Fair Opportunity:

This request is conducted under the fair opportunity guidelines of FAR 16.505(b), which outlines the ordering procedures for orders issued under multiple-award contracts. Award will be based on a determination of best value to the government, price and other factors considered. "Best value" means the expected outcome of an acquisition that, in the government's estimation, provides the greatest overall benefit in response to the requirement. Best value evaluation is, in and of itself, a subjective assessment by the government of the proposed solution that provides the optimal results to the government.

This method does not use any aspects of FAR subpart 15.3. The use of this fair opportunity process does not obligate the government to determine a competitive range, conduct discussion with any contractors, solicit proposals or revisions thereto, or use any other source selection techniques associated with FAR subpart 15.3.

Basis for Award:

1. The proposed task order will be awarded to the responsible offeror offering the best value to the Government. For this order, the best value is expected to result from selection of the proposal with the lowest evaluated price. To make a determination of best value, the Government shall evaluate each offeror on price only.

2. Submittal Requirements and Basis of Evaluation.

1. Price:

1. Solicitation Submittal Requirements – Offeror shall submit the following:

- Cover page that includes:
 - Solicitation Number & Title
