Bar Code Markings are required in accordance with the latest revision of MIL-STD-129 and ISO/IEC 16388 - Information Technology - Automatic Identification and Data Capture Techniques - Bar Code Symbology Specification - Code 39

CALIBRATION REQUIREMENTS

The calibration of Test, Measurement and Diagnostic Equipment shall be in accordance with American National Standards Institute/National Conference of Standards Laboratories (ANSI/NCSL) Z540-3-2006 (General Requirements for Calibration Laboratories and Measuring and Test Equipment) or ISO 10012:2003 (Quality Assurance Requirements for Measuring Equipment). Terminology shall be as defined by International Organization for Standardization (ISO) 8402, Quality Management and Quality Assurance Vocabulary.

ELECTRONIC FABRICATION: REQUIREMENTS FOR ELECTRICAL AND ELECTRONIC ASSEMBLIES

1. Notwithstanding any other provision contained in any part of this contract to the contrary, the minimum requirements/standards for soldering electrical and electronic assemblies shall be the non-military joint industry standard, ANSI/J-STD-001, Class 3. The revision of ANSI/J-STD-001 in effect on the effective date of the contract shall govern the hardware produced hereunder. A copy of ANSI/J-STD-001 may be obtained from the Institute for Interconnecting and Packaging Electronic Circuits (IPC), 3000 Lakeside Drive, 105N, Bannockburn, IL, 60015, <https://www.ipc.org> .

2. The contractor shall establish and maintain an electronic/electrical parts control program and shall maintain and make available to the Government records and data which will provide visibility and traceability of all parts used in the production of the equipment under this contract. This selection of parts shall not be construed to relieve the contractor of meeting specified performance of the end item in which the part is used.

3. The Technical Data Package (TDP) shall serve as the baseline Program Parts Selection List (PPSL) and the parts and sources listed therein are the standard parts and sources. A Non Standard Part is defined as a part or source other than that cited in the PPSL. When the contractor desires to use a part or source other than those cited in the PPSL, the change must be approved by the Government via a Request for Deviation (RFD) as defined elsewhere in this contract. Failure on the part of the contractor to submit such RFDs may result in the replacement of the nonstandard part with the standard part by the Government at the contractors expense for all affected items.

4. The contractor shall provide objective evidence such as form, fit, function, and interchangeability data that shows the proposed part complies with the requirements of applicable parts documentation. The RFD shall detail the technical justification for the use of the part and advantages of the nonstandard part, if any. Compare the nonstandard part to the standard part whose characteristics are nearest to those required for the application.

Include, when applicable:

- Part Number and Source
- Size and weight data.
- Electrical and mechanical characteristics
- Reliability (with data if requested)
- Availability of the standard part (delivery schedules, still available etc.)
- Supplemental data such as existing control drawings, specifications, vendor data sheets, and other pertinent data. Data need not be furnished for nonstandard parts covered by documents listed in the Department of Defense Index of Specifications and Standards (DoDISS) or Standardized Military Drawings (SMD).

5. The Contractor shall maintain a Lead Free Control Plan (LFCP) and make available to the Government upon request. The requirement for a Lead Free Control Plan shall be flowed down to suppliers of equipment that may include lead-free materials. The LFCP shall follow the guidelines set forth in GEIA-STD-0005-1, "Performance Standard for Aerospace and High Performance Electronic Systems Containing Lead-Free Solder" or its equivalent. In addition, the LFCP shall also include tin whisker mitigation plans in accordance with GEIA-STD-0005-2, "Standard for Mitigating the Effects of Tin Whiskers in Aerospace and High Performance Electronic Systems" or its equivalent, at control level 2C or equivalent. The Contractor should include in the LFCP any special design considerations, manufacturing process controls, test and qualification requirements, quality inspection and screening, marking and identification, maintenance and repair processes, and other steps taken to mitigate risk.

6. The Contractor shall prepare, or update existing, Counterfeit Risk Management Plan and make available to the Government upon request. The Plan shall meet the requirements of SAE AS5553 for electronic items. The Contractor shall procure parts from original manufacturers or the original manufacturers franchised distributors. Contractors shall report counterfeits and suspected counterfeits to the Government and in the Government Industry Data Exchange Program (GIDEP), in accordance with the GIDEP Operations Manual, S0300-BT-PRO-010.

Name of Offeror or Contractor:

1. Contractor initiated Engineering Change Proposals (ECPs), Value Engineering Change Proposals (VECPs), and Request for Variance (RFVs), collectively referred to as "proposals", shall be prepared, submitted and distributed in accordance with paragraphs 2, 3 and 4 below except as specified in paragraph 5 below.

2. Format

a. Class I ECPs require the "Long Form Procedure" for documenting the change and describing the effects of the change on the suitability and supportability of the Configuration Item (CI). Class I ECPs should be limited to those that are necessary or offer significant benefit to the Government. Class I ECPs are those that affect the performance, reliability, maintainability, survivability, weight, balance, moment of inertia, interface characteristics, electromagnetic characteristics, or other technical requirements in the specifications and drawings. Class I ECPs also include those changes that affect Government Furnished Equipment, safety, compatibility, retrofit, operation and maintenance manuals, interchangeability, substitutability, replaceability, source control specifications and drawings, costs, guarantees or warranties, deliveries, or schedules. Class II ECPs are those that do not affect form, fit and function, cost, or schedule of the system CI and do not meet the other criteria described above for Class I ECPs.

b. Long Form Procedure: Class I changes to the CI require that DD Form 1692, pages 1 through 7 (as applicable), be prepared. Use of this procedure assures that all effects of the change on the CI are properly addressed and documented to the necessary detail to allow proper evaluation of the proposed change.

c. Short Form Procedure: ECPs and VECs, which meet the requirements of Class II ECPs, shall be prepared using DD Form 1692 (page 1 only). Supplemental pages may be used with the form as necessary. The responsible Defense Contract Management Agency (DCMA) Contract Management Office (CMO) will validate data entries in Block 5 "Class of ECP", Block 6 "Priority", and Block 8 "Justification Codes."

d. The Contractor shall not manufacture items for acceptance by the Government that incorporate a known departure from requirements, unless the Government has approved an RFV. RFVs shall be prepared using DD Form 1694.

e. Each ECP and RFV shall be accompanied by a written and signed evaluation prepared by the responsible Defense Contract Management Agency (DCMA) technical representative. The DCMA written evaluation shall be considered part of the ECP/RFV proposal.

f. Classification of RFVs.

(1) Major RFVs. RFVs written against CIs shall be designated as major when the RFV consists of acceptance of an item having a nonconformance with contract or configuration documentation involving health; performance; interchangeability; reliability; survivability; maintainability; effective use or operation; weight; appearance (when a factor); or when there is a departure from a requirement classified as major in the contractual documentation.

(2) Critical RFVs. RFVs written against CIs shall be designated as critical when the RFV consists of acceptance of an item having a nonconformance with contract or configuration documentation involving safety or when there is a departure from a requirement classified as critical in the contractual documentation.

(3) Minor RFVs. RFVs written against CIs shall be designated as minor when the RFV consists of acceptance of an item having a nonconformance with contract or configuration documentation which does not involve any of the factors listed above in paragraphs f(1) or g(2), or when there is a departure from a requirement classified as minor in the contractual documentation.

g. Proposals shall include sufficient technical data to describe all changes from existing contract requirements.

h. Proposals shall include sufficient justification for making the change, including a statement of contract impact, if the change is not authorized.

i. Proposals for ECPs shall set forth a "not to exceed" price and delivery adjustment acceptable to the Contractor if the Government subsequently approves the proposal. If approved, the equitable increase shall not exceed this amount.

j. Times allowed for technical decisions for ECP and RFV proposals will be worked out via mutual agreement between the Contractor and the Government.

k. Proposals for VECs shall set forth a "not less than" price and delivery adjustment acceptable to the Contractor if the Government subsequently approves the proposal. If approved, the savings shall not be less than this amount.

l. The Contractor shall utilize DD Form 2617, "Engineering Release Record" (ERR) to release new or revised configuration documentation to the Government for approval.

m. The Contractor shall utilize DD Form 1695, "Notice of Revision" (NOR) to describe the exact change(s) to configuration documentation specified as a data requirement in the contract. The Contractor shall describe the change using subsections entitled "WAS" to describe the current contractual technical requirement and "IS" to describe the proposed new requirement.

3. Submittal

The preferred method of submittal is digitally as a single file in Adobe Acrobat Portable Document Format (PDF). Unless otherwise specified, alternate methods of submittal shall be proposed to and authorized by the PCO prior to submittal. If the hardcopy method is requested and approved, the Contractor shall submit two (2) copies of each proposal to the responsible Administrative Contracting Officer (ACO). One (1) copy of each proposal shall be returned to the Contractor within (5) working days after receipt by the ACO, stating whether or not the proposal is in compliance with this provision. Any unresolved differences between the ACO and the Contractor concerning ECPs, VECs, or RFVs will be submitted to the PCO for resolution.

. Distribution

a . Electronic Distribution. The preferred method of distribution for unclassified is through the email or DOD safe site

5 . Alternate Format, Submittal or Distribution Process. Proposals may be prepared in a different format, submitted using a different submittal process or distributed in a different manner than specified in paragraphs 2, 3 and 4 above, so long as the alternate approach is in accordance with a Government approved configuration management plan governed by this contract or the PCO authorizes the alternate format, submittal, or distribution process.

6 . Government Acceptance. Acceptance of a proposal by the Government shall be affected by the issuance of a change order or execution of a supplemental agreement incorporating the proposal into the contract unless the PCO authorizes another method of acceptance. The Government will notify the Contractor in writing if a proposal is determined to be unacceptable.

SOURCES ELIGIBLE FOR AWARD CONSIDERATION

(a) Competition under this solicitation is restricted to the following sources:

(1) Approved Sources listed in Section B -- sources that have been approved by the prime manufacturer or the Government for supply of item(s) listed in this solicitation, to assure the requisite safe, dependable, effective operation and support of military equipment.

(2) Sources that have been approved prior to award -- other than approved sources listed in Section B.

(3) Non-manufacturers--offers from non-manufacturers (distributors) will only be considered for award if the required item(s) is new material and has been or will be obtained from a source of supply which has been approved prior to award. The source and part number of the item the offeror intends to supply must be stated in the offer.

(b) Only offers submitted by the above sources will be considered for award under this solicitation.

(c) Offerors (prospective manufacturers or non-manufacturers [distributors]) who wish to become an approved source of supply for an item listed in this solicitation should proceed per the instructions set forth in paragraph (d) below. It is noted that offeror requests for source approval in conjunction with this procurement will not be a cause for delay in this solicitation action. However, if it is determined that additional sources will clearly benefit the Government and that any delay incident to their approval would not impact readiness, a reasonable delay may be entertained. Whether or not such delay will occur will be solely at the discretion of the Government, and the time set for opening of the Invitation for Bids or the closing date of the Request for Proposals may or may not be extended. An extension will be witnessed by issuance of an amendment to this solicitation.

(d) Offerors (prospective manufacturers or non-manufacturers [distributors]) seeking to obtain source approval, must submit a Source Approval Request (SAR) package, for review and approval, to the Systems Readiness Directorate (SRD), Aviation and Missile Center,

Name of Offeror or Contractor:

DEVCOM. Source approval must be obtained prior to being considered for contract award. Approvals are made on an individual part number basis for a specific manufacturing location (CAGE). SAR instructions can be found at <https://www.avmc.army.mil/Directorates/SRD/SAR/>. Questions concerning SAR submissions can be directed to the SRD SAR Team at "mailto:usarmy.redstone.devcom-avmc.mbx.amr-m-sar@army.mil".

(e) The Aviation and Missile Lifecycle Management Command (AMCOM) may require additional data, testing, or plant visits before it is able to completely evaluate a SAR. This may require the offeror (at no expense to the Government) to supply parts for testing, engine run up, or flight tests. In that event, the requestor will be so advised. AMCOM reserves the right to approve a contractor for award prior to completion of physical testing of the offered item. In such cases, the contractor shall perform any outstanding tests and provide all required documentation at no cost to the Government prior to entering upon full production. Lack of successful performance within the specified timeframe shall be grounds for a no cost termination.

(f) When a SAR is received, it will be processed for evaluation. If the evaluation and approval (including preparation or update of the requisite technical data package (TDP)) occurs before award, the requestor will be considered for award if a proposal was submitted per (d) above. If the evaluation/TDP preparation has not been completed prior to award, AMCOM will continue the process until complete. If the requestors SAR becomes approved, the requestor will be eligible for consideration on all future solicitations for the item.

(g) All approval or disapproval notices shall be officially provided to the contractor by the appropriate technical official.

(h) Non-manufacturers (distributors) seeking to supply an item from a non-approved source must first ensure that the source becomes approved in accordance with (d) above prior to contract award.

WOOD PACKING MATERIALS REQUIREMENTS

A. Wood packaging material (WPM) means wood pallets, skids, load boards, pallet collars, wooden boxes, reels, dunnage, crates, frame and cleats. The definition excludes materials that have undergone a manufacturing process, such as corrugated fiberboard, plywood, particleboard, veneer, and oriented strand board (OSD).

B. All Wood Packaging Material (WPM) acquired by DOD must meet requirements of International Standards for Phytosanitary Measures (ISPM) 15, "Guidelines for Regulating Wood Packaging Materials International Trade." DOD shipments inside and outside of the United States must meet ISPM 15 whenever WPM is used to ship DOD cargo.

(1) All WPM shall comply with the official quality control program for heat treatment (HT) or kiln dried heat treatment (KD HT) in accordance with American Lumber Standard Committee, incorporated (ALSC) Wood Packaging Material Program and WPM Enforcement Regulations (see <http://www.alsc.org/>).

(2) All WPM shall include certification/quality markings in accordance with the ALSC standard. Marking shall be placed in an unobstructed area that will be readily visible to inspectors. Pallet markings shall be applied to the stringer or block on diagonally opposite sides of the pallet and be contrasting and clearly visible. All containers shall be marked on a side other than the top or bottom, contrasting and clearly visible. All dunnage used in configuring and/or securing the load shall also comply with ISPM 15 and be marked with an ALSC approved DUNNAGE stamp.

C. Failure to comply with the requirements of this restriction may result in refusal, destruction, or treatment at entry. The Agency reserves the right to recoup from the Contractor any remediation costs incurred by the Government.

D. Replacement Preservative for Pentachlorophenol

If packaging requirements of this contract specify the use of wood products and a preservative is required, Pentachlorophenol, commonly referred to as "Penta" or "PCP" is prohibited. Replacement preservatives are 2 percent copper naphthenate, 3 percent zinc naphthenate or 1.8 percent copper 8 quinolinate.

060(1) Heat Treatment: Boxes/pallets and any wood used as inner packaging made of non-manufactured wood shall be heat-treated. All nonmanufactured

wood used in packaging shall be heat treated to a core temperature of 56 degrees Celsius for a minimum of 30 minutes. The box/pallet manufacturer and the manufacturer of wood used as inner packaging shall be affiliated with an inspection agency accredited by the board of review of the American Lumber Standard Committee. The box/pallet manufacturer and the manufacturer of wood used as inner packaging shall ensure traceability to the original source of heat treatment.

(2) Marking: Each box/pallet shall be marked to show the conformance to the International Plant Protection Convention Standard. The quality mark shall be placed on both ends of the outer packaging, between the end cleats or end battens: on two sides of the pallet. Foreign manufacturers shall have the heat treatment of non-manufactured wood process verified in accordance with their National Plant Protection Organization's compliance program. In addition, wood used as dunnage for blocking and bracing shall be ordered with ALSC certified marking for dunnage or the markings may be applied locally at two foot intervals.

The award will be made to the quoter whose quote conforms to the terms and conditions of the solicitation and represents the best value to the Government. Therefore, award may be made to other than the lowest priced or the highest technically rated quote.

(b) RELATIVE IMPORTANCE AND TRADE-OFFS. The Government will base the determination of best value on a comparative assessment of the quoters' prices, past performance, and the other evaluation factors identified elsewhere in this solicitation. evaluated cost or price becomes more important.

- [] approximately equal to cost or price; or
- [] significantly less important than cost or price. As the evaluated cost/price becomes more equal, relative importance of all other evaluation factors becomes more significant.

The final award decision may involve a trade-off among cost or price and the non-price factors. Factors that may be considered in the trade-off process include, but are not limited to:

- Item criticality and weapons system application
- Current inventory status
- Historical delivery or quality problems
- Concerns over limited supply sources and industrial base
- Benefits from obtaining new sources

(c) COST OR PRICE. The Government will evaluate the quoted cost or price. The Government will add any other cost or price evaluation factors identified elsewhere in this solicitation (e.g., Buy American Act or FOB Origin transportation costs) to arrive at the quoter's evaluated cost or price. The evaluated cost or price will be used in conjunction with the other non-price factors to determine the best value to the Government.

(d) PAST PERFORMANCE. Past performance includes, but is not limited to, the quoter's record of conforming to contract requirements and standards of good workmanship; adherence to contract schedules, including the administrative aspects of performance; the quoter's reputation for reasonable and cooperative behavior and commitment to customer satisfaction; and generally, the quoter's business-like concern for the customer's interest.

The Government will use the past performance evaluation factors marked below in addition to cost or price and other evaluation factors specified in the solicitation. Unless indicated otherwise, past performance is significantly more important than other non-price factors. Within the past performance subfactors, SPRS assessments (as applicable) will be weighed most heavily. Historical quality history and delivery schedule compliance (not captured in SPRS) will be weighed more heavily than the remaining past performance subfactors. All other non-price evaluation factors specified in this solicitation weigh equally, unless otherwise indicated.
