5. The Government requires spare parts that are form, fit, and functionally interchangeable with those currently used on the supported end item or weapon system. The acquisition is restricted to the following source(s) of supply, which are the only source(s) known to have the capability of furnishing the required supplies and the only source(s) currently approved by the design control activity.

The use of the authority at 10 U.S.C. 3204(a)(1) is based on:

All CLINs:

[x] AMC 1. Suitable for competitive acquisition for the second or subsequent time.

The following AMSC descriptions are-available in DFARS PGI 217.7506 Part 2.

CLIN 0001:

[x] *AMSC C*. This part requires engineering source approval by the design control activity in order to maintain the quality of the part. Existing unique design capability, engineering skills, and manufacturing knowledge by the qualified source(s) require acquisition of the part from the approved source(s). The approved source(s) retain data rights, manufacturing knowledge, or technical data that are not economically available to the Government, and the data or knowledge is essential to maintaining the quality of the part. An alternate source must qualify in accordance with the design control activity's procedures, as approved by the cognizant Government engineering activity. The qualification procedures must be approved by the Government engineering activity having jurisdiction over the part in the intended application. If one source is approved, AMCs 3, 4, or 5 are valid. If at least two sources are approved or if data is adequate for an alternate source to qualify in accordance with the design control activity's procedures, AMCs 1 or 2 are valid.

CLIN 0002:

☒ *AMSC R.* The Government does not own the data or the rights to the data needed to purchase this part from additional sources. It has been determined to be uneconomical to buy the data or rights to the data. It is uneconomical to reverse engineer the part. This code is used when the Government did not initially purchase the data and/or rights. If only one source has the rights or data to manufacture this item, AMCs 3, 4, or 5 are valid. If two or more sources have the rights or data to manufacture this item, AMCs 1 or 2 are valid.

On April 24, 2025 the Product Specialist of record certified the accuracy of the approved source(s) and applicable AMC/AMSC codes. A copy of the certification is attached.

6. The following efforts are being taken to ensure that offers are solicited from as many sources as practicable:

☒ The acquisition was synopsized on April 8, 2025 for a period of 15 days.

☒ Dealers of the approved source(s) will be solicited.

☒ The solicitation will be posted to the DLA Internet Bid Board System for a minimum of 30 days.

7. I hereby determine that the anticipated cost to the Government will be fair and reasonable.

A price analysis will be conducted based on a comparison of proposed prices received in response to the solicitation and/or a comparison of proposed prices to historical prices paid. Certified cost or pricing data, when required by FAR 15.403-4, and data other than certified cost or pricing data, will be requested and obtained as necessary to establish a fair and reasonable price, and a cost analysis may be performed on the data submitted.

8. Market Research/Efforts to Obtain Competition:

10. The following actions are being taken to overcome barriers to competition before any subsequent acquisition is made:
