

Solicitation No. FA480026Q0063

Request Title: Diesel Engine Replacement

Date: 5/5/2026

Questions and Answers

1. In order to properly identify the engine being requested in subject solicitation, we request the core engine serial number (13-digits) of the engine being replaced. That serial number will provide us with the necessary information to assure that the replacement engine is configured and programmed exactly as per the core engine being replaced. **The 13-digit serial number for the current Hatz is 0801895003928.**
2. The product specifications include line items such as a digital panel voltmeter, digital panel ammeter, load channel switches, mains switch, LED indicators, 28V switch, green start button, and red stop button. These are not items that are provided by Hatz. These items can be reused when the new replacement engine is received. Please confirm that these items are listed for compatibility purposes only, and not required to be shipped with the replacement engine. **Yes, they are listed for compatibility purposes only and are not required to be shipped with the replacement engine.**
