
STATEMENT OF WORK (SOW)

Contract Title: Bent Tube Manufacturing

Contract Number:

Date: March 27, 2026

1.0 INTRODUCTION

This Statement of Work (SOW) establishes the requirements for the manufacturing of two (2) distinct hydraulic bent tube configurations for the Department of the Army. The Contractor shall produce these components in accordance with the specifications and drawings referenced herein. The raw material required for manufacturing and one component will be provided to the Contractor as Government Furnished Property (GFP).

2.0 BACKGROUND

The Department of the Army operates and maintains a diverse fleet of tactical and combat vehicles, including the M109 Paladin self-propelled howitzer. The hydraulic systems within this equipment are essential for operational readiness. Maintaining a reliable and timely supply of high-quality hydraulic tubes is critical to mission success and minimizing equipment downtime.

3.0 REQUIREMENTS

3.1. General Requirements

The Contractor shall furnish all labor, equipment, and facilities necessary to manufacture, inspect, and deliver the hydraulic tubes and tube assemblies specified in this SOW. All manufacturing processes shall strictly adhere to the requirements, specifications, and callouts detailed in the associated government drawings.

3.2. Manufacturing Specifications

The Contractor shall manufacture the following two (2) hydraulic tube/assemblies in the quantities specified per individual Delivery Order (DO):

- **Tube Assembly, Bleeder, Buffer Cylinder NIIN 002353467:** Manufacture in accordance with **Drawing 11619664**.

- This assembly consists of two component parts:
 1. Tube, P/N: 11619660
 2. Elbow, Buffer Cylinder, P/N: 11619662
- **Tube, Bleeder, Buffer Cylinder NIIN 001269948:** Manufacture in accordance with **Drawing 11619659.**

3.3. Quality Assurance

The Contractor shall establish and maintain a robust Quality Control (QC) system compliant with the standards outlined below.

- **Quality System:** The Contractor's QC system shall meet or exceed industry best practices and the specific requirements of this SOW.
- **Inspection:** The Contractor shall perform 100% inspection of all critical dimensions and features for each component as defined on the technical drawings.
- **Documentation:** A complete documentation package shall be provided for each manufactured component, which must include:
 - A detailed Inspection Report in adherence to the Quality Assurance Plan specified in **Drawing 13101232.**
 - A signed Certificate of Conformance (CoC).

4.0 DELIVERABLES

Deliverable	Format	Delivery Schedule
Manufactured Tubes & Assemblies	Physical	Per Delivery Order schedule
Inspection Reports	Electronic	With each shipment
Certificate of Conformance	Electronic	With each shipment

All deliverables shall be packaged securely to prevent damage during transit and delivered to the designated Government facility specified in the Delivery Order.

5.0 PERFORMANCE STANDARDS

Metric	Standard
On-Time Delivery	95% of all deliveries must meet the schedule specified in the DO.
Quality Defect Rate	Shall not exceed 0.5% of all units delivered.
Communications	Contractor shall respond to all Government inquiries within one (1) business day.
Manufacturing Accuracy	100% of all tubes and assemblies shall meet the specified dimensions and tolerances.

6.0 GOVERNMENT FURNISHED PROPERTY (GFP)

The Government will provide the following materials to the Contractor for the execution of this contract:

- **Copper Brazed Steel Tubing:**
 - **Specification:** 0.125" OD x 0.025" wall thickness per SAE J527.
 - **For Use In:** Manufacturing of Tube IAW drawing 11619659 and Tube IAW drawing 11619660.
 - **Elbow, Buffer Cylinder (P/N: 11619662):**
 - **Quantity:** 18 pieces.
 - **For Use In:** Assembly of Tube IAW drawing 11619664.
-

7.0 CONTRACTOR QUALIFICATIONS

The Contractor must possess and demonstrate the following qualifications:

- A minimum of five (5) years of direct experience in precision hydraulic tube manufacturing.
 - Current ISO 9001 certification.
 - Demonstrated experience working with the materials specified in Section 6.0.
 - AS9100 certification is highly preferred.
-

8.0 PLACE OF PERFORMANCE

All work described in this SOW shall be performed at the Contractor's facility.

9.0 PERIOD OF PERFORMANCE

The contract's base period and any option periods will be specified at the time of award. The delivery required for initial orders is no later than 30 days after receipt of order (ARO).
