

## **STATEMENT OF WORK – Ascent II Winged Back Medical Recliners**

### **1.1 Overview**

This document outlines the request to provide replacements for all the winged back recliners in the Oncology Clinic. This is due to their advanced age and an increasing frequency of mechanical failures; we will be replacing the current inventory of winged-back medical recliners. The persistent breakage of essential parts has made ongoing repairs unsustainable and has raised concerns about patient safety and comfort. The new recliners will ensure a higher standard of reliability and safety for our patients.
