

## **STATEMENT OF WORK**

### **1. Objective/Requirements**

The NASA Kennedy Space Center EGS/COMET Team requires the procurement of 100 FedRAMP-authorized Epsilon3 Pro software licenses to support a pilot program intended to modernize and streamline work control systems.

### **2. Characteristics, Scope, and Specs**

| <b>Product</b>                                        | <b>Quantity</b> | <b>Term (mos)</b> |
|-------------------------------------------------------|-----------------|-------------------|
| Epsilon3 Pro FedRAMP High                             | 100.00          | 12.00             |
| Implementation & Onboarding (One-Time) - FedRAMP High | 100.00          | 12.00             |

Special Terms: Epsilon3 will make best efforts to perform a reasonable number of software updates in the next few months post-signature to reduce priority gaps between NASA's current work control software and Epsilon3.

### **3. Place of Performance**

NASA Kennedy Space Center  
Merritt Island, FL 32953

### **4. Period of Performance**

The license period of performance will be 12 Months ARO, with onboarding implementation beginning NLT 5/6/2026.
