

STATEMENT OF WORK

DUMPSTER RENTAL AND DISPOSAL FOR UMBAGOG NWR 2756 Dam Rd, Errol, NH 03579

PART A – GENERAL INFORMATION AND INSTRUCTIONS

GENERAL DESCRIPTION OF WORK: Provide dumpsters to aid in the disposal of demolition debris from several structures within a 10 miles radius of the address listed above.

PART B – PERFORMANCE REQUIREMENTS

Dumpsters by material type: General Demolition Debris (30 yds dumpsters)

General demolition debris may include wood, roofing materials, drywall, flooring, siding, insulation, and miscellaneous construction materials. *Hazardous materials (including asbestos, lead-based paint debris requiring special handling, fuels, oils, refrigerants, or regulated waste) are excluded from this contract.*

Pricing provided based on the following for General Construction Debris Materials:

1. Initial Delivery Fee (if applicable)
2. Per Haul Fee (Fee to include full removal and empty return – ie. swap out)
3. Per Ton Disposal Fee

Dumpsters will be provided on an as needed basis; contractor shall be capable of providing and staging up to three (3) dumpsters on site simultaneously when requested. Pricing will include all fees and charges associated with dumpster handling - ie. hauling, disposal, permitting (if necessary), etc. The expectation is that all dumpsters necessary to complete the project will be coordinated and completed from May 25 – September 25, 2026. The contractor must have sufficient fleet capacity to support up to eight (8) swap-outs per day during peak demolition operations with a maximum response time of 4 hours during normal business hours.

Coordination of deliveries and pickup will be done through refuge staff while the job is being completed. General refuge hours are 8AM – 4PM Monday – Friday. The demolition task is expected to take two weeks or less.

PART C – OTHER PERFORMANCE REQUIREMENTS AND INFORMATION

DOCUMENTATION AND REPORTING: A written ticket will be provided to refuge staff as dumpsters arrive and exit to ensure load counts are accurate. The weights for disposal for general debris will not be known at the time of departure; however, refuge staff will be notified within 24 hours of disposal weights. Sorted materials will be recycled to the maximum extent possible to divert as much waste from landfills. All local and state transportation regulations apply. Title to debris transfers to the contractor upon removal from Government property. The Contractor assumes responsibility for proper transport, recycling, and disposal in accordance with all applicable federal, state, and local regulations.

Invoices shall itemize delivery fees, swap/haul charges, tonnage disposed (with scale tickets attached), and applicable taxes or surcharges. Payment will be made based on verified weights.

The Government reserves the right to suspend operations due to weather or operational requirements without penalty. Standby or idle fees must be disclosed in advance.

CONTACT INFORMATION: Possible contractors are encouraged to contact Darren Stover, Logistics Management Specialist at 302-222-7598 or darren_stover@fws.gov for additional information or site-specific requirements.
