

Questions and Answers in response to
Solicitation N0018926QL083

1. **Question:** How many cameras are required?

Answer: 1 Camera

2. **Question:** What is the max height a camera will be installed at?

Answer: 8-12 feet

3. **Question:** What is the distance for the NVR to the camera?

Answer: 850ft-1000ft

4. **Question:** The solicitation references an 8–12 MP fisheye or multi-sensor outdoor camera. Could you please confirm whether a single multi-sensor/fisheye camera providing full coverage of the gate area is sufficient, or if multiple cameras are expected to meet the requirement?

Answer: Multi-sensor outdoor camera

5. **Question:** Do you have quantities specified for each required item in the performance requirements?

Answer: 1

6. **Question:** Is a building layout or site diagram available?

Answer: No

7. **Question:** Can the existing wiring be reused for the new installation?

Answer: Unknown

8. **Question:** Site Visit request

Answer: At this time, the Government will not be conducting a site visit.

9. **Question:** Can the Government confirm the required quantity of cameras to be furnished and installed under this scope?

Answer: See response to Question 1. above

10. **Question:** Can the Government also confirm whether a high-reach lift or similar access equipment will be required to install the camera equipment at the designated location?

Answer: There is a possibility depending on where the equipment may be placed.

Questions and Answers in response to
Solicitation N0018926QL083

11. **Question:** Since the required system includes IP cameras and PoE networking gear, can the Government confirm whether the contractor is expected to provide a new PoE/IP network switch, or if the camera system will connect to existing Government-furnished network equipment?

Answer: Contractor will be expected to provide a new PoE/IP network switch

12. **Question:** Please also confirm whether any additional network drops, conduit, cabling pathways, or IT coordination are required beyond the existing power source identified in the scope.

Answer: Unknown at this time.

13. **Question:** Can you please provide drawings showing where each camera goes?

Answer: See attached photos for potential locations

14. **Question:** Do we need to run fiber for some locations?

Answer: Unknown at this time.

15. **Question:** How far will each camera be?

Answer: The request is a multi-sensor camera which shouldn't require multiple individual cameras.

16. **Question:** Are the cameras all outdoors or are there some indoors?

Answer: Outdoors

17. **Question:** Do you have a specific feature or manufacturer you are looking to get?

Answer: No

18. **Question:** The solicitation states "fish eye, multi-sensor or analog". There is a huge price difference among these. Can you provide the quantity of each camera?

Answer: See answer to question 4

19. Is the existing camera wiring Cat5 or coaxial?

Answer: Coaxial

20. Is the current wiring functional?

Answer: Unknown at this time.

Questions and Answers in response to
Solicitation N0018926QL083

21. If the wiring is not functional, will new runs originate from the NVR and viewing monitor location?

Answer: See answer to question 20

22. Do you have a floor plan showing the camera locations in relation to the proposed NVR and viewing monitor?

Answer: No, but see answer to question number three
