

Questions

RH – Base Course - AVON PARK FA481426Q0010

1. Would it be possible to use crushed concrete material for the base course?

Answer: Yes. Provided that the RCA consists of previously hardened Portland cement or other concrete containing pozzolanic binder material. Provided that it consists of a constant gradation and is free of all reinforcing steel, bituminous concrete surfacing, and any other foreign material.

2. Are we spreading the material or stockpiling?

Answer: Stockpiling.

3. What are the working hours?

Answer: 0600 - 1700

4. Are there required types of dump trucks to be used for deliveries?

Answer: NO

5. Is there a minimum or maximum material delivery requirement per day?

Answer: The minimum will be 500 tons per eight-hour period. There is no maximum because we have ample space to place stockpiles.
