For purposes of this section, Return is defined as physical receipt of the F-condition asset at the contractor's facility as reflected in the Action Date entry in the Commercial Asset Visibility (CAV) system. In accordance with the CAV Statement of Work, the contractor is required to accurately report all transactions by the end of the fifth regular business day after receipt and the Action Date entered in CAV must be dated to reflect the actual date of physical receipt. The Contractor must obtain final inspection and acceptance by the Government for all assets within the RTATs established in the subsequent contract. Required RTAT: 90 days after receipt of asset. Throughput Constraint: Contractor must provide a throughput Constraint for each NSN(s). Total assets to be repaired monthly after initial delivery commences X/month (contractor fill in #). 3. REQUIREMENTS

3.1 1.0 GENERAL

3.1.1 This Statement of Work (SOW) establishes the criteria for repair and testing /inspection of the subject item. It includes inspection, component repair and replacement, reassembly and testing procedures required to return units back into a servicable condition.

3.2 2.0 DEFINITIONS.

3.2.1 CONTRACTOR: Is defined as the successful offeror awarded a contract, orderor issued a project work order. The term "contract" encompasses a contract, an order, or a project work order.

3.2.2 OVERHAUL: An overhauled part is one which has been disassembled, cleaned, inspected, repaired as necessary (by replacing or repairing all components which have been found to exceed limits established by the repair/overhaul manual) reassembled and tested in accordance with the approved repair/overhaul manual listed in this SOW and returned to a Ready for Issue (RFI) condition (Refer to contract schedule for items to be overhauled).

3.2.3 REPAIR: A repaired part is one which has been restored to a Ready for Issue(RFI) condition (by replacing or repairing those components found to be defective, broken, damaged or inoperative during the initial evaluation and troubleshooting phase) and tested in accordance with the approved repair/overhaul manual listed in this SOW (Refer to contract schedule for items to be repaired).

3.3 3.0 SCOPE

3.3.1 GENERAL. The items to be furnished hereunder shall be overhauled, upgraded, repaired, tested, inspected, and accepted in accordance with the terms and conditions specified in this contract. Unless expressly provided Government Furnished Property, including equipment such as fixtures, jigs, dies, patterns, mylars, special tooling, special test equipment, or any other manufacturing aid required for the repair, manufacture, and/or testing of the subject item(s) will not be provided by the Government and shall be the responsibility of the contractor. The foregoing applies notwithstanding any reference to such equipment or the furnishing thereof that may be contained in any drawing, manual, or specification for the contract items.

3.3.2 REPAIR UPGRADE REQUIREMENTS: The contractor shall provide the necessary facility, labor, materials, parts, and test and tooling equipment required to to return the following items to a Ready For Issue (RFI) condition:

SHIPPING AND STORAG <(05259) 898E001> P/N, <8145-01-652-7287> NSN, <AG-830AC-MEB-000, work package 00300, General Repair Procedures> Tech Publications

3.3.3 RFI is defined as that condition allowing the items to perform properly and reliably in an operational environment in a manner they were intended to operate. The contractor must perform all repairs/upgrades at the

facility identified within this SOW. Repairs performed by the contractor or subcontractor shall be performed in accordance with the specified drawings and repair manual(s).

3.4 Changes to such manuals used for repairs under this contract, or changes to drawings or specifications used in the manufacture of parts utilized in these repairs, require Procuring Contracting Officer (PCO) approval in accordance with the Configuration Management provisions of this Statement of Work or contract. Under no circumstances should the repair, test, and inspection extend beyond the requirements of this paragraph unless authorized by the Government QAR. In addition, requests for approval of changes to a repair source or repair facility shall be submitted in writing to the PCO prior to making any such change.

3.4.1 Any repairs performed using unapproved changes to such manuals, drawings, specifications, or changes to repair source or facility are done at the contractor's own risk. If the Government disapproves the requested change, the contractor shall replace any delivered items repaired using such unapproved manuals, drawing, specification, repair source or repair facility change. The contractor is not entitled to any equitable adjustment to the contract price or terms based on the Government's disapproval of a requested change to manuals, drawings, specifications, or to a repair source or facility.

3.4.2 References on Drawings and Specifications: For repair and overhaul purposes only. All references to the "prime contractor" or the "actual manufacturer" appearing on the drawings and / or specifications or technical data furnished by the Government shall be read as the "Government Designated Agency"

3.4.3 Process Control Documentation: The contractor shall prepare and maintain repair procedures, and test / inspection information / procedures which shall be made available to the Government for review and approval. The procedures shall include sequential diagrams of processes, as well as the performance specifications to perform the testing / inspection procedures. Those processes shall be frozen after approval of the inspection / Test.

3.4.4 Beyond Economical Repair (BER). An item is BER if the cost of the repair exceeds 75% of the production quantity price to replace the item, current at time of award. This replacement price is for the purposes of BER determinations only, and may not be used or relied on by the offeror in the pricing of the repairs required by this contract. Items determined BER are not included in the contract price. The contractor shall obtain written concurrence from DCMA for all units determined by the contractor to be BER. All such determinations, including the basis for the determination, the repair required, the proposed price to repair and the DCMA written concurrence shall be provided by the contractor to the PCO, with a copy to the inventory manager. After receipt of the required documentation, the PCO shall provide the contractor disposition instructions or contractual authority for repair of the item. The contractor is not authorized to proceed with the repair until notification to proceed is received from the PCO. Any disposal ordered shall be performed by the contractor in accordance with all applicable regulations and in accordance with all DCMA disposal procedures and requirements.

3.4.5 Missing on Induction (MOI). A Weapons Repairable Assembly (WRA) is subject to this MOI provision if the item received by the contractor for repair is missing one or more Shop Replaceable Assemblies (SRAs). Contractor replacement of MOI SRAs is not included in the contract price. The contractor shall immediately notify DCMA when an item is received with MOI SRA(s) and shall obtain written verification from DCMA for all WRAs determined to have MOI SRA(s). The contractor shall provide all such determinations, including identification of the missing SRA(s), and the DCMA written verification, to the Inventory Manager with a copy to the PCO and ACO prior to induction and/or repair of the WRA. The contractor shall not induct and/or repair WRAs with MOI SRAs until instructions on how to proceed are provided to the contractor by the Inventory Manager (where no adjustment price to the contract is required) or by the PCO. Items received by the contractor missing consumable parts are not MOI items. Rather, repair of such items and replacement of the missing consumable parts are included in the contract price and the item shall be inducted and repaired by the contractor under this contract.

3.4.6 Replacing Failed or Missing Shop Replaceable Assembly (SRA) when repairing a Weapons Replaceable Assembly (WRA).

3.4.7 A. When the contractor believes one or more SRA(s) within a WRA are either:

3.4.8 Beyond Economic Repair (BER) or Beyond Repair (BR) i. e. the unit is not capable of being repaired because of the extent of physical damage), or Missing on Induction (MOI), the contractor shall obtain written verification from DCMA and advice from the Inventory Manager whether a SRA may be replaced by one or more of the following options: Ship in place from an existing spares or repair contract, if any, MILSTRIP the SRA(s), otherwise be provided direction for obtaining the SRA(s) at no cost to the contractor. The detailed procedures are set forth in Section 6.0 of the WEB-BASED COMMERCIAL ASSET VISIBILITY (CAV) STATEMENT OF WORK.

3.4.9 B. When not otherwise provided for (or precluded) by other terms of this contract, the contractor may seek written authorization to replace failed SRA(s) with Ready For Issue SRA(s). When authorized, the procedures set forth in paragraph 3.0 of Section 6.2 of the WEB-BASED COMMERCIAL ASSET VISIBILITY (CAV) STATEMENT OF WORK shall be followed.

3.4.10 Over and Above Repair (OAR). An item sent to the contractor shall be considered to require over and above (OAR) repair effort if the repair required is not the type of repair that would be anticipated as a result of normal Navy operation of the item and is not included in the contract pricing due to the nature or scope of the repair needed for that particular item. Therefore, repair of OAR items may be subject to equitable adjustment. The Contractor shall obtain written concurrence from DCMA for all units determined by the contractor to require OAR effort. All such OAR determinations, including the basis for the determination, the repair required, the proposed

price to repair and the DCMA written concurrence, shall be provided by the contractor to the PCO prior to undertaking repair of the item.

After receipt of the required documentation, the PCO shall provide the contractor disposition instructions or contractual authority for repair of the item. Any ordered disposal shall be performed by the contractor in accordance with all applicable regulations and DCMA disposal procedures and requirements.

3.5 4.0 PARTS AND MATERIALS

3.5.1 General. The contractor is responsible for supplying all parts and material necessary to perform the required repairs under this contract unless parts or material are specifically identified as Government Furnished Material (GFM). All parts and material used in performance of this contract shall be in accordance with the latest approved revision of applicable drawings and specifications and shall be new in accordance with FAR 52.211-5, Material Requirements, which is incorporated by reference herein. Authorization to use other than new material as defined by FAR 52.211-5 requires written approval from the PCO. In addition, cannibalization must be approved by the PCO. Cannibalization of units that have not been inducted is not typically authorized and requires specific approval by the PCO.

3.5.2 The contractor shall ensure it has access for the duration of this contract to updated drawings and specifications for parts and material required for repairs performed under this contract. Any change to such parts/material drawings or specifications requires Government approval in accordance with the Configuration Management provisions of this Statement of Work. Written approval from the PCO must be obtained prior to any change to the manufacturing source or manufacturing facility for all parts which require source approval, unless the contractor is the Design Control Agent (DCA) (i.e. the entity responsible for maintaining the latest configuration data) for the contract item. If the contractor is the DCA, the contractor may approve changes to manufacturing source or manufacturing facility for all parts, including those which require source approval. Any repairs performed using unapproved changes to such drawings, specifications or manufacturing source or facility are done at the contractor's own risk. If the Government disapproves the requested change, the contractor shall replace any delivered items repaired using such unapproved change. The contractor is not entitled to any equitable adjustment to the contract price or terms based on the Government's disapproval of a requested change to the drawings, specifications or manufacturing source or facility.

3.5.3 Purchased Material Control and Parts Control. The contractor shall establish and maintain a system of control over purchased parts and material. Such controls shall, at a minimum, assure that the parts and material purchased are in compliance with the requirements of this contract.

3.5.4 Receiving Inspection of Purchased Parts and Material. (1) Purchased items shall be inspected upon receipt at the contractor's facility to assure conformance with all requirements of the applicable drawings and specifications or (2) the contractor shall provide prior to the contract award evidence for Government review and approval of a purchased parts and material system which provides for the inspections to assure conformance with all requirements of the applicable drawings and specifications. Evidence of such inspections of such inspections shall be maintained by the contractor or subcontractor for Government review. The inspection report shall, at a minimum, include a record of all dimensional data (coordinate/positional), material, finish, and process with appropriate pass/fail criteria such as certifications and actual dimensional readings.

3.5.5 ***NOTE***PART CANNIBALIZATION IS NOT AUTHORIZED UNLESS SPECIFICALLY APPROVED BY NAVSUP WSS AND THE BDE.

3.7 5.0 CONTRACTOR QUALITY REQUIREMENTS:

3.7.1 Quality Program. The Contractor shall establish, implement, document and maintain a quality system that ensures conformance to all applicable requirements of ISO 9001/ SAE AS9100. The Contractor's quality management system/program shall be designed to promptly detect, correct and prevent conditions that adversely affect quality.

3.7.2 Calibration System Requirements. Contractor shall maintain a calibration system that meets the requirements of ANSI/NCSL Z540.3, ISO-10012-1 or an equivalent calibration program acceptable to the Government.

3.8 6.0 CONFIGURATION MANAGEMENT (CM):

3.9.1 Marking shall be as indicated in the contract when applicable.

3.10 8.0 STORAGE;

3.10.1 The contractor shall provide a proper enclosed warehouse environment for both material items awaiting repair and assets which have been repaired and are awaiting shipment to ensure the items are not damaged while being stored.

3.11 One third (1/3) unit of desiccant (MIL-D-3464, Type II nondusting) per cubic foot of container interior volume shall be placed in desiccant holder of each container at time of shipment.

3.12 The shock mount listed in the drawing package (whether identified as sole source, recommended, or suggested) has been tested and approved for the shock mitigation system of this container. No other shock mount may be substituted without written permission of Naval Inventory Control Point, Philadelphia unless an alternate is specifically identified in this contract. <No other mount> is an approved alternate mount.

3.13 Reference to Cadmium plating shall be deleted and the following substituted: "Finish shall be electrodeposited alkaline Zinc-Nickel Alloy in accordance with ASTM B 841 Class 1, Type B, Grade 3."

3.14 Welding and welder qualifications shall be in accordance with AWS D1.1 for steel, AWS D1.2 or MIL-W-22248, Class 4 for aluminum, AWS D1.3 for sheet steel and AWS D1.6 for stainless steel. 3.16 MATERIALS AND MATERIALS CONTROL. The quality program shall assure that the materials used in fabrication or processing, i.e., base metals and weld filler material, be inspected and conform to the applicable physical, chemical and other technical requirements (supplier's certification is sufficient).

3.17 CONTROLS. Weld filler materials shall be clearly identified and segregated from each other both when in storage and at the work station. Work station environment shall be controlled to prevent conditions adverse to proper gas shielding.

3.18 CLEANING. Parts to be welded shall be cleaned to remove surface soils such as oils, waxes, grease, inks, etc. except that uninhibited alkaline solutions such as sodium hydroxide shall NOT be used.

3.19 DEOXIDIZING. The cleaned parts shall be chemically deoxidized NO MORE THAN 10 DAYS PRIOR TO WELDING to remove thick surface oxide films. (If the material or work is exposed to an outdoor environment, this time limit shall be reduced to a maximum of 3 days, to account for atmospheric effects.) Mechanical cleaning methods shall be applied just prior to the actual start of welding, to remove any reoxidation or residual thin oxide films.

3.19.1 CHEMICAL TREATMENT. An acid deoxidizing treatment shall be applied by either immersion or brushing/wiping. Deoxidizers acceptable for use shall include nitric acid, sulfuric chromic, phosphoric chromic, or equivalent solutions. Sodium hydroxide solutions shall not be used. Care shall be taken to assure 100% solution coverage of the area to be welded. To allow an adequately sized deoxidized area for good welding, the solution shall be applied to an area extending at least 2 inches from the weld site, or ending at any closer adjacent edge.

3.19.2 MECHANICAL MEANS. Immediately prior to welding, mechanical cleaning methods shall be applied to the weld areas previously chemically treated to assure removal of residual or reformed oxides, if any. Acceptable methods of mechanical cleaning include stainless steel wire brushing, scraping, filing, or sanding. However, abrasives containing iron and its oxides, steel wool and wire, and copper alloy based wire, which may become embedded with galvanically active metals and accelerate corrosion of aluminum alloys shall NOT be used. Mechanical methods shall be vigorous enough to adequately remove any residual oxide films, but gentle enough to avoid forming an excessively rough surface in the comparatively soft metal underneath.

3.20 At faying surfaces, discontinuous welds, or other areas where atmospheric liquids may be retained by capillary action, the crevice shall be sealed using Sealing Compound MIL-S-81733 or equivalent. Welding and welder qualifications shall meet current AWS D1.2 standards. Additionally, cleaning preparations shall be in accordance with MIL-C-5541

1.1 The cognizant Naval Air Systems Command (NAVAIR) Program Manager will maintain configuration control and change authority for all items in this contract.

1.2 In accordance with the configuration management provisions of this contract, the Contractor must maintain the total Equipment baseline configuration of the parts on this contract including, but not limited to, hardware, software and firmware.

NOTE: The latest revisions of the DOD Forms referenced in this term can be found at <https://www.esd.whs.mil/dd>. The latest revisions of the DIDs referenced in this term can be found at <https://quicksearch.dla.mil/>.

2.0 Engineering Changes

2.1 The Government will not be responsible for any contract delay or disruption or any increased costs of performance of the Contractor due to a misclassification of an Engineering Change Proposal (ECP) by the Contractor, including those costs associated with replacement of delivered items resulting from such a misclassification. ECP's are classified as Class I (Major) or Class II (Minor). For detailed classification criteria refer to the DD Form 1692 instructions sheet. ECPs must be prepared in accordance with DI-SESS-80639E, Engineering Change Proposal (ECP).

NOTE: Any ECP or notification of an ECP submitted to the PCO in accordance with this paragraph must also be copied to the NAVSUP WSS CM Team at usn.philadelphia.navsupswwssphil.mbx.configuration-management@us.navy.mil.

2.1.1 Class I (Major) Changes: The Contractor must coordinate with the cognizant NAVAIR Program Office prior to any Class I ECP submission. The Contractor must submit all Class I changes, via the Defense Contract Management Agency (DCMA) Contract Management Office (CMO) and the Procurement Contracting Officer (PCO), to the cognizant NAVAIR Program Office for approval or disapproval. The Contractor must notify the PCO of any pending or approved Class I engineering changes with another Government activity that the Contractor proposes to incorporate under this contract. The cognizant NAVAIR Program Office will approve or disapprove of all Class I changes. Any approved Class I change may necessitate contract changes by the contracting officer, which changes may be handled under the Changes clause of this contract, FAR 52.243-1. The Contractor must not implement a Class I change on this contract until a contract modification is issued by the PCO.

2.1.2 Class II (Minor) Changes: Any Class II change involving a Critical Safety Item (CSI) must be submitted to the PCO for NAVAIR Program Office approval unless NAVAIR has delegated approval authority to the cognizant DCMA CMO. For Class II changes to items without a criticality determination, the items will be considered CSI for the purposes of processing in accordance with this paragraph. Class II changes related to non-CSI's must be submitted to the

WSSTERMCZ01 (CONT)

2.2 The Contractor is not entitled to any equitable adjustment to the contract price or terms based on the Government's disapproval of a Class I or Class II ECP.

3.0 Variances

3.1 The Contractor must not deliver any item for acceptance by the Government that incorporates a known departure from product definition information unless a Request for Variance (RFV) has been approved. Authorized variances are a temporary departure from the requirements only and do not authorize a change to the item's approved configuration. RFV's are classified as Critical, Major, or Minor. For detailed classification criteria refer to the DD Form 1694 instructions sheet. Any variance requests to CSI's must be classified as major, at a minimum. For variances to items without a criticality determination, the items will be considered CSI for the purposes of processing and classified as a major, at a minimum. Variance requests shall be prepared in accordance with DI-SESS-80640E - Request for Variance (RFV).

NOTE: Any RFV submitted to the PCO in accordance with this paragraph must also be submitted to the NAVSUP WSS RFV Review Team at usn.philadelphia.navsupsphil.mbx.rfv-review-team@us.navy.mil.

NOTE: Should a variance be discovered after product delivery, the Contractor must notify the PCO and NAVSUP WSS Quality (NOE_N22@us.navy.mil).

3.1.1 Critical/Major Variances: The Contractor must submit all critical/major variance requests, via the DCMA CMO and the PCO, to the cognizant NAVAIR Program Office for approval or disapproval. All approved critical/major variances require a contract modification by the PCO prior to final inspection and acceptance of the items.

3.1.2 Minor Variances: For minor RFVs, delivery and/or shipment of such items under this contract is not permitted until approved by the cognizant DCMA CMO.

3.2 The Contractor is not entitled to any equitable adjustment to the contract price or terms based on the Government's disapproval of a critical, major, or minor variance.

PRESERVATION, PACKAGING, PACKING AND MARKING

The contractor shall preserve, package, pack and mark all items as cited below. Where specifications or standards are cited herein the latest revision of that specification shall apply.

1. PRESERVATION REQUIREMENTS

a. SYSTEM STOCK SHIPMENTS - The contractor shall preserve all items intended to enter the military distribution system for stock in accordance with the MIL-STD-2073-1, "Standard Practice for Military Packaging", Packaging Requirements Code specified in Section B, Part I of the Schedule. When a Specialized Preservation Code/Method of Preservation (MOP) (Table J-1a) is specified, and one or more of the following packaging fields (WM, CUD, CT, UC) value is a 00 (numeric), the Specialized Preservation/MOP procedure and materials takes precedence. Contractors should disregard the LP field and third digit of the PACK field and use the Unit Container Level (UCL) to identify the level of packing protection the unit container meets for packing requirements. When HM = D, the item is regulated in accordance with Title 49 Code of Federal Regulations (CFR); when HM = N the item is not regulated for transportation.

1) When a specified packaging material has an associated Qualified Products List (QPL), the contractor shall use only packaging materials produced by a manufacturer listed on the applicable QPL. Barrier materials that have QPLs are MIL-PRF-131, MIL-PRF-81705, MIL-PRF-22191, MIL-PRF-3420 and MIL-PRF-22019. Sources for QPL material can be obtained from the Qualified Products Database at <http://qpldocs.dla.mil/>.

b. IMMEDIATE USE/INSTALLATION AND PART NUMBER BUY SHIPMENTS - Government PCO or ACO approval is required to use the packaging standards outlined in this paragraph. Any national stock numbered (NSN) item required for immediate use (used or consumed within 7 days of receipt) or direct installation, or part numbered item (authority granted to ship without NSN) shall be preserved and packed in accordance with ASTM D3951-18 (2023), "Standard Practice for Commercial Packaging", for all shipments to a Continental United States (CONUS) government activity or contractor-owned facility. All material destined for overseas shipment (OCONUS) shall be preserved in accordance with MIL-STD-2073-1.

c. GOVERNMENT-OWNED MATERIAL - In the event that the contract expires, is terminated, or completed, and Government-owned material is to be returned to the supply system, the contractor shall preserve and package this material in accordance with the requirements of paragraph 1.a.

2. PROTECTION FROM DEGRADATION DUE TO ELECTROSTATIC (ES)/ELECTROMAGNETIC (EM) FORCES

a. When ASTM D3951-18 (2023), is authorized for packaging and the item is considered Electrostatic Discharge Sensitive (ESDS), protection shall be in accordance with ANSI/ESD S20.20-2021, "For the Development of an ESD Control Program for - Protection of Electrical and Electronic Parts, Assemblies and Equipment (Excluding Electrically Initiated Explosive Devices)."

b. When MIL-STD-2073-1 is specified and the preservation method code (PMT) in the solicitation does not specify ESD/EM protection (PMT = GX) and the contractor's proposed item of supply is subject to degradation from ES/EM forces, contractors shall provide recommended packaging data with their proposals/quotes.

Domestic Shipments (CONUS): Level B

Overseas Shipments (OCONUS) (including Navy ships at sea):

Via air, FPO, APO Level B

Via freight forwarder Level B

Via surface Level A

Exterior shipping containers for Packing Levels A and B are listed in MIL-STD-2073-1, Appendix C, Table C.II. Long-life reusable containers, and wood containers are shipping containers which do not require overpacking for shipment.

4. MARKING REQUIREMENTS - All unit, intermediate and shipping containers shall be marked in accordance with MIL-STD-129. In addition, the following specific requirements apply:

a. ADDITIONAL MARKING FOR SPARES ONLY - Each MIL-STD-129 label shall also include the following:

- 1) Procurement Instrument Identifier (PIID) - the 13-digit contract order number,
- 2) Contract Line Item Number (CLIN) - the 4-digit individual line item number (e.g. 0001, 0002, etc.), and
- 3) SubCLIN - the 6-digit sub line item number (e.g. 0001AA, 0001AB, 0002AA, 0002AB, etc.).

b. DEPOT LEVEL REPAIRABLE (DLR) LABELS

1) Items identified with a Cognizance (COG) Code of either "7" or an even number preceding the NSN, excluding 6A, 6H and 6X COGs (e.g. 7RH 5826-014289999), are defined as Depot Level Repairable (DLR) items. DLR items require that a DLR label be placed on the outside of the unit, intermediate and shipping containers as close to the bar code label as possible.

EXCEPTION: When a DLR item requires use of both a reusable inner unit container and a reusable outer shipping and storage container (excluding wood and fiberboard), only the inner unit container shall be affixed with a DLR label. In these cases only, DLR labels shall NOT be placed on the outer reusable container.

2) Labels are available via the Naval Forms Online website: <https://forms.documentservices.dla.mil/order/>. The website will advise the procedures for ordering and establishing an account.

3) NAVSUP WSS authorizes contractors to create and print their own DLR labels.

Labels shall follow the standard size and font options listed in below chart. Text shall be in all upper case letters of the same style font. The label used shall be sized proportionate to the size of the container. Labels shall be horizontally printed and consist of yellow "DLR" text font on a solid blue background. Labels shall meet requirements of MIL-STD-129 section 4.2.2. Labels shall be of a water-resistant grade of paper, film, or plastic, coated on one side with water-insoluble, permanent type adhesive. The adhesive shall adhere to metal, plastic, aluminum or fiberboard surfaces under high and low temperatures. Labels shall have a finish suitable for printing and writing on with ink without feathering or spreading, be capable of withstanding normal handling and storage conditions, and remain securely in position. Application specific performance criteria and durability requirements to ensure functionality in various climatic environments should be tailored, if required, using MIL-PRF-61002. MIL-PRF-61002 can be used as an acquisition tool when labels presently being used are not performing satisfactorily or when new conditions or applications require special label stock for those particular situations.

b. Failure to comply with the requirements of ISPM 15 may result in refusal of the shipment, destruction or corrective treatment of WPM at the point of receipt and the associated costs charged back to the contractor.

7. NAVY SHELF LIFE PROGRAM. Navy shelf-life requirements are listed under the item description in a 3-digit alpha/numeric code. Position one (1) is the DOD shelf-life code, defining the type of shelf-life for an item (Type I, non-extendible or Type II, extendible), and the number of months an item can remain ready for issue in a Navy specified package. Positions two (2) and three (3) combined form the Navy-unique shelf-life action codes used by storage activities, and do not impose any requirements on the contractor. The contractor shall use the applicable shelf-life paragraphs and table in MIL-STD-129 to apply either Type I or Type II shelf-life markings to an item's unit, intermediate and shipping containers. Contractors will ensure that at least eighty-five percent (85%) of the Navy shelf-life requirement is remaining when received by the first government activity.

(2) If correction or replacement is required and transportation of supplies in connection with correction or replacement is necessary, transportation charges and responsibility for the supplies while in transit shall be borne by the Government.

(4) If the Contractor does not agree as to responsibility to correct or replace the supplies delivered, the Contractor shall nevertheless proceed in accordance with the written request issued by the Contracting Officer under paragraph (c)(2) of this clause to correct or replace the defective or nonconforming supplies. In the event it is later determined that the supplies were not defective or nonconforming within the terms and conditions of this clause, the contract price will be equitably adjusted.

(< >) Alternate IV (Apr 1984). If a fixed-price incentive contract is contemplated, add a paragraph substantially the same as the following paragraph(c)(6) to the basic clause:

(6) All costs incurred or estimated to be incurred by the Contractor in complying with this clause shall be considered when negotiating the total final price under the Incentive Price Revision clause of this contract. After establishment of the total final price, Contractor compliance with this clause shall be at no increase in the total final price. Any equitable adjustment made under paragraph (c)(2) of this clause shall be governed by the paragraph entitled "Equitable Adjustments Under Other Clauses" in the Incentive Price Revision clause of this contract.

(< >) Alternate V (Apr 1984). If it is anticipated that recovery of the warranted item will involve considerable Government expense for disassembly and/or reassembly of larger items, add a paragraph substantially the same as the following paragraph (c)(6) to the basic clause. Redesignate the additional paragraph as "(c)(7)" if Alternate IV is also being used.

(6) The Contractor shall be liable for the reasonable costs of disassembly and/or reassembly of larger items when it is necessary to remove the supplies to be inspected and/or returned for correction or replacement.

(e) The small business size standard for a Contractor providing an end item that it does not manufacture, process, or produce itself, for a contract other than a construction or service contract, is 500 employees, or 150 employees for information technology value-added resellers under NAICS code 541519, if the acquisition-

(1) Was set aside for small business and has a value above the simplified acquisition threshold;

(2) Used the HUBZone price evaluation preference regardless of dollar value, unless the Contractor waived the price evaluation preference; or

(3) Was an 8(a), HUBZone, service-disabled veteran-owned, economically disadvantaged women-owned, or women-owned small business set-aside or sole-source award regardless of dollar value.

(f) Except as provided in paragraph (h) of this clause, the Contractor shall make the representation(s) required by paragraph (b) and (c) of this clause by validating or updating all its representations in the Representations and Certifications section of the System for Award Management (SAM) and its other data in SAM, as necessary, to ensure that they reflect the Contractor's current status. The Contractor shall notify the contracting officer in writing within the timeframes specified in paragraph (b) of this clause, or with its offer for an order (see paragraph (c) of this clause), that the data have been validated or updated, and provide the date of the validation or update.

"Month of award" means the month in which the Contracting Officer signs a contract or the month in which the Contractor signs a first-tier subcontract.

"Total compensation" means the cash and noncash dollar value earned by the executive during the Contractor's preceding fiscal year and includes the information described at 17 CFR 229.402(c)(2).

L. 109-282), as amended by section 6202 of the Government Funding Transparency Act of 2008 (Pub. L. 110-252), requires the Contractor to report information on subcontract awards. The law requires all reported information be made public; therefore, the Contractor is responsible for notifying its subcontractors that the required information will be made public. Nothing in this clause requires disclosing classified information.

(c) Reporting. Unless otherwise directed by the Contracting Officer, or as provided in paragraph (f) of this clause, the Contractor shall report the following in the System for Award Management at <https://www.sam.gov> as follows:

(To determine if the public has access to the compensation information, see the U.S. Security and Exchange Commission total compensation filings at <http://www.sec.gov/answers/execomp.htm>.)
- (2) First-tier subcontract information. The Contractor shall report the following information by the end of the month following the month of award of each first-tier subcontract award:

 - (i) In the subcontractor's preceding fiscal year, the subcontractor Received-

systems. To provide adequate security, the Contractor shall implement, at a minimum, the following information security protections:

(1) For covered contractor information systems that are part of an Information Technology (IT) service or system operated on behalf of the Government, the following security requirements apply:

(i) Cloud computing services shall be subject to the security requirements specified in the clause 252.239-7010, Cloud Computing Services, of this contract.

(ii) Any other such IT service or system (i.e., other than cloud computing) shall be subject to the security requirements specified elsewhere in this contract.

(2) For covered contractor information systems that are not part of an IT service or system operated on behalf of the Government and therefore are not subject to the security requirement specified at paragraph (b)(1) of this clause, the following security requirements apply:

(i) Except as provided in paragraph (b)(2)(ii) of this clause, the covered contractor information system shall be subject to the security requirements in National Institute of Standards and Technology (NIST) Special Publication (SP) 800-171, "Protecting Controlled Unclassified Information in Nonfederal Information Systems and Organizations" Revision 2 (available via the internet at <http://nvlpubs.nist.gov/nistpubs/SpecialPublications/NIST.SP.800-171r2.pdf>).

(ii)(A) The Contractor shall implement NIST SP 800-171, as soon as practical, but not later than December 31, 2017. For all contracts awarded prior to October 1, 2017, the Contractor shall notify the DoD Chief Information Officer (CIO), via email at osd.dibcsia@mail.mil, within 30 days of contract award, of any security requirements specified by NIST SP 800-171 not implemented at the time of contract award.

(B) The Contractor shall submit requests to vary from NIST SP 800-171 in writing to the Contracting Officer, for consideration by the DoD CIO. The Contractor need not implement any security requirement adjudicated by an authorized representative of the DoD CIO to be nonapplicable or to have an alternative, but equally effective, security measure that may be implemented in its place.

(C) If the DoD CIO has previously adjudicated the contractor's requests indicating that a requirement is not applicable or that an alternative security measure is equally effective, a copy of that approval shall be provided to the Contracting Officer when requesting its recognition under this contract.

(D) If the Contractor intends to use an external cloud service provider to store, process, or transmit any covered defense information in performance of this contract, the Contractor shall require and ensure that the cloud service provider meets security requirements equivalent to those established by the Government for the Federal Risk and Authorization Management Program (FedRAMP) Moderate baseline (<https://www.fedramp.gov/documents-templates/>) and that the cloud service provider complies with requirements in paragraphs (c) through (g) of this clause for cyber incident reporting, malicious software, media preservation and protection, access to additional information and equipment necessary for forensic analysis, and cyber incident damage assessment.

(3) Apply other information systems security measures when the Contractor reasonably determines that information systems security measures, in addition to those identified in paragraphs (b)(1) and (2) of this clause, may be required to provide adequate security in a dynamic environment or to accommodate special circumstances (e.g., medical devices) and any individual, isolated, or temporary deficiencies based on an assessed risk or vulnerability. These measures may be addressed in a system security plan.

(c) Cyber incident reporting requirement.

(1) When the Contractor discovers a cyber incident that affects a covered contractor information system or the covered defense information residing therein, or that affects the contractor's ability to perform the requirements of the contract that are designated as operationally critical support and identified in the contract, the Contractor shall-

(i) Conduct a review for evidence of compromise of covered defense information, including, but not limited to, identifying compromised computers, servers, specific data, and user accounts. This review shall also include analyzing covered contractor information system(s) that were part of the cyber incident, as well as other information systems on the Contractor's network(s), that may have been accessed as a result of the incident in order

to identify compromised covered defense information, or that affect the Contractor's ability to provide operationally critical support; and

(ii) Rapidly report cyber incidents to DoD at <https://dibnet.dod.mil>.

(2) Cyber incident report. The cyber incident report shall be treated as information created by or for DoD and shall include, at a minimum, the required elements at <https://dibnet.dod.mil>.

(3) Medium assurance certificate requirement. In order to report cyber incidents in accordance with this clause, the Contractor or subcontractor shall have or acquire a DoD-approved medium assurance certificate to report cyber incidents. For information on obtaining a DoD-approved medium assurance certificate, see <https://public.cyber.mil/eca/>.

(d) Malicious software. When the Contractor or subcontractors discover and isolate malicious software in connection with a reported cyber incident, submit the malicious software to DoD Cyber Crime Center (DC3) in accordance with instructions provided by DC3 or the Contracting Officer. Do not send the malicious software to the Contracting Officer.

(e) Media preservation and protection. When a Contractor discovers a cyber incident has occurred, the Contractor shall preserve and protect images of all known affected information systems identified in paragraph (c)(1)(i) of this clause and all relevant monitoring/packet capture data for at least 90 days from the submission of the cyber incident report to allow DoD to request the media or decline interest.

(f) Access to additional information or equipment necessary for forensic analysis. Upon request by DoD, the Contractor shall provide DoD with access to additional information equipment that is necessary to conduct a forensic analysis.

(g) Cyber incident damage assessment activities. If DoD elects to conduct a damage assessment, the Contracting Officer will request that the Contractor provide all of the damage assessment information gathered in accordance with paragraph (e) of this clause.

(h) DoD safeguarding and use of contractor attributional/proprietary information. The Government shall protect against the unauthorized use or release of information obtained from the contractor (or derived from information obtained from the contractor) under this clause that includes contractor attributional/proprietary information, including such information submitted in accordance with paragraph (c). To the maximum extent practicable, the Contractor shall identify and mark attributional/proprietary information. In making an authorized release of such information, the Government will implement appropriate procedures to minimize the contractor attributional/proprietary information that is included in such authorized release, seeking to include only that information that is necessary for the authorized purpose(s) for which the information is being released.

(i) Use and release of contractor attributional/proprietary information not created by or for DoD. Information that is obtained from the contractor (or derived from information obtained from the contractor) under this clause that is not created by or for DoD is authorized to be released outside of DoD—

- (1) To entities with missions that may be affected by such information;
- (2) To entities that may be called upon to assist in the diagnosis, detection, or mitigation of cyber incidents;
- (3) To Government entities that conduct counterintelligence or law enforcement investigations;
- (4) For national security purposes, including cyber situational awareness and defense purposes (including with Defense Industrial Base (DIB) participants in the program at 32 CFR part 236); or
- (5) To a support services contractor ("recipient") that is directly supporting Government activities under a contract that includes the clause at 252.204-7009, Limitations on the Use or Disclosure of Third-Party Contractor Reported Cyber Incident Information.

(j) Use and release of contractor attributional/proprietary information created by or for DoD. Information that is obtained from the contractor (or derived from information obtained from the contractor) under this clause that is created by or for DoD (including the information submitted pursuant to paragraph (c) of this clause) is authorized to be used and released outside of DoD for purposes and activities authorized by paragraph (i) of this clause, and for any other lawful Government purpose or activity, subject to all applicable statutory, regulatory, and policy based restrictions on the Government's use and release of such information.

(k) The Contractor shall conduct activities under this clause in accordance with applicable laws and regulations on the interception, monitoring, access, use, and disclosure of electronic communications and data.

(l) Other safeguarding or reporting requirements. The safeguarding and cyber incident reporting required by this clause in no way abrogates the Contractor's responsibility for other safeguarding or cyber incident reporting pertaining to its unclassified information systems as required by other applicable clauses of this contract, or as a result of other applicable U.S. Government statutory or regulatory requirements.

(m) Subcontracts. The Contractor shall--

(1) Include this clause, including this paragraph (m), in subcontracts, or similar contractual instruments, for operationally critical support, or for which subcontract performance will involve covered defense information, including subcontracts for commercial products or commercial services, without alteration, except to identify the parties. PART IV - REPRESENTATIONS AND INSTRUCTIONS
SECTION M
EVALUATION FACTORS FOR AWARD

252.204-7024**NOTICE ON THE USE OF THE SUPPLIER PERFORMANCE RISK SYSTEM (MAR 2023)**

(a) Definitions. As used in this provision-

Item risk means the probability that a product, based on intended use, will introduce performance risk resulting in safety issues, mission degradation, or monetary loss.

Price risk means a measure of whether a proposed price for a product or service is consistent with historical prices paid for that item or service.

Supplier risk means the probability that an award may subject the procurement to the risk of unsuccessful performance or to supply chain risk (see Defense Federal Acquisition Regulation Supplement 239.7301).

(b) The Supplier Performance Risk System (SPRS), available at <https://piee.eb.mil/>, will be used in the evaluation of the Quoter or Offeror's performance. SPRS retrieves item, price, quality, delivery, and contractor information on contracts from Government reporting systems in order to develop risk assessments.

(c) The Contracting Officer will consider SPRS risk assessments during the evaluation of quotations or offers received in response to this solicitation as follows:

- (1) Item risk will be considered to determine whether the procurement represents a high performance risk to the Government.
- (2) Price risk will be considered in determining if a proposed price is consistent with historical prices paid for a product or a service or otherwise creates a risk to the Government.
- (3) Supplier risk, including but not limited to quality and delivery, will be considered to assess the risk of unsuccessful performance and supply chain risk.

(d) SPRS risk assessments are generated daily. Quoters or Offerors are able to access their risk assessments by following the access instructions in the SPRS user's guide available at <https://www.sprs.csd.disa.mil/reference.htm>. Quoters and Offerors are granted access to SPRS for their own risk assessment classifications only. SPRS reporting procedures and risk assessment methodology are detailed in the SPRS user's guide. The method to challenge a rating generated by SPRS is also provided in the user's guide. SPRS evaluation criteria are available at https://www.sprs.csd.disa.mil/pdf/SPRS_DataEvaluationCriteria.pdf

(e) The Contracting Officer may consider any other available and relevant information when evaluating a quotation or an offer.

WSSTERMMZ01**EVALUATION CRITERIA AND BASIS FOR AWARD - SINGLE AWARD (NAVSUPWSS)**

The Government intends to make a single award to the eligible, responsible, technically acceptable offeror whose offer, conforming to the solicitation, is determined most advantageous to the Government, price and past performance considered. The offeror's proposal shall be in the form prescribed by, and shall contain a response to each of the area identified in the Section L solicitation provision entitled "Submission of Quotations" or "Submission of

WSSTERMMZ01 (CONT)**EVALUATION CRITERIA AND BASIS FOR AWARD - SINGLE AWARD (NAVSUPWSS)**

Proposals." Only those proposals prepared in accordance with the solicitation will be evaluated. The evaluation will consider past performance as more important than price. The Government reserves the right to award the contract to other than the lowest priced offer.

(1) Past Performance. The Government will evaluate the quality of the offeror's past performance. This evaluation is separate and distinct from the Contracting Officer's responsibility determination. The assessment of the offeror's past performance will be used as a means of evaluating the relative capability of the offeror and other competitors to successfully meet the requirements of the solicitation.

The Government reserves the right to obtain information for use in the evaluation of past performance from any and all sources including sources outside of the Government. Offerors lacking relevant past performance history will receive a neutral rating for past performance. However, the quotation/proposal of an offeror with no relevant past performance history, while rated neutral in past performance, may not represent the most advantageous quote/proposal to the Government and thus, may be an unsuccessful proposal when compared to the quotes/proposals of other offerors. The offeror must provide the information requested in the provision entitled "Submission of Quotations" or "Submission of Proposals" in Section L of the solicitation, or affirmatively state that it possesses no relevant directly-related or similar past performance. An offeror failing to provide the past performance information or to assert that it has no relevant directly-related or similar past performance will be considered ineligible for award.

The Government, in addition to other information received, may utilize the DoD Supplier Performance Risk System (SPRS) program to evaluate past performance (refer to DFARS Case 2019-D009). The Government will consider SPRS data for the Federal Supply Classes (FSC) of all items included in this procurement. Based on comparisons among suppliers in a specific FSC group, SPRS sorts suppliers into color ratings representing the supplier's overall quality performance based on the following indices:

;	COLOR	POSITION
	Dark Blue	Top 5% of suppliers in FSC group
	Purple	Next 10% of suppliers in FSC group
	Green*	Next 70% of suppliers in FSC group
	Yellow	Next 10% of suppliers in FSC group
	Red	Bottom 5% of suppliers in FSC group

(2) Price. Price is a secondary factor after past performance.

(04-22)

WSSTERMMZ04**EVALUATION FOR AWARD (LOWEST PRICED TECHNICALLY ACCEPTABLE)**

Award will be made to the responsible offeror submitting the lowest priced, technically acceptable offer. A technically acceptable offer is one in which the offeror complies with the instructions contained in Section L of the solicitation and does not take exception, nor object, to any of the terms of this solicitation. Offers that are not technically acceptable will not be considered for award. (10-01)
