CENSECFOR INSTRUCTION 1540.1D

From: Commanding Officer, Center for Security Forces

Subj: TRAINING POLICY AND GUIDANCE INSTRUCTION

Encl: (1) Frequently Asked Questions (FAQs)
(2) Instructor Management
(3) Contractor Instruction
(4) In-Service Training Program
(5) Student Records Management
(6) Student Feedback Program
(7) Testing, Grading, and Test Evaluation Procedures
(8) Academic Review Board
(9) Training Materials Management
(10) Course Audit Trail
(11) Formal Course Review
(12) Training Directorate Structure, Roles and Responsibilities for the Delivery of Instruction
(13) Definitions and Acronyms
(14) References

1. Purpose. To provide training management policy to Center for Security Forces (CENSECFOR) Learning Activities so they have the operational, instructional, and administrative tools necessary to deliver safe, effective, and quality training.

2. Cancellation. CENSECFORINST 1540.1C.

3. Applicability. This instruction has been completely revised and shall be read in its entirety. It applies to all personnel (military, government civilian (CIVPERS), and contractor) responsible for training management and delivery within the CENSECFOR domain.

4. Responsibilities. This instruction sets forth training policies and guidance.

5. Records Management. Records created as a result of this instruction, regardless of format or media, shall be managed per SECNAV M-5210.1 of September 2019.

6. Review and Effective Date. Per OPNAVINST 5215.17A, CENSECFOR Training Directorate (N7) will review this instruction annually by the anniversary of its issuance date to ensure applicability, currency, and consistency with Federal, Department of Defense, Secretary of the Navy, and Navy policy and statutory authority using OPNAV 5215/40 Review of Instruction.

7. Forms. Forms and figures mentioned in this instruction are available on the CENSECFOR Learning Standards Office Microsoft (MS) Teams SharePoint site for learning activities. Course supervisors have access. All others may request access by contacting the CENSECFOR Learning Standards Office for information.

J. M. BROMLEY

Releasability and distribution:

This instruction is cleared for public release and is available Electronically via email at CENSECFOR_HQ_ADMINOFF@us.navy.mil

FREQUENTLY ASKED QUESTIONS (FAQ)

1. Purpose. Provide readily available and accessible information in a quick and easy format.
2. Applicability. The questions located in this section were obtained from domain staff. The answers apply to all within the CENSECFOR domain involved in the delivery of Center for Security Forces (CENSECFOR) courses of instruction.
3. FAQ by Category.

Core Unique Instructor Training (CUIT):

- (1) Why do I need to complete a CUIT?
A. OPNAVINST 1500.75 and NETCINST 1500.13 requires all high-risk instructors to complete CUIT certification. CENSECFOR CO expands the requirement to include moderate and non-high-risk instructors, also.
- (2) Am I required to sit through the course as a student prior personalizing my instructor guide?
A. An instructor is required to only sit through the high-risk segments of the course of instruction (COI) they will be instructing as a student, prior to instructor guide personalization. Not the entire COI.
- (3) Where do I find the CUIT certification steps?
A. Enclosure 2, paragraph 3.c. Additionally, if there are any questions, please call the Learning Standards Office.

Course Supervisor (CS):

- (1) Where can I locate a list of the CS's duties?
A. Enclosure 12, paragraph 2.i.
- (2) Does the CS have to be CUIT certified?
A. The CS must be fully CUIT certified in the COI prior to being assigned as CS. Please see Enclosure 12, paragraph 2.i.

Curriculum:

- (1) How do we request a change or update in the course?
A. Submit all recommendations to the course supervisor. The course supervisor will contact the Course Curriculum Model Manager (CCMM). Together, the CCMM and CS will create the appropriate electronic Course Activity Log (eCAL) entry to record the recommendation until such time the course is updated.

If the recommendation is safety related, the CS and CCMM shall act immediately, accordingly. Please refer to Enclosures 9 and 10.

Instructor:

- (1) How do I quality/certify as an instructor?
A. Enclosure 2.
- (2) Do I need to have the NEC 805A to be an instructor?
A. To instruct at any CENSECFOR learning activity, instructors are required to be NEC 805A qualified or equivalent.
- (3) Do I need a designation letter to be an instructor evaluator?
A. Yes, a template may be found in Enclosure 12, Figure 12-3.
- (4) How often do high-risk instructors get evaluated?
A. Within, and not to exceed, 90 days.
- (5) How often do non-high-risk instructors get evaluated?
A. Within, and not to exceed, 180 days.
- (6) Are unscheduled evaluations performed?
A. Yes, the learning activity leadership team will conduct annual, unscheduled evaluations on all instructors.
- (7) May I cross-CUIT for another COI?
A. Yes, not required but authorized, especially on similar topic areas.
- (8) Where do I find information regarding an Instructor Improvement Plan?
A. Enclosure 2, paragraph 10.
- (9) How do I certify as an instructor evaluator?
A. Enclosure 12, paragraph 2.k.

Student Surveys:

- (1) When are student surveys required?
A. Upon completion of each high-risk training event and upon completion of the COI.
- (2) Where do I find information regarding student surveys?
A. Enclosure 6.

Testing:

(1) Do I need a designation letter to be a testing officer (TO)?
A. Yes, a template may be found in Enclosure 12, Figure 12-2.

(2) Where can I locate a list of a TO's responsibilities, qualifications, and training?

A. Enclosure 12, paragraph 2.j.

(3) Where can I find templates on how to conduct test evaluation procedures and testing analysis?

A. Enclosure 7.

INSTRUCTOR MANAGEMENT

1. Purpose. To establish policies and procedures on the following instructor management issues:

- a. Core Unique Instructor Training (CUIT)
- b. Instructor training jackets (ITJ) for Center for Security Forces (CENSECFOR) learning activity instructors.
- c. Evaluation procedures and documentation.
- d. Suspension of instructor certification.
- e. Instructor recertification.
- f. Instructor reclassification.
- g. Routing of instructor documentation.
- h. Instructor improvement plan.

2. Applicability. This applies to all instructors within the CENSECFOR domain involved in the delivery of CENSECFOR courses. Instructors may be military, CIVPERS, or contractors.

3. Certification. Successful accomplishment of the CENSECFOR mission depends on highly motivated, well-trained instructors, in teamwork with support personnel. These objectives are accomplished through graduation from an approved instructor-training course, followed by a certification and evaluation program, along with participation in a continuous learning program. All CENSECFOR instructors shall follow the procedures for certification/evaluation depicted in figure 2-1. Each instructor shall be a graduate of the Navy Instructor Training Course (NITC) (NEC 805A) or military service equivalent prior to being certified to teach any CENSECFOR domain course. Military instructors without NEC 805A shall attend NITC. CIVPERS must complete equivalent instructor courses as specified in their position description. Contract instructors must complete equivalent instructor qualification training, as outlined in the vendor's performance work statement (PWS). A Course supervisor (CS) shall be a fully certified instructor on their assigned course of instruction (complete CUIT sign off) and have completed in-service training requirements for CS. It is highly recommended they obtain MTS designation prior to assuming those duties.

a. Military instructors who exceed body fat standards will be counseled by the Commanding Officer(CO)/Officer in Charge(OIC)/Site Director(SD), herein referred to as learning activity leadership, prior to or in conjunction with certification to evaluate suitability. CIVPERS and contract instructors must maintain similar standards established within their respective position descriptions and PWS.

b. All newly reporting instructors will receive command and course indoctrination. At a minimum, the course indoctrination will include information on the mission, program goals, objectives, code of conduct, violations/consequences of prohibited conduct, organizational structure, safety rules/regulations, and procedures. CSs will be responsible for explaining the indoctrination process, instructor certification path, and assigning a certification period. NETC Form 1500/3 is required to be completed and maintained in the ITJ.

(1) Military and CIVPERS instructors shall be assigned an initial certification period of 90 days. If additional time is required, the CS shall submit a waiver (figure 2-2), stating the course and course identification number (CIN), reason/justification for extension, and the length of extension requested. This waiver will go to the CENSECFOR CO via the learning activity leadership and CENSECFOR Director of Training (DOT).

(2) Contract instructors shall be assigned an initial certification period of 90 days and comply with their PWS. Waivers will not apply to contract instructors.

c. Certification Procedures

(1) The following steps shall be completed:

(a) The CS provides the new instructor with an ITJ containing the instructor certification record (ICR) (figure 2-3). Instructors are provided an ICR sheet for each course assigned listing the CIN and all topics.

(b) For all courses of instruction, an, uncertified instructor will attend only each topic they are assigned to teach in order to personalize their lesson plans while observing the topic delivery process. These personalized topics will be reviewed for technical accuracy and approved by the CS's initials.

(c) For high-risk courses of instruction only, an uncertified instructor must attend the high-risk portions of the

course as a student. These sit-ins and observances will be recorded in Phase II of the CUIT.

(2) All instructors will complete the applicable CUIT used in high, moderate, and non-high-risk courses.

(a) The CENSECFOR CO is the Curriculum Control Authority (CCA) for CENSECFOR and owns the CUIT process. Contents of the CUIT are determined by higher instructions, NETC Safety, and CCA direction. The approved CUIT for CENSECFOR is distributed to the learning sites via the CENSECFOR Learning Standards Office through the Course Curriculum Model Managers (CCMM) to the CS.

(b) The uncertified instructor must satisfactorily complete two (2) teach back evaluations (figure 2-4) utilizing their personally prepared instructor guide. These evaluations will be on separate teaching events on the same topic with one being a technical evaluation and one being a technique evaluation. The second evaluation given would also be considered the certification evaluation. In addition, teaching one evaluated lab is required and will be documented using figure 2-5. Both classroom and lab evaluated teach backs may be to staff personnel in lieu of students. For follow on topics and lab certification, the two required evaluations can evaluate both technical and technique areas. A certified instructor in the topic of instruction or Master Training Specialist (MTS) certified instructor must evaluate both technical knowledge and instructional delivery techniques. CS will recommend instructors for topic certification based upon the documented evaluations.

(c) For the initial CUIT instructor certification, learning activity leadership shall certify instructors based upon the CS recommendation. All remaining topics will be completed certified based upon successful completion of instructor evaluations by the CS. The CS will record certification to each topic in the instructor's ITJ on the ICR (figure 2-3) along with documentation on corresponding evaluations. Once certified on a topic, an instructor need not re-certify to teach that same topic in another course of instruction as long as it is identical.

(d) There are two levels of certifications for instructors: (1) CUIT topic instructor certification and (2) CUIT course certification. **(NOTE: The initial CUIT topic instructor certification evaluation shall always remain in the ITJ and never be purged.)** Once certified in a topic of instruction and all other initial requirements are met an instructor is considered initially certified and will be removed from uncertified instructor status. The

CS will record certification to teach each topic in the ITJ on the ICR.

(e) CUITs apply to all instructors except for:

1. CCA approved instructors teaching Commanding Officer Antiterrorism courses.

2. CENSECFOR DOT approved guest lecturers for designated courses.

(f) When a change, update, or revision to a CUIT occurs, the CS will apply the following steps for instructors who have completed the portions of the CUIT affected by the change.

1. Conduct and document training with certified instructors on the new changes.

2. Create a memorandum for the ITJ (figure 2-6)

3. Attach to this memorandum the line items of the differences/additions/changes, cover sheet of the latest CUIT, and the last sheet with the signatures annotating the completion of these line items.

4. File in the ITJ immediately in front of the original CUIT.

(g) For a pilot course, the CCA may authorize the CCMM to train the CS and sign the line item(s) with changes based on the pilot curriculum. The CS will qualify the course instructors. Pilot course instructors are chosen by the program managers (PMs), CCMM, CS, and learning activity leadership from certified instructors who have demonstrated subject matter expertise. The CS will approve lesson plan personalization.

(3) All CENSECFOR learning activities that conduct training on and maintain small arms in their inventory will ensure that ALL instructors hold a 717B NEC or equivalent. Contractors shall qualify and maintain sustainment qualification on weapons in accordance with their PWS. This includes all instructors designated to instruct a single weapon system. This will enable instructors to be cross utilized to teach or demonstrate any weapon system in any course of instruction. The ITJ shall contain only the most recent 3591 form showing the instructor's weapons qualifications on the weapons they are qualified to instruct. All outdated forms must be purged.

4. ITJ for CENSECFOR Learning Activity Instructors

a. An ITJ ensures milestones are properly tracked and documented in a single source for review and inspection. The ITJ also assist with mentoring and tracking staff certifications and training. CENSECFOR requires all milestones associated with course evaluations, In-Service Training (IST), waiver requests, lesson topic teach backs, certification dates, etc., to be documented in an ITJ.

b. Standardized ITJ format's depicted in figure 2-7. All learning activities will comply and ensure documentation and milestones are recorded. A contractor's PWS may have additional requirements.

c. Once received, all ITJs become the property of the Government. Upon transfer of a military instructor, or departure or termination of employment of a CIVPERS or contract partner, the learning activity will digitally record the original ITJ. The digitally recorded ITJ will be stored for a period of four years and then destroyed. The CS will provide the original paper version of the ITJ to the instructor.

d. CSs will maintain custody and control of all primary assigned military, civilian, and contractor ITJs. At the discretion of the learning activity leadership, additional personnel may be assigned to assist with the maintenance and upkeep of the ITJs. However, this does not relieve the CS of the responsibility of maintaining the ITJs.

5. Evaluation Procedures and Documentation

a. Instructor evaluations are a key and vital component to training and paramount to training safety. Instructor evaluations shall be conducted by either a trained instructor evaluator, an MTS certified instructor, or learning activity leadership.

b. Certifying evaluations shall be documented using the ICR (figure 2-3). All other instructor evaluations, i.e., MTS, quarterly, sustainment, etc., will be documented using the evaluation record (figure 2-8).

(1) All non-high risk course instructors shall be evaluated semi-annually (within 180 calendar days of last evaluation) for technique and technical expertise in support of their designation as a certified instructor. Either the CCMM, course supervisors, MTS instructor, instructor evaluator, or topic certified instructors who have completed IST on instructor evaluations, shall conduct the periodic evaluations. A semi-annual evaluation will be considered overdue after 180 days.

(2) All high-risk course instructors shall be evaluated quarterly (within 90 calendar days of last evaluation). High-risk CCMM, course supervisors, MTS instructor, instructor evaluator, or topic certified instructors who have completed IST on instructor evaluations, shall conduct the quarterly evaluations. A quarterly evaluation will be considered overdue after 90 days. In addition to the required quarterly evaluation, a member of the learning activity leadership team (the learning activity CO, OIC, SD, Executive Officer (XO), assistant OIC, assistant SD, Command Master Chief, or Senior Enlisted Leader (SEL)) shall conduct unscheduled evaluations for each high-risk instructor. All high-risk instructors shall be evaluated by learning activity leadership at least annually.

(3) For instructors who are cross-CUIT in high-risk courses, an evaluation must be conducted within the 90-day period in one of their CUIT courses. For example, if the instructor is cross-CUIT in Armed Sentry/Security Reaction Force - Basic (AS/SRF-B), Small Arms Marksmanship Instructor (SAMI), and Non-Compliant Boarding - Visit, Board, Search, and Seizure (NCB VBSS), the evaluation topic may cover the M4 Rifle for AS/SRF-B. This high-risk evaluation may be used to satisfy the high-risk evaluation requirement for SAMI and NCB VBSS course of instruction (COI), also.

(4) Instructors must be evaluated in both classroom and laboratory settings.

(a) Both need not be evaluated within the same 90-day evaluation period. It is recommended one evaluation be conducted in the classroom and the following evaluation be conducted in a laboratory.

(b) Both evaluator and instructor must sign the evaluations after evaluator debrief.

(c) The instructor must acknowledge in writing, in the Instructor Improvement Plan section, that they understand the evaluation, and how they will rectify any areas recommended for improvement. This applies even should the evaluator not provide comments in the Instructor Improvement Plan section.

(7) All completed instructor evaluations and waiver request, except for practice teach evaluations, are reviewed, and signed by the CS and learning activity leadership.

(8) A negative evaluation is an evaluation that meets one or more of the following criteria:

- (a) Four or more marks of Needs Improvement (NI).
- (b) Two or more marks of Unsatisfactory (UNSAT).
- (c) When a significant deficiency is noted (e.g., safety violation).
- (d) Not using their own personalized lesson plan.

(9) The CS must provide an Instructor Improvement Plan (figure 2-9) for any instructor receiving a negative evaluation.

(10) All instructor evaluations (figures 2-4 and 2-5) shall be routed to and reviewed by the learning activity leadership and maintained on file, with the CUIT in the ITJ, for the complete tour of military instructor and latest three (3) years for CIVPERS and contract instructors. Figures 2-4 and 2-5 provide guidance for evaluating an instructor.

6. Suspension of Instructor Certification

a. Any instructor that misses an evaluation will be considered suspended.

b. If an instructor is evaluated as UNSAT the evaluator will immediately notify the CS. The decision to suspend an instructor from a certified status for unsatisfactory evaluations will rest solely at the discretion of the learning activity's leadership.

c. If an instructor's knowledge of the subject matter is unsatisfactory, security is violated, or the instructor fails to adhere to safety standards in the classroom, the instructor will be decertified on the topic covered.

d. If a lab instructor fails to operate the trainer properly or fails to adhere to safety standards, the lab instructor will be decertified.

7. Instructor Recertification

a. If an instructor's certification has been suspended due to a missed periodic evaluation, the instructor must be re-instated by the CS with a satisfactory instructor evaluation. Re-certification of individual topics is not necessary.

b. If an instructor's certification has been suspended due to being placed on extended limited duty status or noncompliance with

body fat standards, the instructor must be reinstated by the learning activity leadership after correcting the applicable deficiency. Recertification of individual topics is not necessary.

c. If an instructor's certification has been suspended due to an UNSAT evaluation based upon technique problems, the instructor must report to an MTS instructor for IST in lesson delivery techniques. This remediation will include any topics required to assist in recertifying the individual and will be documented on figure 3-2. Upon completion of IST, the CS will reevaluate for recertification. Recertification of individual topics is not necessary.

d. When an instructor is suspended because of a failure to adhere to safety or security standards, or lack of knowledge in subject matter, the instructor must receive in-service training from a certified instructor as appointed by the CS that addresses the discrepancy. This training must be documented on figure 3-2. The instructor must recertify to teach the topic(s) in question.

e. When a lab instructor is suspended for failure to operate a trainer properly or because of failure to adhere to safety standards, the lab instructor must complete all or portions of the job sheets associated with that trainer satisfactorily as determined by the learning activity's leadership to re-certify.

f. Anytime a platform instructor's certification status changes, the CS must inform the learning activity leadership, CCMM, and CENSECFOR LSO via e-mail.

g. Course supervisors will analyze the results of instructor evaluations to determine the need for in-service training or special instruction. Any in-service training provided will be documented on figure 3-2.

8. Instructor Reclassification

a. Despite the stringent screening process for instructors, there are cases where individuals are unsuitable for instructor duty. Individuals unsuitable for instructor duty are classified into one of two categories:

(1) Individuals considered unsuitable for instructor duty through no fault of their own. Individuals in this category may have physical defects, speech impediments, lack of confidence, inability to project in front of an audience, or have other deficiencies, which hamper effective instructing.

(2) Individuals considered unsuitable for continued instructor duty because of their own actions. Individuals charged with misconduct, who demonstrate a lack of interest in instructing, who demonstrate poor attitudes, or who fail to maintain body fat or physical fitness standards fall into this category.

b. The requirements for the learning activities are the same regardless of the reasons for unsuitability. Four specific actions are required:

(1) Notify CENSECFOR CO and CENSECFOR DOT.

(2) Submit a recommendation to remove the instructor from instructor duty to Commander, Navy Personnel Command (COMNAVPERSCOM) (PERS-40) including specific reasons why the individual is considered unsuitable for continued instructor duty including the unsuitability category.

(3) For instructors considered unsuitable for continued instructor duty, because of their own actions, a statement of rebuttal from the instructor is required. If the instructor desires not to make a statement, the instructor must indicate this in writing.

(4) Reassignment because of unsuitability for any reason is at the discretion of COMNAVPERSCOM (PERS-40).

9. Routing of Instructor Documentation

a. When an instructor receives an evaluation, that evaluation, along with the proposed instructor improvement plan, and the instructor's remarks, shall be forwarded to learning activity leadership within five (5) days of the date of the evaluation.

b. Learning activity leadership may accept the recommendation of the instructor improvement plan or take other action, as they deem appropriate.

10. Instructor Improvement Program

a. To ensure all students benefit from each teaching and tactical situation, instructors need to have a thorough knowledge of classroom and scenario-based training and develop relevant expectations about the entire student team.

b. It is imperative that all instructors, CS's, and the chain of command continually update and focus instructional methods to ensure

maximum team performance and awareness. When an instructor loses their instructional focus, the following may be used as guidance to develop an instructor improvement plan to aid in providing direction and correction on how the instruction may improvement areas of deficiency.

(1) BE ALERT FOR CHANGES IN THE PERFORMANCE. Observe actions team members are doing and adjust to them (e.g., slow down team members).

(2) DON'T WAIT TO TAKE CORRECTIVE ACTION. When you observe students not performing to the level of expectation you may need to adjust the amount of critical team performance you expect them to do.

(3) CLARIFY EXPECTATIONS. Understand that clear expectations lead to a shared mental model of the progressive learning curve and ensures high levels of understanding and performance by all team members. Our mental picture is affected by:

(a) Past Experiences: We act on information based on our knowledge. When something looks similar to what we are familiar with, we may react as if it were the same.

(b) Expectations: Instructor expectations for students- whether high or low, can become a self-fulfilling prophecy. That is, students tend to give to instructors as much or as little as instructors expect of them.

(c) Filters: We are provided with information, but we do not use it. We do not pay attention to information that does not match our mental picture.

c. The below situational awareness behaviors apply to all training evolutions, especially tactical and high-risk training events:

(1) COMMUNICATE TO CHAIN OF COMMAND (CoC). Team leader must be aware of team actions and communicate status of team mission frequently to the CoC. EXAMPLE: Team members must know the technical aspects of other team members' jobs. Rotations of team members will change and you must be aware of what actions are needed from you to do that job effectively.

(2) CONTINUALLY ASSESS THE SITUATION. In the dynamic world of high-risk training, plan on change and continually assess and reassess the training situation to determine if the team is on track to safely and effectively increase their learning curve.

(3) OVERLOAD. Overload causes distraction; fixation; increased errors, and high stress. Prioritizing and delegating tasks and minimizing job distractions can improve safety in conditions of overload.

(4) POOR COMMUNICATIONS. The level of awareness achieved in a daily training cycle is related to the level and quality of communications the instructor(s) communicates and observes in the team's performance.

(5) CORRECTIVE ACTION. Questioning students during the scenario brief and performing thorough knowledge checks, can reduce the probability of mistakes.

(6) ASSESS STRESS LEVEL WITHIN TEAM. Too much or too little stress can reduce our ability to exercise good judgment. Assess the stress and attempt to obtain an optimal level before continuing.

(7) MANAGE RESULTING RISK. Apply the 5 steps of Risk Management prior to starting any high-risk training evolutions.

d. Instructional awareness is dynamic, hard to maintain, and easy to lose. Knowing what is going on all the time, with each student, is very difficult for any one person, especially during complex high stress training evolutions. It is imperative to implement these behaviors, which help maintain adequate instructional awareness.

CHAIN OF COMMAND ACKNOWLEDGE	
COURSE SUPERVISOR SIGNATURE	
CO/OIC/SD SIGNATURE	

FIGURE 2-4. INSTRUCTOR EVALUATION / PLATFORM

INSTRUCTOR EVALUATION GUIDE – PLATFORM INSTRUCTOR

The Platform Evaluation is not meant to ensure perfection. However, the instructor is expected to display confidence, enthusiasm, expertise, effective communications skills, and the ability to hold the attention of the class. Training shall cease and the evaluation will be automatically graded as UNSAT if any of the following events occur:

Safety is not thoroughly covered in any portion of the lesson; safety is not adhered to or is just ignored.

Information discussed by the instructor exceeds the classification of the course.

The instructor displays unprofessional traits or displays a poor attitude.

Information accuracy and entry-level techniques are minimum criteria for SAT evaluations.

1. PRE-CHECKLIST	SAT	NI	UNSAT
a. Certification records current.	Instructor's evaluation history is complete and not lacking any necessary documents.		Instructor missing necessary documents. (i.e. Quarterly)
b. Lesson plan has been personalized/current.	Notes/marks in instructor guide (IG). Most current CH or REV.	Few marks in instructor guide, or not most recent CH or REV.	No notes/marks made in instructor guide. Instructor guide not current.
c. Classroom and materials ready for training.	Everything needed for lesson was ready and classroom was well setup, clean, and free of distractions.	Materials or setup was lacking in some way, minor problems with cleanliness, or classroom has minor distractions.	Materials not ready or classroom not setup, major cleanliness problems, or major distractions in classroom
d. Instructor ready for training.	Instructor uniform squared away, haircut, etc.	Minor flaws in uniform, haircut etc.	Major flaws with uniform, haircut etc.
2. INTRODUCTION	SAT	NI	UNSAT
a. Displayed course and topic title.	Course title and CIN displayed in room. Topic title displayed in front of room and stated.	Did not display course/CIN, did not display topic title or did not state topic.	Did not display course/CIN and topic not displayed and stated.
b. Introduced self.	Displayed and stated rank and name.	Did not display or did not state name and rank.	Did not display or state name/rank.
c. Explained how materials fit into course.	Effectively tied lesson to previous/future topics (as applicable).	Weak explanation (as applicable).	No explanation (as applicable).
d. Read and explained objectives to the students.	Stated and overviewed objectives, and introduced all training aids.	Did not state or overview objectives, or did not introduce training aids.	Did not state objectives, no overview of objectives, and did not introduce training aids.
e. Stressed the importance of safety. (TTO/DOR procedures)	Safety emphasized, TTO/DOR procedures covered in <u>depth</u> (as applicable to topic)		Safety not emphasized, TTO/DOR procedures not covered. (as applicable to topic)
f. Motivated students to do their best.	Instructor provided students with clear and attainable motivators.	Motivators were weak, unclear, unattainable, or not enough motivators.	No motivators provided.
g. Encouraged questions.	Instructor encouraged students to ask questions.	Encouraged questions only once or twice.	Did not encourage questions.
3. PRESENTATION	SAT	NI	UNSAT
a. Technical			
(1) Information accurate.	Taught accurate and complete information.	Minor inaccurate or deleted information.	Major problems with accuracy/completeness
(2) Instructor taught all discussion points.	Followed lesson outline.	Minor problems following outline.	Did not follow outline.
(3) Instructor explained material clearly.	Information taught plainly, and questions answered adequately.	Some information unclear.	Much information unclear.

FIGURE 2-4. INSTRUCTOR EVALUATION / PLATFORM

b. Technique	SAT	NI	UNSAT
(1) Transitioned throughout topic effectively.	Topic flowed well from DP to DP.	Minor choppieness/not-connecting DP smoothly.	Topic did not flow well from DP to DP.
(2) Chained material effectively.	Instructor tied topic into past or future topics.	Minor problems linking topic to past or future topics.	Did not link topic to past or future topics at all.
(3) Displayed enthusiasm.	Dynamic, exciting, energetic delivery.	Delivery a little flat at times.	Lifeless, not energetic in presentation.
(4) Maintained a positive, professional attitude.	Not negative toward service, command, or course.	Occasionally appeared to have negative attitude.	Negative towards service, command or course.
(5) Used examples/ analogies to stress material.	Explained material using common examples and analogies.	Examples/analogies unclear or hard to understand.	Did not use examples/analogies, or ones used took away from the lesson.
(6) Used questioning techniques effectively.	Used good oral questions and followed 5-step technique.	Minor problems with 5-steps (short pauses or scans no effect word variance, etc.) Repeatedly called on same students to answer questions.	Major flaws with 5-step. (no pauses or scans, no effect words, etc.)
(7) Used training aid effectively.	IMM (slides, whiteboard, PowerPoint) use was smooth and flowed well.	Minor problems with IMM used (weak transitions, mechanical use, and line of sight problems).	IMM use was very rough or distracting. View blocked by instructor. Read or had student read from presentation.
(8) Used communication skills effectively.	Good use of voice/verbal and non-verbal communication.	Minor slips in effectively conveying message.	Major problems with getting information across to students. (i.e. machine-gun delivery)
(9) Maintained proper eye contact.	When talking eyes were on students.	Minor instances of talking to floor, desks, overhead, IG, etc.	Major problems, loss of eye contact very frequent.
(10) Used gesture effectively.	Gestures were meaningful; all space available was utilized.	Some gestures stiff inappropriate or meaningless. Weak use of classroom space.	No gestures or were stiff, awkward, meaningless. Paced or stayed in one spot for the duration of lesson.
(11) Avoided distracting mannerisms.	Topic was free of distractions.	Occasional minor distracting actions. (ex. overuse of phrase, repetitive movements or actions)	Frequent use of actions that were very distracting.
4. INTERACTION	SAT	NI	UNSAT
a. Maintained proper instructor/student relationship.	Controlled class throughout.	Minor lapses in control of class.	Loss of class control.
b. Encouraged student participation.	Encouraged students to make comments, solicited input from class.	Response to students' input not clearly positive.	Discouraged students' input, or did not encourage.
c. Established and maintained student attention.	Students' attention held throughout duration of topic.	Minor lapses in students' attention.	Students clearly inattentive.
d. Checked student comprehension.	Monitored class for questions, ensured material understood.	Missed opportunities to check for class' questions and grasp of material.	Did not ensure class understood material.
5. REVIEW AND SUMMARY	SAT	NI	UNSAT
a. Summarized topic/objectives.	Briefly hit major points of lesson, recapped importance of lesson. (Re-motivation).	Weak recap of lesson material and its importance.	No recap or motivation given.
b. Re-emphasized the importance of safety.	Safety stressed again (as applicable to topic).	Weak emphasis on safety (as applicable to topic).	Did not stress safety (as applicable to topic).
c. Questions checked student understanding.	Oral questions adequate to ensure that class could recall material from lesson.	Questions too few or did not cover scope of lesson.	No review questions asked concerning lesson taught.
d. Assignment given if applicable.	Assignment was given and explained clearly to students (as applicable to topic)	Assignments just given, no explanation/guidance given to students	Failed to give assignment (as applicable to topic).

LABORATORY INSTRUCTOR EVALUATION GUIDE

The Laboratory Evaluation is not meant to ensure perfection. However, the instructor is expected to display confidence, enthusiasm, expertise, effective communications skills, and the ability to hold the attention of the class. Training shall cease and the evaluation will be automatically graded as UNSAT if any of the following events occur.

Safety is not thoroughly covered in any portion of the lesson; safety is not adhered to or is just ignored.

Information discussed by the instructor exceeds the classification of the course.

The instructor displays unprofessional traits, or displays a poor attitude.

Information accuracy and entry-level techniques are minimum criteria for SAT evaluations.

1. PRE-CHECKLIST	SAT	NI	UNSAT
a. Certification records/trainer operator qualifications current.	Instructor's evaluation and trainer operator history is complete and not lacking any necessary documents.		Instructor missing necessary documents. (ex. Quarterly trainer operator card)
b. Lesson plan/ECG has been personalized/current.	Notes/marks in lesson plan. Most current CH or REV. ECG's are current.	Few marks/notes in lesson plan. ECG's lacking data or safety	No notes/marks made in lesson plan. Lesson plan/ECG is not current.
c. Laboratory and materials ready for training.	Up-to date and safety is denoted clearly. Everything needed for lesson was ready and laboratory was well setup, clean, and free of distractions.	Not clearly denoted. Materials or setup was lacking in some way, Minor problems with cleanliness, or laboratory has minor distractions.	Not up-to date or lacking safety issues. Materials not ready or laboratory not setup, major cleanliness problems, or major distractions in laboratory.
d. Instructor ready for training.	Instructor uniform squared away, haircut, etc.	Minor flaws in uniform, haircut etc.	Major flaws with uniform, haircut etc.
2. INSTRUCTOR	SAT	NI	UNSAT
a. Explained the objectives at the beginning of session.	Objectives fully explained and students understand expectations.	Objectives not explained well, students had questions regarding expectations.	Objectives not explained and expectations not addressed.
b. Reviewed safety (TTO/DOR)/sanitation procedures at the beginning of session.	Safety (TTO/DOR)/sanitation procedures highly emphasized prior to lab commencement.	Safety (TTO/DOR)/sanitation procedures not fully emphasized prior to lab commencement.	No safety (TTO/DOR)/sanitation procedures were given prior to lab commencement.
c. Reviewed instructional material, including job sheets.	Explained the use of all materials and job sheets available.	Weak explanation of all materials and job sheets available.	No explanation of any material available.
d. Related classroom instruction to lab performance.	Helped students tie together classroom knowledge with hands on skills. Questions were asked to stimulate student thinking.	Many opportunities missed to relate classroom knowledge to laboratory.	Did not relate any classroom knowledge to laboratory.
e. Issued tools and materials expeditiously.	All tools and materials were issued as quickly as possible.	Tools and materials were slow to be issued or not at proper time.	Tools and materials were not issued at all.
f. Emphasized safety in lab instruction/demonstration.	Instructor emphasized safety at each key point during instruction/demonstration.	Weak emphasis was placed on safety during instruction/demonstration.	Safety was not emphasized at all during instruction/demonstration.
g. Monitored students for safety practices.	Monitored all students for proper safety precautions.	Monitoring of safety precautions was not sufficient or not all students were monitored.	Monitoring of safety precautions was completely ignored or insufficient.
h. Assisted students as necessary.	Proper level of assistance was given to students when necessary.	Assistance given was not at some points when needed.	Assistance to students was not given at any point when needed.
i. Recognized individual student differences.	Instructor gave out assistance IAW student background and proper level of experience.	Instructor did not give much thought to student's background or experience prior to offering assistance.	No thought was given to student background or experience when assistance was given.
j. Provided related instruction, when needed.	Instructor provided added instruction when needed.	Added instruction was weak when given.	No added instruction was given when needed.
k. Checked student progress and understanding.	Instructor checked student progression and understanding at appropriate intervals.	Student progression and understanding was not sufficiently checked.	Student progression and understanding was not checked at all.
l. Asked thought provoking questions.	Questions were asked to stimulate student thinking.	Questions were inadequate or not related to exercise.	No thought provoking questions were asked.

FIGURE 2-5. INSTRUCTOR EVALUATION / LABORATORY

3. STUDENTS	SAT	NI	UNSAT
a. Understood the assignment.	Assignment was easily understood by all students.	Some portions of assignment was unclear or hard to understand.	Much of assignment was difficult to understand.
b. Used instructional material provided, including job sheets.	Students properly utilized all materials and job sheets available.	Some students did not utilize all materials or job sheets available.	Students did not use materials or job sheets available.
c. Sought instructor assistance when needed.	Students were comfortable with seeking out instructor assistance when needed.	At times assistance was not sought out when obviously needed.	No students sought out instructor assistance at any time.
d. Observed all safety/sanitation precautions.	Students followed every safety/sanitation precaution applicable.	Some safety/sanitation precautions were not carefully followed.	Students disregarded all applicable safety/sanitation precautions.
e. Participated in exercise; asked questions.	All students were actively involved in exercise, and asked questions as necessary.	Some students did not actively participate in exercise, or did not ask questions as necessary.	Students did not participate in exercise, nor did they ask questions.
4. FACILITIES	SAT	NI	UNSAT
a. Lighting and ventilation were well controlled.	Sufficient lightning and ventilation were maintained	Lighting or ventilation at times were not well controlled during labs.	Lighting or ventilation was not sufficient for the environment.
b. Equipment and tools were properly maintain ed.	All equipment and tools were in good working condition and easy to use.	Some equipment or tools were hard to operate or not in best working condition.	Equipment and tools were in poor condition and extremely hard to operate.
c. Necessary safety precautions were posted.	All safety precautions applicable were posted around lab and easily visible.	Some applicable safety precautions were not posted are not very visible.	No safety precautions were posted in lab anywhere.
d. Safety devices on equipment were in good condition.	All safety devices on equipment are in good working order.		Safety devices on equipment were in poor condition or did not work.

INSTRUCTOR TRAINING RECORD FORMAT

SIDE ONE

- Instructor Data Record (NO PII)
- Commanding Officer/Medical/ Psychological Screening for Military (High-Risk) via NAVPERS 1070/613 (Page 13)
- Vendor evaluation letter(s) for medical suitability screening, NCIC background, drug, urinalysis screening and psychological evaluation
- Statement of Understanding (Physical Fitness)
- Navy Instructor Training Course (NEC 805A), or equivalent (per contractor PWS)
- Small Arms Marksmanship Instructor Course (NEC 717B), or equivalent (per contractor PWS) if required
- Crew Served Weapons Instructor Course (NEC 718B), or equivalent (per contractor PWS) if required
- Qualification to Possess Firearms or Ammunition (DD 2760) (signed annually for firearms courses) if required
- Copy of licenses or certifications (i.e., Explosive Driver's License, Cardiopulmonary Resuscitation (CPR), First Aid, Emergency Medical Technician (EMT)) as applicable
- 2nd Class Swim, Lifeguard as applicable
- Instructor Indoctrination checklist (NETC 1500/3)

SIDE TWO

- Instructor Evaluation Record (Course Supervisor Review)
- Instructor Evaluations
- Initial practice and certification evaluations

SIDE THREE

Core Unique Instructor Training (CUIT) for each course the instructor is assigned.

SIDE FOUR

In-Service Training

Safety Training (Enterprise Safety Application Management System (ESAMS) roster printouts may be used)

SIDE FIVE

Weapons Qualifications (i.e. Small Arms/Crew Served Weapons and PQS for firearms courses (keep only the most recent 3591 form for the weapon qualified to instruct and purge the outdated forms)

SIDE SIX

Letters of Designation (e.g., Course Supervisor, Range Safety Officer, Line Coach)

Completed Schools (certifications/qualifications)

JQRs if applicable (Lifeguard, Training Safety Officer)

INSTRUCTOR IMPROVEMENT PLAN

Instructor:	
Course Supervisor:	Date:
Course / CIN:	
<u>Purpose of the Plan:</u> The purpose of this plan is to provide goals and suggestions to help improve in areas of deficiencies. This is a plan of improvement that highlights your deficiencies as an instructor. These are serious enough to admonish you and give notice of deficiencies in the areas listed below. Failure to correct these deficiencies will result in a recommendation for your instructor de-certification.	
<u>Area of Deficiency:</u> ☐ Instructional ineffectiveness ☐ Unsatisfactory teaching performance ☐ Unsatisfactory subject knowledge of curriculum ☐ Failure to CUIT certify ☐ Failure to maintain physical fitness standards / appearance ☐ Failure to maintain weapons qualification ☐ Other:	
<u>Specific details of conduct or performance:</u>	
<u>Specific corrective action for resolution:</u>	

FIGURE 2-9. INSTRUCTOR IMPROVEMENT PLAN

<u>Assistance required for resolution:</u>
<u>Timeline of improvement plan:</u>
<u>Delivery & Time to Respond:</u> This plan of improvement was delivered in a meeting with Instructor on The instructor shall sign and return a copy of this improvement plan NLT The copy will be placed in the instructor's ITJ until the instructor transfers or resigns.
<u>Signatures:</u> Course Supervisor: _____ I have read the information outlined in this plan of improvement. Though I may or may not agree with some or all of the assessment of my supervisor, I understand that if I do not make improvements in the areas of deficiency and follow the suggestions listed within this plan that I may be recommended for instructor decertification. Instructor: _____

FIGURE 2-9. INSTRUCTOR IMPROVEMENT PLAN

IN-SERVICE TRAINING PROGRAM

1. Purpose. To provide policy and identify responsibilities for CENSECFOR In-Service Training (IST) Program. The design of the IST program is to supplement the formal certification program by providing follow-on sustainment training for instructors and staff personnel responsible for the development, delivery, and management of formal curriculum.

2. Applicability. All CENSECFOR learning activities shall maintain an IST program. IST shall be conducted by Center for Security Forces (CENSECFOR) learning activity personnel to provide individual and group development designed to enhance instructional skills and technical competence. The goal of IST is to grow the technical professional consistency of the instructors and staff. The IST program will consist of seminars, guided discussions, computer-based training and e-learning with training packages provided to students as required. A matrix showing required training topics, sustainment requirements, and periodicities for designated positions at CENSECFOR learning activities are listed in figure 3-1.

3. Responsibilities. The administration of an IST program relies on continuous cooperation between IST program managers (PMs) and the learning activity IST Coordinator. The IST Coordinator is responsible for the application of the IST program at the learning activity.

a. The application of the IST program will include:

(1) Instructor Duties. IST that prepares an individual for the designation of Master Training Specialist (MTS). This training is conducted in a one-on-one or group environment as needed.

(2) Follow-on Instruction. This includes remediation of noted deficiencies in instructional technique that as outlined in enclosure (2) and should be conducted by MTS designated personnel.

(3) Continuing Education. Seek varied and dynamic opportunities for instructors to keep current in technical proficiency and personally improve as an instructional asset. Among the IST program factors for consideration for application are:

(a) Technical Currency Program. Use of temporary

additional duty funding for instructor visits of opportunity to the Fleet or other activities.

(b) Formal School. Instructor attendance of either in-house or formal civilian schooling, not limited to required schools.

(c) Workshop Attendance. Instructor attendance at workshops associated with their instructional area.

(d) Train-the-Trainer. Provide guest lecturers on an opportunistic basis to discuss new procedures or equipment capabilities.

b. The IST Coordinator will document IST completion on the IST record (figure 3-2).

c. The instructors assigned to deliver IST topics will be responsible for conducting the training on the assigned topic. Upon completion of training, the assigned instructor will provide a record of the training conducted to include the list of attendees, training topic and the instructor's name to the learning activity leadership within five (5) working days who will acknowledge the training was held by signing the muster. The training will then be transcribed into each of the attendee's ITJ.

d. CENSECFOR learning activities will provide quarterly IST reporting to the IST PM within the CENSECFOR Learning Standards Office. The TQI metric will be the vehicle to report training accomplishment.

e. IST Topics

(1) Mandatory IST lesson topics and their associated presentations are located on the CENSECFOR Learning Standards Office MS Teams Channel.

(2) Use of Force/Deadly Force Training. Training Use of Force/Deadly Force policies shall be given quarterly, acknowledged by signature, and entered in individual training records for all high-risk instructors.

(3) The IST coordinator shall ensure the following is incorporated into an annual safety stand down.

(a) Blood borne pathogens

- (b) EAP procedures
- (c) AED procedures
- (d) Mishap reporting
- (e) Universal training precautions
- (f) Weapons handling procedures
- (g) ITJ and CUIT reviews
- (h) Annual lessons learned

g. Instructors

(1) Personnel assigned to an instructor billet shall complete all required IST within one (1) year of report date.

(2) All other personnel must complete IST as per periodicity codes listed in figure .

FIGURE 3-2. IN-SERVICE TRAINING RECORD

CONTRACTOR INSTRUCTION

1. Purpose. To establish policy on management of contractor delivered instruction.
2. Guidelines for Contractor Services. The Federal Acquisition Regulations constitute the primary reference for procurement of contract labor. These regulations are augmented by specific directives issued by Department of Defense, and Navy Headquarters activities. The designated CENSECFOR Contracting Officer's Representative (COR) will monitor those instructor support contracts as assigned to ensure the scope and detailed specifications contained in the PWS are accomplished. The respective CS and training specialists (TS) will ensure training delivery is in accordance with promulgated curriculum at turnkey training facilities.
3. Communication with the Contractor Site Lead. The COR communicates directly with the contracting office and the contractor on matters pertaining to the contract. On a daily basis, the TS interact with supervisory contractor personnel at the turnkey instructional site; however, the TS is prohibited from communicating with non-supervisory contractor partners on matters pertaining to contract performance. All official communications pertaining to the contract specifications or performance must be addressed to the COR. If necessary, the COR will coordinate appropriate responses with the CCMs.
4. Evaluations of Contractor's Performance
 - a. Turn-Key. COR and learning activity TA, as applicable, shall ensure all TSs are familiar with the provisions of the PWS concerning contractor requirements for delivery. TS evaluate the contractor's performance only in terms of the finished product (i.e., delivery of services outlined in the contract and student critiques). COR and TA should be notified if discrepancies have been identified. The PWS clearly defines the scope and details of the various tasks that the contractor is expected to perform. Solely based on satisfaction of those detailed specifications contained in the PWS, the Navy will accept the finished product or service. If the contractor fails to deliver a product or service by the specified time and/or date, or if the product or service does not comply with the PWS, the COR will coordinate action with the TA and contracting officer.
 - b. Contract Instructor. During indoctrination, contractors delivering services, as Instructor Support shall be briefed by

their assigned CSs on CENSECFOR's Instructor Certification Program (see enclosure 3). It is the responsibility of the CS and contracted instructor to comply with the provisions of attaining and maintaining their instructor certifications as stipulated in the respective PWS. Instructor evaluations will be performed on all contracted instructors and formally documented in the ITJ.

c. Performance Evaluations

(1) Turn-Key. COR provides input as requested in the Contractor Performance Assessment Reporting System.

(2) Contract Instructors. Contract partners delivering Instructor Support services shall comply with instructor evaluation requirements. These requirements will be briefed by their assigned CSs during their indoctrination.

d. Administrative Documentation

(1) Turn-Key. The vendor (delivery sites) will be responsible for managing its employee's personal data/records and all official correspondence related to training, medical screenings, background investigations, drug testing, etc. The COR is authorized to request, review, and accept copies (as needed) for inspection and compliance, as stipulated in the PWS.

(2) Contract Instructors. The Vendor will maintain personal data/records with their workforce. All contracted instructors, will be required to provide personal data associated with learning activity staff management. The CS will work with the CENSECFOR N1 to obtain data required for managing staff databases, security clearance, recalls, etc.

e. Instructor Screening

(1) Ensure every instructor is properly screened prior to teaching students. For courses that have both high-risk and non-high-risk training segments, an instructor does not need to be screened to teach a high-risk course if they will only be teaching non-high-risk segments of the course.

(2) The screening process for contractors serving as high-risk instructors must be renewed every three (3) years and during contract re-compete or renewal, to include updated medical evaluation, psychological screening, and drug testing by the appropriate licensed health care provider.

STUDENT RECORDS MANAGEMENT

1. Purpose. To establish standard procedures relevant to the management of students' records within CENSECFOR learning activities.

2. Procedures

a. CeTARS serves as the Navy's official source of training course description and statistical information and provides student and training information required by various echelons of the Navy. All commands conducting formal Navy training courses are responsible for ensuring accurate and timely reporting of course and student data. CeTARS provides for the exchange of information with Sailor's Electronic Training Jacket, the Fleet Training Management and Planning System, the Sailor/Marine American Council on Education Registry Transcript, and the Catalog of Navy Training.

b. Class/Student Folders. These folders will be maintained for two years and at a minimum shall include the following:

(1) CeTARS Enrollment Roster - CeTARS or eNTRS reservation and enrollment roster.

(2) Graduation Roster. A CeTARS graduation roster.

(3) Student performance spreadsheet

(4) Any counseling sheets especially from ARBs (if applicable)

(5) Student action reports (if applicable)

(6) Oleoresin Capsicum screening form

(7) Qualification to Possess Firearms or Ammunition DD Form 2760 (MAR 2023).

c. Participation in High-Risk Courses

(1) Students reporting to any CENSECFOR high-risk COI will upon arrival, submit a completed High-Risk Student Medical Screening Form, NETC 1500/5. The completed form shall be signed by competent medical authority and must be completed within 45 days of starting CENSECFOR high-risk training.

(2) If a student has answered YES to any question 1-17, a qualifying official (MD, PA, NP, or IDC) must sign. If all questions are answered NO, a Hospital Corpsman may sign.

(3) ALL students reporting to CENSECFOR high-risk courses shall present the above documentation that clearly shows that they have been medically cleared to attend.

(4) Students arriving to a CENSECFOR Learning Activity and attending a high-risk COI without a high-risk screening shall be permitted to contact their parent command or local medical treatment facility and request a faxed copy of their high-risk screening submitted in kind.

STUDENT FEEDBACK PROGRAM

1. Purpose. To establish procedures for collecting student feedback. Further, this enclosure outlines the guidance for submission of the local high-risk training surveys and End of Course Critique (EOCC) feedback package.

2. Applicability. All learning activities within the CENSECFOR domain shall participate in the student feedback program. The student feedback program includes:

a. Upon completion of each high-risk training event, offer every student a high-risk training survey. This survey is voluntary and will be used to collect data on the training event, instructor quality, and overall event execution.

b. Submit EOCC packages within 10 days of the class graduation date.

NOTE: In the case of a safety violation, learning activity leadership shall immediately notify the CENSECFOR CO.

3. Responsibility

a. The student feedback program shall be explained to students during the indoctrination period and again prior to completing each student feedback survey. Student feedback surveys provide valuable data regarding the quality and safety of training, administration of courses, and adequacy of training facilities.

b. EOCCs can be administered to students anonymously with or without a common access card.

(1) To access the survey, provide the students the following URL:

<https://lasprod.ncdc.navy.mil/delivery/open.php?session=5585808727060773&lang=&customerid=reportingrepository&name=student&group=CENSECFOR>

(2) Or students may use the QR code:

c. Staff should encourage all students to submit constructive comments using NETC learning assessment system, or CENSECFOR's student feedback of training as appropriate. Comments are optional and the student feedback survey is anonymous. If paper surveys are used, in cases of web site outages, internet periods of unavailability, etc., students are encouraged, but not required, to place their name on completed feedback forms. Students must feel they can provide feedback openly and honestly without fear of reprisal. Ideally, all students should complete their feedback survey online, but in the event of access unavailability, a paper copy of the student feedback survey (figure 6-1) shall be provided to students for completion.

d. Feedback surveys shall be completed at the end of the course. The package shall be emailed to CENSECFOR N7 training operations via command senior leadership within five (5) working days of class graduation. For courses scheduled seven (7) weeks or longer, student feedback shall be completed every four (4) weeks at a minimum. CENSECFOR DOT may determine the need for more frequent feedback.

e. Students dropped from training shall be given the opportunity to complete a student feedback survey.

f. Each EOCC feedback package shall contain a critique summary sheet (figure 6-2), a copy of the students' surveys completed online and the student performance spreadsheet (example: enclosure (7), figure 7-2). Instructions detailing

how to submit an EOCC package, to include naming convention, routing procedures, and submission location, are located at:
\\naeanrfkfs101v\NETC02\$\LTLC_CSF\HQ\DOMAIN_SHARE\COURSE_EOC_PACKAGES\ZZ-TRAINING & REFERENCES\

(1) Once submission is completed, send an email to CENSECFOR_HQ_N76@us.navy.mil stating which EOCC feedback package has been submitted to:
\\naeanrfkfs101v\NETC02\$\LTLC_CSF\HQ\DOMAIN_SHARE\COURSE_EOC_PACKAGES\ (insert appropriate learning activity name).

(2) CENSECFOR N76 will notify the appropriate CCMM they have an EOCC for review.

(3) The CCMM will review the EOCCs for issues or possible CAL entries. If there were issues beyond the manageability of the CCMM, the EOCC will be forwarded to the PMs for further review. The EOCC will continue to be forwarded up the chain of command until all issues are corrected. If the CCMM found no issues, the CCMM will check "NO" in the "Follow Up Action" block and return the EOCC to CENSECFOR N76.

g. Upon completion of routing, EOCC feedback packages shall be returned to the learning activity. If/when all action items have been cleared, the feedback summary shall be filed and maintained by the CS in the class folder for two (2) years.

h. The CS will ensure course related problems that require tracking are entered into the CAL for action. The CS will ensure all building related problems requiring tracking are provided to the respective facility manager. The CS will notify the CCMM and CENSECFOR N4 via email.

i. If it is determined by the CENSECFOR CO that action is required, the check box for "YES" will be selected as follow-up action, and list the actions required. If no action is required, the check box for "NO" will be selected. The CENSECFOR N7 will work with the respective learning activity to address the concerns.

j. Immediately following the completion of the high-risk training event in a course, present the student a high-risk training safety (HRTS) critique (figure 6-3) for student-identified safety issues and to assist the learning activity in developing a means for correction. The purpose of this survey is to collect data from the student on the training event, instructor quality, and overall event execution.

(1) Results of these surveys should be:

(a) Used by learning activity to enhance their delivery and execution of high-risk training.

(b) Shared with the CCMM for possible enhancement of curriculum.

(c) Shared with CENSECFOR Safety to be incorporated in lessons learned.

(2) Upon completion of the high-risk training, collect completed surveys and route to learning activity leadership for review and acknowledgement.

(3) Copies of the student HRTS critiques pertaining to the course shall be made available upon visitation of a CENSECFOR Site Visit team.

(4) Surveys will be filed with class folders. Disposal will be in accordance with class folder procedures.

(5) Any pertinent highlights deemed by the learning activity should be included in the EOCC summary.

A. You will be given the opportunity to answer the following questions at the conclusion of the training session. B. Please provide an explanation for each item marked 1, 2, or NO on the back of this form. Be as specific as possible.		
Course:	CIN	Date
Instructor:	Student/Contact	
You are <u>not required</u> to sign this form, however if you desire feedback, a name/contact number is necessary. Write N/A if the item does not apply. Use the following scale where indicated: (1- Strongly Disagree, 2- Disagree, 3- Neither Agree nor Disagree, 4- Agree, 5- Strongly Agree)		
Using the 1 to 5 rating scale, evaluate the effectiveness of the following course materials: _____ A Student Guides. _____ B Technical Manuals. _____ C Training Aids (videos, PowerPoints, etc.). _____ D Student equipment.		
Using a YES/NO rating, answer the following questions concerning the lesson topics in the course. _____ A Provided me with the knowledge needed to perform in the labs. _____ B Were organized in a clear and logical manner. _____ C Were presented in a manner that was easy to understand. List area(s) which were unclear.		
Using a 1 to 5 rating scale, answer the following questions about how the objectives were measured. _____ A There was enough time for me to practice the skills before taking the performance test(s). _____ B The grading criteria were explained to me before I was administered the test. _____ C Test(s) represented the material covered. _____ D There was enough time for me to complete the test(s).		
Using a YES/NO rating, answer the following questions as they relate to safety and the training facilities. _____ A Lessons on safety were included, as applicable. _____ B Lessons related safety to job performance. _____ C Safety was emphasized prior to conducting performance labs. _____ D Physical condition of facilities was adequate. _____ E Classroom equipment was safe for use. _____ F Laboratory/equipment was safe for use. _____ G The instructor made me feel my safety was a primary consideration during performance laboratories.		
Using the 1 to 5 rating scale, evaluate the effectiveness of the instructors on the following items. _____ A Was prepared to teach the lesson(s). _____ B Taught at a level I could understand. _____ C Encouraged me to ask questions. _____ D Answered my questions adequately. _____ E Motivated me to learn the material. _____ F Was enthusiastic about the subject. _____ G Exhibited professionalism at all times. _____ H Was willing and available to assist me with my problems.

STUDENT CRITIQUE OF HIGH-RISK TRAINING

You will be given the opportunity to answer the following questions at the conclusion of each high-risk training session. Please provide an explanation for each item marked 1, 2, or NO on the back of this form. Be as specific as possible.	
Course:	Date: CIN:
Unit/Module: _____ Topic: _____ Name: _____ Instructor (s): _____ Class: _____	
Use the following scale where indicated: 1 - Strongly Disagree 4 - Agree 2 - Disagree 5 - Strongly Agree 3 - Neither Agree nor Disagree N/A if item does not apply.	
Q1. Using a 1 to 5 rating scale, with 5 being the safest, answer the following. ___ A. I felt my safety was always a primary concern of the instructor. ___ B. I felt that the training environment was both safe and non-hazardous.	
Q2. Using a 1 to 5 rating scale, evaluate the effectiveness of the training team. ___ A. Was prepared to conduct the training session. ___ B. Provided me with the necessary guidance during the training. ___ C. Exhibited professionalism at all times. ___ D. Instructor critique was adequate in identifying and correcting my individual issues. ___ E. The training gave me confidence to complete this skill successfully.	
Q3. Using a YES/NO rating, evaluate whether the items listed were adequately explained to you prior to the beginning of each high-risk training situation. ___ A. Training Time Out procedures. ___ B. Emergency Action Plan. ___ C. Tasks to be performed. ___ D. Method used to determine successful performance.	
Q4. Using a YES/NO rating, answer the following questions as they relate to safety during the high-risk training situation. ___ A. Safety precautions were reemphasized immediately prior to job performance. ___ B. The instructor evaluated my knowledge of safety precautions prior to job performance. ___ C. Laboratory/equipment was safe for use.	
Q5. Using a YES/NO rating, answer the following questions concerning the instructor. ___ A. Encouraged me to report unsafe or unhealthy conditions. ___ B. Encouraged me to do my best. ___ C. Provided a learning environment that was not threatening to me.	

NOTE: For high-risk training situations, no one will place pressure on you to put your name on this form. If you wish not to put your name on this form you have the right to remain anonymous.

FIGURE 6-3. STUDENT CRITIQUE OF HIGH-RISK TRAINING

TESTING, GRADING, AND TEST EVALUATION PROCEDURES

1. Purpose. To establish guidelines, assign responsibilities, and prescribe procedures for testing programs designed to measure student achievement.

2. Discussion. An effective testing program is an essential element of training. Each respective CCMM must standardize and manage testing of their courses at all participating learning activities. Technical training requires the use of well-constructed, job-specific tests to measure student achievement accurately. The provisions of this instruction apply to all CENSECFOR courses and provide guidance for various aspects of the testing programs.

3. Procedures

a. A pre-test may be administered at the beginning of a course and prior to instruction. Dependent upon the requirements of the individual course, the pre-test is used for one of the following reasons:

(1) Validation of Material. When a test is administered at the beginning of a course and again at the end it is normally being used to validate a new course of instruction. A comparison of the results of the two tests helps determine the effectiveness of instruction. If the end of course testing indicates that students can now answer items they failed to answer correctly prior to the course, the assumption is that learning took place. This type of testing may also be used anytime new material is introduced into a course. When using a pre-test for post-test comparison, do not review the pre-test results with the students as this will compromise the ability to assess the improvement in skill or knowledge provided by training.

(2) Prerequisite. This type of pre-test assesses prerequisite skills and/or knowledge necessary to meet entry-level requirements. If the student does not demonstrate the required knowledge, instruction shall be provided to prevent difficulties in training. This type of pre-test shall not be used to "weed out" students prior to training. However, this type of pre-test may be used to establish the minimum level of knowledge required to safely enroll and attend the course.

(3) Advanced Organizer. This type of pre-test assists the students in gaining an understanding of material that they will be exposed to in subsequent lessons.

b. A progress test for knowledge or performance should not cover more than 40 hours of classroom instructional material.

c. Course instructors will administer either a final or within-course comprehensive test. If unable to comply with this requirement, the learning activity leadership, via the CS, shall be notified immediately.

d. The minimum passing score for all CENSECFOR courses, knowledge assessments, and performance tests is 80 percent. This establishes the academic rigor the ACE calls for when evaluating Navy courses. Consideration for a minimum passing test score below 80 percent must be routed via the CENSECFOR DOT and Learning Standards Office and approved by the CCA.

e. Test Security and Cheating

(1) Instructors will carefully monitor students while testing. Students discovered cheating will have all test materials confiscated and will receive a grade of "ZERO" on the test. Further disciplinary measures will be at the discretion of the parent command. Instructors shall inform students of the consequences of cheating prior to each test.

(2) Instructors will ensure all testing materials are properly secured by locking them in a container in an area accessible to testing personnel only. This includes test item banks, copies of tests, scoring keys, computers containing testing materials, diagrams, formula sheets, and other issued items used by the student when taking a test. Devices with photographic or recording capabilities (e.g. cellphones, camera, etc.) are not permitted in the same space as testing materials.

f. CENSECFOR instructors shall review all testing material received from the CCMM within 30-days. If a discrepancy is noted, it needs to be brought to the attention of the CS immediately. The CS will officially record these items and notify the CCMM. Examples of testing material discrepancies may include:

(1) Incomplete testing guidance or guidance that does cover every assessment in the course.

(2) Test question with incorrect grammar, punctuation, or answer.

(3) Performance tests that do not adhere to safety protocols.

g. Test Result Documentation. Data collection is accomplished by using templates. The process flow is detailed in figure 7-1. Document the test and trend analysis, for each test given, by using the following:

(1) Student performance spreadsheet to document student's progress at every testing milestone identified in the course's Knowledge Testing Administrator's Guide (KTAG) and Performance Test Administrator's Guide (PTAG). This form will slightly differ between courses of instruction due to the uniqueness of each curriculum. CS should ensure they have the proper version from their respective CCMM. See figure 7-2.

(2) Use the knowledge test data spreadsheet to document incorrect responses per each question by each student as identified in the course's KTAG and PTAG. This data will be utilized to analyze each test item. See figure 7-3.

(3) Use the test log record to document, by test version, average scores, student tested and student failures by each knowledge test administration date. This document supports the need for revisions based on a periodicity identified in the course's KTAG. See figure 7-4.

4. Test Item Analysis

a. Test analysis provides valuable information about the reliability of test items. Item analysis will be performed when the number of answer sheets collected for a given test reaches 100, or every quarter, whichever comes first.

b. If 100 answer sheets can be accumulated in a year's time, then a complete analysis, using all three indexes will be conducted.

(1) Difficulty Index. The difficulty index is a calculation of the difficulty of the test item. If the item does not have the correct degree of difficulty, then it will not effectively discriminate. This index compares the total number of responses to the number of correct responses. Good test items will have an index above 0.50. A difficulty index above 0.90 might indicate that the test item is too easy and needs to be reviewed. If an item is 0.50 or below, consideration should be given to the item and how well it is written, the curriculum and coverage of the item objective, the way in which the associated objective was delivered during instruction, and student prerequisite knowledge required for training. See

figure 7-5.

(2) Discrimination Index. This analysis of an item tells how well the item discriminates between high and low scorers. Discrimination index is excellent when value is higher than 0.40. It is considered good when it ranges from 0.20 to 0.40. An index below 0.20 is considered poor. This situation requires investigation. To use this formula, you will need the top 27% scored tests and the bottom 27% scored tests. See figure 7-6.

(3) Effectiveness of Alternatives. Effectiveness of alternatives is used for multiple-choice test items. The multiple-choice test item is only as good as its alternatives. If the incorrect alternatives are illogical, not plausible, or absurd, the student may be able to select the correct response without knowing the material. This index calculates the number of students selecting each alternative within the high and low groups. See figure 7-7.

c. It is recognized that test items analysis is also conducted by testing software programs. The use of these programs should be employed to calculate test item effectiveness.

FIGURE 7-7. EFFECTIVENESS OF ALTERNATIVES

ACADEMIC REVIEW BOARD

1. Purpose. The ARB process is a formal procedure to handle non-disciplinary problems related to a student's academic progress. The ARB is an integral part of the student-counseling program. It is based upon the philosophy that decisions concerning a student's disposition in training are better arrived at by a board rather than by an individual acting alone. All members of an ARB are required to be familiar with the guidance contained in this enclosure.

2. Discussion. ARBs are required for learning activities that conduct "A" and "C" school level training. At the discretion of the respective learning activity course supervisor, an ARB may be conducted to address student academic achievement for an "F" school. An ARB is for military personnel only. CIVPERS and contract personnel will follow the applicable course testing plan and if they continue to fail following remediation, they will be dropped from the course.

3. Procedures

a. An ARB will be held after other attempts of remediation addressing an initial academic issue have been attempted without success. Subsequent academic setback, or the decision to academically drop a student, must be recommended through an ARB. The course supervisor or lead instructor shall interview a student exhibiting difficulty with course material to determine if the cause of the problem could be an outside source. Preventive counseling questions concerning personal problems (e.g., financial, family, medical), lifestyle (e.g., second job, getting enough sleep), and the student's comfort participating in class should be asked to rule out problems which can be addressed prior to convening an ARB. Open-ended questions, rather than questions which may suggest their own answer, should be used. An ARB will be convened when:

(1) The student's course average falls below the minimum passing grade or performance is below expected academic progress.

(2) The student fails to achieve objectives after counseling, remediation, and remediating the test pertaining to the initial academic setback.

(3) Student fails to achieve the objectives after an academic setback on those same objectives.

b. The board will have a minimum of three members and will include at least one member who is a certified instructor in the area that the student is having difficulty, a staff member designated as chairman, and one other staff member. One member will be designated as the recorder. The CS is responsible for ensuring the student scheduled for ARB and the instructor of the topic in question complete the student and instructor ARB input sheet, figure 8-1, prior to commencement of the ARB. If more space for comments is needed, use the back of the form. The CS will ensure all pertinent information is available and the ARB package is prepared and completed prior to the commencement of the ARB.

c. The ARB shall review the member's history prior to commencement of the board. The ARB should ask prepared questions pertaining to course material to help determine a student's ability or inability to continue with training, as well as general questions about attitude and/or personal problems. The board should consider Armed Services Vocational Aptitude Battery (ASVAB) scores, test records for the course, counseling sheets, and previous training records.

d. The purpose of the ARB shall be discussed with the student at the beginning of the ARB. It should be stressed that the ARB is to determine where and why the student is having trouble with the course material and that it is not a disciplinary action. The student should be told that once the reason(s)/trouble area(s) are determined, the board will decide the best course of action for the student's continuation in the training program. The student should understand that the ARB only recommends actions. The CENSECFOR CO will make the final decision based upon the record and member's responses during the board. The CENSECFOR CO may delegate to Naval Technical Training Center (NTTC) Lackland CO the authority to make final decision for NTTC Lackland courses of instruction. The board's recommendation will be documented on the ARB recommendation sheet, figure 8-2, and will include one of the following:

- (1) The student may continue with class.
- (2) The student will receive additional remediation in the area of the academic deficiency.
- (3) The student will be setback.
- (4) The student will be dropped.

e. The following guidance is provided concerning each type of board recommendation:

(1) If continuation of training is recommended, there must be clear evidence (from test records and interviews) that the student can pass the course if allowed to continue. The ARB should decide if additional remediation is necessary for the student to continue and set the remediation requirement.

(2) The ARB has the authority to verbally remediate and retest the student on failed learning objectives (LOs) and assign a minimum passing grade for the failed test. This can be done only after careful analysis of deficient LOs. Oral questions shall be prepared by the CS and a certified instructor in the topic of the academic deficiency prior to the ARB to effectively measure the student's understanding of the deficient subject matter and support assignment of a minimum passing grade. If the student passes this verbal exam, the ARB may decide to recommend the student continue with training.

(3) A setback requires test scores and interviews to indicate the ability to master learning objectives after a repeat of some portion of training. Achievement of remediation in any way other than setback should be considered first. The highest attainable grade on the portion of the course not previously passed will be the minimum passing grade.

(4) A drop must be supported by a demonstrated unwillingness or inability to continue current training. When a decision to recommend elimination from training has been made, consideration should be given to the student's desire and eligibility for reclassification.

f. ARB results will be approved by CENSECFOR CO. Approval is delegated to the NTTC Lackland CO for MA "A" school and "C" school students.

g. The completed ARB package will consist of the student and instructor ARB input sheet, ARB record of action sheet, and the recorder's minutes. The complete package will be forwarded through the chain of command for approval. Upon approval, actions concerning a setback or drop from training should be coordinated as needed with the appropriate student management authority.

i. The original ARB package will be included with the student record and maintained by the CS. When the student

record/class folder is disposed, the ARB package will be disposed appropriately.

j. Upon determination that a student will not successfully complete a CENSECFOR formal course of instruction, the CS or lead instructor shall complete a student action report and route to their respective learning activity leadership. This sheet shall be completed immediately upon the determination of student non-graduation status. Once signed, this sheet will be sent immediately to the appropriate student management authority for processing.

TRAINING MATERIALS MANAGEMENT

1. Purpose. To establish a standardized system for maintaining the training materials.

2. Applicability. Training materials require continued evaluation, surveillance, revision, and change to remain current, accurate, and relevant. They consist of management, curriculum, and support materials dealing with technical subjects requiring frequent development and modification. Course modifications and new development of domain curricula materials must be reviewed and approved by the CENSECFOR Learning Standards Office for instructor-led training, integrated learning environment to include formal courses, computer-based training, web-based training, instructional media materials, simulations, and specialized briefs. The modification process must be efficient, well ordered, reviewed, and approved, and properly documented to ensure a complete audit trail is maintained.

3. Responsibility

a. All new content shall be developed according to NAVEDTRA 130 through NAVEDTRA 140 Development Series.

b. There are four categories of training materials modifications: change, interim change, technical change, and revision.

c. The CCMM will evaluate the scope of the course modification based upon the following:

(1) Are safety issues involved?

(2) Number of modifications needed.

(3) The depth of work the modifications may require (e.g. simple grammar corrections vice a requirements issue).

After briefing the respective PMs, the CCMM will determine whether to submit a pen and ink change via the course activity log or to proceed with the formal course change/revision process. Learning activities shall not modify, change, or revise curriculum without CCMM approval.

d. New task-based instruction shall be developed and maintained in the content planning module. An interim change or technical change DOES NOT require the CCMM to submit a TPP. A revision ALWAYS requires a TPP submission.

e. If a course is multi-sited, the CCMM will solicit input from all course supervisors with the intent to keep everyone apprised of the changes being implemented.

f. Training Materials

(1) Curriculum content (syllabus, lesson plans, PowerPoints, and other training materials).

(2) A course master schedule to include a schedule of instructors indicating the block of instruction in which each presented to include the date, time, topic name, and topic number, of when each segment of training occurred.

(3) Enrollment roster

(4) Written tests, keys, practical evaluation guides, performance checklists, and evaluation forms.

g. Training Materials Records Management

(1) Security

(a) An electronic copy of curriculum materials, including media materials, shall be maintained on CENSECFOR Learning Standards Office MS SharePoint site and disk stored within CENSECFOR's Learning Standards Office.

(b) Each learning activity shall keep a hardcopy of these course materials. These copies are used for reproducing material for instructors and documenting pen/ink changes from CCMMs. A master course hard copy shall be maintained in CENSECFOR's Learning Standards Office. This file will constitute the audit trail for the course and will include pertinent correspondence for the course life.

(c) Release requests for training related records must be completed through Freedom of Information Act online.

(2) Retention and Destruction. Training materials will be retained and destroyed in accordance with SECNAVINST M-5210.1 Records Management.

COURSE AUDIT TRAIL

1. Purpose. Curriculum management is a continuous process to ensure the curriculum is current, technically accurate, developed per established standards, delivered in a timely manner, and available in quantities to support fleet requirements. A segment of the curriculum management process is the Course Audit Trail (CAT).

2. Applicability. Items such as publication changes, correspondence, student critiques, course and instructor evaluations, and Formal Course Reviews (FCR) may contain information that affects curricula and the quality of instruction. An internal management system is required to identify and track these items to ensure necessary action is taken. The CAT is designed to track and record these actions to completion for the life of the course.

3. Responsibilities

a. Maintaining the CAT is the responsibility of the CCMM. However, at CENSECFOR, all CATs will be centralized and maintained in the CENSECFOR Learning Standards Office. The contents of a CAT will be maintained for the life of the course. CATs are used to track the status of curriculum for all courses. CATs contain the following information:

(1) A summary of major events impacting the course. This may be official correspondence or a memorandum to file.

(2) All pertinent correspondence leading to course development or revision.

(3) Reports of trips, conferences, and/or meetings that are necessary for course development, maintenance, or revision.

(4) Memoranda of conversations impacting the course development, maintenance, or revision.

(5) The rationale that influenced curriculum decisions.

(6) Copies of all supporting documents, including appropriate approval letters. Types of supporting documents will vary based on the standard used for development.

(7) Copies of pilot course monitoring reports.

(8) A chronological listing of all lifecycle maintenance.

(9) Date and authority/reason for the most recent course lifecycle maintenance and the curriculum standard or procedural document used.

(10) The status of the last learning activity course review (i.e., approved, under lifecycle maintenance, stage of development, specified action pending).

(11) Pertinent data from feedback systems or other evaluation and feedback systems/sources.

(12) Copies of the curriculum maintenance requests that were forwarded to the CCMM.

(13) Requests for evaluation or re-evaluation of courses submitted.

b. Every course delivered by CENSECFOR will have an electronic version of the CAL posted on MS Teams using figure 9-1. The CAL will be under the respective the CCMM program area. In this manner the CS, CCMM, and leadership will be able to view a specific CAL as needed.

(1) CS will continually review and update their respective CAL. For activities without MS Teams access, the OIC/SD will initial all new entries on the CAL. It is the CS's responsibility to ensure the activity leadership is updated on all new entries. Additionally, the CS will ensure the activity leadership reviews the CAL quarterly and documents their reviews by signing the CAL. For learning activities with MS Teams access, the requirement for activity leadership to review is still in effect. However, an initial/signature is not required.

(2) CS will review all reference publication changes, course and instructor evaluations, student critiques, and other incoming correspondence to assess impact on the course (including Lesson Plan personalization) and make CAL entries. All FCR discrepancies not immediately corrected during the FCR will be entered into the CAL. Check the "YES" block next to "Was hit generated by a FCR?" Once an entry for an FCR discrepancy has been cleared, the CS will notify the CCMM that the item has been completed.

(3) Consecutive action identification numbers will be assigned to items associated with an individual CIN using the

following numbering system: CA-XXX-YR (e.g., SRFB-001-24, SRFB-002-24, etc.), CA = Course Abbreviation and YR = calendar year.

(4) Any new development, change, or revision to curriculum requires an entry in the CAL.

(5) Learning activity CSs are responsible for submitting recommended changes to the CCMM so they can be added to the master CAL.

c. A CAL Quick Reference Sheet, figure 9-2, is to be maintained in conjunction with the CAL. This sheet will allow an expedient review to ensure duplicate entries are not recorded. The date and identification number will match the corresponding CAL entry. The remarks will be a synopsis of the issue recorded on the CAL.

COURSE REVIEWS

1. Purpose. To establish procedures, identify responsibilities and provide guidance for the periodic assessment of CENSECFOR courses, course delivery, and administration to meet course review requirements.

2. Discussion. Course reviews fall in two categories, FCR and ICR. Both types of reviews involve the periodic evaluation of technical accuracy, relevancy, and currency of course materials; systematic analysis of continually monitored quality indicators; examination of classroom and laboratory instruction, facilities, and resources; and surveillance of various other elements to ensure safe, effective, and efficient delivery of training.

a. FCR

(1) Shall be conducted for each COI on a cycle not to exceed three years or within six months before, and in preparation for, a TRR.

(2) Will be accomplished for each CENSECFOR COI through the completion of three types of periodic assessments:

(a) Curriculum reviews

(b) Learning activity self-assessments

(c) Course delivery activity assessments

Completion of these periodic assessment components exceeds the requirement for periodic FCR.

(3) Figure 11-1 will be completed and submitted to the DOT with the results of the FCR. Figure 11-2 will be used to record and document the detailed actions taken during the FCR process.

(4) For record-keeping purposes, the CENSECFOR Learning Standards Office will maintain copies of each FCR report completed throughout the assessment cycle until the next curriculum review is accomplished. Records will be maintained, preferably in digital storage, for a minimum of five years.

b. ICR

(1) Within the three-year FCR cycle, each course will be evaluated annually via ICR on the anniversary date of the FCR.

(2) Figure 11-3 will be completed and submitted to the CENSECFOR DOT with the results of the ICR.

(3) Figure 11-4 will be used to record and document the findings during the ICR process.

(4) For record-keeping purposes, the CENSECFOR Learning Standards Office will maintain copies of each ICR report completed throughout the assessment cycle until the next curriculum review is accomplished. Records will be maintained, preferably in digital storage, for a minimum of five years.

PART 4 – TESTING PROGRAM				
1. TESTING PLAN				
a. Date Testing Plan was approved.	Date:			
b. Testing Plan is on file and approved by the CCA.	Paper	Yes ☒	No ☐	N/A ☐
	Electronic	Yes ☒	No ☐	N/A ☐
c. Testing Plan lists test methods, constraints, minimum passing score, final grade, testing schedule, and retesting procedures.	Yes	☐	No ☐	N/A ☐
d. The objectives are tested as per the Testing Plan.	Yes	☐	No ☐	N/A ☐
e. Comprehensive testing is being conducted.	Yes	☐	No ☐	N/A ☐
f. Testing Plan specifies type of testing being conducted.	Yes	☐	No ☐	N/A ☐
(1) Knowledge.	Yes	☐	No ☐	N/A ☐
(2) Performance.	Yes	☐	No ☐	N/A ☐
g. There is a Knowledge Test Administrator's Guide.	Yes	☐	No ☐	N/A ☐
h. There is a Performance Test Administrator's Guide(s).	Yes	☐	No ☐	N/A ☐
(1) For practical tests – there are job sheets and/or checklists.	Yes	☐	No ☐	N/A ☐
i. Knowledge tests adequately measure TOs & EOs.	Yes	☐	No ☐	N/A ☐
j. Performance tests adequately measure TOs & EOs.	Yes	☐	No ☐	N/A ☐
k. Test review procedures are per the approved Testing Plan.	Yes	☐	No ☐	N/A ☐
2. TEST DESIGN AND DEVELOPMENT				
a. Test design has been approved by the CCMM. Date:	Yes	☒	No ☐	N/A ☐
b. Minimum passing score for each test is established.	Yes	☐	No ☐	N/A ☐
c. The number of different test versions (minimum of 2) is adequate to prevent compromise.	Yes	☐	No ☐	N/A ☐
d. There is an equal degree of difficulty between versions.	Yes	☐	No ☐	N/A ☐
e. There is an adequate number of items on the test to measure the objectives.	Yes	☐	No ☐	N/A ☐
f. Types of items and degree of difficulty are consistent with the objectives.	Yes	☐	No ☐	N/A ☐
g. Tests are developed as per the approved Testing Plan.	Yes	☐	No ☐	N/A ☐
h. Tests used for retest contain items that are different from the course tests.	Yes	☐	No ☐	N/A ☐
i. Test development form exists for each knowledge test.	Yes	☐	No ☐	N/A ☐
j. Criticality index was performed.	Yes	☐	No ☐	N/A ☐
3. KNOWLEDGE TEST ITEM BANKS				
a. Test item banks are maintained.	Yes	☐	No ☐	N/A ☐
b. Test items are constructed per NAVEDTRA 132.	Yes	☐	No ☐	N/A ☐
c. Test items are approved by the CCMM.	Yes	☐	No ☐	N/A ☐
d. Each test item is keyed to objective/PPP item it measures.	Yes	☐	No ☐	N/A ☐
e. Procedures for changes to the test bank are adequate.	Yes	☐	No ☐	N/A ☐
f. Test bank synchronization is maintained.	Yes	☐	No ☐	N/A ☐

FIGURE 11-2. FORMAL COURSE REVIEW RECORD

4. PERFORMANCE TESTING			
a. Performance testing is being conducted. If No, skip to 5.	Yes ☐	No ☐	
b. Rating scales and/or checklists are used appropriately to grade and score the performance tests.	Yes ☐	No ☐	
c. Weighing of performance tests for the overall grade is consistent with the course objectives.	Yes ☐	No ☐	
d. Performance test requires a Fault Insertion Guide.	Yes ☐	No ☐	N/A ☐
(1) There are multiple copies or versions.	Yes ☐	No ☐	
(2) It is controlled.	Yes ☐	No ☐	
5. TEST ADMINISTRATION AND SECURITY			
a. Test Administrator Guides are used.	Yes ☐	No ☐	N/A ☐
b. Test Administrator Guides are clear and exact.	Yes ☐	No ☐	N/A ☐
c. Test administration procedures are adequate to prevent test compromise.	Yes ☐	No ☐	N/A ☐
d. Proper safety protocols are identified and followed in Test Administrators Guide.	Yes ☐	No ☐	N/A ☐
6. TEST ANALYSIS			
a. Test item analysis is being performed.	Yes ☐	No ☐	N/A ☐
(1) If yes, explain method and how often.			
b. Test analysis results are being used to improve the training.	Yes ☐	No ☐	N/A ☐
c. Changes based on the analysis are adequately documented.	Yes ☐	No ☐	N/A ☐
d. Test item statistics relating to safety are being maintained.	Yes ☐	No ☐	N/A ☐
(1) Test logs reflect current changes.	Yes ☐	No ☐	N/A ☐

FIGURE 11-2. FORMAL COURSE REVIEW RECORD

PART 5 – INSTRUCTIONAL STAFF			
1. COURSE SUPERVISORS			
a. Course Supervisors have completed In-Service Training (IST) requirements. (NETCINST 1500.5D)	Yes ☐	No ☐	
b. Course Supervisors are tracking gains/losses to ensure manpower continuity and optimal utilization of personnel. (Activity Manning Document (AMD)/ICOMP/TPP)	Yes ☐	No ☐	N/A ☐
c. Adequate training records are kept for all personnel. (NETCINST 1500.5D)	Yes ☐	No ☐	
2. LEAD INSTRUCTORS AND INSTRUCTORS: (If ITRO, explain instructor breakdown in notes section)			
a. Number of instructor billets assigned:	Number of instructors on board:	Number of certified instructors:	Other:
b. Instructors are being trained per approved instructor training program.	Yes ☐	No ☐	
c. Instructor recognition program being utilized. (NETCINST 1500.5D)	Yes ☐	No ☐	
d. All instructor training and counseling is being recorded/documented.	Yes ☐	No ☐	
e. Instructors are being evaluated per approved evaluation program.	Yes ☐	No ☐	
f. This is a high-risk course. If No, skip to 3.	Yes ☐	No* ☐	
g. Instructors assigned to this course have completed additional training requirements.	Yes ☐	No ☐	
3. INSTRUCTOR EVALUATORS			
a. An IST program for instructor evaluators is established. (NETCINST 1500.5D)	Yes ☐	No ☐	
b. Personnel assigned as evaluators have completed IST requirements.	Yes ☐	No ☐	
c. Documentation is reviewed/maintained in order to verify completion of required training. (NETCINST 1500.5D)	Yes ☐	No ☐	
d. The IST that is provided is adequate to prepare instructor evaluators for their job. (NETCINST 1500.5D)	Yes ☐	No ☐	
e. The number of evaluators assigned to the course is adequate to ensure the quality of instruction.	Yes ☐	No ☐	

FIGURE 11-2. FORMAL COURSE REVIEW RECORD

PART 6 – INSTRUCTIONAL MATERIALS				
1. LESSON PLAN (LP)				
a. Approved Master LP is on file	Paper	Yes ☒	No ☐	
	Electronic			
b. Date LP was approved.	Date:			
c. LP TO/EO sequence mirrors the COI in the TCCD.	Yes ☐	No ☐		
d. All LP are developed as per applicable guidance.	Yes ☐	No ☐		
e. The LP is technically accurate.	Yes ☐	No ☐		
f. Interim changes and/or changes are correctly incorporated within the LP.	Yes ☐	No ☐		
g. Personalization of individual LP is approved and appropriate.	Yes ☐	No ☐		
h. Front Matter.				
(1) List of Effective Pages reflects the current change.	Yes ☐	No ☐		
(2) Letter of Promulgation is present.	Yes ☐	No ☐		
(3) Change Record reflects all changes and interim changes as appropriate.	Yes ☐	No ☐		
(4) Hazard Awareness Notice tailored to the course and lists training safety requirements. (NETCINST 5100.1B CH-3)	Yes ☐	No ☐		
(5) How to Use the Lesson Plan tailored to the course and lists training safety requirements. (NETCINST 5100.1B CH-3)	Yes ☐	No ☐		
(6) Allocation of class/lab periods accurately reflects Course Master Schedule (CMS).	Yes ☐	No ☐		
i. Terminal and Enabling Objective CTTL #s track to appropriate CTTL.	Yes ☐	No ☐		
j. Terminal Objectives support training requirements.	Yes ☐	No ☐		
k. Enabling Objectives support the Terminal Objectives.	Yes ☐	No ☐		
l. If the training objectives include any aspects of the following types (OPNAVINST 5090.1D), contact Training Safety Officer. (If no, continue to item m.)	Yes ☐	No ☐		
(1) Air quality	Yes ☐	No ☐		
(2) Water quality/water usage	Yes ☐	No ☐		
(3) Hazardous materials/hazardous waste	Yes ☐	No ☐		
(4) Storm water/surface water/groundwater	Yes ☐	No ☐		
(5) National Environmental Policy Act (NEPA)/endangered species/ marine mammal impacts	Yes ☐	No ☐		
(6) Range management/erosion & sediment control	Yes ☐	No ☐		
(7) Cultural Resources/Historic Preservation	Yes ☐	No ☐		
(8) Material procurement/contracting	Yes ☐	No ☐		
(9) Energy usage/sustainability	Yes ☐	No ☐		
(10) Any permitting activity for construction/maintenance projects	Yes ☐	No ☐		
m. Discussion points support the learning objectives.	Yes ☐	No ☐		
n. Lessons learned are used to support the discussion points.	Yes ☐	No ☐		

FIGURE 11-2. FORMAL COURSE REVIEW RECORD

o. Laboratory situations that require hazardous performance are essential to accomplish learning objectives.	Yes ☐	No ☐	N/A ☐
p. Related instructor activities/related student activities support discussion points.	Yes ☐	No ☐	
q. Safety is referenced wherever required by NETCINST 5100.1B CH-3.	Yes ☐	No ☐	
r. Other sources of training have been reviewed for use in this course.	Yes ☐	No ☐	
(1) Rating oriented lessons:	Yes ☐	No ☐	
(2) Other:	Yes ☐	No ☐	
s. Pre-faulted modules are available in sufficient number and provide intended indications.	Yes ☐	No ☐	N/A ☐
2. TRAINEE GUIDE (TG)			
a. Master Copy of TG is on file.	Paper	Yes ☒	No ☐
	Electronic		
b. Date TG was approved.	Date:		
c. TG mirrors the COI in the TCCD.	Yes ☐	No ☐	
d. Job Sheets for all Skill CTTL line items are included.	Yes ☐	No ☐	N/A ☐
e. TG is developed as per applicable guidance.	Yes ☐	No ☐	
f. The TG is technically accurate, clear, and complete.	Yes ☐	No ☐	
g. Changes to the TG are correctly incorporated.	Yes ☐	No ☐	
h. Front Matter.			
(1) List of Effective Pages reflects current change.	Yes ☐	No ☐	
(2) Letter of Promulgation is consistent with related LP.	Yes ☐	No ☐	
(3) Hazard Awareness Notice reflects the equipment for course.	Yes ☐	No ☐	
(4) Training Time Out (TTO) is properly identified.	Yes ☐	No ☐	
(5) Drop On Request procedures are present, if applicable. (NETCINST 5100.1B CH-3, Chapter 9)	Yes ☐	No ☐	
i. Information Sheets.			
(1) Information is confined to amplifying or consolidating available technical manuals/publications or background materials.	Yes ☐	No ☐	N/A ☐
(2) References provide accurate direction to supporting materials.	Yes ☐	No ☐	N/A ☐
j. Assignment Sheets.			
(1) Objectives are identical to those in the LP.	Yes ☐	No ☐	N/A ☐
(2) Assignment sheets provide specific and accurate instructions for directing study efforts.	Yes ☐	No ☐	N/A ☐
(3) Study questions promote decision-making similar to that required for ultimate job assignments.	Yes ☐	No ☐	N/A ☐

FIGURE 11-2. FORMAL COURSE REVIEW RECORD

k. Job Sheets.				
(1) Job sheets provide specific and accurate instructions for performing operational or maintenance routines.	Yes ☐	No ☐	N/A ☐	
(2) Instructions direct the student to complete the task performance in accordance with technical documentation.	Yes ☐	No ☐	N/A ☐	
(3) All instructions are directed solely to the student.	Yes ☐	No ☐	N/A ☐	
(4) Job sheet questions promote practical decision-making.	Yes ☐	No ☐	N/A ☐	
(5) Adequate safety notices are included and prominently displayed.	Yes ☐	No ☐	N/A ☐	
l. Diagram Sheets.				
(1) Diagram sheets improve instructional effectiveness.	Yes ☐	No ☐	N/A ☐	
(2) If diagram sheets provide information available in reference documentation, they are necessary for effective training.	Yes ☐	No ☐	N/A ☐	
m. Problem Sheets.				
(1) Problem sheets provide practical mental skill application of pertinent instructional requirements.	Yes ☐	No ☐	N/A ☐	
(2) The problem sheet is an effective method of engaging the student in logical thinking and problem solving relative to eventual job assignments.	Yes ☐	No ☐	N/A ☐	
n. Course should be presented using an automated electronic classroom (AEC).	Yes ☐	No ☐	N/A ☐	
o. All or part of the course should be converted for computer-based, or web-based delivery/ distance learning (DL), (SAKAI, DCO, etc.).	Yes ☐	No ☐	N/A ☐	
3. INSTRUCTIONAL MEDIA MATERIAL (IMM)				
a. IMM				
(1) IMM is in good condition.	Yes ☐	No ☐		
(2) IMM is applicable to learning objectives.	Yes ☐	No ☐		
(3) IMM is in the quantities needed.	Yes ☐	No ☐		
(4) Media is adequate.	Yes ☐	No ☐		
(5) CCMM has a copy (electronic) of each PPT, video, etc.	Yes ☐	No ☐		
(6) IMM is listed correctly in the topic pages, Discussion-Demonstration Activity (DDA), and RRL.	Yes ☐	No ☐		
(7) IMM for the course is the current version.	Videos	Yes ☐	No ☐	N/A ☐
	PowerPoint	Yes ☐	No ☐	N/A ☐
	Other	Yes ☐	No ☐	N/A ☐
(8) IMM is used as required/prescribed in the LP.	Yes ☐	No ☐		
b. All course materials listed in the RRL are:				
(1) Accurate/current (no additions/deletions/ modifications).	Yes ☐	No ☐		
(2) On board.	Yes ☐	No ☐		
(3) In satisfactory condition.	Yes ☐	No ☐		
c. Visual aids are being converted to electronic media.	Yes ☐	No ☐		

FIGURE 11-2. FORMAL COURSE REVIEW RECORD

d. Copyrighted Materials: If not applicable, continue to 4. (NETC Guide to Copyright Law)	Yes ☐	No ☐	N/A ☐
(1) Documents are on file for all copyrighted materials used.	Yes ☐	No ☐	
(2) There are funds associated with copyright permission.	Yes ☐	No ☐	
(3) Funding is programmed for copyright renewal, if applicable.	Yes ☐	No ☐	
(4) Termination/end date of copyright permission.	Date:		
4. REFERENCE MATERIALS, TECHNICAL MANUALS, AND PUBLICATIONS			
a. All are current and accurate.	Yes ☐	No ☐	
b. All are available in adequate numbers.	Yes ☐	No ☐	
c. All are in good condition.	Yes ☐	No ☐	
5. SECURITY (SECNAV M-5510.36) (DoD Instruction 5200.01, Vol 4)			
a. The training is classified. If No, skip to Part 7.	Yes ☐	No* ☐	
b. Classified curricula are properly marked.	Yes ☐	No ☐	
c. Classification level is appropriate.	Yes ☐	No ☐	
d. Material is afforded correct level of storage.	Yes ☐	No ☐	

FIGURE 11-2. FORMAL COURSE REVIEW RECORD

PART 7 – TRAINING RESOURCES			
1. FACILITIES			
a. Classroom facilities are adequate, comfortable, and conducive to learning.	Yes ☐	No ☐	
b. Lab facilities are adequate, comfortable, and conducive to learning.	Yes ☐	No ☐	
c. Field exercise facilities are adequate and tailored to learning.	Yes ☐	No ☐	N/A ☐
2. EQUIPMENT			
a. Equipment is used as intended/instructed and stowed properly.	Yes ☐	No ☐	
b. Equipment is safe for training use.	Yes ☐	No ☐	
c. Lab facilities are safe for required training.	Yes ☐	No ☐	
d. All objectives are being met with current equipment.	Yes ☐	No ☐	
e. An adequate number of training devices, technical training equipment, and/or training aids exist in order to provide timely training.	Yes ☐	No ☐	
f. Working condition of technical training equipment, training devices/lab equipment, and/or training aids is adequate.	Yes ☐	No ☐	
g. Equipment, tools, materials, and the quantities used match the Resource Requirements List.	Yes ☐	No ☐	
PART 8 – STUDENT PROGRAMS			
1. STUDENT RECORDS			
a. Records are maintained for two years.	Yes ☐	No ☐	
b. A student's academic progress is tracked.	Yes ☐	No ☐	
2. COUNSELING PROGRAM			
a. Preventive counseling is used to help students solve their academic problems.	Yes ☐	No ☐	N/A ☐
b. Student counseling sessions are properly documented.	Yes ☐	No ☐	N/A ☐
3. STUDENT RECOGNITION PROGRAM			
a. Student recognition program is being used to recognize outstanding students.	Yes ☐	No ☐	N/A ☐
4. REMEDIATION PROGRAMS			
a. Remediation program has been established for students requiring voluntary or mandatory extra training.	Yes ☐	No ☐	
b. Instructors are scheduled to assist in after-hours study.	Yes ☐	No ☐	
5. ACADEMIC REVIEW BOARDS			
a. Academic Review Boards are conducted in accordance with established guidelines.	Yes ☐	No ☐	N/A ☐
6. ACCELERATED TRAINING PROGRAM			
a. Course has Accelerated Training Program. If No, go to Part 9.	Yes ☐	No* ☐	
b. Enrollment records are maintained.	Yes ☐	No ☐	
c. A CeTARS Schoolhouse Person Event (PEVT) code has been assigned and provided to TSC/TSD for entering into CeTARS.	Yes ☐	No ☐	

FIGURE 11-2. FORMAL COURSE REVIEW RECORD

PART 9 – INTER-SERVICE TRAINING REVIEW ORGANIZATION (ITRO)			
1. ITRO DOCUMENTATION			
a. Course is part of ITRO/co-located. If No, skip to Part 10.	Yes ☐	No ☐	
b. Sponsor (host service) is: _____			
c. Date Memorandum of Understanding (MOU) was signed.	Date: _____		
d. The LS has a copy of the signed MOU on file.	Yes ☐	No ☐	
e. Date last Functional Review Board (FRB) was held.	Date: _____		
f. CeTARS reflects that the course is part of ITRO.	Yes ☐	No ☐	Not ITRO ☐
PART 10 – EVALUATION PROGRAMS			
1. INTERNAL EVALUATION			
a. FCRs are on file for the previous two cycles. (NAVEDTRA 135D, Chapter 5)	Yes ☐	No ☐	
b. Discrepancies from previous course reviews have been corrected. (NAVEDTRA 135D, Chapter 5)	Yes ☐	No ☐	
c. Student critique program is per established guidelines. (NAVEDTRA 134A Chapter 10 and NETCINST 1540.2A)	Yes ☐	No ☐	
d. Training quality indicators are being summarized as required.	Yes ☐	No ☐	
e. Trend analysis data are on file. (NAVEDTRA 135D Chapter 5 & Appendix C)	Yes ☐	No ☐	
2. SAFETY ASSESSMENT			
a. Course is considered high risk. (NETCINST 1500.13D/5100.1B CH-3)	Yes ☐	No ☐	
b. Date of last high risk assessment. (NETCINST 1500.13D)	Date: _____		
c. Date of last safety review. (NETCINST 1500.13D)	Date: _____		
3. AMERICAN COUNCIL ON EDUCATION (ACE) EVALUATION (NETCINST 1560.1A)			
a. This course is:			
(1) 45 academic hours or longer and listed in CeTARS. If No, go to 4.	Yes ☒	No* ☐	
(2) New or revised since its last ACE review. If Yes, notify ACE Program Manager.	Yes ☐	No ☒	
(3) Current but has never been evaluated for inclusion to the ACE Guide.	Yes ☐	No ☒	
(4) Listed in the ACE Guide. NV Number: _____			
b. ACE Program Manager has been notified if course is within one year of periodicity.	Yes ☒	No ☐	
c. ACE evaluations are current and accurate. (ACE Guide)	Yes ☒	No ☐	
(1) Last evaluation by ACE (Date in credit recommendation).	Date: _____

Training Directorate Structure, Roles, and Responsibilities for the Delivery of Instruction

1. Purpose. Define the roles and responsibilities of the CENSECFOR N7.

2. Roles and Responsibilities

a. CENSECFOR Commanding Officer (CO)

(1) Curriculum Control Authority (CCA) for all CENSECFOR curricula.

(2) Overall responsibility of the delivery of quality training.

b. CENSECFOR Director of Training (DOT) will:

(1) Report directly to CO, via Executive Director (ED) and is responsible for the overall function of the CENSECFOR N7. The organizational structure of the CENSECFOR N7 is displayed in figure 1-1.

(2) Ensure quality training delivered throughout the CENSECFOR domain utilizes the most effective delivery methods.

(3) Deliver required instructional materials and tools requested by the learning activities.

(4) Manage the determination of instructor requirements (e.g., development, qualifications, quality assurance (QA), and evolution) in accordance with applicable instructions and policies specific to the course of instruction.

(5) Oversee the establishment and maintenance course instructional materials repositories, associated tools, and curriculum dissemination (including reusable learning objects).

(6) Determine and provide opportunities for certifications as requested by the requirements sponsor or civilian institution.

(7) Collaborate with Fleet training organizations.

(8) Maintain liaison with other learning centers to preclude course duplication, provide standardization, and fully utilize feedback from all sources regarding training efficiencies and deficiencies.

(9) Determine number of instructors required across the Future Years' Defense Program using activity manning document.

(10) Ensure instructor performance monitoring and continuing qualifications programs are established and maintained in each schoolhouse.

(12) Approve the formulation of the master course and convening schedules from the program managers (PMs).

(13) Monitor student management issues via the End of Course Critique (EOCC) Program.

(14) Keep the CENSECFOR CO, Naval Education and Training Command (NETC), and learning activity informed regarding progress and general results of the training being conducted.

c. Deputy Director of Training (DDOT) will:

(1) Report to the DOT.

(2) Directly supervise Training Operations Officer.

(3) In the absence of the DOT, the DDOT will fulfill all duties and responsibilities as the DOT.

(4) Liaison with N5 to schedule CENSECFOR N7 site assessments.

(5) Prepare department monthly report input.

(6) Review NETC monthly submissions.

(7) Review annual training requirements reviews (TRR) schedule submission.

(8) Spearhead innovative training initiatives.

(9) Participate in weekly CENSECFOR CO/N7 sync meetings.

(10) Participate in monthly domain sync meetings with other CENSECFOR Directorates and learning activities.

(11) Coordinate with CENSECFOR Training Operations Department (N3) the establishment of the annual course master schedule development.

(12) Collate budgetary inputs for the annual spend plan from PMs.

(13) Monitor PM workflow and track performance to ensure annual goals are attained.

(14) Participate in contractual matters as required: statement of work/performance work statement (PWS), technical evaluation board, etc.

(15) Responsible for the CENSECFOR Impaired Training and Education Report (ITER) reporting process.

d. Training Operations Officer will:

(1) In the absence of the DDOT, the Training Operations Officer will act as the DDOT as required.

(2) Liaise with learning activities and headquarters (HQ) staff.

(3) Responsible for compiling the NETC monthly report.

(4) Responsible for the data input, managing, and monitoring the ITER reporting process.

(5) Responsible for the training waiver process.

(6) Responsible for the oversight of CENSECFOR N7 staff training.

(7) Maintain CENSECFOR N7 travel schedule and provide monthly inputs to CENSECFOR Resources Directorate (N8).

(8) Oversee and review learning activity EOCC review process and forward as necessary if adverse information requires attention of higher authority.

(9) Supervise assigned CENSECFOR N7 chief petty officers.

(10) Participate in monthly domain sync meetings with other CENSECFOR Directorates and learning activities. Record minutes and provide to the Council on Occupational Education (COE) Accreditation Manager.

(11) Participate in weekly CENSECFOR CO/N7 sync meetings.

(12) Document analysis of student feedback.

e. Learning Standards Officer (LSO) will:

(1) Report directly to DOT.

(2) Establish and manage the CENSECFOR Master Training Specialist (MTS) program.

(3) Provide curricula quality assurance oversight. Ensure curriculum accuracy is developed, maintained, and reviewed periodically, in accordance with NETC instructional development standards.

(4) Monitor and provide guidance on internal and external evaluation/assessment programs including:

(a) Formal Course Reviews (FCR)

(b) Training Requirements Review (TRR)

(c) Training Analysis Reviews

(d) Job Duty Task Analyses (JDTA)

(e) Coordinate course assessment scheduling to produce and distribute a master schedule of periodic assessments, reviews, and audits.

(f) Establish assessment cycle milestones for each assigned course.

(5) Ensure Core Unique Instructor Training (CUIT) and site augment plan align with NETC guidelines.

(6) Assist HQ and learning activity personnel with additional training in the areas of curriculum, evaluation, student management, and technology applications.

(7) Provide qualitative analysis on the testing program for all curricula testing programs to the DOT.

(8) Provide single point liaison with CENSECFOR and other training facilities on all testing matters for the command.

(9) Approve all testing plans, performance tests, test items, and test administrator guides.

(10) Monitor and assist training departments in their testing, grading, and test evaluation programs.

(11) Develop criteria and implement policy regarding instructor certification, evaluation, and sustainment.

(12) Provide oversight of the NETC End-2-End (E2E) process.

(13) Evaluate administrative policies and procedures, curricula, instructional methods and techniques, qualifications/certifications/licensing of staff and faculty, academic review boards (ARBs), adequacy and utilization of training aids, training devices/training unique equipment, testing, and student counseling.

(14) Be appointed the Contracting Officer's Representative (COR) and oversee the duties and functions of Instructional Systems Designers (ISDs) during curriculum development/maintenance efforts.

(15) Lead or participate in cross-functional teams/staff projects involving fleet training initiatives, changes in requirements, implementation of training command/NETC policies, and long-range planning/budgetary meetings.

(16) Provide recommendations in the area of plans, policies, methods, or innovations that will improve the efficiency and effectiveness of training.

(17) Seek NETC concurrence on training project plan (TPP) per NETC E2E requirements via the SERENA Business Manager.

(18) Ensure courses evaluated by American Council on Education (ACE) are reviewed for credit, subject to security requirements; refer to NETCINST 1560.1 (series).

(19) Manage, coordinate, and conduct the command's In-Service Training (IST) Program. Monitor and analyze effectiveness of the IST program on a continual basis as indicated by instructor evaluations and course critiques.

(20) Develop and promulgate additional topics (as necessary) for the IST program.

(21) Oversee command accreditation programs, such as the COE, Federal Law Enforcement Training Accreditation (FLETA), and additional programs' Type Commanders (TYCOMs) may require.

(22) Monitor and maintain the Learning Standards Office Microsoft (MS) SharePoint site for updated curriculum, forms, information, and figures for learning activity usage.

(23) Maintain curricula historical records.

f. PM will:

(1) Report directly to the DOT.

(2) Responsible for the overall development, innovation, continuity, and maintenance of assigned program areas.

(3) Communicate and coordinate with internal and external command stakeholders on the completion and maintenance for assigned programs.

(4) Directly supervise the functions and tasking of Course Curriculum Model Managers (CCMM) within assigned programs.

(5) Lead the development of projects for assigned programs:

(a) Plan of Action & Milestones (POA&M) project schedules

(b) TRR scheduling and working groups

(c) Front End Analysis development

(d) Business Case Analysis coordination and development

(e) JDTA scheduling, stakeholder participation, and reporting

(6) Lead conference calls for each program area under their cognizance on a quarterly basis. Membership should include respective learning activity leadership (learning activities that host the courses within that program area) and the CCMM. Utilize figure 12-4 to record and document any action items from this meeting.

g. CCMMs will:

(1) Report directly to their respective PM regarding their assigned courses.

(2) Lead the development of curricula projects for courses under their cognizance.

(3) Provide direction, supervision, guidance, and assistance to designated course supervisors and training specialists in the management of courses.

(4) Analyze curriculum for the most efficient and effective delivery method(s), utilizing training technology.

(5) Review and analyze course feedback from EOCC packages pertinent to their program area. Determine curriculum change/revision requirements. Provide recommendations to PM and/or take correction as necessary.

(6) Conduct FCR to maintain content currency and accuracy.

(7) Participate in scheduled site assessment visits.

(8) Participate in JDTA and reviews of Navy Mission Essential Task Lists.

(9) Lead a workshop meeting for each course curriculum area under their cognizance on a quarterly basis. Membership should include respective course supervisors from each learning activity for the course and the assigned instructional systems designer(s). Utilize figure 12-5 to record and document any action items from this meeting.

(10) Develop testing plan, performance test, written tests, master test item bank, and test administrator guide. Descriptions of these items are located in NAVEDTRA 130B, VOL I and NAVEDTRA 132.

(11) Provide each participating learning activity with a copy of all testing materials.

(12) Update the master test item bank with acceptable test items submitted by participating training activities. Return unacceptable test items, with an explanation, within 30 days.

(13) Ensure testing program materials remain current when changes are made to a course.

(14) Conduct the FCR program for all courses assigned in accordance with the master schedule of periodic assessments, reviews, and audits.

(a) Report official findings by utilizing figure 11-1.

(b) Document information relating to the FCR on figure 11-2.

(c) Take corrective action on discrepancies noted found during FCR.

(15) Create and maintain a Course Activity Log (CAL) for each assigned course. Establish communications with all course supervisors assigned to the course to ensure all updates and changes are shared. Post the CAL in a centralized location, preferably MS Teams channel, to maximize visibility.

h. ISD will:

(1) Report to CCMM as assigned by CENSECFOR LSO.

(2) Develop course curriculum. Route via CCMM.

(3) Perform duties as per the PWS.

i. Course supervisor (CS) is defined as the first-line manager for a given course of instruction at a specific learning activity. The CS shall oversee training, maintain the currency of the curriculum, and ensure each instructor's certification requirements are current. The CS is usually a military or Government civilian (CIVPERS) employee. A contract partner may be assigned these duties if they meet the criterion below and receive a waiver from the CENSECFOR DOT. Due to the criticality of the CS position, consideration must be given to the factors of longevity and consistency. The assignment as a CS to a specific course of instruction shall be at least one year in duration. The CS shall:

(1) Be responsible for all aspects of course delivery for a given course or specific area of training in several courses.

(2) May authorize same-day deviations to the Course Master Schedule (CMS) ONLY (not curriculum) to accommodate correct instruction to student ratios for one day of training. If this action is taken, a brief will be provided to the activity leadership and CCMM prior to implementation.

(3) Supervise and develop assigned instructors by creating tailored training programs.

(4) Coordinate the training program for all assigned instructors and maintain instructor training records.

(5) Conduct scheduled and unscheduled instructor reviews and evaluations.

(6) Collect feedback from student critiques of courses and instructors and provide feedback to the CCMM.

(7) Review instructor lesson plans to ensure personalization.

(8) Counsel students when issues cannot be resolved at an instructor level.

(9) Report administratively to the respective course CCMM relating to master training plan, curriculum issues, and CAL updates.

(10) In the event there is no formal testing officer assigned to the learning activity, shall act as testing officer for their assigned courses. This designation shall be included in CS appointment letter. The testing officer's list of responsibilities are provided in paragraph 2.j below.

NOTE: An example text for a designation letter would include, "1. Per reference (a) [with reference (a) being the TP&G], you are hereby designated as the (Course Title) Course Supervisor and Testing Officer at Center for Security Forces (name of learning activity)."

(11) Collect data from ARB results to include total number conducted, recommended results, and actual results.

(12) Maintain an active Training Network (TRANET) account, where available, and conduct periodic platform/laboratory instruction.

(13) Be designated in writing by the CO, Officer-In-Charge (OIC), or Site Director (SD) for each applicable course of instruction.

(14) Be a formal graduate of the assigned course of instruction, unless waived by the CENSECFOR DOT.

(15) Complete all required CS IST prior to assuming the role of CS per the NETCINST 1500.5(series).

(16) Fully complete the respective CUIT certification in their assigned course of instruction PRIOR to assignment as CS.

(17) Maintain a copy of appropriate parts of the course's Master Training Plan as directed by CCMM. Refer to NAVEDTRA 135D Chapter 6 for details.

(18) Assist in coordinating all changes and revisions to promulgated curricula.

(19) Ensure all training staff adheres to the approved qualification/certification and CUIT requirements.

(20) Perform or assist in conducting FCRs.

(21) Verify recommended changes to Corporate Enterprise Training Activity Resource System (CeTARS), CANTRAC, Enterprise Navy Training Reservation System (eNTRS), and CENSECFOR Toolbox App.

(22) Provide support during the NETC E2E Process.

(23) Review contractor developed curricula, ensuring approved curriculum standards are strictly adhered to.

(24) Monitor and participate in curriculum projects for assigned courses.

(25) Provide support for ACE evaluation.

(26) Assist in COE accreditation/reaffirmation by providing subject matter knowledge support to the CENSECFOR LSO.

(27) Participate in fleet training meetings and other training advisory group meetings.

(28) Oversee the duties and functions of lead instructors (LI) and all instructional staff.

(29) Develop a course indoctrination plan for all instructional staff, which includes specific safety requirements. Each NETC course should have a course indoctrination plan that contains such topics as:

(a) Course Management Data: Purpose, scope, curriculum maintenance, instructional delivery system, class hours, surge plan, and security requirements.

(b) Student Management Data: Accession, remediation, retesting, ARB, and non-graduate information.

(c) Instructor Certification and Evaluation Program.

(d) Safety: Pre-brief, emergency action plan, and reporting of unsafe conditions.

(30) The course supervisor will brief instructors on their instructor certification plan within 10 working days of reporting aboard.

(31) Provide feedback data to the CENSECFOR LSO.

(32) Ensure applicable instructor records are maintained.

(33) Responsible for ensuring required scheduled evaluations and periodic unscheduled evaluations are conducted and properly documented.

(34) Maintain an active MS Teams account.

(35) Responsible for the creation and briefing of instructor training jackets (ITJ) to the new military and (CIVPERS) instructor. The CS will maintain and update all ITJs.

(36) Shall make appropriate entries of completed IST in the instructor's ITJ.

(37) Responsible for the training delivered by contractor personnel and must be cognizant of the guidelines that govern contracted services that are specified in their respective PWS.

j. Testing Officer (TO). Coordinate preparation, administration, grading, revision, security, and analysis of all

tests that contribute to a student's grade. This includes strict documenting, serializing, and tracking all testing materials. This may be a permanent staff position or assigned to the CS. Designated in writing (figure 12-2) and received training via IST in testing. The training is located on the CENSECFOR Learning Standards Office MS SharePoint site and MS Teams.

- (1) Designated in writing by the CO/OIC/Site Director.
- (2) Provides test material(s) to CS or instructors.
- (3) Provides test administration.
- (4) Oversees the grading of tests by instructors.
- (5) Secures test material(s).
- (6) Maintains test bank(s) for each course taught at the learning site.
- (7) Coordinates and manages test revisions for each course.
- (8) Performs test and test item analysis.
- (9) Provides summary reports of testing information in the quarterly TQI Report to the course's CCMM.
- (10) Conducts IST in testing areas.
- (11) Maintains the Test Custody Log.
- (12) Shall complete all required NETC TO IST prior to assuming the role of TO:
 - (a) Testing program
 - (b) Testing plan
 - (c) Performance tests and administrator guides
 - (d) Knowledge tests and administrator guides
 - (e) Grading systems
 - (f) Tests and test item analysis

(g) Testing program administrator

k. Instructor Evaluator (IE)

(1) May be CENSECFOR N7 staff or learning activity CSs, LI or instructors who have received IST in instructor evaluation. The training is located on the CENSECFOR Learning Standards Office MS SharePoint site on MS Teams.

(2) Contract partners do not normally evaluate Department of Defense personnel unless they have received IST in instructor evaluation and received documented approval from the CENSECFOR DOT.

(3) Personnel who have received IST in instructor evaluations and have received instructor evaluation certification will conduct semi-annual or quarterly evaluations.

(4) IE will be thoroughly familiar with the instructor evaluation policies. IE shall be designated using figure 12-3.

l. Instructor

(1) The front-line representative of the NETC training organization and a critical element in the training process.

(2) Must focus on mentorship and ensure the learning and growth of the student is the priority.

(3) Newly reporting instructors are in an instructor student status, until instructor certification status is achieved.

(4) Shall complete initial IST requirements within 90 days dictated in enclosure (3), figure 3-1.

(5) All instructors are responsible for becoming familiar with the requirements of this instruction, along with the certification requirements in enclosure (2), and ensuring their CUIT requirements are accurate, updated, and complete.

m. COR

(1) Functions as the CENSECFOR representative in the execution of the respective contract.

(2) Provides the technical liaison between the contractor and the Government contracting officer.

(3) Monitoring contractor performance.

(4) Providing feedback to the contracting officer as necessary.

(5) Providing technical guidance to contract partner supervisory personnel.

(6) Participating in and/or coordinating the participation of other CENSECFOR personnel in proposal evaluations for contract awards.

(7) Ensure contract does not become personal services.

n. Training Specialist

(1) CENSECFOR representative for oversight of contract delivered training courses.

(2) Provide professional and technical support for student management.

(3) Monitor contractor training site operations.

(4) Provide feedback from students to CENSECFOR.

(5) Assist students in resolving training and/or personal problems.

(6) Responsible for the training delivered by contractor personnel and must be cognizant of the guidelines that govern contracted services that are specifically spelled out by the respective PWS.

o. Technical Assistant (TA)

(1) Formally observe and validate contractor performance per the respective PWS and applicable governing instructions.

(2) Identify contractor deficiencies to the COR.

(3) Review contract/task order deliverables, recommend acceptance/rejection, and provide the COR with documentation to support the recommendation.

(4) Assist in preparing the final report on contractor performance for the applicable contract/task order in accordance with the format and procedures prescribed by the COR.

(5) Identify contractor noncompliance with reporting requirements to the COR.

(6) Review contractor status and progress reports, identify deficiencies to the COR, and provide the COR with recommendations regarding acceptance, rejection and/or Government technical clarification requests.

(7) Provide the COR with timely input regarding technical clarifications for the statement of work, possible technical direction to provide the contractor and recommend corrective actions.

(8) Provide detailed written reports of any trip, meeting, or conversation to the COR after any interface between the TA and the contractor.

o. IST Program Manager

(1) Assigned to the CENSECFOR N7 Learning Standards Office responsible for the domain administration of IST program.

(2) Will provide the learning activities with an IST report template, collect quarterly reports, and provide annual training topics approved by CENSECFOR CO via the CENSECFOR LSO and CENSECFOR DOT. Collect IST training number from domain in-service training coordinators using quarterly TQI report.

(3) Incorporate IST topics into the CENSECFOR learning activities' short and long-range training programs and conduct training in accordance with the periodicities identified in NETCINST 1500.5(series).

(4) Maintain and update all training topics and information on the CENSECFOR Learning Standards Office MS SharePoint site.

p. IST Coordinator

(1) Responsible for the administration and application of the IST program at the learning activity. All learning activities will appoint, or have assigned as a collateral duty, an IST coordinator.

(2) Ensure IST training held per the published schedule.

(3) Shall provide a report of training topics and attendees to the IST PM quarterly as part of the TQI report.

(4) Ensure learning activity personnel are assigned required IST.

(5) Ensure all personnel assigned to deliver IST topics are monitored and formally evaluated by an MTS designated instructor.

q. Accreditation Manager (AM)

(1) Assigned to the CENSECFOR N7 Learning Standards Office, provides technical expertise and assistance during all phases of the accreditation process.

(2) Serves as AM for FLETA and Accreditation Liaison Officer for the COE.

(3) Ensures courses are developed, administered, updated, and delivered according to the respective accreditation standards.

(4) Assists with the conduct and documentation of assessments while providing QA reviews and assistance in updating policies and directives as required to maintain currency in accordance with the respective accreditation standards as they are updated.

(5) Assume additional accreditation duties as required by TYCOM requirements.

DEFINITIONS AND ACRONYMS

Academic Review Board (ARB): Board comprised of at least three certified instructor personnel to evaluate a student's progress through a course and recommend a specific action when the student is having difficulty achieving the course objectives.

Accreditation: The act of granting credit or recognition, especially to an educational institution that maintains suitable standards. Accreditation is necessary to any person or institution in education that needs to prove that they meet a general standard of quality. Standards for accreditation set by a peer review board whose members include faculty from various accredited institutions of higher learning.

American Council on Education (ACE): Organization that evaluates formal training courses 40 academic hours or longer and makes credit recommendations to civilian post-secondary schools, colleges, and universities. The ACE Guide is the document that contains a list of these recommended credits.

Annual Class Schedule (ACS): Annual class schedules based on a plan initiated through the out-year planning process. Validated and approved based on the feasibility study process.

Attrite (attrition): Any student separated from the Navy for any reason.

Audit Trail: A documented record of the processes, procedures and major decisions used to analyze, design, develop, implement, and evaluate training materials.

Awaiting Instruction (AI): Transferred students waiting to begin training at a training activity.

Awaiting Transfer (AT): Any student who is a graduate or failed to graduate from a course and is awaiting transfer to the student's next command.

Business Case Analysis (BCA): A comparative analysis that presents facts and supporting details among competing alternatives. It outlines the detailed costs including the total cost of ownership (i.e., development, maintenance, and sustainment costs) and includes work force related costs (i.e., Individual Account costs). Benefits outlined and tied to Fleet readiness or mission improvements.

Blended Learning: Means using a variety of learning strategies, media, or delivery methods in a course or learning event.

Catalog of Navy Training Courses (CANTRAC): A web-enabled listing of information concerning all formal courses of instruction throughout the Navy. CANTRAC includes, but is not limited to, course descriptions, course prerequisites, class schedules, class quotas, and training site specific information.

Change: An update to training materials that does not affect the course mission or terminal objectives, course length, and does not require additional resources.

Command Indoctrination: Method designed to provide information to the incoming staff and instructors on chain of command, command policies, command mission, etc.

Comprehensive Tests: Used to measure mastery of the critical objectives or retention of material previously tested. Comprehensive tests may be performance or knowledge and categorized as within-course or final comprehensive tests.

Computer-Based Training (CBT): Interactive instructional experience between a computer and learner in which the computer provides the majority of the stimulus and the learner responds, resulting in progress toward increased skills or knowledge. An all-encompassing term used to describe any computer-delivered training including CD-ROM and the World Wide Web.

Constraints: Limiting or restraining conditions or factors, such as policy considerations, time limitations, environmental factors, budgetary limitations, etc., that prevent the accomplishment of some aspect of training as required.

Contracting Officer's Representative (COR): An individual, appointed in writing by the CO of the requiring activity or duly authorized representative, who functions as the technical representative of the contracting officer in the administration of a specific contract or delivery order.

Council on Occupational Education (COE): An organization through which Naval Education and Training Command (NETC) seeks and maintains accreditation standards for all learning centers.

Core Unique Instructor Training (CUIT): Program designed to prepare the instructor to teach in a high-risk course or training situation.

Corporate Enterprise Training Activity Resource System (CeTARS): Automated information system utilized for the management of Navy training. The authoritative data source for formal Navy training course and student information. The data in CeTARS supports work force and resource decisions, personnel distribution, class scheduling, quota management, and development of training requirements.

Course Data Process Code (CDP): An automatically generated alphanumeric code that represents a course delivered at a specific training site with a specified type of delivery method.

Course Identification Number (CIN): Alphanumeric designator used to identify a training course in CeTARS used for capturing data for course and student management.

Course Indoctrination: Method by which all instructors at the course level provide information concerning safety policies or training policies unique to the course.

Course Master Schedule (CMS): A curriculum control document that includes, but is not limited to, the lessons taught in a course and time allowed for each lesson topic, and addresses the knowledge, skills and abilities and identifies student-to-instructor ratio for both classroom and laboratory. Every CIN and CDP must have a CMS.

Cross-Utilization: Use of staff instructors, equipment, or spaces for more than one course at the same learning activity.

Curriculum Control Authority (CCA): The agency that approves instructional methods and materials while simultaneously operating and maintaining assigned courses.

Curriculum Management: Function of developing, revising and/or maintaining the curriculum. This includes maintenance of the master record and audit trail, management of the curriculum evaluation and feedback programs, guidance for the input and review of contractor developed curriculum, and assistance and guidance in curriculum development and revision projects.

Defense Planning, Programming, Budget, and Execution (PPBE): The purpose of the PPBE process is to allocate resources within the Department of Defense (DOD). Operational Navy (OPNAV) (N15) uses NETC Feasibility Study data to support Program Objective Memorandum (POM) and Program Review (PR) resource requirements in the Defense PPBE.

Difficulty Index: Test item analysis technique that calculates the difficulty on a single test item.

eLearning: Covers a wide set of applications and processes such as web-based learning, computer-based learning, virtual classrooms, and digital collaboration. It includes the delivery of content via internet, intranet/extranet, tablet, audio and videotape, satellite, and CD-ROM.

Effectiveness of Alternatives: Test item analysis technique that helps to identify distracters that may be illogical, too easy or not plausible.

Emergency Action Plan (EAP): An internal plan implemented immediately upon advent of a mishap to aid involved persons and to control and/or safeguard the scene. This plan will be developed for all high-risk training evolutions and must include at a minimum: primary and alternate communications, telephone numbers, radio channels, call signs, locations of emergency response personnel, locations of emergency equipment, equipment shutdown procedures, muster site and methods to maintain control of the scene, non-affected personnel, and all immediate emergency procedures. The EAP should be a simple checklist or sequential list of responses of expected and immediate actions by personnel in control of the event to aid and extract mishap victims from the scene.

Enterprises: Enterprise Management is the processes, forums, and enabling tools used by Navy senior leadership to manage the efficient and effective production of current readiness and future capability. By ensuring the perspective of others is considered and/or evaluated prior to implementing major business-area process improvements, CENSECFOR strengthens the decision-making process substantially and fosters an environment of collaboration and transparency.

Evaluation Management: The function of monitoring, participating in, and conducting evaluations to ensure quality training. The Learning Standards Officer and the Training Directorate share the responsibility for this function.

External evaluation: External evaluation is the process of gathering and analyzing data from outside the training environment to determine how well recent graduates are meeting job requirements. This evaluation activity relies primarily on input from the field to determine how well graduates are performing. However, in some cases, external evaluation data is

gathered and provided to the organization by inspection and evaluation teams, consultants, advisory bodies, Board of Visitors, accrediting agencies, and professional certification groups.

Feasibility Study: A review of requirements by the Learning Center (LC) or Training Authority (TA) to determine if adequate resources (including personnel, equipment, facilities, and funding) are available to meet the projected training need. NETC uses Feasibility Study data to support resource requirements for OPNAV (N1S) POM/PR input to the Defense PPBE.

Formal Training: Training in an officially designated NETC course conducted in accordance with appropriate course outline and objectives.

Front End Analysis (FEA): Compares "as-is" training to the "to-be" training state, and identifies the gap, if one exists. During the FEA, the most effective and cost-efficient training alternatives (e.g., instructor led, computer aided training, labs, or a blended solution) are explored to satisfy the training requirement. Also, during the FEA, ways to reduce content development costs are explored by working to identify existing content that can be reused, repurposed, or referenced. Typically performed following a JDTA.

Grade: Method used to express a student's performance of the objectives. May be a numerical grade or satisfactory/unsatisfactory grade.

Grading Scale: A standardized interpretation of the numerical grading system.

Graduate: A student who successfully completes a course of instruction.

High-Risk Training: All basic or advanced, individual, or collective training in a traditional or non-traditional environment that exposes the staff, students, and assets to the potential risks of death, permanent disability, or loss during training. For the purpose of this instruction, an assignment of any initial risk assessment code (RAC) of 1 or 2, as well as an assignment of RAC 3 in severity level I (death or loss of asset) or severity level II (severe injury or damage), although the "probability" of an injury or loss is "unlikely (E)" or "seldom (D)," must be considered high-risk training.

Hold Legal (HL): A student who is not able to attend a course of instruction or be transferred after graduating or being dropped/disenrolled from a course of instruction due to a documented legal issue. The student could be AI, Interrupted Instruction (II), or AT.

Hold Medical (HM): A student who is not able to attend a course of instruction or transferred from a course of instruction due to a documented medical issue.

Immediate Superior in Command (ISIC): The parent command in the Navy chain of command that is one level above and has responsibility for and authority over a command.

Independent Duty Corpsman (IDC): IDC is an active-duty Sailor who has successfully completed one of the Navy's specific medical training programs. IDCs, formally trained and educated, perform primary medical care and minor surgical services in a variety of health care and non-health care settings worldwide under indirect physician supervision.

Individual Account (IA): A defense planning and programming category that includes transients, students, cadets and midshipmen, and personnel in a hold status (military personnel who are not in the force structure). Force structure refers to the remainder of jobs actually performing the Navy's mission (Force Structure = Mission/IA = Overhead).

Information Management: Capturing, organizing, and storing knowledge and experiences of individual workers and groups within an organization and making it available to others in the organization. The information is stored in a special database called a knowledge base and is used to enhance organizational performance.

In-Service Training (IST): Sustainment training for instructors, course supervisors, and all personnel directly or indirectly involved in the preparation or delivery of curriculum to perform their duties. For instructors, training is in addition to qualification training.

Instructional Management: Function of monitoring instructor progress, evaluating instructors, and providing in-service training as needed to meet specific training requirements. The Training Directorate and Learning activities share this responsibility jointly.

Instructional Systems Design (ID): May be defined as the systematic and iterative method for creating learning experience that develop and enhance skills and knowledge.

Instructional Systems Designer (ISD): Personnel assigned to develop curriculum.

Instructional Systems Specialist (ISS): CIVPERS employee with formal education and training in the field of education, instructional systems design, or evaluation. Normally assigned to CENSECFOR's Training Directorate staff.

Instructor Computation (ICOMP): A method for determining the number of instructors required to conduct a course of instruction.

Integrated Learning Environment (ILE): The Navy system used to deliver blended learning solutions that provide the knowledge, skills, and abilities to meet Fleet readiness and mission requirements. ILE incorporates instructor-led, computer-based training, simulation, self-paced instruction, and a variety of instructional methodologies best meeting the needs of students.

Interim Change: A pen-and-ink change to training materials to incorporate technical changes, safety, or urgent TYCOM subjects.

Interrupted Instruction (II): Any student who has had their course of instruction interrupted for an administrative, legal, or medical reason.

Internal Evaluation: The quality control process of conducting a thorough review of the instructional process by appraising student progress, delivery technique, materials effectiveness, and testing procedures for the purpose of identifying internal deficiencies requiring correction, and recommending specific changes.

Interservice Training Review Organization (ITRO): Organization of the uniformed services (Army, Air Force, Marines, and Navy) whose mission is to improve cost effectiveness of training by allowing for the consolidation, collocation, and resource sharing between services. An Interservice course is a course of instruction where two or more services jointly teach and attend the course.

Job Duty Task Analysis (JDTA): The structuring and decomposition of work and assigning of attributes at the task

level. Data generated during a JDTA is captured in the CPM, and is used to build curriculum in Learning Object (LO) Module. Requirement Sponsor(s), stakeholders, and Subject Matter Experts (SMEs) provide the work data. JDTA data is validated and approved by the Requirement Sponsor prior to the FEA.

Knowledge Test: Tests that measure a student's ability to recognize, recall, comprehend, apply facts, or interpret concepts, and support the student's performance of a job-related skill.

Lead Instructor (LI): The LI is responsible for managing the instructional staff, training materials, and students. The LI must possess an in-depth knowledge of all command directives dealing with their assigned duties. A LI should not consider their duties as purely administrative since it is the primary duty of all instructors to instruct. A LI should be an individual with broad technical knowledge appropriate for the course and definite operational experience with the equipment covered by the course.

Learning Activity (LA): A designated area (detachment/site/turnkey) that has a primary mission of conducting or supporting training for an approved course of instruction.

Learning Center (LC): A Navy command assigned responsibility for the management, development, implementation, and maintenance of specified courses.

Learning Content Management System (LCMS): An LCMS is a multi-user environment where learning developers can create, store, reuse, manage, and deliver digital learning content from a central object repository.

Learning Detachment: A training activity that has a primary mission of conducting or supporting training. Usually led by an OIC.

Learning Management System (LMS): Infrastructure platform that delivers and manages learning content. A combination of software tools performs a variety of functions related to online and offline training administration and performance management.

Learning Object: A reusable piece of information that is media independent.

Learning Solution: The course of action devised to satisfy a requirement.

Master Record: Method used to track the status of the curriculum for all courses taught at an activity. Maintained by the Learning Standards Officer (LSO).

Master Training Specialist (MTS): Program used to recognize outstanding officers, enlisted, and civilian personnel who excel in demanding assignments as instructors and course supervisors.

Medical Doctor (MD): A person trained and licensed to practice medicine.

Moderate-Risk Training: Training identified by NETC (N00X) in which a lack of stringent controls could lead to degraded mission capabilities in terms of the necessary standard and reduced mission capability if exposure occurs during training. These could include, but are not limited to, fall protection, machinery guarding, use of personal protective equipment (PPE), and electrical safety controls.

My Navy Portal (MNP): An integrated web portal program that consolidates the Navy's Human Resource (HR) portals, knowledge, and applications into a simplified user experience. MNP provides a single point of entry for Sailors to manage and view their personnel and career information within an intuitive "self-service" environment.

Naval Mission Essential Task (NMET): NMET are those tasks considered essential to accomplish and support missions assigned by a naval or joint force commander. NMETs serve as a common language and reference system for joint force commanders, combat developers, and trainers. The tasks are written in language and terminology compatible with the Universal Joint Task List (UJTL). There is a common architecture between Service and joint training.

Navy Enlisted Classification (NEC): A four-position alphanumeric code assigned to enlisted personnel and billets. NECs reflect a special knowledge or skill within a rating when the rating structure is insufficient by itself for work force management purposes.

Navy Integrated Training Resources and Administration System (NITRAS): An automated training information system designed to be responsive to the demands of the higher authority.

Navy Occupational Safety and Health (NAVOSH) Training: Required training in the recognition and maintenance of a safe and healthy training environment. All personnel are required to attend training as appropriate for their duties.

Navy Occupational Specialty (NOS) code: A classification system of occupational specialty codes similar to how the other services categorize skill sets.

Naval Education and Training Command (NETC) High-Risk Training Safety Evaluation (HRTSE): Review and assessment of high-risk training safety program protocol and policy compliance, to include evaluation of training platforms and observance of training delivery methodology. Conducted at each learning activity bi-annually.

Navy Training System Plan: Primary document identifying work force, personnel, and training requirements and resources for new systems development and modernization of existing legacy systems.

NETC Safety and Occupational Health Management Evaluation (SOHME): Evaluation of the Safety and Occupational Health Programs assesses the effectiveness of safety policies, programs, and procedures. Conducted every three years via on-site or desktop method (determined by NETC).

Non-Graduate: Any student who does not successfully complete the required course of instruction.

Nurse Practitioner (NP): A medical professional trained to assess patient needs, order, and interpret diagnostic and laboratory tests, diagnose illness and disease, prescribe medication and formulate treatment plans.

Operational Risk Management (ORM): ORM is a decision-making tool used at all levels to increase operational effectiveness by anticipating hazards and reducing the potential for loss, thereby increasing the probability of a successful mission.

Oral Test: Test given when job performance in the fleet requires verbal demonstration of a skill.

Participating Activities: Training activities conducting a CENSECFOR course of instruction, but the activity is not a designated CENSECFOR Learning Activity.

Performance Test: Sample work situations where students demonstrate the ability to perform a skill. Performance tests may be hands-on tests such as troubleshooting or mental skill such as completing reports or forms.

Performance Work Statement. States the Government's needs in terms of work tasks (i.e., work performed in developing or producing the goods delivered or services performed by a contractor).

Personalization: Instructors annotating detail in their lesson plans to support and enhance their ability to teach the required material. Personalization is performed in the instructor's own style, but under the supervision of the assigned MTS mentor or course supervisor.

Physician's Assistant (PA): Physician Assistants are medical professionals who diagnose illness, develop, and manage treatment plans, prescribe medications, and often serve as a patient's principal healthcare provider.

Pilot Course: The first full-length course conducted at a Navy training activity by Navy instructors using the training materials prepared for the course.

Pipeline: The total time involved in training personnel once designated as students, including the time taken to travel to the training activity, time awaiting instruction, time of actual training, and time from termination of training until reporting to the ultimate duty station. This may include more than one activity.

Practical Work: Day-to-day activities completed in the laboratory, field, classroom, or homework. Examples include quizzes, problem sheets, homework assignments, etc.

Pre-Mishap Plan: Plan that outlines safety requirements and procedures for all high-risk courses. Quarterly walk-through of procedures is required. All pre-mishap plans shall be exercised at least annually.

Pretest: A test administered to a student prior to entry into a course or unit of instruction to determine the technical skills the students already possess in a given subject.

Program Objective Memorandum (POM): The budgeting tool used in the Navy to identify requirements/expenditures for the subsequent six-year period.

Progress Test: A test administered during the course to determine how well the student is progressing toward the achievement of the objectives.

Requirements (throughput): A projected number of students based on Navy personnel requirements. Derived from several factors, including historical throughput, accession goals, attrition, and future mission requirements.

Requirements Sponsor: A Navy enterprise or Navy enabler organization or higher authority, such as Chief of Naval Operations (CNO), Secretary of Defense (SECDEF), and Secretary of the Navy (SECNAV), that has identified the training requirement based on knowledge, skills, and abilities necessary to meet a Fleet or combatant commander's readiness or mission requirement.

Resource Sponsor: The OPNAV organization that provides funding for the identified requirement. OPNAV (N1) is the resource sponsor for Individual Training.

Remedial Instruction: Method used to aid students in achieving objectives by providing additional instructional study time. Remediation can be either voluntary or mandatory.

Revision: An update to the course mission or an increase/decrease in course length requiring additional resources constitutes a revision.

Safety Officer: Responsible for ensuring that safety is an integral part of training. Ensures the training is environmentally safe and personnel always observe safety. If high-risk training should be conducted, a separate Training Safety Officer may be appropriate.

Safety Review: A type of course review conducted annually for all NETC courses.

Safety Stand-down: An activity conducted at least annually to review all safety procedures conducted at the activity. Document results of the safety stand-down and maintain for inspection purposes.

Setback: The repeat of instruction due to either academic or non-academic reasons. In either case, a setback increases the student's time to train.

Site Augment Plan: Developed and submitted by the affected learning activity to the CCA for approval. A CCA approved written plan authorizing site-specific material, manning, or procedural deviations needed for training delivery.

Student Management (SM): Primary mission is to provide student support so that the learning activities can focus on content and the delivery of instruction. Secondary mission is to provide administrative and supply support to learning activity staff.

Subject Matter Expert (SME): An individual who possesses a thorough knowledge of specific job/duties/tasks, or a particular topic.

Student Feedback Program: Program used to solicit information from the student on the instruction, etc.

Technical Change: Addresses any change to tactical or training-unique equipment or documentation originating in the Training Support Agency's (TSA's) parent material agency and affecting promulgated curricula. It does not require a Training Project Plan (TPP). May or may not affect learning objectives. Does not affect course mission, course length, or resources.

Technical Instructor Evaluation: Evaluation conducted by a qualified evaluator knowledgeable in the subject matter to ensure the instructor or instructor student is technically proficient enough to teach the material.

Technique Instructor Evaluation: Evaluation conducted by a qualified evaluator used to ensure the instructor technique is appropriate, effective, and consistent with technique taught in instructor training.

Terminal Objective Statement: A description of a lesson within a course. The lesson will address specific knowledge, skills, and abilities to meet defined requirements.

Test: Any device or technique used to measure a student's performance of an objective or objectives.

Test Compromise: Unauthorized disclosure of a test and/or answers to a test.

Test Design: The process of developing tests that measure the objectives to the appropriate standard and learning level.

Test Item Analysis: A tool used to evaluate the effectiveness of a single test item. Most used tools are the difficulty index and the effectiveness of alternatives.

Test Item Bank: Collection of all approved test items used in a course of instruction.

Testing Officer: Responsible for ensuring the functions of the testing program are accomplished. At the discretion of learning activity leadership, the assignment of a Testing Officer may be to an individual course or at the command level.

Testing Plan: Document outlining testing program of a course.

Total Time to Train (TTT): The total number of days it takes for a student to graduate, drop, or disenroll from a course. TTT data can be further broken down under categories according to person-hour types. This includes Awaiting Instruction (AI), Under Instruction (UI), Interruption of Instruction (II), Awaiting Transfer (AT), Hold Legal (HL), and Hold Medical (HM).

Training Activity (TA): A Navy activity assigned the responsibility for the development, implementation, and maintenance of specified courses.

Training Materials Modification (TMM): Encompasses modifications to training materials that include interim change, technical change, and revision.

Training Project Plan (TPP): A planning document identifying resources required and justification for a curriculum revision or development project.

Training Requirements Review (TRR): Provides a periodic or triggered review and revalidation of an existing course(s) to ensure that all identified, validated, and resourced training requirements are being met. When TRRs are scheduled, the following stakeholders attend; the courses' Requirement Sponsor(s), Resource Sponsor(s), CCA, TYCOM(s), Enlisted and Officer Community Managers, Fleet Subject Matter Experts, and other stakeholders.

Training Site Authority: As cited on NETC form 1500/5, NETC High Risk Student Medical Screening, is signature authority given through formal letter, command instruction, or executive suite signature.

Under Instruction (UI): Any student who is under instruction in a course.
