PRICING INFORMATION

The purpose of this request is to develop and validate a predictive actuarial model that assigns an Interim Risk Rating to unrated Mexican-domiciled carriers with authorities to operate along the US-Mexico commercial border zone or to conduct long-haul international transport. This rating will serve as a statistically valid proxy for FMCSA safety ratings, segmenting Mexican-domiciled carriers with these authorities into distinct risk pools based on their probability of safety incidents and FMCSA violations.

When an award is made a Firm Fixed Price (FFP) Purchase order is anticipated.

LINE-ITEM PRICING

Line-Item No.	Description	Quantity	Unit	Unit Price	Total Price
00100	Task 1 – Confirm aggregation of multi-source dataset and updated dashboard displaying relevant data sources and metrics	1	EA
