

**JUSTIFICATION AND APPROVAL FOR
OTHER THAN FULL AND OPEN COMPETITION
41 U.S.C 1901**

Various Avionic Components
Solicitation 70Z03826QJ0000035

Pursuant to the requirements of the Competition in Contracting Act (CICA) as implemented by Federal Acquisition Regulation (FAR) 12.102(b), FAR Class Deviation 25-21 Rev. 1 for FAR Part 12¹, FAR 6.103, FAR Class Deviation 25-11 for FAR Part 6 and in accordance with the requirements of RFO 6.104, the justification for the use of the statutory authority under RFO 6.103 is justified by the following facts and rationale required under RFO 6.104-1 as follows:

1. Agency and Contracting Activity.

The Department of Homeland Security (DHS), United States Coast Guard (USCG), Aviation Logistics Center (ALC), Medium Range Recovery (MRR) Division, Elizabeth City, NC proposes to enter into a contract on a basis other than full and open competition.

2. Nature and/or Description of the Action being Approved.

- (a) Nature of the action: The USCG intends to procure on a sole source basis various Avionic Components to be utilized on the MH-60T aircraft. Components must be procured from the Original Equipment Manufacturer (OEM), Rockwell Collins, Inc. (RCI).
- (b) Name and address of the contractor:
Rockwell Collins, Inc. (RCI)
400 Collins Road, N.E.
Cedar Rapids, IA 52498-0505
Cage Code: 84T51 or 13499
- (c) Contract Type: Firm Fixed Price (FFP), Purchase Order (PO)

(Remainder of Page Intentionally Left Blank)

¹ In this document, citations to RFO Parts 12, 6, 10, 15, and 25 are citations specifically to Federal Acquisition Regulation (FAR) Class Deviation 25-21 Rev. 1 for FAR Part 12, FAR Class Deviation 25-11 for FAR Part 6, FAR Class Deviation 25-06 for FAR Part 10, FAR Class Deviation 26-08 Rev. 1 for FAR Part 15, and FAR Class Deviation 26-09, Rev. 1 for FAR Part 25, which were issued as part of the Revolutionary FAR Overhaul (RFO), which was implemented in response to Executive Order 14275, Restoring Common Sense to Federal Procurement, signed April 15, 2025.

(d) Estimated total value (including options): [REDACTED] broken down as follows:

Item	Quantity ²	Unit Price	Total ³
Antenna	4 ea.	[REDACTED]	[REDACTED]
Fan	16 ea.		
Receiver, Radio	4 ea.		
Receiver-Trans, Radi	4 ea.		
VPM-8600A	8 ea.		
High Power AMP HPA	4 ea.		

(e) Type of funding: Procurement Construction & Improvement (PC&I) funds

(f) Year of funding: Fiscal Year 2026

(g) Solicitation number: 70Z03826QJ0000035

(h) Background information about the requirement: The USCG previously awarded Contract, 70Z03820DB2000019, on 08/31/2020, to Rockwell Collins, Inc. for the procurement and repair of various Avionic Components that are utilized on USCG fixed-wing and rotary-wing aircraft. This contract is an Indefinite Delivery, Indefinite Quantity type contract consisting of one (1) Base Period and four (4), one year Option Periods, valued at \$64,823,978. The period of performance began 09/01/2020 and expired on 08/31/2025.

3. Description of Supplies/Services.

The required components listed below are parts needed for the Rockwell Collins Common Avionics Architecture System (CAAS), which is an avionics system designed specifically for the USCG MH-60T aircraft. This system integrates multiple communications, navigation, and mission subsystems to provide the aircraft with advanced capabilities that significantly improve performance, safety, and reliability while reducing the pilot workload for demanding tactical missions.

Nomenclature	National Stock Number	Part Number	Unit of Issue	Quantity
Antenna	5985-14-518-7378	597-2147-101	EA	4
Fan	1680-01-545-0764	822-1852-001	EA	16
Receiver, Radio	5826-01-600-6180	622-6812-102	EA	4
Receiver-Trans, Radio	5820-01-719-1144	822-0788-005	EA	4
VPM-8600A	5836-01-591-1755	822-2017-002	EA	8
High Power AMP HPA	5996-01-657-1361	822-2852-001	EA	4

² Estimated quantities.

³ Rounded to the nearest dollar.

4. Identification of Statutory Authority Permitting Other Than Full and Open Competition.

The statutory authority permitting other than full and open competition is 41 U.S.C 1901 as implemented in FAR 12.102(b), and RFO 6.103 and in accordance with the requirements of RFO 6.104.

5. Identification of Exception to the Buy American Statute.

The nonavailability exception to the Buy American Statute does not apply to this requirement.

6. Demonstration that the proposed contractor's unique qualifications or the nature of the acquisition requires use of the authority cited.

(a) Rationale for using the authority cited in section 4 of the J&A.

In order to maintain integrity of the avionics system, ensure compatibility with other existing avionics components, and safe operation of the MH-60T aircraft, the required components must be procured from the OEM or authorized distributors providing traceability back to the OEM. This requirement was validated by MRR engineering via email, dated 10/14/2025. Correspondence with RCI confirmed they are the OEM and that there are no other distributors that can supply the avionics components.

(b) Details covering what events lead to the situation requiring use of other than full and open competition procedures including whether any portion of the work can be segregated to allow for competition;

Sources Sought Notice (SSN), 70Z03826J0000005, was posted at www.SAM.gov on 10/10/2025, and expired on 10/20/2025, in an effort to identify sources with the capability of providing the required components. This notice received two (2) responses; Qondala LLC and BHPE LLC (BHPE). Qondala LLC stated that they are not the OEM nor an authorized distributor providing traceability to the OEM. Through several communication efforts to inquire about BHPE's capabilities regarding the components, BHPE did not provide any information indicating that they can support this requirement or provide OEM authorization; therefore, they are deemed ineligible. Through email correspondence with RCI dated 10/10/2025, it was confirmed that they are the OEM of the components and there are no authorized distributors. Given this information, RCI is the only source capable of providing the required components.

(c) Summarize alternatives considered and why they will not work;

Rockwell Collins avionics components that encompass CAAS, are designed specifically for the USCG MH-60T. This system provides the aircraft with advanced capabilities that significantly improve mission performance, safety, and reliability. In order to maintain integrity and compatibility, these particular components must be manufactured in accordance with design and quality requirements provided by the OEM. Any deviation from these requirements could result in damage to, or loss of assets and significant injury or loss of life. Procuring the required various Avionic Components from the OEM or from an authorized distributor will ensure they meet the specified requirements. Therefore, alternatives cannot be considered.

- (d) Impact to the mission that would result if the J&A is not approved and, consequently, the product or service not provided.

Failure to approve this sole source Justification for Other Than Full and Open Competition will jeopardize the performance of the USCG's mission due to grounding of the aircraft as a result of no stock being available as components are required.

- (e) Rationale for use of the nonavailability exception to the Buy American statute, including detailed information explaining why the particular articles, materials, or supplies of the class or kind to be acquired, either as end items or components, are not mined, produced, or manufactured in the United States in sufficient and reasonably available commercial quantities and of a satisfactory quality.

The nonavailability exception to the Buy American Statute does not apply to this requirement. Therefore, the Buy American Statute will be included in both the solicitation and terms and conditions of this contract.

7. Description of Efforts Made to Ensure that Offers are Solicited from as Many Potential Sources as is Practicable.

- (a) If an entry was made in APFS, provide the publication date.

This acquisition is forecasted in the DHS Acquisition Planning Forecast System (APFS), number F2026072285 published on 11/12/2025, and revised on 02/25/2026, at <http://apfs.dhs.gov>, and was included in the DHS Forecast of Small Business Opportunities. There were no responses received as a result of the APFS posting.

- (b) If an announcement has already been made in SAM.gov, provide the publication date.

Not applicable.

- (c) If an announcement is being planned for posting in SAM.gov, provide the estimated publication date.

This Justification for Other Than Full and Open Competition will be posted to the Government Point of Entry (GPE) website, via <https://www.sam.gov> under solicitation 70Z03826QJ0000035 with an estimated publication date of 04/30/2026.

- (d) If an announcement will not be published, identify the applicable exception under RFO Part 5.

Not Applicable.

8. Determination by the Contracting Officer that the Anticipated Cost to the Government will be Fair and Reasonable.

The contracting officer determines that the anticipated prices will be determined fair and reasonable based on comparison with the Independent Government Cost Estimate and by comparison to similar items in related industries.

9. Description of Market Research.

- (a) Describe the market research techniques used, results, date(s) when the market research was conducted, and how the contracting officer used the market research to determine price reasonableness.

Market research was conducted in accordance with (IAW) FAR Part 10 from October 2025 – November 2025. This procurement forecast is posted as DHS – APFS No. F2026072285 at <http://apfs.dhs.gov>. This procurement will be included in the DHS Forecast of Small Business Opportunities. DHS APFS entries were reviewed and there were no pre-existing entries. The USCG posted a SSN to identify potential offerors capable of providing the avionics components. Sources Sought Notice, 70Z03826IJ0000005, was issued through Contract Opportunities at SAM.gov website 10/10/2025 and expired 10/20/2025. As a result, there were two (2) responses received; Qondala LLC and BHPE LLC. Both were found technically unacceptable because neither could provide documentation demonstrating direct supply chain control from RCI, the OEM, and neither vendor is an authorized distributor. A review of the Asset Maintenance Management Information System (AMMIS) database history was conducted to determine the acquisitions method of the requirement, anticipated costs by reviewing past purchase history, and asset performance. The components must be procured from the OEM, RCI, because the components are proprietary and require specialized manufacturing processes to maintain performance integrity; there are no authorized distributors. In addition, Government databases such as Federal Logistics Information Systems Web Search (WebFLIS), SAM.gov, and USASpending.gov were all reviewed as part of market research. Commercial databases such as Inventory Locator Service (ILS) were reviewed and returned no alternative suppliers. Given this information, the only source capable of providing the components is RCI.

- (b) Describe the market research results that support the determination that the items are nonavailable.

Not Applicable.

- (c) If market research was not conducted, state why.

Not Applicable.

- (d) If patents, copyrights, and/or intellectual property are applicable to the acquisition, describe the circumstances for acquiring a patented or copyrighted product on the representation of the intellectual property holder that has not been licensed for resale and consult with the Coast Guard IP attorney.

Not Applicable.

10. Any Other Facts Supporting the Use of Other Than Full and Open Competition.

- (a) An explanation why technical data packages, specifications, statement of work, or purchase descriptions are not suitable for full and open competition.

RCI is the only approved source that can provide the avionics components needed for the MH-60T aircraft. The technical data, engineering specifications, and technical drawings are proprietary to the OEM, RCI. The USCG did not purchase the rights to the proprietary data

required to foster a competitive environment as part of any original provisioning for use on the MH-60T aircraft and the costs to procure this data would be cost prohibitive. Therefore, this requirement is not suitable for full and open competition.

- (b) Discuss why your requirement cannot be modified to enhance competition.

As cited in 6(a), the USCG can only procure these items from the OEM, or an authorized distributor, which, in this case, there is no authorized distributor. Correspondence with RCI confirms the technological data is proprietary. This requirement will ensure components are manufactured to OEM specifications, maintaining quality and integrity and minimizing flight risk. Given this information, this requirement cannot be modified to enhance competition.

- (c) For a proposed contract subject to the restrictions of RFO 6.103-for follow-on acquisitions as described in 6.103-1(c)(2)(i), all components must provide an estimate of the cost to the Government that would be duplicated and detailed information on how the estimate was derived.

Not Applicable.

- (d) For a proposed contract subject to the restrictions of RFO 6.103-2(c) or HSAR 3006.103-2(c)(70), HSAR Class Deviation 25-01 and where RFO 6.103-2 is cited as the authority, describe the exceptional circumstances allowing for an award for a period of performance in excess of the one-year limitation (applicable to all federal agencies) or the DHS-specific statutory 150-day limitation.

Not Applicable.

11. A Listing of the Sources, if Any, that Expressed, in Writing, an Interest in the Acquisition.

SSN 70Z03826IJ0000005 was posted at SAM.gov on 10/10/2025, with a response date of 10/20/2025. The USCG received responses from two (2) companies other than the OEM to the initial inquiry about the acquisition. These two companies were deemed technically unacceptable as they are not the OEM and cannot guarantee their products are directly from or traceable back to the OEM; this requirement has a high need for compatibility. A combined synopsis/solicitation will still be issued through Contract Opportunities upon approval of this document to identify other potential sources. Once the Justification and Approval for Other than Full and Open Competition has been posted at SAM.gov, all offerors will be considered.

12. A Statement of the Actions, if Any, the Agency May Take to Remove or Overcome Any Barriers to Competition Before Any Subsequent Acquisition for Supplies or Services Required.

- (a) Will the Government revise overly technical specifications, acquire data rights, etc.?

The USCG does not possess the technical data required to foster full and open competition of the purchase covered under this justification and approval. The USCG will continuously conduct market research to ensure that companies interested in doing business with the USCG are given every opportunity to compete for future USCG requirements. To increase competition, MH-60T program members conduct internet database research and ensure procurements are advertised in SAM.gov. If another potential source emerges, and the USCG

can obtain the required technical data, the USCG will assess whether competition for any future requirements is feasible.

- (b) When a J&A is issued for the purposes of acquiring goods or services while a competitive procurement is being conducted, the justification should include a detailed timeline for completion of the competitive procurement. The period of performance for the sole source action should fairly balance the time needed to complete the competitive procurement. The focus should be on minimizing the need for additional sole source awards.

Not Applicable.

(Remainder of Page Intentionally Left Blank)

13. Contracting Officer's Certification.

I certify that the data supporting the recommended use of other than full and open competition is accurate and complete to the best of my knowledge and belief.

14. Technical/Requirements Personnel Certification.

I certify this requirement meets the Government's minimum need and that the supporting data, which forms a basis for this justification, is complete and accurate.

15. Recommended for Approval:

16. Approval:
