

TRANSPORTATION SECURITY ADMINISTRATION (TSA)
Denver International Airport (DEN) STATEMENT OF WORK (SOW)
5 Gallon Bottled Water & Dispenser Rental Service
Brand name or Equal

1.0 Project Objective

The Contractor shall provide a reliable supply of 5-gallon bottled drinking purified water and high-quality dispensing equipment to Denver International Airport (DEN) for use throughout the passenger and baggage screening areas for a 12-month period on a firm fixed price purchase order. This includes scheduled delivery, equipment maintenance, replacement of broken dispenser, and sanitization services.

2.0 Scope of Work

- Water Supply: Provide up to 120/month - 5-gallon bottles of purified water
- Amount of water needed per delivery will vary based on consumption and need

Delivery Frequency: bi-weekly / twice a month

Delivery location: Denver International Airport A-Con Loading Zone or DIA AOB Loading Dock

Quantity: Up to **60 five-gallon bottles per delivery; max 120 five-gallon bottles per month.**

CLIN	Base Year	Quantity
0001	5 Gallon Water	1440
0002	Water Dispenser	2
	Total Base Year	
	Option 1	
10001	5 Gallon Water	1440
10002	Water Dispenser	2
	Total Option Year 1	
	Option 2	
20001	5 Gallon Water	1440
20002	Water Dispenser	2
	Total Option Year 2	

- Equipment: Install two (2) water dispensers with cold water and hot water faucets at designated locations.
- Delivery: Scheduled delivery between the hours of 8am-3pm. Empty bottles must be collected during each delivery.

- Maintenance: On-site sanitization of dispensers every six (6) months and emergency repair/replacement of faulty units within 24–48 hours.

3.0 Technical Requirements

- Water: Purified Water - Brand name or equal.
- Bottles: Must be 5-gallon, food-grade, BPA-free, and utilize "No-Spill" or "Spill-Proof" caps to prevent contamination during loading.
- Dispensers: Two (2) (Brand name or equal)
- The vendor shall provide the rental/lease of two (2) water coolers for DEN.
- Must feature a child safety lock on the hot water faucet.
- Preferred: Bottom-loading models to reduce workplace lifting injuries.
