

RFQ M67001-26-0022 Questions and Answers

1. Are you requiring a single case that holds all four 55-inch displays or a case for each individual display?

Answer: Number of cases is not a strict requirement as long as it meets the minimum salient characteristics for CLIN0001.

2. They matrix above the tech specs state a 65-inch. Are you needing a 55 or 65-inch display for this CLIN? Are you needing it with the displays pre-installed or completed by the command on arrival?

Answer: 55in to 65 in screen size, it would be preferred for it to be installed onto lifts.

3. CLIN0002 size — the line item description in section 2 reads "65" Auto Lift," but the salient characteristics paragraph for CLIN0002 specifies a "55-inch display screen with a minimum resolution of 2K." Which controls — 55" or 65"? The configuration and pricing diverge meaningfully between the two.

Answer: The TV size can be between 55in and 65 in, whatever is available sooner.

4. CLIN0003 VTC controller — the requirement for an external, hardwired tablet controller with "NO Bluetooth or Wi-Fi" structurally limits the field of compatible Cisco Webex touch panels. Cisco's current-generation Room Navigator includes Wi-Fi for Webex sync. Was the no-Wi-Fi/no-Bluetooth restriction written with awareness that it narrows the available Cisco touch controller options to legacy or special-build configurations? If a hardwired Ethernet/PoE-only Cisco controller is acceptable (Cisco Touch 10 family), that satisfies cleanly. If the restriction extends to all wireless capability across the entire VTC module, please confirm so we scope sourcing accordingly.

Answer: The no Wi-Fi and Bluetooth requirement is necessary to meet operational security requirement.

5. Required delivery date / ARO — the RFQ specifies FOB Destination to Camp Lejeune but does not state a delivery window. Is there a target delivery date or required ARO timeline driven by an exercise or deployment date that the quote should plan against?

Answer: Being that we have no designated time, we are requesting the items as soon as possible. Delivery time may be a factor in evaluation for award.
