

Specifications

FY26 BPA Purchase Order for Respiratory Therapy Supplies

Item:	Item Description:	Specification:	Justification:
	High Velocity Therapy (HVT) Aerosol Disposable Patient Circuit (ADPC)	- Compatible for the HVT (High Velocity Therapy) 2.0 System - Packaged in sterile bag/container for single-patient use	Delivery of aerosol medication to patients on high velocity therapy
	High-Flow Disposable Patient Circuit (DPC)	- Compatible for the HVT (High Velocity Therapy) 2.0 System - Packaged in sterile bag/container for single-patient use.	Delivery of oxygen at a high-flow nasal cannula therapy
	Low-Flow Disposable Patient Circuit (DPC)	- Compatible for the HVT (High Velocity Therapy) 2.0 System - Packaged in sterile bag/container for single-patient use.	Delivery of oxygen at a low-flow nasal cannula therapy
	Adult High Velocity Nasal Insufflation (Hi-VN) Therapy Nasal Cannula	- Size: Adult Large - Compatible for the HVT (High Velocity Therapy) 2.0 System - Packaged in sterile bag/container for single-patient use - Soft and Flexible Tube	Delivery of oxygenated air at high velocity for adults with respiratory distress patients.
	Adult XL High Velocity Nasal Insufflation (Hi-VN) Therapy Nasal Cannula	- Size: Adult Extra Large - Compatible for the HVT (High Velocity Therapy) 2.0 System - Packaged in sterile bag/container for single-patient use - Soft and Flexiable Tube	Delivery of oxygenated air at high velocity for adults with respiratory distress patients. Extra large size for patients comfort.
	Infant High Velocity Nasal Insufflation (Hi-VN) Therapy Nasal Cannula	- For Infant, Premature, Neonatal - Compatible for the HVT (High Velocity Therapy) 2.0 System - Packaged in sterile bag/container for single-patient use - Soft and Flexiable Tube	Delivery of oxygenated air at high velocity for infant, premature and/or neonatal with respiratory distress.
	Infant Intermediate High Velocity Nasal Insufflation (Hi-VN) Therapy Nasal Cannula	- For Intermediate Infant - Compatible for the HVT (High Velocity Therapy) 2.0 System - Packaged in sterile bag/container for single-patient use - Soft and Flexiable Tube	Deliver oxygenated air at high velocity for intermediate infants with respiratory distress.

- I. **Description of the work to be performed:** The Chinle Comprehensive Health Facility (CCHCF), Respiratory Therapy Department request a Blanket Purchase Agreement (BPA) FY2026 to purchase respiratory therapy supplies inclusive of miscellaneous supplies that are compatible with the HVT (High Velocity Therapy) 2.0 System to be ordered on an “as needed basis” as required by the respiratory therapist to provide direct patient care to the patients of the Chinle Service Unit.
- II. **Background:** The Respiratory Therapist provides critical direct patient care in the Emergency and Urgent Care, Intensive Care Units and Outpatient clinics. The supplies are a critical need to fulfill the IHS mission by providing comprehensive health care to the patients of the Chinle Service Unit. They provide respiratory support and treatment to deliver oxygenated air at high velocity for patients in respiratory distress, aerosol medication on high velocity therapy and delivery of oxygen at a high and low-flow nasal cannula therapy to critically ill patients. Anticipation of supplies required as the respiratory season is approaching. Ordering supplies on an “as needed basis” allows the Respiratory Therapy department to order what is necessary and will avoid excess inventory and unnecessary costs, the department is limited on space to store supplies.
- III. **Location of Work:** The Chinle Comprehensive Health Care Facility - Respiratory Therapy Department
Highway 191, Hospital Drive, Chinle, AZ 86503.
POC: Dwan Teller, Supervisory Respiratory Therapist
Contact: (928) 674-7246
- IV. **Period of Performance:** 12/01/25 – 9/30/26
- V. **Deliverable/Schedule:** Date of order and delivery of supplies will vary as the items and quantities will be ordered on an “as needed basis”.
- VI. **Performance Standards/Requirements:**
The Contractor/Vendor Shall:
- Have an active Unique Entity Identifier (UEI) registered with the System for Award Management (SAM)
 - Accept a Blanket Purchase Agreement (BPA)
 - Accept the Chinle Service Unit Tax Exemption
 - Provide Government pricing or better
 - Provide supplies that are compatible with the HVT (High Velocity Therapy) 2.0 system used in Respiratory Therapy Department
 - Provide supplies required for direct patient care:
 - Invasive procedure
 - Non-invasive procedure
 - Delivery of aerosol medication
 - Delivery of medication and oxygenated air on high velocity therapy
 - Delivery of oxygenated air at high-flow and low-low nasal cannula therapy
 - Delivery of oxygenated air for respiratory distress patients
 - Provide the following in a timely manner:
 - Quote with accurate itemized list of supplies, quantity and cost
 - Process order within 48 hours
 - Ensure a Packing Slip is included in each shipment
 - Submit invoice in the Invoice Process Platform (IPP) to process payment
 - Ensure each item is properly packaged in a sterile bag/container, sufficient and safe for direct patient care
 - Be responsible for return and replacement of damaged items
 - Provide technical expertise to the Respiratory Therapist inquiring about respiratory products
 - Communicate with the Respiratory Therapist and TPOC on delivery status, delays and/or back order
