0100000 – General Information		
Spec Item	Title	Description
1	General Information	
1.1	Outline of Services	Except where otherwise stated, the Contractor shall furnish all labor, supervision, management, tools, materials, equipment, facilities, transportation, incidental engineering, and other items necessary to provide the services outlined below and described in this Performance Work Statement (PWS) for FACILITIES AND LIGHTING MAINTENANCE SERVICES at Joint Base Pearl Harbor Hickam, Oahu, Hawaii and outlying areas supported by this installation by means of a performance-based contract that is comprised of both Recurring Work and Non-Recurring Work Items. The PWS is organized into annexes. Annex 1 is "General Information". Annex 2 contains the on-site project management and administration requirements. Annexes 3 through 18 contain the technical requirements. The annex numbers are identified as 1 through 18 in the description column, but the fully expanded annex numbers include seven digits (e.g., Annex 1 expanded number is 0100000 as shown in the header row at the top of this page). Annex 1 General Information Annex 2 Management and Administration Annex 3 Command and Staff – Not Applicable Annex 4 Public Safety – Not Applicable Annex 5 Air Operations – Not Applicable Annex 6 Port Operations – Not Applicable Annex 7 Ordnance – Not Applicable Annex 8 Range Operations– Not Applicable Annex 9 Health Care Support– Not Applicable Annex 10 Supply– Not Applicable Annex 11 Personnel Support– Not Applicable Annex 12 Morale, Welfare and Recreation Support – Not Applicable Annex 13 Galley– Not Applicable Annex 14 Housing– Not Applicable Annex 15 Facilities Support Annex 1502000 Facilities Investment Annex 16 Utilities – Not Applicable Annex 17 Transportation– Not Applicable Annex 18 Environmental– Not Applicable
1.2	Acquisition of Additional Work	The Government reserves the right to acquire additional services at additional locations, within the scope of the annexes and areas included in Spec Item 1.1 Outline of Services, in addition to the services and locations identified in the requirements of this contract. Additional services will be incorporated into the contract in accordance with the CHANGES clause, SECTION I or ordered under the non-recurring work provisions of the contract. Items of work not covered by this contract but within the general intent are considered in the scope of this contract.
1.3	Background Information	Facility Maintenance & Repair Services have been typically performed by means of a combination Indefinite Delivery Indefinite Quantity type, performance-based contract that is comprised of both Recurring and Non-Recurring Work Items.
1.4	Navy PBSA Approach	The Navy's approach to performance-based service acquisition (PBSA) includes four component parts, which are 1) performance outcomes, 2)

0100000 – General Information		
Spec Item	Title	Description
		measurable standards, 3) consideration of incentives, and 4) performance assessment plan.
1.5	Standard Template	Key to implementing the PBSA approach is using a standard template that ensures Navy-wide consistency yet affords appropriate tailoring to meet local needs. The standard template contains 18 standard annexes. Annex 1 will always contain General Information that is relevant to the entire scope of the contract. Annex 2 contains Management and Administration requirements that are relevant to the entire scope of the contract. Annexes 3 through 18 and their associated sub-annexes contain the General Information, Management and Administration requirements, Performance Objectives, Related Information, and Performance Standards that are relevant to that technical annex. Except where otherwise stated, Annexes 3 through 18 and their associated sub-annex requirements are not relevant to one another. Within each technical annex and sub-annex, the organization of information and requirements are also standardized. Specification Item 1 will always contain General Information. Specification Item 2 will always contain the Management and Administrative requirements. Specification Item 3 will always contain the Recurring Work requirements. Specification Item 4 will always contain the Non-Recurring Work requirements. Requirements and standards for higher level specification items apply to all subordinate specification items, e.g., Specification Item 3 standards apply to all recurring work specification items. Specification Item 3.1 is applicable to all 3.1 subordinate specification items. Specification Items 3.2 and 3.3 are not considered subordinate to 3.1 nor are they considered subordinate to one another. All costs associated with Annexes 1 and 2 and Specification Items 1 and 2 shall be priced, and their price shall be allocated pro rata share to the Exhibit Line Items.
1.6	Related Information	There are four types of Related Information that can be found in the Description and Related Information columns of the specification as follows: Informational Notes as used throughout this PWS provides additional information to offerors' to be used in developing a thorough understanding of the work to be performed in this contract. Any block of text marked "Informational Notes" throughout Annexes 1 through 18 and their associated sub-annexes are subject to this disclaimer. Offerors' may not rely upon the "Informational Notes" as material representations of the Government. Information provided in "Informational Notes" does not create a contractually binding requirement on either party. Clarifying Information describes client expectations in a more detailed manner than the Performance Objective and Performance standard alone. Constraining Information describes limitations to the work performed to meet the Performance Objective and Performance Standard. Requirement Information further describes client requirements associated with each Performance Objective.
1.7	Verification of Workload and Conditions	Throughout the PWS, the workload data is generally referred to as being located in Annexes and Attachments. Annexes provides data such as descriptions, specifications, and the statement of work. Attachments

0100000 – General Information		
Spec Item	Title	Description
		provides data such as system descriptions, maps, floor plans, and tables to represent the type and location of services to be provided. All facilities, systems, and assets identified in this contract shall be accepted by the Contractor in "AS-IS" condition. The Contractor is fully responsible for all work up to and including the limits of liabilities specified. As prescribed in FAR 52.237-1, offerors' or quoters are urged and expected to inspect the site where services are to be performed and to satisfy themselves regarding all general and local conditions that may affect the cost of contract performance, to the extent that the information is reasonably obtainable. In no event shall failure to inspect the site constitute grounds for a claim after contract award.
1.8	Contractor's Knowledge	The Navy expects to receive insightful management from its contractors. This management shall include the knowledge, skills, authority and willingness to use contractor resources to find better ways of serving Navy clients' strategic and operational goals and objectives. The Navy's use of performance-based objectives evidences this principle. Although performance work statements will typically contain several levels of performance assessment, the Navy wants its contractors to exercise maximum discretion within bounds of prudent risk management to adjust processes and resources needed to reach specified objectives at the highest performance level.
1.9	Technical Proposal Certification	The Contractor warrants that its proposal including, but not limited to, proposed approaches, staffing, methodology, or work plans, will meet the performance objectives and standards set forth in this contract during execution thereof. The Contractor is not excused from meeting such performance objectives and standards in the event such proposal proves inadequate as conceived or executed to meet such performance objectives and standards. The Contractor understands that it bears all of the cost and performance risk associated with adopting acceptable additional (and/or alternative) means or methods of meeting the performance objectives and standards.

0200000 - Management and Administration		
Spec Item	Title	Description
2	Management and Administration	
2.1	Definitions and Acronyms	Definitions and Acronyms are listed in Attachment 0200000-01.
2.2	General Information	
2.2.1	Government Regular Working Hours	The Government's regular working hours are from 0700-1600, five days per week, Monday through Friday, except observed Federal holidays. Exceptions to the regular hours of operation are detailed in subsequent sections of this PWS. Work in certain annexes or sub-annexes require Contractor continuous operations, 24 hours a day, every day of the year including holidays. The performance of other work requirements shall be accomplished within the Government's regular working hours unless the specific work requirement specified herein necessitates otherwise. Any other work outside Government regular working hours must be authorized by the KO prior to commencement of work.
2.2.1.1	Observed Federal Holidays	The Government observes the following holidays: New Year's Day, Martin Luther King Jr.'s Birthday, President's Day, Memorial Day, Juneteenth, Independence Day, Labor Day, Columbus Day, Veterans' Day, Thanksgiving Day, and Christmas Day.
2.2.1.2	Restriction to Contractor Working Hours	If the Contractor wishes to work outside of the Government's regular working hours for the Contractor's convenience, the Contractor shall submit a written Request to Work Outside Government's Regular Working Hours per Deliverables. Excludes work to be performed during specified hours.
2.2.2	Wage Determinations	Wage Determinations are included in Attachment 0200000-02.
2.2.3	Requirements Hierarchy	Requirements or definitions specified in each spec item of this contract apply to subordinate paragraphs. For example, requirements shown in spec item 3.1 would apply to spec items 3.1.1, 3.1.2, 3.1.2.1 and so on. Likewise, Performance Standards specified at a lower digit level (i.e. spec item 3.1.1, 3.1.2, 3.1.2.1) apply when performance is assessed at a higher tier (i.e., spec item 3.1) based on the composite work requirements.
2.3	General Administrative Requirements	
2.3.1	Required Conferences and Meetings	The Contractor shall attend administrative and coordination meetings. The Contractor shall provide sign-in sheets and prepare minutes of all meetings and submit per Deliverables for review and comments. Comments received within two working days shall be incorporated into the minutes and a copy of the final revision shall be submitted per Deliverables for concurrence.
2.3.2	Training for Maintenance and Operation of New and Replacement Systems and Equipment	When construction, renovation, or repair work is performed by means other than this contract, the Contractor shall attend Government provided training, as applicable, for maintenance and operation of new and replacement systems and equipment at no additional cost to the Government.
2.3.3	Partnering	The Government requires cohesive partnerships with its Contractors and subcontractors. Key stakeholders, including the supported commands who may receive services, principal individuals from NAVFAC, the performance assessment team, and representative(s) of the installation(s) will be invited to participate in the partnering process. Key members of the prime and sub-contractor teams, including senior management personnel must participate.

0200000 - Management and Administration		
Spec Item	Title	Description
		The partnership will draw on the strength of each organization in an effort to achieve quality contract services done right the first time, within the contract price, as scheduled, and without any safety mishaps. NAVFAC P-204 Facility Support Contracts Partnering Guide contains the framework necessary for consistent implementation of partnering for Facility Support Contracts (FSCs).
2.3.3.1	Informal Partnering	The Contracting Officer shall organize the initial Partnering Meeting with key personnel of the project team, including Contractor's personnel and Government personnel. The initial session will be scheduled concurrent with the Pre-Performance Conference and held no later than 30 days after award and will be held at a Government provided facility as designated by the KO. The Initial Informal Partnering Session will be conducted and facilitated using electronic media (a video and accompanying forms) provided by Contracting Officer. The senior Government stakeholder present will lead the meeting, however, the Contractor's PM or senior representative is encouraged to participate as co-lead. The Partners will determine the frequency of the follow-on sessions.
2.3.3.2	Contract Partnering Administration	Upon award, the ACO will contact the Contractor, supported command(s), Region, and Installation(s) stakeholders, and the performance assessment team to discuss implementation of partnering. A partnership agreement, The Charter, should be in place as early as possible so issues arising, even before work begins, can be resolved using the issues resolution process. Replacement of Core Management Team members (stakeholders who attended the initial session and manage the contract work day-to-day) is discouraged since it will disrupt the synergy that has been developed. If replacement of a team member proves to be unavoidable, a follow-on partnering session must be held to officially turn the responsibilities of the position over to the new member. The Core Management Team consisting of the attendees below must be present during the initial and all follow-on partnering sessions. These are the core mandatory attendees. Other stakeholders may attend if they desire or as recommended by the partners.
2.3.3.3	Contract Partnering Session Attendees	The Contractor shall bring the necessary personnel to successfully partner on this contract. Asterisk indicates mandatory personnel. President/Vice President * Project Manager * Quality Manager Site Safety and Health Officer
2.3.4	Permits and Licenses	The Contractor shall obtain all required permits, licenses, and authorizations to perform work under this contract and comply with all the applicable Federal, state and local laws and regulations. The Contractor shall submit copies of Permits and Licenses per Deliverables.
2.3.5	Insurance	The Contractor shall submit a Certificate of Insurance per Deliverables as evidence of the existence of the following insurance coverage in amounts not less than the amounts specified below in accordance with the FAR Clause 52.228-5, INSURANCE – WORK ON A GOVERNMENT

0200000 - Management and Administration		
Spec Item	Title	Description
		INSTALLATION. This insurance must be maintained during the performance period.
2.3.5.1	Certificate of Insurance	The Certificate of Insurance shall provide for at least 30 calendar days written notice to the KO by the insurance company prior to cancellation or material change in policy coverage. Other requirements and information are contained in the aforementioned insurance clause.
2.3.5.2	Minimum Insurance Amounts	The Contractor shall procure and maintain, during the entire period of performance under this contract, the following minimum insurance coverage: Comprehensive General Liability: \$500,000 per occurrence Automobile Liability: \$200,000 per person, \$500,000 per occurrence per bodily injury, \$20,000 per occurrence for property damage Workmen's Compensation: As required by Federal and state worker's compensation and occupational disease statutes Employer's Liability coverage: \$100,000, except in states where worker's compensation may not be written by private carriers Other as required by state law
2.3.6	Protection of Government Property	During execution of the work, the Contractor shall protect Government property. The Contractor shall return areas damaged as a result of Contractor negligence under this contract to their original condition at no cost to the Government.
2.3.7	Directives, Instructions, and References	Department of Defense (DoD), Secretary of the Navy (SECNAV), Chief of Naval Operations (OPNAV), and other applicable Directives, Instructions, and References are listed in Attachment 0200000-03. The Contractor shall comply with the most current version of directives, instructions, and references including versions published during the term of the contract.
2.3.8	Invoicing Procedures	Refer to Section G for invoicing instructions. Refer to Invoice Form in Attachment 0200000-04 for sample. Invoices shall be submitted in a format compatible with the most recent Government installed Microsoft Office Version (currently 2010). Invoice data shall be capable of being sorted by CLIN, annex/sub-annex, spec item, spec item title, and ELIN/Sub-ELIN.
2.3.9	Forms	Forms referenced in this Annex, e.g. accident reporting, and damage reporting are included among the Forms in Attachment 0200000-05.
2.4	Government-Furnished Items	Except for items identified below as Government-Furnished, the Contractor shall furnish all labor, supervision, management, tools, materials, equipment, facilities, transportation, incidental engineering, and other items necessary to provide the services described in this Performance Work Statement (PWS). Government-Furnished Items will be provided in "AS-IS" condition and their use is at the option of the Contractor. The total or partial breakdown or failure of Government-Furnished Items shall not relieve the Contractor of the responsibility to perform the requirements of this contract. The Contractor shall provide periodic servicing, maintenance, and repair of the Government-Furnished Items accepted for use at no additional cost to the Government. Servicing, maintenance, and repair shall be provided in

0200000 - Management and Administration		
Spec Item	Title	Description
		accordance with the manufacturer's recommendations. The Contractor shall generate work orders in NAVFAC Maximo per Spec Item 2.6.8 for all servicing, maintenance, and repair activities performed on Government-Furnished Items. At the completion of the contract, all Government-Furnished Items shall be returned to the Government in the same condition as received, except for reasonable wear and tear. Government-Furnished Items, which becomes worn out due to normal wear and tear, shall be returned to the Government and its replacement shall be the responsibility of the Contractor at no additional cost to the Government. The Contractor shall be responsible for the cost of any repairs or replacement caused by Contractor negligence or abuse. The Government may inspect Government-Furnished Items at any time and without notice.
2.4.1	Government-Furnished Property (GFP)	Per FAR 45.101, "Property in the possession of, or directly acquired by, the Government and subsequently furnished to the contractor for performance of a contract. Government furnished property includes, but is not limited to, spares and property furnished for repairs, maintenance, overhaul, or modification." Government owned equipment being taken off installation by a contractor is GFP. Example: Items being fixed + spare parts + any materials given to industry are all considered GFP. Real property, government facilities, inventory/supplies consumed in performance of requirement, vehicles and equipment used only on federal installations - could be considered incidental to performance, or consumables – not GFP.
2.4.2	Government-Furnished Facilities	Not Applicable
2.4.3	Government-Furnished Vehicles and Equipment	Not Applicable
2.4.4	Government-Furnished Utilities	The Government will make available water and electricity at existing outlets required for the work to be performed under the contract. The Contractor shall provide and maintain, at its expense, the necessary service lines from the existing Government outlets to the work site. Provide and maintain backflow prevention devices on connections to domestic water lines and electrical transformer provisions on connections to electric lines. Meet all Federal, State, local, and installation codes and regulations for backflow prevention devices and electrical transformer provisions. Services required by the Contractor, for which there are no available Government outlets, shall be provided by the Contractor at no cost to the Government. The Contractor is responsible for the cost of all utilities at all Government-provided facilities and any additional Contractor-owned facilities, at prevailing Naval Station rates. The Contractor will be billed directly for all utilities provided to all Contractor occupied facilities. Utility rates billed to the Contractor will be at the following rates: 1. Electrical - the current rate for electrical services is \$111.82 MWH 2. Water - the current rate for water is \$13.23 per KGAL 3. Wastewater (Sewage) - the current rate for sewage services is \$14.06 per KGAL, based on 100% of the water consumption

0200000 - Management and Administration		
Spec Item	Title	Description
		Variations in Rates: Utility rates are subject to change. Changes in one or more utility rates shall not be basis for adjustment to the contract price or a claim unless the deviation from the quoted price for a utility rate exceeds 15%. When a utility rate varies by more than 15%, the contract price will be adjusted to reflect the amount the actual charge exceeds the rate quoted; however, the Government will only be liable for the amount of cost exceeding 15% of the rate quoted. For example, if a quoted rate increases by 16%, the Government will only be liable for 1% of the rate increase. Vice versa if the quoted rate decreases by 16%.
2.5	Contractor-Furnished Items	Except for items identified as Government Furnished, the Contractor shall provide all equipment, materials, parts, supplies, components, and facilities to perform the requirements of this contract. The KO may inspect Contractor-furnished items for adequacy and compliance with contract requirements. Inadequate or unsafe items shall be removed and replaced by the Contractor at no cost to the Government. Materials containing asbestos, lead, and polychlorinated biphenyls (PCBs) shall not be brought onsite. Energy efficient tools and equipment shall be used when available. The KO may at any time require Samples, Safety Data Sheets (SDS) or Manufacturer's Data Cut Sheets of Materials used in this contract.
2.6	Management	The Contractor shall manage the total work effort associated with the services required herein to meet the performance objectives and standards. Such management includes but is not limited to planning, scheduling, cost accounting, report preparation, establishing and maintaining records, and quality assurance. The Contractor shall provide a staff with the necessary management expertise to ensure performance objectives and standards are met.
2.6.1	Safeguarding Information	The Contractor shall safeguard controlled unclassified information and information associated with Government property in accordance with the latest revision of CNSSI 1253, DoDI 8582.01, NIST SP 800-53, NIST SP 800-171, SECNAV Defense Industrial Base (DIB) Memo, and applicable contract clauses. At a minimum, this information shall be protected at the moderate confidentiality level as defined in NIST SP 800-171. Contractor information and data systems that contain information associated with Government property shall comply with DoD Risk Management Framework (RMF). The Contractor shall develop Plans of Action and Milestones (POA&Ms) per NIST SP 800-171, track accomplishment, and submit to the Government per Deliverables. If a cybersecurity incident is encountered or suspected related to any (Contractor or Government) Information Technology (IT) or Operating Technology (OT) systems, including Monitoring and Control Systems, the Contractor shall notify the Government.
2.6.2	Dissemination of Information	DoD policy limits the dissemination of certain information. Instructions, Directives, and References not releasable to the public, e.g., Floor Plans, Maps, Post Orders, and Standard Operating Procedures, will be made available after contract award to the successful offeror with appropriate credentials and a need to know.
2.6.3	Work Reception	The Contractor shall provide the capability to receive, prioritize, correspond, and respond to trouble/service calls and task orders during Government regular working hours and provide a point of contact at a local or toll free

0200000 - Management and Administration		
Spec Item	Title	Description
		number who can perform the above function during other than Government regular working hours.
2.6.4	Work Control	The Contractor shall implement all necessary work control procedures to ensure timely accomplishment of work requirements, as well as to permit tracking and reporting of work in progress. The Contractor shall plan and schedule work to assure material, labor, and equipment are available to complete work requirements within the specified time limits and in conformance with the quality standards established herein. Verbal scheduling and work status updates shall be provided when requested by the Government. A status update of any item of work must be provided within two hours of the inquiry during regular working hours, and by 0800 the following work day for inquiries after regular working hours. The Contractor shall provide work schedules for both Recurring and Non-Recurring Work per Deliverables. At a minimum, work schedules shall include: • Description of service(s) to be accomplished • Location • Date service(s) are scheduled to be accomplished
2.6.5	Work Schedule	The Contractor's work shall not interfere with normal Government business. In those cases where some interference is unavoidable, the Contractor shall minimize the impact and effects of the interference. The Contractor shall provide advance access of all of its work schedules to the Government. The Contractor shall provide written notification of any difficulty in scheduling work due to Government controls, per Deliverables. At a minimum, the notification shall include the following: • The date and time the work was initially coordinated. • The name and phone number of the Government person with whom the work was initially coordinated. • The name and phone number of the Government person who prevented the work from being performed as previously coordinated. • The alternative date and time, the Government person requested the work be accomplished.
2.6.6	Deliverables	The Contractor shall submit accurate and complete documents within the specified timeframes. The Contractor shall revise/modify deliverables, as directed by the KO, at no additional cost to the Government. Except where otherwise specified, all deliverables shall be submitted electronically in a Microsoft Office Version 2010 compatible format. Deliverables shall include the company name, contract number, contract title, date, and shall be unprotected and capable of being sorted by CLIN, work order number, asset number, section, annex/sub-annex, spec item and ELIN/Sub-ELIN or clause. All formulas shall be traceable. Government acceptance of deliverables shall not relieve the Contractor of the responsibility for any error or omission which may exist in the deliverable, as the Contractor is responsible for all requirements of this contract.
2.6.7	Service Interruptions	If any utilities or other services must be discontinued (even temporarily) due to scheduled contract work, the Contractor shall notify the KO, COR, affected tenants, and customers in accordance with local procedures. If the discontinued service is due to an emergency breakdown the Contractor shall notify the KO, COR, affected tenants, and customers as soon as practicable

0200000 - Management and Administration		
Spec Item	Title	Description
		and provide the status of repairs, as directed by the KO, until normal operation is restored. Scheduled utility outages and interruptions to equipment, system(s) operation, or other services shall be scheduled after hours of operation. The Contractor shall shutdown, restart, and perform operational checks on all equipment affected by both scheduled and unscheduled utility outages and service interruptions, at no additional cost to the Government.
2.6.8	NAVFAC Maximo	Work order, asset, specification, and condition assessment data created by the Contractor is recorded in NAVFAC Maximo for all work performed in 1501000 Facility Management, 1502000 Facility Investment, Annex 16 Utilities sub-annexes and Annex 1700000 BSVE. This spec item should be included in all FSC/BOS contracts above the SAP threshold at Navy PWDs per BMS B-24.8 Facility Support Contractor Data in NAVFAC MAXIMO. Consult with your local PWD FMD, UEM Director and BSVE Director or FEC FM&S PLC, UEM PLC, and BSVE PLC for further guidance. The information and format for data submission provided in Section J supports long-term asset management and facilitates transfer to NAVFAC Maximo. These requirements and data format are managed by the FM&S Product Line at the NAVFAC HQ level. NAVFAC Maximo is the Computerized Maintenance Management System (CMMS) used by the Government for work order history, asset management, and condition assessment. The Contractor shall provide all required data for NAVFAC MAXIMO as identified below: Informational Note: Not all supported commands' assets are included in NAVFAC Maximo. Not all of the modules available within the Maximo application are utilized by NAVFAC and the modules utilized may not be fully implemented. NAVFAC Maximo does not include a detailed inventory of all assets, components, and equipment that the Contractor is required to service under this contract and may include inaccuracies, omissions, and redundancies.
2.6.8.1	NAVFAC Maximo Data	Required data fields for work orders are indicated in the Service Provider Information provided in Attachment 0200000-06. Asset inventory data requirements are indicated in the Asset Information provided in Attachment 0200000-07, including additional data for Utilities assets listed in Specification Information in Attachment 0200000-08. Required data for documenting condition assessments is indicated in the Characteristic Meter Reading Information provided in Attachment 0200000-09. Specified data shall be provided for all work performed in 1502000 Facility Investment. Further instructional information detailing the process for submitting the specified information for NAVFAC Maximo Data Reporting is provided in Attachment 0200000-10. The Service Provider, Asset, Specification, and Characteristic Meter Reading Interfaces are used in multiple processes for loading data into Maximo by the Government and the format may be updated periodically. As part of the update the Contractor may be asked to modify the file to add/move columns in their submission. The Contractor shall provide up to 10

0200000 - Management and Administration		
Spec Item	Title	Description
		extra data elements or columns with as many as 150 characters per element for the Government to define during contract performance at no additional cost to the Government. The Government will provide the Contractor 60 calendar days' notice of modifications to the Service Provider, Asset, Specification, or Characteristic Meter Reading Interfaces file format.
2.6.8.2	NAVFAC Maximo Method of Data Entry	The Contractor shall submit asset and specification data in a spreadsheet flat-file following the NAVFAC Maximo Data Reporting process described in the Deliverables section. The Contractor shall submit asset and specification data in a Pipe Delimited Flat File following the NAVFAC MAXIMO Data Reporting process described in Attachment 0200000-06 through Attachment 0200000-10 per Deliverables section. In order to demonstrate the ability to properly format the pipe delimited flat file, the Contractor shall provide a Sample Pipe Delimited Flat file prior to contract performance per Deliverables section The format may be updated periodically. As part of the update the Contractor may be asked to modify the file to add/move columns in their submission. The Contractor also shall provide up to ten extra data elements or columns with as many as 150 characters per element for the Government to define during contract performance at no additional cost to the Government. The Government will provide the Contractor 60 calendar day notice of modifications to the Service Request, Asset, Specification, or Characteristic Meter Reading Interfaces file format.
2.6.8.3	NAVFAC Maximo Access	The process for obtaining access and establishing NAVFAC Maximo accounts are detailed in the NAVFAC Maximo System Access Procedures provided in Attachment 0200000-21. Once accounts have been established, NAVFAC Maximo can be accessed at https://maximo.navfac.navy.mil. The Contractor shall provide all necessary computer equipment and Internet Service Provider (ISP) accounts to access NAVFAC Maximo for Direct Entry of required data. A maximum of five NAVFAC Maximo accounts will be approved for the Contractor. Changes of personnel requiring NAVFAC Maximo accounts more than once per year may result in required compensation to the Government for the administrative costs in processing account requests.
2.6.8.4	NAVFAC Maximo Training	The Government will provide or make available initial training on NAVFAC Maximo to Contractor personnel responsible for direct entry of work order, asset, specification, and condition assessment data. Additional training will be provided by the Government when there are significant changes to the NAVFAC Maximo software or data entry requirements. Training due to changeover of personnel will be the responsibility for the Contractor. The Contractor will be provided a general user guide, local instructions, and other materials by the Government as reference material for the use of NAVFAC Maximo.
2.6.9	Quality Management System (QMS)	The Contractor shall establish and maintain a complete QMS program in accordance with the provisions specified herein. The Contractor's QMS program shall provide an effective and efficient means of identifying and

0200000 - Management and Administration		
Spec Item	Title	Description
		correcting problems throughout the entire scope of operations. The Contractor's QMS program shall address: • Accurate documentation of work processes, procedures, and output measures. • A systematic procedure for assessing compliance with performance objectives and standards. • Accurate documentation of quality inspections and surveillance conducted throughout the execution of work. • Assessment-driven corrective actions and process adjustments as appropriate in a timely manner.
2.6.9.1	Quality Management (QM) Plan	The Contractor shall develop and submit a QM Plan per Deliverables. The QM Plan shall describe the QMS methodology and approaches used under this contract. If any changes are made during the period of performance, the Contractor shall submit the revised QM Plan for acceptance, per Deliverables. The Contractor's QM Plan shall include, at a minimum, the following: • Policy and objectives of Quality Management System (QMS) • Quality organization ○ List of personnel ○ Responsibilities & lines of authority ○ Training and qualifications • Approach to assuring quality of services provided and conformance with performance objectives and standards • Methods and procedures for effective planning, operation and control of processes and performance of work • Procedures for inspection and surveillance of services to include all contractual requirements. ○ Scheduling and performance of inspection and surveillance ○ Measurement, data collection and analysis ○ Corrective action, preventive action, and continuous improvement ○ Oversight of subcontracted work • Documentation and records management • Communication with government (customers)
2.6.9.2	Quality Inspection and Surveillance	The Contractor shall establish and maintain an inspection and surveillance system in accordance with the FAR Clause 52.246-4, INSPECTION OF SERVICES – FIXED PRICE, to ensure that the work performed conforms to the contract requirements. The Contractor shall document and maintain a file of all scheduled and performed inspections and surveillances, inspection and surveillance results, and dates and details of corrective and preventive actions. The quality inspection and surveillance file shall be the property of the Government and made available during the Government's regular working hours. The file shall be submitted to the COR after completion/termination of the contract per Deliverables.
2.6.9.3	Quality Inspection and Surveillance Report	The Contractor shall submit a copy of the Contractor Quality Inspection and Surveillance Report per Deliverables. The Contractor Quality Inspection and Surveillance Report shall include a narrative of events, a tabulated summary and results of the quality inspection and surveillance events performed, inspection-driven corrective actions taken and the results attained, and management process adjustments during the previous month. The Government may adjust the frequency of the submittal based on the Contractor's quality of performance.

0200000 - Management and Administration		
Spec Item	Title	Description
2.6.10	Property Management Plan	Not Applicable
2.6.11	System and Equipment Replacement	The Contractor shall maintain the integrity and performance of existing energy saving, water conservation or other sustainability design features of systems and equipment in the performance of repair and replacement work. Except where otherwise specified, replacement components shall be of the same model/style or equivalent as the component being replaced. Substitutes for replacement components must be accepted by the KO prior to use. The KO will furnish available information for the existing systems and equipment.
2.7	Personnel Requirements	The Contractor shall comply with the personnel requirements stated below:
2.7.1	Key Personnel	The Contractor shall submit a List of Key Personnel and Qualifications per Deliverables. The Contractor shall provide any additional information requested by the KO or COR necessary to validate their qualifications. The Contractor shall submit an Organizational Chart per Deliverables showing lines of authority of the key personnel and on-site supervisor(s) for this contract. The chart shall include names of personnel and their position title in this contract. As a minimum, include the PM, Quality Manager, SSHO, and on-site supervisor(s) and who they will report directly to for this contract. The key personnel shall be revised as applicable for the contract. The Contractor shall provide complete resumes for proposed substitutes and any additional information requested by the KO. Proposed substitutes shall have comparable qualifications to those of the persons being replaced. The KO will notify the Contractor within 15 calendar days after receipt of all required information of the consent on substitutions. No change in fixed unit prices may occur as a result of key personnel substitutions.
2.7.1.1	Project Manager (PM)	The Contractor shall provide a PM and designated alternate, as applicable, who shall have full authority to act for the Contractor on all contract matters relating to this contract. The PM or alternate shall be centrally located on-site during the Government's regular working hours and shall be available on-site within one hour after the Government's regular working hours. The PM shall have at least three years of experience in managing a workforce providing services on contracts of similar size, scope and complexity.
2.7.1.2	Quality Manager	The Contractor shall provide a Quality Manager or designated alternate who shall be centrally located on-site at all times when the Contractor is performing work during the Government's regular working hours and shall be available on-site within two hours after the Government's regular working hours. The Quality Manager or designated alternate shall report directly to a senior corporate official and shall not report directly to the Project Manager. The Quality Manager or designated alternate shall have fulfilled the following pre-requisite training and experiences before being hired as the Quality Manager under this contract: The Quality Manager or designated alternate shall have at least three years of experience in preparing and enforcing QMS programs on contracts of similar size, scope and complexity. The Quality Manager or designated alternate may be the same person as the SSHO.
2.7.1.2.1	Quality Control Personnel	The Contractor shall provide Quality Control personnel whose primary duty and responsibility is to enforce the Contractor's Quality Management System

0200000 - Management and Administration		
Spec Item	Title	Description
		on this contract. The Quality Control personnel shall be on-site at all times when the Contractor is performing work during the Government's regular working hours. The Quality Control personnel shall report directly to the Quality Manager and shall not report directly to the Project Manager. Quality Control personnel shall have fulfilled the following pre-requisite training and experiences before being hired as Quality Control under this contract: Quality Control personnel shall meet or exceed the qualifications, technical knowledge and experience requirements specified for the personnel performing the work, which they will be inspecting, and have at least three years of experience in enforcing QMS programs on contracts of similar size, scope and complexity.
2.7.1.3	Site Safety and Health Officer (SSHO)	The Contractor shall provide a Level 1 SSHO whose primary duty and responsibility is to prepare and enforce the Contractor's safety program on this contract. The Level 1 SSHO shall ensure the requirements of EM 385-1-1 and 29 CFR 1926.16 are met for the project. The Level 1 SSHO or an equally qualified Designated Representative/alternate shall be on-site at all times when work is being performed to implement and administer the Contractor's safety program and government-accepted Accident Prevention Plan. The Level 1 SSHO shall have fulfilled the pre-requisite qualification, training, continuous learning, and experiences describe in the EM 385-1-1 before being hired as the Level 1 SSHO under this contract. The Level 1 SSHO shall not be the same person as the Project Manager, Quality Control Manager, or any other position other than the Level 1 SSHO.
2.7.1.4	Environmental/Energy Manager	The Contractor shall provide an Environmental/Energy Manager whose primary duty and responsibility is to ensure Contractor operations adhere to the goals and policies of the Environmental Management System, the Installation Energy Plan, and other specified Sustainability requirements affecting this contract. The Environmental/Energy Manager shall develop, implement and monitor environmental strategies, policies and programs that promote sustainable development and examine the contract activities to establish where improvements can be made and ensure compliance with environmental legislation and energy policy. The Environmental/Energy Manager shall have a minimum two years' experience with environmental procedures similar to those of this contract; familiarity with Environmental Management Systems (EMSs); and knowledge of environmental regulations and federal energy laws and policy (including energy and water reduction requirements and renewable energy requirements) that are applicable to operations similar to those of this contract.
2.7.1.5	Certified Industrial Hygienist	In accordance with Deliverables, provide proof that the Contractor's designated industrial hygienist is registered as a Certified Industrial Hygienist (CIH) and is in good standings with the certifying organization, American Board of Industrial Hygiene (ABIH). See Attachment 0200000-19, entitled "SAFETY AND OCCUPATIONAL HEALTH REQUIREMENTS" paragraph 1.6.1.2 "Certified Industrial Hygienist (CIH)" for additional requirements. Hazardous material plans specified are prepared and overseen by the CIH. This includes training and documenting the Competent Person to be supervising the jobsite.
2.7.1.6	Certified Pool Operator (CPO) –	Within 15 calendar days after award of the contract, the Contractor shall submit to the KO Certified Pool Operator certifications. All individuals

0200000 - Management and Administration		
Spec Item	Title	Description
	National Spa Pool Foundation (NSPF) or Other Industry Recognized Equivalent	signing the Service Logbooks, as the person performing the tasks shall be certified by the NSPF as a Certified Pool Operator. Upon the KO's discretion and acceptance, other industry recognized equivalent certifications may be accepted in place of the "CPO" certification (e.g. National Spa and Pool Institute - Certified Service Professional (CSP)). All supervisors or any other persons overseeing the performance of pool service work, including Contractor personnel overseeing the performance of electrical or mechanical repair work, shall be certified as stated above. Upon KO's request, the Contractor shall provide additional information on training courses taken, to prove authenticity and legitimacy of the certificate. The Government will have final acceptance of any certification per Deliverables.
2.7.2	Employee Requirements	The Contractor shall provide experienced, qualified, and capable personnel to perform the work in this contract. Personnel shall be fully knowledgeable of all safety, environmental, and energy requirements associated with the work they perform. Personnel shall speak, read, and comprehend English to the extent that they can perform the contract requirements and comply with installation emergency procedures.
2.7.2.1	Employee Certification and Training	The Contractor shall maintain personnel certification, training, and licensing records for employee requirements specified herein and within all technical annexes/sub-annexes. Certification, training, and licensing records shall be kept current and on file for the duration of the contract including all option periods. Records shall be made available for Government review within 4 hours of request.
2.7.2.1.1	Employee Qualification for Work Requiring Neutralization & Repair of GSA Approved Containers	In accordance with Deliverables and within 15 calendar days after award, the Contractor shall deliver to the KO and COR certification of employee(s) that will perform work on GSA approved containers. The Contractor employee performing work requiring neutralization and repair of General Services Administration (GSA) approved containers shall have successfully completed training and received the respective certification of completion. Acceptable training courses may be either Government or commercially provided (Contractors may refer to the Department of Defense – Lock Program website for available training courses.) https://www.navfac.navy.mil/navfac_worldwide/specialty_centers/exwc/products_and_services/capital_improvements/dod_lock.html The course curriculum shall have included extensive training in the requirements of Federal Standard 809 (FED-STD-809), entitled "INSPECTION, MAINTENANCE, NEUTRALIZATION AND REPAIR OF GSA APPROVED CONTAINERS AND VAULT DOORS."
2.7.2.2	Employee Appearance	The Contractor shall ensure that all employees present a professional appearance that is appropriate for their position. The KO reserves the right to determine the acceptability of any clothing worn. All Contractor/subcontractor employees working under this contract shall be identified by a distinctive nameplate, emblem, or patch attached in a prominent place on an outer garment. Employee identification shall not be substituted for station required passes or badges.
2.7.2.3	Employee Conduct	Contractor employees shall conduct themselves in a proper, efficient, courteous and businesslike manner.
2.7.2.4	Identification as Contractor Employee	Contractor employees shall identify themselves as Contractor personnel by introducing themselves or being introduced as Contractor personnel and displaying distinguishing badges or other visible identification for meetings

0200000 - Management and Administration		
Spec Item	Title	Description
		with Government personnel. All Contractor employees shall appropriately identify themselves as contractor employees in both verbal communication and electronic or written correspondence.
2.7.2.5	Removal of Employees	The Contractor shall remove from the site any individual whose continued employment is deemed by the KO to be contrary to the public interest or inconsistent with the best interests of National Security.
2.7.2.6	Proof of Legal Residency	No employee or representative of the Contractor will be admitted to the site of work unless satisfactory Proof of Legal Residency is submitted per Deliverables. High Altitude Electromagnetic Pulse (HEMP) hardened shelters: U.S. citizenship and Secret security clearance are required for access to work areas.
2.7.3	Service Contract Reporting (SCR)	The Contractor shall report total dollar amount invoiced and all contractor labor hours (including subcontractor labor hours) required for performance of services provided under this contract via a secure data collection site. The contractor is required to completely fill in all required data fields using the following web address: https://www.sam.gov . Per Deliverables, reporting inputs will be for the labor executed during the period of performance during each Government fiscal year (FY), which runs October 1 through September 30. While inputs may be reported any time during the FY, all data shall be reported no later than October 31 of each calendar year. Contractors may direct questions to the help desk, linked at https://www.sam.gov .
2.8	Security Requirements	The Contractor shall comply with all Federal, state, and local security statutes, regulations, and requirements. The Contractor shall become acquainted with and comply with all Government regulations as posted, or as requested by the KO when required to enter a Government site. The Contractor shall ensure that all security/entrance clearances are obtained. The Contractor shall ensure that Contractor personnel do not present a risk to security. By entering the installation, Contractor personnel are subject to installation, state, local and federal regulations and laws, including but not limited to debarment and criminal prosecution.
2.8.1	Employee Listing	The Contractor shall maintain a current Employee List and submit per Deliverables. The list shall include employee's name, supervisor, company, and level of security clearance.
2.8.2	Vehicles	The company name shall be displayed on each of the Contractor's vehicles in a manner and size that is clearly visible. All vehicles shall display a valid state license plate that complies with State Vehicle Code. Vehicles shall meet all other requirement of the State Vehicle Code, such as safety standards, and shall carry proof of insurance and state registration, if applicable.
2.8.3	Passes and Badges	All Contractor employees shall obtain the required employee and vehicle passes. The Contractor employees must be able to obtain Common Access Cards (CAC) in accordance with security requirements. Each employee shall wear the Government issued badge over the front of the outer clothing. When an employee leaves the Contractor's service, the employee's Passes and Badges shall be confiscated by the Contractor immediately and returned within 10 calendar days.
2.8.4	Access to Installation	All Contractor personnel shall obtain access to the installation through enrollment and registration into the Defense Biometric Identification System (DBIDS).

0200000 - Management and Administration		
Spec Item	Title	Description
		The Contractor shall provide the KO with the name of their designated Service Contractor Administrator (SCA) for enrollment in DBIDS. Once enrolled, the Contractor must provide the DBIDS Registrar with an approved employee list and then direct their employees to register into DBIDS.
2.8.4.1	DBIDS Program	DBIDS is an enterprise identity management and perimeter installation access control solution in which Contractor personnel who enroll, and are approved, are subsequently granted access to the installation for a period up to three years, or the length of the contract, whichever is less, and are not required to obtain a new pass from the Base Pass and Identification Office for each visit. There are no fees associated with obtaining a DBIDS credential. The Government performs background screening and credentialing. Throughout the year, the Contractor employee must continue to meet background screening standards. Periodic background screenings are conducted to verify continued DBIDS participation and installation access privileges. DBIDS access privileges will be immediately suspended or revoked if at any time a Contractor employee becomes ineligible.
2.8.4.2	DBIDS Credentials	Contractor employees shall furnish a completed copy of the SECNAV 5512/1 form to obtain the required background check and visit the local Navy Installation Visitor Control Center to obtain a DBIDS credential once approved. The SECNAV 5512/1 form and additional information about DBIDS can be found at: https://www.cnic.navy.mil/om/dbids.html. The Contractor may initiate the adjudication process when a background screen failure results in disqualification from participation in DBIDS and the Contractor employees do not agree with the reason for disqualification. The Contractor may also apply for a waiver when a background screening failure results in disqualification from participation in DBIDS. The Commanding Officer will be the final waiver determination authority. The Contractor shall immediately collect employee DBIDS credentials and notify the KO in writing: (1) That an employee has departed the company without having properly returned or surrendered their DBIDS credentials. (2) That there is a reasonable basis to conclude that an employee, or former employee, might pose a risk, compromise, or threat to the safety or security of the installation or anyone therein.
2.8.4.3	DBIDS Paper Passes	In the event that a visitor, vendor, or Contractor employee elects not to participate in DBIDS, the individual will be issued DBIDS paper pass from the Base Pass and Identification Office in order to access to the installation. The time standard for the validity of a pass to access an installation will be not more than thirty (30) days and may be further restricted based on Local policy or by Federal, DoD, Navy, and CNIC guidance. The Government will not be responsible for any cost or lost time associated with obtaining paper passes or added vetting or inspections incurred by nonparticipants in the DBIDS credentialing process.
2.8.5	Access to Buildings	The Contractor shall monitor and control access into restricted areas under their responsibility, allowing only those individuals who have been properly cleared into restricted areas or other controlled access areas. The Contractor shall comply with security requirements, plus those imposed by the installation Commander at all times. Personnel with access to restricted areas shall have the appropriate screening, and shall wear special badges

0200000 - Management and Administration		
Spec Item	Title	Description
		authorizing access for those areas. Contractor personnel shall not enter restricted or controlled areas or installation facilities unless specifically authorized in performance of their duties. The Contractor shall secure all buildings and facilities entered during non-duty hours and will secure all building and facilities under the Contractor's cognizance at the end of each work day or shift period.
2.8.6	Access Arrangements	The Contractor shall make all arrangements through the appropriate office necessary to obtain access to buildings, facilities and other work areas, and when necessary, arrange for them to be opened and closed by the controlling authority. The Government may issue keys to the Contractor. The Contractor shall use due diligence and be responsible for compromised security systems to include replacement costs that result from its action or inaction.
2.8.6.1	Escort Arrangement for Secured Areas	The Contractor shall make arrangements for Government escort into secured areas requiring escort. The KO will provide information on applicable buildings, spaces and the appropriate point of contact. The Contractor may experience delays while waiting for escorts. The Government estimates the wait period can be up to 15 minutes. The Contractor shall notify the Government Performance Assessment Representative (PAR) and appropriate point of contract if an escort is not available after 15 minutes and access to accomplish the work is denied. Unscheduled requirements may require a longer wait for an escort.
2.8.7	Security Clearances	The Contractor shall obtain all required corporate and personnel Security Clearances, prior to commencement of work, at no additional cost to the Government. The Contractor shall ensure that a list of all personnel with Security Clearances is maintained current, including clearances that are pending. HEMP: U.Ss citizenship and Secret security clearance are required for access to the work area. Escorts are not provided. Refer to Attachment 0200000-20. PHNSY: See Attachment 0200000-20, "Security Requirements Applicable for Pearl Harbor Naval Shipyard & IMF's Controlled Industrial Area, Other Sensitive Areas, Controlled Nuclear Information Areas, and/or Nuclear Work Areas" for security clearance requirements for the Pearl Harbor Naval Shipyard.
2.8.8	Access to Controlled Unclassified Information	The Contractor personnel whose work involves access to controlled unclassified information shall undergo a Tier 3 Investigation to verify their trustworthiness. If the Contractor personnel currently have a favorably adjudicated Tier 3 Investigation the Contractor shall notify the Government Command Security Manager who will validate this in the Joint Personnel Adjudication System (JPAS). The Contractor shall request from the Government for access to the E-QIP Direct program for the Contractor employees to complete the SF-86 form on line for a Tier 3 Investigation. The Security Manager will determine suitability. Upon a favorable Tier 3 Investigation, the Contractor personnel shall submit the original signed release statements, and an OF-306 Declaration for Federal Employment to the Security Manager per Deliverables. Upon submission of the necessary documentation through eQIP, the Contractor Employee shall provide digital fingerprints. The Contractor's Security POC shall notify the COR and the Security Manager when Contractor Employees have submitted their fingerprints.

0200000 - Management and Administration		
Spec Item	Title	Description
		The request shall be renewed annually or for the duration of the contract if less than one year.
2.8.9	Access to Government Information Technology (IT), Operation Technology (OT), and Facility Related Control Systems (FRCS)	Personnel accessing Government IT and OT systems to include but not limited to Maximo, DMLSS, DDC, and SCADA are in positions considered Non-Critical Sensitive/IT-II and require a Tier 3 investigation to verify their trustworthiness. Prior to being granted access to Government IT, OT, and FRCS systems, personnel shall have a favorably adjudicated Tier 3 Investigation, obtain a CAC in accordance with security requirements, successfully complete required training, submit a Systems Authorization Access Request (SAAR) Form, and meet all eligibility requirements. Personnel accessing Government IT, OT, and FRCS systems shall complete annual required training such as cyber assurance awareness, information security (INFOSEC) awareness, and operations security (OPSEC) awareness. The Contractor shall submit a list of personnel requiring access to Government IT, OY, and FRCS systems per Deliverables.
2.8.10	Access to Navy Marine Corps Intranet (NMCI)	The Contractor may be required to access Navy Marine Corps Intranet (NMCI). Prior to being granted access to NMCI, Contractor employees shall obtain a CAC in accordance with security requirements, successfully complete required training, submit a Systems Authorization Access Request (SAAR) Form, and meet all eligibility requirements.
2.8.11	Employee Status	The Contractor shall notify the KO of any changes to any employee's status to include, but not limited to, termination, convictions/arrests, adverse actions taken on the job for any reason or any other documented misbehavior that may affect, or have the potential to affect, security standing in terms of access to federal facilities or IT systems.
2.9	Contractor Safety Program	The Contractor shall develop and implement a Safety Program detailing how the Contractor plans, staffs, performs, and controls all safety practices while delivering best value services to the Government without any accidents or mishaps. The Contractor's safety program shall comply with all safety standards identified in the U.S. Army Corps of Engineers Safety and Health Requirements Manual, EM 385-1-1, UFC 3-560-01 Operation and Maintenance Electrical Safety, and Public Law 91-596, Occupational Safety and Health Act. Any reference to "USACE" facilities, property, or equipment specified in EM 385-1-1 should be interpreted as Government facilities, property, and equipment.
2.9.1	Contractor Safety Requirements	Neither Contractor nor any subcontractor may enter into contract with any subcontractor that fails to meet the below requirements. The term subcontractor in this and the following paragraphs means any entity holding a contract with the Contractor or with a subcontractor at any tier.
2.9.1.1	Experience Modification Rate (EMR)	Subcontractors on this contract must have an effective EMR less than or equal to 1.10, as computed by the National Council on Compensation Insurance (NCCI) or if not available, as computed by the state agency's rating bureau in the state where the subcontractor is registered, when entering into a subcontract agreement with the Prime Contractor or a subcontractor at any tier.

0200000 - Management and Administration		
Spec Item	Title	Description
		The Prime Contractor may submit a written request for additional consideration to the Contracting Officer where the specified acceptable EMR range cannot be achieved. Relaxation of the EMR range will only be considered for approval on a case-by-case basis for special conditions and must not be anticipated as tacit approval. Contractor's Site Safety and Health Officer (SSHO) must collect and maintain the certified EMR ratings for all subcontractors on the project and make them available to the Government at the Government's request.
2.9.1.2	OSHA Days Away From Work, Restricted Duty, or Job Transfer (DART) Rate	Subcontractors on this contract must have a DART rate, calculated from the most recent, complete calendar year, less than or equal to 3.4 when entering into a subcontract agreement with the Prime Contractor or a subcontractor at any tier. The Prime Contractor may submit a written request for additional consideration to the Contracting Officer where the specified acceptable OSHA Dart rate range cannot be achieved for a particular subcontractor. Relaxation of the OSHA DART rate range will only be considered for approval on a case-by-case basis for special conditions and must not be anticipated as tacit approval. Contractor's Site Safety and Health Officer (SSHO) must collect and maintain self-certified OSHA DART rates for all subcontractors on the project and make them available to the Government at the Government's request.
2.9.2	Accident Prevention Plan (APP)	The Contractor shall develop and implement a site Accident Prevention Plan (APP). The APP shall be prepared by the Contractor's SSHO and shall be followed by all Contractor employees, subcontractors, and vendors at each service site. The APP shall follow the format and include all elements addressed in Appendix A of EM 385-1-1. The APP shall incorporate Activity Hazard Analyses (AHAs) and compliance plans addressing all applicable Safety and Occupational Health (SOH) risks that are relevant to the site specific hazards and controls for each activity and type of work that may be encountered in the performance of this contract. The Contractor shall submit an APP for acceptance per Deliverables. The Contractor shall review, update, and submit revisions to the APP whenever a change in work conditions, hazards, or activities occur. Submittal of the APP shall include Activity Hazard Analyses (AHAs) and applicable compliance plans, programs, and procedures as specified below. The Contractor shall not commence work until the APP has been accepted and no activity shall be started on site until the applicable AHAs and compliance plans have been accepted. Once accepted by the Contracting Officer, the APP and attachments will be enforced as part of the contract. Disregarding the provisions of this contract or the accepted APP will be cause for stopping of work, at the discretion of the Contracting Officer, until the matter has been rectified.
2.9.3	Activity Hazard Analysis (AHA)	The Contractor shall prepare Activity Hazard Analyses (AHAs) for all applicable common recurring work activities performed under this contract. AHAs for recurring work shall be submitted with the APP and shall be updated as work activities or conditions change and additional AHAs prepared as new work activities are required. AHAs for non-recurring and

0200000 - Management and Administration		
Spec Item	Title	Description
		one-time (e.g., non-recurring work task orders) work occurrences shall be submitted at least two working days prior to start of work. Specifically: - For contract modifications to recurring work requirements where changes are germane to the original contract, the Contractor shall revise applicable AHAs within 15 calendar days after modification is signed. - For contracts with non-recurring work ELINs, the Contractor shall submit an AHA on non-recurring work task orders, with the associated proposal, whenever the service environment or required task is different from the recurring work priced services. The Contractor shall follow the Risk Management Process for the development of Activity Hazard Analysis (AHA) in accordance with paragraph 01.A.14 and Appendix A of EM 385-1-1. A formatted outline of an AHA is provided in Figure 1-2 of EM 385-1-1. During performance of services, the SSHO shall periodically review the AHA at each service site and for each sub-annex to assess the effectiveness of the Contractor's overall APP. If changes to the AHAs are required, such changes shall be submitted to the KO for review and acceptance.
2.9.4	Safety and Occupational Health (SOH) Risks and Compliance Plans	Based on a risk assessment of recurring and non-recurring work requirements and on mandatory OSHA compliance programs, the Contractor shall develop, provide and implement all applicable compliance plans, as necessary for the situation or types of work to be performed under this contract. Compliance plans, programs, and procedures along with their respective references are detailed in Appendix A, paragraph 3.i of EM 385-1-1. These plans shall be submitted with the APP and shall be updated as situations change. Additional compliance plans, programs, and procedures shall be developed as applicable when new types of work are required under this contract. Additional requirements for specific compliance plans are provided below.
2.9.4.1	Alcohol and Drug Abuse Prevention Plan	The Contractor shall develop an alcohol and drug abuse prevention plan to explain how it will satisfy the drug-free work force requirement as stated in DFARS Clause 252.223-7004 and include elements addressed in paragraph 01.C.02 of EM 385-1-1.
2.9.4.2	Chemical Hazard Communication Program	The Contractor shall develop a project-specific chemical hazard communication program to include elements addressed in paragraph 06.B.01 of EM 385-1-1 and applicable OSHA requirements in 29 Code of Federal Regulations (CFR) 1910.120 and 29 CFR 1926.59.
2.9.4.3	Confined Space Program	The Contractor shall develop an activity/site-specific confined space program to include elements addressed in paragraph 34.A of EM 385-1-1 and comply with relevant requirements in 29 CFR 1910, 29 CFR 1915, and 29 CFR 1926, OSHA Directive CPL 2.100 and any other Federal, state and local regulatory standards.
2.9.4.4	Critical Lift Plan	The Contractor shall develop a critical lift plan to explain how it will conduct lifts for any of the following conditions: - Lifts over 75 percent of the capacity of the crane or hoist (or lifts over 50 percent of the capacity of a barge mounted mobile crane's hoists) at any radius of lift; - Lifts involving more than one crane, hoist, or LHE

0200000 - Management and Administration		
Spec Item	Title	Description
		3) Lifts of personnel; 4) Lifts involving non-routine rigging or operation, sensitive equipment, or unusual safety risks 5) Lifts involving hazardous materials (e.g., explosives, highly volatile substances); 6) Lifts where the center of gravity could change; 7) Lifts without the use of outriggers using rubber tire load charts; 8) Lifts using more than one hoist on the same crane, hoist, or LHE; 9) Lifts involving Multiple Lift Rigging (MLR) Assemblies or other non-routine or technically difficult rigging arrangements; 10) Lifts involving submerged loads. Exception: lifts that were engineered to travel in guided slots throughout the lift and have fixed rigging and/or lifting beams, i.e., intake gates, tailgates/logs); 11) Lifts out of the operator's view. (Exception: if hand signals used by a signal person in view of the operator or radio communications are available and in use, load does not exceed two tons AND is determined a routine lift by the lift super.) The critical lift plan shall include elements addressed in paragraph 16.H of EM 385-1-1, paragraph 1.7.2 of NAVFAC P-307, and comply with requirements in ASME B30.22, ASME B30.3; ASME B30.5, and ASME B30.8. The Contractor shall complete and maintain a copy of the Crane Operating Checklist For Critical Lifts, provided within the Forms in Attachment 0200000-05, for each lift.
2.9.4.5	Fall Prevention and Protection Plan	The Contractor shall develop a site specific fall prevention and protection plan to protect and prevent its service workers from falling from heights of 1.8m (6 feet) or more. This plan shall include elements addressed in paragraph 21.D of EM 385-1-1 and ANSI A10.32, ANSI Z359.1, and ANSI/ASSE A10.34. The fall prevention and protection plan shall include a Rescue and Evacuation Plan in accordance with EM 385-1-1, Section 21.N. A competent person for fall protection shall prepare and sign the plan.
2.9.4.6	Pathogen Exposure	The Contractor shall comply with 29 CFR-1910.1030 at all times if personnel are performing work where they may be exposed to blood or other potentially infectious materials. The Contractor shall develop an Exposure Control Plan. This plan shall comply with 29 CFR-1910.1030, be reviewed annually to ensure compliance, and be accessible to employees. Employees required to access areas subject to higher exposure risk (such as hospitals, clinics, and laboratories) shall submit to all required testing and receive vaccinations as required by the installation.
2.9.4.7	Control of Hazardous Energy (lockout/tagout)	The Contractor shall establish a program and utilize procedures for affixing appropriate lockout devices or tagout devices to energy isolating devices, and to otherwise disable machines or equipment to prevent unexpected energization, start up or release of stored energy to ensure compliance with 29 CFR 1910.147. The Contractor shall submit a report of their periodic inspection of the energy control procedure that ensures the procedures and the requirements of 29 CFR 1910.147 are being followed per Deliverables.
2.9.5	Crane Operations	All operations of Cranes, Multi-Purpose Machines and Material Handling Equipment shall comply with EM 385-1-1, NAVFAC P-307, 29 CFR Part 1910, and 29 CFR Part 1926.

0200000 - Management and Administration		
Spec Item	Title	Description
		The Contractor shall comply with paragraph 1.7.2 of NAVFAC P-307 and notify the Contracting Officer at least 24 hours prior to bringing any crane (including delivery vehicles with crane boom attachments), multi-purpose machines, material handling equipment, or construction equipment that may be used in a crane-like application to lift suspended loads on board a Navy Installation. Written documentation of the last weight test of the crane and all related weight handling equipment (e.g. attachments, rigging gear, etc.) shall be maintained on site. A joint verification with the Government representative must be performed to ensure that a legible and indelible completed copy of Appendix P, Figure P-1 of NAVFAC P-307 is maintained on the crane, multi-purpose machine, and material handling equipment or construction equipment used in a crane-like application to lift suspended loads. The following certification and testing documentation shall be on site prior to entry and use on any Navy Installation: 1) Crane, multi-purpose machine, material handling equipment or construction equipment used in a crane-like application to lift suspended load certification 2) Load testing 3) Yearly, monthly and daily inspection logs 4) Rope/sling certifications 5) Operator certifications/designations 6) Designation of person performing log inspections 7) Cranes that are permanently located on a Navy Installation shall have a quarterly joint verification.
2.9.5.1	Crane Inspections	The Contractor shall ensure all inspections are performed in accordance with EM 385-1-1, NAVFAC P-307, 29 CFR Part 1910, and 29 CFR Part 1926 (daily, monthly, quarterly, yearly), and retain the current documentation of inspections. Documents shall be kept on site. Daily pre-use inspections and testing shall be performed on all load hoisting and lowering mechanisms, boom hoisting and lowering mechanisms, swinging mechanisms, travel mechanisms (if to be used that day), and safety devices. Cranes that have to be re-rated shall be in accordance with SAE Recommended Practices, Crane Load Stability Test Code J765 and documentation maintained on site. The Contractor shall have an operational anti-two block device or a two-block damage prevention feature for all points of two blocking and a boom hoist disconnect, shutoff, or hydraulic relief to automatically stop the boom hoist when the boom reaches a predetermined high angle.
2.9.5.2	Rigging Gear	The Contractor shall ensure rigging gear and below the hook lifting devices and personnel comply with the following requirements: 1) Personnel performing rigging shall have an understanding of all signs, notices, and operating instructions, and be familiar with the applicable hand signals prescribed by the ASME B30 standard for the type of crane in use. 2) Personnel performing rigging shall be familiar with the rigging requirements in EM 385-1-1, NAVFAC P-307, 29 CFR Part 1910, and 29 CFR Part 1926. 3) The Contractor shall inspect rigging gear in accordance with EM 385-1-1, NAVFAC P-307, 29 CFR Part 1910, and 29 CFR Part 1926 and paragraph 1.7.2 of NAVFAC P-307. Certification records shall be made available for review upon request.

0200000 - Management and Administration		
Spec Item	Title	Description
2.9.5.3	Crane Operators	Crane operators shall meet the personnel qualifications requirements in paragraph 16.B of EM 385-1-1 and paragraph 1.7.2 of NAVFAC P-307. For mobile cranes with Original Equipment Manufacturer (OEM) rated capacities of 2,000 pounds or greater, designate crane operators as qualified by a source that qualifies crane operators (i.e., union, a government agency, or an organization that tests and qualifies crane operators).
2.9.6	Accident and Damage Reporting	The Contractor shall notify the Contracting Officer as soon as practical, but no more than four hours after any accident meeting the definition of Recordable Injuries or Illnesses or High Visibility Accidents, property damage equal to or greater than \$2,000, or any Weight Handling Equipment (WHE) accident. Notification shall also be provided for any mishap occurring in any of the following high hazard areas: electrical (to include Arc Flash, electrical shock, etc.); uncontrolled release of hazardous energy (includes electrical and non-electrical); weight or load handling equipment (LHE) or rigging; fall-from-height (any level other than same surface); and underwater diving. These mishaps shall be investigated in depth to identify all causes and to recommend hazard control measures. Within notification include Contractor name; contract title; type of contract; name of activity, installation or location where accident occurred; date and time of accident; names of personnel injured; extent of property damage, if any; extent of injury, if known, and brief description of accident (to include type of equipment used, PPE used, etc.). Preserve the conditions and evidence on the accident site until the Government investigation team arrives on-site and Government investigation is conducted. The Contractor shall conduct an accident investigation for recordable injuries and illnesses, for accidents requiring Medical Treatment, property damage accidents resulting in at least \$20,000 in damages, and near misses as defined in EM 385-1-1, to establish the root cause(s) of the accident. The Contractor shall complete the applicable NAVFAC Contractor Incident Reporting System (CIRS), and electronically submit via the NAVFAC Enterprise Safety Applications Management System (ESAMS) per Deliverables. Required or special forms are provided within the Forms in Attachment 0200000-05. For any weight handling equipment accident (including rigging gear accidents) the Contractor shall conduct an accident investigation to establish the root cause(s) of the accident and comply with additional requirements and procedures for accidents in accordance with NAVFAC P-307, Section 12. The Contractor shall submit a WHE Accident Report (Crane and Rigging Gear) per Deliverables. No crane operations are allowed to proceed until cause is determined and corrective actions have been implemented to the satisfaction of the Contracting Officer. For a near miss, the Contractor shall complete the applicable documentation in NAVFAC Contractor Incident Reporting System (CIRS), and electronically submit via the NAVFAC Enterprise Safety Applications Management System (ESAMS) per Deliverables. For a near miss involving crane or rigging operations, the Contractor shall report verbally to the Contracting Officer as soon as management becomes aware but not later than 4 hours of such event and comply with additional requirements and procedures for near-misses in accordance with NAVFAC P-307, Section 12. A near miss occurs when an accident was avoided by mere

0200000 - Management and Administration		
Spec Item	Title	Description
		chance or when intervention prevented an ongoing sequence of events that would have resulted in an accident (e.g. unplanned encroachment, improper crane set-up, improperly rigged load, etc.). The Contractor shall submit a <u>Crane and Rigging Gear Near Miss Report per Deliverables</u> .
2.9.6.1	Accident Reporting and Notification Criteria	The following criteria and definitions apply to the accident reporting requirements specified above: Recordable Injuries or Illnesses. Any work-related injury or illness that results in: 1) Death, regardless of the time between the injury and death, or the length of the illness; 2) Days away from work (any time lost after day of injury/illness onset); 3) Restricted work; 4) Transfer to another job; 5) Medical treatment beyond first aid; 6) Loss of consciousness; or 7) A significant injury or illness diagnosed by a physician or other licensed health care professional, even if it did not result in (1) through (6) above. High Visibility Accident. Any mishap which may generate publicity or high visibility. Medical Treatment. Treatment administered by a physician or by registered professional personnel under the standing orders of a physician. Medical treatment does not include first aid treatment even through provided by a physician or registered personnel. WHE Accident. A WHE accident occurs when any one or more of the eight elements in the operating envelope fails to perform correctly during operation, including operation during maintenance or testing resulting in personnel injury or death; material or equipment damage; dropped load; derailment; two-blocking; overload; or collision, including unplanned contact between the load, crane, or other objects. A dropped load, derailment, two-blocking, overload and collision are considered accidents even though no material damage or injury occurs. A component failure (e.g., motor burnout, gear tooth failure, bearing failure) is not considered an accident solely due to material or equipment damage unless the component failure results in damage to other components (e.g., dropped boom, dropped load, roll over, etc.)
2.9.7	Fire Protection	The Contractor shall know where fire alarms are located and how to activate them. The Contractor shall handle and store all combustible supplies, materials, waste and trash in a manner that prevents fire or hazards to persons, facilities, and materials.
2.9.8	Monthly On-Site Labor Report	The Contractor shall submit a Monthly On-Site Labor Report per Deliverables. This report is a compilation of employee-hours worked each month for all site workers, both prime and subcontractor. Monthly On-Site Labor Report shall be provided unprotected and capable of being sorted to the ELIN/Sub-ELIN level.
2.9.9	OSHA Citations and Violations	The Contractor shall correct violations and citations promptly and submit a copy of each OSHA citation and OSHA report with written OSHA Citations and Violations Corrective Action Report per Deliverables.

0200000 - Management and Administration		
Spec Item	Title	Description
2.9.10	Safety Inspections and Monitoring	The Contractor shall conduct inspections of its work areas, job sites, and work crews every day work is being performed to ensure that all Contractor operations are being conducted safely. These inspections shall ensure: • The site is safe and free of job-site hazards • Proper PPE is being utilized and worn. • Safe work practices and processes are being followed. • Workers are familiar with the hazards covered in the respective AHA for that work activity. • All equipment and tools are in good condition and being used safely. The Government reserves the right to inspect and monitor Contractor operations for safety compliance. In general, the Government approach will be to conduct Performance Assessment on the quality and effectiveness of the Contractor's safety program. The Government reserves the right to stop any work activity when it deems danger is imminent. Contractor personnel shall work in a safe manner and comply with all applicable safety regulations. The Contractor shall be subject to safety inspections of its work sites by the Government. Contractor safety records shall be available to the KO upon request. Whenever the KO becomes aware of any safety noncompliance or any condition which poses a serious or imminent danger or hazard to the health or safety of the public or Government Personnel, the KO will notify the Contractor orally, with written confirmation, and request immediate corrective action. This notice, when delivered to the Contractor's representative or SSHO, shall be deemed sufficient notice of noncompliance and that corrective action is required. After receiving this notice, the Contractor shall immediately take corrective action. If the Contractor fails, delays, or refuses to promptly take corrective action, the KO may issue a stop work order for all or part of the services or work until satisfactory corrective action has been taken. Whenever such a stop work order has been issued, the Contractor shall waive all equitable adjustments to the contract related to the stop work ordered issued. The Contractor shall include this requirement in all of its subcontracts and vendor contracts in support of contract safety. The Contractor shall submit a copy of the Contractor Safety Inspection and Monitoring Report per Deliverables. The Contractor Safety Inspection and Monitoring Report shall include a narrative of significant events; a tabulated summary and results of the safety inspection and monitoring events performed; inspection-driven corrective actions taken and the results attained; and management process adjustments during the previous month.
2.9.11	Safety Certification	The Contractor shall submit copies of all the required Federal, state, county, city and industry Safety Certifications for work performed under this contract per Deliverables. These certifications shall be kept up to date by the Contractor. The Contractor shall submit new versions of certifications as the old certifications expire. No work, that requires a certification, shall start without a valid and approved certification.
2.9.12	Safety Apparel on Jobsites	The Contractor personnel shall wear appropriate high-visibility safety apparel meeting ANSI/ISEA 107-2010 and DOT regulations for traffic control. Appropriate garment shall be based on the worker hazards and tasks, complexity of the work environment or background, and vehicular traffic and

0200000 - Management and Administration		
Spec Item	Title	Description
		speed. As a minimum, the Contractor personnel shall wear ANSI/ISEA 107-2010 Class I compliant apparel.
2.9.13	Emergency Medical Treatment	Contractors will arrange for their own emergency medical treatment. The Government has no responsibility to provide emergency medical treatment.
2.9.14	Excavations	Soil classification must be performed by a competent person in accordance with 29 CFR 1926 and EM 385-1-1. The Contractor shall provide a third party, independent, private utility locating company to positively identify underground utilities in the work area in addition to any station locating service and coordinated with the station utility department. The Contractor shall physically verify underground utility locations, including utility depth, by hand digging using wood or fiberglass handled tools when any adjacent work is expected to come within 3 feet of the underground system. Utilities located within and under concrete slabs or pier structures, bridges, parking areas, and the like, are extremely difficult to identify. Whenever contract work involves chipping, saw cutting, or core drilling through concrete, bituminous asphalt or other impervious surfaces, the existing utility location shall be coordinated with station utility departments in addition to location and depth verification by a third party, independent, private locating company. The third party, independent, private locating company must locate utility depth by use of Ground Penetrating Radar (GPR), X-ray, bore scope, or ultrasound prior to the start of work. Outages to isolate utility systems must be used in circumstances where utilities are unable to be positively identified. The use of historical drawings does not alleviate the Contractor from meeting this requirement.
2.10	Environmental Management and Sustainability	Contractor shall perform work under this contract consistent with the Installation's Environmental Management System (EMS) goals and policy. Goals: • Reduce purchase and use of toxic and hazardous materials; • Expand purchase of green products and services; increase recycling; • Reduce energy and water use; • Increase use of alternative fuels and renewable energy; • Integrate green building concepts in major renovations and new construction; • Prevent pollution at the source; and • Continual improvement. Policy: • Protect public health and the environment by being an environmentally responsible member of the community; • Preserve our natural, historic and cultural resources; • Conserve natural resources by reducing what we discard, reusing items, and recycling materials, which includes purchasing products made from recycled materials; • Integrate sound environmental practices into all our operations and business decisions; Integrate environmental protection requirements and pollution prevention initiatives into the early planning, design and procurement of facilities, equipment and material, as well as the planning and implementation of military training activities;

0200000 - Management and Administration		
Spec Item	Title	Description
		• Prevent or minimize pollution at its source as we seek out ways to eliminate or further minimize use of hazardous materials and generation of hazardous waste; • Maintain a sound partnership with regulatory agencies to sustain our compliance with existing and new environmental laws and regulations; • Enhance our program as we develop and implement an Environmental Management System; and • Adhere to this policy, remind one another to do so, and ensure that our entire community knows this is our policy by our actions as well as our words. The Contractor shall maintain monitoring and measurement information to address the EMS goals and policy and provide the EMS Goals and Policy Measurement Information to the KO per Deliverables. In the event an EMS nonconformance or environmental noncompliance associated with the contracted services, tasks, or actions occurs, the Contractor shall take corrective actions, assume legal and financial liability for the noncompliance and take corrective action immediately to remedy the noncompliance. The Contractor shall ensure that its employees are aware of their roles and responsibilities under the EMS and how these EMS roles and responsibilities affect work performed under the contract.
2.10.1	Energy Management Program	The Contractor shall comply with the installation's energy management program. The Contractor PM, or designee, shall represent the Contractor's interest at all meetings of the activity's Energy Management Board. The Contractor shall attend periodic meetings with the Installation Energy Manager, where energy and water efficiency goals and project status will be discussed to ensure that any Contractor work complements and optimizes efficiency efforts.
2.10.1.1	Water Conservation Plan	Not Applicable
2.10.1.2	Energy Efficient Products	The Contractor shall use life-cycle cost analysis in making decisions about investments in products, services, construction and other projects to lower Federal Government's costs and reduce energy consumption. The Contractor shall elect lifecycle cost effective Energy Star and other energy-efficient products when acquiring energy-using products. For product groups where Energy Star labels are not yet available, select products that are in upper 25 percent of energy efficiency as designated by the Federal Energy Management Program. Use of high-energy consuming tools or equipment is subject to approval by the KO prior to use.
2.10.2	Environmental Protection	The Contractor shall comply with all applicable Federal, state, and local laws, regulations, and executive orders, and with base-wide instructions, standards, and permit requirements. All environmental protection matters shall be coordinated with the KO. Inspection of Contractor operated facilities may be conducted by the Installation Environmental Protection Coordinator or other authorized officials on a no-notice basis. The Contractor shall comply with the instructions of the cognizant Navy Medical Department with respect to avoidance of conditions which create a nuisance or which may be hazardous to the health of military or civilian personnel. The Contractor is responsible for ensuring that its employees receive applicable environmental and occupational health and safety training, and are kept up to date on all required regulatory and specific training for the type of work to be conducted onsite.

0200000 - Management and Administration		
Spec Item	Title	Description
		All on-site Contractor personnel, and their subcontractor personnel, performing tasks that have the potential to cause an impact to the environment shall be competent on the basis of appropriate education, training or experience. The Contractor shall develop, submit, and implement an Environmental Protection Plan per Deliverables.
2.10.2.1	Sampling, Testing and Laboratory Services	The Contractor shall develop a written training plan and documentation of training for all sampling, testing, and laboratory personnel to demonstrate technical proficiency. The Contractor shall develop a written sampling plan for each sampling event and submit per Deliverables. The sampling plan shall summarize what will be sampled, the sampling equipment expected to be used and the number and location of samples expected to obtain a representative sample. The Contractor shall re-sample, test and obtain laboratory analysis upon request and submit results per Deliverables, at no additional cost to the Government. The Contractor shall provide collection and analytical testing of samples in accordance with the latest version of the test methods set forth in 40 CFR 261, 40 CFR 262 or Test Methods for evaluating Solid Waste, Physical/Chemical Methods, EPA Publication SW0846 and State of Hawaii, Department of Environmental Protection Sampling SOPs. Laboratory shall be certified by the State of Hawaii Department of Health for the specific analytical procedure in accordance with all Federal and State regulations. Analytical reports shall be in the format described in the Florida Administrative Code (FAC) 62-160.
2.10.2.2	ODS Requirements for Refrigerant Recycling	Not Applicable
2.10.2.3	Solid Waste Management and Recycling	The Contractor shall comply with the installation's Solid Waste Management Plan(s) and OPNAVINST 5090.1 series for Contractor generated waste. The Contractor shall submit Solid Waste Management Reports per Deliverables. The Solid Waste Management Reports Form is provided within the Forms in Attachment 0200000-05. The Contractor shall recycle concrete, scrap metal, tires, wooden pallets, cardboard, asphalt, yard waste and submit quarterly reports with recycling weight ticket receipts per Deliverables.
2.10.2.4	Non-Regulated Waste Disposal	The Contractor shall dispose all wastes in accordance with all applicable Federal, state, and local laws, regulations, and executive orders, and with base-wide instructions, standards, and permit requirements. All non-regulated waste shall be disposed of in accordance with all applicable Federal, state, and local laws, regulations, and instructions, including but not limited to 40 CFR, SOPA (ADMIN) MYPTINST 5090.1. Disposal of all non-regulated debris and rubbish resulting from the work under this contract shall comply with the federal regulations in 40 CFR Part 258 (Subtitle D of RCRA), or equivalent state regulations and be disposed of at appropriate off installation waste handling facilities. The Contractor shall reimburse the Government for all waste disposed of via Navy Region Hawaii's permitted Part B Facility, as described in Spec Item 2.10.2.6.

0200000 - Management and Administration		
Spec Item	Title	Description
		Historically, Non-Regulated Waste disposal has averaged approximately 576,461 pounds annually. However, historical data associated with contracts prior to this solicitation may present data that may not be representative of the requirements specified in this contract.
2.10.2.5	Regulated Waste Disposal	The Contractor shall dispose of regulated waste in accordance with the Resource Conservation and Recovery Act and all other applicable Federal, state and local laws, regulations and instructions, such as 40 CFR, OPNAVINST 5090.1, SOPA (ADMIN) MYPTINST 5090.1, etc. Variations in Rate: Disposal rates are subject to change. Changes in the disposal rates shall not be basis for adjustment to the contract price or a claim unless the deviation from the quoted price exceeds 15%. When the disposal rates vary by more than 15%, the contract price will be adjusted to reflect the amount the actual charge exceeds the rate quoted; however, the Government will only be liable for the amount of cost exceeding 15% of the rate quoted. For example, if a quoted rate increases by 16%, the Government will only be liable for 1% of the rate increase. Vice versa if the quoted rate decreases by 16%. The Contractor shall provide waste stream determinations, per 40 CFR and complete Waste Stream Determination forms for each of the Contractor's processes that generates regulated waste. Waste Stream Determination forms shall be submitted per Deliverables.
2.10.2.6	Universal Waste	The Contractor shall collect and manage all Universal Waste generated under the performance of this contract in accordance with the applicable Federal, state and local laws, regulations and instructions, such as: 40 CFR, the installation's 5090.1 instruction, etc. Universal Waste shall be disposed of through the installation's Part B Facility.
2.10.2.7	Spill Prevention, Containment, and Clean-up	The Contractor shall prevent, contain, clean up, and report all spills on Government property caused by the Contractor, in a manner that complies with applicable Federal, state, and local laws and regulations and with the Installation Hazardous Waste Management Plans; and Spill Prevention, Control, and Countermeasure Plans provided in Attachment 0200000-05 at no additional cost to the Government. The Contractor shall report all fuel and hazardous substance spills on Navy Region Hawaii within 15 minutes of discovery to the Regional Dispatch Center by dialing 911 from a station landline. If calling from a device not connected to a station landline, notify the emergency dispatcher you are calling from Navy Region Hawaii and you will be transferred to the Regional Dispatch Center. The Contractor shall notify the KO as soon as possible but not more than 24 hours after spill. Spill reports shall be submitted within 48 hours per Deliverables.
2.10.2.8	Hazardous Material Management	The Contractor shall support the Consolidated Hazardous Material Reutilization and Inventory Management Program (CHRIMP). The Contractor shall submit an Emergency Planning and Community Right to Know Act (EPCRA) Report and Contractor Hazardous Material Inventory Log per Deliverables following the format provided in Attachment 0200000-05.

0200000 - Management and Administration		
Spec Item	Title	Description
		The Contractor shall receive approval from the KO prior to bringing hazardous material on Government Property or prior to any other use in conjunction with this contract. For approval to use any hazardous material, allow a minimum of 10 working days for processing the request. The Contractor shall post Safety Data Sheets (SDS) at the worksite where the products are being used. Should the Government determine that a chemical the Contractor will use needs to be tracked, the Government may direct the Contractor to submit additional information in order to fulfill reporting requirements. The Contractor shall ensure that procedures are in place to deal with hazardous materials, pursuant to the FAR Clause 52.223-3, HAZARDOUS MATERIAL IDENTIFICATION AND MATERIAL SAFETY DATA. Notwithstanding any other hazardous material used in this contract, radioactive materials or instruments capable of producing ionizing/non-ionizing radiation (with the exception of radioactive material and devices used in accordance with EM 385-1-1 such as nuclear density meters for compaction testing and laboratory equipment with radioactive sources) as well as materials which contain asbestos, mercury or polychlorinated biphenyls, di-isocyanates, lead-based paint are prohibited. The Contracting Officer, upon written request by the Contractor, may consider exceptions to the use of any of the above excluded materials. Low mercury lamps used within fluorescent lighting fixtures are allowed as an exception without further Contracting Officer approval. Notify the Radiation Safety Officer (RSO) prior to excepted items of radioactive material and devices being brought on base.
2.10.2.9	Protection of Endangered and Threatened Species (Flora and Fauna)	The Contractor shall not disturb endangered and threatened species and their habitat. The Contractor shall carefully protect in-place and report immediately to the KO endangered and threatened species discovered in the course of work. The Contractor shall stop work in the immediate area of the discovery until directed by the KO to resume work.
2.10.2.10	Noise Control	The Contractor shall comply with all applicable Federal, state and local laws, ordinances, and regulations relative to noise control.
2.10.2.11	Salvage	All material and equipment removed or disconnected that is sound and of value shall remain the property of the Government.
2.10.2.12	Asbestos Containing Material (ACM)	Asbestos containing insulation, flooring, and other building materials may be encountered by the Contractor during the performance of work under this contract, and the Contractor shall remain alert to this possibility. If ACM is encountered or suspected in the performance of work, the Contractor shall avoid removing, sanding, abrading, or disturbing the material. The Contractor shall verbally notify the KO within one hour and submit a written ACM Notification within 24 hours per Deliverables.
2.10.2.13	Air Quality	The Contractor shall comply with CAA reporting requirements established by the Navy Region Hawaii Air Operation Permit. The Contractor shall track all Hazardous Air Pollutants (HAPs) used in contract maintenance and repair operations. The Contractor shall provide HAP data monthly, including Subcontractors, for application of coatings, solvents (including stripping solvents), adhesives, and other volatile organic compounds and/or HAPs containing material to miscellaneous parts in booths, buildings, hangars, ships, and open air surface coating operations, per

0200000 - Management and Administration		
Spec Item	Title	Description
		Deliverables. A sample HAP tracking form is provided within the Forms in Attachment 0200000-05. The Contractor shall track Hazardous Air Pollutants on a monthly rolling average and submit semi-annual reports per Deliverables.
2.10.3	Sustainable Procurement and Practices	The Contractor shall develop, submit, and implement a Sustainable Procurement and Practices Plan per Deliverables. This plan shall identify how the Contractor will comply with all applicable Federal, state and local laws and regulation, including E.O. 13514, Installation Energy Management Program and Water Conservation Programs and energy reduction requirements. The plan shall specifically address the following components: • Recycled Contents Products • Energy/Water efficiency • Energy Efficient Tools and Equipment • Alternate Fuels and Alternate Fuel Vehicles • Biobased Products • Non-Ozone Depleting Products • Environmental Preferred Products and Services • Low/Non-Toxic and Hazardous Materials The Contractor shall submit an annual Sustainable Delivery of Services Report per Deliverables.
2.10.3.1	Environmentally Preferable Products	The Contractor shall procure and use products that are energy-efficient (Energy Star or Federal Energy Management Program (FEMP)-designated), water efficient, bio-based, environmentally preferable (e.g., Electronic Product Environmental Assessment Tool (EPEAT)-registered), non-ozone depleting, contain recycled content, or are non-toxic or less toxic alternatives, where such products and services meet performance requirements.
2.10.3.2	Use of Recovered Materials	The Government has an affirmative procurement program to promote the purchase of products containing recovered materials. The intent is to reduce the solid waste stream and conserve natural resources by establishing markets for recycled content products and encouraging manufacturers to produce quality products containing recovered materials. Participate in this program by using, for Environmental Protection Agency (EPA) designated items, recovered materials to the maximum extent practicable without jeopardizing the intended end use of the item. The percentage of recovered materials content levels for use in the performance of this contract will be, at a minimum, the amount recommended in the EPA Comprehensive Procurement Guideline (CPG) Product Index website (http://www.epa.gov/). Use of EPA designated products is not required for products that are either not available within a reasonable period of time, are not available at a reasonable price, are not available from a sufficient number of sources to maintain a satisfactory level of competition, or fail to meet performance standards based on technical verification. EPA designation of products is an on-going process. Listings of EPA designated products containing recovered materials are found in 40 CFR 247. Make recommendation and submit Recovered Material Certification, per Deliverables, when a product containing recovered materials is equal to or better than the original and could be used for this contract. All changes of products must be accepted by the KO prior to its use.

0200000 - Management and Administration		
Spec Item	Title	Description
2.10.3.3	Use of Biobased Products	The Contractor shall make maximum use of biobased products in accordance with the FAR Clause 52.223-2 -- Affirmative Procurement of BIOBASED Products Under Service And Construction Contracts. Information about these products is available at http://www.usda.gov/
2.11	Disaster Preparedness	The Contractor shall comply with the installation's Contingency Instruction contingency response plan. The Contractor shall support the installation contingency response plan as directed by the KO. The Contractor shall submit their Mission Essential Contractor Services Plan and a list of their Mission Critical/Mission Essential Personnel per Deliverables.
2.12	Technical Library	The Contractor shall work with the Government to establish a technical library. Libraries shall include facility drawings, operation & maintenance manuals, warranties, Government publications, record drawings and other appropriate material. The Contractor shall continually update library material to ensure all data is current, complete, accurate and suitable for intended use. The Contractor shall monitor the use of the libraries to ensure materials are returned and data integrity is not compromised. The Contractor shall maintain the libraries until completion or termination of the contract and make the libraries available for inspection by prospective offerors for successive contracts. The technical library contents are the property of the Government and shall be turned over to the KO upon completion or termination of the contract. The Contractor shall submit the Technical Library Table of Contents per Deliverables.
2.13	Warranty Management	Prior to performing repair work, the Contractor shall report to the KO any defect in workmanship, material, or parts, and any improper installation of equipment and components that are covered by a warranty. The Contractor is responsible for knowing which equipment and components are covered by the original warranty and the warranty duration. The KO will provide available warranty documents.
2.14	Recurring Work Procedures	
2.14.1	Recurring Work Preparation of Proposals	The Contractor shall price additions or deletions to the Recurring Work requirements using the unit prices bid by the Contractor for Non-Recurring Work Unit Priced Tasks (UPTs). If Non-Recurring Work does not include a corresponding UPT for a specific work requirement for addition or deletion to the Recurring Work requirements, the Contractor shall propose on that specific work requirement in accordance with the Non-recurring Work Preparation of Proposal requirements specified below. Additional markups shall not be included since the cost for these items were included in the unit prices bid by the Contractor for Non-Recurring Work. This may result in the Contractor's proposal consisting of UPT unit price(s), Unit Priced Labor (UPL) Hour(s), Material pricing, or a combination thereof. Recurring Work proposals, including detailed scopes of work and detailed estimates for modification to the Recurring Work requirements shall be submitted per Deliverables.
2.14.2	Notification to the Government for Work Above the Recurring Work Limitations	The Contractor is fully responsible for work up to the recurring work limits. Recurring work limits are specified in subsequent annexes or sub-annexes. When work is expected to exceed the recurring work limits, the Contractor shall notify the KO and provide a rough order of magnitude (ROM) estimate for the work exceeding the Contractors recurring work limits of liability within two hours of identification for further direction. The Government may issue a service order in accordance with the recurring work provisions of this

0200000 - Management and Administration		
Spec Item	Title	Description
		contract order work in accordance with the non-recurring work provisions of this contract detailed below or accomplish the work by means other than this contract. The Contractor shall provide a detailed scope of work and detailed estimate, per Deliverables, per the non-recurring work procedures in Spec Item 2.15 for any potential task orders resulting from work that exceeded a recurring work limit of liability in the contract. The estimate shall include the full scope of work and clearly show the deductions for the applicable recurring work limit of liability. The resultant proposed price shall be for the portion of the work exceeding the recurring work limit of liability. Further, the Contractor shall prepare and provide scopes of work and estimates in this manner to the KO when requesting a determination that a recurring work limit of liability has or will be exceeded.
2.14.3	Recurring Work Exhibit Line Item Numbers (ELINs)	Recurring work Exhibit Line Item Numbers (ELINs) are provided in Attachments 0200000-12 through 0200000-17.
2.15	Non-recurring Work	Non-recurring work is identified in each applicable annex or sub-annex. Non-recurring work may consist of Unit Priced Task (UPT) Work (non-negotiated) and Unit Priced Labor (UPL) Work (negotiated). The Contractor shall perform all non-recurring task work as ordered by the KO per Section G and DoD FedMall requirements. Non-recurring work will consist of Unit Priced Tasks and Unit Priced Labor Work which may be ordered by the Government as separate items or in combinations of items from the Non-recurring Work Exhibit Line Items (ELINs) provided in Section J on an as needed basis.
2.15.1	Unit Priced Task (UPT) Work (Non-Negotiated)	A UPT is defined as a non-recurring work item that includes all direct and indirect costs plus profit associated with the particular unit of work. All materials and equipment (rented, leased or Contractor-owned) required for the accomplishment of a UPT shall be included within the respective exhibit line item prices. The fixed price for the task order is determined by multiplying the exhibit line item unit prices by the quantities ordered. The Contractor is not required to submit cost estimates for UPTs.
2.15.1.1	Acceptance and Performance	The Contractor shall offer indefinite quantity (IQ) pre-priced line item services to authorized Government personnel when they are ordering the work directly via the Government-wide Commercial Purchase Card (GCPC) program. When receiving GCPC orders against Section B, the Contractor shall provide the supplies and services at the offered price without additional markup or handling fee. The Contractor shall accept and process electronically submitted GCPC orders for IQ services, including those orders issued through the FedMall. FedMall is a U.S. Government (USG) owned and operated web-based ordering system that enables any Department of Defense (DoD) or Federal activity to search for and order goods and services. Authorized GCPC users will receive approved accounts on FedMall to view and order IQ line items. The Contractor shall receive electronic IQ orders from FedMall using 128-bit encrypted email. The Contractor shall purchase, install, and utilize the most recent version of PGP Personal software, or a comparable solution, for the purpose of decrypting order notification emails from FedMall. In addition, the DoD has established the External Certification Authority (ECA) program to support the issuance of DoD-approved certificates to Contractors. The ECA program is designed to provide the mechanism for Contractors to

0200000 - Management and Administration		
Spec Item	Title	Description
		securely communicate with the DoD and authenticate to DoD Information Systems. The Contractor shall purchase, install, maintain and use a DoD-approved ECA certificate. Information on obtaining an ECA certificate can be found at https://public.cyber.mil/eca/ The Contractor shall post updates on order delivery schedule and performance to the FedMall in a timely manner. The Contractor shall track quantities and report total ordered quantity in FedMall and approved DD 1155's by line item number each month and year-to-date. The report shall be due to the Contracting Officer by the fifth day of the following month, per Deliverables. The Contractor must track and report when total dollar value of all orders from both GCPC purchases and DD 1155s exceed 75% of the combined Section B Pre-Priced Line Item quantities.
2.15.1.2	Invoicing and Receiving Payment	Payment for completed FedMall orders will be made using the Government wide Commercial Purchase Card (GCPC). Reference "payment by third party" clause FAR 52.232-36. The Contractor shall possess the capability to invoice and receive payment for non-recurring work via an electronic medium with supported command representatives utilizing their GCPC. No partial or advance payments will be provided.
2.15.2	Unit Priced Labor (UPL) Work (Negotiated)	The Contractor shall perform all UPL work in accordance with the scope and delivery schedule negotiated per each task order. UPL work is defined as non-recurring work that utilizes negotiated labor hours and materials to accomplish a task not required by the recurring work portion of the contract. UPL includes separately priced labor, material, and equipment exhibit line items. The Contractor shall prepare and furnish a detailed cost estimate identifying proposed labor, material, and equipment costs, which upon approval by the KO, becomes the fixed price for the task order.
2.15.2.1	Non-recurring Work Preparation of Proposals	In response to the Government's Request for Proposal, the Contractor shall submit non-recurring work proposals to the KO within ten working days, per Deliverables. Proposals shall include: 1) a complete list of all tasks necessary to perform the required scope of work, 2) the number of direct labor hours to perform each task and 3) the projected quantity and costs of materials and equipment to perform the required scope of work.
2.15.2.1.1	Labor Requirements	Accepted industry time standards published in R. S. Means Facility Maintenance and Repair Cost Data, industry organizations, and similar estimating sources shall be used for determining the number of direct labor hours required to complete the scope of work. If not provided in RS Means or a similar estimating source, labor hours may be based on quotes from at least three different commercial vendors. The total labor cost will be determined by totaling the number of direct labor hours and then multiplying by the UPL amount in the Non-Recurring Work Exhibit Line Items (ELINs) provided in Attachments 0200000-12 through 0200000-17. The Government retains the right to obtain additional quotes. The lowest quoted labor hours shall be used.
2.15.2.1.2	Direct Material and Construction Equipment Requirements	Direct material and construction equipment costs published in R. S. Means Facility Maintenance and Repair Cost Data, national material supplier catalogues, U.S. Army Corps of Engineers Construction Equipment Ownership and Operating Expense Schedule (EP 1110-1-8), equipment rental catalogues, and similar estimating sources shall be used for determining customary and reasonable costs for the direct material and construction

0200000 - Management and Administration		
Spec Item	Title	Description
		equipment estimate. If not provided in RS Means or a similar estimating source, direct material prices may be based on national material supplier catalogue pricing or quotes from at least three different commercial vendors. Projected direct material requirements shall include a list of materials establishing the size, quality, number of units, and unit prices. Pre-expended bin supplies and materials shall not be included in the list of direct materials since the cost for these items are to be included in the labor hour unit price. Direct material prices shall be the lowest price available considering the availability of materials and the time constraints of the job. The direct material price shall include all discounts and rebates for core value and salvage value that accrue to the Contractor and Contractor-furnished warehousing cost. Construction equipment costs shall include rental and lease costs, ownership costs where Contractor-owned, construction equipment mobilization, and tools, not priced under the recurring work portion of the contract. The Government retains the right to obtain additional quotes in questionable situations. The lowest price shall be used.
2.15.2.2	Issuance of Final Task Order	The KO will order unit priced labor by issuing to the Contractor a copy of the approved scope of work and a task order for the work described. Task order completion times will be specified on each task order.
2.15.2.3	Coefficient	This contract uses coefficients to obtain the unit price for Unit Priced Task Work line items. The coefficient shall be the Offeror's adjustment to the Governments specified unit prices in Attachment 0200000-18. Offerors shall submit coefficients as described herein. The coefficients must incorporate all projected and potential costs including overhead, profit, and all other contingencies. The offeror shall submit coefficients extended to no more than three decimal places. Enter the offered coefficients in Attachment 0200000-12 through Attachment 0200000-17. The offer shall be "net" (1.000) or a percentage "decrease from" (e.g., 0.952) or "increase to" (e.g., 1.216) the unit prices listed in the Unit Price List. The unit price in the Unit Price List will be multiplied by the coefficient and rounded to two decimal places for the Unit Priced Task Work. Base Period. There will be no adjustments to the unit prices or the coefficients after award of the contract. Option Periods. There will be no adjustments to the unit prices or to the coefficients after award of the contract. The coefficients shall not include any allowance for any contingency to cover increased cost in the Service Contract Labor Standards wage rates for which adjustment is provided under FAR 52.222-43.
2.15.3	Non-recurring work ELINS	Non-recurring Work Exhibit Line Item Numbers (ELINs) are provided in Attachments 0200000-12 through 0200000-17.

1502000 – Facility Investment		
Spec Item	Title	Description
1	General Information	
1.1	Outline of Services	The intent of 1502000 Facility Investment is to specify the requirements for Sustainment, Restoration, and Modernization (SRM) sub-functions only. The Facility Investment requirements within this sub-annex primarily consist of infrastructure sustainment and minimal restoration and modernization work. Sustainment is the maintenance and repair necessary to keep an inventory of facilities and other assets in good working order. Restoration and modernization normally consist of major rehabilitation and capital improvements that is accomplished through other Navy programs. Some major repair, minor construction and stand-alone demolition may be accomplished as part of Facility Investment. The Contractor shall perform maintenance, repair, alteration, demolition and minor construction for the following: Building and Structures • Memorial Fountain • HEMP Shelters • Water Storage Tanks • Re-lamping, Ballast Renewal, and Incidental Electrical Repair within light fixtures Building Systems • Facility Ventilation Intake • Exhaust Filters • Dust Collector Filter Cartridges • Swimming Pools • Training Facilities • High Security Revolving Doors • Circle Interlocking Doors • Reverse Osmosis Systems • Photovoltaic (PV) Systems • Solar Hot Water Systems • Uninterruptible Power Systems (UPS) High Altitude Electromagnetic Pulse (HEMP) Shelters • Hardness Critical Assemblies (HCA's) Locksmith Facility Investment Services • Repair/Installation of locks, locking hardware, and locking devices • Neutralization of locks, locking hardware, and locking devices • Key Duplication • Pinning cylinders Keyed Differene (KD), Keyed Alike (KA), and Mastered Keyed (MK) systems • Combining and Re-Combining locks

1502000 – Facility Investment		
Spec Item	Title	Description
		ADDITIONAL INFORMATION: FILTERS: Part of the work in this PWS includes, but is not limited to scheduled filter servicing for the facility's abrasive blast and paint booths. The abrasive blast dust collector filters, supporting Building 1704 in the PHNSY shall be assumed to contain lead, cadmium, chromic acid/chromates and arsenic with the potential to expose personnel to exposure levels above the Action Level (AL) and Permissible Exposure Limit (PEL), since the blasting media used in the facility contains these metal contaminants. Testing of the materials will give a representative example based on the current hazard conditions; however, if different materials are deposited by the customer usage tomorrow, it may not show up in a test done today. The Contractor shall perform to protect against the worst-case scenario and may opt to test for hazards each time work is accomplished. LOCKSMITH: Includes but is not limited to repair and installation of mechanical, electrical, and electronic locksets and other types of locking devices (including General Services Administration (GSA) approved security containers); key duplication; neutralization of locked cabinets, doors, safes, and security containers (including GSA approved containers) and other locked items; keying alike locksets; master keying lock systems; changing combinations; and incidental work as may be related to locksmith services as described herein. This work is strictly Non-recurring Work. WATER STORAGE TANKS: Contractor shall provide all materials, labor, and equipment to perform modified API-653 in-service (not empty) inspection of both tanks in accordance with AWWA M42 standards to include but not be limited to visual inspections, hammer testing, magnetic flux leakage examination (MFE), and ultrasonic thickness testing of tanks S-1 and S-2, including the roofing, side walls and outer chine (perimeter of the floor bottom, sticking out of the walls). Special lifting devices are not required as only ultrasonic readings will be taken in the lower portion of the tank walls. Cleaning of tanks for inspection is not required. Roof hatches may be opened to view from the top. Contractor's Inspector must be API-653 certified for at least 10 years. API-653 certified inspector must have at least 10 years of experience inspecting 1 MG or larger steel welded potable water tanks. Within 14 calendar days after award, the Contractor shall designate and submit to the Contracting Officer a copy of their API 653 Inspector certificate; documents to support at least 10 years' experience as an API-653 Inspector; documents to support at least 10 years' experience inspecting 1 MG or larger steel welded potable water tanks; and certifications of other professionals with the ability to perform a modified API-653 in-service (not empty) tank inspection in accordance with AWWA M42 standards.

1502000 – Facility Investment		
Spec Item	Title	Description
2	Management and Administration	
2.1	Definitions and Acronyms	Definitions and Acronyms are listed in Attachment 0200000-01.
2.2	Personnel	In additions to the Employee Requirements specified in Annex 0200000, the Contractor shall provide personnel with the qualifications specified below:
2.2.1	Certification, Training, and Licensing	All maintenance and repair shall be performed by personnel trained and certified by the OEM. Personnel working with or on electrical or electronic equipment must be trained and certified per NAVFAC MO-200. Personnel performing work on transformers must be knowledgeable of proper procedures for handling and disposing of insulating fluid containing polychlorinated biphenyls (PCBs). Personnel performing work and obtaining test data on the cathodic protection system must be trained per UFC 3-570-06. Personnel working on systems, equipment or components containing chlorofluorocarbons (CFCs) and/or hydro-chlorofluorocarbons (HCFCs) must be certified under an Environmental Protection Agency (EPA) approved technical certification program per OPNAVINST 5090.1 Chapter 6 Personnel inspecting, certifying, and making recommendations for corrective action for backflow preventers shall be certified per UG-2029-ENV. Personnel performing electrical work on lighting maintenance or repair shall be certified or under the direct supervision of a certified journeyman electrician (i.e. a certified journeyman electrician shall be at the site of work while electrical work is being performed). All electrical work performed under this contract shall conform to the latest applicable rules of the National Electrical Code, NFPA 70. All maintenance trade personnel certifying or inspecting repair or maintenance work that does not require an inspector certified by a governing directive shall be qualified at the journeyman level. The Contractor shall submit proof of all certification, training, and licensing requirements per Deliverables. Any specialized equipment, such as bucket trucks, man lifts or scissor lifts, used in the performance of work on this contract shall be operated by personnel trained and licensed to operate such equipment. Contractor shall provide evidence of such training and licenses per Deliverables.
2.3	Special Requirements	
2.3.1	Workmanship and Material Standards	The Contractor shall be responsible for maintaining all facilities, systems, and equipment, identified in this technical sub-annex, to a standard that prevents deterioration beyond that which results from normal wear and tear and corrects deficiencies in a timely manner to assure full life expectancy of the facilities, systems, and equipment. Best commercial practices shall be applied in the performance of work. All work shall be completed per approved and accepted industry and equipment manufacturers' standards and shall comply with building and safety codes, applicable

1502000 – Facility Investment		
Spec Item	Title	Description
		activity, local, state, and federal regulations, and other technical requirements identified within this technical sub-annex. Workmanship for maintenance and repair shall include all work necessary to complete facility and system restoration, including touch-up painting and operational checks. Upon completion of work, the Contractor shall ensure all facilities, systems, and equipment are free of missing components or defects which would affect the safety, appearance, or habitability of the facilities and structures or would prevent any electrical, mechanical, plumbing or structural system from functioning in accordance with design intent. Repairs shall be made in accordance with the manufacturers' specifications and guidelines, and standard building codes. The quality of repairs shall meet the applicable standards and shall prevent any malfunction reoccurrences caused by poor workmanship or other contractor inadequacies. The quality of the repaired areas shall be fully compatible with adjacent surfaces or equipment. Except where otherwise specified, replacements shall match existing in dimensions, finish, color, design, and functionality and shall have an appearance similar to the original finished appearance with only minor unobjectionable deterioration resulting from normal use. The Contractor shall not allow debris to spread unnecessarily into adjacent areas nor accumulate in the work area. All such debris, excess material, and parts shall be cleaned up and removed at the completion of the job and at the end of each day work is in progress. Upon completion of work, any stains and other unsightly marks shall be removed.
2.3.1.1	Quality of Services and Materials	The quality of services and materials shall meet the requirements and standards as specified in this contract and as listed below. When there may be a conflict among codes, practices, etc., the most stringent requirement shall apply: • Federal, state, and local laws and regulations, current at the time of work performed • Commercial and industry codes and standards • Written manufacturer's instructions
2.3.1.2	Personnel and Equipment	Contractor personnel and equipment shall comply with the most current edition, at the time work is performed, of the U.S. Army Corps of Engineers EM 385-1-1, "Safety and Health Requirements Manual". Personnel shall be trained in the requirements of 29 CFR 1910, "Occupational Safety and Health Standards"; 29 CFR 1925, "Occupational Safety and Health Standards for Federal Service Contracts"; 29 CFR 1926, "Occupational Safety and Health Regulations for Construction"; Hawaii Revised Statutes (HRS), Chapter 396, "Hawaii Occupational Safety and Health (HIOSH)" and other applicable safety requirements found in the applicable Federal, State and local laws and regulations. Use appropriate equipment to ensure the safe handling and disposition of wastes. Use all equipment in a manner consistent with its intended purpose. Equipment shall be safe to operate, in sound condition, and well maintained. Hauling equipment shall not spill or leak while transporting wastes.
2.3.1.3	Fall Protection	Working from a ladder a heights greater than 6 feet may be allowed if no other feasible alternatives exist. Follow the hierarchy and prohibitions in selecting appropriate work platforms stated in EM 385-1-1. When using a ladder, comply with all ladder requirements as referenced in EM 385-1-1 and the approved safety plan. Ensure the employee's center of gravity always remain within the ladder's rails.
2.3.1.4	Shutdown of Systems Equipment	Except in emergencies, work that requires shutdown of equipment for over thirty minutes during normal work hours requires the Contractor to obtain prior approval from the Contracting Officer.
2.3.1.5	Substitution	In the event of substituting a replacement unit, part, component, or other material, submit a "Request for Substitution" to the Contracting Officer. Requests shall include, at a minimum, the following information: item to be substituted; specific identification

1502000 – Facility Investment		
Spec Item	Title	Description
		of the proposed substitutes; justification for the necessity of the substitution; all submittals required by this contract; and certification that the replacement is equal to or better than the original and complies with applicable Government, commercial, or industrial standards. The Contractor shall only use substitutions accepted by the Contracting Officer.
2.3.2	Light Fixtures	In performance of work for lighting maintenance, light fixtures discovered to have “tie wraps”, duct tape, or other non-standard securing mechanisms, shall be reported to the Government for corrective action.
2.3.2.1	Missing or Damaged Fixtures and Lens Covers	Replacement of missing or damaged light fixtures and lens covers is NOT INCLUDED in the Recurring Work portion of this contract. Contractor shall notify the Government when they are discovered.
2.3.3	Historical Preservation	Buildings and facilities designated as historical sites shall be maintained in accordance with Federal, state, and local historical policies and regulations.
2.4	References and Technical Documents	References and Technical Documents are listed in Attachment 0200000-03.
2.5	Records and Reports	Refer to Annex 0200000, Spec Item 2.6.6
2.5.1	Facility Historical Records	The Contractor shall provide and maintain a cumulative record of services, repairs, and modifications performed for each facility serviced (i.e. swimming pool, wading pool, fountain, HEMP Facilities, Water Storage Tanks, etc.). The record(s) shall include, but will not be not limited to: • Date of work performance • Name of person and company performing work • Location (Base Name) • Building Number • Description of work • Manufacturer(s) • Model Number(s) • Serial Number(s) • Capacity (Capacities, HP, Flow) • Manufacturers’ instructions (for equipment currently on site, provide 1 time only) • Specifications (for equipment currently on site, provide 1 time only) and • Warranties. (for equipment currently on site, provide 1 time only) • For new installations, include install date The facility historical record shall remain the property of the Government. Submit copies to the KO in accordance with Deliverables. Upon KO’s request the Facility Historical Records shall be made available to the Government for inspection and review, within one working day of Government request.
2.5.2	On-Site Service Logbook	The “On-Site Service Logbook” is a separate requirement from the “Facility Historical Records.” The Contractor shall provide a Service Logbook, which is hard covered and bound (loose leaf binders are not acceptable), and a wall mounted book tray for each facility. The tray shall be used for the storage of the logbook. The following shall be considered in the placement and storage of the On-Site Service Logbook: • Physical location of the Logbook be consistent from location to location (ie: next to door, to the right of or to the left of the unit disconnect, on wall facing door upon entry, etc.)

1502000 – Facility Investment		
Spec Item	Title	Description
		• Mount the tray in a location approved by the activity manager in charge of the area • Ensure location is in a dry, easily accessible area of the pump/equipment room. The Service Logbook shall be of a size capable of recording 12 months of data, recorded in a legible manner. Log all data at the time of service. Use a non-fading, non-smearing, non-bleeding writing device to record all data. The Logbook(s) data shall include, but will not be not limited to: • The date and time of service (record both time started and time completed) • The name of the person performing the preventive maintenance and operational service • Equipment readings (e.g.: pressure reading before and after filtration back wash, discharge rates.) and • Brief statements of services performed. Service logbooks shall remain at the facility at all times. At the completion or termination of this contract, the logbooks shall remain the property of the Government.
2.5.3	Deficiency Report	In accordance with Deliverables, the Contractor shall submit a deficiency report to the KO for all deficiencies which are not repaired or corrected during the preventive maintenance visit or trouble call in which the deficiency is first discovered, or repair work, which is not completed within the specified completion period. Submit deficiency report within two working days of discovering the deficiency. The report shall include, but will not be not limited to: • Date deficiency discovered • Sufficient detail of work required and • Reason for the delay in completion. When applicable, provide the following information when the deficiency cannot be corrected under the limits of the firm fixed price portion of the contract: • Estimated labor hours required to correct the deficiency • Direct cost of parts and material required and • Estimated time of completion. • For parts and materials, provide the source name and phone number of the point of contract at the source.
2.6	Customer Notification for Performance of On-Site Work	The Contractor shall notify the customer's representative prior to performing on-site work (e.g., preventive maintenance, trouble calls, Non-recurring work). The Contractor shall provide status of work to the customer's representative and PAR or COR prior to leaving the job site.

1502000 – Facility Investment				
Spec Item	Title	Performance Objective	Related Information	Performance Standard
3	Recurring Work	The Contractor shall maintain, repair, alter, perform scheduled maintenance services, and complete required records and reports in facility equipment and installed equipment and systems to ensure they are fully functional and in normal working condition.	The Contractor shall develop, implement, and execute a Emergency, Urgent, and Routine (E/U/R) Work and Maintenance Program to maintain and repair facility equipment and installed equipment and systems. The Contractor shall provide all necessary test instruments, equipment, and tools required to perform maintenance and repair. The Contractor shall provide all necessary test instruments, equipment and tools required to perform maintenance and repair. The Contractor shall submit Maintenance Summary Reports per Deliverables. Nonrecurring work may be issued for work requiring repair (by means of renewing parts), or total hardware renewal or expendable parts renewal. Maps are provided in 1502000-01.	Facility equipment and installed equipment and systems are in normal working condition and function properly in accordance with specified standards.
3.1	Emergency, Urgent, and Routine (E/U/R) Work	The Contractor shall perform E/U/R work in a timely manner to ensure facilities, systems, ground structures and other assets are fully functional, in normal working condition and function properly in accordance with specified standards.	The Contractor shall receive E/U/R work in accordance with the work reception requirements in Annex 2. The Contractor shall schedule and perform E/U/R work in a way that minimize disruptions to customers and Government operations. E/U/R work will include a wide variety of work. Historical E/U/R work data associated with contracts prior to this solicitation may present data that may not be representative of requirements specified. The Government makes no warranty, express or implied, or assumes any legal liability or responsibility for the accuracy, completeness, or usefulness of the historical E/U/R work order data. The Contractor shall maintain sufficient materials and equipment	E/U/R work is responded to and completed within the specified time. Facility equipment and installed equipment and systems are fully functional, in normal working condition and function properly in accordance with OEM specifications, including recertification if applicable. When a work order is complete the Facility equipment and installed

1502000 – Facility Investment				
Spec Item	Title	Performance Objective	Related Information	Performance Standard
			on hand to support E/U/R work requirements. Lack of availability of material or equipment will not relieve the Contractor from the requirement to complete E/U/R work within the time limits specified. The Government may combine multiple requirements received for the same facility, system, ground structure or other asset at the same time into one work order. Unless otherwise specified, the Contractor has full responsibility for any work up to the work order limit of liability of \$2,500 in direct labor and direct material cost per work order. The Government will only pay for the portion of direct labor and/or direct material that exceeds the E/U/R work order limits of liability. The Contractor shall notify the KO upon identification that the work order will exceed the specified limits of liability in accordance with reporting requirements in Annex 2. If a non-recurring work is issued for the portion exceeding the specified E/U/R work order limits of liability, the Government will only pay for the portion of direct labor and/or direct material that exceeds the work order limits. Examples of work exceeding the E/U/R Work Order limits of liability: • If a work order requires \$2,600 in direct labor and direct material cost, the Government may issue a task order in accordance with the Non-recurring Work portion of the contract for the \$100 in direct labor and direct material cost that exceeds the work limit of liability.	equipment and systems do not present danger to personnel or equipment. Work Orders are signed by the original requestor prior to being closed. Work order properly documented in NAVFAC Maximo.

1502000 – Facility Investment				
Spec Item	Title	Performance Objective	Related Information	Performance Standard
			The Contractor may invoice for completed E/U/R work orders. The Contractor shall not invoice for incomplete work orders and work orders not issued. A modification will be processed at the end of each period of performance to deduct for work orders not issued and incomplete work orders. Deduction will be based on the unit prices specified in Attachments 0200000-12 through 0200000-17. The Contractor shall submit a monthly summary of completed E/U/R work orders per Deliverables.	
3.1.1	Emergency	The Contractor shall perform emergency work orders in a timely manner to ensure facility equipment and installed equipment and systems are fully functional, in normal working condition and function properly in accordance with specified standards.	The Contractor shall perform emergency work orders 24 hours a day, seven days a week throughout the contract period. The Contractor shall respond to emergency work orders with the appropriate service personnel and equipment to commence work immediately. The Contractor shall remain at the work site until the emergency has been arrested. If follow-up work is required (after the emergency condition is arrested) to complete the restoration and ensure facilities, systems, ground structures and other assets are fully functional and in normal working condition, the Contractor may request time extension equal to a Routine Work Order. The emergency mitigation and follow-up work shall be considered part of the original work order.	Emergency work orders responded to within one hour of receipt of call. Work continues without interruption until emergent condition is arrested and damage to facility equipment and installed equipment and systems is mitigated.
3.1.2	Urgent	The Contractor shall perform urgent work orders in a timely manner to ensure facility equipment and installed equipment and systems are fully	The Contractor shall perform urgent work orders without extended delay.	Urgent work orders are completed within five working days.

1502000 – Facility Investment				
Spec Item	Title	Performance Objective	Related Information	Performance Standard
		functional, in normal working condition and function properly in accordance with specified standards.		
3.1.3	Routine	The Contractor shall perform routine work orders in a timely manner to ensure facility equipment and installed equipment and systems are fully functional, in normal working condition and function properly in accordance with specified standards.	Performance of routine work orders is not required outside of Government regular working hours.	Routine work orders are completed within 30 calendar days.
3.2	Preventive Maintenance (PM) Program	The Contractor shall develop and implement a PM program for facility equipment and installed equipment and systems to ensure proper operation, to minimize breakdowns, and to maximize useful life.	The Contractor shall develop and submit a PM program per Deliverables. At a minimum, the PM program shall include: • PM management and technical approach • Procedures to evaluate equipment reliability and corrective actions. • Job plans tailored to the OEM technical documentation. • Qualification requirements of the maintenance personnel. The Contractor is fully responsible for and shall perform any incidental repairs, including replacement, discovered during scheduled maintenance work up to a total of 32 labor hours and \$2500 per occurrence in direct labor and direct material cost under the recurring work portion of the contract. Incidental repairs performed under maintenance are not considered E/U/R work. Notification of repair work exceeding the incidental repairs limit shall be submitted to the KO within two hours of identification. The Government may issue E/U/R work or non-recurring work for the portion of the repairs exceeding the incidental repairs limits of liability. The Government will only pay for	Maintenance is accomplished in accordance with the Contractor's PM program and work schedule. PM is performed in accordance with manufacturers' recommended procedures and OEM standards. PM Work properly documented in NAVFAC Maximo.

1502000 – Facility Investment				
Spec Item	Title	Performance Objective	Related Information	Performance Standard
			the portion of direct labor and/or direct material that exceeds the specified limits of liability. Example: If an individual occurrence of incidental repair requires \$2500 and 32 labor hours in direct labor and/or direct material cost, the Government may issue E/U/R work or non-recurring work in accordance with the non-recurring work provisions of the contract for the \$50 in direct labor and/or direct material cost that exceeds the specified incidental repair limit of liability. The Contractor shall not use breakdown maintenance as part of the PM program. The PM program shall provide an economical approach to accomplish the manufacturers' recommended maintenance in accordance with OEM standards, and maintenance required to satisfy equipment warranties and keep facility equipment and installed equipment and systems in normal working condition. Excessive or repeated system or equipment breakdowns or deficiencies may indicate the need to adjust or modify the Contractor's PM program. These changes will be made at no additional cost to the Government. The Contractor shall submit a monthly PM work schedule per Deliverables. The Contractor shall submit a monthly Preventive maintenance summary report per Deliverables. Informational Note: Condition Assessments are typically performed by the maintenance technician on an annual basis

Spec Item	Title	Performance Objective	Related Information	Performance Standard
			during the most invasive PM circumstances. Requirements for condition assessment of dynamic equipment are specified in 1501000 Facility Management.	
3.2.1	Facility Ventilation Intake and Exhaust Filters and Dust Collector Filter Cartridges	The Contractor shall maintain filters and dust collector filter cartridges to ensure proper operation, to minimize breakdowns, and to maximize useful life.	Description Facility Ventilation Intake and Exhaust Filters and Dust Collector Filters are provided in Attachment 1502000-02. The Contractor shall develop, submit, and implement ad scheduled Preventive Maintenance plan and Scheduled Filter Maintenance Service Report per Deliverables. The maintenance service report shall include: • Date • Location • Building Number • Type of Filter • Manufacturer • Quantity of filters serviced The maintenance program shall provide an economical approach to manufacturer's recommended procedures. OEM standards and maintenance required to satisfy equipment warranties and keep in normal working conditions. The Contractor shall notify the KO in writing, 7 calendar days in advance of each scheduled maintenance service visit to limit the possibility of scheduling conflicts between the facilities operations and the contractor's maintenance performance. Operations shall be conducted in accordance with OSHA Lead standard 29 CFR 1910.1025. The maintenance program shall include both Annual and Semi-Annual work.	Maintenance is accomplished in accordance with the Contractor's maintenance program plan and work schedule. Scheduled service (as stated in the Contractor's Scheduled Maintenance Services Plan) performed and completed within the times stated in the Plan. Maintenance is performed in accordance with manufacturers' recommended procedures and OEM standards. Adhere to all activity instructions and requirements. Work accomplished in a safe and environmentally sound manner. System left in an operable and safe condition in accordance with manufacturer's and design specifications.

Spec Item	Title	Performance Objective	Related Information	Performance Standard
			(excluding the cost for pre-expended bin materials and supplies) for each deficient condition. Items that are expected to fail before the next scheduled PM shall also be considered as a repair requirement identified during PM. The Contractor shall, per Deliverables , notify the KO upon identification that the repairs will exceed the threshold listed above. If the KO determines that the objective and standards are not met (e.g., excessive or repeated deficiencies) the Contractor shall adjust or modify the Contractor’s maintenance program at no additional cost to the Government. Per Deliverables, submit a monthly maintenance schedule, unaccomplished maintenance report, and accomplished maintenance and repairs report.	commencement of work.
3.2.3	Solar Hot Water Systems	The Contractor shall develop and implement a PM program for installed Solar Hot Water equipment and systems to ensure proper operation, to minimize breakdowns, and to maximize useful life.	Description of Solar Hot Water Systems is provided in Attachment 1502000-05. The Contractor shall develop and implement a program to maintain and make all necessary repairs to solar hot water systems. The Contractor shall develop and submit a scheduled maintenance program plan. The plan shall include all maintenance items listed in Attachment 1502000-05. The maintenance program shall be in accordance to OEM standards, procedures and maintenance requirements to satisfy equipment warranties and keep the Solar Hot Water Systems in normal working condition.	Maintenance is performed in accordance with Contractor's PM program and work schedule. Maintenance is performed in accordance with manufacturers’ recommended procedures and OEM standards. Adherence to all instructions and requirements. Responds to Trouble Calls in a timely manner. Provides support as SME.

1502000 – Facility Investment				
Spec Item	Title	Performance Objective	Related Information	Performance Standard
			The Scheduled Maintenance Service Plan shall include Semiannual work. The Contractor shall submit a price proposal for costs that exceed 32 hours labor and \$2,500.00 direct material cost to correct all deficiencies discovered during preliminary and scheduled recurring inspections. The Contractor shall submit a price proposal for costs that exceed 32 hours labor and \$2,500.00 direct material cost to correct all deficiencies discovered during recurring maintenance, inspections, testing, and cleaning. In accordance with attachment J-1502000-05, The Contractor shall clean the collectors removing dust, dirt, bird droppings, and other debris that affects collector performance. The Contractor shall develop a Log of Maintenance and Repair for each Solar Hot Water System. The log shall be in accordance with Deliverables section and copies shall be provided at regular intervals not to exceed the shortest maintenance cycle to the KO and COR. The log shall become and be considered Government property and shall be surrendered to the Government in accordance with Deliverables . Per Deliverables , Notify the KO and COR or PAR in writing, 7 calendar days in advance of each scheduled maintenance service visit to limit the possibility of scheduling conflicts between the facility operations and the Contractor's maintenance performance. The Contractor shall respond to

Spec Item	Title	Performance Objective	Related Information	Performance Standard
			trouble calls within 1 hour during business hours and within 2 hours during non-business hours. The Contractor shall provide a monthly written report of Solar Hot Water System trouble calls in accordance with Deliverables. The Contractor shall provide support for construction efforts as the SME. All work on Solar Hot Water Systems shall be in accordance with all industry standards. All work shall comply with all Federal and Local Building Codes, Standards, and Regulations. All work shall be conducted in accordance with all Federal, Local, and Base Safety Standards, Procedures, and Requirements. Provide copy of licensure and certifications to the KO per Deliverables . DDC: The Contractor shall comply with and meet applicable security requirements listed in Attachment 0200000-07 prior to accessing Government IT systems to monitor or control or monitor and control DDC systems At a minimum, the Contractor's PM program shall include items listed in Attachments 1052000-04 and 1502000-05.	
3.2.4	HEMP Shelters	The Contractor shall perform maintenance on HEMP Shelters to ensure proper operation, to minimize breakdowns, and to maximize useful life.	The HEMP shelters at Camp H.M. Smith are situated in an environmentally challenging location on Oahu, Hawaii. It is due to the environmental and operational factors that drive the need for supplemental depot level Hardness Maintenance (HM) and Hardness Surveillance (HS) services in order to ensure top Shielding Effectiveness (SE) to	Maintenance is performed in accordance with Contractor's PM program and work schedule.

1502000 – Facility Investment				
Spec Item	Title	Performance Objective	Related Information	Performance Standard
			sustain mission critical operations in the infrastructure of the communication system. The HEMP topology includes four individual shelters connected by welded conduit, creating a single closed volume. Each shelter is connected to the MES/GES by four individual hardened conduits. The contractor shall provide professional and technical services to perform routine Hardness Maintenance / Hardness Surveillance (HM/HS) on all four HEMP shelters at Camp H.M. Smith and all Hardened topology that connects them during three annual on-site inspections. Triannual, 3 times per year, depot level corrosion control support is needed to maintain the Hardness Critical Assemblies (HCA's); in conjunction with all HM services described herein, Hardness Surveillance services following systematic procedures is needed on all High Altitude Electromagnetic Pulse (HEMP) hardened shelters. Maintenance requirements for HEMP Shelters is provided in Attachment 1502000-06. Perform systematic Hardness Surveillance (HS) on all four systems in order to ensure performance, and lower long term maintenance costs through effective and systematic failure prediction methods such as (but is not limited to) Low Level Characterization Testing (LLCT) by utilizing Shielding Effectiveness (SE) techniques and analysis during each of two annual service cycles.	

1502000 – Facility Investment				
Spec Item	Title	Performance Objective	Related Information	Performance Standard
			At the conclusion of each triannual, 3 times per year, on-site service, the contractor shall verbally report to the Program Office (USINDOPACOM/1642) the results of the inspection, the vendor's recommendations and the actions taken. A written record of the report will be provided to the Program Office within ten workdays after delivery of the verbal report. Formal records of all findings and corrective actions taken for each maintenance cycle will be maintained by the contractor for the duration of the contract (to include any/all executed option years.) This master accounting of all actions taken over the life of the contract will be provided to PACOM J642 within thirty days after the contract formally ends. The master accounting will be inclusive of all HM/HS findings and service to include: digital media, pre and post-test SE findings and results, recommendations, and refurbishment and service cycle actions. • Records shall consist of individual actions taken to refurbish or service each HCA • Records shall be inclusive of all surveillance activity In accordance with the Deliverables section, the Contractor shall be responsible to submit a HEMP Shelter Maintenance Report. The HEMP Shelter Maintenance Report shall include a detailed HM/HS record for all services performed on the HEMP structures consistent with recommended certification requirements under certification expectations for all HEMP activities performed on site.	

1502000 – Facility Investment				
Spec Item	Title	Performance Objective	Related Information	Performance Standard
			The reports are to be considered Government property and shall be delivered to the Government in accordance with Attachments 1502000-06 and Deliverables. All technical materials, documents, drawings, manuals, briefings, etc. produced by the contractor shall remain the property of the Government. Documents, drawings, manuals, briefings, etc., produced with non-government funding shall not be used unless approved by the Government. Videos will fall under the provisions of DFARS 252.227-7020 "Rights in Special Works" applies to all digital recording materials produced. The contractor shall install all HEMP consumable items and provide test equipment and engineering support in accordance with MIL-STD-1 88-125 protocols. The contractor shall perform a LLCT baseline test and acceptance test for all HEMP maintenance actions. SE test measurements will be made under LLCT methods. The contractor shall be responsible for providing preparation and coating specifications for all corrosion control efforts on site to ensure proper adhesion of all coatings applied to support HM services as required. The contractor shall be responsible for providing all equipment, material, shipping, and labor to complete the task, testing, and record keeping of all actions.	

1502000 – Facility Investment				
Spec Item	Title	Performance Objective	Related Information	Performance Standard
			The Contractor shall be responsible for the removal and disposal of all waste materials to include HAZMAT/HAZWASTE in accordance with all site and local environmental and safety regulations upon project completion. The contractor shall provide a work schedule to be briefed to program office (USINDOPACOM/J64) thirty days after contract award for review. The contractor shall participate in quarterly program management reviews (PMRs), technical reviews and technical interchange meetings (TIMs) with government cognizant offices on technical matters. Such offices include (but is not limited to) PACOM, STRATCOM, AFSPC, SMC/OSL, DISA, DTRA etc. The contractor shall not wait until a coordinated TIM to provide the program office (USINDOPACOM/J64) with timely information on logistical concerns or issues. There will be a kick off meeting within ten days from contract award at the discretion of the program office (USINDOPACOM/J64). All Sub-Contractors and affected government personnel will be in attendance, or available via teleconference in order to effectively manage the contract. The contractor will support the program office (USINDOPACOM/J64), as needed for technical interchange meetings (TIM's) and management review meetings in order to effectively communicate the progress of the program. The contractor will support task meetings, i.e. kickoff meetings,

			approval prior to purchase and installation. In the event a panel or string of panels must be omitted in order to make a system operational, The Contractor shall alert the COR and KO prior to the deletion/omission of panels from the system. Where performance of maintenance or associated repairs requires testing or recertification of PV systems, refer to the Spec Item below for inspection, testing, and certification of PV Systems.	
3.2.7	Reverse Osmosis Systems	The Contractor shall perform maintenance on the reverse osmosis systems to ensure proper operation, to minimize breakdowns, and to maximize useful life.	The Reverse Osmosis Systems inventory is provided in Attachment 1502000-10. Recommended Reverse Osmosis System Preventive Maintenance requirements are provided in Attachment 1502000-11. The Contractor shall maintain the Reverse Osmosis systems in accordance with manufacturer's recommended procedures and OEM standards. The Contractor shall develop, implement, and execute a Preventive Maintenance Program to maintain and repair Reverse Osmosis systems. The contractor shall submit a PM plan in accordance with Deliverables. The Contractor shall maintain all maintenance, repair, alteration data, and warranty records in the technical library in accordance with Annex 2. The Contractor shall provide all necessary test instruments, equipment, and tools required to perform maintenance and repair. Notification of repair work exceeding the incidental repairs limit shall be submitted to the KO within two hours of identification.	Maintenance is performed in accordance with Contractor's PM program and work schedule.

1502000 – Facility Investment				
Spec Item	Title	Performance Objective	Related Information	Performance Standard
			A non-recurring work task order may be issued for repairs exceeding the incidental repairs limit. The Contractor shall not use breakdown maintenance as part of the PM program. The PM program shall provide an economical approach to the manufacturers' recommended procedures, OEM standards, maintenance required to satisfy equipment warranties, and keep installed equipment and systems in normal working condition. Excessive or repeated system or equipment breakdowns or deficiencies may indicate the need to adjust or modify the Contractor's PM program. These changes will be made at no additional cost to the Government. The Contractor shall submit a monthly PM work schedule per Deliverables.	
3.2.8	Interior and Exterior Lighting Systems	The Contractor shall perform maintenance on Interior and Exterior Lighting Systems to ensure proper operation, to minimize breakdowns, and to maximize useful life.	Description of Interior and Exterior Lighting systems is provided in Attachment 1502000-12. The Contractor shall develop and implement a program to inspect, clean, re-lamp, ballast and starter renewal, and make all necessary repairs to interior and exterior lighting systems. Light fixtures with dim, flickering, or burnt out lamps shall be corrected or replaced within five working days of Contractor finding the deficiency. If a problem with a light fixture is determined by the Contractor to be external to the scope of work, the Contractor shall notify the Contracting Officer of the problem	Maintenance is performed in accordance with Contractor's PM program and work schedule.

1502000 – Facility Investment				
Spec Item	Title	Performance Objective	Related Information	Performance Standard
			within five working days of Contractor finding the deficiency. Contractor's PM Program shall include the cleaning of fixtures (i.e. cleaning the diffusers and reflectors). Contractor shall validate that light timers are set properly and operational. Excluded from the recurring portion of work is servicing of emergency lights and replacement of light fixtures, diffusers and reflectors. Diffusers or reflectors that are missing or broken beyond repair, and light fixtures discovered to have "tie wraps", duct tape, or other non-standard securing mechanisms, shall be reported to the Government for corrective action. Historical Data from FEDMall records is provided in attachment 1502000-03.	
3.2.9	Uninterruptible Power Supply (UPS)	The Contractor shall performance maintenance on UPS systems and associated equipment to ensure safe, reliable, uninterrupted service.	Description of the UPS systems is provided in Attachment 1502000-13. Recommended UPS Systems Preventive Maintenance requirements are provided in Attachment 1502000-14. The Contractor shall maintain, inspect, and test UPS systems in accordance with manufacturers' recommended procedures and OEM standards. The maintenance program shall provide an economical approach to manufacturers' recommended procedures, OEM standards and maintenance required to satisfy equipment warranties and keep UPS systems in normal working condition. The Contractor shall ensure the UPS systems are free of dust and moisture.	Maintenance is performed in accordance with Contractor's PM program and work schedule. PM is performed in accordance with manufacturers' recommended procedures and OEM standards.

Spec Item	Title	Performance Objective	Related Information	Performance Standard
			The Contractor shall provide files for Government review and inspection when requested.	
3.3.2	HEMP Shelter Triannual Inspection	The Contractor shall provide HEMP Shelter triannual inspection services to ensure they are safe, fully functional, and operational.	Triannual service/inspection requirements for HEMP Shelters are listed in Attachment 1502000-06. The Contractor shall include Triannual service/inspection(s) on HEMP Shelters performed in the HEMP Shelter Maintenance Report. The HEMP Shelter Maintenance Report shall be delivered to the KO in accordance with Deliverables	Inspection of HEMP Shelters performed and completed in accordance with the Inspection, Testing, and Certification Program and Schedule.
3.3.3	Photovoltaic Systems Testing and Inspection	The Contractor shall inspect, test, and clean the Photovoltaic systems in accordance with industry standards, OEM requirements and procedures to ensure they are safe, fully functional, and operational.	Description of the Photovoltaic Systems are provided in Attachment 1502000-08. Inspect the entire system for deficiencies and issues that affect performance. Clean the system in accordance with OEM requirements and procedures. In accordance with Attachment 1502000-09, the Contractor shall clean the panels removing dust, dirt, bird droppings, and other debris that may affect panel performance. The Contractor shall perform tests, inspections, and associated operations to the entire system in accordance with OEM requirements and procedures for operational performance. Notify the PAR/COR when issues that affect performance are discovered within the system.	Testing, inspection, and cleanings of photovoltaic systems are performed and completed in accordance with the Contractor's program and schedule.
3.4	Other Recurring Services Program	The Contractor shall develop and implement another recurring services program for facilities,	Other recurring services include, but not limited to uninterruptible power supply (UPS) systems.	Services are performed in accordance with manufacturers' recommended

1502000 – Facility Investment				
Spec Item	Title	Performance Objective	Related Information	Performance Standard
		ground structures, personal property equipment and installed equipment and systems to ensure proper operation, to minimize breakdowns, and to maximize useful life.	The Contractor shall submit an Other Recurring Services Program Summary Report per Section F.	procedures and OEM standards.
3.4.1	Uninterruptible Power Supply (UPS)	The Contractor shall perform corrective maintenance on UPS systems and associated equipment to ensure safe, reliable, uninterrupted service	Description of the UPS systems is provided in Attachment 1502000-13. The Contractor shall provide inspection and make all necessary repairs to the electronic portion of the UPS or “Power Module” systems as needed during the contract period. The Contractor shall provide remedial maintenance and shall include, but is expressly limited to, maintenance to the power module, travel expenses, and all necessary parts, replacement, adjustments, and repairs. Troubleshoot repair services shall be performed by factory trained and authorized service technicians with access to proprietary software and tools. Replacement parts shall be OEM from the factory. Corrective Maintenance coverage for the UPS and/or “Power Module” shall include ancillary devices directly connected to the covered equipment. Covered ancillary devices within the UPS and or Power Module shall include the electronic control portion of the UPS designed and built for metering, monitoring, and controls of the UPS system. Items covered include logic boards, power supplies, relays, control circuitry, HMI displays and all other components necessary to return the UPS system to fully functional normal operation.	Services are performed in accordance with manufacturers’ recommended procedures and OEM standards.

1502000 – Facility Investment				
Spec Item	Title	Performance Objective	Related Information	Performance Standard
			The Contractor shall also be responsible for after hours services (7x24) with parts and labor. Contractor shall respond within 8 hours

Spec Item	Title	Performance Objective	Related Information	Performance Standard
4	Non-Recurring Work	Non-recurring work may be ordered utilizing DoD FEDMALL or on a task order in accordance with FAR Clause 52.216-18 ORDERING. The order will specify the exact locations and types of work to be accomplished. The period of performance will be specified in each order.	Refer to non-recurring work ELINs for task listings, descriptions, and related requirements. All periods of performance are measured from issue date of order to acceptance of the work. Performance Standards for Non-recurring work will be the same as those in Spec Item 3 where applicable. For all Task Orders, once work is completed, the contractor shall submit a Final Inspection Form per Deliverables for acceptance. The Final Inspection Form can be found in Attachment 0200000-05

Instructions: 1. The purpose of this requirement is to report total number of contractor hours worked on this contract during the performance period. 2. Information should include sub-contractor labor hours if applicable. 3. See https://www.sam.gov for instructions for data entry. Call the help desk at the web site for additional help if necessary. 4. 4. Entry for the performance year must be completed by 31 Oct annually.

Deliverables Form Preparation Instructions
Deliverable Title: 0200000/2.8.1 – Employee Listing
Form Attachment No.: N/A
Government Acceptance Required: ☐ Yes ☒ No
Media: ☐ Hard Copy ☒ Electronic ☐ Direct System Input
Instructions: 1. The report shall be prepared using Microsoft Office® software. 2. The report shall provide a current, up-to-date listing of all Contractor employees and their security clearances. 3. The report shall include, but is not limited to: a. Employee Names b. Position Titles c. Annex Assignment d. Level of security clearance (including all pending clearances)

Deliverables Form Preparation Instructions
Deliverable Title: 0200000/2.8.8 – Access to Controlled Unclassified Information – OF-306 Declaration for Federal Employment
Form Attachment No.: N/A
Government Acceptance Required: ☐ Yes ☒ No
Media: ☐ Hard Copy ☒ Electronic ☐ Direct System Input
Instructions: 1. The report shall be prepared using Microsoft Office® software. 2. The Contractor shall submit an OF-306 Declaration for Federal Employment to the Security Manager.

Deliverables Form Preparation Instructions
Deliverable Title: 0200000/2.9.2 – Accident Prevention Plan (APP)
Form Attachment No.: N/A
Government Acceptance Required: <u> X </u> Yes <u> </u> No
Media: <u> </u> Hard Copy <u> X </u> Electronic <u> </u> Direct System Input
Instructions: 1. The report shall be prepared using Microsoft Office® software. 2. The APP shall be prepared by the Contractor’s SSHO and shall be followed by all Contractor employees, subcontractors, and vendors at each service site. The APP shall follow the format and cover all topics as delineated in Appendix A of EM-385-1-1. The APP shall incorporate Activity Hazard Analyses (AHAs) and Situation Specific Safety Plans that are relevant to the site specific hazards and controls for each activity and type of work that may be encountered in the performance of this contract.

Deliverables Form Preparation Instructions
Deliverable Title: 0200000/2.9.3 – Activity Hazard Analysis (AHA)
Form Attachment No.: N/A
Government Acceptance Required: ☒ Yes ☐ No
Media: ☐ Hard Copy ☒ Electronic ☐ Direct System Input
Instructions: 1. The report shall be prepared using Microsoft Office® software. 2. The purpose of this requirement is to provide plans, actions or measures to manage hazards. 3. AHA shall follow format of Figure 1.2 of EM 385-1-1 and shall explain the following: • the steps of the service process; • identify potential hazards that exist as a result of the Contractor’s service process within the environment; • measures or plans of actions to safely remove potential hazards away from people in and around the service process and environment; • specific materials and equipment necessary to safely remove potential hazards away from people in and around the service process and environment; • inspection requirements to assure service activity is safe; and • training of service personnel to be aware of potential hazards and measures or plans of actions to be used to remove hazards from service environment. When plans of actions or measures are selected to manage hazards away from service site, the SSHO will coordinate such plans with competent person. • for combination recurring and non-recurring contracts: “the Contractor will submit an activity hazard analysis on task orders whenever the service environment is different from the recurring services.” • for construction or maintenance task orders placed on non-recurring portion of contract: “the Contractor will submit a separate activity hazard analysis for each task order.”

Deliverables Form Preparation Instructions
Deliverable Title: 0200000/2.9.4.7 – Control of Hazardous Energy (lockout/tagout)
Form Attachment No.: N/A
Government Acceptance Required: <u>X</u> Yes ___ No
Media: ___ Hard Copy <u>X</u> Electronic ___ Direct System Input
Instructions: 1. The report shall be prepared using Microsoft Office® software. 2. These plans shall be submitted with the APP and shall be updated as situations change.

Deliverables Form Preparation Instructions
Deliverable Title: 0200000/2.9.6 – Contractor Incident Report System
Form Attachment No.: 0200000-05
Government Acceptance Required: ☐ Yes ☒ No
Media: ☐ Hard Copy ☒ Electronic ☐ Direct System Input
Instructions: 1. The report shall be prepared using Microsoft Office® software. 2. The purpose of this requirement is to document all damages, accidents, mishaps, and near misses that occur on or related to Government property. 3. At a minimum, the report shall include the following: a. General information (e.g., accident classification, accident involving) b. Personal information (e.g., Name of person involved, etc.) c. Witness information (e.g., Name of witness involved, etc.) d. Contract information (e.g., Name of contract, etc.) e. Accident description (e.g., Date/Time/Location of accident, details of accident, action taken to prevent re-occurrence, etc.) f. Injury/Illness/Fatality information (e.g., Severity of injury/illness, etc.) g. Estimated damage cost (for property, material or supply damage)

Deliverables Form Preparation Instructions
Deliverable Title: 0200000/2.9.6 – WHE Accident Report (Crane and Rigging Gear)
Form Attachment No.: 0200000-05
Government Acceptance Required: <u> X </u> Yes <u> </u> No
Media: <u> </u> Hard Copy <u> X </u> Electronic <u> </u> Direct System Input
Instructions: 1. The report shall be prepared using Microsoft Office® software. 2. The purpose of this requirement is to notify the Government of any weight handling equipment accidents (including rigging gear accidents) 3. The Contractor shall conduct an accident investigation to establish the root cause(s) of the accident and comply with additional requirements and procedures for accidents in accordance with NAVFAC P-307, Section 12. 4. No crane operations are allowed to proceed until cause is determined and corrective actions have been implemented to the satisfaction of the Contracting Officer.

Deliverables Form Preparation Instructions
Deliverable Title: 0200000/2.9.6 – Crane and Rigging Gear Near Miss Report
Form Attachment No.: N/A
Government Acceptance Required: ☐ Yes ☒ No
Media: ☐ Hard Copy ☒ Electronic ☐ Direct System Input
Instructions: 1. The report shall be prepared using Microsoft Office® software. 2. The purpose of this requirement is to notify the Government of any near misses involving crane and rigging gear through submission of a Crane and Rigging Gear Near Miss Report. 3. The Contractor shall complete the NAVFAC Contractor Incident Reporting System and electronically submit via the NAVFAC Enterprise Safety Applications Management System (ESAMS) 4. The Contractor shall also be responsible for verbally reporting the incident(s) to the Contracting Officer

Deliverables Form Preparation Instructions
Deliverable Title: 0200000/2.9.8 – Monthly On-Site Labor Report
Form Attachment No.: N/A
Government Acceptance Required: ☐ Yes ☒ No
Media: ☐ Hard Copy ☒ Electronic ☐ Direct System Input
Instructions: 1. The report shall be prepared using Microsoft Office® software. 2. The purpose of this requirement is to report a compilation of employee-hours worked each month for all site workers, both prime and subcontractor.

Deliverables Form Preparation Instructions
Deliverable Title: 0200000/2.9.9 – OSHA Citations and Violations
Form Attachment No.: N/A
Government Acceptance Required: ☐ Yes ☒ No
Media: ☐ Hard Copy ☒ Electronic ☐ Direct System Input
Instructions: 1. The report shall be prepared using Microsoft Office® software. 2. The purpose of this requirement is to notify the Government of all OSHA citations and violations and provide corrective action.

Deliverables Form Preparation Instructions
Deliverable Title: 0200000/2.9.10 – Contractor Safety Inspection and Monitoring Report
Form Attachment No.: N/A
Government Acceptance Required: ☒ Yes ☐ No
Media: ☐ Hard Copy ☒ Electronic ☐ Direct System Input
Instructions: 1. The report shall be prepared using Microsoft Office® software. 2. The report shall include the following: a. Narrative of significant events b. Tabulated summary and results of the safety inspection and monitoring events performed c. Inspection-driven corrective actions taken and results attained d. Management process adjustments during the previous month

Deliverables Form Preparation Instructions
Deliverable Title: 0200000/2.9.11 – Safety Certification
Form Attachment No.: N/A
Government Acceptance Required: ☐ Yes ☒ No
Media: ☐ Hard Copy ☒ Electronic ☐ Direct System Input
Instructions: 1. The report shall be prepared using Microsoft Office® software. 2. The purpose of this requirement is to provide the Government with copies of all the required Federal, state, county, city and industry safety related Safety Certifications for work performed under this contract. These certifications shall be kept up to date by the Contractor. The Contractor shall submit new versions of certifications to the KO as the old certifications expire. No work, that requires a certification, shall start without a valid and approved certification.

Deliverables Form Preparation Instructions
Deliverable Title: 0200000/2.10 – Environmental Management and Sustainability Goals and Policy Measurement Information
Form Attachment No.: N/A
Government Acceptance Required: ☐ Yes ☒ No
Media: ☐ Hard Copy ☒ Electronic ☐ Direct System Input
Instructions: 1. The report shall be prepared using Microsoft Office® software. 2. The purpose of this requirement is to provide the Government with EMS Goals and Policy Measurement Information.

Deliverables Form Preparation Instructions	
Deliverable Title: 0200000/2.10.1.1 – Water Conservation Plan	
Form Attachment No.: N/A	
Government Acceptance Required: ☐ Yes ☒ No	
Media: ☐ Hard Copy ☒ Electronic ☐ Direct System Input	
Instructions: 1. The report shall be prepared using Microsoft Office® software. 2. The Contractor shall develop and submit a Water Conservation Plan that shall be in effect year round with emphasis on the rainy season and other times of the year during heavy rain. The Water Conservation Plan shall be signed and dated by the Project Manager and Quality Control Manager. At a minimum, the plan shall include the following: a. Procedures for ensuring water sprinklers are shut off during heavy rains. b. Procedures for obtaining current information on weather conditions. c. Procedures for notifying the Government prior to shutting off and turning on water sprinklers. d. Procedures for maintaining all existing rain control devices during the entire contract period. e. Procedures for periodic activation of all irrigation systems to ensure proper working condition of heads and proper spray patters and that no water sprays onto paved areas, roads or buildings. f. Identification of areas that may require watering more than three times per week, exceeding Board of Water Supply guidance, in order to maintain the health/appearance of the grounds. g. Identification of lawn areas that may need dethatching/aeration to improve the health of the lawn and reduce future watering requirements. h. Identification of areas currently requiring manual watered (no irrigation system is present or an in-ground manual irrigation system is present with no irrigation controller). i. Description of how all contract performance standards will be met while complying with the Water Conservation Plan.	

Deliverables Form Preparation Instructions
Deliverable Title: 0200000/2.10.2 – Environmental Protection Plan
Form Attachment No.: N/A
Government Acceptance Required: ☐ Yes ☒ No
Media: ☐ Hard Copy ☒ Electronic ☐ Direct System Input
Instructions: 1. The report shall be prepared using Microsoft Office® software. 2. The Contractor shall develop, submit, and implement an Environmental Protection Plan.

Deliverables Form Preparation Instructions
Deliverable Title: 0200000/2.10.2.1 – Sampling, Testing, and Laboratory Services
Form Attachment No.: N/A
Government Acceptance Required: ☐ Yes ☒ No
Media: ☐ Hard Copy ☒ Electronic ☐ Direct System Input
Instructions: 1. The report shall be prepared using Microsoft Office® software. 2. The Contractor shall develop and submit a sampling plan for each sampling event. 3. The plan shall include the following: a. Summary of what will be sampled b. The sampling equipment expected to be used c. Number and location of samples expected

Deliverables Form Preparation Instructions
Deliverable Title: 0200000/2.10.2.3 – Solid Waste Management Report and Recycling Weight Ticket Receipts
Form Attachment No.: 0200000-05
Government Acceptance Required: ____ Yes <u>X</u> No
Media: ____ Hard Copy <u>X</u> Electronic ____ Direct System Input
Instructions: 1. The report shall be prepared using Microsoft Office® software. 2. The Contractor shall submit a Solid Waste Management Report within 15 calendar days after the end of each calendar year and at the termination of the contract. 3. The Contract shall submit weight ticket receipts once every 3 months.

Deliverables Form Preparation Instructions
Deliverable Title: 0200000/2.10.2.5 – Waste Stream Determination
Form Attachment No.: N/A
Government Acceptance Required: ☐ Yes ☒ No
Media: ☐ Hard Copy ☒ Electronic ☐ Direct System Input
Instructions: 1. The report shall be prepared using Microsoft Office® software. 2. The purpose of this requirement is to provide the Government with a waste stream report to indicate regulated waste disposal for this contract.

Deliverables Form Preparation Instructions
Deliverable Title: 0200000/2.10.2.7 – Spill Prevention, Containment, and Clean-up Report
Form Attachment No.: N/A
Government Acceptance Required: ☐ Yes ☒ No
Media: ☐ Hard Copy ☒ Electronic ☐ Direct System Input
Instructions: 1. The report shall be prepared using Microsoft Office® software. 2. The Contractor shall prevent, contain, clean up, and report all spills on Government property caused by the Contractor, in a manner that complies with applicable Federal, state, and local laws and regulations and with the Installation Hazardous Waste Management Plans; and Spill Prevention, Control, and Countermeasure Plans provided in Attachment 0200000-06 at no additional cost to the Government.

Deliverables Form Preparation Instructions
Deliverable Title: 0200000/2.10.2.8 – Emergency Planning and Community Right-To-Know Act (EPCRA) Report and Hazardous Material Inventory Log
Form Attachment No.: 0200000-05
Government Acceptance Required: ☐ Yes ☒ No
Media: ☐ Hard Copy ☒ Electronic ☐ Direct System Input
Instructions: 1. The purpose of this requirement is to notify Government of the types of hazardous material used throughout this contract. 2. Approval for this log is not required. However, approval to use hazardous material on government property is and Contractor shall follow requirements of spec item 2.10.2.4. 3. Log shall be submitted to the KO with copy to the PAR annually and at the end of the contract.

Deliverables Form Preparation Instructions
Deliverable Title: 0200000/2.10.2.12 – Asbestos Containing Material (ACM) Report
Form Attachment No.: N/A
Government Acceptance Required: ☐ Yes ☒ No
Media: ☐ Hard Copy ☒ Electronic ☐ Direct System Input
Instructions: 1. The report shall be prepared using Microsoft Office® software. 2. The purpose of this requirement is to provide the Government with written ACM notification within 24 hours. 3. The Contractor shall also be responsible for verbally notifying the Contracting Officer within one hour of encounter.

Deliverables Form Preparation Instructions
Deliverable Title: 0200000/2.10.2.13 – Hazardous Air Pollutants (HAPs)
Form Attachment No.: 0200000-05
Government Acceptance Required: ☐ Yes ☒ No
Media: ☐ Hard Copy ☒ Electronic ☐ Direct System Input
Instructions: 1. The report shall be prepared using Microsoft Office® software. 2. The Contractor shall track all Hazardous Air Pollutants (HAPs) used in contract maintenance and repair operations.

Deliverables Form Preparation Instructions
Deliverable Title: 0200000/2.10.3 – Sustainable Procurement and Practices
Form Attachment No.: N/A
Government Acceptance Required: ☐ Yes ☒ No
Media: ☐ Hard Copy ☒ Electronic ☐ Direct System Input
Instructions: 1. The report shall be prepared using Microsoft Office® software. 2. The purpose of this requirement is to provide the Government with a plan that will identify how the Contractor will comply with all applicable Federal, state and local laws and regulation, including Executive Order 13423, Installation Water Conservation Programs and energy reduction requirements. The plan shall specifically address the following components: a. Recycled contents products b. Energy/Water efficiency c. Alternate Fuels and Alternate Fuel Vehicles d. Bio-Based Products e. Non-Ozone Depleting Products f. Environmental Preferred Products and Services g. Low/Non-Toxic and Hazardous Materials

Deliverables Form Preparation Instructions
Deliverable Title: 0200000/2.10.3.2 – Use of Recovered Materials
Form Attachment No.: N/A
Government Acceptance Required: ☐ Yes ☒ No
Media: ☐ Hard Copy ☒ Electronic ☐ Direct System Input
Instructions: 1. The report shall be prepared using Microsoft Office® software. 2. The Contractor shall make recommendations and submit a Recovered Material Certification when a product containing recovered materials is equal to or better than the original and could be used for this contract.

Deliverables Form Preparation Instructions
Deliverable Title: 0200000/2.11 – Mission Critical/Mission Essential Personnel
Form Attachment No.: N/A
Government Acceptance Required: ☐ Yes ☒ No
Media: ☐ Hard Copy ☒ Electronic ☐ Direct System Input
Instructions: 1. The report shall be prepared using Microsoft Office® software. 2. The purpose of this requirement is to provide the Government with the contractor's Mission Essential Contractor Services Plan and a list of their Mission Critical/Mission Essential Personnel.

Deliverables Form Preparation Instructions
Deliverable Title: 0200000/2.12 – Technical Library
Form Attachment No.: N/A
Government Acceptance Required: ☐ Yes ☒ No
Media: ☐ Hard Copy ☒ Electronic ☐ Direct System Input
Instructions: 1. The report shall be prepared using Microsoft Office® software. 2. The purpose of this requirement is to work with the Government to establish technical library.

Deliverables Form Preparation Instructions
Deliverable Title: 0200000/2.14.1 – Recurring Work Preparation of Proposals
Form Attachment No.: N/A
Government Acceptance Required: ☐ Yes ☒ No
Media: ☐ Hard Copy ☒ Electronic ☐ Direct System Input
Instructions: 1. The report shall be prepared using Microsoft Office® software. 2. The purpose of this requirement is to provide the Government with recurring work proposals. 3. The proposals shall include detailed scopes of work and detailed estimates for modification.

Deliverables Form Preparation Instructions
Deliverable Title: 0200000/2.14.2 – Notification to the Government for Work Above the Recurring Limitations
Form Attachment No.: N/A
Government Acceptance Required: ☐ Yes ☒ No
Media: ☐ Hard Copy ☒ Electronic ☐ Direct System Input
Instructions: 1. The report shall be prepared using Microsoft Office® software. 2. The purpose of this requirement is to provide notification when work is expected to exceed the Recurring Work limits.

Deliverables Form Preparation Instructions
Deliverable Title: 0200000/2.15.1.1 – FEDMALL Quantities and Report Total
Form Attachment No.: N/A
Government Acceptance Required: ☐ Yes ☒ No
Media: ☐ Hard Copy ☒ Electronic ☐ Direct System Input
Instructions: 1. The report shall be prepared using Microsoft Office® software. 1. The report shall be due to the KO by the fifth day of the following month. 2. The Contractor shall track quantities and report total ordered in Fedmall.

Deliverables Form Preparation Instructions
Deliverable Title: 0200000/2.15.2.1 – Non-Recurring Work Preparation of Proposals
Form Attachment No.: N/A
Government Acceptance Required: ☒ Yes ___ No
Media: ___ Hard Copy ☒ Electronic ___ Direct System Input
Instructions: 1. The report shall be prepared using Microsoft Office® software. 2. The proposal shall include: a. A complete list of all tasks necessary to perform the required scope of work, b. The number of direct labor hours to perform each task and c. The projected quantity and costs of materials and equipment to perform the required scope of work.

Deliverables Form Preparation Instructions
Deliverable Title: 0200000/2.15.3.1 Field Change Proposal Form
Form Attachment No.: N/A
Government Acceptance Required: ☐ Yes ☒ No
Media: ☐ Hard Copy ☒ Electronic ☐ Direct System Input
Instructions: 1) Submit deliverables in accepted format, See Annex 0200000 Specification Item 2.6.6 2) The report shall be prepared using Microsoft Office software. 3) On Occurrence, As Specified

Deliverables Form Preparation Instructions
Deliverable Title: 1502000/2.2.1 – Certification, Training, and Licenses
Form Attachment No.: N/A
Government Acceptance Required: ☒ Yes ___ No
Media: ___ Hard Copy ☒ Electronic ___ Direct System Input
Instructions: 1) Submit deliverables in accepted format, See Annex 0200000 Specification Item 2.6.6 2) The report shall be prepared using Microsoft Office software. 3) Submit to the KO as specified

Deliverables Form Preparation Instructions
Deliverable Title: 1502000/2.5.1 – Facility Historical Records
Form Attachment No.: N/A
Government Acceptance Required: ☐ Yes ☒ No
Media: ☐ Hard Copy ☒ Electronic ☐ Direct System Input
Instructions: 1) Submit deliverables in accepted format, See Annex 0200000 Specification Item 2.6.6 2) The report shall be prepared using Microsoft Office software. 3) Submit to the KO as specified

Attachment 0200000-01
Definitions and Acronyms

Definition	Description
Assessment	A general term referring to either a survey or inspection of a facility to determine condition.
Asset	A general term used to refer to an item, such as a component, system, building or facility, which is managed by an automated data management program.
Competent Person	A person who has the professional experience and training necessary to identify existing and predictable hazards at a work or service environment, and who has the authority to take prompt and corrective action to eliminate or remove dangers from the environment. One who can identify existing and predictable hazards in the working environment or working conditions that are dangerous to personnel and who has authorization to take prompt corrective measures to eliminate them.
Component Inventory Management Unit (CIMU)	An organization of like-kind real property into manageable maintenance units. CIMU is a building component, group of components or component assemblies, serving a specific purpose in a facility that can be expected to follow a common and predictable lifecycle behavior. This class of non-equipment will include items such as exterior walls, exterior windows, interior finish, and roofs. This class of equipment will include items such as fan coil units, air handling units, lighting, and water closets. CIMUs can include one or more items of installed equipment typically subject to routine scheduled maintenance.
Confined Work Space	A space that is large enough and so configured that a person may bodily enter a space (such as in tanks, vessels, silos, storage bins, hoppers, vaults, pits, and like spaces where there is limited means of entry) and is hindered or restricted from escaping during an emergency.
Construction Equipment	Construction equipment refers to specialized heavy machinery that covers one industry and is specifically designed for executing construction work. Construction equipment requirements shall include a list of equipment establishing the size, quality, number of units, and unit prices. Construction equipment prices provided by the Contractor shall be the lowest price available considering the availability of equipment and the time constraints of the job. The direct equipment price shall be adjusted by all discounts and rebates that accrue to the Contractor. All indirect cost associated with construction equipment, such as: the Contractor's hourly composite trade wage, adjusted to allow for workforce productivity; sub-contractor cost, costs for pre-expended bin materials, shipping and handling, union agreements, crew sizes, hand tools, universal equipment (excluding construction equipment), mobilization, demobilization, payroll burdens and fringes, overtime, job (field) overhead, clerical support, supervision, inspection, fees, taxes, licenses, permits, and insurance, general and administrative (home office) overhead, profit, and all other associated markups shall not be included in the construction equipment price since the cost for these items were included in the labor hour unit price bid. Additionally, time for job preparation, safety standby personnel, and similar indirect labor elements shall not be included.
Contracting Officer (KO)	That individual with the authority to enter into, administer, and/or terminate contracts and make related determinations and findings. The term includes certain authorized representatives of the Contracting Officer acting within the limits of their authority as delegated by the Contracting Officer.
Contracting Officer's Representative (COR)	The individual appointed by the KO responsible for monitoring the Contractor's technical compliance and progress, relative to assigned contract(s)/orders(s), based on the contract requirements specified in the PWS and in accordance with the PAP. The COR performs a variety of contract administration duties that includes oversight of PA, documenting and rating Contractor performance, reviewing invoices, and acceptance of work. Assignment as a COR is a collateral duty typically performed by the FSCM or SPAR.

Attachment 0200000-01
Definitions and Acronyms

Definition	Description
Contractor	That entity or its representative responsible for the delivery of the services or materials specified in this contract, as designated by contract award. The term Contractor as used herein refers to both the prime Contractor and any subcontractors. The prime Contractor shall insure that subcontractors comply with the provision of this contract.
Contractor Representative	That individual appointed by the Contractor, either orally or in writing, who has been assigned responsibility for executing the requirements of this contract.
Crane, Category 1	Portal cranes, Hammerhead cranes, Locomotive cranes, Derricks, Floating cranes (YD), Tower cranes, Container cranes, Mobile cranes (except those indicated as category 4), including truck, cruiser, crawler, warehouse/industrial cranes, and cranes used for dragline, pile driving, clamshell, magnet, bucket work, and Aircraft crash cranes.
Crane, Category 2 & 3	Cranes with rated capacities of 20,000 pounds or greater are category 2. Examples are Overhead traveling cranes, Gantry cranes (rail mounted), Wall cranes, Jib cranes, Pillar cranes, Pillar jib cranes, Monorails and associated hoists, Fixed hoists including chain falls. Pedestal mounted commercial boom assemblies (fixed length, telescoping, and articulating types) attached to stake trucks, trailers, flatbeds, or railcars, or stationary mounted to piers, etc., with OEM rated capacities less than 2,000 pounds.
Crane, Category 4	Commercial truck mounted cranes, Truck mounted articulating boom cranes, Pedestal mounted commercial boom assemblies (fixed length, telescoping, and articulating types) attached to stake trucks, trailers, flatbeds, or railcars, or stationary mounted to piers, etc., with OEM rated capacities of 2,000 pounds and greater. Commercial truck mounted cranes and truck mounted articulating boom cranes with OEM capacities of 2,000 pounds and greater require a licensed operator even if the cranes are down rated below 2,000 pounds capacity for administrative purposes.
Direct Material Costs	The actual vendor invoice charges for materials used for performance of work under this contract. Direct material costs shall include sales tax and transportation charges when such charges are included on the invoice by the vendor, as well as any discounts allowed for prompt payment and discounts or rebates for core value or salvage value that accrue to the Contractor. When questions arise concerning the cost of direct materials, direct material costs will be based on the lowest of quotes provided by the Contractor from at least three different commercial vendors for the direct material cost. The Government retains the right to obtain additional quotes in questionable situations. The lowest price will be used. All other cost such as sub-contractor cost, costs for pre-expended bin materials, shipping and handling, union agreements, crew sizes, hand tools, universal equipment, mobilization, demobilization, time for job preparation, safety standby personnel, payroll burdens and fringes, overtime, job (field) overhead, clerical support, supervision, inspection, fees, taxes, licenses, permits, and insurance, general and administrative (home office) overhead, profit, and all other associated markups shall not be included in the direct material price since the cost for these items are included in the UPL Hour unit price bid.
Electronic Operation And Maintenance And Support Information (eOMSI)	A set of consultant-prepared data and document files that contain detailed, as-built technical information that describes the efficient, economical and safe operation, maintenance and repair of a facility, plant, equipment or system throughout its life cycle. Generally, it is prepared during construction and submitted upon completion of a new facility or major facility upgrade. eOMSI's typically include asset information, staffing and budgeting information, supply support including critical spare parts, operating procedures, troubleshooting and diagnostic guides, extended warranty data, maintenance task frequencies and documentation, technical data, repair procedures and manufacturer's product data. eOMSI data and document files are provided in electronic formats.

Attachment 0200000-01
Definitions and Acronyms

Definition	Description
Equipment	Tangible asset that is functionally complete for its intended purpose, durable, and non-expendable.
Equipment, Collateral	Encompasses built-in and large substantially affixed equipment/property that is normally acquired and installed as part of a facility project.
Equipment, Installed	Encompasses building-type equipment, built-in equipment, and large, substantially affixed equipment/property, and is normally acquired and installed as part of a facility project. Installed equipment is normally required to make a facility useful and operable. Removing such equipment would impair the usefulness, safety, or environment of the facility or the facility restoration work required after its removal, is substantial.
Equipment, Personal Property	Personal property equipment includes all equipment other than collateral equipment. Such equipment, when acquired and used in a facility or a test apparatus, can be severed and removed after erection or installation without substantial loss of value or damage thereto or to the premises where installed.
Facility	A building or structure designed and created to serve a particular function.
Facilities Life Cycle	A facilities life cycle is divided into four stages, requirements (planning and design), acquisition (construction and acceptance), stewardship (operations, maintenance and repair), and disposal.
Facilities Maintenance Management	The planning, prioritizing, organizing, controlling, reporting, evaluating, and adjusting of facilities maintenance operations to support the CNO/NAVFAC facilities policy and objectives and satisfy customers' facility needs. Defined by the International Facility Management Association as "the practice of coordinating the physical workplace with the people and work of the organization."
Fixed Burden Rate (FBR)	The additional costs (expressed in percent of direct material cost) for ordering, handling, and stockpiling materials and repair parts. For example, if the offeror's Fixed Burden Rate for materials in the Base Period is 10% then: $\$100,000.00 + (\$100,000.00 \times 10\%) = \$110,000.00$ The Government will compensate the Contractor for the required parts and materials and not the total amount shown in Schedule of Indefinite Delivery Indefinite Quantity Work.
Frequency Of Service	Annual (A). Services performed once during each 12-month period of the contract at intervals of 335 to 395 days. Biennial (B). Services performed once during each 24-month period of the contract at intervals of 670 to 790 days. Daily (D5). Services performed once each calendar day, Monday through Friday, including holidays unless otherwise noted. Daily (D7). Services performed once each calendar day, seven days per week, including weekends and holidays. Monthly (M). Services performed 12 times during each 12-month period of the contract at intervals of 28 to 31 calendar days. Quarterly (Q). Services performed four times during each 12-month period of the contract at intervals of 80 to 100 calendar days. Semiannual (SA). Services performed twice during each 12-month period of the contract at intervals of 160 to 200 calendar days. Semimonthly (SM). Services performed 24 times during each 12-month period of the contract at intervals of 14 to 16 calendar days. Three times weekly (3W). Services performed three times a week, such as Monday, Wednesday, and Friday. Twice weekly (2W). Services performed twice a week, such as Monday and Thursday or Tuesday and Friday.

Attachment 0200000-01
Definitions and Acronyms

Definition	Description
	Weekly (W). Services performed 52 times during each 12-month period of the contract at intervals of six to eight calendar days.
Government Furnished Property (GFP)	Property in the possession of, or directly acquired by, the Government and subsequently furnished to the contractor for performance of a contract. Government furnished property includes, but is not limited to, spares and property furnished for repairs, maintenance, overhaul, or modification. Government furnished property also includes contractor acquired property if the contractor acquired property is a deliverable under a cost contract when accepted by the Government for continued use under the contract.
Hazardous Material (HM)	A material that because of its quality, concentration, physical, chemical or infectious nature may pose a threat to human health or the environment if released or spilled into the environment or any material designated by the Department of Transportation (DOT) or any materials that require a SDS form as posing a potential threat while being transported. Hazardous materials are listed in 49 CFR Part 172.
Hazardous Waste (HW)	Any discarded solid waste (liquid, semi-solid, solid, or gaseous) that meets the definition of a hazardous waste by USEPA, state authorities, or the Navy. In accordance with RCRA, a solid waste is a listed hazardous waste if it is specifically listed, or it is a characteristic hazardous waste if it exhibits the characteristics of ignitability, corrosivity, reactivity, or toxicity.
Hazardous Waste Management Plan	In accordance with OPNAVINST 5090.1C, every Navy shore activity that generates HW shall develop and use a Hazardous Waste Management Plan or a Hazardous Waste management component in its P2 Plan and EMS. A Hazardous Waste Management Plan shall: • Identify applicable federal, state, and local regulations pertaining to the generation and management of hazardous waste. • Identify training requirements and describe procedures for obtaining training and maintaining training records. • Assign responsibilities for the generation, designation, handling, storage, treatment, disposal, and all documentation. • Describe all hazardous waste generation and management procedures. • Include or reference the hazardous waste minimization plan and goals. • Include or reference contingency plans and emergency response procedures. The plan shall be kept up to date to include changes in hazardous waste generation and management procedures, as well as changes in applicable federal, state, and local hazardous waste regulations. The plan shall include or reference minimization procedures sufficient to achieve DOD minimization goals. Tenant activities are covered by the host CO's Hazardous Waste Management Plan.
Hazardous Waste Manifest	A hazardous waste manifest as defined in 40 CFR 260 is required for the transport of hazardous waste. The installation commanding officer (ICO) or the ICO's designated representative shall retain signature authority for hazardous waste manifests.
Infrastructure Condition Assessment Program (ICAP)	A Navy automated data management program that utilizes historical asset lifecycle data and a structured assessment process to evaluate the condition facilities and their components.
Inspection	A rigorous, detailed assessment of the condition of a facility performed to generate a fundable scope and cost estimate for prioritization and funding of maintenance and repair.
Integrated Maintenance Program (IMP)	IMP is a recurring state-of-the-art, reliability-centered inspection, testing, maintenance and repair program that determines best practices for managing the functions and consequences of failures of facilities equipment and system components. IMP encompasses accepted commercial practices, including reactive, preventive, predictive and proactive maintenance, into one optimal program. The IMP approach gives the Contractor full responsibility to maintain systems and equipment and perform repairs

Attachment 0200000-01
Definitions and Acronyms

Definition	Description
	whenever necessary to ensure equipment and systems are operational and remain in a constant state of readiness. Emergency, Urgent, and Routine Work Orders will not be issued for accomplishment of repairs on systems and equipment maintained under IMP.
Job or Work Order	An authorization for work that requires planning and estimating and has an individual line of accounting for financial and performance evaluation.
Life-Cycle Costs	A form of economic analysis that considers the total cost of owning, operating, and maintaining a building or system over its useful life.
Less-than-90-day Accumulation Areas or Storage Facilities	Temporary HW storage areas where HW may be stored for up to 90 days without a RCRA permit.
Maintenance and Repair	The preservation or restoration of a piece of equipment, system, or facility to such condition that it may be effectively used for its designated purposes. Maintenance/repair may be adjustment, overhaul, reprocessing, or replacement of constituent parts or materials that are missing or have deteriorated by action of the elements or usage, or replacement of the entire unit or system if beyond economical repair.
Maintenance, Preventive	Maintenance designed to increase the availability of the facilities/equipment by reducing the number of unexpected breakdowns or service interruptions. It is any planned maintenance activity that improves equipment life and avoid any unplanned maintenance requirements.
Management Information Systems-Maintenance	A computerized system that will provide sufficient information for management to evaluate differences between budgets and actual costs and evaluate performance.
Monthly On-Site Labor Report	A compilation of all Contractor and subcontractor employee-hours involved in delivering contract services on a Government property.
NAVFAC MAXIMO	A specially configured software version of MAXIMO®, a commercially available computerized maintenance management system (CMMS), adopted by NAVFAC for enterprise facility asset data management. The terms “MAXIMO”, “NAVFAC MAXIMO” or “Government’s MAXIMO” shall be used interchangeably in the document.
Non-RCRA Regulated Waste	Waste that is not regulated as a hazardous waste under RCRA; however, is waste may be regulated by other federal, state or local regulations including but not limited to TSCA, Clean Air Act, Clean Water Act or other regulations and statutes. Examples include Used Oil, Universal Waste, Oily Water, antifreeze, etc. Non-RCRA regulated waste (while not meeting the definition of a Hazardous Waste) must be managed according to its applicable regulations and may not be discarded into the general trash.
Non-Regulated Solid Waste (Debris and Rubbish)	Waste not associated with an industrial process such as refuse and scraps resulting from preparation, cooking, dispensing, and consumption of food. Non-hazardous construction and demolition wastes such as dimension and non-dimension lumber, plywood, chipboard, and hardboard are included.
Partnering	The terms “partnering” and “partnership” used herein shall mean a relationship of open communication and close cooperation that involves both Government and Contractor personnel working together for the purpose of establishing a mutually beneficial, proactive, cooperative environment within which to achieve contract objectives and resolve issues and implementing actions as required.
Performance Assessment	A method used by the Government to provide some measure of control over the quality of purchased goods and services received.
Performance Assessment Representative (PAR)	The individual(s) assigned as a Technical Point of Contact (TPOC) / Subject Matter Expert (SME) to the COR to perform duties as the on-site representative who assesses Contractor performance. The PAR periodically observes Contractor performance, reviews delivered services, reviews quality management corrective actions, periodically

Attachment 0200000-01
Definitions and Acronyms

Definition	Description
	assesses and documents Contractor performance on PAWs and the MPAS, and communicates findings as necessary with the Contractor, SPAR, and COR.
Pre-Expended Bin Materials And Supplies	The minor materials and supplies that are incidental to the job, for which the total direct cost of any one material line item shown on the material estimate is \$10.00 or less. Examples of pre-expended bin materials and supplies include, but are not limited to, solder, lead, flux, electrical connectors, electrical tape, fuses, nails, screws, bolts, nuts, washers, spacers, masking tape, sand paper, solvent, cleaners, lubricants, grease, oil, rags, mops, glue, epoxy, spackling compound, joint tape, plumbers tape and compound, clips, welding rods, and touch up paint.
Property Administrator	An authorized representative of the Contracting Officer who is responsible for administering contract property requirements, terms and conditions of the contract
Property Management Program	A Government program established for the purpose of reviewing and approving the Contractor's Property Management Plan and System through performance of a system analysis whenever government property is in the possession of the Contractor.
Quality Assurance (QA)	The planned and systematic activities implemented in a quality system so that quality requirements for a product or service will be fulfilled.
Quality Control (QC)	The observation techniques and activities used to fulfill requirements for quality.
R. S. Means	A data collection and organization system developed by R. S. Means Company which can be used to prepare accurate, dependable construction estimates and budgets in a variety of ways. The Contractor shall use the latest edition. Material prices are based on a national average and computed labor costs are based on a 30-city national average. An estimate prepared using this data is called a "Means estimate"; data may simply be referred to as "Means".
Real Property	Land and improvements to land (i.e., facilities). It includes equipment affixed and built into the facility as an integral part of the facility (such as heating systems), but not movable equipment (e.g., plant equipment, industrial equipment, buoys).
Real Property Inventory Equipment (RPIE)	A Government owned or leased individual pieces of equipment, apparatus, or fixture that are essential to the function of the real property (i.e. plumbing, electrical, heating, cooling and elevators). It is physically attached to, integrated into, and built in or on the property. Individual RPIE's can be combined to make a CIMU to facilitate facilities management. An individual RPIE can also be a CIMU if the equipment is complex enough to require its own management planning.
Regulated Waste	Any hazardous, non-hazardous, industrial process waste (aka special waste), e-waste, and/or off-specification HM, which because of its physical characteristics, chemical make-up or biological nature requires either special handling procedures and permitting, or poses an unusual threat to human health, equipment, property, or the environment. Examples include (but are not limited to) liquid sludge, pastes, and/or filter cakes, chemical compounds and/or petroleum products, fine powders or highly dusty materials, spent blast media and/or grit, demolition wastes from industrial facilities, debris and/or residues from spill cleanup work, underground storage tank remediation materials, pollution control wastes, ash from fires, furnaces, boilers or incinerators, off-specification products, other materials that have the potential to be a hazardous waste. All RW may be used or unused excess hazardous materials. Laboratory analysis may be required to verify the waste is not a RCRA-regulated hazardous waste.
Repair	Repair is the restoration of facilities or equipment to such a condition that it may be effectively utilized for its designated purposes by overhaul, reconstruction, or replacement of constituent parts or materials which have deteriorated by action of the elements or usage, and which have not been corrected through maintenance. This term also applies to replacement of the entire unit or system if beyond economical repair. The intent of repair is to have the equipment at normal working condition.

Attachment 0200000-01
Definitions and Acronyms

Definition	Description
Replacement	Replacement, as a distinct work element, is confined to a program of planned replacement of a facility or its components. It may be further limited to major components such as air conditioning compressors, furnaces or hot water heaters. Replacement is performed when the equipment has reached the end of its useful life; when it no longer can perform due to degradation of its internal components and repair is no longer cost effective. Included under the replacement would be the major rebuilding of any component, since rebuilding also restores performance.
Response Time	The time allowed the Contractor after initial notification of a work requirement to be physically on the premises at the work site with appropriate personnel, tools, equipment, and materials, ready to perform the work required.
Restoration	Restoration of real property to such a condition that it can be used for its intended purpose. Includes repair or replacement work to restore facilities damaged by inadequate sustainment, excessive age, natural disaster, fire, accident or other causes.
Sampling Plan	Plan and procedures to conduct sampling, field testing and laboratory analysis for a defined testing objective.
Satellite Accumulation Areas	Designated approved areas, at or near the point of generation and under the control of the operator generating the waste, where no more than 55 gallons (cumulative total) of all types of HW or 1 quart of acutely HW may be accumulated. The 55-gallon limit does not include non RCRA regulated waste, universal waste and used oil etc.
Spill Prevention Control and Countermeasure (SPCC) Plan	The SPCC Plan establishes engineering controls including procedures, methods, equipment and other requirements to prevent the discharge of oil into or upon navigable waters. The Plan includes procedures for oil spill prevention, measures to contain spills and an established spill drill exercises to ensure effective countermeasures in the event of oil spill.
Sustainment	Maintenance and repair activities necessary to keep a typical inventory of facilities in "normal working condition". Sustainment includes regularly scheduled maintenance as well as cyclical major repairs or replacement of components that occur periodically over the expected service life of the facilities.
System	An assemblage of mechanically and/or electrically interlocked parts, equipment and/or components forming a unitary whole.
Unit Priced Labor (UPL) Hour	The fully burdened unit price bid by the Contractor to perform one hour of work-in-place. With the exception of direct material and construction equipment costs, the unit priced labor hour price shall include all indirect and direct costs associated with performing work, such as: the Contractor's hourly composite trade wage, adjusted to allow for workforce productivity; sub-contractor cost, costs for pre-expended bin materials, shipping and handling, wage determinations, union agreements, crew sizes, hand tools, equipment, universal equipment (excluding construction equipment), mobilization, demobilization, payroll burdens and fringes, overtime, job (field) overhead, clerical support, supervision, inspection, fees, taxes, licenses, permits, and insurance, general and administrative (home office) overhead, profit, and all other associated markups. Any indirect cost or additional markups not allowed in the definition of direct materials shall be included in the UPL price. Additionally, time for job preparation, safety standby personnel, and similar indirect labor elements are included.
Uniformat Classification	A standard classification of building components established by the National Institute of Standards and Technology.
Universal Equipment	Universal equipment refers to equipment that can cover two or more industries and is commercially employed in execution of operation, maintenance, and repair work, such as: Aerial Work Platforms, Backhoes, Cranes, Dump Trucks, Excavators, Generators, Graders, Lifts, Loaders, Man Lifts, Monitoring and Test Equipment, Pumps, Tractors, Trailers, etc.

Attachment 0200000-01
Definitions and Acronyms

Definition	Description
Universal Waste (UW)	Universal Waste (UW) (defined in 40 CFR Part 273) means batteries, fluorescent lamps, some pesticides, and mercury-containing equipment formally classified as a HW, but that are now subject to less stringent regulations, when recycled if recycling is available.
Utility Infrastructure Condition Assessment Program (UICAP)	A comprehensive assessment processes for planning, managing, and executing Navy utility infrastructure inspections.
Weight Handling Equipment (WHE)	Weight handling equipment consists of cranes (e.g., portal cranes, jib cranes), rigging gear (e.g., slings, shackles), and associated equipment (e.g., portable hoists, dynamometers). For purposes of this technical sub-annex, WHE does not include mobile or transportable truck, crawler, and railway mounted locomotive cranes covered in 1700000 BSVE.
Work Order	Any work required to return a facility, system, equipment or component to normal working condition. Service orders are minor facility problem requests or requests for other non-recurring work that is too small to be planned and estimated. The purpose of a service order is to provide the Government with a means of issuing work up to a defined liability limit for requirements occurring outside of the specified recurring work. The Government may utilize service orders to accomplish any work up to the respective liability limit based on the service order classification.
Work Order Cycle	Count down starts when the customer is notified that the work has been accepted to be accomplished to the time when the work chit is turned in by the craftsmen as complete is one complete cycle period for a work order.
Work Order, Emergency	Emergency is defined as any facility deficiency that immediately compromises the mission or life, health and safety. Always includes, but is not limited to, failure of any utility, fire protection, environmental control, or security alarm systems.
Work Order, Urgent	Urgent is defined as any deficiency that does not immediately endanger personnel or property, but extended delays of repairs could result in damage to Government property, or soon affect the security, health, or well-being of personnel or the continued operation of a service or system.
Work Order, Routine	Routine is defined as any work requirement within the defined Limited Operational Life (LOL) that does not qualify as emergency or urgent.

Contractor Incident Report System (CIRS)

Report Type (REQUIRED)		
☐ Injured	☐ Property	☐ Injured & Property
☐ Near Miss		
1. Contract Information		Incident Information
Prime Contractor: Ex: Prime contractor name, inc.		Cage Code: Ex: 06PK7
Contract Number: Ex: N98043K320923		Occurred On Base: ☐ Yes ☐ No
Task Order #: 0000		
Contractor Contact Information		
Last Name Ex: Harrison	First Name Ex: Samuel	Phone #: (999) 867-5308
Email Address: Ex: example@business.com		Date Notified: 10/15/2025 Ex: MM/DD/YYYY
2. Incident Type (REQUIRED)		(Please Check All That Apply)
☐ Assault/Violent Act	☐ Extreme Environmental Exposure	☐ Man over the side (No water entry)
☐ Diving	☐ Falls, slip, trip, or bodily exertion	☐ Man Overboard - Water Entry
☐ Electrical Shock/Burns	☐ Fires - All Types	☐ Material Handling Equipment
☐ Equipment Installation/Repair	☐ Hazardous Material (any type)	☐ Ordnance-Related (Explosive)
☐ Explosion, Non-Ordnance	☐ Industrial (Select Additional Below)	☐ Vehicle (Government or Private)
Industrial Incident Additional Information		(Please Check All That Apply)
☐ Confined Space	☐ Hand and Power Tools	☐ Work Platforms and Scaffolding
☐ Demolition/Renovation	☐ Rigging	☐ Underground Construction, Shafts, and Caissons
☐ Trenching/Entrapment	☐ Cranes and Hoisting Equipment	☐ Concrete, Masonry, Steel Erection and Residential Construction
☐ Traffic Control	☐ Floating Plant and Marine Activities	☐ Tree Maintenance and Removal
☐ Welding and Cutting	☐ Pressurized Equipment and System	☐ Airfield and Aircraft Operations
☐ Control of Hazardous Energy	☐ Fall Protection	

3. General Information		Incident Information
Date of Incident: 12/31/1000 Ex: MM/DD/YYYY		Time of Incident: HH : MM
Describe the incident in detail in your words: Ex: Detailed description of...		
Exact Location of Incident: Ex: Description of exact location...		
Was Hazardous Material(s) Involved: ☐ Yes ☐ No If Yes, Explain What Hazardous Materials Were Involved and Why: Ex: Explain hazardous materials...		
Activity at Time of Incident: Ex: The activity was...		
Personal Protective Equipment: ☐ Available and used ☐ Available and not used ☐ Not Required ☐ Not related to Mishap ☐ Wrong PPE for job ☐ List PPE List PPE Used: (required only if List PPE checked) Ex: Item 1, Item 2...		
Who Provided Cleanup? ☐ Onsite ☐ Base ☐ Public		

4. Fully Explain What Allowed or Caused the Incident		Incident Information
Direct Cause: Ex: The direct cause is...		
Indirect Cause: Ex: The indirect cause is...		
Additional Action Taken: (Please Include a Begin Date and Est. End Date in Description) Ex: The action taken was...		
5. Contributing Factors		
Was Visibility Restricted? ☐ Yes ☐ No		Distance Visibility was restricted: 0
Unit of Measure: ☐ Feet ☐ Yards ☐ Meters ☐ Miles ☐ Nautical Miles		
Visibility Restricted By: ☐ Fog ☐ Smoke ☐ Rain ☐ Sleet ☐ Snow ☐ Mist ☐ Dust ☐ Sandstorm ☐ Unknown Object Other: Ex: Tornado		
Lighting Conditions at Incident Site: ☐ Adequate ☐ Inadequate ☐ Unknown	Was Noise Level a Factor: ☐ Yes ☐ No ☐ Unknown	Was Carbon Monoxide (CO) a Factor: ☐ Yes ☐ No If Yes, CO Alarm Manufacturer: Ex: Alarm, Inc.
Other Contributing Factors: Ex: List another factor, if applicable...		

1. Injured Data			Person (if applicable)
Age:	Gender: ☐ Male ☐ Female		Subcontractor Company Name: Ex: List subcontractor here ...
2. General Information			
Drug or Alcohol Involved: ☐ None ☐ Unknown ☐ Alcohol ☐ Drugs ☐ Alcohol and Drugs			
Who Provided First Aid? ☐ Onsite ☐ Base ☐ Public			
Was Ergonomics a Factor: ☐ Yes ☐ No Type of Ergonomic Injury: ☐ Lifting ☐ Equipment Placement Office ☐ Repetitive Motion ☐ Positioning ☐ Bending ☐ Equipment Placement Industrial ☐ Impact Strain			
3. Injury Illness/Fatality Information			
Severity of Injury/Illness: ☐ Fatality ☐ Lost Workday Case Involving Days Away From Work ☐ Permanent Total Disability ☐ Light/Limited Duty or Restricted Work (No Lost Work Days) ☐ Permanent Partial Disability ☐ Other Reportable & Medical Treatment/No Lost Time ☐ First Aid Treatment Only/First Aid Case			
Were There Days Lost: ☐ Yes ☐ No		Were There Days Hospitalized: ☐ Yes ☐ No	
Were There Days Restricted Duty: ☐ Yes ☐ No			
Part of Body Affected: Ex: arm			
Nature of Injury or Illness: Ex: Broken arm			
Event or Exposure: Ex: Fall from ladder			
Source of Injury or Illness: Ex: Ladder fell			
Injury Activity Code: Ex: 97G5			

4. License	Person (if applicable)
Are Appropriate License and Certification/Medical Current: ☐ Yes ☐ No	
If yes, explain: Ex: Completed at last command...	

5. Training
Was all the contract-required training provided to the employee: ☐ Yes ☐ No
If yes, explain: Ex: Training completed at command...

1. Involved Person Data			(if applicable) Property Damage		
Age:	Gender: ☐ Male ☐ Female		Subcontractor Company Name: Ex: ID #1		

3. Property Damaged					
Was Anyone Injured: ☐ Yes ☐ No		Was A Government Motor Vehicle Involved: ☐ Yes ☐ No			

Property Type	Property ID #	Detailed Description	Owned By	Est. Cost USD	Lost Use Days
-- select --	Ex: ID #1	Ex: Detail #1	-- select --		
-- select --	Ex: ID #2	Ex: Detail #2	-- select --		
-- select --	Ex: ID #3	Ex: Detail #3	-- select --		
-- select --	Ex: ID #4	Ex: Detail #4	-- select --		
-- select --	Ex: ID #5	Ex: Detail #5	-- select --		
-- select --	Ex: ID #6	Ex: Detail #6	-- select --		
-- select --	Ex: ID #7	Ex: Detail #7	-- select --		
-- select --	Ex: ID #8	Ex: Detail #8	-- select --		
-- select --	Ex: ID #9	Ex: Detail #9	-- select --		
-- select --	Ex: ID #10	Ex: Detail #10	-- select --		
-- select --	Ex: ID #11	Ex: Detail #11	-- select --		
-- select --	Ex: ID #12	Ex: Detail #12	-- select --		

4. License(if applicable) **Property Damage****Are Appropriate License and Certification/Medical Current:**☐

Yes

☐

No

If yes, explain:

Ex: License earned at...

5. Training**Was all the contract-required training provided to the employee?**☐

Yes

☐

No

If yes, explain:

Ex: Training was provided at...

Directions for Process Material Log Sheets

Chemical Description:

- Material Name - List the brand or generic name of the chemical material.
- Manufacturer - List the name of the manufacturer of the product.
- Constituents of Concern - List the constituents (ingredients) as listed on the Material Safety Data Sheet (MSDS).
- CAS # - List the Chemical Abstract Service (CAS) Number for each Constituent of Concern listed. This information is found on the MSDS. If no CAS number is listed, state "N/L".
- % - List the concentration of each Constituent of Concern listed. This information is found on the MSDS. If the concentration is not listed, state "N/L".
- Product Weight - List the weight of material contained in one container of the product. This information is normally listed on the MSDS or can be determined from the density or specific gravity of the product listed on the MSDS.
- In addition, check all the boxes that apply to this chemical:
 - Pure or Mix - choose only one.
 - Solid, Liquid or Gas - choose only one.
 - Extremely Hazardous Substance (EHS), Ozone Depleting Substance (ODS), SARA TITLE III Chemical (SARA III), Air Toxic Chemical (AIR TOX) or Carcinogen
- (CARC) - based on the information provided by the material's MSDS. Choose all that apply.
 - HM exempt - per EPCRA section 312 and based upon user knowledge, choose this box if the material would normally be exempt from reporting for hazardous material storage.
 - Tri exempt - per EPCRA section 313 and based upon user knowledge, choose this box if the material would normally be exempt from reporting for the Toxic Release Inventory (TRI).

Physical and Chemical Hazards:

- For each material listed, check all the physical and health hazard boxes that apply. These hazard categories are defined in 40 CFR 370.2.
- Fire Hazard - flammable, combustible liquid, pyrophoric, oxidizer.
- Sudden Release of Pressure - explosive, compressed gas.
- Reactive - unstable reactive, organic peroxide, water reactive.
- Immediate (acute) Health Hazard - highly toxic, toxic, irritant, sensitizer, corrosive.
- Delayed (chronic) Health Hazard - carcinogens, mutagens, other long-term health hazards.

Storage Description: Storage Code:

- List the appropriate storage type, pressure and temperature condition codes for the material based upon the codes listed below. List the storage type in the first box, the applicable pressure code in the second box and the applicable temperature code in the third box. More than one storage code may apply if material is stored in different types of containers.

Storage Type:

- A - Above Ground Storage Tank F Can L Cylinder
- B - Below Ground Storage Tank G Carboy M Glass Bottle or Drum
- C - Tank Inside Building I Fiber Drum N Plastic Bottle or Drum
- D - Steel Drum J Bag R Other
- E - Plastic/Non-metallic Drum K Box

Pressure and Temperature Conditions:

- 1 - Ambient Pressure 4 Ambient Temperature
- 2 - Greater than Ambient Pressure 5 Greater than Ambient Temperature
- 3 - Less than Ambient Pressure 6 Less than Ambient Temperature but not Cryogenic
- 7 - Cryogenic Conditions

Inventory in Pounds:

- Maximum Amount - List the maximum amount of a material that was on-hand (stored) at any one time. Amount must be recorded in pounds.
- Average Amount - List the average amount of a material that was on-hand during the reporting period. Amount must be recorded in pounds.
- Days on Site - List the number of days during the reporting period each material was on-site. If the material was present for the whole year, record as 365.

Amount Used in Pounds:

- List the amount of each material used during the reporting period. Amount must be recorded in pounds. Amount used is the best estimate based on the contractor material tracking system.

**Contractor Hazardous Material Inventory Log

SECTION 01 57 19.00 20 – APPENDIX A

VOC/HAP Tracking Form
Emission Data[illegible]

ATTACHMENT "A"				
CONTRACTOR CRANE OPERATING CHECKLIST FOR CRITICAL LIFTS			YES	NO
1	Does the operator know the weight of the load to be lifted?			
2	Is the load to be lifted within the crane manufacturer's rated capacity in its present configuration?			
3	Is the crane level and on firm ground?			
4	Are outriggers required?			
5	If so, are outriggers fully extended and down, and the load off the wheels.			
6	If blocking is required, is the entire surface of the outrigger pad supported, and is the blocking material of sufficient strength to safely support the loaded outrigger pad?			
7	If outriggers are not used, is the crane rated for on-rubber lifts by the manufacturer's load chart?			
8	Is the swing radius of the crane counterweight clear of people, obstructions, and accessible areas within the swing area barricaded to prevent injury, damage and unplanned encroachment?			
9	Has the hook been centered over the load in such a manner to prevent swing (deflection, side loading, load-moment)?			
10	Is the load well secured and balanced in the sling or lifting device before it is lifted (free and clear) more than a few inches?			
11	Is the lift swing path clear of obstructions?			
12	If rotation of the load being lifted is hazardous, is tag line or restraint line being used?			
13	Are personnel prevented from standing or passing under a suspended load?			
14	Are personnel prevented from entering the load fall zone?			
15	Is the crane operator's attention diverted?			
16	Are proper signals being used at all times?			
17	If radio communications are used, is the frequency isolated to the crane team.			
18	Do the operations ensure that side and tip loading is prohibited?			
19	Are start and stop motions in a smooth fluid motion (no sudden acceleration or deceleration)?			
20	If operating near electric power lines, are the rules and guidelines understood and adhered to as specified in NAVFAC P-307?			
21	Is the lift a critical lift?			
22	If so, are critical lift regulations understood, check-off sheets initialed and signed off, and was there an interactive brief conducted with associated personnel?			
23	Is Attachment "A" current, filled out completely, and posted in the crane?

CRANE AND RIGGING GEAR ACCIDENT REPORT INSTRUCTIONS

This form is designed for fax transmission without a cover page or by e-mail and, with enclosures and signatures shall be the official document. Electronic submission will be accepted without signatures but the names of the preparer, concurring personnel, and certifying official (for crane accidents only) shall be filled in. The e-mail address is m_nfsh_ncc_accident@navy.mil. The fax number is (757) 967-3808.

1. Accident Category: Indicate either crane accident or rigging gear accident.
2. From: The naval activity that is responsible for reporting the accident and UIC number.
3. Activity: The naval activity where the accident took place.
4. Report No.: The activity assigned accident number (e.g., 95-001).
5. Crane No.: The activity assigned crane number (e.g., PC-5), if applicable.
6. Category: Identify category of crane (i.e., 1, 2, 3, or 4), if applicable.
7. Accident Date: The date the accident occurred.
8. Time: The time (24 hour clock) the accident occurred (e.g., 1300).
9. Category of Service: Check the applicable service (SPS as defined by NAVSEA 0989-030-7000).
10. Crane Type: The type of crane involved in the accident (e.g., mobile, bridge), if applicable.
11. Crane Manufacturer: The manufacturer of the crane (e.g., Dravo, Grove, P&H), if applicable.
12. SPS: Was the crane or rigging gear being used in an SPS lift?
13. Complex lift: Was the crane or rigging gear being used in a complex lift?
14. Location: The detailed location where the accident took place (e.g., building 213, dry dock 5).
15. Weather: The weather conditions at time of accident (e.g., wind, rain, cold).
16. Crane Capacity: The certified capacity of the crane (e.g., 120,000 pounds), if applicable.
17. Hook Capacity: The capacity of the hook involved in the accident at the max radius of the operation, if applicable.
18. Weight of Load on Hook: If applicable, the weight of the load on the hook.
19. Fatality or Permanent Disability?: Check yes or no.
20. Material/Property Cost Estimate: Estimate total cost of damage resulting from the accident.
21. Reported to NAVSAFECEN?: Self-explanatory.
22. Accident Type: Check all that apply.
23. Cause of Accident: Check all that apply.
24. Chargeable to: Check all that apply.
25. Crane Function: Check all functions in operation at time of accident. Check N/A if a rigging gear accident.
26. Is this a recurring problem?: Check yes or no. Identify any other similar accidents.
27. Situation Description/Corrective Actions: Self-explanatory.
28. Preparer: Self-explanatory.
29. Concurrences: Self-explanatory.
30. Certifying Official (Crane Accidents Only): Self-explanatory.
31. Brief Description: No more than one paragraph summarizing the resultant incident.
32. Background and Detailed Description: Provide the relevant background in a descriptive timeline of preconditions leading up to the event, as well as a detailed description of the event.
33. Corrective Actions: List all short term and long term corrective actions that are taken to prevent recurrence of the incident. Short Term Corrective Actions are those actions taken that will allow return to work in short time frame. Long Term actions are more 'programmatic' in nature and typically include process revision, changes in training, 'mistake proofing', etc.

CRANE AND RIGGING GEAR NEAR MISS REPORT

Near Miss Category: ☐ Crane Near Miss ☐ Rigging Gear Near Miss

FIELD CHANGE PROPOSAL FORM

Contract Name and Number _____

Work Request Number: _____

Task Order Number: _____

Date: _____

Original Scope of Work _____

The following additional materials and man-hours are required to satisfactorily complete the work requested by the above task order, use additional sheets if necessary:

Materials

Cost

Total _____

The reason for this change is briefly explained below:

Contractor Personnel

Date

I have reviewed the Contractor's proposed scope of work and verified that this work is required to complete the subject task order/contract requirement. This is not an order, obligation, direction, or approval to proceed and is subject to revision by the cognizant contract administrator. I have noted the following discrepancies, if any, to the proposal:

Government Inspector

Date

E/U/R WORK SUMMARY REPORT

Provide service order data for each category. Indicate if E/U/R Work was received after Government working hours.

Labor Categories	Emergency Work (received during Government regular working hours)		Emergency Work (received after Government regular working hours)		Urgent Work		Routine Work

VERSION #: V1

Current as of: 7/7/2013

Service Provider (BOSC1) is a pipe delimited file.

Position	Name	Required	Length Limit	Data Format Note	Field Definition	Content Notes	NAVFAC MAXIMO_FIELD
1	Approved Date	N	10	MM/DD/YYYY hh:mm:ss	The Date on which the Work Order was last approved. If the file contains an Approved Date, then this date will be pulled over to the record. <i>If the Approved Date in the file is null, then the Reported Date plus one minute will be displayed in the record.</i>		APPROVEDDATE
2	Work Type	Y	15	Must match Value List in Maximo. (Cross-walked field.). Must match Crosswalk	Identifies the work order's type. Example types are: preventive maintenance, corrective maintenance, emergency maintenance, capital project, and event report.	Value list in REFERENCE SPREADSHEET -or- For this contract the following are valid work types: CLIN XXXXXX use "XXXX"	WORKTYPE
3	Customer Reference Number	Y	10		Contractors internal work order tracking number. Will update Record if Value is found in Maximo otherwise new record (Work order) will be created.		SERVPRVREFCODE
4	Description	Y	150		Describes the work order. <i>If the Description is null, in the inbound file, then this field is defaulted to CROSSWALK value.</i>		DESCRIPTION
5	Location	Y	30	Must match Value List in Maximo	Identifies the work order's location. This is not necessarily the asset's location, however, if an asset is entered, its location will default here. - If the Location is null, in the inbound file, then this field is defaulted to the site's base location.	Value list in REFERENCE SPREADSHEET	LOCATION
6	Reported By	N	62	Must match Value List in Maximo	Identifies the person reporting the work order.	Value list in REFERENCE SPREADSHEET -or- For this contract: - use the following identifier "XXXX"	REPORTEDBY
7	Master System	N	N/A	Not used			N/A
8	Status	Y	16	(Cross-walked field.) Must match Crosswalk	Status of the work order, for example, in progress, waiting on material, waiting for approval, completed, or closed.	Value list in REFERENCE SPREADSHEET -or- For this contract: - use the following identifier "XXXX"	STATUS
9	Status Date	Y	10	MM/DD/YYYY hh:mm:ss			STATUSDATE
10	Priority	Y	12	(Cross-walked field.) Must match Crosswalk	Identifies the importance of the work order, from 0-999, where 0 is the lowest priority and 999 is the highest. If the Priority is null, in the inbound file, then this field is defaulted.	Value list in REFERENCE SPREADSHEET	WOPRIORITY
11	Actual Start	N	10	MM/DD/YYYY hh:mm:ss			ACTSTART
12	Actual Finish	N	10	MM/DD/YYYY hh:mm:ss			ACTFINISH
13	Supervisor	N	30	Must match Value List in Maximo		Value list in REFERENCE SPREADSHEET -or- For this contract: - use the following identifier "XXXX"	SUPERVISOR
14	Labor Hours(Actual)	Y	8	Number (2 decimal places)			ACTLABHRS

1	Site	Y	8	UPPER	Must match Value List in Maximo	Value list in REFERENCE SPREADSHEET -or- For this contract only: XXXXX	<i>SITEID / SITEID</i>
2	Asset	Y	25	Must match an existing ASSETNUM in Maximo	The asset number used must exist in NAVFAC MAXIMO prior to submission, or the record will be rejected.	Value list in REFERENCE SPREADSHEET	<i>ASSETNUM / ASSETNUM</i>
3	Meter	Y	15	UPPER	The value listed in the third position must be an existing, valid Maximo DCR or UCR meter.	Value must match existing value in Maximo. list in REFERENCE SPREADSHEET	<i>METER NAME / METER NAME</i>
4	Observation	Y	254	ALN	Last Reading/Observation value. Must be a valid value in MAXIMO	Value must match existing value in Maximo list. Current value list included on Tab 4 - Observation Values	<i>OBSERVATION / LASTREADING</i>
5	Measurement Date	Y	10	MM/DD/YYYY hh:mm:ss	Date Observation was recorded		<i>MEASUREDATE / LASTREADINGDATE</i>
6	Inspector	Y	30	Must match Value List in Maximo	Identifies the person reporting the observation	Value list in REFERENCE SPREADSHEET -or- For this contract: - use the following identifier "XXXX"	<i>INSPECTOR / LASTREADINGINSPCTR</i>

NOTE (NAVFAC MAXIMO/FIELD):

The observation information is filed in one of two locations. If the observation is the MOST CURRENT reading (by Measurement Date) - it is filed in the MEASUREMENT Table. If the data when received is not the most current, it is filed in the ASSETMETER Table. The filing location is irrelevant to the interface use, but this information is provided to prevent confusion when reviewing the data in Maximo.

When reviewing the data in Maximo (after processing) - If the meter reading being imported is newer than the last reading applied to the Assets record, a new meter reading entry will also be added to the Assets record's Meter tab. If the imported record is older than the last reading, it will only be visible in the (Select Action) "Manager Meter Reading History" dialog box, "Characteristic Meter

NAVFAC MAXIMO DATA REPORTING

PURPOSE AND OVERVIEW

The purpose of this attachment is to provide guidance on how data is to be recorded and provided by the Contractor in reporting Service Provider, Asset, Specification, and Characteristic Meter Reading Information for NAVFAC MAXIMO. This document outlines the methods that must be utilized by the Contractor and associated NAVFAC business process and procedures for how data is to be submitted.

GENERAL TYPES OF DATA

Work Order Data

Work order data includes all necessary information for the documentation of all completed work orders, including, but not limited to, service orders, preventive maintenance (as performed under the PM program or as part of IMP), and work issued as Nonrecurring work. Specific NAVFAC MAXIMO fields required for work order data are listed on the Service Provider Information spreadsheet provided in Attachment 0200000-06.

Asset Data

Asset data includes the specific details necessary for proper identification and tracking of assets. Asset data must be updated for all completed work orders where an asset is repaired, replaced, installed, or otherwise affected. Specific NAVFAC MAXIMO fields required for asset data are listed on the Asset Information spreadsheet provided in Attachments 0200000-07 and 0200000-08. When replacing existing assets, the Contractor shall change the status of the current asset which will remove it from the maintenance plan and add the new asset.

Condition Assessment Data

Condition assessment data includes all necessary information for the accurate condition rating of all assets in support of the Infrastructure Condition Assessment Program (ICAP). Specific NAVFAC MAXIMO fields required for condition assessment data are listed on the Characteristic Meter Reading Information spreadsheet provided in 0200000-09.

METHOD FOR DATA SUBMISSION

NAVFAC MAXIMO Flat File Data Exchange

The Contractor will utilize the data formats contained in the Service Provider Information provided in Attachment 0200000-06, Asset Information and specification provided in Attachment 0200000-07 and 0200000-08, and Characteristic Meter Reading Information provided in Attachment 0200000-09. The Contractor shall use their own internal systems to generate the flat file data into the format required. The Contractor is responsible for ensuring that data is correct and validated to meet the Maximo data requirements. If any data gets rejected the Contracting Officer will send the “rejected” data back to Contractor and the Contractor shall correct and resubmit the data within 24 hours. In all cases of data rejects the Contractor shall communicate with the Contracting Officer to rectify the data rejects.

Flat File Data Validation and Preparation

NAVFAC MAXIMO has several interfaces to assist in data transfer, many interfaces are used for multiple purposes to efficiently load or modify existing data in the system. Because of those multiple uses for each interface there are strict rules on how the data must be prepared for successful submission and loading.

The format required for flat files is detailed in the spreadsheets described below:

- SERVICE PROVIDER INFORMATION – (Spreadsheet provided in Attachment 0200000-06) –contains the format and data elements for submission of Work Order Information.

- ASSET INFORMATION – (Spreadsheet provided in Attachment 0200000-07) – contains the format and data elements for submission of new or updated Asset Information.
- CHARACTERISTIC METER READING INFORMATION – (Spreadsheet provided in Attachment 0200000-09) – contains the format and data elements for submission of updated Condition Assessment Information.

Service Provider, Asset, & Characteristic Meter Reading Information Spreadsheet Format

- Tab 1 – General Information - Version number, change log, etc.
- Tab 2 – Field Information – Field Name, Data Type, short description on field use and related information including Content Notes and NAVFAC MAXIMO Field Name.
- Tab 3 – Flat File Data Layout

The Contractor is required to validate their data prior to submission to minimize data rejects. To assist the contractor in data validation, the appropriate reference values will be provided by the Government and updated as changes occur. The reference files contain the valid data values for specific fields within MAXIMO at a specific time. Due to the frequent nature of changes for some value lists within MAXIMO (e.g., new assets added or status being changed), this file will be directly transferred from a local PW Representative to the Contractor as changes occur. The Contractor shall communicate with the Contracting Officer if any data values need to be added.

Flat File Submission Requirements

For data required to be submitted via flat file as specified, further detail of the format and submission requirements are detailed below.

- Pipe Delimited Flat File:

In this method the Contractor will prepare data in flat files for submission. These documents have strict requirements that must be followed to permit the successful processing by the Government to import into NAVFAC MAXIMO. Pipe Delimited Flat files are text files which are pipe delimited (the '|' symbol on the keyboard) with one record per line in the file. The Contractor is responsible to verify data against the reference values to prevent record rejects for required information.

Service Provider Information, Asset Information, Specification Information, and Characteristic Meter Reading Information Reports submitted as pipe delimited flat-files must be prepared as follows:

An individual flat file record is made up of over 30 individual fields, stored in a text file and delimited by the piping symbol ('|'). Not all of the fields must have data. Fields that are not required to have data must still exist in the flat file record but are allowed to have no data present for that field. See below for illustration for fields not required. A flat file is a text file that contains one or more of these individual records.

Example of a single line from a Service Provider work order flat file:

```
04|SC|181|131: RPL FLORESCENT LIGHT COVER|ELCENT-131|ENS SUMMERS||COMP|8/31/2005
16:37:16|3|8/30/2005 0:00:00|8/30/2005 13:30:00||0.50|8.73|0|0.00|131|||8/29/2005 9:13:28|UTIL|8/30/2005
10:53:49|9/6/2005 10:55:47|8/31/2005 16:37:25|CHARLIE|
```

There are a couple things worth noting in this example. First, notice the places where two or three piping symbols appear in a row. Anytime two piping symbols are located next to each other, it means a NULL value is being submitted for that field. Three pipes in a row would signify two NULL fields.

The second item worth noting is the last field in the line. The line ends with "|CHARLIE|". This is the 26th field and represents the CHANGE BY field. Since no more data are being sent with this individual record, no other piping symbols need to be included on this row. It would have been acceptable to include extra pipes to indicate the NULL values being sent for the remainder of the fields identified on the flat file format sheet.

ATTACHMENT 0200000-11
INSTALLATION SPILL PREVENTION, CONTROL, AND COUNTERMEASURE PLAN

1. Spills – The Contractor is solely responsible for all costs and liabilities incurred as a result of a spill, which occurs as a result of the actions of the Contractor, its agents, employees, subcontractors, or suppliers. Costs and liabilities may include, but not limited to, containment and cleanup costs, fines and penalties, and personal damages
2. Reporting – Spills On Government Property
Report all non-incidental spills which require emergency response and clean-up in accordance with 29 CFR 1910.120, entitled “Hazardous Waste Operations and Emergency Response” or Spills On Government Property which exceed the EPA or State's reportable quantity. Upon discovery of a spill immediately report by telephone (voice contact) 911 during non-duty hours and weekends. Provide a written report upon Government request and submit within 24 hours of request.
3. Reporting – EPA and State “Reportable” Spills – Initial Voice Contact
Report all EPA and State "Reportable" spills that occur on Government property. Upon discovery of a reportable spill, immediately complete the Initial Voice (telephonic) Contact to Federal, State, and local emergency response organizations (cognizant agencies) in accordance with 40 CFR 302, entitled “Designation, Reportable Quantities, and Notification”; and Hawaii Administrative Rules, Title 11, Chapter 451 (HAR 11-451), entitled “State Contingency Plan”. Upon completion of the initial contact to cognizant agencies, notify the KO.
4. Reporting – EPA and State “Reportable” Spills – Written Follow-up Report
Submit a separate Written Follow-up Report for all EPA and State reportable quantity spills occurring on Government property. Submit to via the KO no later than five working days after the initial voice contact report. Do not send any written report directly to cognizant agencies.
5. Reporting – All Spills Off Government Property
Immediately report all spills or leaks off government property to the KO. Comply with all DOT and applicable Federal (e.g., 40 CFR 302 and 40 CFR 355, “Emergency Planning and Notification”), State and local laws, rules and regulations required for notification and reporting.

700BS	Incandescent Lamps	Incandescent Lamps: 500W, 120V, Mogul Base	Replace existing with new incandescent lamps as indicated on the work authorization forms. Complete the work within 2 working days after a work authorization is issued. Type of incandescent Lamp: 500W, 120V, Mogul Base	EA	17.29
700BT	Incandescent Lamps	Incandescent Lamps: 750W, 120V, Mogul Base	Replace existing with new incandescent lamps as indicated on the work authorization forms. Complete the work within 2 working days after a work authorization is issued. Type of incandescent Lamp: 750W, 120V, Mogul Base	EA	59.73
700BU	Incandescent Lamps	Incandescent Lamps: 1,000W, 120V, Mogul Base	Replace existing with new Incandescent lamps as indicated on the work authorization forms. Complete the work within 2 working days after a work authorization is issued. Type of incandescent Lamp: 1,000W, 120V, Mogul Base	EA	48.13
700BV	Incandescent Lamps	Incandescent Lamps: 300W, PAR-56	Replace existing with new Incandescent lamps as indicated on the work authorization forms. Complete the work within 2 working days after a work authorization is issued. Type of incandescent Lamp: 300W, PAR-56	EA	54.61
700BW	Halogen Flood Lamps	Halogen Flood Lamps: 45W, PAR-38	Replace existing with new Halogen flood lamps as indicated on the work authorization forms. Complete the work within 2 working days after a work authorization is issued. Type of Halogen lamp: 45W, PAR-38	EA	15.13
700BX	Halogen Flood Lamps	Halogen Flood Lamps: 75W, PAR-38	Replace existing with new Halogen flood lamps as indicated on the work authorization forms. Complete the work within 2 working days after a work authorization is issued. Type of Halogen lamp: 75W, PAR-38	EA	16.79
700BY	Halogen Flood Lamps	Halogen Flood Lamps: 90W, PAR-38	Replace existing with new Halogen flood lamps as indicated on the work authorization forms. Complete the work within 2 working days after a work authorization is issued. Type of Halogen lamp: 90W, PAR-38	EA	15.13
700BZ	Halogen Flood Lamps	Halogen Flood Lamps: 150W, PAR-56	Replace existing with new Halogen flood lamps as indicated on the work authorization forms. Complete the work within 2 working days after a work authorization is issued. Type of Halogen lamp: 150W, PAR-56	EA	24.55
700CA	High Intensity Discharge (HID) Lamps	HID Lamps - Mercury Vapor, Self-Ballast: 100W, 120V	Replace existing with new High Intensity Discharge (HID) Mercury Vapor Lamp conforming to ANSI C78. Complete the work within 2 working days after a work authorization is issued. Type of HID Lamp: 100W, 120V, Mogul Base	EA	54.32
700CB	High Intensity Discharge (HID) Lamps	HID Lamps - Mercury Vapor, Self-Ballast: 160W, 120V	Replace existing with new High Intensity Discharge (HID) Mercury Vapor Lamp conforming to ANSI C78. Complete the work within 2 working days after a work authorization is issued. Type of HID Lamp: 170W, 120V	EA	39.98
700CC	High Intensity Discharge (HID) Lamps	HID Lamps - Mercury Vapor, Self-Ballast: 250 W, 120V	Replace existing with new High Intensity Discharge (HID) Mercury Vapor Lamp conforming to ANSI C78. Complete the work within 2 working days after a work authorization is issued. Type of HID Lamp: 250W, 120V	EA	71.61

700CD	High Intensity Discharge (HID) Lamps	HID Lamps - Mercury Vapor, Self-Ballast: 400W, 120V	Replace existing with new High Intensity Discharge (HID) Mercury Vapor Lamp conforming to ANSI C78. Complete the work within 2 working days after a work authorization is issued. Type of HID Lamp: 400W, 120V	EA	57.26
700CE	High Intensity Discharge (HID) Lamps	HID Lamp - Mercury Vapor: 70W	Replace existing with new High Intensity Discharge (HID) Mercury Vapor Lamp conforming to ANSI C78. Complete the work within 2 working days after a work authorization is issued. Type of HID Lamp: 70W	EA	104.52
700CF	High Intensity Discharge (HID) Lamps	HID Lamps - Mercury Vapor: 100W	Replace existing with new High Intensity Discharge (HID) Mercury Vapor Lamp conforming to ANSI C78. Complete the work within 2 working days after a work authorization is issued. Type of HID Lamp: 100W	EA	104.52
700CG	High Intensity Discharge (HID) Lamps	HID Lamps - Mercury Vapor: 175W,	Replace existing with new High Intensity Discharge (HID) Mercury Vapor Lamp conforming to ANSI C78. Complete the work within 2 working days after a work authorization is issued. Type of HID Lamp: 175W	EA	67.58
700CH	High Intensity Discharge (HID) Lamps	HID Lamps - Mercury Vapor: 250W	Replace existing with new High Intensity Discharge (HID) Mercury Vapor Lamp conforming to ANSI C78. Complete the work within 2 working days after a work authorization is issued. Type of HID Lamp: 250W	EA	76.72
700CJ	High Intensity Discharge (HID) Lamps	HID Lamps - Mercury Vapor: 400W	Replace existing with new High Intensity Discharge (HID) Mercury Vapor Lamp conforming to ANSI C78. Complete the work within 2 working days after a work authorization is issued. Type of HID Lamp: 400W	EA	72.39
700CK	High Intensity Discharge (HID) Lamps	HID Lamps - Mercury Vapor: 1000W	Replace existing with new High Intensity Discharge (HID) Mercury Vapor Lamp conforming to ANSI C78. Complete the work within 2 working days after a work authorization is issued. Type of HID Lamp: 1000W	EA	196.66
700CL	High Intensity Discharge (HID) Lamps	High Intensity Discharge (HID) Lamps (High Pressure Sodium): 35W	Replace existing with new High Intensity Discharge (HID) High Pressure Sodium Lamp. Complete the work within 2 working days after a work authorization is issued. Type of HID Lamp: 35W	EA	81.04
700CM	High Intensity Discharge (HID) Lamps	High Intensity Discharge (HID) Lamps (High Pressure Sodium): 50W	Replace existing with new High Intensity Discharge (HID) High Pressure Sodium Lamp. Complete the work within 2 working days after a work authorization is issued. Type of light: High Pressure Sodium: 50W	EA	81.04
700CN	High Intensity Discharge (HID) Lamps	High Intensity Discharge (HID) Lamps (High Pressure Sodium): 70W	Replace existing with new High Intensity Discharge (HID) High Pressure Sodium Lamp. Complete the work within 2 working days after a work authorization is issued. Type of HID Lamp: 70 W	EA	78.59
700CP	High Intensity Discharge (HID) Lamps	High Intensity Discharge (HID) Lamps (High Pressure Sodium): 100W	Replace existing with new High Intensity Discharge (HID) High Pressure Sodium Lamp. Complete the work within 2 working days after a work authorization is issued. Type of HID Lamp: 100W	EA	82.12

700CQ	High Intensity Discharge (HID) Lamps	High Intensity Discharge (HID) Lamps (High Pressure Sodium): 150W	Replace existing with new High Intensity Discharge (HID) High Pressure Sodium Lamp. Complete the work within 2 working days after a work authorization is issued. Type of HID Lamp: 150W	EA	84.57
700CR	High Intensity Discharge (HID) Lamps	High Intensity Discharge (HID) Lamps (High Pressure Sodium): 250W	Replace existing with new High Intensity Discharge (HID) High Pressure Sodium Lamp. Complete the work within 2 working days after a work authorization is issued. Type of HID Lamp: 250W	EA	89.69
700CS	High Intensity Discharge (HID) Lamps	High Intensity Discharge (HID) Lamps (High Pressure Sodium): 400W	Replace existing with new High Intensity Discharge (HID) High Pressure Sodium Lamp. Complete the work within 2 working days after a work authorization is issued. Type of HID Lamp: 400 W	EA	92.14
700CT	High Intensity Discharge (HID) Lamps	High Intensity Discharge (HID) Lamps (High Pressure Sodium): 1000W	Replace existing with new High Intensity Discharge (HID) High Pressure Sodium Lamp. Complete the work within 2 working days after a work authorization is issued. Type of HID Lamp: 1000W	EA	285.26
700CU	Fluorescent Ballasts	FLUORESCENT BALLASTS; Electronic Ballasts, 120V or 277V	Replace inoperative ballast with new Fluorescent Electronic Ballast, 120V or 277V For (1) or (2) FT17T8 lamps. Complete the work within 2 working days after a work authorization is issued.	EA	67.29
700CV	Fluorescent Ballasts	FLUORESCENT BALLASTS; Electronic Ballasts, 120V or 277V	Replace inoperative ballast with new Fluorescent Electronic Ballast, 120V or 277V For (1) or (2) F32T8 lamps. Complete the work within 2 working days after a work authorization is issued.	EA	67.29
700CW	Fluorescent Ballasts	FLUORESCENT BALLASTS; Electronic Ballasts, High Efficiency, NEMA Premium, Instant Start, Low Ballast Factor, Multivolt 120V or 277V, 1 or 2 Lamps	Replace inoperative ballast with new high efficiency NEMA Premium rated Fluorescent Electronic Ballast, Multivolt 120V or 277V, Instant Start Ballast, Low Ballast Factor 0.70 to 0.80, For (1) or (2) 4-Foot F32T8 (32 Watt Lamp), F28T8 (28 Watt Lamp), or F32T8/25W (25 Watt Lamp) lamps. Complete the work within 2 working days after a work authorization is issued.	EA	74.07
700CX	Fluorescent Ballasts	FLUORESCENT BALLASTS; Electronic Ballasts, High Efficiency, NEMA Premium, Program Start, Low Ballast Factor, Multivolt 120V or 277V, 1 or 2 Lamps	Replace inoperative ballast with new high efficiency NEMA Premium rated Fluorescent Electronic Ballast, Multivolt 120V or 277V, Program Start Ballast for Occupancy Sensor Application, Low Ballast Factor 0.70 to 0.80, For (1) or (2) 4-Foot F32T8 (32 Watt Lamp), F28T8 (28 Watt Lamp), or F32T8/25W (25 Watt Lamp) lamps. Complete the work within 2 working days after a work authorization is issued.	EA	76.22
700CY	Fluorescent Ballasts	FLUORESCENT BALLASTS; Electronic Ballasts, High Efficiency, NEMA Premium, Instant Start, Normal Ballast Factor, Multivolt 120V or 277V, 1 or 2 Lamps	Replace inoperative ballast with new high efficiency NEMA Premium rated Fluorescent Electronic Ballast, Multivolt 120V or 277V, Instant Start Ballast, Normal Ballast Factor 0.85 to 0.90, For (1) or (2) 4-Foot F32T8 (32 Watt Lamp), F28T8 (28 Watt Lamp), or F32T8/25W (25 Watt Lamp) lamps. Complete the work within 2 working days after a work authorization is issued.	EA	74.07

700EK	High Intensity Discharge Ballasts	High Intensity Discharge (HID) Ballasts. For Mercury Lamps: 100W	Replace existing with new High Intensity Discharge (HID) Ballasts, for Any Input Voltage For Mercury Lamps: 100W. Complete the work within 2 working days after a work authorization is issued.	EA	84.57
700EL	High Intensity Discharge Ballasts	High Intensity Discharge (HID) Ballasts. For Mercury Lamps: 175W	Replace existing with new High Intensity Discharge (HID) Ballasts, for Any Input Voltage For Mercury Lamps: 175W. Complete the work within 2 working days after a work authorization is issued.	EA	99.41
700EM	High Intensity Discharge Ballasts	High Intensity Discharge (HID) Ballasts. For Mercury Lamps: 250W	Replace existing with new High Intensity Discharge (HID) Ballasts, for Any Input Voltage For Mercury Lamps: 250W. Complete the work within 2 working days after a work authorization is issued.	EA	121.02
700EN	High Intensity Discharge Ballasts	High Intensity Discharge (HID) Ballasts. For Mercury Lamps: 400W	Replace existing with new High Intensity Discharge (HID) Ballasts, for Any Input Voltage For Mercury Lamps: 400W. Complete the work within 2 working days after a work authorization is issued.	EA	172.88
700EP	High Intensity Discharge Ballasts	High Intensity Discharge (HID) Ballasts. For Metal Halide Lamps: 70W	Replace existing with new High Intensity Discharge (HID) Ballasts, for Metal Halide Lamps: 70W. Complete the work within 2 working days after a work authorization is issued.	EA	205.31
700EQ	High Intensity Discharge Ballasts	High Intensity Discharge (HID) Ballasts. For Metal Halide Lamps: 100W	Replace existing with new High Intensity Discharge (HID) Ballasts, For Metal Halide Lamps: 100W. Complete the work within 2 working days after a work authorization is issued.	EA	217.44
700ER	High Intensity Discharge Ballasts	High Intensity Discharge (HID) Ballasts. For Metal Halide Lamps: 175W	Replace existing with new High Intensity Discharge (HID) Ballasts, For Metal Halide Lamps: 175W. Complete the work within 2 working days after a work authorization is issued.	EA	118.86
700ES	High Intensity Discharge Ballasts	High Intensity Discharge (HID) Ballasts. For Metal Halide Lamps: 250W	Replace existing with new High Intensity Discharge (HID) Ballasts, for Metal Halide Lamps: 250W. Complete the work within 2 working days after a work authorization is issued.	EA	156.68
700ET	High Intensity Discharge Ballasts	High Intensity Discharge (HID) Ballasts. For Metal Halide Lamps: 400W	Replace existing with new High Intensity Discharge (HID) Ballasts, For Metal Halide Lamps: 400W. Complete the work within 2 working days after a work authorization is issued.	EA	194.49
700EU	High Intensity Discharge Ballasts	High Intensity Discharge (HID) Ballasts. For Metal Halide Lamps: 1000W	Replace existing with new High Intensity Discharge (HID) Ballasts, For Metal Halide Lamps: 1000W. Complete the work within 2 working days after a work authorization is issued.	EA	324.16
700EV	High Intensity Discharge Ballasts	High Intensity Discharge (HID) Ballasts. For High Pressure Sodium Lamps: 35W	Replace existing with new High Intensity Discharge (HID) Ballasts, For High Pressure Sodium Lamps: 35W. Complete the work within 2 working days after a work authorization is issued.	EA	154.51

Replace existing with new Government Furnished Compact Fluorescent Electronic Ballast, 120V - 277V. Compact Fluorescent Ballasts are provided by the Activity at the facility. Complete the work within 2 working days after a work authorization is issued.	EA	5.41

PEARL HARBOR NAVAL SHIPYARD (PHNSY) & INTERMEDIATE MAINTENANCE FACILITY (IMF) –
CONTRACTOR OCCUPATIONAL SAFETY, HEALTH AND ENVIRONMENTAL REQUIREMENTS

The following occupational safety, health and environmental requirements are those of PHNSY&IMP OSHE Division (Code 106) and are specific to Contractor work performed in or for PHNSY&IMP. The Contractor, and all of its agents, shall abide by the requirements as applicable to the work being performed. If there are conflicts between the requirements, regulations, or laws, the most stringent shall apply. Other than for emergency notifications (e.g.: uncontrollable oil or hazardous substance spills), the Contractor shall forward all PHNSY&IMP (Activity) contract required information (i.e. record, reports, and other submittals) through the Contracting Officer.

1. Contractor Occupational Safety, Health & Environmental (OSHE) Brief. Contractors shall attend a Contractor OSHE Brief given by PHNSY&IMP OSHE Division (Code 106) prior to the start of work. This briefing may be held concurrently with the Pre-Performance Conference. The Contracting Officer will coordinate the scheduling of the brief with Code 106. At the briefing, the Contractor shall be prepared to provide information on the types and quantities of wastes/wastewater generated during the project. Sub-contractors shall also be present at the briefing. The Contractor shall provide, in writing, the name, phone number, and pager number of the individual(s) responsible for the Contractor's Occupational Safety and Health oversight.

2. General Occupational Safety, Health and Environmental Compliance. Comply with all Federal, State and local occupational safety, health and environmental laws and regulations.

3. Ensure that the following work controls and procedures are addressed in the Scheduled Maintenance Service Plan, Accident Prevention Plans (APP), and Activity Hazard Analysis (AHA), as applicable:

- (1) Establishment of a controlled boundary area;
- (2) Posting of hazard warning signs;
- (3) Personal Protective Equipment (PPE) including respiratory protection required to be worn;
- (4) Training and medical requirements;
- (5) Work practices to minimize exposure and personal exposure;
- (6) Personal hygiene practices;
- (7) Prohibition of the storage and consumption of food, beverage and tobacco products and the application of cosmetics in the work area;
- (8) Work area cleanliness;
- (9) Prohibition of the use of compressed air for cleaning of surfaces; and
- (10) Designating a point of contact for safety and health issues and actions to take in case of an emergency.

4. Hazardous Waste (HW). Hazardous waste and empty containers generated by the Contractor shall be turned in to the PHNSY&IMP Hazardous Waste Facility (Building 1663) using a Custody Transfer Form (CTF) and Material Safety Data Sheet (MSDS) via the Government's Contracting Officer.

a. HW shall be properly packaged using Department of Transportation (DOT) approved containers and labeled to identify its contents prior to turn in to Code 106.3. Contractor shall be responsible for providing DOT containers compatible with the waste generated.

b. Contractor is not responsible to sample or analyze the waste generated. Waste will be sampled and analyzed by Code 106.3.

c. Keep waste segregated. Do not combine or consolidate waste generated from different processes.

d. The above requirements are based upon work that generates minimal HW. If the work is expected to generate an excessive amount of HW (i.e. greater than twenty 55-gallon drums), contact Code 106.3 via the Contracting Officer for additional guidance.

Hazardous Waste (HW) shall be turned in daily to the Hazardous Waste Facility (HWF) at Building 1663. If needed, a Hazardous Waste Satellite Accumulation Area (HWSAA) permit to store HW at or near the point of

PEARL HARBOR NAVAL SHIPYARD (PHNSY) & INTERMEDIATE MAINTENANCE FACILITY (IMF) –
CONTRACTOR OCCUPATIONAL SAFETY, HEALTH AND ENVIRONMENTAL REQUIREMENTS
generation may be issued by PHNSY&IMF Code 106.3 at Building 1663. Requirements on establishing and maintaining a HWSAA will be provided when a request for a HWSAA is made.

Debris not allowed in refuse bins (dumpsters) includes: Empty containers that previously held a hazardous substance, batteries (pagers, cellular phones), fluorescent bulbs, or oily rags (solvent laden or lube oil). All these shall be turned in to the HWF at Building 1663 via CTF.

5. Wastewater and Rinsewater. Ensure compliance with the best management practices and requirements of the PHNSY&IMF Water Pollution Prevention Plan, NAVSHIPYD&IMFPEARLINST 5090.8. Storm Water: Prohibits non-storm water discharges into the storm water system and requires controls to reduce the discharge of pollutants. Contractors shall not discharge any wastewater or rinsewater into storm drains, dry-dock drains or the harbor. Any generated wastewater shall be collected and tested for proper disposal. Washing and rinsing of equipment and personnel shall be performed in a facility connected to the sanitary sewer system; such as an approved sink. Contact Code 106.3 via the Contracting Officer for assistance in disposing of wastewater.

6. Oil and Hazardous Substance Spills (including gases). For small accidental releases, contain, collect and clean up, then notify Regional Dispatch Center (RDC) via the Contracting Officer. For large uncontrollable spills, immediately notify RDC at 474-1271 and the Contracting Officer.

7. Work Area Cleanliness. Maintain the work area in the highest reasonable state of cleanliness consistent with the work. As a minimum, all trash, industrial waste and mechanical debris shall be removed at least once every shift. If mechanical debris contains lead/chromate containing paint debris, additional packing/labeling requirements and environmental disposal requirements may apply.

8. Dust and Debris Containment. Adequate containment methods shall be employed to prevent uncontrolled release of dust or debris outside of the designated abatement control barriers/boundaries."

9. The Contractor shall ensure that work performed by their employees does not create safety or health hazards for PHNSY&IMF personnel.

10. Ensure that employees comply with posted requirements for wearing PPE.

11. Do not relocate, alter, or modify PHNSY&IMF temporary services. Contractor shall not tap into or use temporary ventilation systems/ducting or installed temporary electrical power without prior authorization.

12. Do not remove, alter, or tamper with staging erected by PHNSY&IMF.

13. Posted Hazard Warnings. Restrict entry in PHNSY&IMF work areas posted with hazard warning signs.

14. Gas Free. The following provisions shall be observed:

a. The Contractor shall provide a competent person as required in 29 CFR 1910 or 29 CFR 1926 as applicable.

b. Ensure that each employee that enters a confined or enclosed space and other areas with dangerous atmospheres is trained to perform all required duties safely.

DBIDS

DBIDS Program:

DBIDS is an enterprise identity management and perimeter installation access control solution in which Contractor personnel who enroll, and are approved, are subsequently granted access to the installation for a period up to three years, or the length of the contract, whichever is less, and are not required to obtain a new pass from the Base Pass and Identification Office for each visit. There are no fees associated with obtaining a DBIDS credential.

The Government performs background screening and credentialing. Throughout the year the Contractor employee must continue to meet background screening standards. Periodic background screenings are conducted to verify continued DBIDS participation and installation access privileges. DBIDS access privileges will be immediately suspended or revoked if at any time a Contractor employee becomes ineligible.

DBIDS Credentials:

Contractor employees shall furnish a completed copy of the SECNAV 5512/1 form to obtain the required background check and visit the local Navy Installation Visitor Control Center to obtain a DBIDS credential once approved. The SECNAV 5512/1 form and additional information about DBIDS can be found at: <https://www.cnic.navy.mil/om/dbids.html>. The Contractor may initiate the adjudication process when a background screen failure results in disqualification from participation in DBIDS and the Contractor employees do not agree with the reason for disqualification. The Contractor may also apply for a waiver when a background screening failure results in disqualification from participation in DBIDS. The Commanding Officer will be the final waiver determination authority. The Contractor shall immediately collect employee DBIDS credentials and notify the KO in writing:

- (1) That an employee has departed the company without having properly returned or surrendered their DBIDS credentials.
- (2) That there is a reasonable basis to conclude that an employee, or former employee, might pose a risk, compromise, or threat to the safety or security of the installation or anyone therein.

DBIDS Paper Passes:

In the event that a visitor, vendor, or Contractor employee elects not to participate in DBIDS, the individual will be issued DBIDS paper pass from the Base Pass and Identification Office in order to access to the installation. The time standard for the validity of a pass to access an installation will be not more than thirty (30) days and may be further restricted based on local policy or by Federal, DOD, Navy, and CNIC guidance. The Government will not be responsible for any cost or lost time associated with obtaining paper passes or added vetting or inspections incurred by non-participants in the DBIDS credentialing process.

ATTACHMENT 0200000-20
SECURITY REQUIREMENTS

Trustworthiness Security – Navy Contract/Projects

Reference is hereby made to Navy awarded contracts requiring Contractor access to Navy information systems, sensitive unclassified information or areas critical to the operations of the command. Although this contract is not classified and therefore Contractor employees are not required to have obtained a National Agency Check (NAC) trustworthiness determination, the Department of the Navy (DON) has determined that all DON information systems are sensitive regardless of whether the information is classified or unclassified. A Contractor whose work involves access to sensitive unclassified information warrants a judgment of an employee's trustworthiness. Therefore, all personnel accessing DoN Computer systems must pass a National Agency Check to verify their trustworthiness and the Contractor shall provide acceptable substitute(s) for those personnel that are rejected. Also, Command will include Facility Access Determination (FAD) program requirements in the contract specifications when trustworthiness determinations will be required for the Contractor employees. The following addresses those requirements for Trustworthiness Security. "Each Contractor employee will have a favorably completed National Agency Check (NAC). If Contractor personnel currently have a favorably adjudicated NAC the Contractor will notify the Security Manager of the command they will visit utilizing OPNAV 5521/27, Visit Request Form. The visit request will be renewed annually or for the duration of the contract if less than one year. If no previous investigation exists the Contractor personnel will complete the requirement for a Trustworthiness NAC. If the Contractor employee is a Foreign National, prior approval of the Information Assurance Manager (IAM) is required. Access may be granted to Foreign Nationals who have a need to know, when at least one of the following applies:

Foreign National is employed by DoD, or

Foreign National possesses a current Functional Accreditation approved by the Navy International Program Office (NAVIPO), or Foreign National possesses a current Visit Request Form (OPNAV 5521/27 (1-73) as defined in OPNAVINST 5510.1H), which is on file with the requesting activity. The following addresses those requirements for Trustworthiness Security:

Each Contractor employee must have a favorably completed National Agency Check (NAC).

If Contractor personnel currently have a favorably adjudicated NAC the Contractor shall notify the Security Manager of the Government command they will visit who will validate this in the Joint Personnel Adjudication System (JPAS). The request shall be renewed annually or for the duration of the contract if less than one year.

If no previous investigation exists the Contractor personnel shall complete the requirement for a Trustworthiness NAC.

Investigations for public trust positions, to include IT-II (Limited Privileged) and IT-III (Non-Privileged) positions that access unclassified sensitive information when clearance eligibility is not required, will be submitted to the Office of Personnel Management (OPM) utilizing the SF-85P (code 08B for IT-II and code 02B for IT-III) and will include the SF-87 Fingerprint Card or electronic fingerprint transmission. The Government Security Manager will process the Trustworthiness NAC. The Contractor employee shall provide the completed Personnel Security Investigation (PSI) to the Security Manager along with the original signed release statements and applicant fingerprint card (FD87). The responsibility for providing the fingerprint card rests with the Contractor. The Security Manager will review the form for completeness, accuracy and suitability issues and will forward the completed SF85P along with attachments to OPM. The Department of Navy Central Adjudication Facility (DoN CAF) will perform adjudicating contractor investigations for public trust positions. Contractor fitness determinations made by the DoN CAF will be maintained in the Joint Personnel Adjudication System (JPAS). Favorable fitness determinations will support public trust positions only and not national security eligibility. If no issues are discovered, according to respective guidelines a "Favorable Determination" will be populated in JPAS and will be reciprocal within DoN. If issues are discovered, the DoN CAF will place a "No Determination Made" in the JPAS and forward the investigation to the submitting office for Government command's final determination.

The Trustworthiness NAC is processed through the Command Security Manager. The Contractor shall provide the completed SF-85P and two applicant fingerprint cards (FD 258). The Security Manager will review the form for

ATTACHMENT 0200000-20
SECURITY REQUIREMENTS

completeness, accuracy and suitability issues. The completed SF 85P along with attachments will be forwarded to (OPM) who will conduct the NAC.

The Department of the Navy Central Adjudication Facility will provide the completed investigation to the requesting command security manager for the trustworthiness determination. The command will provide written notification to the Contractor advising whether or not the Contractor employee will be admitted to command areas or be provided access to unclassified but sensitive business information.

Trustworthiness determinations are the sole prerogative of the Commanding Officer of the sponsor activity. If the Commanding Officer determines, upon review of the investigation, that allowing a person to perform certain duties or access to certain areas, would pose an unacceptable risk, that decision is final. No due process procedures are required. The Contractor support employee shall be released immediately.

The Contractor employee shall take all lawful steps available to ensure that information provided or generated pursuant to this arrangement is protected from further disclosure unless the agency provides written consent to such disclosure.

ATTACHMENT 0200000-20
SECURITY REQUIREMENTS

SECURITY REQUIREMENTS APPLICABLE FOR PEARL HARBOR NAVAL SHIPYARD (PHNSY) & INTERMEDIATE MAINTENANCE FACILITY (IMF)'S CONTROLLED INDUSTRIAL AREA, OTHER SENSITIVE AREAS, CONTROLLED NUCLEAR INFORMATION AREAS, AND/OR NUCLEAR WORK AREAS (REVISED AUG 2013)

The provisions of these security requirements are applicable to Shipyard & IMF areas including the areas listed below:

CIA-I (Controlled Industrial Area I) – The large fenced-in area encompassing the waterfront and industrial shops, extending from Building 1274 to include all of Bravo Pier 2.

When activated, CIA-II (Controlled Industrial Area II)- Dry Dock No. 4 Compound (including Building 1444).

Areas designated “Other Sensitive Area” (OSA), “Controlled Nuclear Information Area” (CNIA); and “Nuclear Work Area” (NWA).

Performance of all work under this contract (includes task and delivery orders) is restricted to

U.S. citizens and U.S. nationals only. U.S. citizen employees of a foreign owned, controlled, and/or influenced company (including a parent company) for access purposes are considered foreign nationals and special authorization would be required for escorted access to PHNSY & IMF spaces.

For issuance of Red or Yellow badges, a “classified contract” is required with a Contract Security Classification Specification (DD 254) that allows access to Restricted Data (for Red) and Naval Nuclear Propulsion Information (NNPI) (for both). Also, in accordance with OPNAVINST N9210.3 (Safeguarding of NNPI) the contract or subcontract must incorporate all NNPI handling requirements.

These security requirements are applicable to the prime contractor as well as to all subcontractors and suppliers thereunder. For unescorted access, these requirements shall be incorporated into Shipyard & IMF and co-located command originated and funded contracts and memorandums of agreement or understanding.

The period of proposed contract work to be performed in particular areas of the Shipyard & IMF is subject to further approval of the Shipyard & IMF Commander depending on the sensitivity of Shipyard & IMF industrial operations in the affected areas.

Three weeks prior to the visit, the contractor, subcontractors, and suppliers shall complete applicable items on Part 1 of the Contractor Visit Request (VR) form (PH-SYD 5512/28) and submit it to the Government Contracting Activity (GCA) or COR for completion of Part 2. The GCA/COR will then forward the VR and DD 254, as applicable, to the Shipyard & IMF Sponsor for completion of Part 3 no later than two weeks prior to the visit. The Shipyard & IMF Sponsor will submit the VR to the Pass and Identification Office (Pass and ID) no later than one week prior the visit. The VR must include the type of U.S. citizenship. Entry into the CIA, CNIA, NWA or OSA may be authorized under one of the following conditions.

For unescorted entry to the CIA: contractor personnel must show proof of U.S. citizenship before a Green badge can be issued.

For unescorted entry into an OSA, CNIA or NWA:

All contractors, subcontractors, and suppliers must have a DOD Facility Security Clearance and those contractor employees who need access to the OSA, CNIA and/or NWA must have DOD security clearances granted by Defense Security Service (DSS). A Yellow or Red badge will be issued depending on the areas needed to be accessed. For a Yellow (CNIA) badge, the contractor must have at least an Interim Confidential. For a Red (NWA) badge, the contractor must have a

final security clearance.

For situations other than the above, personnel requiring unclassified/CIA access may be issued a White “Escort Required” (“ER”) badge for CIA access under the escort of a briefed Yellow or Red badge Shipyard & IMF employee knowledgeable of the area. Escorted access to CNIA's and NWAs must be

ATTACHMENT 0200000-20
SECURITY REQUIREMENTS

coordinated with the cognizant Department Security Coordinator to ensure that the area is sanitized and the escort is properly briefed/knowledgeable of the area. Contractors, subcontractors, and suppliers are advised that processing of “ER” badges may take up to five working days to complete.

The initial submittal of VR forms need not be all-inclusive. It may be expanded to meet the essential requirements of the contractor. Each individual added to the list, however shall be subject to the same pre-entry screening requirements as outlined above.

Under no circumstances shall personnel sign, transmit or hand-carry their own VR. The VR should be mailed, e-mailed encrypted or password protected, or delivered by the GCA or Shipyard & IMF Sponsor.

Ensure that all contractor employees provide a valid (i.e. state or federally issued) photo identification card and proof of U.S. citizenship to the Pass and ID Office prior to being issued a Shipyard & IMF badge, see Attachment (1) for a list of acceptable documents.

Ensure any derogatory or questionable information concerning contractor employees possessing a DOD security clearance or a Shipyard & IMF badge is immediately reported to the Security Office (Code 1125) so that access eligibility can be evaluated.

Ensure that contractor employees attend a 30-minute orientation on the safety, security, and radiological protection aspects of industrial operations within the Shipyard & IMF.

NOTE: The briefing, which is in the form of a video presentation will be given at the Pass and ID

Office in groups of 10, prior to the issuance of Shipyard & IMF badges. Special arrangements for larger groups can be scheduled upon request.

Ensure that onsite contractor personnel issued Red or Yellow badges attend mandatory Shipyard security training and briefings as required by SECNAV M-5510.30 (DON Personnel Security Program) and DOD Directives.

Ensure that all employees wear and display the Shipyard & IMF badge in the chest area at all times while entering, remaining in, and exiting Shipyard & IMF spaces.

Ensure that each badge is used only by the specific individual named on the badge.

Maintain strict accountability over identification badges and passes issued by the Pass and ID Office. Report immediately, to the Pass and ID Office, any badges/passes that are missing or lost and the circumstances. Return badges/passes to the GCA immediately upon termination of any employee, upon expiration, upon completion of contract, or when no longer required. The GCA will ensure that all badges/passes are returned and forwarded to the Shipyard & IMF Pass and ID Office (Code 1125.2).

Restrict hours of work to 0630 – 1500 hours Monday through Friday only. When operational needs require the contractor to schedule work before 0630 and/or after 1500 (Monday through Friday) or on weekends and holidays, provide written notification at least two weeks in advance to GCA who will obtain approval from the respective Shipyard & IMF departments, offices, and shops. Such notifications will include the company name, type of work to be performed, location of work, specific dates, and hours of work. The POC will submit a request in writing to the Security Office (Code 1124) by Wednesday of

each week to add the contractor to the “Non-Duty Hours Contractor Access List” that is prepared weekly. Emergency access for contractors not on the non-duty hours list may be authorized entry by the Security Officer or Security Operations Officer upon verification with the POC.

Restrict employees/representatives to the work site and control travel directly to and from the work site.

The Pass and ID Office is located in Building 207 at Safeguard Street and Russell Avenue.

No vehicle will be permitted access to a work site in the CIA without a valid Shipyard & IMF CIA vehicle

pass. The Shipyard & IMF CIA vehicle passes are issued by the Shipyard & IMF Pass and ID Office. Shipyard & IMF CIA vehicle passes will not be issued unless proof of vehicle registration to the contractor’s company has been presented to Shipyard & IMF Pass and ID. All vehicles are required to conform to Shipyard & IMF traffic regulations. The speed limit is 15 MPH in the CIA. Outside the CIA, the speed limit is as posted or marked.

ATTACHMENT 0200000-20
SECURITY REQUIREMENTS

Only those contractor vehicles meeting all of the following criteria will be allowed to enter the CIA with the Shipyard & IMF CIA vehicle pass:

All vehicles must clearly display an authorized company sign or logo on both sides of the vehicles. The logo must be either painted on or a magnetic sign. Paper or cardboard signs are not authorized. Lettering of the logo must not be less than 2-1/2 inches in height and 1/4 inch wide.

They must be company or commercial vehicles used by the contractor to transport heavy equipment and/or material to the job site. In limited circumstances, contractor vehicles may be allowed entry to conduct on-site inspections at the job site.

NOTE: Contractor vehicles will not be used to transport employees to the job site. Privately-owned vehicles will not be allowed in the CIA.

A limited number of CIA vehicles passes will be issued to each contractor, subcontractor and vendor to facilitate work requirements. Every vehicle entering the CIA will display the pass on the dashboard or visor (facing outward). The pass will be visible at all times while in the CIA. Parking is limited to those areas that are specifically identified on the pass. If additional passes are required, adequate justification must be presented to the Pass and ID Office via the GCA.

Vehicles may enter and exit from gates located on Paul Hamilton Avenue or on Chosin Street, Monday through Friday, 0630 to 1500 hours. For access before 0630 and after 1500 hours, weekends, and holidays the contractors must comply with paragraph 6.m. After proper notification, contractors may enter and exit from either gate after hours, weekends, and holidays.

Parking is not permitted on any piers on any dry dock/waterfront areas. Contractors shall not park on or block the marked fire lanes at any time. Vehicles may stop on the piers of dry dock/waterfront areas for 15 minutes for loading or unloading. An exception may be made for vehicles which are part of the equipment needed to do the required work and are attached or connected to the pier or ship, i.e., a truck which uses a mounted generator, a vehicle with built-in equipment, etc. A written request for pier parking authorization with justification will be sent to the Shipyard & IMF Security Officer (Code 1120) via the GCA at least two weeks prior to the date parking space is required. The following information is required:

The license number of the vehicle(s).

The type and size of the vehicle(s) (pickup truck, crane, forklift, etc.)

Parking location.

Purpose and duration.

Parking for privately-owned vehicles is available:

In the "N" parking lot on Central Avenue and "D" parking lot on Paul Hamilton Avenue, located between South Avenue and Safeguard Street.

In the "C" parking lot on Lake Erie Street and Central Avenue.

All vehicles are subject to search while entering, remaining in, or leaving the Shipyard & IMF and/or Joint Base Pearl Harbor-Hickam (JBPHH) areas. A Property Pass (OP-7) issued and signed by the GCA must cover all government material being transported out of the CIA by contractors. Material found without a Property Pass will be confiscated and a police offense report issued.

Entry into shop/office/ship spaces covered by this contract will be subject to prior approval of the

respective Shop Superintendent/Office Head/Ship's Commanding Officer. Contractors will coordinate action with the GCA for obtaining entry approval.

The Shipyard & IMF Security Officer will provide guard services on a reimbursable basis for contractors requiring guard services. The contractor must notify and obtain approval from the Shipyard & IMF Security Office via the GCA at least two weeks prior to the time guard services will be required. Notification in writing shall (include the purpose and number of hours guard services will be required).

Contractor personnel will not be permitted to enter Shipyard & IMF buildings, spaces, and areas not covered by this contract except on prior approval of the Shipyard & IMF department/office/shop having jurisdiction of the areas. Contractors will coordinate action with the GCA to obtain such entry approval.

ATTACHMENT 0200000-20
SECURITY REQUIREMENTS

Access to unclassified and classified U.S. Navy shipbuilding, conversion, or repair technology and related technical information manuals, documents, drawings, plans, specifications, etc., by the contractor shall be restricted to an official need-to-know basis. This type of information shall be handled, controlled, and safeguarded to prevent oral, visual, and documentary disclosure to uncleared personnel, the public, to foreign sources, and to all personnel not having an official need-to-know. It shall be returned to the Pearl Harbor Naval Shipyard & IMF upon completion of contracted work, except when the GCA grants specific retention authorization.

Photography and photographic equipment are prohibited in the Pearl Harbor Naval Shipyard & IMF, to include personal cellular phones with camera features. When operationally required, a written request containing specific justification and details will be submitted to the Security Office (Code 1125) via the GCA for consideration. If a Shipyard & IMF photographer is unable to take the photographs, authorization will only be granted to the contractor if the contractor has a Shipyard Sponsor and is under continuous escort of a designated Shipyard & IMF employee. The designated escort shall be briefed by Code 1125. The escort will take the film or photographic media in his or her custody. The Sponsoring Shipyard Code/Office will mark and control the photographs as "For Official Use Only" and route the photographs in accordance with local regulations for review and approval of a Distribution Statement (prior to release from Shipyard & IMF).

Portable Electronic Devices (PEDs). PEDs include pagers, mobile/cellular telephones (with/without cameras), personal digital assistants/job performance aids, laptop/notebook /handheld computers, digital imagery (still/video) devices, analog/digital sound recorders (e.g. I-PODs), video game devices, USB devices, and devices of similar capability, functionality, or design. Privately-Owned PED devices such as those listed above are prohibited on Shipyard premises. Privately-Owned PEDs without camera devices are prohibited unless approved in writing by the local Information Assurance Authority (IAA) or Information Assurance Manager (IAM). Violations may result in the confiscation and sanitization of the PEDs. The only approved method of sanitizing most PEDs is physical destruction.

All users authorized to use PEDs in the Shipyard & IMF workspaces, whether privately-owned (includes contractor-owned) or government-owned, are required to comply with NAVSHIPYD&IMFPEARLINST 5239.1(series), Activity Information Systems Security Plan (AISSP)

For Privately-Owned PEDs without camera devices approved for use in Shipyard & IMF spaces, the user shall follow:
The PEDs will not handle, process, or store any U.S. Government information unless otherwise authorized by the IAM.
The PEDs will not be connected to any Shipyard & IMF network, U.S. Government-Owned computers, or associated peripherals.
The PEDs will operate in only approved locations. These PEDs are not allowed in spaces processing and/or handling classified information.

Users shall comply with software copyright laws and agreements.

Violations of the above may result in the confiscation of the PED.

The U.S. Government will not be liable for the privately-owned PED hardware/software while on the Shipyard & IMF premises.

For U.S. Government-Owned PEDs approved for use in Shipyard & IMF spaces and issued for official government travel, the user shall follow:

Government-Owned PEDs that are synchronized with desktop computers on Shipyard & IMF Local Area Network (LAN) shall follow the security measures in Enclosure (2) of NAVSHIPYD&IMFPEARLINST 5239.1(series).

Use of Government-Owned PED equipment while on travel and performing official government business is allowed.

Government-Owned PEDs shall not be checked as baggage, stored in airport or bus station lockers, or left with desk clerks at motels. PEDs with NNPI data shall not be left unattended in the motel room. If a PED with no NNPI data is left unattended in the motel room, it must be locked in a personally owned container (i.e., luggage, brief case, etc.).

Government-Owned PEDs shall not be taken out of the United States without an authorization letter from the IAM.

Government-Owned PEDs will not be used to store passwords; safe and door combinations; personal identification numbers (PINs); as well as classified information.

ATTACHMENT 0200000-20
SECURITY REQUIREMENTS

Government-Owned PEDs shall not be used for classified information processing unless specifically authorized in writing by the local IAA.

Where feasible, Government-Owned PEDs shall employ up-to-date signature files that are used to profile and identify viruses, worms, and malicious code. As proven anti-virus clients for PEDs become available, these clients shall be deployed to the greatest possible extent in all PEDs that connect to the Shipyard & IMF network.

Ensure that yellow plastic material is not used for warning signs, covering material, etc.

Be responsible for control and security of all contractor-owned equipment and material at the work site. Report immediately, all missing/lost/stolen property to the Joint Base Pearl Harbor Hickam Security Detachment (phone 474-6751) as each case occurs.

Ensure that no material is stacked within ten (10) feet of the CIA perimeter. Remove from the work site, or secure, ladders or other such equipment, which could be used to climb the CIA perimeter fence. Ensure that no vehicles are parked within ten (10) feet of the CIA perimeter.

Provide written notification to the Commander, Pearl Harbor Naval Shipyard & IMF (Code 1120) via the GCA, two (2) weeks prior to actual start of work to allow for notification of the appropriate Shipyard & IMF departments, offices, and shops of the impact resulting from the contract work. Such notifications will

include specific details such as work schedules (including actual start date for Shipyard & IMF entry), and impact statements concerning tasks to be done, e.g. specific parking spaces to be vacated, inclusive dates involved, traffic rerouting, changes to traffic and parking patterns, traffic/parking controls to be instituted by the contractor, barricades to be erected by the contractor, etc., along with sketches of the particular areas involved.

Two weeks prior to making any penetrations (i.e. tunneling under, cutting through a fence or building, etc.) in a restricted area (e.g. CIA fence line, CNIA or NWA) the contractor shall contact

Code 1120 via the GCA to make arrangements for a security guard or other measures required to meet all security requirements. The cost for the security guard will be charged to the contractor.

Any exceptions to these security requirements must be coordinated with the Security Office (Code 1120).

DOCUMENTS ACCEPTABLE FOR PROOF OF U.S. CITIZENSHIP
(Original documents or certified copies)

U.S. BIRTH REGISTRATION CARD (with Registrar's raised seal and signature)

U.S. BIRTH CERTIFICATE (original with raised seal from one of the 50 states or outlying U.S. territories or U.S. possessions)

U.S. IMMIGRATION AND NATURALIZATION SERVICE NATURALIZATION CERTIFICATE (INS N-550/570)

DD FORM 1966 (U.S. citizenship documents sighted are listed and attested to by a recruiting official)

DELAYED BIRTH CERTIFICATE (Original with Registrar's seal and signature and cites secondary evidence)

SECURITY REQUIREMENTS

INSTRUCTIONS FOR COMPLETION OF THE CERTIFICATE PERTAINING TO FOREIGN INTERESTS

Question 1:

Do any foreign person(s), directly or indirectly, own or have beneficial ownership of 5% or more of the outstanding shares of any class of your organization's equity securities? If yes:

-Identify the percentage of any class of stock or other securities issued which are owned by foreign persons, broken down by country. Include indirect ownership through one or more intermediate level(s) of subsidiaries. Indicate voting rights of each class of stock.

-Are there shareholder agreements? If yes, attach a copy(ies), and if none, so state.

-Indicate whether a copy of SEC Schedule 13D/13G report has been received from any investor.

If yes, attach a copy(ies).

Note: Ownership of less than 5% should be included if the holder is entitled to control the appointment and tenure of any management position.

(For entities which do not issue stock): Has any foreign person directly or indirectly subscribed 5% or more of your organization's total capital commitment? If yes:

-Identify the percentage of total capital commitment which is subscribed by foreign persons.

-Is there an agreement(s) with the subscriber(s)? If yes, attach a copy(ies), and if none, so state.

Question #2:

Does your organization directly or indirectly through your subsidiaries and/or affiliates, own 10% or more of any foreign interest? If yes:

-Identify the foreign interest by name, country, percentage owned, and personnel who occupy management positions with the organizations.

-If there are personnel from your organization who occupy management positions with the foreign firm(s), identify the name(s), title, and extent of involvement in the operations of the organizations, (to include access to classified information).

Question #3: Do any non-U.S. citizens serve as members of your organization's board of directors (or similar governing body), officers, executive personnel, general partners, regents, trustees or senior management officials? If yes:

-Identify the foreign person(s) by name, title, citizenship, immigration status and clearance or exclusion status.

-Attach copies of applicable by-laws or articles of incorporation, which describe the affected position(s). However, if you have already provided such copies to the Cognizant Security Agency Industrial Security Representative, so state.

Question #4:

Does any foreign person(s) have the power, direct or indirect, to control the election,

appointment, or tenure of members of your organization's board of directors (or similar governing body) or other management positions of your organization, or have the power to control or cause the direction of other decisions or activities of your organization? If yes:

-Identify the foreign person(s) by name, title, citizenship, and all details concerning the control or influence.

ATTACHMENT 0200000-20
SECURITY REQUIREMENTS

Note: If any foreign person(s) have such power, this question shall be answered in the affirmative even if such power has not been exercised, and whether or not it is exercisable through ownership of your facility's securities, if such power may be invoked by contractual arrangements or by other means.

Question #5:

Does your organization have any contracts, agreements, understandings, or arrangements with a foreign person(s)? If yes:

For each instance, provide the name of the foreign person, country, percentage of gross income derived, and nature of involvement, including:

- Whether defense/nuclear related or not
- Involvement with classified or export controlled technology
- Compliance with export control requirements
- Where the organization has a large number of involvements and where these involvements are not defense/ nuclear related and represent a small percentage of gross income; the explanation can be a generalized statement addressing the totals by country.

Note: We do not expect and will not require the contractor to ask every customer if he/she falls within the NISPOM definition of a foreign person. We will ask the contractor to provide ongoing security education to those individuals who negotiate and/or administer such agreements regarding their responsibilities to report agreements with a foreign person(s) to the best of their knowledge. The contractor will be certifying the response to this question to "the best of his/her knowledge" or "through his/her best efforts".

Question #6:

Does your organization, whether as borrower, surety, guarantor or otherwise have any indebtedness, liabilities or obligations to a foreign person(s)? If yes:

- Provide your overall debt-to-equity ratio (in percentage).
- With respect to indebtedness or liability to a foreign person, indicate to whom indebted or liable, what collateral has been furnished or pledged, and any conditions or covenants of the loan agreement. If stock or assets have been furnished or pledged as collateral, provide a copy of the loan agreement or pertinent extracts thereof (to include procedures to be followed in the event of default).
- If any debentures are convertible, provide specifics.
- If loan payments are in default, provide details.
- This question should be answered in the affirmative if the debt is with a U.S. entity that is owned or controlled either directly or indirectly by a foreign person. If unknown, so state.

Note: As stated above, we do not expect and will not require the contractor to ask every lender if he/she qualifies as a foreign person. We will ask the contractor to provide ongoing security education to those employees who handle lending arrangements regarding their responsibilities to report any such arrangements with a foreign person lender, to the best of their knowledge. The contractor will be certifying the response to this question as being to "the best of his/her knowledge" or "through his/her best efforts".

Question #7:

During your last fiscal year, did your organization derive:

5% or more of its total revenues or net income from any single foreign person.

ATTACHMENT 0200000-20
SECURITY REQUIREMENTS

In the aggregate 30% or more of its revenues or net income from foreign persons? If yes to either part of the question:

- Provide overall percentage of income derived from foreign sources by country, nature of involvement, and type of services or products.
- Indicate if any single foreign source represents in excess of 5% of total revenues or net income.
- Indicate whether any classified information is involved.
- State whether facility is in compliance with applicable export control requirements.

Note: As previously stated, we do not expect and will not require the contractor to ask every customer if he/she qualifies as a foreign person. We will ask the contractor to provide ongoing security education to those employees who handle information about company revenues regarding their responsibility to report revenues derived from a foreign person(s) to the best of their knowledge. The contractor will be certifying the response to this question as being to "the best of his/her knowledge" or "through his/her best efforts".

Question #8:

Is 10% or more of your organization's securities held in "nominee shares," in "street names" or in some other method which does not disclose the beneficial owner? If yes:

- Identify each foreign institutional investor holding 10% or more of the voting stock by name and address and the percentage of stock held.
- Indicate whether any investor has attempted to, or has exerted any control or influence over appointments to management positions or influenced the policies of the organization.
- Include copies of SEC Schedule 13D/13G.

Question #9:

Do any of the members of your organization's board of directors (or similar governing body), officers, executive personnel, general partners, regents, trustees or senior management officials hold any positions with, or serve as consultants for, any foreign person(s)? If yes:

- Provide the name, title, citizenship, immigration status and clearance or exclusion status on all such persons.
- Identify, by name and address, each foreign organization with which such persons serve and indicate the capacity in which they are serving.
- Include a Statement of Full Disclosure of Foreign Affiliations for every cleared individual who is a representative of a foreign interest.

Note: We expect the contractor to be able to answer this question fully for those individuals holding such positions with his/her foreign subsidiaries and any foreign interests. However, we do not expect and will not require the contractor to ask every individual to ascertain if he/she is serving as a director, officer or manager of a foreign person. We will ask the contractor to provide ongoing security education to all key management personnel of their responsibilities to report serving as an interlocking director or in any other type of positions with a foreign person to the best of their knowledge. The contractor will be certifying the response to this question as being to "the best of his/her knowledge" or "through his/her best efforts".

Question #10:

Is there any other factor(s) that indicates or demonstrates a capability on the part of foreign persons to control or influence the operations or management of your organization? If yes:

- Describe the foreign involvement in detail, including why the involvement would not be reportable in the preceding questions.

ATTACHMENT 0200000-20
SECURITY REQUIREMENTS

DEFINITIONS FOR COMPLETION OF THE CERTIFICATE PERTAINING TO FOREIGN INTERESTS

Affiliate. Any entity effective owned or controlled by another entity.

Beneficial Owner. The true owner of a security who may, for convenience, be recorded under the name of a nominee. Such ownership entitles the owner to the power to vote or direct the voting of a security or to impose or direct the disposition of a security.

Bond. A certificate which is evidence of a debt in which the issuer promises to repay a specific amount of money to the bondholder, plus a certain amount of interest, within a fixed period of time.

Convertible Debentures. Bonds which the holder can exchange for shares of voting stock. **Covenant.** A detailed clause in a lending agreement designed to protect the lender.

Debenture. A general debt unsecured by a pledge of any specific piece of property. Like any other general creditor claims, a debenture is secured by any property not otherwise pledged.

Debt-to-Equity Ratio. Total liabilities divided by total shareholders' equity (total assets minus total liabilities of a corporation; also called stockholders' equity, equity, and net worth). This shows to what extent owners' equity can cushion creditors' claims in the event of liquidation.

Equity Security. An ownership interest in a company, most often taking the form of corporate stock.

Foreign Interest. Any foreign government, agency of a foreign government, or representative of a foreign government any form of business enterprise or legal entity organized, chartered or incorporated under the laws of any country other than the U.S. or its possessions and trust territories, and any person who is not a citizen or national of the United States.

Foreign Person. Any foreign interest and any US person effectively owned or controlled by a foreign interest.

Guarantor. One who makes the guaranty (an agreement or promise to answer for the debt, default or miscarriage of another).

Immigration Status. Legal basis for a non-US citizen's residence in the United States (e.g., work visa, admission for permanent residence). **Note:** Immigration and Naturalization Service Form 1-9 is an excellent source for this information.

Joint Venture. A partnership or cooperative agreement between two or more persons or firms, usually restricted to a single specific undertaking. Normally the undertaking is of short duration, such as for the design and construction of a dam.

Liability. Claim on the assets of a company or individual.

Licensing Agreement. A permit granted by one business to another which permits duplication of processes and production of similar items.

Management Positions. For the purposes of the questions on this form, management positions shall include owners, officers, directors, partners, regents, trustees, senior management officials, other executive personnel and the facility security officer.

Nominee Share. A share of stock or registered bond certificate which has been registered in a name other than the actual owner.

Proxy. One who acts for another. Also, the document by which such a representative is authorized to act.

Representative of a Foreign Interest (RFI). A citizen or national of the U.S., who is acting as a representative of a foreign interest (see Foreign Interest).

S.E.C. Schedule 13D. This schedule discloses beneficial ownership of certain registered equity securities. Any person or group of persons who acquire a beneficial ownership of more than 5 percent of a class of registered equity securities of certain issuers must file a Schedule 13D reporting such acquisition with certain other information.

S.E.C. Schedule 13G. This schedule is a much abbreviated version of Schedule 13D that is only available for use by a limited category of "persons" (such as banks, broker/ dealers, and insurance companies) and even then only when the securities were acquired in the ordinary course of business and not with the purpose or effect of changing or influencing the control of the issuer.

ATTACHMENT 0200000-20
SECURITY REQUIREMENTS

Sales Agreement. An agreement between two parties for the sale of goods or services on a continuing basis.

Stock Option. An option is the right to buy or sell at some point in the future.

Street Name. The common practice of registering publicly traded securities in the name of one or more brokerage firms.

Subordinated Debenture. A bond having a claim on assets only after the senior debt has been paid off in the event of liquidation.

Surety. One who is immediately liable for the debt of another if that other person or entity falls to pay.

Total Capital Commitment. The sum of money and other property an enterprise uses in transacting its business.

US Person. Any form of business enterprise or entity organized, chartered or incorporated under the laws of the United States or its possessions and trust territories and any person who is a citizen or national of the United States.

PEARL HARBOR NAVAL SHIPYARD & INTERMEDIATE MAINTENANCE FACILITY CONTRACTOR
ENVIRONMENTAL SPECIFICATION GUIDELINES

Contractor Environmental Brief. Contractors shall attend a Contractor Environmental Brief given by PHNSY&IMF Environment Division (Code 106.3) prior to the start of work. The Contracting Officer/Representative shall coordinate the scheduling of the brief with Code 106.3. At the briefing, the Contractor shall be prepared to provide information on the types and quantities of wastes/wastewater generated during the project. Sub-contractors shall also be present at the briefing.

Shipyards & IMF Points of Contact

Director, OSHE Office	106	473-8000 ext 4459
Environment Division	106.3	474-9080
Solid & Hazardous Waste Branch	106.31	473-8000 ext 4580
Environmental Compliance Branch	106.32	473-8000 ext 4457

Contractors shall comply with all Federal, State and Local environmental rules and regulations.

Hazardous Waste. Hazardous waste and empty containers generated by the contractor shall be turned in to the PHNSY&IMF Hazardous Waste Facility (Building 1663) using a Custody Transfer Form (CTF) and Material Safety Data Sheet (MSDS) via the government's Contracting Officer/Representative.

HW shall be properly packaged using DOT approved containers and labeled to identify its contents prior to turn in to Code 106.3. Contractor shall be responsible for providing DOT containers compatible with the waste generated.

Contractor is not responsible to sample or analyze the waste generated. Waste will be sampled and analyzed by Code 106.3.

Keep waste segregated. Do not combine or consolidate waste generated from different processes.

The above responsibilities are based upon contracts that generate minimal HW. If the work is expected to generate an excessive amount of HW (i.e., greater than twenty 55-gallon drums), contact Code 106.3 for additional guidance.

Bulk collection tanks. Contractors tank (collection system or tank truck) shall be clean and free of oily or chemical residue (visual cleanliness) and shall be inspected by Code 106.3 personnel PRIOR to the performance of work. Contact C/106.31 at 473-8000 ext 4580 or pager 577-0329 for this to be accomplished.

ATTACHMENT 0200000-20
SECURITY REQUIREMENTS

Wastewater/Rinsewater. Ensure contractors comply with the Best Management Practices and requirements of the PHNSY&IMF Water Pollution Prevention Plan, NAVSHIPYD&IMFPEARLINST 5090.8. Dry-Docks: Discharges to the harbor via dry-dock are regulated i.a.w. the effluent limitations, monitoring requirements and other conditions set forth by the permit. Storm Water: Prohibits non-storm water discharges into the storm water system and requires controls to reduce the discharge of pollutants. Contractors shall not discharge any wastewater or rinsewater into storm drains, dry-dock drains or the harbor. Any generated wastewater shall be collected and tested for proper disposal. Washing and rinsing of equipment and personnel shall be performed in a facility connected to the sanitary sewer system; such as an approved sink. Contact Code 106.3 for assistance in disposing of wastewater.

Hydroblasting or Sandblasting Operations. Hydroblast water or sandblast grit generated shall be collected, sampled and disposed of accordingly. Hydroblast water containment method shall be implemented to contain all hydroblast water generated from the process to prevent runoff entering the dry-dock drains, storm drains or harbor. Sandblast containment methods shall be employed to prevent any fugitive dust to become airborne and/or entering the dry-dock drains, storm drains or harbor. Code 106.3 shall be notified to conduct an inspection of the containment prior to the initial start of the hydroblasting/sandblasting work and prior to the disestablishment of the containment. If multiple containments will be established, each containment shall be inspected by Code 106.3 prior to use and prior to disestablishment. The activity responsible for collection, sampling, and disposal of hydroblast wastewater or spent grit will be dependent upon contract agreement.

Painting Operations. For spray painting operations, reasonable containment methods (e.g., screen containment) shall be employed to prevent uncontrolled release of overspray. Contact Code 106.3 for guidance when conducting spray painting operations in dry-dock areas which are higher than 10 feet below the topside of the dry-dock. Employing over-spray containments are not required if the method of applying paint coatings is by brush and/or roller. In either method of applying coatings, spray or brush and roller, a drop cloth is required below the area that is being painted. Code 106.3 shall be notified to conduct an inspection of the containment prior to the initial start of the painting operation and prior to the disestablishment of the containment. If multiple containments will be established, each containment shall be inspected by Code 106.3 prior to use and prior to disestablishment. No air drying of roller brushes, rags and containers.

deleted

Oil and Hazardous Substance Spills (including gases). Contractor or Contracting Officer/Navy Point of Contact shall notify Regional Operations Command and Control Center (ROCCC) at 474-1271 for all oil and hazardous substance spills. Hydraulic oil spills resulting from MANLIFT or forklift equipment that can be handled by the operator shall be immediately contained, cleaned up and notification made to ROCCC (formerly known as Naval Emergency Systems Communication (NESCOM)).

Notification of Demolition and Renovation Form (40 CFR 61, Subpart M). The Notification of Demolition and Renovation Form is required for all demolition projects and certain asbestos renovation projects. If this form is required, the contractor is responsible for preparing the form. The contractor should consult with PHNSY&IMF Health Division, Code 106.1, prior to preparing the form to ensure that it is completed correctly. The contractor shall forward the completed form to Code 106.1 for final review. Review by Code 106.1 in no way relieves the contractors of their responsibility for the accuracy of the information provided on the form. The contractor shall provide to Code 106.1 a copy of the submitted form along with verification of the date the form was submitted (e.g., a copy of the certified mail receipt). These documents must be submitted to and reviewed by Code 106.1 before work is permitted to start.

Asbestos Waste. If Public Works Center (PWC) Pearl performs asbestos removal work at the PHNSY&IMF, PWC shall be responsible for disposal of the waste. If asbestos removal is performed by a private contractor, Code

106.3 will accept the waste provided it is properly packaged (e.g., double bagged in 6 mil plastic, properly wetted, etc.) and turned in with a CTF. Contractor will be responsible to transport the waste to PHNSY&IMF Hazardous Waste Facility at Building 1663.

ATTACHMENT 0200000-20
SECURITY REQUIREMENTS

Emergency Planning and Community Right-to-Know Act (EPCRA) Sections 311 and 312 and 20 CFR 1910.1200. Provide to Code 106.1 an inventory and MSDS for all hazardous materials brought into the command. At the completion of the job, the "Job Site Hazardous Material Inventory Log" shall be completed and turned in to Code 106.1. Information on controlled biological substances such as "Gamazyme" needs to be reviewed by Code

106.3 prior to bringing material into PHNSY&IMF.

Lead and Chromate Paints. Paints containing lead or chromates greater than or equal to 0.01% by weight shall not be used.

Cadmium. Cadmium plated or coated material shall not be used unless no technically acceptable substitute is available.

deleted

Gas Cylinders. Ensure that all gas cylinders used by the contractor have proper plugs and caps and that a 20' separation is maintained between fuel and oxygen cylinders when not in use for 24 hours. Ensure that all these gas cylinders that are used by the contractor are taken back by the contractor. Do not abandon compressed gas cylinders. Recycling Program. Participate in the command recycling program. For additional information contact Code 106.31.

Environmental Protection Plan. The contractor shall submit the Environmental Protection Plan to Code 106.3 as applicable.

Construction and Demolition (C & D) Projects. OPNAVINST 5090.1B, Chapter 14 and NAVFAC Guide Specification 01572 require all facility construction and demolition projects include a Construction Waste Management Plan. The contractor shall submit the following to Code 106.3 as applicable:

Construction Waste Management Plan.

Periodic and end of project reports on the disposal of the C&D debris via the Contracting Officer/Representative. To facilitate tracking of C&D debris, forms and instructions will be provided at the Environmental Brief.

MANLIFT and Forklift Equipment. Operators Daily Checklist shall be filled out prior to operation of equipment on a daily basis. Any identified leaks or deterioration of hoses shall be noted and corrected prior to operation of equipment. At the end of shift, the MANLIFT and/or forklift shall be positioned or located away from nearby drains and drip cloth placed under the equipment. Spill kits shall be staged within close proximity of MANLIFT and forklift operations.

Wastewater Transfer. Ensure that all wastewater transfer operations do not result in a spill. Verify positive connection of hoses at collection tank, and provide a tank watch during pumping operations. Positive connection shall be verified prior to each use. Means of communication is required between source and destination of transfer/pumping operations. Collection tank shall be continuously monitored to ensure overflow/spill is prevented. When disconnecting or removing hoses, precautions shall be taken to prevent spillage of residual liquid in the hoses. Contingency spill kit and secondary means of spill containment for oil or bilgewater tank(s) shall be employed at all times when tank is in service.

Cross-Connection Control and Backflow Prevention. Request Shop 99 services when connection is required to any dockside/pierside potable water system. Only Shop 99 is authorized to make connections under the cross-connection control and backflow prevention program.

SECURITY REQUIREMENTS

SUP 5252.204-9400 Contractor Access to Federally Controlled Facilities and/or Unclassified Sensitive Information or Unclassified IT Systems (MAY 2010)

Homeland Security Presidential Directive (HSPD)-12, requires government agencies to develop and implement Federal security standards for Federal employees and contractors. The Deputy Secretary of Defense Directive-Type Memorandum (DTM) 08-006 "DOD Implementation of Homeland Security Presidential Directive -12 (HSPD-12)" dated November 26,2008 (or its subsequent DOD instruction) directs implementation of HSPD-12. This clause is in accordance with HSPD-12 and its implementing directives. This clause applies to contractor employees requiring physical access to any area of a federally controlled base, facility or activity and/or requiring access to a DOD computer/network, to perform certain unclassified both non-sensitive and sensitive duties. It is the responsibility of the command/facility where the work is performed to ensure compliance.

The requirement to control access to sensitive information applies to all US government IT systems and/or areas where unclassified but sensitive information may be discussed, displayed or maintained. DON policy prescribes that all unclassified data that has not been approved for public release and is stored on mobile computing devices must be treated as sensitive data and encrypted using commercially available encryption technology. Whenever granted access to sensitive information, contractor employees shall follow applicable DOD/DON instructions, regulations, policies and procedures when reviewing, processing, producing, protecting, destroying and/or storing that information. Operational Security (OPSEC) procedures and practices must be implemented by both the contractor and contract employee to protect the product, information, services, operations and missions related to the contract. The contractor shall designate an employee to serve as the Contractor's Security Representative. Within three work days after contract award, the contractor shall provide to the Navy Command's Security Manager and the Contracting Officer, in writing, the name, title, address and phone number for the Contractor's Security Representative. The Contractor's Security Representative shall be the primary point of contact on any security matter. The Contractor's Security Representative shall not be replaced or removed without prior notice to the Contracting Officer.

Non-Sensitive Positions

Contractor employee whose work is unclassified and non-sensitive (e.g., performing certain duties such as lawn maintenance, vendor services, etc ...) and who require physical access to publicly accessible areas to perform those duties shall meet the following minimum requirements:

Must be either a US citizen or a US permanent resident with a minimum of 3 years legal residency in the US (as required by The Deputy Secretary of Defense DTM 08-006 or its subsequent DOD instruction) and

Must have a favorably completed National Agency Check with Written Inquiries (NACI) including a Federal Bureau of Investigation (FBI) fingerprint check prior to installation access.

To be considered for a favorable trustworthiness determination, the Contractor's Security Representative must submit for all employees each of the following:

SF-85 Questionnaire for Non-Sensitive
Positions Two FD-258 Applicant Fingerprint
Cards Original Signed Release Statements

The contractor shall ensure each individual employee has a current favorably completed NAC!

ATTACHMENT 0200000-20
SECURITY REQUIREMENTS

The Contractor's Security Representative shall be responsible for initiating reinvestigations as required. Failure to provide the required documentation at least 30 days prior to the individual's start date shall result in delaying the individual's start date.

Sensitive Positions

Contractor employee whose duties require accessing a DOD unclassified computer/network, working with sensitive unclassified information (either at a Government or contractor facility), or physical access to a DOD facility must be a US citizen and possess a favorable trustworthiness determination prior to installation access. To obtain a favorable trustworthiness determination, each contractor employee must have a favorably completed National Agency Check with Local Credit Checks (NACLC) which consists of a NAC including a FBI fingerprint check plus credit and law enforcement checks. Each contractor employee applying for a trustworthiness determination is required to complete:

SF-86 Questionnaire for Sensitive Positions
Two FD-258 Applicant Fingerprint Cards
Original Signed Release Statements

Failure to provide the required documentation at least 30 days prior to the individual's start date shall result in delaying the individual's start date. To maintain continuing authorization for an employee to access a DOD unclassified computer/network, and/or have access to sensitive unclassified information, the contractor shall ensure that the individual employee has a current requisite background investigation. The Contractor's Security Representative shall be responsible for initiating reinvestigations as required and ensuring that background investigations remain current (not older than 10 years) throughout the contract performance period.

IT Systems Access

When access to IT systems is required for performance of the contractor employee's duties, such employees shall in-process with the Navy Command's Security Manager and Information Assurance Manager upon arrival to the Navy command and shall out-process prior to their departure at the completion of the individual's performance under the contract. Completion and approval of a System Authorization Access Request Navy (SAAR-N) form is required for all individuals accessing Navy Information Technology resources. The SAAR-N shall be forwarded to the Navy Command's Security Manager at least 30 days prior to the individual's start date. Failure to provide the required documentation at least 30 days prior to the individual's start date shall result in delaying the individual's start date.

When required to maintain access to required IT systems or networks, the contractor shall ensure that all employees requiring access complete annual Information Assurance (IA) training, and maintain a current requisite background investigation. The Contractor's Security Representative shall contact the Command Security Manager for guidance when reinvestigations are required.

Security Approval Process

The Contractor's Security Representative shall ensure that each individual employee pending assignment shall accurately complete the required forms for submission to the Navy Command's Security Manager. The Contractor's Security Representative shall screen the investigative questionnaires for completeness and accuracy and for potential suitability/security issues prior to submitting the request to the Navy Command's Security Manager. Forms and fingerprint cards may be obtained from the Navy Command's Security Manager. These required items, shall be

ATTACHMENT 0200000-20
SECURITY REQUIREMENTS

forwarded to the Navy Command's Security Manager for processing at least 30 days prior to the individual employee's anticipated date for reporting for duty. The Navy Command's Security Manager will review the submitted documentation for completeness prior to submitting it to the Office of Personnel Management (OPM). Suitability/security issues identified by the Navy Command's Security Manager may render the contract employee ineligible for the assignment. A favorable review of the questionnaire and advance fingerprint results are required as an interim measure prior to the contract employee start date. An unfavorable determination made by the Navy Command's Security Manager is final and such a determination does not relieve the contractor from meeting any contractual obligation under the contract.

If contractor employees already possess a current favorably adjudicated investigation, the Navy Command's Security Manager will use the Visit Authorization Request (VAR) via the Joint Personnel Adjudication System (JPAS). The contractor shall include the IT Position Category per SECNAV M-551 0.30 for each employee designated on a VAR. The VAR requires annual renewal for the duration of the employee's performance under the contract.

The Navy Command's Security Manager will forward the required forms to OPM for processing. Once the investigation is complete, the results will be forwarded by OPM to the DOD Central Adjudication Facility (CAF) for a position of trust determination. When a favorable determination is not made, contractor employees shall not be permitted to work on this contract effort and if already working on the contract shall be removed immediately.

The potential consequences of any requirements under this clause including denial of access for a proposed contractor employee who fails to obtain a favorable trustworthiness determination in no way relieves the contractor from the requirement to execute performance under the contract within the timeframes specified in the contract. Contractors shall plan ahead in processing their employees and subcontractor employees for working in non-sensitive positions, with sensitive information and spaces, and/or on Government IT systems. The contractor shall insert this clause in all subcontracts when the subcontractor is permitted to have physical access to a federally controlled facility and/or access to a federally-controlled information system/network and/or access to government information.

Purpose and Overview

In order to obtain access to NAVFAC MAXIMO for direct entry, Contractor personnel must obtain a Common Access Card (CAC) with DoD PKI certificates for the access to Government Information Systems (IS) and must have an account established within NAVFAC MAXIMO.

CAC Application Procedures

Once the Contractor has provided the list of personnel requiring MAXIMO accounts, the Government Trusted Agent (TA) will sponsor the Contractor personnel initiating the process to obtain a CAC. Contractor personnel must submit an application for the CAC within the Trusted Associate Sponsorship System (TASS). Contractor personnel must log into TASS within seven days of the application's approval and must complete the application for a CAC within 30 days of the initial login. Refer to <http://www.cac.mil/common-access-card/getting-your-cac/for-contractors/> for additional information.

After approval in TASS, the Contractor personnel must go to a Real-Time Automated Personnel Identification System (RAPIDS) site for final verification and issuance of the CAC with associated DoD PKI certificates.

NCMI Access Procedures

The Contractor shall provide all necessary computer equipment and Internet Service Provider (ISP) accounts to access MAXIMO for Direct Entry of required data as outlined in Annex 0200000, Spec Item 2.8.10, Access to Navy Marine Corps Intranet (NMCI).

NAVFAC MAXIMO Account Requests

The Contractor shall submit a request for establishing a NAVFAC MAXIMO account to the Contracting Officer using the System Access Authorization Request – Navy (SAAR-N) form (OPNAV 5239/14), and indicate the role the user will have and the specific account privileges desired.

Account requests SHALL NOT be submitted prior to having received a CAC.

Specific steps for requesting account access include:

- Complete Information Assurance (IA) training
 - Cyber Awareness Challenge version 3.0 (current requirement, subject to change based on policy)
 - Annual IA training is required to maintain access to Government IS
- Submit a complete and digitally signed SAAR form detailing the following required access:
 - Requesting a NITC portal SSO account
 - Requesting a STS account
 - Request a NAVFAC Maximo account
- After the SSO/STS accounts are created, submit a STS ticket requesting a new Maximo account.
- The local NAVFAC Business Office will determine level of access and restrictions for users by configuring NAVFAC MAXIMO Work Center access. The Contractor will receive notification that the NAVFAC MAXIMO account has been created and NAVFAC MAXIMO access URL details.

Attachment 1502000-03
Water Systems Inventory, Swimming Pools, Memorial Fountain, and Solar Hot Water Systems

The data in this attachment is for information only. It is not considered sufficiently accurate for bidding purposes by itself, but is included to indicate the approximate volume of work that has been performed in the past and is not to be construed as a limiting factor to services performed in the future.

Scheduling for performance and access to Solar Hot Water Systems shall be coordinated with the Facilities Operations Specialist (FOS) and Building Manager. Upon completion of maintenance, ensure Solar Hot Water System is back online and fully functional. Correct all maintenance discrepancies and repairs and Report all maintenance discrepancies and repairs to the FOS and building manager.

Attachment 1502000-04
Swimming Pools and Memorial Fountain Requirements

The non-inclusive data in this attachment is for information only. It is not considered sufficiently accurate for bidding purposes by itself, but is included to indicate the approximate volume of work that has been performed in the past and is not to be construed as a limiting factor to services performed in the future. The Contractor is encouraged to visit the work site(s) to inspect and assess actual work requirements and working conditions prior to providing price proposal(s).

SWIMMING POOLS MAINTENANCE REQUIREMENTS:

Service scope includes the following swimming pool equipment and systems: circulating, chemical feed (including chlorination), and filtration systems; and all appendages of the pool systems and locations listed Attachment 1502000-04, but not limited to the following:

Description	Frequency
Systems Inspection	Daily
Identifying required repairs	As Needed
Developing and maintaining comprehensive maintenance records for each system listed in Attachment 1502000-04.	As Needed
Developing and providing maintenance reports for each system that follows the manufacturer's recommended maintenance schedule and any additional maintenance the system may require based on use. The report shall also include all minor repairs completed and all parts replaced.	Monthly
Checking the control systems and making adjustments to programs as needed to optimize operation of the systems listed in Attachment 1502000-04.	Daily
Analyzing systems performance using maintenance records and observations to identify performance degradation trends and recommend appropriate corrective action.	Monthly
Ensuring that the pumps and filters operate properly and are leak free.	Daily
Checking chlorination systems for proper operation and making adjustments as needed.	Daily
Before departure operate the entire system for and check conditions to ensure proper operation.	Daily
Providing a field reports and recommendations to the POC, including a written estimate for any recommended repairs outside the scope of the preventative maintenance (PM) contract.	As Needed
Touch-up painting as needed to prevent corrosion.	As Needed
Stop Leaks	As Needed
Replace small fittings and hardware as needed	As Needed
General Housekeeping	Daily
Ensure lighting and controls operate properly	Daily

Operational Services for the swimming pools systems and locations listed Attachment 1502000-03, but not limited to the following:

Ensure swimming pool water quality is maintained at a level acceptable for the intended use, and meets the Governments and industry regulations and standards. Applicable regulations and standards include, but are not limited to: UFC 3-320-02, NAVMED P-5010-4, and ANSI/NSPI-1.

Attachment 1502000-04
Swimming Pools and Memorial Fountain Requirements

MEMORIAL FOUNTAIN MAINTENANCE REQUIREMENTS:

Service scope includes the following Memorial Fountain equipment and systems: circulating, chemical feed (including chlorination), and filtration systems; and all appendages of the Fountain systems and locations listed Attachment 1502000-03, but not limited to the following:

Description	Frequency
Ensure Backflow devices are operating properly	2W (Twice Weekly)
Ensure warning/cautionary signage is clear, legible, and easily understood regardless of language barrier(s) (for an example, see figure 1.)	2W (Twice Weekly)
Ensure filtration and chlorination systems are operating properly	2W (Twice Weekly)
Adjust as necessary to minimize drift and overspray	2W (Twice Weekly)
Reduce spray levels during periods of high winds	As Needed
Ensure connections to sanitary sewer system are leak free and proper	2W (Twice Weekly)
Ensure all barriers are intact to discourage physical contact	2W (Twice Weekly)
Disinfect and adjust water quality as necessary to eliminate odor, algae, and scaling	2W (Twice Weekly)
Exercise valves	Monthly
Ensure lighting and controls operate properly	2W (Twice Weekly)
Maintain Operational records. Operational records shall include water temperature, chlorine residual, pH, filter media maintenance and visual inspections.	2W (Twice Weekly)
Perform cleaning and disinfection	2W (Twice Weekly)

Figure 1.

SOLAR HOT WATER SYSTEMS MAINTENANCE REQUIREMENTS

The data in this attachment is for information only. It is not considered sufficiently accurate for bidding purposes by itself, but is included to indicate the approximate volume of work that has been performed in the past and is not to be construed as a limiting factor to services performed in the future.

Scheduling for performance and access to Solar Hot Water Systems shall be coordinated with the Facilities Operations Specialist (FOS) and Building Manager. Upon completion of maintenance, ensure Solar Hot Water System is back online and fully functional. Correct all maintenance discrepancies and repairs and Report all maintenance discrepancies and repairs to the FOS and Building Manager.

MAINTENANCE REQUIRMENTS FOR SOLAR HOT WATER SYSTEMS	
DESCRIPTION	FREQUENCY
Inspect system performance	SA – Semiannual
Inspect system components	SA – Semiannual
Clean system components as needed to achieve maximum performance	SA – Semiannual
Inspect system for leakage, repair as required	SA – Semiannual
Purge air from system	SA – Semiannual
Inspect system operation during a “Call for heat”	SA – Semiannual
Inspect and compare operation to temperature settings and set points	SA – Semiannual
Inspect the operation of the solar pump, ensure the unit is operating smoothly and per manufacturer specifications and start-up data.	SA – Semiannual
Flush the solar collectors using fresh water	SA – Semiannual
Inspect the solar collectors for leakage and damage	SA – Semiannual
Clean the face of the Solar Collectors	SA – Semiannual
Inspect and replace as required all Solar Collector pressure relief valves, ensure pressure relief valves are Watts 3L and operate properly and as expected. Replace as required	SA – Semiannual
Vent or remove all trapped air from the Solar Collectors	SA – Semiannual
Inspect and test temperature sensors, compare to start-up data, replace as required	SA – Semiannual
Inspect mounts for signs degradation	SA – Semiannual
Inspect insulation, replace all worn insulation	SA – Semiannual
Adjust the system as needed to achieve maximum performance and longevity	SA – Semiannual
Repair system components as needed	SA – Semiannual
Replace system components as needed	SA – Semiannual
Maintain a maintenance log listing performance levels and noting any issues discovered	SA – Semiannual
Log any repairs including parts repaired, parts replaced, and parts that should be replaced to maximize system performance	SA – Semiannual

ATTACHMENT 1502000-06
HEMP SHELTER MAINTENANCE REQUIREMENTS

MAINTENANCE REQUIREMENTS FOR HEMP SHELTERS	
DESCRIPTION	FREQUENCY
Removal and Replacement	
HEMP Doors - Fingerstock - Inside and Outside keeper seal - Mechanical Closing Assemblies - Gaskets and Washers	Triannual (3x per year)
HEMP Shielded Cabinets - 1 Gasketing - MOV's as required through MOY Testing	Triannual (3x per year)
Entry Panels - Hardness coating refurbishment work (as needed through Low Level Characterization Testing (LLCT) SE validation) - Weather sealant applications on all external entry panel voids	Triannual (3x per year)
Hardware necessary to the SE performance of the system - Shielded Cabinet (SC) cover and general HEMP assembly hardware - Internal cabinet hardware service or replacement as required on HCA's by findings during the inspections	Triannual (3x per year)
Refurbishment and Inspection	
EM Doors	Triannual (3x per year)
EM Cabinets	Triannual (3x per year)
EM Entry Panels	Triannual (3x per year)
EM Conduits	Triannual (3x per year)
EM Cables and Connectors	Triannual (3x per year)
EM Shielding	Triannual (3x per year)
EM Waveguides	Triannual (3x per year)
Mechanical Corrosion Control Services	
HEMP Conduit assemblies	As needed while on site
HEMP junction box maintenance assemblies	As needed while on site
All shield surfaces for all structures	As needed while on site
GES coating maintenance through mechanical measures	As needed while on site
Perform Systematic Hardness Surveillance (HS) - During every Mobile Depot Maintenance (MOM) activity, it shall be required that pre and post LLCT SE testing be performed on all service HCA's under the HM program - During every MOM activity, it shall be required that Infrared (IR) data be taken on the filter inserts during internal shielded cabinets inspections under the HM schedule - During every MOM activity, it shall be required that physical and complete inspections be performed on all HCA's in the hardened topology. - All LLCT testing activity shall be oriented towards validation of service actions and failure prediction methods. - Provide technical recommendations on how best to utilize state of the art non-destructive material testing (NOT) testing methods in order to systematically gather data needed in order to characterize the performance of the hardened components during each on-site project.	Triannual (3x per year)

DOORS – Pneumatic Doors by Gaven, Fingerstock doors by L3

Figure 1:

HIGH SECURITY REVOLVING AND CIRCLELOCK DOORS MAINTENANCE REQUIREMENTS AND INVENTORY

The Contractor shall execute services covering preventive maintenance (PM), system operations and testing, and corrective maintenance (CM) that covers equipment repairs, overhauls, and/or other specialized services as identified or required to maintain the safe and efficient operation of high security doors.

The contractor shall provide professional and technical services to accomplish PM and CM. PM will be scheduled as listed below to ensure continuous operation, prevent unnecessary breakdowns, and prolong the life of the equipment. Each inspection shall be performed in accordance with the attached Maintenance Checklist.

All maintenance and repairs shall be completed in accordance with the OEM, installers recommendations, applicable NFPA, Federal, State, and Local standards, regulation, and applicable specifications of this PWS.

Upon completion of repairs and scheduled PM, doors shall operate and function in accordance with manufacturer design, intention, and complete compliance with all applicable Federal, State, Local, and NFPA Life Safety code, standard, and regulation.

High Security Door Inventory			
Location	Building Number	Description	Quantity
Camp H. M. Smith	700	High Security Revolving Doors (Tourlock 180+90)	7
Camp H. M. Smith	700	High Security Circlelock Doors	1

Maintenance Requirements Description	Frequency
High Security Revolving Doors (Tourlock 180+90):	
Electrical	
Check and clean the safety devices (sensors, etc.).	Semi-Annual
Perform a function test, rest positions, control panel functions.	Semi-Annual
Check the operation of the motion detectors.	Semi-Annual
Check the electrical wiring.	Semi-Annual
Check the motor unit.	Semi-Annual
Perform a visual check of the relay contacts and exchange them where needed.	Semi-Annual
Mechanical	
Grease the bearings with TSL grease where needed.	Semi-Annual
Check the motor mountings and fasten where needed.	Semi-Annual
Check motor chain and tighten/grease when needed.	Semi-Annual
Check all other mechanical moving parts and repair or replace when needed.	Semi-Annual
Check Tourlock brake mechanism	Semi-Annual
Door wings	
Inspect and clean Brushes, weather sweep brushes to make sure they are clean and free of debris.	Semi-Annual
Inspect hardware (hanger arms, push bars, doorstops).	Semi-Annual
Ensure all pieces are tight and free of damage.	Semi-Annual
Safety/functions	
Check Rest position of door wings	Semi-Annual

ATTACHMENT 1502000-07
HIGH SECURITY REVOLVING AND CIRCLELOCK DOORS MAINTENANCE REQUIREMENTS AND
INVENTORY

Check Door speed is in accordance with parameter lists.	Semi-Annual
Check Emergency Stop Button	Semi-Annual
Check Collapsible system	Semi-Annual
High Security Circlelock Doors:	
General	
Perform a visual check to see if there is broken glass or other damage.	Semi-Annual
Check for noise	Semi-Annual
Fill out the troubleshooting chart or maintenance checklist.	Semi-Annual
Electrical	
Check and clean the sensors, etc.	Semi-Annual
Perform a function test, emergency switch, control panel functions.	Semi-Annual
Check the operation of the StereoVision 2 system.	Semi-Annual
Check earth screen and earth leads.	Semi-Annual
State motor current on the checklist.	Semi-Annual
Check the electrical wiring.	Semi-Annual
Lighting; replace where needed	Semi-Annual
Check the motor unit.	Semi-Annual
Perform a visual check of the relay contacts and exchange them where needed.	Semi-Annual
Mechanical	
Grease the bearings with TSL grease where needed.	Semi-Annual
Check the motor mountings and fasten where needed.	Semi-Annual
Drive	
Mountings and re-torque as required	Semi-Annual
Check motor mountings and re-torque as required	Semi-Annual
Drive Arms – Check the keyway for play and apply green Teflon to the locking	Semi-Annual
Guide rollers - Check rollers for flat surfaces; replace if needed.	Semi-Annual
Track rail - Clean	Semi-Annual
Light running door wings, running carriages	Semi-Annual
Electromagnetic lock – Check adjustment	Semi-Annual
Door Wings	
Lower guides - Clean, remove floor and grease lower pivot with green Teflon.	Semi-Annual
End bumper – Check for wear and replace if needed.	Semi-Annual
Safety/Functions	
Motor torque - FI settings in accordance with list of parameters #12, #17. State settings on checklist found in BOON EDAM Operating & Maintenance Manual CIRCLELOCK	Semi-Annual
Control panel - Check operation.	Semi-Annual
Door speed high - FI settings in accordance with list of parameters #24. State settings on checklist.	Semi-Annual
Door speed low - FI settings in accordance with list of parameters #25. State settings on checklist.	Semi-Annual
Emergency button - Check operation.	Semi-Annual
Safety rail - Check operation	Semi-Annual
Safety/Functions (Continued)	
Emergency power supply UPS - Check operation; switch is located on dust cover or frame.	Semi-Annual
Contact mats - Check for operation and leakage.	Semi-Annual
Electrical circuits - Check operation.	Semi-Annual
All functions - Check operation.	Semi-Annual

ATTACHMENT 1502000-07
HIGH SECURITY REVOLVING AND CIRCLELOCK DOORS MAINTENANCE REQUIREMENTS AND
INVENTORY

Options	
Card reader pulse switch	Semi-Annual
Fire Alarm - Check operation.	Semi-Annual
Lock - Check operation and grease the pivot points with green Teflon and grease the center bushing with red Teflon.	Semi-Annual
Fail secure - Check operation	Semi-Annual
StereoVision 2 - Check operation and adjust if necessary. Clean the window of the StereoVision 2 sensor with a damp cloth. NOTE!: Do not use a cleaner or a solvent.	Semi-Annual
Overhead sensors - Check operation and adjust if necessary.	Semi-Annual

PHOTOVOLTAIC SYSTEMS MAINTENANCE REQUIREMENTS

The list below is not intended to comprehensively describe, define, or otherwise limit the items in this contract. The Contractor shall perform work according to OEM requirements and the requirements of the contract.

REQUIRED MAINTENANCE	
DESCRIPTION	FREQUENCY
Visual inspection of entire system (Inverters, panels, conductor/conduit, etc...)	Quarterly
Ensure breakers and fuses are in working condition and alert the KO/COR if a replacement is needed.	Quarterly
Check inverter fans for proper operation and clean inverter cabinets	Quarterly
Function check inverter AC and DC disconnects	Quarterly
Record inverter/electric meter PV electricity production (KWH)	Quarterly
Remove dust, dirt, bird droppings and other debris on panels that adversely affect panel performance.	Quarterly
Repair broken panels. Alert the KO/COR if a replacement is needed.	Quarterly
Ensure proper signage is in place	Quarterly
Ensure inverter/junction box/combiner box integrity (check and verify water tight)	Quarterly
Check for animal infestation (Alert PAR/COR for all pest and animal infestation)	Quarterly
Ensure safety hazards are annotated and repaired	Quarterly
Perform a full system inspection documenting any maintenance proposals ¹	Annually ¹
Test Fuses ¹	Annually ¹
Inspect all piping and fittings ¹	Annually ¹
Clean and perform thermal imaging scan of all panels ¹	Annually ¹
Test string voltage and measure Irradiance ¹	Biennial (Once every two years) ¹
Full system cleaning ¹	Biennial (Once every two years) ¹
Inspect conduit and conductor and alert KO/COR if repair or replacement is needed ¹	Quinquennial (Once every 5 years) ¹

¹Shall be performed concurrently with one scheduled quarterly maintenance performance.

See note 6	5 Mic 10" Resin Trap Filter ⁶		LD0510	1	EA	Annually ¹¹
See note 7	8" X 40 TFC elements 10,500 GPD ⁷		4040ACM2	2	EA	As Needed ¹¹
See note 8	High/Low pH Cleaning of R.O. ⁸		ROCLEAN	1	EA	Annually ¹¹
See note 9	Biological Cleaning of R.O. ⁹		BIOCLEAN	1	EA	Annually ¹¹
See note 10	System Service Check Labor ¹⁰		TECHLBR	4	EA	4 Months ¹¹
Emergency Response ¹	Labor	-	ERLABOR	1	hour	As Needed ¹¹
After hours Emergency Response ²	Labor	-	AHLABOR	1	hour	As Needed ¹¹

¹ Respond to emergency requirements within one hour after notification during normal duty hours.

² Respond to emergency requirements within two hours after notification after normal duty hours.

3. Regeneration of Mixed Bed Tanks is the recharging of the portable exchange of D.I. tanks that make up the system by having then brought to the D.I. water regeneration facility where the resin is removed and ran through a variety of chemical processes over two days that remove dissolved solids and restores the cylinders to an effective ion exchangers.

4. Regeneration of Activated Carbon is the removal of the old carbon and replacing it with the new carbon this work will be done at a D.I. water regeneration facility.

5. Mic 20" R.O. Prefilters is the replacement of the old filters with new filters.

6. Mic 10" R.O. Prefilters is the replacement of the old filters with new filters.

7. 8" X 40 TFC elements 10,500 GPD is the replacement on the quality falls below 92% rejection on the R.O. membranes this will be done as an as needed timeframe.

8. High/Low pH Cleaning of R.O. removes the accumulated minerals and scale on the membranes in order to preserve and extend their life and is done annually.

9. Biological Cleaning of R.O. kills accumulated biological material such as bacteria on the membranes in order to preserve and extend their life and is done annually.

10. System Service Check is a service technician going through the entire system and checking that the pressures, flow and that quality readings are within the parameters of system design, as well as checking the system logs and going over any discrepancies with the operators.

¹¹ Shall be performed concurrently with regular scheduled Monthly maintenance performance.

ATTACHMENT 1502000-12
INTERIOR AND EXTERIOR LIGHTING SYSTEMS INVENTORY

List of Facilities to Receive Recurring Lighting Maintenance Services - Listed By Activity											
The following is a complete list of all facilities to receive Recurring Lighting Maintenance Services. The information provided for each facility is the Governments best effort to provide significant information relative to the work to be performed. The Government does not take responsibility for the absolute accuracy of the information provided; the Contractor shall, through its own diligence, take responsibility to understand and verify the actual areas, lighting descriptions, and height requirements prior to contract award. The Contractor shall perform the contract required services, as specified, to the following list of facilities at the Contractor's offered amount, regardless of any inaccuracies to the facility descriptions as provided below by the Government. Column Notes: <i>Location</i> : See last page of this attachment for location abbreviation legion. <i>General Description of Lighting Type(s)</i> : This column provides information on the "known" lighting types found in the given facility. By no means is Recurring work limited to just the lighting types listed. <i>Indoors, Outdoors</i> : Indicates location of Recurring lights, by stating "indoors", "outdoors", or if cell is blank, Recurring service required lights may be both indoors and outdoor of the facility. <i>Special Height Requirements</i> : Where facilities indicate approximate light fixture heights, perform services under the Recurring portion of work. If a facility does not state special height requirements, work under Recurring is limited to 30 feet (measured from floor or ground area below fixture). For fixtures that are above 30 feet and do not indicate "Special Height Requirements", fixtures may be serviced by use of Nonrecurring line items. <i>Security Requirements</i> : Indicates facilities that enforce special security requirements for their facility. Where "Yes" is noted, please check with the facility Person-in-Charge (POC) prior to servicing facility. <i>Comments</i> : Some facilities may indicate that some or all of its light fixtures are of Energy Saving Type Lamps. Energy Saving Type Lamps and ballasts shall be renewed with equivalent energy saving type lamps and ballasts. Selected fixtures in some facilities may be equipped with emergency ballasts or emergency power battery packs with chargers and inverters. Renewal of such equipment shall be made with equivalent or better. The Government may have additional fixtures retrofitted in the future with more energy saving lamps and ballasts during the life of this contract.

INTERIOR AND EXTERIOR LIGHTING SYSTEMS INVENTORY

List of Facilities to Receive Recurring Lighting Maintenance Services - Listed By Activity -

LEGEND

Location Legend:					
BARPOI:	Barbers Point (Kalaeloa)				
BEKPOI:	Beckoning Point				
BISPOI:	Bishop Point				
CAMCAT:	Camp Catlin				
CAMSMI:	Camp Smith				
CATPAK:	Catlin Park				
COMNAV:	Commander Navy Region				
EWAJUN:	Ewa Junction				
FISPEA:	Navy Supply (NAVSUP) Fleet Logistics Center Pearl Harbor				
FORISL:	Ford Island				
GORPEA:	Navy-Marine Golf Course				
HALALI:	Hale Alii				
HALAWA:	Halawa				
HALMOK:	Hale Moku				
HALTER:	Halsey Terrace				
HOKULA:	Hokulani				
IROPOI:	Iroquois Point				
ISMPEAR:	Inactive Ship Maintenance Pearl				
KUAISL:	Kuahua Island				
LUALUA:	Lualualei				
MAKALA:	Makalapa				
MANANA:	Manana				
MARPEA:	Marine Barrack, Pearl Harbor				
MOANAL:	Moanalua				
NAVMARC:	Navy Marine Corp Reserve Center				
NAVPEA:	Naval Station Pearl Harbor				
NCTPAC:	Naval Computer and Telecommunication Area Master Station				
OHANUI:	Ohana Nui				
OPANA:	Opana Communication Site				
PEACIT:	Pearl City Peninsula				
PHNSY:	Pearl Harbor Naval Shipyard				
PWCPEA:	Public Works Center Pearl Harbor (NAVFAC Hawaii Compound)				
RICFIE:	Richardson Field (Recreation Center)				
RTFLUA:	RTF Lualualei				
SALLAKS:	Catlin Park Area				
SCHOFIE:	Schofield Barracks				
SHIPEA:	Pearl Harbor Naval Shipyard Area				
SUBPEA:	Submarine Base, Pearl Harbor				
WAIPIO:	Waipio				
WAIPOI:	Waipio Point (Peninsula)				
WESLOC:	West Loch				
WHEAIR:	Wheeler Air Field				
General Description of Lighting Types Legend:					
CFL	Compact Fluorescent Lamp				
F-tubes:	Fluorescent Tubes				
HP Sodium:	High Pressure Sodium

UPS SYSTEMS MAINTENANCE REQUIREMENTS FOR MCBH

The list below is not intended to comprehensively describe, define, or otherwise limit the items in this contract. The Contractor shall perform work according to OEM requirements and the requirements of the contract.

REQUIRED MAINTENANCE	
DESCRIPTION	FREQUENCY
Remove surface level corrosion and rust and apply corrosion inhibitor and prevention compound where applicable in accordance with Maintenance Index Page 4544 Maintenance Requirement Card 65 FMC4Y.	Monthly
Measure and record the total UPS battery float voltage and charging current.	Quarterly/Annually
Measure and record overall UPS AC ripple voltage.	Quarterly/Annually
Measure and record overall UPS AC ripple current.	Quarterly/Annually
Visually inspect for cracks and leakage.	Quarterly/Annually
Visually inspect for evidence of corrosion on all listed systems.	Quarterly/Annually
Measure and record the UPS ambient temperature.	Quarterly/Annually
Verify the condition of the ventilation equipment for the UPS.	Quarterly/Annually
Verify the integrity of the battery rack/cabinet for the UPS.	Quarterly/Annually
Measure and record 100% of the cell temperatures for the UPS.	Quarterly/Annually
Measure and record the float voltage of all cells.	Quarterly/Annually
Measure and record all internal impedance readings.	Quarterly/Annually
Provide a detailed written report noting any deficiencies and corrective action needed, taken and/or planned	Quarterly/Annually
Check integrity of battery cabinet.	Quarterly/Annually
Visual inspection of the battery cabinet and/or room.	Quarterly/Annually
Check for NO-OX grease or oil on all connections.	Quarterly/Annually
Check battery jars for proper liquid level.	Quarterly/Annually
Check for corrosion on all the terminals and cables on all systems	Quarterly/Annually
Examine the physical cleanliness of the battery room and jars	Quarterly/Annually
Measure and record DC bus ripple voltage on UPS	Quarterly/Annually
Measure and record total battery float voltage on UPS	Quarterly/Annually
Perform temperature check on all breakers, connections, and associated controls. Repair and/or report all high temperature areas	Quarterly/Annually
Perform a complete visual inspection of the equipment including subassemblies, wiring harnesses, contacts, cables, and major components	Quarterly/Annually
Record all voltage and current meter readings on all UPS systems.	Quarterly/Annually
Perform a complete visual inspection of the equipment including internal sub-assemblies, wiring harnesses, contactors, cables, major components, and check for proper clearance around the unit.	Annually
Perform an Infrared Scan (IR Scan) and verify all transformer, terminal block, and ground/neutral bus bar connections for tightness.	Annually
Perform an Infrared Scan (IR Scan) and verify all circuit breakers including the panel board(s) branch circuits for tightness.	Annually
Perform an Infrared Scan (IR Scan) and verify high and low voltage junction box terminals for tightness (if applicable).	Annually
Perform an Infrared Scan (IR Scan) and verify all option wiring for tightness. (Spike suppressor, ground fault, phase rotation/loss).	Annually
Verify system control power fuses. (Equipment MUST be de-energized)	Annually
Verify grounding electrode conductor and any isolated grounds.	Annually
Verify EPO lamps are illuminated (if applicable).	Annually
Perform operational test of the local EPO. (Equipment MUST be able to be de-energized).	Annually
Record all the electrical data via the local display (if applicable). Ensure all values are within the specification.	Annually
Verify specified restart capabilities (manual or auto-restart).	Annually

ATTACHMENT 1502000-14
UPS SYSTEMS MAINTENANCE REQUIREMENTS FOR MCBH

Install or perform Engineering Field Change Notices (FCN) as necessary.	Annually
Re-tighten all connections to the battery manufacturer's specifications.	Annually
Measure and record all battery connection resistances in micro-ohms, when applicable.	Annually
Check the inverter and rectifier boards for burned or broken wires.	Annually
Check all nuts, bolts, screws, and connectors for tightness and heat discoloration.	Annually
Check fuses on the DC capacitor deck for continuity (if applicable).	Annually
With customer approval, perform operational test of the system including unit transfer and battery discharge.	Annually
Calibrate and record all electronics to system specifications.	Annually
Check or perform Engineering Field Change Notices (FCN) as necessary.	Annually
Measure and record all low-voltage power supply levels.	Annually
Record phase-to-phase input voltage and currents.	Annually
Review system performance with customer to address any questions and to schedule any repairs.	Annually
Check power capacitors for swelling or leaking oil.	Annually
DC capacitor vent caps that have extended more than 1/8"	Annually
Measure and record harmonic trap filter currents.	Annually
