

- Statement of Work: Annual Small Arms Maintenance and Repair Services

Sig Sauer M17 Handgun	QTY: 76
FN M4 Rifles	QTY: 08
Benelli M4 Shotguns	QTY: 17

Background: The Department of War (DoW) requires annual preventative maintenance, inspection, and repair services for its inventory of small arms to ensure maximum operational readiness, serviceability, and safety for all personnel.

Scope of Work: The contractor shall provide all necessary labor and expertise to perform annual service on specified firearms. The service shall include, at a minimum, the following tasks for each weapon:

- Disassembly: Complete disassembly of the weapon to the extent required for a full inspection and cleaning.
- Cleaning: Thorough cleaning of all weapon components to remove carbon buildup, fouling, and debris.
- Inspection: A detailed inspection of all components for wear, stress fractures, damage, or defects that may impact functionality or safety.
- Repair and Reassembly: Repair or replace components as required to bring the firearm into a fully serviceable condition. The weapon will then be reassembled to manufacturer specifications and subjected to a complete functions check.

Place of Performance: All work shall be conducted on-site at the following government-provided location:

- DLA San Joaquin, Building 235 (Police Department)
- Vender location must be within 25 miles of DLA San Joaquin

Materials and Parts

- Parts Specifications: The contractor shall use only Original Equipment Manufacturer (OEM) or manufacturer-specification parts for all repairs and replacements. No aftermarket or non-spec parts are authorized.
- Additional Costs: The base contract cost covers the labor for one (1) service per weapon, per year. Any additional parts necessary to bring a firearm into full, serviceable working order will be provided at an additional cost to the government. The contractor must obtain approval from the designated government point of contact (POC) before procuring and invoicing for any parts.

Contractor Qualifications: The contractor must provide verifiable proof that all technicians performing work under this contract are certified by the specific weapon manufacturer or possess an equivalent, recognized armorer's certification for each weapon system they are servicing.

Deliverables & Acceptance

- Primary Deliverable: A fully serviceable weapon, restored to manufacturer operational standards.
- Reporting: A service report for each weapon detailing the inspection findings, work performed, and a list of any parts that were replaced.
- Acceptance: Work will be considered complete and accepted once the weapon has passed functions check and the service report has been delivered to the government POC.
