

STATEMENT OF WORK

1. Objective/Requirements

This requirement is for the acquisition of the FY26 Trane Maintenance Renewal for NASA Langley Research Center (LaRC). The information listed below is required to complete this purchase.

2. Characteristics, Scope, and Specs

The chosen vendor must meet the requirements specified below:

- Have an established business office within 50.00 miles of the project site and must provide 24 hours/day, 7 days/week response in the event of a customer warranty or service call.
- Have factory trained and certified personnel providing all engineering, service, startup, and commissioning field labor for the project from their local office location.
- Be able to provide training certifications for all local office personnel upon request.
- Must be corporate owned entity of Trane.
- Employ Tracer Elite certified technicians.

- Trace 3D Plus Annual License Renewal:

Trace 3D Plus software requires an annual license renewal for the software to remain active. This software license renewal includes four (4) additional User Licenses.

- Tracer TU Professional Edition Annual License Renewal: Mark Lovell license:

Tracer TU Professional Edition software requires an annual license renewal for the software to remain active. The software license renewal is a requirement for the Tracer TU Standard Edition program to function on the computer on which the software was initially installed after the first year.

- Tracer TU Professional Edition Annual License Renewal: B1215 license:

Tracer TU Professional Edition software requires an annual license renewal for the software to remain active. The software license renewal is a requirement for the Tracer TU Standard Edition program to function on the computer on which the software was initially installed after the first year.

- Tracer TU Professional Edition Annual License Renewal: David Zimmerman license:

Tracer TU Professional Edition software requires an annual license renewal for the software to remain active. The software license renewal is a requirement for the Tracer TU Standard Edition program to function on the computer on which the software was initially installed after the first year.

- Tracer Ensemble Software Annual License Renewal:

All Trane ES Web Server Software updates for the duration on one (1) calendar year from date of purchase

Owner training for software updates as required

- Software maintenance plans (SMP) for all Fifty-Nine (59) existing Application SC+ Controllers shown below:

Building	Number of SMP's Needed		Building	Number of SMP's Needed
NASA 0645	1		NASA 1232A	1
NASA 0647	1		NASA 1236	1

NASA 1230B	1		NASA 2104	2
NASA 1231C	1		NASA 2105	1

3. Place of Performance

E-delivery to NASA LaRC
ATTN: William Christopher Sikes

4. Period of Performance

One year from date of award
