PIEE supports delivery up to 1.9 GB per file, with no limit on the number of files, as well as multiple file formats. If needed, Offerors may break the files down into smaller sections in order to upload. In such cases, please divide the sections as logically as possible and be sure to clearly name the files as specified below.

AMENDMENT 04

This amendment extends the submission due date.

AMENDMENT 03

This amendment extends the submission due date.

AMENDMENT 02

Request for Information

1. Can you provide more information about the cross sound cable? Are there burial depths known? Will coordinates or a CAD drawing be provided for the cable before construction?
A data package on cable location and depths will be provided to the contractor during the pre-construction submittal timeframe, per Specification Section 35 20 23 1.13.4, to include an XYZ coordinate/depth data and a set of figures displaying this information. No portion of the Cross Sound Cable is within the dredging template for this contract. A Cross Sound Cable point-of-contact has been provided in Specification Section 01 11 00 1.13.5D for contractors interested in performing their own investigations.

2. Please verify that the Northing coordinate for the approximate disposal location should be "612215.98" not "6122215.98".

Yes, the Northing coordinate is incorrect. The approximate disposal coordinate at CLDS under specification section 3.4.1b(1) should read "N 612215.98". The Disposal site figure at the end of specification section 35 20 23 is a correct representation of the approximate disposal site location. Specific disposal site coordinates and operational radius from that point will be provided during the preconstruction submittal timeframe.

3. Will the channel be after-dredge surveyed and accepted in acceptance sections?

Government After-dredge surveys may be conducted in 'acceptance-sections' to facilitate progress over a navigation channel of this size. Contractors should propose acceptance-sections in their 'Dredge Operations Plan' submittal from specification section 35 20 23 3.2.2 that are in line with anticipated progress rates and initial scheduling plans. The number and station-span of acceptance sections will be coordinated with the USACE Survey team and approved by the COR.

AMENDMENT 01

Request for Information

1. Please provide the most current survey data of the dredge areas in XYZ format.

Bidders requesting XYZ data can do so by emailing a request to Contract Specialist Tyler Maryak at tyler.s.maryak@usace.army.mil and indicating the email address to which the file should be directed. The XYZ file will be dropped off via DoD SAFE and bidders will receive an email from DoD SAFE with pickup instructions. If bidders do not receive the drop-off within 24 hours of request, please follow up with Mr. Maryak.
