional information requested by the KO or COR necessary to validate their qualifications. The Contractor shall submit an Organizational Chart per Section F showing lines of authority of the key personnel and on-site supervisor(s) for this

Section C – 0200000
Management and Administration

0200000 - Management and Administration		
Spec Item	Title	Description
		contract. The chart shall include names of personnel and their position title in this contract. As a minimum, include the PM, Quality Manager, SSHO, and on-site supervisor(s) and who they will report directly to for this contract. The key personnel shall be revised as applicable for the contract. The Contractor shall provide complete resumes for proposed substitutes and any additional information requested by the KO. Proposed substitutes shall have comparable qualifications to those of the persons being replaced. The KO will notify the Contractor within 15 calendar days after receipt of all required information of the consent on substitutions. No change in fixed unit prices may occur as a result of key personnel substitutions.
2.7.1.1	Project Manager (PM)	The Contractor shall provide a PM and designated alternate, as applicable, who shall have full authority to act for the Contractor on all contract matters relating to this contract. The PM or alternate shall be on-site during the Government's regular working hours and shall be available on-site within one hour after the Government's regular working hours. For contracts greater than \$200,000/year but less than \$5M/year or contracts of moderate performance risk, e.g., The PM shall have at least three years of experience in managing a workforce providing services on contracts of similar size, scope and complexity. For contracts greater than \$5M/year or for multi-function or regional contracts with significant performance risk, e.g., The PM shall have at least five years of experience in managing a workforce providing services on contracts of similar size, scope and complexity.
2.7.1.2	Quality Manager	The Contractor shall provide a Quality Manager or designated alternate who shall always be on-site when the Contractor is performing work during the Government's regular working hours and shall be available on-site within two hours after the Government's regular working hours. The Quality Manager or designated alternate shall report directly to a senior corporate official and shall not report directly to the Project Manager. The Quality Manager or designated alternate shall have fulfilled the following pre-requisite training and experience before being hired as the Quality Manager under this contract: For contracts greater than \$200,000/year but less than \$5M/year or contracts of moderate performance risk. The Quality Manager or designated alternate shall have at least three years of experience in preparing and enforcing QMS programs on contracts of similar size, scope and complexity. The Quality Manager or designated alternate may be the same person as the SSHO. For contracts greater than \$5M/year or for multi-function or regional contracts with significant performance risk. The Quality Manager or designated alternate shall have a current CMQ/OE certification and at least five years of experience in preparing and enforcing QMS programs on contracts of similar size, scope and complexity. The Quality Manager or designated alternate shall not be the same person as the SSHO.
2.7.1.2.1	Quality Control Personnel	The Contractor shall provide Quality Control personnel whose primary duty and responsibility is to enforce the Contractor's Quality Management System on this contract. The Quality Control personnel shall always be on-site when

Section C – 0200000
Management and Administration

0200000 - Management and Administration		
Spec Item	Title	Description
		the Contractor is performing work during the Government's regular working hours. The Quality Control personnel shall report directly to the Quality Manager and shall not report directly to the Project Manager. Quality Control personnel shall have fulfilled the following pre-requisite training and experience before being hired as Quality Control under this contract: Quality Control personnel shall meet or exceed the qualifications, technical knowledge and experience requirements specified for the personnel performing the work, which they will be inspecting, and have at least three years of experience in enforcing QMS programs on contracts of similar size, scope and complexity.
2.7.1.3	Site Safety and Health Officer (SSHO)	For contracts greater than \$2M/year or for contracts of high safety risk, the Contractor shall provide a Level 1 SSHO whose primary duty and responsibility is to prepare and enforce the Contractor's safety program on this contract. The Level 1 SSHO shall ensure the requirements of EM 385-1-1 and 29 CFR 1926.16 are met for the project. The Level 1 SSHO or an equally qualified Designated Representative/alternate shall always be on-site when work is being performed to implement and administer the Contractor's safety program and government-accepted Accident Prevention Plan. The Level 1 SSHO shall have fulfilled the pre-requisite qualification, training, continuous learning, and experiences described in the EM 385-1-1 before being hired as the Level 1 SSHO under this contract. The Level 1 SSHO shall not be the same person as the Project Manager, Quality Control Manager, or any other position other than the Level 1 SSHO. For contracts greater than \$200,000/year but less than \$2M/year or contracts of medium safety risk, the Contractor shall provide a Level 2 SSHO who is responsible for preparing and enforcing the Contractor's safety program on this contract. The Level 2 SSHO shall ensure the requirements of EM 385-1-1 and 29 CFR 1926.16 are met for the project. The Level 2 SSHO or an equally qualified Designated Representative/alternate shall always be on-site when work is being performed to implement and administer the Contractor's safety program and government-accepted Accident Prevention Plan. The Level 2 SSHO shall have fulfilled the pre-requisite qualification, training, continuous learning, and experiences described in the EM 385-1-1 before being hired as the Level 2 SSHO under this contract. The Level 2 SSHO may be the same person as the project manager but shall have fulfilled the pre-requisite qualification and experience. For contracts \$200,000/year or less or contracts of minimal safety risk, the Contractor shall provide a Level 3 SSHO who is responsible for preparing and enforcing the Contractor's safety program on this contract. The Level 3 SSHO shall ensure the requirements of EM 385-1-1, and 29 CFR 1926.16 are met for the project. The Level 3 SSHO or an equally qualified Designated Representative/alternate shall always be on-site when work is being performed to implement and administer the Contractor's safety program and government-accepted Accident Prevention Plan. The Level 3 SSHO shall have fulfilled the pre-requisite qualification, training, continuous learning, and experiences described in the EM 385-1-1 before being hired as the Level 3 SSHO under this contract. The Level 3 SSHO may be the same person as

Section C – 0200000
Management and Administration

0200000 - Management and Administration		
Spec Item	Title	Description
		the project manager but shall have fulfilled the pre-requisite qualification and experience.
2.7.1.4	Environmental/ Energy Manager	The Contractor shall provide an Environmental/Energy Manager whose primary duty and responsibility is to ensure Contractor operations adhere to the goals and policies of the Environmental Management System, the Installation Energy Plan, and other specified Sustainability requirements affecting this contract. The Environmental/Energy Manager shall develop, implement and monitor environmental strategies, policies and programs that promote sustainable development and examine the contract activities to establish where improvements can be made and ensure compliance with environmental legislation and energy policy. The Environmental/Energy Manager shall have a minimum of two years' experience with environmental procedures similar to those of this contract; familiarity with Environmental Management Systems (EMSs); and knowledge of environmental regulations and federal energy laws and policy (including energy and water reduction requirements and renewable energy requirements) that are applicable to operations similar to those of this contract.
2.7.2	Employee Requirements	The Contractor shall provide experienced, qualified, and capable personnel to perform the work in this contract. Personnel shall be fully knowledgeable of all safety, environmental, and energy requirements associated with the work they perform. Personnel shall speak, read, and comprehend English to the extent that they can perform the contract requirements and comply with installation emergency procedures.
2.7.2.1	Employee Certification and Training	The Contractor shall maintain personnel certification, training, and licensing records for employee requirements specified herein and within all technical annexes/sub-annexes. Certification, training, and licensing records shall be kept current and on file for the duration of the contract including all option periods. Records shall be made available for Government review within 4 hours of request.
2.7.2.2	Employee Appearance	The Contractor shall ensure that all employees present a professional appearance that is appropriate for their position. The KO reserves the right to determine the acceptability of any clothing worn. All Contractor/subcontractor employees working under this contract shall be identified by a distinctive nameplate, emblem, or patch attached in a prominent place on an outer garment. Employee identification shall not be substituted for station required passes or badges.
2.7.2.3	Employee Conduct	Contractor employees shall conduct themselves in a proper, efficient, courteous and businesslike manner.
2.7.2.4	Identification as Contractor Employee	Contractor employees shall identify themselves as Contractor personnel by introducing themselves or being introduced as Contractor personnel and displaying distinguishing badges or other visible identification for meetings with Government personnel. All Contractor employees shall appropriately identify themselves as contractor employees in both verbal communication and electronic or written correspondence.
2.7.2.5	Removal of Employees	The Contractor shall remove from the site any individual whose continued employment is deemed by the KO to be contrary to the public interest or inconsistent with the best interests of National Security.
2.7.2.6	Proof of Legal Residency	No employee or representative of the Contractor will be admitted to the site of work unless satisfactory Proof of Legal Residency is submitted per Section F.

Section C – 0200000
Management and Administration

0200000 - Management and Administration		
Spec Item	Title	Description
2.7.3	Service Contract Reporting (SCR)	The Contractor shall report total dollar amount invoiced and all contractor labor hours (including subcontractor labor hours) required for performance of services provided under this contract via a secure data collection site. The contractor is required to completely fill in all required data fields using the following web address: https://www.sam.gov. Per Section F, reporting inputs will be for the labor executed during the period of performance during each Government fiscal year (FY), which runs from October 1 through September 30. While inputs may be reported any time during the FY, all data shall be reported no later than October 31 of each calendar year. Contractors may direct questions to the help desk, linked at https://www.sam.gov.
2.8	Security Requirements	The Contractor shall comply with all Federal, state, and local security statutes, regulations, and requirements. The Contractor shall become acquainted with and comply with all Government regulations as posted, or as requested by the KO when required to enter a Government site. The Contractor shall ensure that all security/entrance clearances are obtained. The Contractor shall ensure that Contractor personnel do not present a risk to security. By entering the installation, Contractor personnel are subject to installation, state, local and federal regulations and laws, including but not limited to debarment and criminal prosecution.
2.8.1	Employee Listing	The Contractor shall maintain a current Employee List and submit per Section F. The list shall include an employee's name, supervisor, company, and level of security clearance.
2.8.2	Vehicles	The company name shall be displayed on each of the Contractor's vehicles in a manner and of a size that is clearly visible. All vehicles shall display a valid state license plate that complies with the State Vehicle Code. Vehicles shall meet all other requirements of the State Vehicle Code, such as safety standards, and shall carry proof of insurance and state registration, if applicable.
2.8.3	Passes and Badges	All Contractor employees shall obtain the required employee and vehicle passes. The Contractor employees must be able to obtain Common Access Cards (CAC) in accordance with security requirements. Each employee shall wear the Government issued badge over the front of the outer clothing. When an employee leaves the Contractor's service, the employee's Passes and Badges shall be confiscated by the Contractor immediately and returned within 10 calendar days.
2.8.4	Access to Installation	All Contractor personnel shall obtain access to the installation through enrollment and registration into the Defense Biometric Identification System (DBIDS). The Contractor shall provide the KO with the name of their designated Service Contractor Administrator (SCA) for enrollment in DBIDS. Once enrolled, the Contractor must provide the DBIDS Registrar with an approved employee list and then direct their employees to register into DBIDS.
2.8.4.1	DBIDS Program	DBIDS is an enterprise identity management and perimeter installation access control solution in which Contractor personnel who enroll, and are approved, are subsequently granted access to the installation for a period up to three years, or the length of the contract, whichever is less, and are not required to obtain a new pass from the Base Pass and Identification Office for each visit. There are no fees associated with obtaining a DBIDS credential.

Section C – 0200000
Management and Administration

0200000 - Management and Administration		
Spec Item	Title	Description
		The Government performs background screening and credentialing. Throughout the year, the Contractor employee must continue to meet background screening standards. Periodic background screenings are conducted to verify continued DBIDS participation and installation access privileges. DBIDS access privileges will be immediately suspended or revoked if at any time a contractor employee becomes ineligible.
2.8.4.2	DBIDS Credentials	Contractor employees shall furnish a completed copy of the SECNAV 5512/1 form to obtain the required background check and visit the local Navy Installation Visitor Control Center to obtain a DBIDS credential once approved. The SECNAV 5512/1 form and additional information about DBIDS can be found at: https://www.cnic.navy.mil/om/dbids.html. The Contractor may initiate the adjudication process when a background screen failure results in disqualification from participation in DBIDS and the Contractor employees do not agree with the reason for disqualification. The Contractor may also apply for a waiver when a background screening failure results in disqualification from participation in DBIDS. The Commanding Officer will be the final waiver determination authority. The Contractor shall immediately collect employee DBIDS credentials and notify the KO in writing: (1) That an employee has departed the company without having properly returned or surrendered their DBIDS credentials. (2) That there is a reasonable basis to conclude that an employee, or former employee, might pose a risk, compromise, or threat to the safety or security of the installation or anyone therein.
2.8.5	Access to Buildings	The Contractor shall monitor and control access into restricted areas under their responsibility, allowing only those individuals who have been properly cleared into restricted areas or other controlled access areas. The Contractor shall comply with security requirements, plus those always imposed by the installation Commander. Personnel with access to restricted areas shall have the appropriate screening and shall wear special badges authorizing access for those areas. Contractor personnel shall not enter restricted or controlled areas or installation facilities unless specifically authorized in performance of their duties. The Contractor shall secure all buildings and facilities entered during non-duty hours and will secure all building and facilities under the Contractor's cognizance at the end of each workday or shift period.
2.8.6	Access Arrangements	The Contractor shall make all arrangements through the appropriate office necessary to obtain access to buildings, facilities and other work areas, and when necessary, arrange for them to be opened and closed by the controlling authority. The Government may issue keys to the Contractor. The Contractor shall use due diligence and be responsible for compromised security systems to include replacement costs that result from its action or inaction.
2.8.6.1	Escort Arrangement for Secured Areas	The Contractor shall make arrangements for a Government escort into secured areas requiring escort. The KO will provide information on applicable buildings, spaces and the appropriate point of contact. The Contractor may experience delays while waiting for escorts. The Government estimates the wait period can be up to 15 minutes. The Contractor shall notify the Government Performance Assessment

Section C – 0200000
Management and Administration

0200000 - Management and Administration		
Spec Item	Title	Description
		Representative (PAR) and appropriate point of contact if an escort is not available after 15 minutes and access to accomplish the work is denied. Unscheduled requirements may require a longer wait for an escort.
2.8.7	Security Clearances	The Contractor shall obtain all required corporate and personnel Security Clearances, prior to commencement of work, at no additional cost to the Government. The Contractor shall ensure that a list of all personnel with Security Clearances is maintained current, including clearances that are pending.
2.8.8	Access to Controlled Unclassified Information	The Contractor personnel whose work involves access to controlled unclassified information shall undergo a Tier 3 Investigation to verify their trustworthiness. If the Contractor personnel currently have a favorably adjudicated Tier 3 Investigation the Contractor shall notify the Government Command Security Manager who will validate this in the Joint Personnel Adjudication System (JPAS). The Contractor shall request from the Government for access to the E-QIP Direct program for the Contractor employees to complete the SF-86 form online for a Tier 3 Investigation. The Security Manager will determine suitability. Upon a favorable Tier 3 Investigation, the Contractor personnel shall submit the original signed release statements, and an OF-306 Declaration for Federal Employment to the Security Manager per Section F. Upon submission of the necessary documentation through eQIP, the Contractor Employee shall provide digital fingerprints. The Contractor's Security POC will notify the COR and the Security Manager when Contractor Employees have submitted their fingerprints. The request shall be renewed annually or for the duration of the contract if less than one year.
2.8.9	Access to Government Information Technology (IT), Operation Technology (OT), and Facility Related Control Systems (FRCS)	Personnel accessing Government IT and OT systems to include but not limited to Maximo, DMLSS, DDC, and SCADA are in positions considered Non-Critical Sensitive/IT-II and require a Tier 3 investigation to verify their trustworthiness. Prior to being granted access to Government IT, OT, and FRCS systems, personnel shall have a favorably adjudicated Tier 3 Investigation, obtain a CAC in accordance with security requirements, successfully complete required training, submit a Systems Authorization Access Request (SAAR) Form, and meet all eligibility requirements. Personnel accessing Government IT, OT, and FRCS systems shall complete annual required training such as cyber assurance awareness, information security (INFOSEC) awareness, and operations security (OPSEC) awareness. The Contractor shall submit a list of personnel requiring access to Government IT, OT, and FRCS systems per Section F.
2.8.10	Access to Navy Marine Corps Intranet (NMCI)	The Contractor may be required to access the Navy Marine Corps Intranet (NMCI). Prior to being granted access to NMCI, Contractor employees shall obtain a CAC in accordance with security requirements, successfully complete required training, submit a Systems Authorization Access Request (SAAR) Form, and meet all eligibility requirements.
2.8.11	Employee Status	The Contractor shall notify the KO of any changes to any employee's status to include, but not limited to, termination, convictions/arrests, adverse actions

Section C – 0200000
Management and Administration

0200000 - Management and Administration		
Spec Item	Title	Description
		taken on the job for any reason or any other documented misbehavior that may affect, or have the potential to affect, security standing in terms of access to federal facilities or IT systems.
2.9	Contractor Safety Program	The Contractor shall develop and implement a Safety Program detailing how the Contractor plans, staffs, performs, and controls all safety practices while delivering best value services to the Government without any accidents or mishaps. The Contractor's safety program shall comply with all safety standards identified in the U.S. Army Corps of Engineers Safety and Health Requirements Manual, EM 385-1-1, UFC 3-560-01 Operation and Maintenance Electrical Safety, and Public Law 91-596, Occupational Safety and Health Act. Any reference to "USACE" facilities, property, or equipment specified in EM 385-1-1 should be interpreted as Government facilities, property, and equipment.
2.9.1	Contractor Safety Requirements	Neither Contractor nor any subcontractor may enter into contract with any subcontractor that fails to meet the below requirements. The term subcontractor in this and the following paragraphs means any entity holding a contract with the Contractor or with a subcontractor at any tier.
2.9.1.1	Experience Modification Rate (EMR)	Subcontractors on this contract must have an effective EMR less than or equal to 1.10, as computed by the National Council on Compensation Insurance (NCCI) or if not available, as computed by the state agency's rating bureau in the state where the subcontractor is registered, when entering into a subcontract agreement with the Prime Contractor or a subcontractor at any tier. The Prime Contractor may submit a written request for additional consideration to the Contracting Officer where the specified acceptable EMR range cannot be achieved. Relaxation of the EMR range will only be considered for approval on a case-by-case basis for special conditions and must not be anticipated as tacit approval. Contractor's Site Safety and Health Officer (SSHO) must collect and maintain the certified EMR ratings for all subcontractors on the project and make them available to the Government at the Government's request.
2.9.1.2	OSHA Days Away From Work, Restricted Duty, or Job Transfer (DART) Rate	Subcontractors on this contract must have a DART rate, calculated from the most recent, complete calendar year, less than or equal to 3.4 when entering into a subcontract agreement with the Prime Contractor or a subcontractor at any tier. The Prime Contractor may submit a written request for additional consideration to the Contracting Officer where the specified acceptable OSHA Dart rate range cannot be achieved for a particular subcontractor. Relaxation of the OSHA DART rate range will only be considered for approval on a case-by-case basis for special conditions and must not be anticipated as tacit approval. Contractor's Site Safety and Health Officer (SSHO) must collect and maintain self-certified OSHA DART rates for all subcontractors on the project and make them available to the Government at the Government's request.
2.9.2	Accident Prevention Plan (APP)	The Contractor shall develop and implement a site Accident Prevention Plan (APP). The APP shall be prepared by the Contractor's SSHO and shall be followed by all Contractor employees, subcontractors, and vendors at each service site.

Section C – 0200000
Management and Administration

0200000 - Management and Administration		
Spec Item	Title	Description
		For multi-function/BOS/single function Facility Investment contracts – “The APP shall follow the format and include all elements addressed in Appendix A of EM 385-1-1. The APP shall incorporate Activity Hazard Analyses (AHAs) and compliance plans addressing all applicable Safety and Occupational Health (SOH) risks that are relevant to the site-specific hazards and controls for each activity and type of work that may be encountered in the performance of this contract. OR For low risk or limited scope contracts, e.g., single function custodial, grounds maintenance and landscaping, integrated solid waste management, pavement clearance, pest control – “The APP shall follow the abbreviated format and include, as a minimum, elements addressed in paragraph 3.k. of Appendix A of EM 385-1-1.” The Contractor shall submit an APP for acceptance per Section F. The Contractor shall review, update, and submit revisions to the APP whenever a change in work conditions, hazards, or activities occur. Submittal of the APP shall include Activity Hazard Analyses (AHAs) and applicable compliance plans, programs, and procedures as specified below. The Contractor shall not commence work until the APP has been accepted, and no activity shall be started on site until the applicable AHAs and compliance plans have been accepted. Once accepted by the Contracting Officer, the APP and attachments will be enforced as part of the contract. Disregarding the provisions of this contract or the accepted APP will be cause for stopping of work, at the discretion of the Contracting Officer, until the matter has been rectified.
2.9.3	Activity Hazard Analysis (AHA)	The Contractor shall prepare Activity Hazard Analyses (AHAs) for all applicable common recurring work activities performed under this contract. AHAs for recurring work shall be submitted with the APP and shall be updated as work activities or conditions change and additional AHAs prepared as new work activities are required. AHAs for non-recurring and one-time (e.g., non-recurring work task orders) work occurrences shall be submitted at least two working days prior to start of work. Specifically: • For contract modifications to recurring work requirements where changes are germane to the original contract, the Contractor shall revise applicable AHAs within 15 calendar days after modification is signed. • For contracts with non-recurring work ELINs, the Contractor shall submit an AHA on non-recurring work task orders, with the associated proposal, whenever the service environment or required task is different from the recurring work priced services. • For construction (including renovation or alteration) task orders placed on the non-recurring work portion of contract, the Contractor shall submit a separate AHA for each task order with the associated proposal.

Section C – 0200000
Management and Administration

0200000 - Management and Administration		
Spec Item	Title	Description
		The Contractor shall follow the Risk Management Process for the development of Activity Hazard Analysis (AHA) in accordance with paragraph 01.A.14 and Appendix A of EM 385-1-1. A formatted outline of an AHA is provided in Figure 1-2 of EM 385-1-1. During the performance of services, the SSHO shall periodically review the AHA at each service site and for each sub-annex to assess the effectiveness of the Contractor's overall APP. If changes to the AHAs are required, such changes shall be submitted to the KO for review and acceptance.
2.9.4	Safety and Occupational Health (SOH) Risks and Compliance Plans	Based on a risk assessment of recurring and non-recurring work requirements and on mandatory OSHA compliance programs, the Contractor shall develop, provide and implement all applicable compliance plans, as necessary for the situation or types of work to be performed under this contract. Compliance plans, programs, and procedures along with their respective references are detailed in Appendix A, paragraph 3.i of EM 385-1-1. These plans shall be submitted with the APP and shall be updated as situations change. Additional compliance plans, programs, and procedures shall be developed as applicable when new types of work are required under this contract. Additional requirements for specific compliance plans are provided below. Include only that compliance plans required for this contract that reference additional regulatory or statutory requirements beyond that specified in EM385-1-1.
2.9.4.1	Alcohol and Drug Abuse Prevention Plan	The Contractor shall develop an alcohol and drug abuse prevention plan to explain how it will satisfy the drug-free work force requirement as stated in DFARS Clause 252.223-7004 and include elements addressed in paragraph 01.C.02 of EM 385-1-1.
2.9.4.2	Chemical Hazard Communication Program	The Contractor shall develop a project-specific chemical hazard communication program to include elements addressed in paragraph 06.B.01 of EM 385-1-1 and applicable OSHA requirements in 29 Code of Federal Regulations (CFR) 1910.120 and 29 CFR 1926.59.
2.9.4.3	Confined Space Program	The Contractor shall develop an activity/site-specific confined space program to include elements addressed in paragraph 34.A of EM 385-1-1 and comply with relevant requirements in 29 CFR 1910, 29 CFR 1915, and 29 CFR 1926, OSHA Directive CPL 2.100 and any other Federal, state and local regulatory standards.
2.9.4.4	Critical Lift Plan	The Contractor shall develop a critical lift plan to explain how it will conduct lifts for any of the following conditions: 1) Lifts over 75 percent of the capacity of the crane or hoist (or lifts over 50 percent of the capacity of a barge mounted mobile crane's hoists) at any radius of lift. 2) Lifts involving more than one crane, hoist, or LHE. 3) Lifts of personnel. 4) Lifts involving non-routine rigging or operation, sensitive equipment, or unusual safety risks. 5) Lifts involving hazardous materials (e.g., explosives, highly volatile substances). 6) Lifts where the center of gravity could change. 7) Lifts without the use of outriggers using rubber tire load charts. 8) Lifts using more than one hoist on the same crane, hoist, or LHE.

Section C – 0200000
Management and Administration

0200000 - Management and Administration		
Spec Item	Title	Description
		9) Lifts involving Multiple Lift Rigging (MLR) Assemblies or other non-routine or technically difficult rigging arrangements. 10) Lifts involving submerged loads. Exception: lifts that were engineered to travel in guided slots throughout the lift and have fixed rigging and/or lifting beams, i.e., intake gates, tailgates/logs). 11) Lifts out of the operator's view. (Exception: if hand signals used by a signal person in view of the operator or radio communications are available and in use, load does not exceed two tons AND is determined a routine lift by the lift super.) The critical lift plan shall include elements addressed in paragraph 16.H of EM 385-1-1, paragraph 1.7.2 of NAVFAC P-307, and comply with requirements in ASME B30.22, ASME B30.3; ASME B30.5, and ASME B30.8. The Contractor shall complete and maintain a copy of the Crane Operating Checklist for Critical Lifts, provided within the Forms in 0200000-05, for each lift.
2.9.4.5	Fall Prevention and Protection Plan	The Contractor shall develop a site-specific fall prevention and protection plan to protect and prevent its service workers from falling from heights of 1.8m (6 feet) or more. This plan shall include elements addressed in paragraph 21.D of EM 385-1-1 and ANSI A10.32, ANSI Z359.1, and ANSI/ASSE A10.34. The fall prevention and protection plan shall include a Rescue and Evacuation Plan in accordance with EM 385-1-1, Section 21.N. A competent person for fall protection shall prepare and sign the plan.
2.9.4.6	Pathogen Exposure	The Contractor shall always comply with 29 CFR-1910.1030 if personnel are performing work where they may be exposed to blood or other potentially infectious materials. The Contractor shall develop an Exposure Control Plan. This plan shall comply with 29 CFR-1910.1030, be reviewed annually to ensure compliance, and be accessible to employees. Employees required to access areas subject to higher exposure risk (such as hospitals, clinics, and laboratories) shall submit to all required testing and receive vaccinations as required by the installation.
2.9.4.7	Control of Hazardous Energy (lockout/tagout)	The Contractor shall establish a program and utilize procedures for affixing appropriate lockout devices or tagout devices to energy isolating devices, and to otherwise disable machines or equipment to prevent unexpected energization, start up or release of stored energy to ensure compliance with 29 CFR 1910.147. The Contractor shall submit a report of their periodic inspection of the energy control procedure that ensures the procedures, and the requirements of 29 CFR 1910.147 are being followed per Section F.
2.9.5	Crane Operations	All operations of Cranes, Multi-Purpose Machines and Material Handling Equipment shall comply with EM 385-1-1, NAVFAC P-307, 29 CFR Part 1910, and 29 CFR Part 1926. The Contractor shall comply with paragraph 1.7.2 of NAVFAC P-307 and notify the Contracting Officer at least 24 hours prior to bringing any crane (including delivery vehicles with crane boom attachments), multi-purpose machines, material handling equipment, or construction equipment that may be used in a crane-like application to lift suspended loads on board a Navy

Section C – 0200000
Management and Administration

0200000 - Management and Administration		
Spec Item	Title	Description
		Installation. Written documentation of the last weight test of the crane and all related weight handling equipment (e.g. attachments, rigging gear, etc.) shall be maintained on site. A joint verification with the Government representative must be performed to ensure that a legible and indelible completed copy of Appendix P, Figure P-1 of NAVFAC P-307 is maintained on the crane, multi-purpose machine, and material handling equipment or construction equipment used in a crane-like application to lift suspended loads. The following certification and testing documentation shall be on site prior to entry and use on any Navy Installation: 1) Crane, multi-purpose machine, material handling equipment or construction equipment used in a crane-like application to lift suspended load certification 2) Load testing 3) Yearly, monthly and daily inspection logs 4) Rope/sling certifications 5) Operator certifications/designations 6) Designation of person performing log inspections 7) Cranes that are permanently located on a Navy Installation shall have quarterly joint verification.
2.9.5.1	Crane Inspections	The Contractor shall ensure all inspections are performed in accordance with EM 385-1-1, NAVFAC P-307, 29 CFR Part 1910, and 29 CFR Part 1926 (daily, monthly, quarterly, yearly), and retain the current documentation of inspections. Documents shall be kept on site. Daily pre-use inspections and testing shall be performed on all load hoisting and lowering mechanisms, boom hoisting and lowering mechanisms, swinging mechanisms, travel mechanisms (if to be used that day), and safety devices. Cranes that must be re-rated shall be in accordance with SAE Recommended Practices, Crane Load Stability Test Code J765 and documentation maintained on site. The Contractor shall have an operational anti-two block device or a two-block damage prevention feature for all points of two blocking and a boom hoist disconnect, shutoff, or hydraulic relief to automatically stop the boom hoist when the boom reaches a predetermined high angle.
2.9.5.2	Rigging Gear	The Contractor shall ensure rigging gear and below the hook lifting devices and personnel comply with the following requirements: 1) Personnel performing rigging shall understand all signs, notices, and operating instructions, and be familiar with the applicable hand signals prescribed by the ASME B30 standard for the type of crane in use. 2) Personnel performing rigging shall be familiar with the rigging requirements in EM 385-1-1, NAVFAC P-307, 29 CFR Part 1910, and 29 CFR Part 1926. 3) The Contractor shall inspect rigging gear in accordance with EM 385-1-1, NAVFAC P-307, 29 CFR Part 1910, and 29 CFR Part 1926 and paragraph 1.7.2 of NAVFAC P-307. Certification records shall be made available for review upon request.
2.9.5.3	Crane Operators	Crane operators shall meet the personnel qualifications requirements in paragraph 16.B of EM 385-1-1 and paragraph 1.7.2 of NAVFAC P-307. For mobile cranes with Original Equipment Manufacturer (OEM) rated capacities of 2,000 pounds or greater, designate crane operators as qualified

Section C – 0200000
Management and Administration

0200000 - Management and Administration		
Spec Item	Title	Description
		by a source that qualifies crane operators (i.e., union, a government agency, or an organization that tests and qualifies crane operators).
2.9.6	Accident and Damage Reporting	The Contractor shall notify the Contracting Officer as soon as practical, but no more than four hours after any accident meeting the definition of Recordable Injuries or Illnesses or High Visibility Accidents, property damage equal to or greater than \$2,000, or any Weight Handling Equipment (WHE) accident. Notification shall also be provided for any mishap occurring in any of the following high hazard areas: electrical (to include Arc Flash, electrical shock, etc.); uncontrolled release of hazardous energy (includes electrical and non-electrical); weight or load handling equipment (LHE) or rigging; fall-from-height (any level other than same surface); and underwater diving. These mishaps shall be investigated in depth to identify all causes and to recommend hazard control measures. Within notification include Contractor name; contract title; type of contract; name of activity, installation or location where accident occurred; date and time of accident; names of personnel injured; extent of property damage, if any; extent of injury, if known, and brief description of accident (to include type of equipment used, PPE used, etc.). Preserve the conditions and evidence on the accident site until the Government investigation team arrives on-site and Government investigation is conducted. The Contractor shall conduct an accident investigation for recordable injuries and illnesses, for accidents requiring Medical Treatment, property damage accidents resulting in at least \$20,000 in damage, and near misses as defined in EM 385-1-1, to establish the root cause(s) of the accident. The Contractor shall complete the applicable NAVFAC Contractor Incident Reporting System (CIRS), and electronically submit via the NAVFAC Enterprise Safety Applications Management System (ESAMS) per Section F. Required or special forms are provided within the Forms in 0200000-05. For any weight handling equipment accident (including rigging gear accidents) the Contractor shall conduct an accident investigation to establish the root cause(s) of the accident and comply with additional requirements and procedures for accidents in accordance with NAVFAC P-307, Section 12. The Contractor shall submit a WHE Accident Report (Crane and Rigging Gear) per Section F. No crane operations are allowed to proceed until the cause is determined and corrective actions have been implemented to the satisfaction of the Contracting Officer. For a near miss, the Contractor shall complete the applicable documentation in NAVFAC Contractor Incident Reporting System (CIRS), and electronically submit via the NAVFAC Enterprise Safety Applications Management System (ESAMS) per Section F. For a near miss involving crane or rigging operations, the Contractor shall report verbally to the Contracting Officer as soon as management becomes aware but not later than 4 hours of such event and comply with additional requirements and procedures for near-misses in accordance with NAVFAC P-307, Section 12. A near miss occurs when an accident was avoided by mere chance or when intervention prevented an ongoing sequence of events that would have resulted in an accident (e.g. unplanned encroachment, improper

Section C – 0200000
Management and Administration

0200000 - Management and Administration		
Spec Item	Title	Description
		crane set-up, improperly rigged load, etc.). The Contractor shall submit a Crane and Rigging Gear Near Miss Report per Section F.
2.9.6.1	Accident Reporting and Notification Criteria	The following criteria and definitions apply to the accident reporting requirements specified above: Recordable Injuries or Illnesses. Any work-related injury or illness that results in: 1) Death, regardless of the time between the injury and death, or the length of the illness. 2) Days away from work (any time lost after day of injury/illness onset). 3) Restricted work. 4) Transfer to another job. 5) Medical treatment is beyond first aid. 6) Loss of consciousness; or 7) A significant injury or illness diagnosed by a physician or other licensed health care professional, even if it did not result in (1) through (6) above. High Visibility Accident. Any mishap which may generate publicity or high visibility. Medical Treatment. Treatment administered by a physician or by registered professional personnel under the standing orders of a physician. Medical treatment does not include first aid treatment even through provided by a physician or registered personnel. WHE Accident. A WHE accident occurs when any one or more of the eight elements in the operating envelope fails to perform correctly during operation, including operation during maintenance or testing resulting in personnel injury or death; material or equipment damage; dropped load; derailment; two-blocking; overload; or collision, including unplanned contact between the load, crane, or other objects. A dropped load, derailment, two-blocking, overload and collision are considered accidents even though no material damage or injury occurs. A component failure (e.g., motor burnout, gear tooth failure, bearing failure) is not considered an accident solely due to material or equipment damage unless the component failure results in damage to other components (e.g., dropped boom, dropped load, roll over, etc.)
2.9.7	Fire Protection	The Contractor shall know where fire alarms are located and how to activate them. The Contractor shall handle and store all combustible supplies, materials, waste and trash in a manner that prevents fire or hazards to persons, facilities, and materials.
2.9.8	Monthly On-Site Labor Report	The Contractor shall submit a Monthly On-Site Labor Report per Section F. This report is a compilation of employee hours worked each month for all site workers, both prime and subcontractor. Monthly On-Site Labor Report shall be provided unprotected and capable of being sorted to the ELIN/Sub-ELIN level.
2.9.9	OSHA Citations and Violations	The Contractor shall correct violations and citations promptly and submit a copy of each OSHA citation and OSHA report with written OSHA Citations and Violations Corrective Action Report per Section F.

Section C – 0200000
Management and Administration

0200000 - Management and Administration		
Spec Item	Title	Description
2.9.10	Safety Inspections and Monitoring	The Contractor shall conduct inspections of its work areas, job sites, and work crews every day. Work is being performed to ensure that all Contractor operations are being conducted safely. These inspections shall ensure: • The site is safe and free of job-site hazards • Proper PPE is being utilized and worn. • Safe work practices and processes are being followed. • Workers are familiar with the hazards covered in the respective AHA for that work activity. • All equipment and tools are in good condition and being used safely. The Government reserves the right to inspect and monitor Contractor operations for safety compliance. In general, the Government approach will be to conduct Performance Assessment on the quality and effectiveness of the Contractor's safety program. The Government reserves the right to stop any work activity when it deems danger is imminent. Contractor personnel shall work in a safe manner and comply with all applicable safety regulations. The Contractor shall be subject to safety inspections of its work sites by the Government. Contractor safety records shall be available to the KO upon request. Whenever the KO becomes aware of any safety noncompliance or any condition which poses a serious or imminent danger or hazard to the health or safety of the public or Government Personnel, the KO will notify the Contractor orally, with written confirmation, and request immediate corrective action. This notice, when delivered to the Contractor's representative or SSHO, shall be deemed sufficient notice of noncompliance and that corrective action is required. After receiving this notice, the Contractor shall immediately take corrective action. If the Contractor fails, delays, or refuses to promptly take corrective action, the KO may issue a stop work order for all or part of the services or work until satisfactory corrective action has been taken. Whenever such a stop work order has been issued, the Contractor shall waive all equitable adjustments to the contract related to the stop work ordered issued. The Contractor shall include this requirement in all of its subcontracts and vendor contracts in support of contract safety. The Contractor shall submit a copy of the Contractor Safety Inspection and Monitoring Report per Section F. The Contractor Safety Inspection and Monitoring Report shall include a narrative of significant events; a tabulated summary and results of the safety inspection and monitoring events performed; inspection-driven corrective actions taken and the results attained; and management process adjustments during the previous month.
2.9.11	Safety Certification	The Contractor shall submit copies of all the required Federal, state, county, city and industry Safety Certifications for work performed under this contract per Section F. These certifications shall be kept up to date by the Contractor. The Contractor shall submit new versions of certifications as the old certifications expire. No work that requires a certification, shall start without a valid and approved certification.
2.9.12	Safety Apparel on Jobsites	The Contractor personnel shall wear appropriate high-visibility safety apparel meeting ANSI/ISEA 107-2010 and DOT regulations for traffic control. Appropriate garments shall be based on the worker hazards and tasks, complexity of the work environment or background, and vehicular traffic and

Section C – 0200000
Management and Administration

0200000 - Management and Administration		
Spec Item	Title	Description
		speed. As a minimum, the Contractor personnel shall wear ANSI/ISEA 107-2010 Class I compliant apparel.
2.9.13	Emergency Medical Treatment	Contractors will arrange for their own emergency medical treatment. The Government has no responsibility to provide emergency medical treatment.
2.9.14	Excavations	Soil classification must be performed by a competent person in accordance with 29 CFR 1926 and EM 385-1-1. The Contractor shall provide a third party, independent, private utility locating company to positively identify underground utilities in the work area in addition to any station locating service and coordinated with the station utility department. The Contractor shall physically verify underground utility locations, including utility depth, by hand digging using wood or fiberglass handled tools when any adjacent work is expected to come within 3 feet of the underground system. Utilities located within and under concrete slabs or pier structures, bridges, parking areas, and the like, are extremely difficult to identify. Whenever contract work involves chipping, saw cutting, or core drilling through concrete, bituminous asphalt or other impervious surfaces, the existing utility location shall be coordinated with station utility departments in addition to location and depth verification by a third party, independent, private locating company. The third party, an independent, private locating company must locate utility depth by use of Ground Penetrating Radar (GPR), X-ray, bore scope, or ultrasound prior to the start of work. Outages to isolate utility systems must be used in circumstances where utilities are unable to be positively identified. The use of historical drawings does not alleviate the Contractor from meeting this requirement.
2.10	Environmental Management and Sustainability	The Contractor shall perform work under this contract consistent with the Installation's Environmental Management System (EMS) goals and policy. Goals: • Reduce purchase and use of toxic and hazardous materials. • Expand purchase of green products and services; increase recycling. • Reduce energy and water use. • Increase use of alternative fuels and renewable energy. • Integrate green building concepts in major renovations and new construction. • Prevent pollution at the source; and • Continual improvement. Policy: • Protect public health and the environment by being an environmentally responsible member of the community. • Preserve our natural, historic and cultural resources. • Conserve natural resources by reducing what we discard, reusing items, and recycling materials, which include purchasing products made from recycled materials; • Integrate sound environmental practices into all our operations and business decisions; Integrate environmental protection requirements and pollution prevention initiatives into the early planning, design and procurement of facilities, equipment and material, as well as the planning and implementation of military training activities.

Section C – 0200000
Management and Administration

0200000 - Management and Administration		
Spec Item	Title	Description
		• Prevent or minimize pollution at its source as we seek out ways to eliminate or further minimize use of hazardous materials and generation of hazardous waste. • Maintain a sound partnership with regulatory agencies to sustain our compliance with existing and new environmental laws and regulations. • Enhance our program as we develop and implement an Environmental Management System; and • Adhere to this policy, remind one another to do so, and ensure that our entire community knows this is our policy by our actions as well as our words. The Contractor shall maintain monitoring and measurement information to address the EMS goals and policy and provide the EMS Goals and Policy Measurement Information to the KO per Section F. In the event an EMS nonconformance or environmental noncompliance associated with the contracted services, tasks, or actions occurs, the Contractor shall take corrective actions, assume legal and financial liability for the noncompliance and take corrective action immediately to remedy the noncompliance. The Contractor shall ensure that its employees are aware of their roles and responsibilities under the EMS and how these EMS roles and responsibilities affect work performed under the contract.
2.10.1	Energy Management Program	The Contractor shall comply with the installation's energy management program. The Contractor PM, or designee, shall represent the Contractor's interest at all meetings of the activity's Energy Management Board. The Contractor shall attend periodic meetings with the Installation Energy Manager, where energy and water efficiency goals and project status will be discussed to ensure that any Contractor work complements and optimizes efficiency efforts.
2.10.1.1	Water Conservation Plan	The Contractor shall develop, submit and implement a Water Conservation Plan per Section F.
2.10.1.2	Energy Efficient Products	The Contractor shall use life-cycle cost analysis in making decisions about investments in products, services, construction and other projects to lower Federal Government's costs and reduce energy consumption. The Contractor shall elect lifecycle cost effective Energy Star and other energy-efficient products when acquiring energy-using products. For product groups where Energy Star labels are not yet available, select products that are in the upper 25 percent of energy efficiency as designated by the Federal Energy Management Program. Use of high-energy consuming tools or equipment is subject to approval by the KO prior to use.
2.10.2	Environmental Protection	The Contractor shall comply with all applicable Federal, state, and local laws, regulations, and executive orders, and with base-wide instructions, standards, and permit requirements. All environmental protection matters shall be coordinated with the KO. Inspection of Contractor operated facilities may be conducted by the Installation Environmental Protection Coordinator or other authorized officials on a no-notice basis. The Contractor shall comply with the instructions of the cognizant Navy Medical Department with respect to avoidance of conditions which create a nuisance, or which may be hazardous to the health of military or civilian personnel. The Contractor is responsible for ensuring that its employees receive applicable environmental and occupational health and safety training and are kept up to date on all required

Section C – 0200000
Management and Administration

0200000 - Management and Administration		
Spec Item	Title	Description
		regulatory and specific training for the type of work to be conducted onsite. All on-site Contractor personnel, and their subcontractor personnel, performing tasks that have the potential to cause an impact to the environment shall be competent based on appropriate education, training or experience. The Contractor shall develop, submit, and implement an Environmental Protection Plan per Section F.
2.10.2.1	Sampling, Testing and Laboratory Services	The Contractor shall develop a written training plan and documentation of training for all sampling, testing, and laboratory personnel to demonstrate technical proficiency. The Contractor shall develop a written sampling plan for each sampling event and submit per Section F. The sampling plan shall summarize what will be sampled, the sampling equipment expected to be used, and the number and location of samples expected to obtain a representative sample. The Contractor shall re-sample, test and obtain laboratory analysis upon request and submit results per Section F, at no additional cost to the Government. The Contractor shall provide collection and analytical testing of samples in accordance with the latest version of the test methods set forth in 40 CFR 261, 40 CFR 262 or Test Methods for evaluating Solid Waste, Physical/Chemical Methods, EPA Publication SW0846 and State of Florida, Department of Environmental Protection Sampling SOPs. The laboratory shall be certified by the State of Florida Department of Health for the specific analytical procedure in accordance with all Federal and State regulations. Analytical reports shall be in the format described in the Florida Administrative Code (FAC) 62-160.
2.10.2.2	ODS Requirements for Refrigerant Recycling	The Contractor shall comply with all federal, state and local environmental laws and regulations, and specifically requirements of Sections 608 and 609 of the Clean Air Act Amendments (CAAA) of 1990, 40 Code of Federal Regulation Part 82 (40 CFR 82) and of paragraph 22-3.6 (Management of Ozone-Depleting Substances) of OPNAVINST 5090.1 Environmental Readiness Program Manual, and Navy ODS Advisory 96-02 Refrigerant Leak Repair and Record Keeping as pertaining to this contract. Technicians shall be certified through an EPA approved program. Copies of the certifications shall be maintained at the employee's place of business and/or carried as a wallet card by the technician. All certificates shall be legible. Certifications shall be for the type of equipment they will be using (Universal Certification is preferred). Contracting Officer (KO) shall be provided with a copy of all certificates. Contractor shall use only EPA approved refrigerant recovery equipment. A list of equipment including name of manufacturer, model number, serial number, date manufactured and a list of names of EPA Certified Technicians shall be provided at the start of contract and whenever requested by KO. Recordkeeping shall document and demonstrate contractor compliance with regulatory and Navy requirements cited above. A Government ODS Tracking and Inventory System (OTIS) database will be provided for contractor use. The contractor may choose to use a commercially available ODS recordkeeping and tracking software if it provides similar recordkeeping and is deemed acceptable to the KO. Other methods of maintaining and

Section C – 0200000
Management and Administration

0200000 - Management and Administration		
Spec Item	Title	Description
		tracking ODS recordkeeping requirements and compliance demonstration may be presented for consideration in lieu of using one of the above cited software if it meets regulatory recordkeeping requirements and is approved by KO. All records for work on refrigerant equipment shall contain at a minimum, the date, the technician's name, certification ID, equipment identifier and location, work performed, amount of refrigerant added or removed, and final determination of equipment status. A complete, up to date inventory of refrigerant equipment (maintained under this contract and Contractor owned) on board the installation shall be maintained at all times. The contractor is responsible for updating all recordkeeping software and for maintaining accurate and up to date refrigerant records. Contractor shall provide the KO with an updated copy of OTIS database or representative software data files quarterly and at conclusion/termination of contract. Contractor's ODS records shall be readily available for inspection by government and regulators Records are maintained for all refrigerant removal operations performed prior to small appliance or motor vehicle air condition appliance disposal. The recovery date, technician's name and a statement that all refrigerant that had not previously leaked was removed in accordance with 40 CFR 82 shall be included in the disposal records. A weather resistant label or tag shall be placed on units pending disposal stating harmful refrigerants and oil have been removed from the unit in compliance with Section 608 of the CAA. The label or tag shall provide the company name & address, technician name, phone number, and date refrigerant were removed. Records shall be kept for all refrigerant recovery operations/services performed on equipment that normally contains 50 pounds or more refrigerants will include the service date, service description, amount of refrigerant purchased, and amount of refrigerant added. Refrigerant leaks on equipment, which normally contain 50 pounds or more refrigerant, are repaired within 30 days of leak discovery. Leak repairs for equipment normally containing 50 pounds or more refrigerants are documented, including the date of leak discovery and date repaired, technician's name, amount of refrigerant vented, and amount purchased and added. Satisfactory leak repair verification tests are documented within 30 days of repair. Records detailing accidental venting of ODS are maintained; these records shall include as a minimum the date, type, location, amount vented, and reason for venting. Records detailing the type and amount of refrigerant purchases shall be kept. Only excess Class I ODS is to be returned to DLA and not private contractors (R-11, 12, 113, 114, 500, 502). All reclaimed class I refrigerant shall be stored in approved containers, made for the intended purpose and transported by the Contractor to the Defense Logistics Agency (DLA) at the following address:

Section C – 0200000
Management and Administration

0200000 - Management and Administration		
Spec Item	Title	Description
		DLA Distribution SW0400 ODS Cylinder Operations Open Shed 6 Chippenham Parkway Entrance, Gate 13 Richmond, Virginia 23297-5000 Once the Contractor has delivered the refrigerant to DLA in Richmond, the Contractor shall submit a Class I and II ODS Report per Section F. Contractor ODS records shall be available to the KO upon request.
2.10.2.3	Solid Waste Management and Recycling	The Contractor shall comply with the installation's Solid Waste Management Plan(s) and OPNAVINST 5090.1 series for Contractor generated waste. The Contractor shall submit Solid Waste Management Reports per Section F. The Solid Waste Management Reports Form is provided within the Forms in 0200000-05. The Contractor shall recycle concrete, scrap metal, tires, wooden pallets, cardboard, asphalt, yard waste and submit quarterly reports with recycling weight ticket receipts per Section F.
2.10.2.4	Non-Regulated Waste Disposal	Not applicable
2.10.2.5	Regulated Waste Disposal	Not applicable
2.10.2.6	Universal Waste	Not applicable
2.10.2.7	Spill Prevention, Containment, and Clean-up	The Contractor shall prevent, contain, clean up, and report all spills on Government property caused by the Contractor, in a manner that complies with applicable Federal, state, and local laws and regulations and with the Installation Hazardous Waste Management Plans; and Spill Prevention, Control, and Countermeasure Plans provided in 0200000-05 at no additional cost to the Government. The Contractor shall report all fuel and hazardous substance spills on NAVFAC within 15 minutes of discovery to the Regional Dispatch Center by dialing 911 from a station landline. If you are calling from a device not connected to a station landline, notify the emergency dispatcher you are calling from Kaneohe MCBH and you will be transferred to the Regional Dispatch Center. The Contractor shall notify the KO as soon as possible but not more than 24 hours after spill. Spill reports shall be submitted within 48 hours.
2.10.2.8	Hazardous Material Management	Not Applicable
2.10.2.9	Protection of Endangered and Threatened Species (Flora and Fauna)	The Contractor shall not disturb endangered and threatened species and their habitat. The Contractor shall carefully protect in-place and report immediately to the KO endangered and threatened species discovered in the course of work. The Contractor shall stop work in the immediate area of the discovery until directed by the KO to resume work.
2.10.2.10	Noise Control	The Contractor shall comply with all applicable Federal, state and local laws, ordinances, and regulations relative to noise control.
2.10.2.11	Salvage	All material and equipment removed or disconnected, that is sound and of value, shall remain the property of the Government. The Contractor shall deliver this material and equipment at the Contractor's expense.

Section C – 0200000
Management and Administration

0200000 - Management and Administration		
Spec Item	Title	Description
2.10.2.12	Asbestos Containing Material (ACM)	Asbestos containing insulation, flooring, and other building materials may be encountered by the Contractor during the performance of work under this contract, and the Contractor shall remain alert to this possibility. If ACM is encountered or suspected in the performance of work, the Contractor shall avoid removing, sanding, abrading, or disturbing the material. The Contractor shall verbally notify the KO within one hour and submit a written ACM Notification within 24 hours per Section F.
2.10.2.13	Air Quality	The Contractor shall comply with State of Hawaii, Hawaii Department of Health and Environmental Protection Agency reporting requirements. The Contractor shall track all Hazardous Air Pollutants (HAPs) used in contract maintenance and repair operations. The Contractor shall provide HAP data monthly, including Subcontractors, for application of coatings, solvents (including stripping solvents), adhesives, and other volatile organic compounds and/or HAPs containing material to miscellaneous parts in booths, buildings, hangars, ships, and open-air surface coating operations, per Section F. A sample HAP tracking form is provided within the Forms in 0200000-05. The Contractor shall track Hazardous Air Pollutants on a monthly rolling average and submit semi-annual reports per Section F.
2.10.3	Sustainable Procurement and Practices	The Contractor shall develop, submit, and implement a Sustainable Procurement and Practices Plan per Section F. This plan shall identify how the Contractor will comply with all applicable Federal, state and local laws and regulation, including E.O. 13514, Installation Energy Management Program and Water Conservation Programs and energy reduction requirements. The plan shall specifically address the following components: • Recycled Contents Products • Energy/Water efficiency • Energy Efficient Tools and Equipment • Alternate Fuels and Alternate Fuel Vehicles • Biobased Products • Non-Ozone Depleting Products • Environmental Preferred Products and Services • Low/Non-Toxic and Hazardous Materials The Contractor shall submit an annual Sustainable Delivery of Services Report per Section F.
2.10.3.1	Environmentally Preferable Products	The Contractor shall procure and use products that are energy-efficient (Energy Star or Federal Energy Management Program (FEMP)-designated), water efficient, bio-based, environmentally preferable (e.g., Electronic Product Environmental Assessment Tool (EPEAT)-registered), non-ozone depleting, contain recycled content, or are non-toxic or less toxic alternatives, where such products and services meet performance requirements.
2.10.3.2	Use of Recovered Materials	The Government has an affirmative procurement program to promote the purchase of products containing recovered materials. The intent is to reduce the solid waste stream and conserve natural resources by establishing markets for recycled content products and encouraging manufacturers to produce quality products containing recovered materials. Participate in this program by using, for Environmental Protection Agency (EPA) designated items, recovered materials to the maximum extent practicable without jeopardizing

Section C – 0200000
Management and Administration

0200000 - Management and Administration		
Spec Item	Title	Description
		the intended end use of the item. The percentage of recovered materials content levels for use in the performance of this contract will be, at a minimum, the amount recommended in the EPA Comprehensive Procurement Guideline (CPG) Product Index website (http://www.epa.gov). Use of EPA designated products is not required for products that are either not available within a reasonable period of time, are not available at a reasonable price, are not available from a sufficient number of sources to maintain a satisfactory level of competition or fail to meet performance standards based on technical verification. EPA designation of products is an on-going process. Listings of EPA designated products containing recovered materials are found in 40 CFR 247. Make recommendations and submit Recovered Material Certification, per Section F, when a product containing recovered materials is equal to or better than the original and could be used for this contract. All changes of products must be accepted by the KO prior to its use.
2.10.3.3	Use of Biobased Products	The Contractor shall make maximum use of biobased products in accordance with the FAR Clause 52.223-2 -- Affirmative Procurement of BIOBASED Products Under Service and Construction Contracts. Information about these products is available at http://www.usda.gov
2.11	Disaster Preparedness	The Contractor shall comply with the installation's Contingency Instruction the Contractor shall support the installation contingency response plan as directed by the KO. The Contractor shall submit their Mission Essential Contractor Services Plan and a list of their Mission Critical/Mission Essential Personnel per Section F.
2.12	Technical Library	Existing technical library contents, including facility drawings, operation & maintenance manuals, warranties, Government publications, record drawings and other appropriate material, will be furnished by the Government. The Contractor shall continually update library material to ensure all data is current, complete, accurate and suitable for intended use. The Contractor shall monitor the use of the libraries to ensure materials are returned and data integrity is not compromised. The Contractor shall maintain the libraries until completion or termination of the contract and make the libraries available for inspection by prospective offerors for successive contracts. The technical library contents are the property of the Government and shall be turned over to the KO upon completion or termination of the contract. The Contractor shall submit the Technical Library Table of Contents per Section F.
2.13	Warranty Management	Prior to performing repair work, the Contractor shall report to the KO any defects in workmanship, material, or parts, and any improper installation of equipment and components that are covered by a warranty. The Contractor is responsible for knowing which equipment and components are covered by the original warranty and the warranty duration. The KO will provide available warranty documents.
2.14	Recurring Work Procedures	
2.14.1	Recurring Work Preparation of Proposals	The Contractor shall price additions or deletions to the Recurring Work requirements using the unit prices bid by the Contractor for Non-Recurring Work Unit Priced Tasks (UPTs). If Non-Recurring Work does not include a corresponding UPT for a specific work requirement for addition or deletion to the Recurring Work requirements, the Contractor shall propose on that

Section C – 0200000
Management and Administration

0200000 - Management and Administration		
Spec Item	Title	Description
		specific work requirement in accordance with the Non-recurring Work Preparation of Proposal requirements specified below. Additional markups shall not be included since the cost for these items were included in the unit prices bid by the Contractor for Non-Recurring Work. This may result in the Contractor's proposal consisting of UPT unit price(s), Unit Priced Labor (UPL) Hour(s), Material pricing, or a combination thereof. Recurring Work proposals, including detailed scopes of work and detailed estimates for modification to the Recurring Work requirements shall be submitted per Section F.
2.14.2	Notification to the Government for Work Above the Recurring Work Limitations	The Contractor is fully responsible for work up to the recurring work limits. Recurring work limits are specified in subsequent annexes or sub-annexes. When work is expected to exceed the recurring work limits, the Contractor shall notify the KO and provide a rough order of magnitude (ROM) estimate for the work exceeding the Contractors recurring work limits of liability within two hours of identification for further direction. The Government may issue a service order in accordance with the recurring work provisions of this contract order work in accordance with the non-recurring work provisions of this contract detailed below or accomplish the work by means other than this contract. The Contractor shall provide a detailed scope of work and detailed estimate, per Section F, per the non-recurring work procedures in Spec Item 2.15 for any potential task orders resulting from work that exceeded a recurring work limit of liability in the contract. The estimate shall include the full scope of work and clearly show the deductions for the applicable recurring work limit of liability. The resultant proposed price shall be for the portion of the work exceeding the recurring work limit of liability. Further, the Contractor shall prepare and provide scopes of work and estimates in this manner to the KO when requesting a determination that a recurring work limit of liability has or will be exceeded.
2.14.3	Recurring Work Exhibit Line Item Numbers (ELINs)	Recurring work Exhibit Line Item Numbers (ELINs) are provided in 0200000-09 through 0200000-14.
2.15	Non-recurring Work	Non-recurring work is identified in each applicable annex or sub-annex. Non-recurring work may consist of Unit Priced Task (UPT) Work (non-negotiated) and Unit Priced Labor (UPL) Work (negotiated). The Contractor shall perform all non-recurring task work as ordered by the KO per Section G and DoD FedMall requirements. Non-recurring work will consist of Unit Priced Tasks and Unit Priced Labor Work which may be ordered by the Government as separate items or in combinations of items from the Non-recurring Work Exhibit Line Items (ELINs) provided in Section J on an as needed basis.
2.15.1	Unit Priced Task (UPT) Work (Non-Negotiated)	A UPT is defined as a non-recurring work item that includes all direct and indirect costs plus profit associated with the unit of work. All materials and equipment (rented, leased or Contractor-owned) required for the accomplishment of a UPT shall be included within the respective exhibit line item prices. The fixed price for the task order is determined by multiplying the exhibit line item unit prices by the quantities ordered. The Contractor is not required to submit cost estimates for UPTs.
2.15.1.1	Acceptance and Performance	The Contractor shall offer indefinite quantity (IQ) pre-priced line item services to authorized Government personnel when they are ordering the work directly via the Government-wide Commercial Purchase Card (GCPC)

Section C – 0200000
Management and Administration

0200000 - Management and Administration		
Spec Item	Title	Description
		program. When receiving GCPC orders against Section B, the Contractor shall provide the supplies and services at the offered price without an additional markup or handling fee. The Contractor shall accept, and process electronically submitted GCPC orders for IQ services, including those orders issued through the FedMall. FedMall is a U.S. Government (USG) owned and operated web-based ordering system that enables any Department of Defense (DoD) or Federal activity to search for and order goods and services. Authorized GCPC users will receive approved accounts on FedMall to view and order IQ line items. The Contractor shall receive electronic IQ orders from FedMall using 128-bit encrypted email. The Contractor shall purchase, install, and utilize the most recent version of PGP Personal software, or a comparable solution, for the purpose of decrypting order notification emails from FedMall. In addition, the DoD has established the External Certification Authority (ECA) program to support the issuance of DoD-approved certificates to Contractors. The ECA program is designed to provide a mechanism for Contractors to securely communicate with the DoD and authenticate to DoD Information Systems. The Contractor shall purchase, install, maintain and use a DoD-approved ECA certificate. Information on obtaining an ECA certificate can be found at https://public.cyber.mil/eca/ The Contractor shall post updates on order delivery schedule and performance to the FedMall in a timely manner. The Contractor shall track quantities and report total ordered quantity in FedMall and approved DD 1155's by line item number each month and year-to-date. The report shall be due to the Contracting Officer by the fifth day of the following month, per Section F. The Contractor must track and report when total dollar value of all orders from both GCPC purchases and DD 1155s exceed 75% of the combined Section B Pre-Priced Line Item quantities.
2.15.1.2	Invoicing and Receiving Payment	Payment for completed FedMall orders will be made using the Government wide Commercial Purchase Card (GCPC). Reference “payment by third party” clause FAR 52.232-36. The Contractor shall possess the capability to invoice and receive payment for non-recurring work via an electronic medium with supported command representatives utilizing their GCPC. No partial or advance payments will be provided.
2.15.2	Unit Priced Labor (UPL) Work (Negotiated)	The Contractor shall perform all UPL work in accordance with the scope and delivery schedule negotiated per each task order. UPL work is defined as non-recurring work that utilizes negotiated labor hours and materials to accomplish a task not required by the recurring work portion of the contract. UPL includes separately priced labor, material, and equipment exhibit line items. The Contractor shall prepare and furnish a detailed cost estimate identifying proposed labor, material, and equipment costs, which upon approval by the KO, becomes the fixed price for the task order.
2.15.2.1	Non-recurring Work Preparation of Proposals	The Contractor shall submit non-recurring work proposals to the KO, per Section F. Proposals shall include: 1) a complete list of all tasks necessary to perform the required scope of work, 2) the number of direct labor hours to perform each task and 3) the projected quantity and costs of materials and equipment to perform the required scope of work.

Section C – 0200000
Management and Administration

0200000 - Management and Administration		
Spec Item	Title	Description
2.15.2.1.1	Labor Requirements	Accepted industry time standards published in R. S. Means Facility Maintenance and Repair Cost Data, industry organizations, and similar estimating sources shall be used for determining the number of direct labor hours required to complete the scope of work. If not provided in RS Means or a similar estimating source, labor hours may be based on quotes from at least three different commercial vendors. The total labor cost will be determined by totaling the number of direct labor hours and then multiplying by the UPL amount in the Non-Recurring Work Exhibit Line Items (ELINs) provided in Section J. The Government retains the right to obtain additional quotes. The lowest quoted labor hours shall be used.
2.15.2.1.2	Direct Material and Construction Equipment Requirements	Direct material and construction equipment costs published in R. S. Means Facility Maintenance and Repair Cost Data, national material supplier catalogues, U.S. Army Corps of Engineers Construction Equipment Ownership and Operating Expense Schedule (EP 1110-1-8), equipment rental catalogues, and similar estimating sources shall be used for determining customary and reasonable costs for the direct material and construction equipment estimate. If not provided in RS Means or a similar estimating source, direct material prices may be based on national material supplier catalogue pricing or quotes from at least three different commercial vendors. Projected direct material requirements shall include a list of materials establishing the size, quality, number of units, and unit prices. Pre-expended bin supplies and materials shall not be included in the list of direct materials since the cost for these items is to be included in the labor hour unit price. Direct material prices shall be the lowest price available considering the availability of materials and the time constraints of the job. The direct material price shall include all discounts and rebates for core value and salvage value that accrue to the Contractor and Contractor-furnished warehousing cost. Construction equipment costs shall include rental and lease costs, ownership costs where Contractor-owned, construction equipment mobilization, and tools, not priced under the recurring work portion of the contract. The direct material price will be multiplied by the Contractor's non-recurring work material fixed burden rate. The Government retains the right to obtain additional quotes in questionable situations. The lowest price shall be used.
2.15.2.2	Issuance of Final Task Order	The KO will order unit priced labor by issuing to the Contractor a copy of the approved scope of work and a task order for the work described, in accordance with Section G. Task order completion times will be specified on each task order.
2.15.3	Non-recurring work ELINS	Non-recurring Work Exhibit Line Item Numbers (ELINs) are provided in 0200000-09 through 0200000-14.

Spec Item	Title	Description
2	Management & Administration	
2.1	Definitions and Acronyms	Definitions and Acronyms are listed in Attachment 1503010-01.
2.2	Personnel	The Contractor shall provide personnel with the qualifications, technical knowledge, experience and skills required for efficient operations within the custodial function.
2.2.1	Certification, Training, and Licensing	The Project Manager, Site Safety and Health Officer and other Contractor personnel performing work where they may be exposed to blood or other potentially infectious materials shall receive pathogen training prior to beginning service. The Contractor shall submit Pathogen Training Certificates.
2.3	Special Requirement	Contractors are to use “green” initiatives and use recycled materials and environmentally friendly products as much as possible.
2.4	References and Technical Documents	References and Technical Documents are listed in Attachment 1503010-02.

1503010 - Custodial				
Spec Item	Title	Performance Objective	Related Information	Performance Standard
3	Recurring Work	The Contractor shall provide custodial services to ensure facilities are clean and sightly.	The Contractor's cleaning techniques and products shall protect the integrity of surfaces, finishes and floor coverings. The Contractor's will be required to visit and clean the site a minimum 2 times a week to include service following directly after drill weekends. Provide services at the associated frequencies shown by Service Class in Attachments 1503010-03 and 1503010-05. Custodial Supply requirements are found in Attachment 1503010-04. Room Inventories can be found in Attachment 1503010-05. Maps & Locations for Custodial Services and Floor Plans are included in Attachment 1503010-07. A Custodial Inventory is provided in Attachment 1503010-06 detailing floor types and surface area, fixtures, and other relevant information.	Facilities are clean and sightly, consistent with the specified Service Level and/or Service Class.
3.1	Scheduled Services	The Contractor shall provide scheduled custodial services to ensure facilities are clean and sightly.	The Contractor shall develop and submit an Annual Work Schedule and Monthly Work Plan for custodial services. The schedule shall clearly indicate the day of performance of each service for each building.	Facilities are clean and sightly, consistent with the specified Service Class in Attachment 1503010-03. Work is completed in accordance with the Contractor's schedule.
3.1.1	Space Cleaning	The Contractor shall clean spaces to ensure they are clean and sightly.	The Contractor shall return furniture and other items moved during performance to their original positions.	Spaces are clean and sightly. Furniture and other items moved returned to original position.

1503010 - Custodial				
Spec Item	Title	Performance Objective	Related Information	Performance Standard
3.1.1.1	Emptying Waste Containers	The Contractor shall empty waste containers and ensure they are clean.	Waste collection excludes individual items that exceed 20 pounds in weight. All waste that is dropped during the waste removal process shall be picked up and properly disposed. All spills that occur during the waste removal process shall be properly treated and cleaned. The Contractor shall collect all waste from desk-side waste containers and/or interior collection points. All waste shall be moved to designated refuse containers.	Waste containers are empty and clean. Waterproof liners are provided and replaced when soiled or unserviceable. Services are performed at the specified frequencies.
3.1.1.2	Emptying Recycling Containers	The Contractor shall empty recycling containers and ensure they are clean.	The Contractor shall collect and dispose of items placed adjacent to recycling containers and marked "RECYCLE." Waste collection excludes individual items that exceed 20 pounds in weight. All recyclable material that is dropped during the removal process shall be picked up and properly disposed. The Contractor shall provide liners for plastic and glass containers. The Contractor shall collect all recyclable material from desk-side recycling containers and/or interior collection. All recyclable materials shall be moved to building collection site.	Recycling containers are empty and clean. Services are performed at the specified frequencies.
3.1.1.3	Low Area Cleaning	The Contractor shall provide low area cleaning services to ensure surface areas are clean.	Low area cleaning includes dusting and wiping clean all furniture and fixtures (e.g., partitions, radiators, handrails, grills, ledges, sills, walls, moldings, ledges, baseboards, doors, and light fixtures) to a maximum height of 7'-0" above floor level.	Surfaces are clean. Cleaning is performed at the specified frequencies.

1503010 - Custodial				
Spec Item	Title	Performance Objective	Related Information	Performance Standard
			Low area cleaning does not include desktops of occupied cubicles or offices.	
3.1.1.4	Lunch/Break Room Cleaning	The Contractor shall provide cleaning services in lunch/break room areas to ensure areas are clean and sanitary.	Employee lunch/breakroom areas shall include sinks, countertops, trash containers, cooking equipment, coffee makers, and dining areas. Where present, soap and paper towel dispensers shall be refilled. The Contractor shall collect all waste from lunch/break room areas. All waste shall be moved to designated refuse containers. All waste that is dropped during the waste removal process shall be picked up and properly disposed.	Lunch/break room is clean and sanitary. Lunch/break room waste containers are empty, clean, and waterproof liners have been replaced. Dispensers are refilled and supplies are stocked. Services are performed at the specified frequencies.
3.1.1.5	High Area Cleaning	The Contractor shall provide high area cleaning services to ensure surfaces are clean.	High area cleaning includes dusting and wiping clean all surfaces above 7'-0" from floor level (e.g., overhead piping, light fixtures, ceiling fans, vents, and ceiling areas). The Contractor shall clean the exterior and interior surfaces of the light fixture. The Contractor shall ensure that overhead fixtures are protected from damage. High area cleaning includes removal of all debris created, including debris falling into low areas.	Surfaces are clean. Cleaning is performed at the specified frequencies.
3.1.1.6	Interior Window Cleaning	The Contractor shall clean window surfaces and adjacent areas to ensure that surfaces are clean and sightly.	Interior window cleaning shall be scheduled concurrently with exterior window cleaning. Interior window cleaning shall include wiping clean all window sashes, sills, woodwork, and other surroundings of glass.	All interior windows are clean and sightly. Cleaning is performed at the specified frequencies.

1503010 - Custodial				
Spec Item	Title	Performance Objective	Related Information	Performance Standard
3.1.1.7	Exterior Window Cleaning	The Contractor shall clean window surfaces and adjacent areas to ensure that surfaces are clean and sightly.	Where storm windows exist, the Contractor shall clean both sides of the storm window and the outside of the inner glass. When screens are present, the Contractor shall remove and clean the screen such that it is free of debris and dust before reinstalling over cleaned windows. Work will not be considered complete until screens are reinstalled. Exterior window cleaning shall be scheduled concurrently with interior window cleaning.	All exterior windows are clean and sightly. Cleaning is performed at the specified frequencies.
3.1.1.8	Window Blinds Cleaning	The Contractor shall clean window blinds to ensure they are clean and available for use in a timely manner.	The Contractor shall clean both sides of blinds. Blinds may be removed for cleaning.	Blinds are clean and in the same operational condition as prior to cleaning. If removed for cleaning, blinds are returned to their original location within two working days. Cleaning is performed at the specified frequencies.
3.1.1.9	Entrance Cleaning	The Contractor shall clean doors and all associated glass of the entrance to ensure doors and glass surfaces are clean and sightly.	Entrances surfaces include but are not limited to doors, associated transoms, and sidelights. When the entry is an atrium entrance the Contractor shall clean both sets of doors and all associated glass. Surfaces shall be free of all dirt and provide a clear, streak-free, smudge-free and mark-free appearance regardless of height.	Glass surfaces are clean and sightly on both sides and for the full height of the glass. Doors are clean and free of all dirt and marks. Cleaning is performed at the specified frequencies.
3.1.1.10	Interior Glass Surfaces Cleaning	The Contractor shall clean all interior glass to ensure glass	Glass surfaces include but are not limited to interior doors, partitions, and walls.	Glass surfaces are clean and sightly on both sides and

		surfaces are clean and sightly.	Surfaces shall be free of all dirt and provide a clear, streak-, smudge- and mark-free appearance regardless of height.	for the full height of the glass. Cleaning is performed at the specified frequencies.
3.1.1.11	Drinking Fountains Cleaning	The Contractor shall clean drinking fountains to ensure they are clean, sanitary, and sightly.	Drinking fountain surfaces shall be properly disinfected.	Drinking fountains are clean, sanitary, and sightly. Cleaning is performed at the specified frequencies.
3.1.1.12	Lactation Rooms	The Contractor shall service lactation rooms to ensure they are clean, sanitary, sightly, and stocked with sufficient supplies.	Lactation room cleaning shall include sinks, countertops, and trash containers. Where present, soap and paper towel dispensers shall be refilled. The Contractor shall collect all waste from lactation rooms. All waste shall be moved to designated refuse containers.	Lactation rooms are clean, sanitary, and sightly. Lactation room waste containers are empty, clean, and waterproof liners have been replaced. Dispensers are refilled and supplies are stocked. Services are performed at the specified frequencies.
3.1.2	Floor Care	The Contractor shall provide floor care services to ensure they are clean and sightly.	The Contractor shall move furniture, non-permanent rugs and other floor coverings prior to floor care services. The Contractor shall return furniture, rugs, floor coverings, and other items moved during services to its original position. When caring for raised deck floors, the Contractor shall ensure that all items below the floor are protected from damage. Floor care services shall be performed in a manner that	Floors are clean and sightly consistent with the specified Service Level and/or Service Class.

1503010 - Custodial				
Spec Item	Title	Performance Objective	Related Information	Performance Standard
			minimizes interference with daily operations. The Contractor shall post warning signs and barricades in areas of floor care operations, as appropriate, to ensure personnel safety. Floors in Dust Free spaces shall be serviced using equipment which emit airborne particles no larger than 0.3 micrometers and are 99.9% efficient. Dust Free service areas are identified in the Custodial Inventory provided in 1503010-05. Equipment to be used in these spaces requires prior approval of the KO. The Contractor shall maintain equipment used in these spaces at optimum serviceability. Equipment that cannot achieve the specified requirements shall be replaced immediately by the Contractor.	
3.1.2.1	Sweeping and Dust Mopping	The Contractor shall sweep or dust mop uncarpeted floors to ensure floors are free of debris and dust.	The Contractor shall sweep or dust mop uncarpeted floors, including stairwells and elevators.	Floors are free of debris and dust. Services are performed at the specified frequencies.
3.1.2.2	Vacuuming Carpets and Rugs	The Contractor shall vacuum carpets and rugs to ensure they are free of debris and dust.	The Contractor shall provide spot cleaning as needed.	Carpets and rugs are free of debris and dust. Services are performed at the specified frequencies.
3.1.2.3	Cleaning Walk-off Mats	The Contractor shall clean the walk-off mats and surfaces below the mats to ensure mats and surfaces are clean.	The Contractor shall return mats to their original locations after cleaning. The Contractor shall notify the KO when walk-off mats are defective, missing, or not serviceable.	Walk-off mats and surfaces below the mats are clean. Services are performed at the specified frequencies.
3.1.2.4	Spray Cleaning and Buffing	The Contractor shall spray clean and buff floors to	The Contractor shall ensure there is no buildup or residue on	Floors are clean and have a uniform glossy finish.

		and stocked with sufficient supplies.	The Contractor shall clean locker rooms and showers as part of restroom services.	with restroom supplies. Services are performed at the specified frequencies.
3.1.3.1	Restroom Cleaning	The Contractor shall clean and disinfect restrooms to ensure they are clean, sanitary, and free of offensive odors.	All cleaning materials and equipment used in restrooms shall not be used in any other areas outside the restrooms. Cleaning materials, including sponges, cloths, brushes, and similar items, used to clean toilets, urinals, floors, and walls shall not be used to clean showers, lavatories and sinks. All restroom floors, walls, partitions, fixtures, mirrors, and shower areas shall be disinfected. All graffiti from restroom surfaces shall be removed. All waterless urinals shall be maintained in accordance with manufacturers' recommendations, and at the frequency required by use. Waterless urinals are listed on the Custodial Inventory provided in 1503010-05.	All restrooms are clean, sanitary, and free of offensive odors. No graffiti present on restroom surfaces. Cleaning is performed at the specified frequencies.
3.1.3.2	Restroom Servicing	The Contractor shall service restrooms to ensure they are stocked with sufficient supplies and waste containers are emptied.	Restroom supplies include toilet paper, toilet seat protectors, soap, and paper towels. Utilize dispenser where available. The Contractor shall collect all waste from all restrooms. All waste shall be moved to designated refuse containers. All waste that is dropped during the waste removal process shall be picked up and properly disposed.	Restroom supplies are filled to capacity and are available. Restroom waste containers are empty, clean, and waterproof liners have been replaced. Services are performed at the specified frequencies.

1503010 - Custodial				
Spec Item	Title	Performance Objective	Related Information	Performance Standard
3.1.4	Group Shower/Locker Room Cleaning	The Contractor shall provide cleaning services in group shower/locker rooms to ensure areas are clean and sanitary.	All cleaning materials and equipment used in shower/locker rooms shall not be used in any other areas outside the shower/locker rooms. Cleaning materials, including sponges, cloths, brushes, and similar items, used to clean toilets, urinals, floors, and walls shall not be used to clean showers, lavatories and sinks. The Contractor shall collect all waste from all shower/locker rooms. All waste shall be moved to designated refuse containers. All waste that is dropped during the waste removal process shall be picked up and properly disposed. Shower/locker room supplies include toilet paper, toilet seat protectors, soap, and paper towels. Utilize dispenser where available.	All shower/locker rooms are clean, sanitary, and free of offensive odors. Shower/locker room waste containers are empty, clean, and waterproof liners have been replaced. Shower/locker room supplies are filled to capacity and are available. Cleaning is performed at the specified frequencies.
3.1.5	Building Perimeter Services	The Contractor shall provide building perimeter services to ensure that they are sightly.	The building perimeter is defined as an area within five feet from the building outside wall and shall be extended to include associated porches, patios, sidewalks, and designated smoking areas.	Building perimeters are sightly consistent with the specified Service Level and/or Service Class.
3.1.5.1	Debris Removal	The Contractor shall remove debris from the building perimeter to ensure a sightly appearance.	The Contractor shall deposit all debris in the designated waste container.	Building perimeters is clear of debris. Services are performed at the specified frequencies.
3.1.5.2	Emptying Perimeter Waste Containers	The Contractor shall empty perimeter waste containers and ensure they are clean.	The Contractor shall empty waste containers, excluding dumpsters, located in the perimeter area. The Contractor shall pick up all waste around the containers.	Waste containers are empty and clean. Waterproof liners are provided and replaced when

			The Contractor shall collect and dispose of items placed adjacent to waste containers. The Contractor shall empty ash urns and refill or replace sand as necessary. All waste that is dropped during the waste removal process shall be picked up and properly disposed. Provide waterproof liners and replace when needed.	soiled or unserviceable. Services are performed at the specified frequencies.
3.2	Custodial Service Orders	The Contractor shall perform custodial service order work in a timely manner to accomplish any custodial work identified within the entire boundary of the installation to ensure requirements are responded to and completed in accordance with specified standards.	The Contractor shall receive custodial service orders in accordance with the work reception requirements in Annex 2. The Contractor shall schedule and perform custodial service orders in a way that minimizes disruptions to customers and Government operations. The Government may issue custodial service orders for work requirements at any location within the defined boundaries of this contract for any reason at the discretion of the KO. Custodial service orders will include a wide variety of work. The Contractor has full responsibility for any work up to the custodial service order limit of liability of \$500 in direct labor and direct material cost per custodial service order. The Government will only pay for the portion of direct labor and direct material that exceeds the custodial service order limits of liability. The Contractor shall notify the KO upon identification that the custodial service order will exceed the specified limits of	Custodial service order work is completed within the period of performance specified on the custodial service order. Custodial service orders are signed by the original requestor or PAR prior to being closed.

Spec Item	Title	Performance Objective	Related Information	Performance Standard
			liability in accordance with reporting requirements in Annex 2. If non-recurring work is issued for the portion exceeding the specified custodial service order limits of liability, the Government will only pay for the portion of direct labor and direct material that exceeds the custodial service order limits. Example: If a custodial service order requires \$600 in direct labor and direct material cost, the Government may issue a task order in accordance with the Non-Recurring Work provisions of the contract for the \$100 in direct labor and direct material cost that exceeds the custodial service order limit of liability. The Contractor may invoice for completed custodial service orders. The Contractor shall not invoice for incomplete custodial service orders and custodial service orders not issued. A modification will be processed at the end of each period of performance to deduct for custodial service orders not issued and incomplete custodial service orders. Deduction will be based on the unit prices specified in Attachment 0200000-09 ELINs. The Contractor shall submit a monthly summary of completed custodial service orders per Section F.	

1503010 - Custodial				
Spec Item	Title	Performance Objective	Related Information	Performance Standard
4	Non-Recurring Work	Non-Recurring work may be ordered utilizing DoD FedMall in accordance with Section H or on a task order in accordance with the PROCEDURES FOR ISSUING ORDERS clause in Section G. The order will specify the exact location and types of work to be accomplished. The period of performance will be specified in each order.	Refer to Non-Recurring Work ELINs for task listings, descriptions, and related requirements. All periods of performance are measured from issue date of order to acceptance of the work. Performance standards for non-recurring work will be the same as those in Spec Item 3 where applicable.

1503020 - Pest Control		
Spec Item	Title	Description
1	General Information	The Contractor shall provide all labor, supervision, management, tools, materials, equipment, facilities, transportation, and other items required to perform pest control services at Marine Corps Reserve Training Center, MCBH, Kaneohe, HI.
1.1	Concept of Operations	The Contractor shall perform pest control services in conformance with the Integrated Pest Management Plan (IPMP) to prevent and control the following pests: --Unwanted vegetation and invasive plants --Nuisance, structure damaging, lawn, turf and ornamental, and public health pests – cockroaches – termites – bees – wasps – ants – fleas – silverfish – stored product pests – mosquitoes – bedbugs --Vertebrate pests – mice – rats – bats – feral dogs and cats – other nuisance mammals – pigeons and other nuisance birds

1503020 - Pest Control		
Spec Item	Title	Description
2	Management and Administration	
2.1	Definitions and Acronyms	Definitions and Acronyms are listed in 1503020-01.
2.2	Personnel	The Contractor shall provide personnel with qualifications, technical knowledge, experience and skills required for efficient operations within the pest control function.
2.2.1	Certification, Training and Licensing	All Contractor personnel who apply pesticides shall be certified by the State of Hawaii in the categories required to perform the work specified in this contract. No contractor personnel may work under the supervision of a certified person even where this is permitted practice in those States or host nations in which the DoD property is located. The DoDI 4150.07 DoD Pest Management Program defines certified pesticide applicators as individuals who have completed an EPA-approved training program that includes written examinations in core and specific application categories. All work performed shall be in accordance with Federal, DoD, state, local, and installation policies and regulations. Proof of certification shall be provided per Attachment 0200000-15.
2.3	Special Requirements	The Contractor will be required to sign in and out of every visit. This will also include keeping an accurate on-site log of all pest findings and treatments.
2.3.1	Business Licensing	The Contractor shall possess a business license issued by the applicable certifying source(s), to provide pest control services. Proof of local/state licensing shall be provided per Attachment 0200000-15 prior to contract award.
2.3.2	Permits	The Contractor shall obtain all necessary permits required to perform the work in this contract. Permits include Fish and Wildlife Bird Depredation Permit, permits to take fur bearing animals, or other permits required by Federal, State, or local regulations. A copy of any applicable permit shall be provided per Attachment 0200000-15.
2.3.3	Vehicles	Vehicles used to transport pesticides shall be equipped with a fire extinguisher, a spill containment kit capable of containing any potential pesticide spill, an emergency eye wash station, at least two gallons of emergency wash water for personal decontamination, and a first aid kit. All pesticides carried on vehicles shall be stored in a locked compartment separate from the cab of the vehicle. Vehicles shall not be left unattended at any time unless properly locked and secured. Pest control vehicles shall be marked with the owner's or Contractor's name clearly identified as a pest control vehicle per state regulations. Each vehicle shall display applicable state or federal department of transportation or agency placard and other identification markings as required by Federal, state, or local regulations. All vehicles shall be maintained with a clean and orderly appearance, free from pesticide residues or grime buildup. Vehicles shall not be cleaned, washed, or rinsed on Government property.
2.3.4	Equipment	The Contractor shall provide repair and maintenance as necessary to keep all equipment in good operating condition, and take appropriate action regarding the following: All tanks, hoses, pumps, control valves, and gauges shall be free of visible deterioration, shall not leak, and shall operate at the manufacturer's recommended rates and pressures. Equipment that has failed shall be replaced or repaired by the Contractor prior to resuming operations. Screens, strainers, and filters shall be used and maintained per the pump, sprayer, and nozzle manufacturer's instructions.

1503020 - Pest Control		
Spec Item	Title	Description
		Spray nozzles shall deliver spray patterns as specified by the nozzle manufacturer. Nozzles that become clogged or eroded shall be repaired or replaced by the Contractor prior to resuming operations. Ultra-Low Volume (ULV) equipment shall be calibrated to assure proper flow rate and droplet size of pesticide as required by the label. ULV equipment shall be calibrated, including droplet size analysis, 15 days prior to start of work and thereafter every 50 hours of use (or per manufacturer's recommendations), or when the machine is repaired. Calibration and droplet analysis reports, when required, shall be maintained on file and submitted per Section F. All pesticide dispersal equipment, including bait stations and trays, shall be clearly and plainly marked with "DANGER"... "PESTICIDES", or as required by applicable regulations. Specific equipment requirements relevant to individual Pest Groups are further delineated in the Pest Group Requirements in Attachment 1503020-06.
2.3.5	Pesticides	All pesticides must be used in accordance with Federal, DoD, State of Hawaii, local, and installation policies and regulations, and any requirements identified in attachments. All pesticides shall be procured, processed, handled, and applied in strict accordance with the manufacturer's label. All pesticides shall be registered with the EPA and the (Insert state name(s)) pesticide regulatory agency. The Contractor shall maintain a book of labels and Safety Data Sheets (SDSs) for pesticides they use or intend to use, and have it readily available for the COR's inspection at all times. All pesticides used by the Contractor in the US shall be registered with the EPA and applicable state lead agency for the use intended. New Pesticide Request and Planned Pesticide Use Sheet, provided in 1503020-02, including labels and SDS for each pesticide intended for use, shall be submitted per Attachment 0200000-15 with the Contractor's Work Plan. Approvals may be made for and limited to specific pests and sites. Any proposed changes in pesticide usage shall be submitted per Attachment 0200000-15 for approval prior to use.
2.3.5.1	New Pesticide Request and Planned Pesticide Use (PPU) Sheet	The New Pesticide Request and Planned Pesticide Use Sheet shall be included as part of the Contractor's Work Plan (CWP). One New Pesticide Request and Planned Pesticide Use Sheet shall be filled out for each pest that will be controlled with a pesticide. If more than one pesticide is used to control the pest, one New Pesticide Request and Planned Pesticide Use Sheet shall be filled out for each of the pesticides used per pest. A New Pesticide Request and Planned Pesticide Use Sheet shall be filled out whenever pesticides used to control a pest are changed. Completed New Pesticide Request and Planned Pesticide Use Sheet shall be attach to the CWP. The New Pesticide Request and Planned Pesticide Use Sheet shall be filled out on-line. The regional NAVFAC Applied Biology Center must be contacted to obtain a link to the website, password, and instructions to use the system. A screen shot of New Pesticide Request and Planned Pesticide Use Sheet is provided in 1503020-02.
2.3.5.2	Reporting	See Attachments 1503020-07 through 1503020-12
2.3.6	Disposal	All pesticides, rinse water, and containers shall be disposed of per pesticide label directions. The Contractor shall dispose of any pesticides, pesticide containers,

1503020 - Pest Control		
Spec Item	Title	Description
		pesticide residue, pesticide rinse water, or any pesticide contaminated articles at an authorized disposal area off-site from the installation.
2.3.7	Spills	Consult with installation environmental and fire department personnel to determine and insert installation requirements for Contractor spills of hazardous substances.
2.3.8	On-Site Mixing	The Contractor shall not mix pesticides on Government property unless specifically authorized by the COR. If mixing is authorized, it shall be done at an approved Government furnished facility or over an approved containment device. All water sources shall be equipped with proper back-flow prevention devices. An air gap shall be maintained between the water source and the pesticide tank.
2.3.9	On-Site Materials Storage	The Contractor shall not store pesticides on Government property unless specifically authorized by the COR. If storage is authorized, it shall be done at an approved Government furnished facility, if available. If a Government furnished facility is not available, the contractor shall furnish an approved storage facility. At a minimum, storage facilities shall be adequately secured, identified with warning signs, equipped with secondary spill containment and a ventilation system that provides at least six air changes per hour.
2.3.10	Occupied Spaces	Liquid or aerosol pesticides shall not be applied in occupied spaces when people are present. Dust pesticide formulations shall not be applied in occupied spaces if the dust can be carried by air currents to people. Gel baits, cockroach, rodent, and ant bait stations, or other pesticide formulations that do not volatilize or drift in air currents may be applied in occupied spaces.
2.3.11	Personal Protective Equipment (PPE)	The Contractor shall provide PPE to each of their pest control applicators. This equipment shall include, at a minimum, the PPE required by the pesticide label and SDS.
2.4	References and Technical Documents	References and Technical Documents are listed in 1503020-03.

1503020 - Pest Control				
Spec Item	Title	Performance Objective	Related Information	Performance Standard
3	Recurring Work	The Contractor shall provide pest control services to ensure pests are controlled in a proper and timely manner.	The Contractor shall comply with the Integrated Pest Management Plan (IPMP), and applicable DoD and OPNAV Instructions, and Federal, state, and local policies and regulations. Service Level Standards for Pest Control services are specified in 1503020-04. The Contractor shall develop and execute a plan for pest control services. The Contractor's Work Plan (CWP) shall adhere to applicable References and Technical Documents contained in 1503020-03. The CWP shall establish the strategy and methods for conducting a safe, effective, and environmentally sound pest management program in compliance with the specifications. The Contractor may review the installation's historical records of pest activity and abatement actions, survey facilities and grounds, and consult with the Installation IPMC in development of a CWP. The CWP shall address continuous monitoring, pest response and removal procedures, record keeping, warranties, education and communication to installation personnel to prevent pests and disease vectors, bird control on applicable airfields and in hangars, etc. The IPM approach should use targeted (i.e., effective, environmentally sound) methods including habitat/facility modification, biological/genetic/cultural control, mechanical/physical control, and where necessary, the judicious use of least hazardous pesticides. The CWP shall include labels, Safety Data Sheets, New Pesticide Request,	Services are performed as specified by and consistent with the Service Level Standards listed in 1503020-04. Pests are controlled to levels and within times specified in the Pest Group Requirements in Attachment 1503020-06 through Attachment 1503020-12.

1503020 - Pest Control				
Spec Item	Title	Performance Objective	Related Information	Performance Standard
			Planned Pesticide Use (PPU) Sheets, and comply with all applicable local, state, DoD and Federal policy and regulations, and the IPMP. The CWP shall be submitted per Section F for review, comments, and acceptance. The Contractor shall report conditions that promote or are conducive to pest infestations. These include sanitation problems, improper food storage practices, inadequate exclusion policies, or damaged or missing exclusion devices or the like. The Contractor shall report these conditions per Section F. Report must be legible and can be submitted electronically or hand-written to the COR/PAR.	
3.1	Scheduled Pest Control	The Contractor shall provide scheduled pest control services to ensure the appearance and infestation of pests are controlled in a proper and timely manner.	Scheduled pest control services shall include both inspection and treatment of the following categories of pests: nuisance pests, public health pests, structure damaging pests, lawn turf and ornamental plant pests, vegetation management, and vertebrate pests. The Contractor shall perform pest control for public health pests and pests that may adversely affect the DoD mission and military operations; the health and well-being of people; and structures, material, and property. Preventive applications of pesticide in the absence of a pest or signs/symptoms of a pest are prohibited except in cases, such as termite pretreatment, pre-emergence weed and mosquito larval control (in special circumstances, such as pre-flood), where it is an effective means of Integrated Pest Management (IPM).	Pests are controlled to levels and within times specified in the Pest Group Requirements in Attachments 1503020-06 through 1503020-12. Pest surveys are conducted at the Frequencies for Scheduled Work specified in 1503020-05.

1503020 - Pest Control				
Spec Item	Title	Performance Objective	Related Information	Performance Standard
3.1.1	Nuisance Pest Control	The Contractor shall control nuisance pests to ensure facilities are free from nuisance pests.	The Contractor shall perform scheduled pest control for Nuisance Pests at the facilities listed on the Frequencies for Scheduled Work table in 1503020-05. The following nuisance pest areas shall be inspected and treated, as necessary, per the General Requirements and Performance Standards specified within Nuisance Pest Requirements in 1503020-06: • 001 Ant Control • 002 Arthropod Control in Food Handling Establishments • 003 Cockroach Control • 004 Flea Control in and Around Buildings and Structures • 005 Miscellaneous Arthropod Pest Control • 006 Stored Product Pest Control (Arthropods)	Pest surveys are conducted at the Frequencies for Scheduled Work specified in 1503020-05. Pests are controlled to levels and within times specified for Nuisance Pest Requirements in 1503020-06.
3.1.2	Public Health Pest Control	The Contractor shall control public health pests to prevent vector borne diseases or impacts to public health.	The Contractor shall perform scheduled pest control for Public Health Pests at the facilities listed on the Frequencies for Scheduled Work table in 1503020-05. The following public health pest areas shall be inspected and treated, as necessary, per the General Requirements and Performance Standards specified within Public Health Pest Requirements in 1503020-07: • 007 Aerial Spray Support and Operations • 008 Adult Mosquito Control • 009 Adult Mosquito Control - Residual • 010 Adult Mosquito Surveillance • 011 Bed Bugs • 012 Bee, Wasp, Hornet, and Stinging Arthropod Control	Pest surveys are conducted at the Frequencies for Scheduled Work specified in 1503020-05. Pests are controlled to levels and within times specified for Public Health Pest Requirements in 1503020-07.

1503020 - Pest Control				
Spec Item	Title	Performance Objective	Related Information	Performance Standard
			• 013 Childcare Facilities/Sensitive Areas Pest Control • 014 Filth Fly Control • 015 Larval and Pupal Mosquito Control • 016 Larval Mosquito Surveillance • 017 Tick Survey and Control Outdoors • 018 Fire Ant Control	
3.1.3	Structure Damaging Pest Control	The Contractor shall control structure damaging pests to ensure facilities are free of structure damaging pests.	The Contractor shall perform scheduled pest control for Structure Damaging Pests at the facilities listed on the Frequencies for Scheduled Work table in 1503020-05. The following structure damaging pest areas shall be inspected and treated, as necessary, per the General Requirements and Performance Standards specified within Structure Damaging Pest Requirements in 1503020-08: • 019 Other Wood Destroying Organisms (Non-Termite) Control • 020 Survey for Termite and Wood Destroying Organisms	Pest surveys are conducted at the Frequencies for Scheduled Work specified in 1503020-05. Pests are controlled to levels and within times specified for Structure Damaging Pest Requirements in 1503020-08.
3.1.4	Lawn, Turf and Ornamental Plant Pest Control	The Contractor shall control lawn, turf and ornamental plant pests to ensure facilities are free of lawn, turf and ornamental plant pests.	The Contractor shall perform scheduled pest control for Lawn, Turf and Ornamental Plant Pests at the facilities listed on the Frequencies for Scheduled Work table in 1503020-05. The following lawn, turf and ornamental plant pests/pest areas shall be inspected and treated, as necessary, per the General Requirements and Performance Standards specified within Lawn, Turf and Ornamental Plant Pest Requirements in 1503020-09: • 021 Mole Cricket Control • 022 Turf and Ornamental Pest Control	Pest surveys are conducted at the Frequencies for Scheduled Work specified in 1503020-08. Pests are controlled to levels and within times specified for Lawn, Turf and Ornamental Plant Pest Requirements in 1503020-09.

1503020 - Pest Control				
Spec Item	Title	Performance Objective	Related Information	Performance Standard
3.1.5	Vegetation Management	The Contractor shall manage vegetation to ensure facilities are free of vegetation pests.	The Contractor shall perform vegetation management for aquatic and non-aquatic vegetation pests at the facilities listed on the Frequencies for Scheduled Work table in 1503020-05. The following vegetation pest areas shall be inspected and treated, as necessary, per the General Requirements and Performance Standards specified within Vegetation Management Requirements in 1503020-10: • 023 Aquatic Plant Control • 024 Industrial Sidewalk, Substation, Vault and Right-of-Way Weed Control • 025 Turf and Ornamental Bed Weed Control	Pest surveys are conducted at the Frequencies for Scheduled Work specified in 1503020-05. Pests are controlled to levels and within times specified for Vegetation Management Requirements in 1503020-10.
3.1.6	Vertebrate Pest Control	The Contractor shall control vertebrate pests to ensure facilities are free of vertebrate pests.	The Contractor shall perform scheduled pest control for Vertebrate Pests at the facilities listed on the Frequencies for Scheduled Work table in 1503020-05. The following vertebrate pest areas shall be inspected and treated, as necessary, per the General Requirements and Performance Standards specified within Vertebrate Pest Requirements in 1503020-11: • 026 Bat Control in Buildings • 027 Commensal Rodents in and Around Buildings and Structures • 028 Pest Bird Control • 029 Pest Vertebrate Control	Pest surveys are conducted at the Frequencies for Scheduled Work specified in 1503020-05. Pests are controlled to levels and within times specified for Vertebrate Pest Requirements in J-1503020-11.
3.2	Pest Control Service Orders	The Contractor shall perform service orders in a timely manner to ensure the appearance and infestations of pests are controlled.	The Contractor shall receive pest control service orders per the work reception requirements in Annex 2. The Contractor shall schedule and perform pest control service orders in a way that minimizes	Pests are controlled to levels and within times specified in the corresponding pest group requirements in Attachment 1503020-06

1503020 - Pest Control				
Spec Item	Title	Performance Objective	Related Information	Performance Standard
			disruptions to customers and Government operations. The Contractor shall respond to pest control service orders in accordance with the response times stated for each pest group performance standard in Attachment 1503020-06 through 1503020-11. The Contractor has full responsibility for any work up to the pest control service order limit of liability of \$500 in direct labor and direct material cost per pest control service order. The Government will only pay for the portion of direct labor and/or direct material that exceeds the pest control service order limits of liability. The Contractor shall notify the KO upon identification that the pest control service order will exceed the specified limits of liability in accordance with reporting requirements in Annex 2. If a non-recurring work is issued for the portion exceeding the specified pest control service order limits of liability, the Government will only pay for the portion of direct labor and/or direct material that exceeds the pest control service order limits. Examples of work exceeding the pest control service order limits of liability: • If a pest control service order requires \$600 in direct labor and direct material cost, the Government may issue a task order in accordance with the Non-Recurring Work provisions of the contract for the one direct labor hour and \$100 in direct material cost that exceeds the pest control service order limit of liability.	through 1503020-11.

1503020 - Pest Control				
Spec Item	Title	Performance Objective	Related Information	Performance Standard
			The Contractor may invoice for completed pest control service orders. The Contractor shall not invoice for incomplete pest control service orders and pest control service orders not issued. A modification will be process at the end of each period of performance to deduct for pest control service orders not issued and incomplete pest control service orders. Deduction will be based on the unit prices specified in Attachment 0200000-09 through 0200000-14 ELINs. The Contractor shall survey the area to determine the level of infestation prior to performing treatment. The Government may combine multiple services requirements recently received for the same general area, e.g., floor of a building or structure into a single pest control service order provided the Contractor's pest control service order limits of liability are not exceeded. Submit a monthly summary of completed pest control service orders.	
3.3	Pest Management Reporting	The Contractor shall report pest management operations to ensure the effectiveness and safety of control efforts can be monitored in a proper and timely manner.	The Contractor shall create and submit a completed electronic Pest Management Record for each pest management operation, both chemical and non-chemical, e.g., pest survey, pesticide application, pest control service order per Attachment 0200000-15. Refer to the New Pest Management Record provided in 1503020-14 for a sample of an online Pest Management Record. The Contractor shall submit the Pest Management Operations Report using the NAVFAC	Reports are accurate, complete and submitted at least monthly.

Grounds Maintenance and Landscaping

1503050 - Grounds Maintenance and Landscaping		
Spec Item	Title	Description
1	General Information	The Contractor shall provide all labor, management, supervision, tools, materials, and equipment necessary to provide grounds maintenance and landscaping services located at Marine Corps Reserve Training Center, MCBH, Kaneohe, HI.
1.1	Concept of Operations	The intent of 1503050 Grounds Maintenance and Landscaping is to specify the requirements related to prestige areas, lawns, fields, operational areas, and storm water system operation and maintenance, such as: mowing, trimming, edging, trash and debris removal, aeration, de-thatching, fertilization, irrigation systems operation and maintenance, tree maintenance, tree control, vegetation and weed control within the installation.

Section C – 1503050
Grounds Maintenance and Landscaping

1503050 - Grounds Maintenance and Landscaping		
Spec Item	Title	Description
2	Management and Administration	
2.1	Definitions and Acronyms	Definitions and Acronyms are listed in 1503050-01.
2.2	Personnel	The Contractor shall provide personnel with the qualifications, technical knowledge, experience and skills required to efficiently provide grounds maintenance and landscaping services.
2.2.1	Certification, Training, and Licensing	All Contractor personnel who apply pesticides/herbicides shall be certified by the State of Hawaii in the categories required to perform the work specified in this contract. No uncertified personnel may work under the supervision of a certified person even where this is permitted practice in those States or host nations in which the DoD property is located. In accordance with DoDI 4150.07 Volume 2, DoD Pest Management Training and Certification Program, Contractors applying pesticides/herbicides are required to have completed an EPA-approved training program that includes written examinations in core and specific application categories. All work performed shall be in accordance with Federal, DoD, state, and local laws, and installation policies and regulations. Proof of certification shall be submitted per Attachment 0200000-15 Deliverables.
2.3	Special Requirements	
2.3.1	Application of Herbicides	The Contractor shall comply with the requirements specified below for any work that involves the handling or application of herbicides.
2.3.1.1	Business Licensing	The Contractor shall possess a business license issued by the State of Hawaii, to provide pest/vegetation control services. Proof of local/state licensing shall be submitted per Attachment 0200000-15 Deliverables.
2.3.1.2	Vehicles	Vehicles used to transport pesticides/herbicides shall be equipped with a fire extinguisher, a spill containment kit capable of containing any potential pesticide/herbicide spill, an emergency eye wash station, at least two gallons of emergency wash water for personal decontamination, and a first aid kit. All pesticides/herbicides carried on vehicles shall be stored in a locked compartment separate from the cab of the vehicle. Vehicles shall not be left unattended at any time unless properly locked and secured. Pest/vegetation control vehicles shall be marked with the owner's or Contractor's name clearly identified as a pest control vehicle per state regulations. Each vehicle shall display applicable state or federal department of transportation or agency placard and other identification markings as required by Federal, state, or local regulations. All vehicles shall be maintained with a clean and orderly appearance, free from pesticide/herbicide residues or grime buildup. Vehicles shall not be cleaned, washed, or rinsed on Government property.
2.3.1.3	Equipment	The Contractor shall provide repair and maintenance, as necessary, to keep all equipment in good operating condition, and take appropriate action regarding the following: • All tanks, hoses, pumps, control valves, and gauges shall be free of visible deterioration, shall not leak, and shall operate at the manufacturer's recommended rates and pressures. Equipment that has failed shall be replaced or repaired by the Contractor prior to resuming operations. • Screens, strainers, and filters shall be used and maintained per the pump, sprayer, and nozzle manufacturer's instructions. • Spray nozzles shall deliver spray patterns as specified by the nozzle manufacturer. Nozzles that become clogged or eroded shall be repaired or replaced by the Contractor prior to resuming operations.

Section C – 1503050
Grounds Maintenance and Landscaping

1503050 - Grounds Maintenance and Landscaping		
Spec Item	Title	Description
		All pesticide/herbicide dispersal equipment, shall be clearly and plainly marked with "DANGER"... "PESTICIDES", or as required by applicable regulations. Specific equipment requirements relevant to individual requirements are further delineated in the Pest Group Sheets in 1503050-02
2.3.1.4	Herbicides	All pesticides/herbicides, must be used in accordance with Federal, DoD, (Insert state name(s)), local, and installation policies and regulations, and any requirements identified in Section J attachments. All pesticides/herbicides shall be procured, processed, handled, and applied in strict accordance with the manufacturer's label. All pesticides/herbicides shall be registered with the EPA and the pesticide regulatory agency. The Contractor shall maintain a book of labels and Safety Data Sheets (SDSs) for pesticides and herbicides they use or intend to use, and have it readily available for the COR's inspection at all times. All pesticides/herbicide used by the Contractor in the United States of America shall be registered with the EPA and applicable state lead agency for the use intended. Planned Pesticide Use Sheets, provided in 1503050-03, including labels and SDS for each pesticide/herbicide intended for use, shall be submitted per Section F with the Contractor's Work Plan. Approvals may be made for and limited to specific pests and sites. Any proposed changes in pesticide/herbicide usage shall be submitted for approval prior to use.
2.3.1.5	Pest Management Operations Reporting	The Contractor shall create and submit a completed electronic Pest Management Record for each pest management/vegetation control operation, both chemical and non-chemical, e.g., pesticide/herbicide application, pest/vegetation control service order, per Attachment 1503050-04. Refer to the Pest Management Operations Report provided in 1503050-04 for a sample of an online Pest Management Record. The Contractor shall submit the Pest Management Operations Report per Section F using the NAVFAC PMC approved online pest management reporting system. Contact the regional NAVFAC PMC to obtain an account and instructions on how to use the system.
2.3.1.6	Disposal	All pesticides/herbicide, rinse water, and containers shall be disposed of per pesticide/herbicide label directions. The Contractor shall dispose of any pesticides/herbicides, pesticide/herbicide containers, pesticide/herbicide residue, pesticide/herbicide rinse water, or any pesticide/herbicide contaminated articles at an authorized disposal area off-site from the installation.
2.3.1.7	Spills	The Contractor shall report any spills to the environmental and fire department personnel to determine if the spills are of hazardous substances.
2.3.1.8	On-Site Mixing	The Contractor shall not mix pesticides/herbicides on Government property unless specifically authorized by the COR. If mixing is authorized, it shall be done at an approved Government furnished facility or over an approved containment device. All water sources shall be equipped with proper back-flow prevention devices. An air gap shall be maintained between the water source and the pesticide/herbicide tank.

Section C – 1503050
Grounds Maintenance and Landscaping

1503050 - Grounds Maintenance and Landscaping		
Spec Item	Title	Description
2.3.1.9	Personal Protective Equipment (PPE)	The Contractor shall provide PPE to each of their pest/vegetation control applicators. This equipment shall include, at a minimum, the PPE required by the pesticide label and SDS.
2.3.2	Permits	The Contractor shall obtain all necessary permits required to perform the work in this contract. A copy of any applicable permit shall be submitted to the KO.
2.3.3	Vehicles on Sidewalks or Lawns	Vehicles shall not be permitted on sidewalks or lawns without prior approval from the KO. The Contractor's request shall include the methods on how he intends to protect the lawns and sidewalks from damage. Replace or restore all lawns, plants, and property damaged by the Contractor to their original condition or better at no additional cost to the Government.
2.3.4	Equipment	Use of powered equipment is prohibited in environmentally sensitive areas identified on the Site Maps provided in 1503050-04
2.3.5	Safety	Grounds maintenance and landscaping equipment shall be approved for use around ammunition bunkers.
2.3.6	Work Identification	The Contractor shall identify and recommend non-recurring work as appropriate to the KO.
2.3.7	Working Adjacent to Parking Areas	Work shall be performed with care on grounds adjacent to parking areas so as to prevent damage to parked vehicles.
2.3.8	Access Coordination	The Contractor shall coordinate all access to performance areas such as airfields and firing ranges through the KO. If required, the Contractor shall be in radio contact with the controlling authority during work performance.
2.3.9	Water Management	The Contractor shall conform to waste and water management measures imposed on the Navy and the Navy-imposed water conservation requirements
2.3.9.1	Water Conservation Plan	The Contractor shall develop and submit a Water Conservation Plan. The plan shall be in effect year round with emphasis on the rainy season (e.g., October through April) and other times of the year during heavy rain. The plan shall be signed and dated by the Contractor's Project Manager and Quality Control Manager. At a minimum, the plan shall include the following: 1. Procedures for ensuring water sprinklers are shut off during heavy rains. 2. Procedures for obtaining current information on weather conditions. 3. Procedures for notifying the Government prior to shutting off and turning on water sprinklers. 4. Procedures for maintaining all existing rain control devices during the entire contract period. 5. Procedures for periodic activation of all irrigation systems to ensure proper working condition of heads and proper spray patterns and that no water sprays onto paved areas, roads, or buildings. 6. Identification of areas that may require watering more than three times per week, exceeding Board of Water Supply guidance, in order to maintain the health/appearance of the grounds. 7. Identification of lawn areas that may need dethatching/aeration to improve the health of the lawn and reduce future watering requirements. 8. Identification of areas currently requiring manual watered (no irrigation system is present or an in ground manual irrigation system is present with no irrigation controller). 9. Description of how all contract performance standards will be met while complying with the Water Conservation Plan.

Section C – 1503050
Grounds Maintenance and Landscaping

1503050 - Grounds Maintenance and Landscaping		
Spec Item	Title	Description
		The Contractor may request changes by subsequent written addendum to the plan, which shall require the KO's approval.
2.4	References and Technical Documents	References and Technical Documents are listed in 1503050-02.

Section C – 1503050
Grounds Maintenance and Landscaping

1503050 – Grounds Maintenance and Landscaping				
Spec Item	Title	Performance Objective	Related Information	Performance Standard
3	Recurring Work	The Contractor shall maintain improved grounds, operational areas, and storm water drainage systems, and perform grounds maintenance service orders to ensure a sightly appearance in accordance with specified standards.	Improved grounds, operational areas, and storm water drainage systems to be maintained per 1503050-03 and 1503050-04. The Contractor shall recycle all organic debris including vegetation clippings, brush, tree limbs, hedge clippings, etc. Organic debris shall be delivered to an approved recycling facility. All weight tickets for recycled debris shall be submitted with the Contractor's invoice per Section F. The Contractor shall submit SDS sheets and catalog cut sheets or samples of all proposed fertilizers and mulch for approval prior to bringing them on-board the installation and prior to use. The Contractor shall develop and submit work schedules that details the date that each of the work requirements will be performed.	Improved grounds are maintained operational areas, and storm water drainage systems. Operational areas present a sightly appearance and do not interfere with operational requirements.
3.1	Improved Grounds	The Contractor shall maintain Improved Grounds to ensure a neat, sightly, and healthy appearance.	Service Level Standards for improved grounds maintenance and landscaping as per 1503050-04 Grounds Site Inventories	Services are performed as specified by and consistent with the Service Level.
3.1.1	Lawn and Field Maintenance	The Contractor shall maintain improved grounds to ensure a neat, sightly, and healthy appearance.	Improved grounds as shown in 1503050-04 Grounds Site Inventories are designated as Prestige Areas, Lawns, or Fields. Lawns and Prestige Areas are designed to be maintained for appearance and lawn health in accordance with the specified Service Level. Fields receive	Services are performed as specified by and consistent with the Service Level.

Section C – 1503050
Grounds Maintenance and Landscaping

1503050 – Grounds Maintenance and Landscaping				
Spec Item	Title	Performance Objective	Related Information	Performance Standard
			mowing and trimming but no other lawn care services.	
3.1.1.1	Mowing and Trimming	The Contractor shall maintain vegetation to ensure a uniform height.	The minimum and maximum acceptable vegetation heights for prestige areas, lawns, and fields are identified within the Service Level Standards in 1503050-03 & 1503050-04. The Contractor shall trim vegetation within and adjacent to objects located within the lawn or field area including, but not limited to fence lines, fence fabric, brick walls, signs, street lights, power poles, guy wires, etc. The Contractor shall remove and dispose of all clippings and trimmings, excluding grass clippings, in a timely manner to promote a neat and healthy appearance. Grass clippings not removed within areas identified as lawns and prestige areas shall be evenly distributed and promote a neat and healthy appearance.	Vegetation is uniform in appearance. Vegetation is not less than the minimum and at or below the maximum acceptable height specified. Trash and debris is removed and disposed of prior to mowing and trimming and presents an overall neat appearance. Vegetation within and adjacent to objects is trimmed to match the height and appearance of surrounding vegetation.
3.1.1.2	Edging	The Contractor shall maintain an edged cut to ensure a neat appearance.	Edging shall be performed where vegetation meets any concrete, asphalt, or aggregate surface, where vegetation abuts planter beds, or wherever needed to maintain vegetation delineation.	Edging is uniform in appearance and vegetation does not encroach on concrete or asphalt surfaces, plant beds, or other structures.
3.1.1.3	Lawn Services	The Contractor shall perform lawn services to ensure proper vegetation health and promote growth.	Lawn services include aeration, de-thatching, fertilization, and top dressing/overseeding. These services shall be performed at the frequency specified by the Service Level listed in 1503050-03 and 1503050-04. The Contractor shall remove and dispose of all aeration cores and all de-thatching debris, in a timely manner to promote a neat appearance. Fertilizer type and application shall be determined by the soil	Lawn services improve vegetation health and vegetation present a healthy appearance. Fertilizer type and application performed as indicated by the soil analysis. Lawns are free of bare spots, ruts, holes, or dead vegetation.

Section C – 1503050
Grounds Maintenance and Landscaping

1503050 – Grounds Maintenance and Landscaping				
Spec Item	Title	Performance Objective	Related Information	Performance Standard
			analysis tests performed by the Contractor. The Contractor shall submit a copy of the soil analysis test results and the proposed type of fertilizer to be used for acceptance prior to applying fertilizer. The Contractor shall submit a copy of the proposed type of seed to be used for acceptance prior to over seeding.	
3.1.1.4	Irrigation	The Contractor shall irrigate to provide the appropriate amount of water to vegetation.	Irrigation shall be performed in a manner that promotes the health and growth of all vegetation and minimizes water consumption regardless of irrigation system conditions (coverage or functionality). The Contractor shall be responsible for the proper application of water to performance areas. The Contractor shall notify the KO of any inoperable irrigation system components within 24 hours of discovery. The Contractor shall be fully responsible for repairs resulting from Contractor's negligence.	Irrigation provided as necessary to maintain health and appearance of vegetation.
3.1.1.5	Weed Control	The Contractor shall perform pre and post emergent weed control (herbicide) to ensure Improved Grounds are free of undesired vegetation.	Pre-emergent vegetation control (herbicide) shall be accomplished at the beginning of growing season. Post-emergent vegetation control (herbicide) shall be accomplished in the middle of the growing season.	Weed growth is inhibited to improve vegetation health and vegetation present a healthy appearance. Weed growth is controlled to levels and within times specified in the Pest Group Requirements.
3.1.2	Artificial Turf	The Contractor shall maintain outdoor artificial turf to ensure a sightly appearance.	The Contractor shall remove vegetation from and fluff artificial turf, clean liquid spills, remove bird droppings and any other debris.	Artificial turf is clean, free of vegetation, and presents a sightly appearance.
3.1.3	Xeriscape Areas	The Contractor shall maintain	The Contractor shall remove undesired vegetation, replenish	Xeriscape areas are clean, free of

Section C – 1503050
Grounds Maintenance and Landscaping

Spec Item	Title	Performance Objective	Related Information	Performance Standard
		xeriscape areas to ensure a sightly appearance.	rocks as needed, evenly distribute and level rocks, and fertilize plants.	undesired vegetation, and present a sightly appearance.
3.1.4	Plant and Plant Bed Maintenance	The Contractor shall maintain plants and plant beds to ensure a healthy appearance and to ensure there is no interference with pedestrians, vehicular traffic, and building encroachment.	The Contractor shall remove and properly dispose of dead, broken, damaged or diseased areas, and all other trimmings. The Contractor shall fertilize, edge, weed, and mulch plant beds as appropriate. The Contractor is responsible for plant replacement up to \$50 per plant not to exceed 30 plants annually.	Plants and plant beds are healthy and present a neat appearance consistent with the specified Service Level. Plants do not encroach on structures, pedestrian traffic, or vehicular traffic.
3.1.5	Shrub and Hedge Maintenance	The Contractor shall maintain shrubs and hedges to ensure a healthy, uniform, and neat appearance and to ensure there is no interference with pedestrians, vehicular traffic, and building encroachment.	The Contractor shall remove and properly dispose of dead, broken, damaged or diseased areas, and all other trimmings. The Contractor is responsible for plant, shrub, and hedge replacement up to \$50 per plant not to exceed 30 plants annually.	Shrubs and hedges are healthy and present a neat and uniform appearance consistent with the specified Service Level. Shrubs and hedges do not encroach on structures, pedestrian traffic, or vehicular traffic.
3.1.6	Ornamental Tree Maintenance	The Contractor shall provide ornamental tree maintenance to ensure tree health and to prevent interference with pedestrian and vehicular traffic, and structure encroachment.	Ornamental tree maintenance includes staking, adjustment of ties and supports, removal of stakes; maintaining watering berms for existing plantings; fertilization; pruning for health and safety, vegetation clearance, seasonal cleanup; removing dead, damaged or diseased wood, or structurally weak limbs and branches; removing or pruning branches to clear roofs, adjacent structures, low hanging limbs and fronds which encroach onto walks, roadways and parking lots. Pruning shall be accomplished by or under guidance of a certified arborist. Climbing devices that may cause damage to ornamental trees shall not be used.	Ornamental trees are healthy consistent with the specified Service Level. Ornamental trees do not encroach on structures, pedestrian traffic, or vehicular traffic. All debris is removed and disposed of properly and within the specified time.

Section C – 1503050
Grounds Maintenance and Landscaping

1503050 – Grounds Maintenance and Landscaping				
Spec Item	Title	Performance Objective	Related Information	Performance Standard
			The Contractor shall remove and properly dispose of dead, damaged or diseased limbs and branches, and all other cuttings within two working days following operations.	
3.1.7	Vegetation Control	The Contractor shall perform vegetation control to ensure areas are free of undesired vegetation.	The Contractor shall remove unwanted vegetation from fence lines, fence fabric, brick walls, sidewalks, curbs, gutters, aggregate areas, and paved surfaces including parking lots.	Objects such as: fence lines, fence fabric, brick, walls, curbs, gutters, aggregate areas, and paved surfaces including parking lots are free of all vegetation consistent with the specified Service Level. Vegetation growth is controlled to levels and within times specified in the Pest Group Requirements.
3.2	Operational Areas	The Contractor shall maintain operational areas to ensure grounds present a slightly appearance and do not interfere with operational requirements.	Prior to mowing or trimming, the Contractor shall remove and appropriately dispose of all debris that interferes with the mowing or trimming operation. Operational areas are provided in 1503050-05 Site Maps.	Operational areas present a slightly appearance and do not interfere with operational requirements. Vegetation within and adjacent to objects such as: fence lines, fence fabric, and brick walls is trimmed to match the height and appearance of surrounding vegetation.
3.2.1	Ammunition Storage Areas	The Contractor shall maintain ammunition storage areas to ensure no interference with operational requirements.	Vegetation height and trees in and around ammunition storage areas shall be maintained per NAVSEA OP-5 requirements. The Contractor shall maintain ammunition storage areas free of all debris, trees, and vegetation height shall not to exceed 18 inches in accordance with NAVSEA OP-5 requirements.	Ammunition storage areas are maintained clear of all debris and trees. Vegetation at or below specified height. Trees do not encroach on, roads, buildings,

Section C – 1503050
Grounds Maintenance and Landscaping

1503050 – Grounds Maintenance and Landscaping				
Spec Item	Title	Performance Objective	Related Information	Performance Standard
			Due to weight restrictions or erosion prevention requirements on mounds and magazines these areas shall be cut with string trimmers or approved push type mowers.	ammunition storage areas, and structures.
3.2.2	Anti-Terrorism Force Protection (ATFP)	The Contractor shall maintain perimeter fence to ensure no interference with operational requirements.	Vegetation height and trees in and around ATFP areas shall be maintained per NTTP 3-07.2.3 requirements. The Contractor shall maintain a 30 feet clear zone on the inside of the fencing and a 20 feet clear zone on the outside of the fencing. The Contractor shall maintain perimeter fence line free of all debris, trees, and vegetation height shall not to exceed eight inches in accordance with NTTP 3-07.23.	ATFP areas are maintained clear of all debris, trees, and vegetation is at or below the specified height. Trees do not encroach on fence line and structures.
3.2.3	Bird/Animal Aircraft Strike Hazard (BASH)	The Contractor shall maintain areas within BASH mitigation zones to ensure no interference with operational requirements.	Vegetation height around airfields shall comply with Bird/Animal Aircraft Strike Hazard (BASH) requirements and Installation Wildlife Hazard Mitigation Plan (WHMP).	Objects such as: curbs, gutters, aggregate areas, and paved surfaces including parking aprons are free of vegetation.
3.2.4	Fire Lanes and Breaks	The Contractor shall maintain fire lanes and breaks to ensure no interference with operational requirements.	The Contractor shall maintain fire lanes and breaks to the dimensions defined in the Fire Protection Handbook. The Contractor shall maintain fire lanes and breaks free of all debris, trees, and vegetation height shall not to exceed one foot.	Fire lanes and breaks are maintained clear of all debris and trees. Vegetation at or below specified height. Fire lanes and breaks are clear of obstructions that interfere with vehicular passage.
3.2.5	Road and Right of Ways	The Contractor shall maintain road and right of ways to ensure no interference with operational requirements.	The Contractor shall maintain road and right of way clearances up to 30 feet of either side of the road and right of way and maintain road and right of ways free of all debris and trees, and vegetation.	Roadway clear of all debris, trees, and vegetation as specified. Objects such as: curbs, gutters,

Section C – 1503050
Grounds Maintenance and Landscaping

1503050 – Grounds Maintenance and Landscaping				
Spec Item	Title	Performance Objective	Related Information	Performance Standard
				aggregate areas, and paved surfaces including parking lots are free of vegetation. Roadways clear of obstructions that interfere with vehicular passage.
3.3	Storm Drainage Systems	The Contractor shall remove obstructions and control trees and vegetation in storm drainage systems to ensure unrestricted flow of storm water runoff.	Drainage systems include curb gutters, curb inlets, brow ditches, drainage channels, swales, catch basins, yard drains, and other devices used to direct the flow of runoff. The Contractor shall clean and remove debris from drainage systems that would inhibit drainage. Aboveground storm drainage systems shall be maintained clear of obstructions, debris, vegetation, and anything else which may restrict runoff flow. Vegetation height shall not to exceed eight inches. Drain covers and grates of underground systems shall be maintained clear of obstructions, however, covers and grates shall not be removed for cleaning drainage systems. The KO shall be notified within 24 hours, in writing, of obstructions in subsurface drain lines beyond Contractor responsibility. Missing or damaged yard drain covers and grates shall be reported immediately to the KO.	No evidence of obstructions in the visible area of the drainage systems.
3.4	Grounds Maintenance Service Orders	The Contractor shall perform grounds maintenance service order work in a timely manner to accomplish any grounds maintenance and	The Contractor shall receive grounds maintenance service orders in accordance with the work reception requirements in Annex 2. The Contractor shall schedule and perform grounds maintenance service orders in a	Grounds maintenance service order work is completed within the period of performance specified on the grounds maintenance service order.

Section C – 1503050
Grounds Maintenance and Landscaping

Spec Item	Title	Performance Objective	Related Information	Performance Standard
		landscaping work identified within the entire boundary of the installation to ensure requirements are responded to and completed in accordance with specified standards.	way that minimize disruptions to customers and Government operations. The Government may issue service orders for work requirements at any location within the defined boundaries of this contract for any reason at the discretion of the KO. Service orders will include a wide variety of work. The Contractor has full responsibility for any work up to the grounds maintenance service order limit of liability of \$500 in direct labor and direct material cost per grounds maintenance service order. The Government will only pay for the portion of direct labor and direct material that exceeds the grounds maintenance service order limit of liability. The Contractor shall notify the KO upon identification that the grounds maintenance service order will exceed the specified limits of liability in accordance with reporting requirements in Annex 2. If a non-recurring work is issued for the portion exceeding the specified grounds maintenance service order limits of liability, the Government will only pay for the portion of direct labor and direct material that exceeds the grounds maintenance service order limits. Example: If a grounds maintenance service order requires \$600 in direct labor and direct material cost, the Government may issue a task order in accordance with the Non-Recurring Work provisions of the contract for the \$100 in direct labor and direct material cost that	Grounds maintenance service orders are signed by the original requestor or PAR prior to being closed.

Section C – 1503050
Grounds Maintenance and Landscaping

Attachment 0200000-01
Definitions and Acronyms

Definition	Description
Assessment	A general term referring to either a survey or inspection of a facility to determine condition.
Asset	A general term used to refer to an item, such as a component, system, building or facility, which is managed by an automated data management program.
Competent Person	A person who has the professional experience and training necessary to identify existing and predictable hazards at a work or service environment, and who has the authority to take prompt and corrective action to eliminate or remove dangers from the environment. One who can identify existing and predictable hazards in the working environment or working conditions that are dangerous to personnel and who has authorization to take prompt corrective measures to eliminate them.
Component Inventory Management Unit (CIMU)	An organization of like-kind real property into manageable maintenance units. CIMU is a building component, group of components or component assemblies, serving a specific purpose in a facility that can be expected to follow a common and predictable lifecycle behavior. This class of non-equipment will include items such as exterior walls, exterior windows, interior finishing, and roofs. This class of equipment will include items such as fan coil units, air handling units, lighting, and water closets. CIMUs can include one or more items of installed equipment typically subject to routine scheduled maintenance.
Confined Workspace	A space that is large enough and so configured that a person may bodily enter a space (such as in tanks, vessels, silos, storage bins, hoppers, vaults, pits, and like spaces where there are limited means of entry) and is hindered or restricted from escaping during an emergency.
Contracting Officer (KO)	That individual with the authority to enter, administer, and/or terminate contracts and make related determinations and findings. The term includes certain authorized representatives of the Contracting Officer acting within the limits of their authority as delegated by the Contracting Officer.
Contracting Officer's Representative (COR)	The individual appointed by the KO is responsible for monitoring the Contractor's technical compliance and progress, relative to assigned contract(s)/orders(s), based on the contract requirements specified in the PWS and in accordance with the PAP. The COR performs a variety of contract administration duties that include oversight of PA, documenting and rating Contractor performance, reviewing invoices, and acceptance of work. Assignment as a COR is a collateral duty typically performed by the FSCM or SPAR.
Contractor	That entity or its representative is responsible for the delivery of the services or materials specified in this contract, as designated by contract award. The term Contractor as used herein refers to both the prime Contractor and any subcontractors. The prime Contractor shall insure that subcontractors comply with the provision of this contract.
Contractor Representative	That individual appointed by the Contractor, either orally or in writing, who has been assigned responsibility for executing the requirements of this contract.
Direct Material Costs	The actual vendor invoice charges for materials used for performance of work under this contract. Direct material costs shall include sales tax and transportation charges when such charges are included on the invoice by the vendor, as well as any discounts allowed for prompt payment and discounts or rebates for core value or salvage value that accrue to the Contractor. When questions arise concerning the cost of direct materials, direct material costs will be based on the lowest quotes provided by the Contractor from at least three different commercial vendors for the direct material cost. The Government retains the right to obtain additional quotes in questionable situations. The lowest price will be used. All other cost such as sub-contractor cost, costs for pre-expended bin materials, shipping and handling, union agreements, crew sizes, hand tools, universal equipment, mobilization, demobilization, time for job preparation, safety standby personnel, payroll

Attachment 0200000-01
Definitions and Acronyms

Definition	Description
	burdens and fringes, overtime, job (field) overhead, clerical support, supervision, inspection, fees, taxes, licenses, permits, and insurance, general and administrative (home office) overhead, profit, and all other associated markups shall not be included in the direct material price since the cost for these items are included in the UPL Hour unit price bid.
Electronic Operation and Maintenance and Support Information (eOMSI)	A set of consultant-prepared data and document files that contain detailed, as-built technical information that describes the efficient, economical and safe operation, maintenance and repair of a facility, plant, equipment or system throughout its life cycle. Generally, it is prepared during construction and submitted upon completion of a new facility or major facility upgrade. eOMSI's typically include asset information, staffing and budgeting information, supply support including critical spare parts, operating procedures, troubleshooting and diagnostic guides, extended warranty data, maintenance task frequencies and documentation, technical data, repair procedures and manufacturer's product data. eOMSI data and document files are provided in electronic formats.
Equipment	Tangible asset that is functionally complete for its intended purpose, durable, and non-expendable.
Facility	A building or structure designed and created to serve a particular function.
Fixed Burden Rate (FBR)	The additional costs (expressed in percent of direct material cost) for ordering, handling, and stockpiling materials and repair parts. For example, if the offeror's Fixed Burden Rate for materials in the Base Period is 10% then: $\$100,000.00 + (\$100,000.00 \times 10\%) = \$110,000.00$ The Government will compensate the Contractor for the required parts and materials and not the total amount shown in Schedule of Indefinite Delivery Indefinite Quantity Work.
Frequency Of Service	Annual (A). Services performed once during each 12-month period of the contract at intervals of 335 to 395 days. Biennial (B). Services performed once during each 24-month period of the contract at intervals of 670 to 790 days. Daily (D5). Services performed once each calendar day, Monday through Friday, including holidays unless otherwise noted. Daily (D7). Services performed once each calendar day, seven days per week, including weekends and holidays. Monthly (M). Services performed 12 times during each 12-month period of the contract at intervals of 28 to 31 calendar days. Quarterly (Q). Services performed four times during each 12-month period of the contract at intervals of 80 to 100 calendar days. Semiannual (SA). Services performed twice during each 12-month period of the contract at intervals of 160 to 200 calendar days. Semimonthly (SM). Services performed 24 times during each 12-month period of the contract at intervals of 14 to 16 calendar days. Three times weekly (3W). Services are performed three times a week, such as Monday, Wednesday, and Friday. Twice weekly (2W). Services are performed twice a week, such as Monday and Thursday or Tuesday and Friday. Weekly (W). Services performed 52 times during each 12-month period of the contract at intervals of six to eight calendar days.
Government Furnished Property (GFP)	Property in the possession of, or directly acquired by, the Government and subsequently furnished to the contractor for the performance of a contract. Government furnished property includes, but is not limited to, spares and property furnished for repairs,

Attachment 0200000-01
Definitions and Acronyms

Definition	Description
	maintenance, overhaul, or modification. Government furnished property also includes contractor acquired property if the contractor acquired property is a deliverable under a cost contract when accepted by the Government for continued use under the contract.
Hazardous Material (HM)	A material that because of its quality, concentration, physical, chemical or infectious nature may pose a threat to human health or the environment if released or spilled into the environment or any material designated by the Department of Transportation (DOT) or any materials that require a SDS form as posing a potential threat while being transported. Hazardous materials are listed in 49 CFR Part 172.
Hazardous Waste (HW)	Any discarded solid waste (liquid, semi-solid, solid, or gaseous) that meets the definition of hazardous waste by USEPA, state authorities, or the Navy. In accordance with RCRA, a solid waste is a listed hazardous waste if it is specifically listed, or it is a characteristic hazardous waste if it exhibits the characteristics of ignitability, corrosivity, reactivity, or toxicity.
Hazardous Waste Management Plan	In accordance with OPNAVINST 5090.1C, every Navy shore activity that generates HW shall develop and use a Hazardous Waste Management Plan or a Hazardous Waste management component in its P2 Plan and EMS. A Hazardous Waste Management Plan shall: • Identify applicable federal, state, and local regulations pertaining to the generation and management of hazardous waste. • Identify training requirements and describe procedures for obtaining training and maintaining training records. • Assign responsibilities for the generation, designation, handling, storage, treatment, disposal, and all documentation. • Describe all hazardous waste generation and management procedures. • Include or reference the hazardous waste minimization plan and goals. • Include or reference contingency plans and emergency response procedures. The plan shall be kept up to date to include changes in hazardous waste generation and management procedures, as well as changes in applicable federal, state, and local hazardous waste regulations. The plan shall include or reference minimization procedures sufficient to achieve DOD minimization goals. Tenant activities are covered by the host CO's Hazardous Waste Management Plan.
Hazardous Waste Manifest	A hazardous waste manifest as defined in 40 CFR 260 is required for the transport of hazardous waste. The installation commanding officer (ICO) or the ICO's designated representative shall retain signature authority for hazardous waste manifests.
Infrastructure Condition Assessment Program (ICAP)	A Navy automated data management program that utilizes historical asset lifecycle data and a structured assessment process to evaluate the condition facilities and their components.
Inspection	A rigorous, detailed assessment of the condition of a facility performed to generate a fundable scope and cost estimate for prioritization and funding of maintenance and repair.
Integrated Maintenance Program (IMP)	IMP is a recurring state-of-the-art, reliability-centered inspection, testing, maintenance and repair program that determines best practices for managing the functions and consequences of failures of facilities equipment and system components. IMP encompasses accepted commercial practices, including reactive, preventive, predictive and proactive maintenance, into one optimal program. The IMP approach gives the Contractor full responsibility to maintain systems and equipment and perform repairs whenever necessary to ensure equipment and systems are operational and remain in a constant state of readiness. Service orders will not be issued for accomplishment of repairs on systems and equipment maintained under IMP.
Job or Work Order	An authorization for work that requires planning and estimating and has an individual line of accounting for financial and performance evaluation.

Attachment 0200000-01
Definitions and Acronyms

Definition	Description
Life-Cycle Costs	A form of economic analysis that considers the total cost of owning, operating, and maintaining a building or system over its useful life.
Maintenance and Repair	The preservation or restoration of a piece of equipment, system, or facility to such condition that it may be effectively used for its designated purposes. Maintenance/repair may be adjustment, overhaul, reprocessing, or replacement of constituent parts or materials that are missing or have deteriorated by action of the elements or usage, or replacement of the entire unit or system if beyond economical repair.
Monthly On-Site Labor Report	A compilation of all Contractor and subcontractor employee-hours involved in delivering contract services on a government property.
NAVFAC MAXIMO (N/A)	A specially configured software version of MAXIMO®, a commercially available computerized maintenance management system (CMMS), adopted by NAVFAC for enterprise facility asset data management. The terms "MAXIMO", "NAVFAC MAXIMO" or "Government's MAXIMO" shall be used interchangeably in the document.
Partnering	The terms "partnering" and "partnership" used herein shall mean a relationship of open communication and close cooperation that involves both Government and Contractor personnel working together for the purpose of establishing a mutually beneficial, proactive, cooperative environment within which to achieve contract objectives and resolve issues and implementing actions as required.
Performance Assessment	A method used by the Government to provide some measure of control over the quality of purchased goods and services received.
Performance Assessment Representative (PAR)	The individual(s) assigned as a Technical Point of Contact (TPOC) / Subject Matter Expert (SME) to the COR to perform duties as the on-site representative who assesses Contractor performance. The PAR periodically observes Contractor performance, reviews delivered services, reviews quality management corrective actions, periodically assesses and documents Contractor performance on PAWs and the MPAS, and communicates findings as necessary with the Contractor, SPAR, and COR.
Pre-Expended Bin Materials and Supplies	The minor materials and supplies that are incidental to the job, for which the total direct cost of any one material line item shown on the material estimate is \$10.00 or less. Examples of pre-expended bin materials and supplies include, but are not limited to, solder, lead, flux, electrical connectors, electrical tape, fuses, nails, screws, bolts, nuts, washers, spacers, masking tape, sand paper, solvent, cleaners, lubricants, grease, oil, rags, mops, glue, epoxy, spackling compound, joint tape, plumbers tape and compound, clips, welding rods, and touch up paint.
Property Administrator	An authorized representative of the Contracting Officer who is responsible for administering contract property requirements, terms and conditions of the contract
Property Management Program	A Government program established for the purpose of reviewing and approving the Contractor's Property Management Plan and System through performance of a system analysis whenever government property is in the possession of the Contractor.
Quality Assurance (QA)	The planned and systematic activities are implemented in a quality system so that quality requirements for a product or service will be fulfilled.
Quality Control (QC)	The observation techniques and activities used to fulfill requirements for quality.
R. S. Means	A data collection and organization system developed by R. S. Means Company which can be used to prepare accurate, dependable construction estimates and budgets in a variety of ways. The Contractor shall use the latest edition. Material prices are based on a national average and computed labor costs are based on a 30-city national average. An estimate prepared using this data is called a "Means estimate"; data may simply be referred to as "Means".
Real Property	Land and improvements to land (i.e., facilities). It includes equipment affixed and built into the facility as an integral part of the facility (such as heating systems), but not movable equipment (e.g., plant equipment, industrial equipment, buoys).

Attachment 0200000-01
Definitions and Acronyms

Definition	Description
Real Property Inventory Equipment (RPIE)	A Government owned or leased individual pieces of equipment, apparatus, or fixture that are essential to the function of the real property (i.e. plumbing, electrical, heating, cooling and elevators). It is physically attached to, integrated into, and built in or on the property. Individual RPIE's can be combined to make a CIMU to facilitate facilities management. An individual RPIE can also be a CIMU if the equipment is complex enough to require its own management planning.
Regulated Waste	Any hazardous, non-hazardous, industrial process waste (aka special waste), e-waste, and/or off-specification HM, which because of its physical characteristics, chemical make-up or biological nature requires either special handling procedures and permitting, or poses an unusual threat to human health, equipment, property, or the environment. Examples include (but are not limited to) liquid sludge, pastes, and/or filter cakes, chemical compounds and/or petroleum products, fine powders or highly dusty materials, spent blast media and/or grit, demolition wastes from industrial facilities, debris and/or residues from spill cleanup work, underground storage tank remediation materials, pollution control wastes, ash from fires, furnaces, boilers or incinerators, off-specification products, other materials that have the potential to be a hazardous waste. All RW may be used or unused for excess hazardous materials. Laboratory analysis may be required to verify the waste is not a RCRA-regulated hazardous waste.
Response Time	The time allowed the Contractor after initial notification of a work requirement to be physically on the premises at the work site with appropriate personnel, tools, equipment, and materials, ready to perform the work required.
Restoration	Restoration of real property to such a condition that it can be used for its intended purpose. Includes repair or replacement work to restore facilities damaged by inadequate sustainment, excessive age, natural disaster, fire, accident or other causes.
Sampling Plan	Plan and procedures to conduct sampling, field testing and laboratory analysis for a defined testing objective.
Spill Prevention Control and Countermeasure (SPCC) Plan	The SPCC Plan establishes engineering controls including procedures, methods, equipment and other requirements to prevent the discharge of oil into or upon navigable waters. The Plan includes procedures for oil spill prevention, measures to contain spills and an established spill drill exercises to ensure effective countermeasures in the event of oil spill.
Sustainment	Maintenance and repair activities necessary to keep a typical inventory of facilities in "normal working condition". Sustainment includes regularly scheduled maintenance as well as major cyclical repairs or replacement of components that occur periodically over the expected service life of the facilities.
System	An assemblage of mechanically and/or electrically interlocked parts, equipment and/or components forming a unitary whole.
Unit Priced Labor (UPL) Hour	The fully burdened unit price bid by the Contractor to perform one hour of work-in-place. With the exception of direct material and construction equipment costs, the unit priced labor hour price shall include all indirect and direct costs associated with performing work, such as: the Contractor's hourly composite trade wage, adjusted to allow for workforce productivity; sub-contractor cost, costs for pre-expended bin materials, shipping and handling, wage determinations, union agreements, crew sizes, hand tools, equipment, universal equipment (excluding construction equipment), mobilization, demobilization, payroll burdens and fringes, overtime, job (field) overhead, clerical support, supervision, inspection, fees, taxes, licenses, permits, and insurance, general and administrative (home office) overhead, profit, and all other associated markups. Any indirect cost or additional markups not allowed in the definition of direct materials shall be included in the UPL price. Additionally, time for

Attachment 0200000-01
Definitions and Acronyms

Definition	Description
	job preparation, safety standby personnel, and similar indirect labor elements are included.
Uniform Classification	A standard classification of building components established by the National Institute of Standards and Technology.
Universal Equipment	Universal equipment refers to equipment that can cover two or more industries and is commercially employed in execution of operation, maintenance, and repair work, such as: Aerial Work Platforms, Backhoes, Cranes, Dump Trucks, Excavators, Generators, Graders, Lifts, Loaders, Man Lifts, Monitoring and Test Equipment, Pumps, Tractors, Trailers, etc.
Universal Waste (UW)	Universal Waste (UW) (defined in 40 CFR Part 273) means batteries, fluorescent lamps, some pesticides, and mercury-containing equipment formally classified as HW, but that are now subject to less stringent regulations, when recycled if recycling is available.

Directions for Process Material Log Sheets

Chemical Description:

- Material Name - List the brand or generic name of the chemical material.
- Manufacturer - List the name of the manufacturer of the product.
- Constituents of Concern - List the constituents (ingredients) as listed on the Safety Data Sheet (SDS).
- CAS # - List the Chemical Abstract Service (CAS) Number for each Constituent of Concern listed. This information is found on the SDS. If no CAS number is listed, state "N/L".
- % - List the concentration of each Constituent of Concern listed. This information is found on the SDS. If the concentration is not listed, state "N/L".
- Product Weight - List the weight of material contained in one container of the product. This information is normally listed on the SDS or can be determined from the density or specific gravity of the product listed on the SDS.
- In addition, check all the boxes that apply to this chemical:
 - Pure or Mix - choose only one.
 - Solid, Liquid or Gas - choose only one.
 - Extremely Hazardous Substance (EHS), Ozone Depleting Substance (ODS), SARA TITLE III Chemical (SARA III), Air Toxic Chemical (AIR TOX) or Carcinogen
- (CARC) - based on the information provided by the material's SDS. Choose all that apply.
 - HM exempt - per EPCRA section 312 and based upon user knowledge, choose this box if the material would normally be exempt from reporting for hazardous material storage.
 - Tri exempt - per EPCRA section 313 and based upon user knowledge, choose this box if the material would normally be exempt from reporting for the Toxic Release Inventory (TRI).

Physical and Chemical Hazards:

- For each material listed, check all the physical and health hazard boxes that apply. These hazard categories are defined in 40 CFR 370.2.
- Fire Hazard - flammable, combustible liquid, pyrophoric, oxidizer.
- Sudden Release of Pressure - explosive, compressed gas.
- Reactive - unstable reactive, organic peroxide, water reactive.
- Immediate (acute) Health Hazard - highly toxic, toxic, irritant, sensitizer, corrosive.
- Delayed (chronic) Health Hazard - carcinogens, mutagens, other long-term health hazards.

Storage Description: Storage Code:

- List the appropriate storage type, pressure and temperature condition codes for the material based upon the codes listed below. List the storage type in the first box, the applicable pressure code in the second box and the applicable temperature code in the third box. More than one storage code may apply if material is stored in different types of containers.

Storage Type:

- A - Above Ground Storage Tank F Can L Cylinder
- B - Below Ground Storage Tank G Carboy M Glass Bottle or Drum
- C - Tank Inside Building I Fiber Drum N Plastic Bottle or Drum
- D - Steel Drum J Bag R Other
- E - Plastic/Non-metallic Drum K Box

Pressure and Temperature Conditions:

- 1 - Ambient Pressure 4 Ambient Temperature
- 2 - Greater than Ambient Pressure 5 Greater than Ambient Temperature
- 3 - Less than Ambient Pressure 6 Less than Ambient Temperature but not Cryogenic
- 7 - Cryogenic Conditions

Attachment 0200000-05
FORMS

Inventory in Pounds:

- Maximum Amount - List the maximum amount of material that was on-hand (stored) at any one time. Amount must be recorded in pounds.
- Average Amount - List the average amount of material that was on-hand during the reporting period. Amount must be recorded in pounds.
- Days on Site - List the number of days during the reporting period each material was on-site. If the material was present for the whole year, record as 365.

Amount Used in Pounds:

- List the amount of each material used during the reporting period. Amount must be recorded in pounds. Amount used is the best estimate based on the contractor material tracking system.

VOC/HAP Tracking Form

FORMS

ATTACHMENT "A"			
CONTRACTOR CRANE OPERATING CHECKLIST FOR CRITICAL LIFTS		YES	NO
1	Does the operator know the weight of the load to be lifted?		
2	Is the load to be lifted within the crane manufacturer's rated capacity in its present configuration?		
3	Is the crane level and on firm ground?		
4	Are outriggers required?		
5	If so, outriggers are fully extended and down, and the load off the wheels.		
6	If blocking is required, is the entire surface of the outrigger pad supported, and is the blocking material of sufficient strength to safely support the loaded outrigger pad?		
7	If outriggers are not used, is the crane rated for on-rubber lifts by the manufacturer's load chart?		
8	Is the swing radius of the crane counterweight clear of people, obstructions, and accessible areas within the swing area barricaded to prevent injury, damage and unplanned encroachment?		
9	Has the hook been centered over the load in such a manner to prevent swing (deflection, side loading, load-moment)?		
10	Is the load well secured and balanced in the sling or lifting device before it is lifted (free and clear) more than a few inches?		
11	Is the lift swing path clear of obstructions?		
12	If rotation of the load being lifted is hazardous, is tag line or restraint line being used?		
13	Are personnel prevented from standing or passing under a suspended load?		
14	Are personnel prevented from entering the load fall zone?		
15	Is the crane operator's attention diverted?		
16	Are proper signals being always used?		
17	If radio communications are used, is the frequency isolated to the crane team.		
18	Do the operations ensure that side and tip loading is prohibited?		
19	Are start and stop motions in a smooth fluid motion (no sudden acceleration or deceleration)?		
20	If operating near electric power lines, are the rules and guidelines understood and adhered to as specified in NAVFAC P-307?		
21	Is the lift a critical lift?		
22	If so, are critical lift regulations understood, check-off sheets initialed and signed off, and was there an interactive brief conducted with associated personnel?		
23	Is Attachment "A" current, filled out completely, and posted in the crane?

FORMS

CRANE AND RIGGING GEAR ACCIDENT REPORT INSTRUCTIONS

This form is designed for fax transmission without a cover page or by e-mail and, with enclosures and signatures, shall be the official document. Electronic submission will be accepted without signatures but the names of the preparer, concurring personnel, and certifying official (for crane accidents only) shall be filled in. The e-mail address is m_nfsh_ncc_accident@navy.mil. The fax number is (757) 967-3808.

1. Accident Category: Indicate either crane accident or rigging gear accident.
2. From: The naval activity that is responsible for reporting the accident and UIC number.
3. Activity: The naval activity where the accident took place.
4. Report No.: The activity assigned accident number (e.g., 95-001).
5. Crane No.: The activity assigned crane number (e.g., PC-5), if applicable.
6. Category: Identify category of crane (i.e., 1, 2, 3, or 4), if applicable.
7. Accident Date: The date the accident occurred.
8. Time: The time (24 hour clock) the accident occurred (e.g., 1300).
9. Category of Service: Check the applicable service (SPS as defined by NAVSEA 0989-030-7000).
10. Crane Type: The type of crane involved in the accident (e.g., mobile, bridge), if applicable.
11. Crane Manufacturer: The manufacturer of the crane (e.g., Dravo, Grove, P&H), if applicable.
12. SPS: Was the crane or rigging gear being used in an SPS lift?
13. Complex lift: Was the crane or rigging gear being used in a complex lift?
14. Location: The detailed location where the accident took place (e.g., building 213, dry dock 5).
15. Weather: The weather conditions at time of accident (e.g., wind, rain, cold).
16. Crane Capacity: The certified capacity of the crane (e.g., 120,000 pounds), if applicable.
17. Hook Capacity: The capacity of the hook involved in the accident at the max radius of the operation, if applicable.
18. Weight of Load on Hook: If applicable, the weight of the load on the hook.
19. Fatality or Permanent Disability?: Check yes or no.
20. Material/Property Cost Estimate: Estimate total cost of damage resulting from the accident.
21. Reported to NAVSAFECEN?: Self-explanatory.
22. Accident Type: Check all that apply.
23. Cause of Accident: Check all that apply.
24. Chargeable to: Check all that apply.
25. Crane Function: Check all functions in operation at time of accident. Check N/A if a rigging gear accident.
26. Is this a recurring problem?: Check yes or no. Identify any other similar accidents.
27. Situation Description/Corrective Actions: Self-explanatory.
28. Preparer: Self-explanatory.
29. Concurrences: Self-explanatory.
30. Certifying Official (Crane Accidents Only): Self-explanatory.
31. Brief Description: No more than one paragraph summarizing the resultant incident.
32. Background and Detailed Description: Provide the relevant background in a descriptive timeline of preconditions leading up to the event, as well as a detailed description of the event.
33. Corrective Actions: List all short term and long term corrective actions that are taken to prevent recurrence of the incident. Short Term Corrective Actions are those actions taken that will allow return to work in short time frame. Long Term actions are more 'programmatic' in nature and typically include process revision, changes in training, 'mistake proofing', etc.

CRANE AND RIGGING GEAR ACCIDENT REPORT INSTRUCTIONS

This form is designed for fax transmission without a cover page or by e-mail and, with enclosures and signatures, shall be the official document. Electronic submission will be accepted without signatures but the names of the preparer, concurring personnel, and certifying official (for crane accidents only) shall be filled in. The e-mail address is NFSH_NCC_ACCIDENT@navy.mil

1. Accident Category: Indicate either crane accident or rigging gear accident.
2. From: The naval activity that is responsible for reporting the accident and UIC number.
3. Activity: The naval activity where the accident took place.
4. Report No.: The activity assigned accident number (e.g., 95-001).
5. Crane No.: The activity assigned crane number (e.g., PC-5), if applicable.
6. Category: Identify category of crane (i.e., 1, 2, 3, or 4), if applicable.
7. Accident Date: The date the accident occurred.
8. Time: The time (24 hour clock) the accident occurred (e.g., 1300).
9. Category of Service: Check the applicable service (SPS as defined by NAVSEA 0989-030-7000).
10. Crane Type: The type of crane involved in the accident (e.g., mobile, bridge), if applicable.
11. Crane Manufacturer: The manufacturer of the crane (e.g., Dravo, Grove, P&H), if applicable.
12. SPS: Was the crane or rigging gear being used in an SPS lift?
13. Complex lift: Was the crane or rigging gear being used in a complex lift?
14. Location: The detailed location where the accident took place (e.g., building 213, dry dock 5).
15. Weather: The weather conditions at time of accident (e.g., wind, rain, cold).
16. Crane Capacity: The certified capacity of the crane (e.g., 120,000 pounds), if applicable.
17. Hook Capacity: The capacity of the hook involved in the accident at the max radius of the operation, if applicable.
18. Weight of Load on Hook: If applicable, the weight of the load on the hook.
19. Fatality or Permanent Disability?: Check yes or no.
20. Material/Property Cost Estimate: Estimate total cost of damage resulting from the accident.
21. Reported to NAVSAFECEN?: Self-explanatory.
22. Accident Type: Check all that apply.
23. Cause of Accident: Check all that apply.
24. Chargeable to: Check all that apply.
25. Crane Function: Check all functions in operation at time of accident. Check N/A if a rigging gear accident.
26. Is this a recurring problem?: Check yes or no. Identify any other similar accidents.
27. Situation Description/Corrective Actions: Self-explanatory.
28. Preparer: Self-explanatory.
29. Concurrences: Self-explanatory.
30. Certifying Official (Crane Accidents Only): Self-explanatory.
31. Brief Description: No more than one paragraph summarizing the resultant incident.
32. Background and Detailed Description: Provide the relevant background in a descriptive timeline of preconditions leading up to the event, as well as a detailed description of the event.
33. Corrective Actions: List all short term and long term corrective actions that are taken to prevent recurrence of the incident. Short Term Corrective Actions are those actions taken that will allow return to work in short time frame. Long Term actions are more 'programmatic' in nature and typically include: process revision, changes in training, 'mistake proofing', etc.

•
Supervisor shall report the incident to the Gov. Rep. ASAP. The corrective action reported to the Gov. Rep must be accepted and the Gov. Rep. can authorize crane operations to continue and the written report may be submitted at a later time.
Please submit to NAVFAC Systems Command Hawaii Contractor Crane Oversight for review and report number before submitting to
NAVY Crane center NAVFAC NCC ACCIDENT <NAVFAC_NCC_ACCIDENT@us.navy.mil>

There are two general categories of accidents as defined below. Crane accidents are those that occur during operation of a category 1, 2, 3, or 4 crane.
Rigging accidents are those that occur when gear and equipment identified in section 14 is used by itself in a weight handling operation, OR when section 14 gear is used with multi-purpose machines, MHE (e.g., forklifts), and equipment covered by NAVFAC P-300 in a weight handling operation. In addition, accidents that occur during the operation of entertainment hoists (see section 13) shall be reported as rigging accidents

NOTE:

Please identify Lower Threshold Crane Accidents (LTCA) in the Description:
A LTCA as part of the description is defined as "an avoidable contact" type accident (P-307, paragraph 12.4.1.g) with no damage (not even a paint scrape). This definition will be added to the upcoming revision of NAVFAC P-307. Even though LTCAs are accidents per the P-307 definition, reporting these events is seen as a sign of activity maturity and are viewed positively.

Title: New Email Address for Reporting Accidents

Target Audience: Weight Handling Program and Crane Oversight Personnel

Navy Crane Center has a new email address, NAVFAC_NCC_ACCIDENT@us.navy.mil, for initial notification of crane and rigging accidents and for submission of final accident, near miss, and unplanned occurrence reports.

Ensure Timely Notification of Accidents

NAVFAC P-307 paragraph 12.6.1

- **No later than eight hours** following an accident involving significant injury or major damage.
- **As soon as practical, but no later than three* working days** for all other accidents. *Note that the upcoming revision to NAVFAC P-307 will require notification within one working day.

Initial notification shall include:

- Name and UIC of the responsible activity
- Contact information (name/phone and email)
- Date and location of the accident
- A brief description of the accident
- Accident type and crane type (Navy identification number if known)
- Description of any injuries or damage

Investigation and Reporting of Accidents

NAVFAC P-307 paragraph 12.6.2

- **Promptly** investigate and prepare accident report using NAVFAC P-307, Figure 12-1
(<https://ncc.navfac.navy.mil/popular-links/p307/p307-forms>)
- Forward a copy to NCC **within 30 days**.

Accident report shall provide:

- A **brief description** summarizing the resultant incident. (no more than one paragraph)
- The relevant background (**root cause**) in a descriptive timeline of preconditions leading up to the event, as well as a **detailed description** of the event.
- List of corrective actions taken that allowed return to work. (**short-term**)
- List of actions taken to prevent recurrence typically include: process revision, changes in training (**long-term**)

Reporting of Near Misses and Unplanned Occurrences

NAVFAC P-307 paragraphs 12.7-12.7.3

- Shall be reported using figure 12-2. (<https://ncc.navfac.navy.mil/popular-links/p307/p307-forms>)
- These reports shall be submitted **within 30 days of the event**.

12.2 Categories. There are two general categories of accidents as defined below.

Crane accidents are those that occur during operation of a category 1, 2, 3, or 4 crane.

Rigging accidents are those that occur when gear and equipment identified in section 14 is used by itself in a weight handling operation, OR when section 14 gear is used with multi-purpose machines, MHE (e.g., forklifts), and equipment covered by NAVFAC P-300 in a weight handling operation. In addition, accidents that occur during the operation of entertainment hoists (see section 13) shall be reported as rigging accidents.

FORMS

CRANE AND RIGGING GEAR ACCIDENT NEAR MISS FORMS

This form is designed for fax transmission without a cover page or by e-mail and, with enclosures and signatures, shall be the official document. Electronic submission will be accepted without signatures but the names of the preparer, concurring personnel, and certifying official (for crane accidents only) shall be filled in. The e-mail address is nfsh_ncc_accident@navy.mil. The fax number is (757) 967-3808.

1. Near Miss Category: Indicate either crane or rigging gear near miss.
2. From: The naval activity that is responsible for reporting the near miss and UIC number.
3. Activity: The naval activity where the near miss took place.
4. Report No.: The activity assigned near miss number (e.g., 95-001).
5. Crane No.: The activity assigned crane number (e.g., PC-5), if applicable.
6. Category: Identify category of crane (i.e., 1, 2, 3, or 4), if applicable.
7. Near Miss Date: The date the near miss occurred.
8. Time: The time (24 hour clock) the near miss occurred (e.g., 1300).
9. Category of Service: Check the applicable service (SPS as defined by NAVSEA 0989-030-7000).
10. Crane Type: The type of crane involved in the near miss (e.g., mobile, bridge), if applicable.
11. Crane Manufacturer: The manufacturer of the crane (e.g., Dravo, Grove, P&H), if applicable.
12. Location: The detailed location where the near miss took place (e.g., building 213, dry dock 5).
13. Weather: The weather conditions at time of the near miss (e.g., wind, rain, cold).
14. Crane Capacity: The certified capacity of the crane (e.g., 120,000 pounds), if applicable.
15. Hook Capacity: The capacity of the hook involved in the near miss at the maximum radius of the operation, if applicable.
16. Weight of Load on Hook: If applicable, the weight of the load on the hook.
17. Is this a recurring problem? Check yes or no. Identify any other similar near misses or accidents.
18. Situation Description/Corrective Actions: Self-explanatory.
19. Preparer: Self-explanatory.

CRANE AND RIGGING GEAR NEAR MISS REPORT

REQUIREMENTS FOR SPILLS ON AND OFF GOVERNMENT PROPERTY

1. Spills – The Contractor is solely responsible for all costs and liabilities incurred as a result of a spill, which occurs as a result of the actions of the Contractor, its agents, employees, subcontractors, or suppliers. Costs and liabilities may include, but not limited to, containment and cleanup costs, fines and penalties, and personal damages

2. Reporting – Spills on Government Property

Report all non-incidentals spills which require emergency response and clean-up in accordance with 29 CFR 1910.120, entitled “Hazardous Waste Operations and Emergency Response” or Spills on Government Property which exceed the EPA or State's reportable quantity. Upon discovery of a spill immediately report by telephone (voice contact) 911 during non-duty hours and weekends. Provide a written report upon Government request and submit within 24 hours of request.

3. Reporting – EPA and State “Reportable” Spills – Initial Voice Contact

Report all EPA and State "Reportable" spills that occur on Government property. Upon discovery of a reportable spill, immediately complete the Initial Voice (telephonic) Contact to Federal, State, and local emergency response organizations (cognizant agencies) in accordance with 40 CFR 302, entitled “Designation, Reportable Quantities, and Notification”; and Hawaii Administrative Rules, Title 11, Chapter 451 (HAR 11- 451), entitled “State Contingency Plan”. Upon completion of the initial contact with cognizant agencies, notify the KO.

4. Reporting – EPA and State “Reportable” Spills – Written Follow-up Report

Submit a separate Written Follow-up Report for all EPA and State reportable quantity spills occurring on Government property. Submit to via the KO no later than five working days after the initial voice contact report. Do not send any written report directly to cognizant agencies.

5. Reporting – All Spills Off Government Property

Immediately reports all spills or leaks off government property to the KO. Comply with all DOT and applicable Federal (e.g., 40 CFR 302 and 40 CFR 355, “Emergency Planning and Notification”), State and local laws, rules and regulations required for notification and reporting.

Form Attachment No.: N/A
Government Approval Required: ☐ Yes ☐ No
Media: ☐ Hard Copy ☒ Electronic ☐ Direct System Input
<u>Instructions:</u> 1. The report shall be prepared using Microsoft Office Word® software. 2. Submit a copy of the summary report via email to KO for Government review and comment.

Attachment 0200000-15
Deliverables

Deliverables Form Preparation Instructions
Deliverable Title: 0200000/2.9.6 NAVFAC Contractor Incident Reporting System (CIRS)
Form Attachment No.: 0200000-05
Government Approval Required: ☒ Yes ☐ No
Media: ☐ Hard Copy ☒ Electronic ☐ Direct System Input
<u>Instructions:</u> 1. The report shall be prepared using Microsoft Office Word® software. 2. The purpose of this requirement is to document all damages, accidents, mishaps, and near misses that occur on or related to Government property. 3. At a minimum, the report shall include the following: a. General information (e.g., accident classification, accident involving) b. Personnel information (e.g., Name of person involved, etc.) c. Witness information (e.g., Name of witness involved, etc.) d. Contract information (e.g., Name of contract, etc.) e. Accident description (e.g., Date/Time/Location of accident, details of accident, action taken to prevent re-occurrence, etc.) f. Injury/Illness/Fatality information (e.g., Severity of injury/illness, etc.) g. Estimated damage cost (for property, material or supply damage) 4. Submit to the KO and the COR within 1 day of incident. 5. The Contractor shall report verbally to the KO as soon as possible but not more than 4 hours of such event.

Attachment 0200000-15

Deliverable Title: 1503020/3 Contractor's Work Plan			
Form Attachment No.: N/A			
Government Approval Required: ☐ Yes ☒ No			
Media: ☐ Hard Copy ☒ Electronic ☐ Direct System Input			

Instructions:

1. The report shall be prepared using Microsoft Office Word® software.
2. The Contractor shall develop and execute a plan for pest control services. Contractor's Work Plan (CWP) shall adhere to applicable References and Technical Documents contained in Attachment 1503020-03.
3. The CWP shall establish the strategy and methods for conducting a safe, effective, and environmentally sound pest management program in compliance with the specifications.
4. The Contractor may review the installation's historical records of pest activity and abatement actions, survey facilities and grounds, and consult with the Installation PMC in development of a plan.
5. The CWP shall address continuous monitoring, pest response and removal procedures, record keeping, warranties, education and communication to installation personnel to prevent pests and disease vectors, bird control in hangars, etc.
6. The IPM approach should use targeted (i.e., effective, environmentally sound) methods including habitat/facility modification, biological/genetic/cultural control, mechanical/physical control, and where necessary, the judicious use of least hazardous pesticides.
7. The CWP shall include labels, Safety Data Sheets, New Pesticide Request, Planned Pesticide Use (PPU) Sheets, and comply with all applicable local, state, DoD and Federal policy and regulations, and the IPMP.
8. Submit to the KO with each proposal.
9. Reports of conditions conducive to pest infestation shall be submitted to KO and COR either electronically or hand-written within 1 day after citing conditions.

Attachment 1503010-01
Definitions and Acronyms

Definition/Acronym	Description
Ash Urn	Receptacle specifically used for the disposal of cigarettes, cigars, and other smoking product waste.
Clean	Free of dirt, dust, spots, streaks, graffiti, smudges, smears, litter, bugs, debris, liquids, and other foreign residue.
Clean Room	A room designed and environmentally controlled to be dust free, humidity and temperature controlled for a specific type of work. Special entrance and work policies must be adhered to when working in these spaces.
CDC	Child Development Center a building or area used for the care of children.
Coating	Applying a sealing coat (or finish) to a floor, sometimes referred to as waxing.
Debris	Includes, but is not limited to, paper, cans, bottles, large limbs and branches, and other similar items.
Disinfect	To cleanse of microorganisms by application of a chemical agent, also sanitize.
Dispenser	A dispensing container, machine, etc. which is used to store and release products in single usage portions. Dispensers under this definition include but are not limited to paper towel dispensers, toilet paper dispensers, toilet seat cover dispensers, and soap dispensers.
Dust Free Spaces	Areas requiring specific controls on emission of dust particles from cleaning processes or equipment.
Interior Glass Surfaces	All glass, plexi-glass, transparent or semi-transparent plastic surfaces within a building. Including but not limited to: walls, doors, room dividers, display cases, etc.
Lunch/Break Room	A room designated for use of employees to store, prepare, and consume meals.
Restroom	A room or facility with sinks, urinals, toilets, showers and other similar fixtures.
Sanitary	Free of microorganisms.
Service Class	Category that describes frequency of work for each work item.
Sightly	Attractive, tasteful, or pleasing to the sight and consistent with its intended purpose.
Space	An area to receive janitorial services which may or may not be considered a room by common definition, e.g., definable sections of hallways, stairwells, lobbies, offices, entrances, and elevators.
Waste Containers	Trash receptacles, wastebaskets, trashcans, wastepaper baskets, or any container holding trash, paper, or refuse of any type.
Window	Any glass opening on the exterior wall of a building or facility. Includes the interior and exterior of the glass, sill, frame; as well as the associated screens and storm windows.
Youth Center	A building or area used for the care and recreation of older children and adolescents.

Note 1: Desk-side recycling collection is not provided in administrative and operational spaces. Centralized recycling containers shall be provided and emptied as to prevent overflow. Note 2: Services may be ordered by Custodial Service Order or non-recurring work. Note 3: Lunch/break room area services are limited to stocking paper towels and soap dispensers, where present. (Floor care in lunch/break room area is provided at the same frequency as the rest of the facility.) Note 4: Intent is to have floor care events scheduled and performed every two months; therefore, spray cleaning and buffing should not be performed concurrently with quarterly mopping. Annual stripping, coating, and buffing shall be performed at six month intervals after spray cleaning and buffing and will replace one spray cleaning event for flooring surfaces where stripping and waxing is appropriate.

Custodial Supplies

*** Marines will provide bathroom supplies, highlighted in yellow: #1, #2, #3 & #4 ***

Material.

All material shall conform to the requirements of the latest edition of the applicable specification listed below. When no specification is listed, the material shall be of commercial grade and quality. Within ten days after award of this contract, the Contractor shall submit a list of the materials to be used for approval by the FSCM. The list shall include the name of the manufacturer name, the brand name, and a statement certifying that materials supplied meet or exceed contract requirements.

a. Toilet Supplies

- 1) ***Soaps:** Restrooms soaps shall conform to the following requirements.
 - (a) Powdered soap for dispenser use shall be mildly scented, free flowing, and non-caking per ASTM-D2958.
 - (b) Liquid soap for dispenser use shall be mildly scented, approximately 15% concentrate, and equivalent to one of the following brand names:
 - Vestal
 - Calgon
 - Sani flush
 - (c) Toilet soap in cake form for hand use shall be white and mildly scented per ASTM-D499.
- 2) ***Paper Towels and Toilet Tissue:** Factory-reject type paper is prohibited for use by this contract. Paper towels and toilet tissue shall be delivered in unopened cartons and conform to the following requirements.
 - (a) Paper towels shall suit the existing paper towel dispensers; adapters, as required, shall be furnished by the Contractor at no additional cost to the Government. Folded paper towels shall conform to A-A-696. Paper towel rolls shall be commercial grade, highly absorbent, wet-strength type, and approximately 4½ inches in diameter and 11 inches wide.
 - (b) Toilet tissue shall be commercial grade per ASTM-D3905. The approximate width of rolls shall be 4½ inches.
- 3) ***Disinfectant Germicidal:** Disinfectant shall conform to A-A-1441.
- 4) ***Waste Container Liners:** Liners shall be provided in various sizes to fit all waste containers.
- 5) Liquid Deodorizer. Liquid deodorizer shall be standard commercial type
 - (a) Deodorants. Cake deodorants shall fit existing dispensers and meet the requirements of A-A-266.
- 6) Floor Wax. Floor wax shall be an acrylic, slip-resistant wax conforming to one of the following brand names or an approved equal.
 - Johnson's Complete
 - Carolina Reflections
 - Cello-Brite

Equipment. All power-driven equipment for vacuuming, floor scrubbing, waxing, and polishing shall be of the industrial type, mechanically sound, safe to operate, and in a condition that will not harm or excessively wear existing finishes and floor coverings. Storage and use of approved equipment shall be acceptable to the activity Fire Marshall.

*All other Material and Equipment furnished by the Contractor shall be of the type and quality used in large-scale commercial cleaning operations, meet the requirements specified herein, and be approved by the before use.

CUSTODIAL SUPPLIES

* Marines will provide bathroom supplies, highlighted in yellow: #1, #2, #3 & #4 *

Material.

All material shall conform to the requirements of the latest edition of the applicable specification listed below. When no specification is listed, the material shall be of commercial grade and quality. Within ten days after award of this contract, the Contractor shall submit a list of the materials to be used for approval by the FSCM. The list shall include the name of the manufacturer name, the brand name, and a statement certifying that materials supplied meet or exceed contract requirements.

a. Toilet Supplies

- 1) *Soaps: Restrooms soaps shall conform to the following requirements.
 - (a) Powdered soap for dispenser use shall be mildly scented, free flowing, and non-caking per ASTM-D2958.
 - (b) Liquid soap for dispenser use shall be mildly scented, approximately 15% concentrate, and equivalent to one of the following brand names:
 - Vestal
 - Calgon
 - Sani flush
 - (c) Toilet soap in cake form for hand use shall be white and mildly scented per ASTM-D499.
- 2) *Paper Towels and Toilet Tissue: Factory-reject type paper is prohibited for use by this contract. Paper towels and toilet tissue shall be delivered in unopened cartons and conform to the following requirements.
 - (a) Paper towels shall suit the existing paper towel dispensers; adapters, as required, shall be furnished by the Contractor at no additional cost to the Government. Folded paper towels shall conform to A-A-696. Paper towel rolls shall be commercial grade, highly absorbent, wet-strength type, and approximately 4½ inches in diameter and 11 inches wide.
 - (b) Toilet tissue shall be commercial grade per ASTM-D3905. The approximate width of rolls shall be 4½ inches.
- 3) *Disinfectant Germicidal: Disinfectant shall conform to A-A-1441.
- 4) *Waste Container Liners: Liners shall be provided in various sizes to fit all waste containers.
- 5) Liquid Deodorizer. Liquid deodorizer shall be standard commercial type
 - (a) Deodorants. Cake deodorants shall fit existing dispensers and meet the requirements of A-A-266.
- 6) Floor Wax. Floor wax shall be an acrylic, slip-resistant wax conforming to one of the following brand names or an approved equal.
 - Johnson's Complete
 - Carolina Reflections
 - Cello-Brite

Equipment. All power-driven equipment for vacuuming, floor scrubbing, waxing, and polishing shall be of the industrial type, mechanically sound, safe to operate, and in a condition that will not harm or excessively wear existing finishes and floor coverings. Storage and use of approved equipment shall be acceptable to the activity Fire Marshall.

*All other Material and Equipment furnished by the Contractor shall be of the type and quality used in large-scale commercial cleaning operations, meet the requirements specified herein, and be approved by the before use.

Definitions and Acronyms

Definition/Acronym	Description
Arthropod	The group of animals that includes insects, spiders, ticks, mites, silverfish, and related organisms.
Callback	A request for additional service or retreatment following the initial service that has not provided the control required. Callbacks shall be provided at no additional cost to the Government.
Certified Applicator/ Operator	An individual who has completed an EPA approved training program that includes written examinations in core and specific application categories and is certified by the state, or host nation in which they are applying pesticides to do so without supervision.
Contractor's Work Plan (CWP) for Pest Control	A Contractor developed document submitted as part of the Contractor proposal that describes how the requirements of this contract will be met. The plan establishes the strategies and methods for conducting a safe, effective, and environmentally sound pest management program.
Disease Vector	Any animal capable of transmitting the causative agent of a human disease. It is recognized that certain disease vectors are predominately nuisance or economic pests that as conditions change may require management or control as a disease vector.
Insect Growth Regulator (IGR)	Chemical substance that disrupts the action of insect hormones controlling molting, maturity from pupal stage to adult, and other growth functions for the purpose of insect control.
Integrated Pest Management Coordinator (IPMC)	The individual, fully trained in IPM principles and practice, designated by the installation commanding officer (CO) to coordinate and oversee all pest management activities at the installation.
Integrated Pest Management Plan (IPMP)	A required, written long-range, comprehensive planning and operational document that establishes the strategy and methods for conducting a safe, effective, and environmentally sound IPM program. IPM plans are a means of establishing and implementing installation pest management programs and function as the tool used to ensure compliance with applicable pest management laws and regulations.
Integrated Pest Management (IPM)	A planned program incorporating education, continuous surveillance, record keeping, and communication to prevent pests and disease vectors from causing unacceptable damage to operations, people, property, materiel, or the environment. IPM uses targeted, sustainable (effective, economical, environmentally sound) methods including habitat modification, biological, genetic, cultural, mechanical, physical, and regulatory controls; and when necessary, the judicious use of least hazardous pesticides.
Safety Data Sheet (SDS)	A document (Occupational Safety and Health Administration (OSHA) Form 174, or equivalent) that accompanies a pesticide product, providing the handler with chemical information on ingredients, handling instructions, potential hazards, and manufacturer address and emergency contact information.
Medically Important Pest	Any animal capable of transmitting the causative agent of a human disease serving as an intermediate or reservoir host of a pathogenic organism producing human discomfort or injury, including (but not limited to) mosquitoes, flies, other insects, ticks, mites, snails, and rodents.
Mission Impact Pest	Pests that may adversely affect the DoD mission or military operations; the health and well-being of people; or structures, material, or property.
Nuisance Pests	Arthropods, and other organisms, that do not cause economic damage or adversely affect human health, but which on occasion do cause annoyance.
Pest Management Performance Assessment Representative (PMPAR)	A DoD employee trained in pest management, who protects the government's interest through on-site performance assessment (PA) of commercial pest management contracts or other contracts that involve the use of pesticides.

Attachment 1503020-01
Definitions and Acronyms

Definition/Acronym	Description
Pest Management	The prevention and control of disease vectors and pests that may adversely affect the DoD mission or military operations; the health and well-being of people; or structures, material, or property.
Pest Management Consultant (PMC)	A professional, with a degree in a biological science, who has rigorous college-level entomology training, such as a NAVFAC civilian entomologist (applied biologist) or Bureau of Medicine and Surgery (BUMED) commissioned medical entomologist who has command program oversight responsibilities and provides guidance and information on the management of pest management programs for commands and installations.
Pesticide	Any substance or mixture of substances, including biological control agents, registered by EPA under FIFRA intended to destroy, repel, or mitigate pests. Includes insecticides, rodenticides, herbicides, fungicides, plant regulators, defoliants, desiccants, disinfectants, anti-fouling paints, and biocides (such as water treatment chemicals). NAVFAC pest management consultants do not approve disinfectants or biocides.
Pesticide Facility	The building and areas designated for handling, storing, and mixing of pesticides.
Pests	Any organism (except for micro-organisms that cause human or animal diseases) that adversely affects operations, preparedness, the well-being of humans or animals, real property, materiel, equipment or vegetation, or is otherwise undesirable.
Registered Pesticide	A pesticide registered by EPA for sale and use within the United States.
Road Mile/Kilometer	A unit of measure for measuring fogging application for adult mosquito control using a vehicle mounted Ultra Low Volume (ULV) aerosol generator traveling along a given route for a distance of 5,280 feet/1,000 meters.
Surveillance	Thorough inspections or surveys conducted before or after pest management treatments or on a regular basis to determine the presence and prevalence of pests or disease vectors.
Time Period to Maintain Control	A frequency specified on each Pest Group Sheet that is the minimum time the Contractor shall maintain control of pest(s) after reaching the specified level of control.
Time Period to Obtain Control	A frequency specified on each Pest Group Sheet that is the maximum time allotted for the Contractor to obtain control of pest(s) per the specified level of control.
Time Period to Respond	A frequency specified on each Pest Group Sheet that is the maximum time the Contractor is permitted to respond to a trouble call.

References and Technical Documents

The Contractor shall adhere to the applicable portions of the current edition of the following publications and directives in performing the services required under this contract:

- Department of Defense Directive 4150.07, Department of Defense Pest Management Program
- Executive Order 12088, Prevention, Control, and Abatement of Environmental Pollution at Federal Installations
- OPNAV Instruction 6250.4C, Navy Pest Management Programs
- OPNAVINST 5090.1, Environmental Readiness Program Manual, Chapter 24: Pesticide Compliance Ashore
- 42 U.S.C. 4321 et seq., National Environmental Policy Act (NEPA)
- 7 U.S.C. 136 et seq., Federal Insecticide, Fungicide and Rodenticide Act (FIFRA) as amended
- 16 U.S.C. 1531 et seq., Endangered Species Act
- 42 U.S.C. 6901 et seq., Resource Conservation and Recovery Act (RCRA)

Attachment 1503020-04 Service Level Standards
Mission Impact Pests¹ – Routine surveillance and treatment is conducted in accordance with the IPMP. Structure Damaging and Public Health Pests – Routine surveillance and treatment is conducted in accordance with the IPMP. Lawn Turf and Ornamental Plant Pests – No surveillance in any grounds areas and treatment in prestige areas is conducted in response to customer complaints only. No treatment in improved grounds areas. Nuisance Pests² – Routine surveillance and treatment conducted in accordance with the IPMP is limited to Child and Youth Program facilities, food handling and dining facilities, and administrative areas. No surveillance in operational areas. Treatment of operational areas is conducted in response to customer complaints only. Note 1: Mission impact pests are indicated on the Frequencies for Scheduled Work provided in 1503010-05. Note 2: All Vertebrate pests are treated as Nuisance Pests unless otherwise specified.

Attachment 1503020-05
Frequencies for Scheduled Work

Complete (Frequencies for Scheduled Work) delineating the specific pest and pest areas requiring scheduled service work. Review the IPMP and consult with the NAVFAC PMC to determine any applicable Mission Impact pests for a facility and specify in the chart below. As a minimum, the attachment should include the following information for each of the areas to be surveyed and treated by the Contractor: Facility Number, Area (square feet), Facility Description, Mission Impact Pests, and Frequency of inspections or treatments required. A Sample of a completed (Frequencies for Scheduled Work) is also included for reference. Check with NAVFAC PMC or refer to service records from the past two to three years to determine the required frequency. However, any frequency can be specified based upon factors such as historical data, building type/use, resources available, etc. Frequencies are usually determined based on the following:

- Monthly services typically apply to common use areas such as restrooms, coffee messes, lounge areas, vending machine rooms, and other areas such as barracks, commissary warehouses, and administrative buildings/office spaces.
- Biweekly services typically apply to food service and preparation areas such as galleys, clubs, snack bars, and cafeterias.
- Weekly services typically apply to subsistence warehouses.

The following buildings will be surveyed on the specified frequencies and treated as indicated on the pest group sheets:

Customer	Facility No.	Area (SF)	Facility Description	Mission Impact Pests Insert list of mission impact pests as applicable to the facility.	Frequency

SAMPLE

Customer	Facility No.	Area (SF)	Facility Description	Mission Impact Pests	Frequency
REGION	63	1500	Galley	Cockroaches, Rodents	Bi-Weekly
REGION	412	1,245	Globe and Anchor Bar	Cockroaches, Rodents	Bi-Weekly
REGION	1901	400	CDC Kitchen	Cockroaches, Rodents	Bi-Weekly
REGION	82	225	King Pin Snack Bar	Cockroaches, Rodents	Bi-Weekly
REGION	1400	30,000	Aircraft Hanger	Bats, Birds	Monthly
REGION	376	50,000	Aircraft Hanger	Bats, Birds	Monthly
NEX	239	12,000	Warehouse	Rodents	Weekly

Attachment 1503020-06
Nuisance Pest Requirements

Pest Group Number	Pest Group Name	General Requirements
001	Ant Control	Prevent and control ants in and around buildings and structures.
002	Arthropod Control in Food Handling Establishments	Prevent/control all arthropod pests in food handling establishments. Arthropod pests include, but are not limited to, cockroaches, ants (excludes fire ants which are covered under a separate pest group), silverfish, centipedes, ground beetles, fleas, spiders, stored product pests, etc.
003	Cockroach Control	Prevent and control all cockroaches.
004	Flea Control in and Around Buildings and Structures	Control flea infestations in and around buildings and structures.
005	Miscellaneous Arthropod Pest Control	Prevent and control nuisance arthropod pests in and around buildings and structures. Includes but is not limited to spiders, silverfish, scorpions, crickets, centipedes, millipedes, box elder bugs, parasitic or biting mites, beetles, etc. (Excludes ants, cockroaches, filth flies, and bees/wasps/hornets covered in separate sections.)
006	Stored Product Pest Control (Arthropods)	Control and prevent stored product pests at designated sites.

Attachment 1503020-06
Nuisance Pest Requirements

Performance Standards						
Pest Group Number	Pest Group Name	Time Period to Respond ¹	Time Period to Obtain Control ²	Time Period to Maintain Control	Level of Control ³	Notes See Below
001	Ant Control	7 days	30 days	30 days	100% control	1, 2, 3, 4
002	Arthropod Control in Food Handling Establishments	24 hrs	7 days	28 days	Retreatment required if: -Cockroaches: 4 or more adults or nymphs or 1 egg capsule per room -Ants: 4 or more -Centipedes/Spiders: 1 or more -Other Arthropods: 3 or more	1, 2, 3, 4
003	Cockroach Control	3 days	7 days	30 days	Retreatment required if: 4 or more adults or nymphs or 1 egg capsule per room	1, 2, 3, 4
004	Flea Control	2 day	7 days	30 days	100% control	1, 4, 5
005	Miscellaneous Arthropod Pest Control	7 days	10 days	30 days	Sensitive areas: 100% control Mites: 100% control Retreatment required if: - Food Handling: 3 or more arthropods/room/survey - Offices/Admin: 3 or more arthropods/room/survey - Industrial Areas: 5 or more arthropods/room/survey - Outdoors: 5 or more arthropods in a 100 square foot area	4
006	Stored Product Pest Control	3 days	24 hrs	30 days (residual) 7 days (ULV)	Sighting of any exposed, living, stored product pest(s) after 72 hours shall require retreatment	1, 4, 5, 6

Superscript:

1. After notification.
2. After first control action.
3. Based on performance assessment (i.e., surveys, customer complaints).

Notes:

1. Regularly scheduled, periodic pesticide applications are not approved for DoD property.
2. Liquid, dust, or aerosol pesticide formulations shall not be applied indoors when food is exposed or spaces are occupied.
3. Treatment of areas outside or adjacent areas to the designated area does not constitute an added service call or charge.
4. Report conditions conducive to pest infestation to the COR and PAR within one working day following survey.
5. Coordinate with residents/building personnel on specific treatment and re-entry times.
6. The ULV machine shall be calibrated for generating proper droplet sizes and range before starting any work under this contract and thereafter every 90 days or every 50 hours of use, whichever comes first. Maintain a log of ULV machine hour use.

Attachment 1503020-07
Public Health Pest Requirements

Pest Group Number	Pest Group Name	General Requirements
007	Aerial Spray Support and Operations	Provide ground support services for aerial spray operations.
008	Adult Mosquito Control	Application of a mosquito adulticide (ULV Formulation) at designated sites when directed by COR.
009	Adult Mosquito Control - Residual	Application of a mosquito adulticide (residual spray) at designated sites when directed by COR.
010	Adult Mosquito Surveillance	Survey for adult mosquitoes using light trap(s) and deliver catches to Installation Preventive Medicine.
011	Bed Bugs	Control all bedbugs.
012	Bee, Wasp, Hornet, and Stinging Arthropod Control	Control stinging arthropod infestations in and around buildings, structures, and areas. Pests include, but are not limited to, bees, wasps, hornets, cicada killers, yellow jackets, and solitary wasps (mud daubers, umbrella wasps).
013	Childcare Facilities/Sensitive Areas Pest Control (Includes: Schools, Hospital, Veterinary Clinic and Kennels, Child Development Center, Youth Activities Center)	Control all nuisance arthropod pests (including, but not limited to), cockroaches, ants, silverfish, spiders, crickets, flies, centipedes, box elder bugs, mites, bees, wasps, other venomous arthropods, AND all species of rodents in areas where children frequent including child care, schools, day care, nurseries and other locations as designated.
014	Filth Fly Control	Prevent and control filth flies including house flies, flesh flies, bottle flies, blow flies, fruit flies, and other related insects that breed or are attracted to garbage and trash in area designated by the COR. Identify source, if applicable.
015	Larval and Pupal Mosquito Control	Control of larval and pupal mosquitoes in designated area(s) when directed by COR (medical personnel determine when to control).
016	Larval Mosquito Surveillance	Survey designated mosquito breeding sites for immature mosquitoes (eggs, larvae, and pupae) and deliver catches to Installation Preventive Medicine.
017	Tick Survey and Control Outdoors	Survey for and control of ticks outdoors.
018	Fire Ant Control	Prevent and control fire ants indoors and outdoors. Sites include all improved, operational areas and other designated sites.

Performance Standard

Pest Group Number	Pest Group Name	Time Period to Respond	Time Period to Obtain Control	Time Period to Maintain Control	Level of Control	Notes See Below
007	Aerial Spray Support and Operations	24 hrs	N/A	N/A	All services rendered within time period requested	8
008	Adult Mosquito Control	24 hrs	2 hrs	N/A	ULV application performed as per specifications	7, 9
009	Adult Mosquito Control - Residual	24 hrs	2 hrs	10 days	Residual application performed as per specifications	N/A

Attachment 1503020-07
Public Health Pest Requirements

010	Adult Mosquito Surveillance	7 days ¹	Weekly during mosquito season	Duration of mosquito season [§]	Based on a Government risk assessment, surveillance shall be performed on at least one night per week with both positive and negative results being reported weekly to the KO or COR, and Installation Preventive Medicine Department. Traps shall be set prior to sunset and picked up after sunrise.	See Pest Group 011: Adult Mosquito Surveillance Below
011	Bed Bug Control	24 hrs	7 days	60 days	100% control	1, 2, 3, 4, 6
012	Bee, Wasp, Hornet, and Stinging Arthropod Control	4 hrs	24 hrs (stinging hazard) 2 days (nest removal)	28 days	100% control	2, 4
013	Childcare Facilities/Sensitive Areas Pest Control	2 days; Same day (venomous)	Varies ²	28 days	100% control	1, 2, 3, 4, 5, 6
014	Filth Fly Control	2 days	2 days	30 days	Indoors: 100% control Retreatment required if: -Outdoors/Dumpsters: 10 or more adults or immatures -Outdoors: 5 or more adults or immatures	1, 2, 3, 4
015	Larval and Pupal Mosquito Control	24 hrs	7 days	30 days	Consult Preventive Medicine for number	10
016	Larval Mosquito Surveillance	Within 14 days of 1 st day of month [§]	Every 2 weeks after mosquito increase [§]	Duration of increased mosquito population [§]	Surveillance shall be performed every two weeks and both positive and negative results shall be reported to the KO and installation Preventive Medicine Department	See Pest Group 016: Larval Mosquito Surveillance Below
017	Tick Survey and Control Outdoors	3 days	3 days	28 days	Retreatment required if: Improved areas: 3 or more ticks seen or 3 customer complaints Semi-Improved Area or Unimproved Area: 10 or more ticks by survey, 3 customer complaints, or 3 ticks seen	6
018	Fire Ant Control	Immediately (indoors) 1 day (outdoors)	1 day (indoors) 5 days (outdoors)	30 days	Indoor: 100% control Outdoors: - Critical areas: less than 1 mound/colony per acre - Non-critical areas: less than 3 mounds/colonies per acre	1, 2, 3, 4

Superscript:

1. As determined by the Government.
2. Indoors: Occasional Arthropod Invaders – same visit; Rats/Mice – 10 days; Cockroaches/Ants – 10 days; Arthropods/Rodents in “Adjacent Areas” – 7 days; Outdoor Play Yard: Ants – 7 days; Small Venomous Arthropods – same day; Outdoor/Non-Play Yard: All Pests – In accordance with applicable “Pest Group” part of contract except that venomous arthropods must be controlled in two calendar days

Notes:

1. Regularly scheduled, periodic pesticide applications are not approved for DoD property.
2. Liquid, dust, or aerosol pesticide formulations shall not be applied indoors when food is exposed or spaces are occupied.
3. Treatment of areas outside or adjacent areas to the designated area does not constitute an added service call or charge.
4. Report conditions conducive to pest infestation to the KO or COR within one working day following survey.
5. Pesticide applications shall not be made during hours of operations or when children are present at schools, child development centers, and youth activity centers.
6. Coordinate with residents/building personnel on specific treatment and re-entry times.
7. The ULV machine shall be calibrated for generating proper droplet sizes and range before starting any work under this contract and thereafter every 90 days or every 50 hours of use, whichever comes first. Maintain a log of ULV machine hour use.
8. Aerial applications of pesticides require validation and approval by a pest management consultant.
9. The adulticide is applied at maximum label rate for the adulticide used.
10. The KO or COR shall designate areas where mosquito larva should be controlled on a map supplied by the government. The areas may be intermittent water (developed from surveys for larval breeding sites), or permanent water sites

Pest Group 011: Adult Mosquito Surveillance

Equipment Provider: The Contractor shall provide the mosquito trap(s) and all other equipment (as needed) to complete mosquito survey(s) as directed by the KO or COR. All cost for procurement of equipment (including traps, batteries, extension cords, light bulbs, collection bags, etc.) shall be included in the bid price for this service and does not constitute grounds for any added charge under any other part of this contract.

Trap Design: Type of trap will be determined by the target mosquito species. The installation Preventive Medicine Department can provide information on local nuisance and vector mosquitoes. New Jersey light traps (or equal), CDC light traps (or equal), gravid traps, BG sentinel, or other commercially purchased light trap designs deemed acceptable to the Armed Forces Pest Management Board (AFPMB), shall be used. The Government may or may not provide electricity at the site where the KO designates that the light traps shall be placed. If no electricity is available, battery operated units shall be used. Battery operated units may be used even if electricity is provided. The government shall not supply batteries. Use the same trap design at the same location throughout the course of this contract.

Trap Placement: Traps shall be placed so as to effectively collect and measure the target mosquito population. The Government may determine trap locations.

Trapping Frequency: Traps shall be set twice each week (weather permitting). If weather is inappropriate for trapping (heavy rain or consistent winds above 15 MPH), perform trapping on the night following the scheduled night (or the next appropriate night). Conduct adult mosquito trapping in accordance with the weekly schedule.

Survey Data: At a minimum, the Contractor shall count the total number of mosquitoes in the trap and record the number on the Adult Mosquito Catch Form.

Disposition of Mosquitoes: Consult with the installation Preventive Medicine Department to determine if mosquito collections should be saved for identification and testing. If the mosquitoes are to be retained, then the following method should be used. Immobilize and kill mosquitoes and other arthropods by placing in the trap

Attachment 1503020-07
Public Health Pest Requirements

container in a freezer or using another suitable method that does not destroy the specimens (e.g. do not immerse in alcohol). (Mosquitoes collected for testing (e.g. West Nile Virus) may require specific handling; consult with the Preventive Medicine Department.) Place trap contents in a paper or cardboard container and label with time, date, location collector's name and contact information. Deliver to personnel designated by the KO to receive the mosquito trap collection. If mosquitoes do not need to be kept, then they should be disposed.

Reporting Adult Mosquito Collections: The Contractor shall complete the number of samples designated by the Government and record (in legible handwriting) the results of the survey for each location sampled. The Contractor shall note the date and time of collection, the number of mosquitoes collected per sample site, type of breeding source, notes regarding the sampled mosquitoes, and sum or average the totals. The COR may provide a collection form (Adult Mosquito Catch Form) on which the survey results are recorded. Records shall be reported on the collection form and submitted weekly during surveillance to the COR and the installation Preventive Medicine Department.

The action threshold for adult mosquito control shall be:

- Light traps: 25 biting females or 1 vector species in an un-baited light trap or 40 biting females in a baited CO2 trap
- Landing counts: 15 per hour
- Disease emergencies declared: light traps: 1 female of a species which has been identified as carrying disease trapped within 5 miles of installation

NOTE: Action thresholds may be changed on advise of a BUMED entomologist

Vector species of concern

Primary diseases of concern

Culiseta melanura

Eastern equine encephalitis (EEE),
West Nile Virus (WNV)

Culex pipiens complex

EEE, St. Louis encephalitis, WNV

Culex nigripalpus

EEE, St. Louis encephalitis, WNV adult mosquitoes per trap>>>

The base Preventive Medicine Technicians shall be consulted before any control takes place.

Pest Group 016: Larval Mosquito Surveillance

Equipment: The Contractor shall provide all equipment (as needed), to complete the assigned task(s) including, but not limited to, ladders, asepto syringes, boots, dippers, notebooks, etc (as applicable). The Contractor shall sample for immature mosquitoes on the schedule designated by the KO or COR.

Survey Designated Mosquito Breeding Sites (Areas designated by the ACO or Contract Specifications): Areas shall be designated by the KO or COR for non-recurring work, and by maps for recurring work. In the designated area(s), there may be differing aquatic environments to sample from including but not limited to, wetlands, standing pools of water, tree holes, artificial containers, clogged rain gutters, land depressions with temporary pools, floodwater plains, standing ponds, underground or aboveground storm water catch basins, swamps, drainage ditches, tire dumps, recycling areas, or any area where mosquitoes can breed. It is the responsibility of the Contractor to survey all potential mosquito breeding sites within the designated area(s).

Previous Experience: Larval mosquito surveys are very technique sensitive. Only Contractor personnel, with significant previous experience sampling for immature mosquitoes, shall perform larval surveys.

Survey Techniques:

In larger bodies of water such as ponds, lakes, catch water basins, etc., perform surveys around the water perimeter using a standard larval mosquito dipper (style and type approved by the Installation Preventive Medicine Department and the COR). Complete a sufficient number of dips to develop an accurate average dip count for the body of water (e.g. 10 dips/sampling station). Different species of mosquito larvae must be surveyed using different dipping techniques. It may be necessary to proceed carefully, or to act swiftly depending on the species

Attachment 1503020-07
Public Health Pest Requirements

being sampled, as water disturbance or casting shadows could result in the larvae diving to the bottom. It is the Contractor's responsibility to know the proper sampling technique(s) for the mosquito species present.

In smaller water bodies such as rain gutters, artificial containers, tree holes etc., samples shall be taken using an appropriate collection device.

Reporting Larval Mosquito Collections: The Contractor shall record (in legible handwriting) the results of the survey for each location sampled. The Contractor shall complete the number of samples designated by the KO for each location. The Contractor shall note the date and time of collection, the number of immature mosquitoes collected per sample site, type of breeding source, notes regarding the sampled mosquitoes, and sum or average the totals. The KO may provide a collection form on which the survey results are recorded. Records shall be reported on the collection form and submitted every two weeks during surveillance to the KO and the installation Preventive Medicine Department.

Attachment 1503020-09
Lawn Turf and Ornamental Plant Pest Requirements

Pest Group Number	Pest Group Name	General Requirements
021	Mole Cricket Control	Control mole crickets in lawns.
022	Turf and Ornamental Pest Control	Control arthropod pests in turf and on ornamental plantings.

Performance Standard						
Pest Group Number	Pest Group Name	Time Period to Respond¹	Time Period to Obtain Control²	Time Period to Maintain Control	Level of Control³	Notes See Below
021	Mole Cricket Control	7 days	7 days	60 days	2 mole crickets or less/4 ft ² Retreatment, if required, shall be performed at one-week intervals until the required Level of Control is established	2, 3
022	Turf and Ornamental Pest Control	5 days	7 days	60 days	No turf pests after 1 week Retreatment required if: - 3 or more leaf feeding arthropods on 20 leaves surveyed, OR - 3 or more bagworms on 20 evergreen branches surveyed, OR - 3 or more scale insects on 5 tree branches surveyed, OR - 3 or more scale insects on 6 ornamental branches surveyed, OR - Defoliation of 10% or more of the plant compared to a previous observed status, OR - General, noticeable physical decline of a plant that is caused by a pest, disease, or other damaging biotic agent.	1, 3, 4

Superscript:

1. After notification.
2. After first control action.
3. Based on performance assessment (i.e., surveys, customer complaints).

Notes:

1. Report conditions conducive to pest infestation to the COR within one working day following survey.
2. The Contractor may provide irrigation if required at no additional cost. Water for irrigation may be made available for the Contractor's use at fire hydrants located throughout the activity area; however, the COR should be contacted prior to their use.
3. Post/Notify as required by applicable state/local regulations.
4. Misapplication to target areas, or drift, runoff or other off-target effects that kill or damage any vegetation shall result in the Contractor replacing that vegetation at no charge to the Government.

Attachment 1503020-10
Vegetation Management Requirements

Pest Group Number	Pest Group Name	General Requirements
023	Aquatic Plant Control	Control aquatic weeds in ditches, ponds, lakes, and other aquatic sites.
024	Industrial, Sidewalk, Substation, Vault, and Right-Of-Way Weed Control	Provide bare ground weed control in cracks in sidewalks and paved surfaces, at fence line locations, in transformer vaults, around fire hydrants, and other designated locations.
025	Turf and Ornamental Bed Weed Control	Control weeds in turf areas and in ornamental plant beds.

Performance Standard						
Pest Group Number	Pest Group Name	Time Period to Respond ¹	Time Period to Obtain Control ²	Time Period to Maintain Control	Level of Control ³	Notes See Below
023	Aquatic Plant Control	7 days	21 days	60 days	100% control	2, 3, 4
024	Industrial, Sidewalk, Substation, Vault, and Right-Of-Way Weed Control	5 days	14 days	Consult PMC	Consult PMC	3
025	Turf and Ornamental Bed Weed Control	7 days	21 days	Season long	More than 4 weed plants per ornamental bed or 1600 ft ² of turf are grounds for retreatment of that area at the Contractor's expense.	1, 2, 3

Superscript:

1. After notification.
2. After first control action.
3. Based on performance assessment (i.e., surveys, customer complaints).

Notes:

1. Report conditions conducive to pest infestation to the COR within one working day following survey.
2. Post/Notify as required by applicable state/local regulations.
3. Misapplication to target areas, or drift, runoff or other off-target effects that kill or damage any vegetation shall result in the Contractor replacing that vegetation at no charge to the Government.
4. Permits may be required to perform this work (i.e., NPDES permit, FWS permit). The contractor shall obtain all permits and provide a copy to the KO and COR prior to commencing control.

Attachment 1503020-11
Vertebrate Pest Requirements

Pest Group Number	Pest Group Name	General Requirements				
026	Bat Control in Buildings	Control/exclude bats from buildings in accordance with state regulations.				
027	Commensal Rodents In and Around Buildings and Structures	Prevent and control rodents indoors or within 75 linear feet of the exterior walls of designated buildings and structures. Rodent pests include, but are not limited to Norway rats, roof rats, house mice, field mice, groundhogs (woodchucks) and other marmots. Service requires removal of dead animals.				
028	Pest Bird Control (including Bird Aircraft Strike Hazard reduction activities)	(1) Prevent and control birds inside and outside buildings/structures, and (2) Prevent and control birds roosting/nesting on aircraft operation areas.				
029	Pest Vertebrate Control	Control pest vertebrate animals including, but not limited to, feral dogs and cats, squirrels, skunks, snakes, opossums, raccoons, and mongoose. Comply with local laws and regulations.				
Performance Standard						
Pest Group Number	Pest Group Name	Time Period to Respond ¹	Time Period to Obtain Control ²	Time Period to Maintain Control	Level of Control ³	Notes See Below
026	Bat Control in Buildings	Same day	1 day (single bat) 5 days (community)	7 days (single bat) 90 days (community)	100% control	2, 4, 5, 11
027	Commensal Rodents	1 day (indoors) 3 days (outdoors)	10 days (indoors) 30 days (outdoors)	30 days	100% control Retreatment required if rodent signs are identified after treatment	1, 2, 3, 4
028	Pest Bird Control (including Bird Aircraft Strike Hazard reduction activities)	Varies ⁴	1 day	30 days	Indoor and Occupied Spaces:100% control Retreatment required if: - Indoor Industrial and Outdoors: 5 or more birds	2, 4, 5, 6, 11
029	Pest Vertebrate Control	24 hr, Immediately (emergency, indoors	3 days, 24 hr (emergency, indoors)	N/A	100% control	2, 4, 7, 8, 9, 10, 11

Attachment 1503020-11
Vertebrate Pest Requirements

Superscript:

1. After notification.
2. After first control action.
3. Based on performance assessment (i.e., surveys, customer complaints).
4. General Bird Control: 3 working days, 1 day in occupied spaces; BASH: 24 hours; BASH Emergency Call (Mission affected): Immediately

Notes:

1. Regularly scheduled, periodic pesticide applications are not approved for DoD property.
2. Report conditions conducive to pest infestation to the COR within one working day following survey.
3. Caught rodents shall not be left in traps for longer than 24 hours. Rodenticides should not be used in day care centers, schools or areas where food is prepared or served without special approval from the KO and notification of the Preventive Medicine Department.
4. Carcass disposal, transportation, disposition, deodorizing etc. are considered a normal part of pest control and are at no additional cost to the government.
5. Permits may be required to perform this work (i.e., NPDES permit, FWS permit). The contractor shall obtain all permits and provide a copy to the KO prior to commencing control.
6. Only three species of birds (European starling, English sparrow, and pigeons) may be controlled without a permit from the US Fish and Wildlife Service. Use of ultrasonic, electromagnetic, sonic repellent devices or electric shock devices is prohibited.
7. Feral Cats: Captured feral cats may be taken to the local humane society or animal shelter. Feral cats and other animals shall not be neutered and released onto the installation.
8. Wild Vertebrates That Do Not Transmit Rabies: Consult with Natural Resources prior to conducting any vertebrate control measures. Relocation and release of captured animals must be done in accordance with all Federal, State, and local regulations. If transport/release is not possible or practical the animal may be euthanized humanely and the carcass disposed of in accordance with county/local laws.
9. Leg hold traps or other devices that will harm animals are prohibited. Traps shall be placed and set in such a way as to prevent harm to humans and minimize harm to non-target animals.
10. Non-lethal control is required unless the animal appears rabid, sick, is extremely aggressive and poses a danger to the contractor during trapping, poses a danger to personnel or is a nuisance animal. Captured animals shall be scrutinized for sickness. If sickness is suspected, or animals are defined as nuisance species, they shall be humanely euthanized. Coordinate with Base Medical Department for carcass disposition (disposal or transport as applicable). If animals appear healthy, transport/release if possible, or dispose of at the discretion of the KO. Relocation and release of captured animals must be done in accordance with all Federal, State, and local regulations. Animals defined as nuisance animals should be humanely euthanized rather than relocated and released.
11. Consult with Natural Resources before considering lethal control of vertebrates. If permitted, firearms use shall always be coordinated with Base Security.

Attachment 1503020-12
Termite Control Specifications

Unscheduled Structural Pest Control Services. The Contractor shall provide structural pest control services on an unscheduled (indefinite quantity) basis as specified below. Services shall be completed within five working days after receipt of the task order. At the time of any soil treatment application, the soil shall be in a condition with low moisture to allow uniform distribution of the treatment solution throughout the soil. The Contractor shall not apply pesticide during or immediately following heavy rains, or when conditions will cause runoff and create an environmental hazard. No pesticides shall be applied to the soil beneath a plenum air space. Pesticides shall not be applied until the approximate location of water and sewer lines are known.

- (1) Subterranean Termite Control. All termite infestations in the structure shall be controlled within 30 days of treatment. Toxicants shall be delivered to the project site in sealed and labeled containers as supplied by the manufacturer or formulator. Labels shall bear the manufacturer's warnings to be observed in handling and use of material, and bear evidence or registration under the FIFRA.

- a) MATERIALS. "The termiticide used for control of subterranean termites shall be a soil applied nonrepellent termiticide (such as fipronil, imidacloprid or chlorfenapyr). If needed, remedial treatments can be applied to wooden structural members using a borate product containing the active ingredient disodium octaborate tetrahydrate (i.e. Tim-Bor™, Bora-Care™). The termiticide product shall be applied at the **highest labeled rates and concentrations.**"

1. Delivery and Storage. Termiticide shall be delivered to the project site in sealed and labeled containers as supplied by the manufacturer or formulator. Labels shall bear manufacturer's warnings to be observed in handling and use of the material. Labels shall bear evidence of registration under the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) as amended by the Federal Environmental Pesticide Control Act (FEPCA) of 1972.
2. Samples. The Contractor shall submit on request, or the Contracting Officer may draw at any time, without prior notice, from stocks at the site of the work, samples of insecticide concentrates and diluted insecticide solutions or emulsions being used or presumed to be for use in this work. Should analysis indicate such samples to contain less than the amount of active ingredient claimed on the label or specified herein, then all work done with such insecticides shall be repeated using insecticides conforming to this specification without additional cost to the Government.

- b) APPLICATION SHALL BE MADE IN THE FOLLOWING MANNER:

1. Interior Areas to be Treated. Expansion or construction joints located under and adjacent to interior and exterior walls shall be treated by drilling holes through the floor slab and injecting the proper insecticide. Drill holes should be spaced in a manner that will allow for application of a continuous chemical treatment zone (i.e. holes approximately 3/8 inch in diameter and no more than 12 inches apart, on center, not more than 6 inches from the wall being treated). Termiticide shall be applied into these holes under pressure at a rate as specified on the insecticide label. Plumbing chases shall also be treated.
2. Exterior Areas to be Treated. Soil adjacent to the outside of wall shall be treated. The treatment shall extend from the top of the footing to the top of the soil to form a vertical insecticide barrier along the building at the rate of not less than four gallons per ten linear feet per foot of depth. Backfill shall be tamped and sufficient in quantity to provide a surface sloping away from the structure. Voids in concrete block walls, and between brick veneer and foundation walls shall be treated by drilling and injecting insecticide as specified on the label.
3. Label Requirements. Rates and methods of application shall be in strict accordance with the printed instructions on the manufacturer's insecticide label with the insecticide applied at the **highest labeled rate and concentration.** Conflicts between this specification and label directions shall be resolved in favor of the label and discussion with the COR. Prior to performing the work, the termiticide label, labeling and Safety Data Sheet (SDS) must be submitted to the KO and COR for acceptance.

- c) DRILL HOLES

Attachment 1503020-12
Termite Control Specifications

1. Drill holes in masonry walls shall be plugged neatly and solid using 1:2 sand cement mortar.
 2. Drill holes in floor slabs shall be plugged neatly and solid using an approved non-shrink grout.
 3. Drill holes in expansion joints shall be sealed with an approved mastic cement. Excess mastic shall be removed and left neat.
- d) **EXISTING UTILITIES.** The Contractor shall determine in advance of commencing work the locations of water lines, drain lines, fuel oil lines and heating ducts, and shall avoid damage to these lines and ducts during drilling and rodding operations. Any damage caused by the Contractor's operations, if not conducted according to the information obtained from the Contracting Officer, shall be immediately repaired at the Contractor's expense.
- e) **SITE PROTECTION AND BACKFILL TREATMENT.** All shrubbery shall be protected from damage during all operations under this contract. Any such damage incurred shall be immediately corrected at no cost to the Government. Where grass is removed from trenching or excavated material, after backfilling, the sod shall be replaced and thoroughly dampened with the approved termiticide solution if allowed by the insecticide label.
- f) **CERTIFICATION OF WORK.** Upon final completion of the soil treatment, and as a condition for final acceptance, the Contractor shall furnish a written certificate stating:
1. Insecticide used had required concentration, brand name, and manufacturer thereof.
 2. Rate and method of application complied in every respect with the standards contained herein.
- g) **WARRANTY.** The Contractor shall provide the Contracting Officer with a written warranty, in acceptable form, for each building or building unit treated for subterranean termites. The warranty shall be prepaid (to be included in the total price of the treatment) good for a period of no less than five years, guaranteeing retreatment of any subsequent infestation and further that any structural damage due to an infestation after the initial treatment shall be repaired at no additional cost. A detailed written structural assessment shall be made by the Contractor with concurrence by the Contracting Officer prior to initial treatment for reference at a later date, should there be any questions of subsequent damage. The limit of the Contractor's liability for repairs is \$25,000 per building.
- (2) **Drywood Termite Control.** Provide drywood termite control as described below. The presence of an inspector trained in fumigation is essential while fumigant concentration readings are taken to determine that all drywood termites are killed during fumigation. Adherence to proper procedures must be assured while the work is being accomplished.
- a) **Safety Measures.** The Contractor shall ensure proper techniques and procedures are followed. Precautions shall be taken to prevent injury to any person and damage to property as a result of work accomplished under this section. These precautions shall include, but are not limited to, the following:
1. **Safety Equipment.** Before releasing any gas, the Contractor shall deliver to the COR, ready for use by Government personnel, two full-face gas masks, each with two new, unused canisters appropriate for the gas to be employed, or a similar number of self-contained breathing apparatuses, each with a cylinder of air; a completely stocked and illustrated fumigator's first aid kit (all meeting specifications of the Health and Safety Division, Bureau of Mines, U.S. Department of the Interior); and at least one approved low-volume gas detector for the fumigant to be employed. All such equipment will be held at the site until completion of the work.
 2. **Notification of Security Officer.** The activity Security Officer shall be notified at least 24 hours prior to the commencement of fumigation operations, and upon completion of the work that the building is being left unattended.
 3. **Disconnection of Services.** Prior to fumigation, all gas and other fuel supplies shall be cut off. Electric and telephone service need not be disconnected; however, the electric main entrance switch shall be pulled. All fires, including pilot lights, shall be extinguished prior to beginning fumigation procedures. After fumigation and subsequent ventilation

Attachment 1503020-12
Termite Control Specifications

has been completed, electric power, pilot lights, etc., shall be turned on or relit. Damage to any service caused by the Contractor shall be repaired at no additional cost to the Government.

4. Barricades. A double rope barricade shall be placed no closer than 20 feet to, and around the entire perimeter of the building to be fumigated. Existing fences may substitute for rope barricades if they are at least 20 feet from the building.
 5. Signs. Warning signs shall be placed prominently on all means of ingress to the building and grounds, including fences and rope barricades surrounding the work. Signs shall include a statement that the building is being fumigated with "sulfuryl fluoride" gas. Signs shall not be less than 18 by 24 inches in size and shall meet all state and local wording requirements.
 6. Guards. At least two guards shall be placed around the building before gas is released. Guards shall be positioned at either end of the structure so the maximum amount of the building is under continuous observation. Guards, warning signs, and barricades shall be maintained during the entire fumigation process until the Contractor has checked for gas concentration and declares the entire area gas free and safe for normal occupancy.
 7. Lighting. The Contractor shall provide adequate lighting around the exterior of the structure being fumigated to permit ready detection of trespassers during the night.
 8. Evacuation of Personnel. After all persons and animals are evacuated from within and under the building, guards are posted, and prior to release of the fumigant, the Contractor and KO shall jointly inspect all rooms and spaces to assure evacuation is complete.
 9. Partial Fumigation. No partial fumigation of any building shall be allowed.
- b) Preparation.
1. Grass and Shrubbery. Wet the soil in planted areas to a depth of six inches for a distance of one foot outward from the areas to be covered by the tarp, to protect nearby plant roots from injury. In this respect, the Contractor shall exercise every precaution to protect and preserve grass and shrubbery that may come into contact with the building. Any plants, shrubs, or grass damaged by the gas or otherwise, shall be replaced at no additional cost to the Government.
 2. Sampling. Furnish and install a minimum of four polyethylene tubes leading from approved locations within the structure to an approved location outside for the purpose of recording gas concentrations. Also furnish for use and have available during the entire fumigation period an approved thermal conductivity gas metering device, correctly calibrated in ounces per 1,000 cubic feet for the fumigant to be employed, and capable of sampling from the polyethylene tubes.
 3. Removal of Damageable Items. Remove all items from the building that might be damaged by the fumigant and maintain in locked storage. Lost or damaged items shall be repaired or replaced by the Contractor at no additional cost to the Government.
 4. Building Proper. In preparing the building for fumigation, exterior doors and windows and all entrances to enclosed interior areas, such as doors or windows leading to closets or cabinets or between rooms, shall be opened to facilitate distribution of the gas during fumigation and insure maximum ventilation at the end of the fumigation period.
- c) Procedure.
1. General. The building to be fumigated shall be completely enclosed with a gas-impervious tarpaulin material, with all sheeting seams securely sealed, and the lower edges of the enveloping cover sealed to the ground or finish grade level in a trench, with moist soil or with sand/water snakes (flexible tubing filled with water).
 2. Introduction of Chloropicrin. After preparation and sealing of the structure (except for one entrance) and prior to injection of the sulfuryl fluoride (Vikane), the Contractor shall introduce chloropicrin into the structure. The chloropicrin shall be introduced by placing cotton in shallow dishes, setting the dishes in the air stream of an electric fan within the structure, and pouring the chloropicrin over the cotton at the rate of one ounce per 10,000

Attachment 1503020-12
Termite Control Specifications

- to 15,000 cubic feet of space to be fumigated. The building will then be sealed and the fans started.
3. Fumigation. After introduction of the chloropicrin, the fumigant described below shall be released from cylinders placed outside the enclosed areas through not less than two hoses of either rubber, polyethylene tubing, or copper tubing leading to points well distributed within each floor of the building as previously approved by the KO. The liquid shall be injected at a temperature and pressure to guarantee complete vaporization upon its release. Sufficient air turbulence shall be created to maintain uniform distribution of the fumigants throughout all portions of the building and to prevent stratification of gas at any location by use of not less than four electric fans, each having a capacity of 3,000 to 5,000 cubic feet per minute (CFM).
 4. Fumigant and Dosage Rates. The fumigant shall be sulfuryl fluoride (Vikane) gas, injected in vapor form, and maintained in accordance with Dow Chemical Company Fumiguide B and Y. When the whole Fumiguide calculated initial concentration is obtained from all sampling points, the 24-hour fumigation time period starts. If the Contractor wishes to increase dosage rates to shorten the fumigation time in accordance with Fumiguide Y, prior approval of the KO and the NAVFAC PPMC is required.
 5. Borate Treatment. In addition to the aforementioned treatment, a glycol borate solution of Bora-Care™ shall be applied in attic and crawl spaces of the building. Apply a one-part water to one-part Bora-Care™ solution to the point of run off (one gallon of diluted solution for each 500 feet of surface area) to all exposed wood surfaces. Follow all labeled directions for the safe handling and use of this product. Aerosol application will be allowed only in inaccessible areas and with the prior approval of the KO.
 6. Sampling. During the actual 24-hour fumigation period, the gas-laden atmosphere within the enveloped structure shall be sampled from each sampling point five times: at the inception, and at four, eight, 16, and 24 hours after inception. The Contractor shall take appropriate action to ensure proper distribution of the gas and maintenance of the level of concentration specified. Sample readings shall be recorded and a copy of the readings provided to the KO upon completion of the treatment.
- d) Aeration. Upon termination of the fumigation exposure period, the Contractor shall remove all seals, open all doors and windows, and use ventilation fans to remove fumigants from dead air pockets with full observance of accepted safety, state, and labeled aeration procedures to avoid exposure of any persons or other life to dangerous concentrations of fumigant gas. The Contractor shall check for complete aeration with a low-volume gas detector in all enclosures, which might retain concentrations of gas, such as closets, cabinets, refrigerators, and chests, and certify to the KO that the structure is gas free and available for occupancy.
 - e) Clean Up. Upon completion of the fumigation, remove all debris and rubbish resulting from the work, replace damageable items removed from the building, and repair all damage resulting from the work.
 - f) Warranty. The Contractor shall guarantee the fumigated building is completely free of living drywood termites for one year after the fumigation is completed. The Contractor, accompanied by the KO, shall make two thorough inspections of the structure, at six-month intervals, following the fumigation date. The written findings of each inspection shall be provided to the KO within 10 working days after inspection completion. Positive evidence of drywood termite infestation, except from furniture and other moveable property installed during the one-year period, shall constitute conclusive evidence of improper fumigation and lack of control, and the building shall be refumigated at no additional cost to the Government.

Attachment 1503050-01
Definitions and Acronyms

Attachment 1503050-01 Definitions and Acronyms	
Definition/Acronym	Description
Aeration	Introduction of air into the soil by mechanical means to promote health and growth.
Appearance	Where there is a sense impression or outward aspect of an area or thing that is consistent, uniform and neat in and around the surroundings.
ATFP	Anti-Terrorism Force Protection
Artificial Turf	An artificial surface that resembles grass.
BASH	Bird/Animal Aircraft Strike Hazard
Berm	A mound or bank of earth typically used as a barrier.
Brow Ditch	A drainage ditch with sufficient slope to prevent erosion of adjacent grading.
Bruising of Lawn	An injury to grass areas resulting in discolored blades of grass, usually caused by mowing with a dull blade.
Caliper	The measurement of a tree trunk at its widest diameter, measured six inches up from the ground for trees under four-inch caliper, and twelve inches from the ground for trees over four-inch caliper. Multi-stem plants are measured at the widest point of all trunks, six inches up from the ground for trees under four inch caliper, and twelve inches from the ground for trees over four inch caliper.
Classification and Ordering of Plants	For the purposes of pruning, trimming, planting, or removal, specific plants shall be identified according to their type and application as specified in the American Horticulture Society Encyclopedia of Garden Plants (latest edition), D.K. Publishing under ISBN-0-7894-1943-2. Example: A Red Tip Photinia bush which is 15' tall will be classified as a shrub.
Clipping	Any vegetation that is left on paved surfaces, lawns, and plant beds after being cut by means of shears, mowers, etc.
De-thatch	Removal of unwanted thatch from mowed areas to promote health and growth.
Debris	Includes, but is not limited to, paper, cans, bottles, limbs and branches, pine straw and pinecones, leaves, rocks, and other similar items.
Depression	A small area that has sunken below its surroundings.
Diameter at Breast Height (DBH)	The diameter of a tree measured at 4½ feet above ground level.
Edging	Creating a uniform edged cut to promote a neat appearance and prevent ground structures from vegetation encroachment.
Fertilization	Application of natural and synthetic materials to the soil where it has become deficient in nutrients essential for proper plant growth.
Frond	A large leaf or branch of a palm tree, usually with many divisions.
Grade	To bring soil to previously established level or inclination using appropriate tools and equipment.
Ground Cover	A plant which is chosen for the special task of providing a dense low attractive cover that prevents weeds and erosion. Varieties include, but are not limited to Vinca, Hosta, Ivy, Alyssum, Ajuga, and Liriope.
Hedge	Shrubs or other plants planted closely together so as to form an unbroken line during trimming.
Irrigation	Application of water to the soil to promote health and growth.
Irrigation System	A permanent system used for apply water to lawns and plants. The irrigation system includes all pumps, controls, piping and, sprinkler heads. The irrigation system starts at the valve supplying to the system.
Maximum Growth Height	That limit of dominant vegetative growth, including seed heads or pods.
Mowing	Cutting of all grasses, weeds, and other vegetation that is 1 inch or less in diameter (at ground level).

Attachment 1503050-01
Definitions and Acronyms

Attachment 1503050-01 Definitions and Acronyms	
Definition/Acronym	Description
Operational Areas	Areas driven by operational requirements (e.g., ATPF, BASH, Clear Zone Management, and NAVSEA OP-5).
Parcel	A designated area of land which may be indicated on installation maps or other attachments.
Pesticide	Any substance or mixture of substances, including biological control agents, registered by EPA under FIFRA intended to destroy, repel, or mitigate pests. Includes insecticides, rodenticides, herbicides, fungicides, plant regulators, defoliants, desiccants, disinfectants, anti-fouling paints, and biocides (such as water treatment chemicals). NAVFAC pest management consultants do not approve disinfectants or biocides.
Pruning	The selective removal of unwanted growth to restore a plant or tree to its natural symmetry and appearance. Pruning involves selection and judgment, and does not include the practice of cutting off all branches to an even length. This may include re-sculpting, changing the size, or any other form of work that directly affects the look and growth pattern of the plant.
Registered Pesticide	A pesticide registered by EPA for sale and use within the United States.
Rejuvenation	The severe pruning of overgrown bushes, shrubs and hedges to within a few inches of the ground or as directed by the KO to restore the plant to its natural shape.
Rut	Depressions made in soil or grass by tires of vehicles or heavy equipment.
Shrub	A woody perennial plant generally smaller than a tree, usually having many permanent stems branching from or near the ground, and does not have a definite crown shape. Shrubs may be deciduous or evergreen, and in the area covered by this contract, may be very large in height and width.
Sightly	Attractive, tasteful, or pleasing to the sight and consistent with its intended purpose.
Special Event	Services that could not reasonably have been anticipated and were not contemplated at time of contract award.
Stump	The bottom portion of a tree, which remains in the ground after the tree, has been cut for removal. Usually less than five feet in height.
Swale	A low-lying or depressed area intended for drainage.
Thatch	A layer of slowly decomposing organic residues situated above the soil surface and constituting the upper stratum of the medium that supports turf grass growth. Usually associated with warm season grasses.
Tree	A perennial woody plant having a permanent self-supporting single stem or multiple stems. Ordinarily grows higher than ten feet, and usually develops branches at some distance above the ground with a definite crown shape.
Trimming	Removal of unwanted vegetation around trees, shrubs, flower and shrub beds, cultivated areas, poles, walls, valves, and other similar objects to match the height and appearance of the surrounding grass. Shrub and hedge trimming includes removal of unwanted vegetation to maintain a uniform, and well-shaped appearance, and to prevent interference with pedestrians, vehicle traffic and building encroachment.
Trunk	The main stem of a tree, usually long, large and relatively straight.
Vegetation	Plant life collectively consisting of grass, weeds, and other greenery (excluding shrubs, hedges, and trees) growing wild or cultivated on lawns, fields, and other areas.
Weed	Plant life growing where it is not wanted.
Xeriscape	A trademark for a method of landscaping that emphasizes water conservation in its use of drought-resistant plants.

Attachment 1503050-02
Pest Group Sheets

Pest Group Number	Pest Group Name	General Requirements				
023	Aquatic Plant Control	Control aquatic weeds in ditches, ponds, lakes, and other aquatic sites.				
024	Industrial, Sidewalk, Substation, Vault, and Right-Of-Way Weed Control	Provide bare ground weed control in cracks in sidewalks and paved surfaces, at fence line locations, in transformer vaults, around fire hydrants, and other designated locations.				
025	Turf and Ornamental Bed Weed Control	Control weeds in turf areas and in ornamental plant beds.				
PERFORMANCE STANDARDS						
Pest Group Number	Pest Group Name	Time Period to Respond	Time Period to Obtain Control	Time Period to Maintain Control	Level of Control	Notes See Below
023	Aquatic Plant Control	7 days	21 days	60 days	100% control	2, 3, 4
024	Industrial, Sidewalk, Substation, Vault, and Right-Of-Way Weed Control	5 days	14 days	As specified in the SLS	Consult PMC	3
025	Turf and Ornamental Bed Weed Control	7 days	21 days	As specified in the SLS	More than 4 weed plants per ornamental bed or 1600 ft ² of turf are grounds for retreatment of that area at the Contractor's expense.	1, 2, 3
NOTES: 1. Report conditions conducive to pest infestation to the KO and PAR within one working day following survey. 2. Post/Notify as required by applicable state/local regulations. 3. Misapplication to target areas, or drift, runoff or other off-target effects that kill or damage any vegetation shall result in the Contractor replacing that vegetation at no charge to the Government. 4. Permits may be required to perform this work (i.e., NPDES permit, FWS permit). The Contractor shall obtain all permits and provide a copy to the KO prior to commencing control.						

User Guide for Planned Pesticide Use Sheet

This is the User Guide for completing the Planned Pesticide Use Sheet that contains:

- (1) Instructions for completing the Planned Pesticide Use Sheet
- (2) List of Acceptable Terms
- (3) Planned Pesticide Use Sheet Blank Form

The Planned Pesticide Use Sheet shall be included as part of the Contractor's Work Plan (CWP) for Pest Control. One "Planned Pesticide Use Sheet" shall be filled out for each pesticide to be used. These forms shall be filled out on the on-line pest management reporting system. The regional NAVFAC Pest Management Consultant should be contacted to obtain an account and instructions to use the system. A new Planned Pesticide Use Sheet shall be filled out whenever pesticides used to control a pest are added or changed.

The List of Acceptable Terms shall be used to complete the Planned Pesticide Use Sheet (see Step 3A). Completed Planned Pesticide Use Sheets shall be attached to the CWP.

Instructions for Completing the Planned Pesticide Use Sheet

The following is a list of instructions for filling out each line of information required on the Planned Pesticide Use Sheet:

1. INSTALLATION, UIC - Insert the name and Unit Identification Code for the installation. The UIC is a five-digit number preceded by an "N" for Navy installations and an "M" for Marine Corps installations. The UIC is available from the KO.
2. OBJECTIVE:
 - A. TARGET PEST - The name of the pest or pests identified for control. Select the proper pest or pest category from the List of Acceptable Terms.
 - B. PURPOSE - Explain the major reason(s) for controlling the target pest(s). Refer to the List of Acceptable Terms.
3. PESTICIDE:
 - A. TRADE NAME – Insert the manufacturer's name given to the product, e.g., TermidorTM and MaxforceTM are both trade names for fipronil.
 - B. EPA REGISTRATION NUMBER – Insert the number usually found on the front of the label and on the container.
 - C. FORMULATION – Insert the form that the pesticide is in when ready for use. Refer to the List of Acceptable Terms.
 - D. CONCENTRATION OF ACTIVE INGREDIENT - Insert the percent active ingredient of the pesticide before it is mixed with a diluent. This information should be on the front of the label.
4. APPLICATION:
 - A. SITE – Identify the specific site where the pesticide will be applied. Refer to the List of Acceptable Terms.
5. SENSITIVE AREAS – Identify areas to be avoided or where special caution should be taken. Refer to the "Caution and Warning" statements on the label.

Attachment 1503050-03
Planned Pest Use Sheets

6. REMARKS – Include any additional pertinent information. If a general pest category has been listed under Target Pest, the specific pests should be listed here.

List of Acceptable Terms for Planned Pesticide Use Sheets

TARGET PEST	TARGET PEST	TARGET PEST
AGRICULTURAL INSECTS	FLEAS	SCALE INSECTS
ALGAE AND AQUATIC WEEDS	FUNGUS	SNAKES
ALL PESTS (SURVEILLANCE ONLY)		
ANTS, NUISANCE	FUNGUS - PYTHIUM	SOD WEBWORMS
APHIDS	GRASS	SPIDERS
	GRUBS	STORED PRODUCTS PESTS
BATS	HOUSEHOLD PESTS	STRUCTURAL PESTS
BED BUGS	LICE	TERMITES-DRYWOOD
BEEES		
BIRDS	MEDICAL PESTS	TERMITES-FORMOSAN
BITING FLIES	MICE	TERMITES-SUBTERRANEAN
CARPENTER ANTS	MITES	TICKS
CATERPILLARS	MOLE CRICKETS	TURF DISEASE
CHIGGERS	MOLES	TURF PESTS
CHINCH BUGS	MOSQUITO ADULTS	TURF/ORNAMENTAL PESTS
COCKROACHES	MOSQUITO LARVAE	WASPS
CRAB GRASS	NEMATODES	WEEDS – ALL
CRICKETS	NUISANCE PESTS	WEEDS – AQUATIC

Pest Management Operations Report

New Pesticide Management Record (SAMPLE)

Directions:

1. Select the installation and fill in the Office/Contractor, if applicable
2. Fill in a separate form for each pest management operation. For pesticide applications, the pounds of active ingredient (PAI) will be calculated automatically based on the data you enter.

The Contractor shall mow and trim vegetation as frequently as necessary to ensure vegetation height does not exceed the maximum allowable height specified above.

At a minimum, the Contractor shall mow and trim vegetation at the minimum frequency specified above during the growing season. Typically, the growing season is March through September.

The Contractor shall not cut grass blade length less than the minimum height.

Notes:

Note 1: Concurrent with every other occurrence of Mowing and Trimming

Note 2: As necessary to ensure lawns present a healthy appearance

Note 3: Maintain clean and free of weeds, grass, and unwanted vegetation

Additional services may be ordered under the Recurring Work provisions of this contract via Grounds Maintenance Service Order, incorporated into the contract in accordance with the CHANGES clause, SECTION I, or under the non-recurring work provisions of this contract.

DEFINITIONS AND ACRONYMS

DEFINITION/ACRONYM	DESCRIPTION
Bare Pavement	Free of frozen precipitation down to the surface of the pavement. Bare pavement does not mean completely dry and may still have frozen and/or liquid precipitation in the holes, pores, divots, seams and cracks.
Clear	Free of debris, as defined below.
DOT	U.S. Department of Transportation
Debris	Includes, but is not limited to, paper, cans, bottles, limbs and branches, pine straw and pinecones, leaves, sand, soil, aggregates, grass, metals, and other similar items.
End of Cleanup	Defined as when the Contractor has met all performance objectives.
End of Precipitation	The end of the hour during which the Contractor and the KO or designated representative mutually agree the precipitation has ended
EPA	Environmental Protection Agency
FAA	Federal Aviation Administration
Finished Street, Road, or Parking Lot	A paved or improved area in which the following conditions are met: Clear, Dry Area – The entire area of responsibility is as close as possible to clear and dry. Not more than one inch of snow shall remain on the area, including hard packed snow. Full Width – Snow is from the full width of the paved and improved area of the streets, roads, or parking lots. The snow is removed to at least the outer edge of the entire area of responsibility, so that the outer edge is exposed, unless otherwise specified. Obstructions – Where obstructions such as utility poles, sign posts, fire hydrants, and trees exist between or in the midst of the streets, roads or parking area: snow shall be cleared around these objects down to the required finished depth (by hand if necessary) so that streets, roads, or parking areas are blocked with snow.
Foreign Object Debris (FOD)	Any foreign object external to an aircraft that can cause damage. Examples include nuts, bolts, safety wire, baggage tags, misplaced tools, sand, rocks, asphalt chunks, birds, snakes and, rodents. Any item(s) on a runway that may be picked up by any aircraft and potentially cause damage to any part of the aircraft.
Ice (Taken from FAA AC 150/5200-30C)	The solid form of water consisting of a characteristic hexagonal symmetry of water molecules. The density of pure ice is 57 lb/ft ³ (913 kg/m ³), which is 9 percent less dense than water. Compacted snow becomes ice when the air passages become discontinuous at a density of about 50 lb/ft ³ (800 kg/m ³).
Initiation of Work	The Contractor shall initiate work as required to maintain streets, roads, and parking lots within the performance standard for snow removal and sanding.
NAS	Naval Air Station
New Storm	Any precipitation occurring after the “End of Precipitation” defined above.
Passage	The movement of persons or vehicles across paved surfaces.
Snow (on the ground). (Taken from FAA AC 150/5200-30C)	A porous, permeable aggregate of ice grains, which can be predominately single crystals or close groupings of several crystals.
Snow Event	Any occurrence of frozen precipitation that results in visible accumulation of snow or ice on paved surfaces.
