

Freedom 250

Brand Guidelines

Celebrating the **Triumph** of the **American Spirit**

Freedom 250 Logo

The Freedom 250 logo draws inspiration from the historic Betsy Ross flag, one of the earliest symbols of American Independence. The thirteen stars arranged in a circle represent the original colonies, echoing the unity and revolutionary spirit of 1776.

Black & White Logo and Icon Usage

Black and white versions of the Freedom 250 logo and icon should be used only when absolutely necessary and when full-color reproduction is not possible.

- The full-color logo is always the preferred option and should be used whenever available.
- Black versions are intended for use on light backgrounds.
- White versions are intended for use on dark backgrounds.
- Color, proportions, spacing, and clear space rules must still be followed.

For use on dark backgrounds

For use on light backgrounds

Freedom 250 Secondary Logo

The Freedom 250 flag without the “Freedom 250” wordmark is considered a decorative graphic element, not a primary brand identifier.

- The flag-only mark should be used in the same manner as the icon.
- It may be used to complement the primary logo in design applications.
- Appropriate uses include backgrounds, patterns, apparel, merchandise, and supporting visuals.

The flag-only mark must not replace the primary Freedom 250 logo in any official, formal, or brand-representative context.

The full-color Freedom 250 logo is always the preferred and primary representation of the brand.

Co-Branding

The Freedom 250 logo may be paired with partner logos using an approved lockup.

- The partner logo must not be larger than the Freedom 250 logo.
- Both logos should be aligned on the same baseline and scaled to feel visually balanced.
- Spacing between logos should be consistent and intentional—not too tight or wide.
- Neither logo may overpower, overlap, or alter the other.

The example shown demonstrates the correct scale, alignment, and spacing for approved co-branding usage.

Minimum Clear Space

To ensure clarity, legibility, and visual impact, the Freedom 250 logo must always be surrounded by a defined area of clear space.

- Minimum clear space is required on all sides of the logo.
- This space must remain free of text, imagery, graphics, or page edges.
- Clear space helps preserve the logo's integrity and prevents visual clutter.

The minimum clear space should be measured using a consistent internal element of the logo (as shown in the example). This spacing must be maintained across all applications, regardless of size or medium.

The logo should never appear crowded, cropped, or constrained by surrounding elements.

Do's & Don'ts

To maintain consistency and protect the integrity of the Freedom 250 brand, visual examples of **incorrect logo usage** should be referenced.

Do:

- Use approved logo files and lockups only
- Maintain original proportions and spacing
- Use approved color variations (full color, black, or white)
- Follow clear space and sizing guidelines

Don't:

- Stretch, squeeze, or distort the logo
- Replace or modify fonts within the wordmark
- Alter colors, proportions, or orientation
- Add effects such as shadows, outlines, or gradients
- Use unapproved variations or recreate the logo

Don'ts

Do not stretch, squeeze, or distort the logo.

Do not change or replace the typeface of the logo.

Do not change the colors of the logo from the versions provided.

Do not add drop shadows or other visual effects to the logo.
