

Professional Service Contract
NAVFAC Atlantic Area of Responsibility

1. General Contract Requirements

- 1.1. The Contractor shall provide professional support services to the Government within the Naval Facilities Engineering Systems Command (NAVFAC) Atlantic Area of Responsibility (AOR). The primary work sites will be in Portsmouth, VA and Kittery, ME; , though work may also be performed remotely or at other locations as directed.
- 1.2. The Contractor shall be directly responsible for ensuring the accuracy, timeliness and completion of all tasks under this effort. The Contractor shall be responsible for providing technically qualified personnel to perform the work specified in this PWS.
- 1.3. The Contractor shall provide oversight, management, and administration of all Contractor staff, and as such, shall direct the efforts of all contracted employees in response to the contract and task order, work requirements and administrative support needs of the respective components given. This includes addressing all Community Management, Human Resource needs, planning and coordinating leave, and conducting employee reviews and appraisals.
- 1.4. The Government reserves the right to review resumes and portfolios of work, employee reviews and appraisals of proposed Contractor personnel. The work history of each Contractor employee must contain experience directly related to the task and function he/she is intended to perform under this contract. The Government reserves the right, during the life of this contract, to request the work history of a Contractor employee for the purpose of verifying compliance with the requirements of the contract.
- 1.5. This contract is for professional support services to NAVFAC Atlantic in the form of advisory and assistance services. Such services will not include tasks that would be subject to FAR Part 36 or the Selection of Architects and Engineers Statute (formerly The Brooks Act).
- 1.6. Type of Contract: Indefinite Delivery/Indefinite Quantity (IDIQ) contract, with non-recurring services.
- 1.7. Labor Standards: The work under the contract shall be performed in accordance with the PWS, with the majority of the positions listed herein considered "professional employees," which are exempted from the labor standards prescribed by the Department of Labor (DOL) under the Service Contract Labor Standards (SCLS), referenced herein as the Service Contract Act (SCA), as indicated on the DOL website. SCA non-exempted labor category: Administrative Assistant and Engineering Technician (General). This contract incorporates the SCA Wage Determinations, based on the planned locations for contractor employee positions to be based. Other locations may be added later through a modification. With the award of each option period, new SCA wage determinations will be incorporated into the contract. The Contractor will have thirty (30) calendar days to request compensation for any wage adjustment increase.
- 1.8. Standard Execution Procedures: NAVFAC Atlantic is the procuring and administering office and is responsible for all contractual matters related to this contract, including task orders, any modifications, and invoices.

2. Background

- 2.1. As an integral part of the NAVFAC enterprise, NAVFAC Atlantic is the Navy's installation facility experts, managing the planning, design, and construction of shore facilities for the U.S. Navy throughout the AOR. Headquartered in Norfolk, Virginia, NAVFAC Atlantic's mission is to enable and enhance Navy combat power by providing the most effective, efficient, and cost wise shore services and support.

3. Objective

- 3.1. The purpose of this contract is to acquire contractor services in support of NAVFAC Atlantic's cost-wise shore services and support. The objective of this contract is to procure professional support services, as described herein, and identified with the issuance of individual task orders.

4. Scope of Work

- 4.1. This contract is a "non-personal services contract" as defined in FAR 37.101. It does not create employment rights with the U.S. Government, whether actual, inherent, or implied. By agreeing to perform the services described in these specifications, the contractor acknowledges that he/she is not an employee of the U.S. Government and shall not be presented as such.
- 4.2. It is, therefore, understood and agreed that the Contractor and/or the Contractor's employees: (1) shall perform the tasks and services specified herein as independent contractors, not as employees of the government; (2) shall be responsible for their own management and administration of the work required and bear sole responsibility for complying with any and all technical, schedule, or financial requirements or constraints attendant to the performance of this contract; (3) shall be free from supervision or control by any government employee with respect to the manner or method of performance of the services specified; but (4) shall, pursuant to the government's right and obligation to inspect, accept or reject the work, comply with such general direction of the Contracting Officer Representative (COR), or designated Installation Representative as is necessary to ensure accomplishment of the contract objectives and has the right of refusal of deliverables at the installation level.
- 4.3. This is a Performance-Based Firm Fixed Price Contract. This contract is to provide on-site and potentially off-site personnel support services in support of all Navy and Marine Corps installations located within the NAVFAC enterprise to include OCONUS locations and supported commands.
- 4.4. The contractor is required to provide professional support services, as described herein, under the following positions that may be required on individual Task Orders:
 - 4.4.1. Administrative Assistant
 - 4.4.2. Acoustician/Acoustical Engineer
 - 4.4.3. Architect Technician
 - 4.4.4. Architect
 - 4.4.5. Architect - Senior
 - 4.4.6. Business Analyst
 - 4.4.7. CAD/BIM Manager
 - 4.4.8. Extreme Weather Hazards and Geological Hazards Resilience Specialist
 - 4.4.9. Civil Engineer
 - 4.4.10. Civil Engineer - Senior
 - 4.4.11. Civil (Structural) Engineering Technician
 - 4.4.12. Civil Engineer (Structural)
 - 4.4.13. Civil Engineer (Structural) – Senior
 - 4.4.14. Construction Scheduler
 - 4.4.15. Construction Scheduler – Senior
 - 4.4.16. Construction Engineering Technician
 - 4.4.17. Construction Engineering Technician 2nd Shift
 - 4.4.18. Construction Manager
 - 4.4.19. Construction Support Cost Engineer
 - 4.4.20. Cost Engineer
 - 4.4.21. Electrical Engineering Technician
 - 4.4.22. Electrical Engineer
 - 4.4.23. Electrical Engineer – Senior
 - 4.4.24. Fire Protection Engineer Technician

- 4.4.25. Fire Protection Engineer
 - 4.4.26. Fire Protection Engineer – Senior
 - 4.4.27. General Engineer
 - 4.4.28. General Engineer - Senior
 - 4.4.29. Geotechnical Engineer
 - 4.4.30. Geotechnical Engineer – Senior
 - 4.4.31. GIS Analyst
 - 4.4.32. Instructional Design Project Manager
 - 4.4.33. Interior Designer
 - 4.4.34. Landscape Architect
 - 4.4.35. Landscape Architect - Senior
 - 4.4.36. Mechanical Engineering Technician
 - 4.4.37. Mechanical Engineer
 - 4.4.38. Mechanical Engineer – Senior
 - 4.4.39. Motion Graphics Designer/Animator
 - 4.4.40. Planner
 - 4.4.41. Program Analyst
 - 4.4.42. Project Risk Analysis
 - 4.4.43. SharePoint & Power Platform Developer
 - 4.4.44. Strategic Planner
- 4.5. Contractor personnel will support multiple design and/or construction projects between award and the subsequent sixty (60) months, subject to the exercise of the option periods.
- 4.6. Contractor personnel are required in order to execute the planning, design, and construction requirements. Projects are located throughout NAVFAC enterprise to include CONUS and OCONUS locations.
- 4.7. Predominantly, the Projects will be located in the NAVFAC Atlantic Area of Responsibility, however, task may occur worldwide.
- 4.8. Type of Work: Positions can support multiple design and/or construction projects ranging typically with an estimated construction cost of \$5 - \$500 million.
- 4.8.1. Positions can be assigned to projects in different phases of project execution. Taskings will range from concept development, plan review and recommendations, facility or utility design, construction support management, and inspection services. Contractor will staff projects with or without NAVFAC designers; however, ultimate design decisions will be made by the NAVFAC Project Manager and/or Design Manager. Contracted positions may be tasked to review and provide input on conceptual designs (<15% design), charrettes, designs at 35%, 50%, Pre-Final and Final, submittals, shop drawings and documents prepared by NAVFAC personnel, NAVFAC contracted A&E design firms, or development of design.
- 4.9. Location of Desk Work: The primary work sites will be in Portsmouth, VA and Kittery, ME; though work may also be performed remotely or at other locations as directed. The breakdown of required positions and locations shall be detailed in individual task orders.
- 4.9.1. Contractor personnel may be co-located with NAVFAC design professionals for the execution of Projects. Other desk locations may be identified during the term of this contract.
 - 4.9.2. NAVFAC Atlantic shall provide all work space requirements associated with the positions that are not designated to be remote. Location of Desk Work is subject to change in the event the Government issues a change via contract modification and task orders.

- 4.10. Onboarding & Duration of Positions: All positions required via task order shall be onboarded within 30 days. However, the Contractor shall work with the Government to onboard all Contractor employees as soon as possible, upon completion of the CAC and onboarding process for each Contractor employee. Renewal of each position will be subject to issuance of task orders by the Government.
- 4.11. Services provided under this contract must meet the following performance qualifications and requirements for each position. The contractor shall be responsible for ensuring that contractor employees are fully trained and competent to perform in the requested positions at the required level specified herein. The background requirements, duties and responsibilities of contractor employees are outlined below by position title.
- 4.11.1. All staff will be responsible for executing project schedules safely, within budgets, and in conformance with project and customer requirements. This includes coordination with other team members to assure schedules, cost estimates and strategies are accurate and executable. Contractor staff will assist in the preparation of project and contract modification cost estimates, working with available cost estimation tools as well as independent research and utilizing professional experience. The contractor shall also perform evaluations of technical proposals and provide recommendations.
- 4.11.2. All staff shall have working level knowledge of the Microsoft Office Software Suite. Positions shall have a strong understanding utilizing and applying discipline specific criteria and tools such as DoD Unified Facilities Criteria (UFC), Building Code Analysis, AutoCAD, Revit, SpecsIntact, and cost estimating software for the construction of facilities from design documentation.
- 4.11.3. Contractor staff will assist in the preparation of project and contract modification cost estimates, working with available cost estimation tools as well as independent research and utilizing professional experience.
- 4.11.4. Contractor staff shall have experience coordinating with all engineering/design disciplines, programming, scheduling, planning, design and construction related matters from "cradle to grave," and required actions to coordinate delivery of individual projects, packages and complexes. Contractor staff shall have experience coordinating with customers and sponsor commands, integrating requirements into the overall project execution, and reporting project status to NAVFAC Atlantic. All staff will be responsible for executing project schedules within budgets.
- 4.11.5. Contractor staff shall review plans, specifications, cost estimates, project documents and reports submitted by A&E firms for technical adequacy, completeness, functional design, sound engineering practice, compliance with NAVFAC and DOD criteria and all applicable codes. Supports the Government as the final authority on scope compliance and directs the A&E firm to correct deficiencies unless challenged by the contract A&E of record. Contractor staff shall ensure that the final submittals are complete and satisfactory.
- 4.11.6. Contractor staff shall initiate field trips to project site during scoping, design and construction. Interfaces with customer and other interested parties providing expert consultation and gathering pertinent information required to complete project. Contractor staff shall inspect existing conditions of a site and of a facility to gather information. Reviews for Government approval contractor's materials, submittals, shop drawings, and schedules to ensure they conform to the requirements of the contract documents and when necessary, visits construction sites to provide advice to the Government on problems arising during construction.
- 4.11.7. Cellular Communications: Portable cellular phones with service in the designed work area for communication with or by NAVFAC Atlantic and other designated personnel without additional cost to the Government.

5. Statement of Work by Position

5.1. Administrative Assistant

5.1.1. Performance Requirements and Qualifications

- 5.1.1.1. High school diploma or equivalent is required, college degree is preferred.
- 5.1.1.2. A minimum of 5 years of work experience in an office environment is required.
- 5.1.2. Knowledge and Skills Required
 - 5.1.2.1. Knowledge of the NAVFAC's mission, vision, functions, along with ability to develop a thorough understanding of the Senior Executive philosophies, priorities, preferences, and objectives in order to conduct comprehensive analysis relating to actions, projects, and programs; provide recommendations; and make decisions from an overall executive standpoint.
 - 5.1.2.2. Incumbent has subject matter expert (SME) level skill utilizing office automation tools to include Microsoft Office applications, i.e., Word, Excel, PowerPoint, Visio, Access, and as well as extensive knowledge in using SharePoint. Expert level use of video telecommunications equipment and virtual meeting applications.
- 5.1.3. Duties and Responsibilities
 - 5.1.3.1. Executive Support – Responsible for screening and responding to telephone calls from other SES members, senior Navy and Department of Defense leadership and their staffs. The holder of the position will maintain the Chief Engineer's calendar daily, following-up on scheduled meetings, print and compile briefing documents, and arrange transportation when/if needed. Specific day to day tasks may require screening and responding to visitors and incoming correspondence, and referring calls and visitors to the appropriate staff, responding to requests for information concerning office procedures, and controlling all incoming and outgoing correspondence in a timely manner, determining the appropriate level of staff support for all requests for information. Coordinate meetings, conference room bookings and arrange appointments for the Chief Engineer and his staff as well as assembling established background materials as directed. The position holder is expected to perform standard clerical duties such as typing, faxing, photocopying, filing, picking up and distributing mail, receiving telephone calls and visitors and maintaining correspondence files. As well as emptying your trash can each night to the Kitchen waste basket.
 - 5.1.3.2. Tasker System – Responsible for managing and coordinating the tasker system packages and following up on due dates, ensuring all taskers are completed on time. Effort includes sending out reminders to managers responsible for the tasker and loading responses in the tasker system accordingly.
 - 5.1.3.3. Supply Purchases - Responsible for all office supplies, printing, and maintenance requisition.
 - 5.1.3.4. Typing & Correspondence - Type a variety of documents from draft to final version using a personal computer. These documents require the production of memorandum, reports, forms, spreadsheets and similar material and require proofreading for grammatical and spelling errors. Qualified candidates will also be expected to prepare routine non-technical letters and approve form letters.
 - 5.1.3.5. Management Information Systems (MIS) - providing data input into various systems, i.e. Word, Excel, and PowerPoint in support of the above administrative duties. This includes maintaining the correspondence log in TRIMS (Total Records Information Management System), serializing outgoing correspondence and updating and maintaining office calendar, office recall/contact lists and leave request in MS Outlook.

- 5.1.3.6. Office Management – Assist the designated office in support of new employee’s check-in/ check-out process, minor property inventory control, Command Information Office (CIO) / Navy Marine Corps intranet (NMCI) liaison for software and hardware requirement. Additional management requirements include maintaining supervisor’s calendars, making appointments and arranging for meeting rooms, scheduling recurring appointments without prior approval from supervisors, assembling and disassembling conference materials, flyers, booklets and handouts, maintaining internal office reports and filing system, such as personal files, time & attendance, correspondence log, minor inventory/property listing and annual training requirement list. Candidates will also be responsible for reviewing all outgoing correspondence and material for internal consistency and confirmation, ensuring proper clearance has been obtained, and coordinating all personnel and administrative documentation for new employee in-processing. Securing all Personal Identifiable Information (PII) and coordinating with all NAVFAC business and support lines to ensure a smooth check-in process.
- 5.1.3.7. Professional Registration Board – Responsible for maintaining the Command Professional Registration Board, ensuring it is kept up to date, ordering new brass nameplates on a quarterly basis as appropriate. Continuous communication with other Command Admin Assistants is essential.
- 5.1.3.8. Travel - Support CI/CH staff in fulfilling travel needs by properly inputting travel orders into DTS and ensuring vouchers are completed and travel reimbursements are processed within 5 days of travel for all CI/CHE staff. Manage a log of CI/CHE travel cost to assure payment is finalized.
- 5.1.3.9. Perform other administrative activities as requested.

5.2. Acoustician/Acoustical Engineer

5.2.1. Performance Requirements and Qualifications

- 5.2.1.1. Doctor of Philosophy (Acoustician) or MS in Engineering (Acoustical Engineer).
- 5.2.1.2. Minimum 5 years experience in DoD Noise program including but limited to noise models, noise metrics and methodologies to assess noise to support DoD Compatible use programs and NEPA actions.

5.2.2. Knowledge and Skills Required

- 5.2.2.1. Knowledge of the principles of noise modeling, data collection and analysis, sound propagation, sonic booms, near field and community noise analysis, blast noise, small arms noise, noise mitigation, ISO 9613-1:1993, ISO 9613-2:1996, ISO 226:2003, ISO 20906:2009, ISO 17201-1:2005, ISO/TR 17534-2:2014, ISO 1683:2015, ISO 17534-1:2015, ISO/TR 17534-3:2015, ISO 1996-1:2016, ISO 1996-2:2017.
- 5.2.2.2. Knowledge and understanding of DoD noise and compatible use programs and noise models.

5.2.3. Duties and Responsibilities

- 5.2.3.1. Consultation-provide expert advice and guidance regarding the DoD Noise program, AICUZ/RAICUZ program, noise modeling, data collection, sonic boom, military air and ground ranges, and other topics as needed to support the AICUZ SME.
- 5.2.3.2. Technical Reports- provide technical reports regarding the DoD Noise program, noise modeling, data collection, updates to policies and regulations and other topics as needed to support the AICUZ SME.
- 5.2.3.3. Expert review-review, assess and comment on DoD and non-DoD noise studies and published research.
- 5.2.3.4. Conduct research- Conduct research and develop recommendations regarding the DoD Noise program, noise modeling, data collection, updates to policies and regulations, technical specifications on sound monitors and other topics as needed to support the AICUZ SME.

5.3. Architect Technician

5.3.1. Performance Requirements and Qualifications:

- 5.3.1.1. A minimum of 7 years of experience is required in the field of designing and producing architectural code compliant facilities. Design experience for new construction, including renovation design experience, is required.

5.3.2. Knowledge and Skills Required

- 5.3.2.1. Broad professional knowledge and skill in architectural concepts, theories, principles, practices, and techniques necessary to plan, design, manage, construct, preserve, restore, rehab, oversee, and maintain a wide range of shore installation facilities projects.
- 5.3.2.2. Professional knowledge and experience in architectural design demonstrating comprehensive knowledge of all phases of architectural design, including architectural programming, space planning, concept design development, construction documents development, sustainable design, design analyses, construction administration, building envelope commissioning, compliance with codes and standards, drawings, specifications, cost estimates, other required services.
- 5.3.2.3. Knowledge of DoD and Navy guide specifications, criteria, and policy; the International Building Code; Life Safety Code, industry codes and standards; and standard practices as related to architectural design.
- 5.3.2.4. Knowledge of local, state, federal, and foreign country laws, codes, and other statutory requirements affecting architectural design throughout the NAVFAC Atlantic area of responsibility (AOR).
- 5.3.2.5. Knowledge of related architectural and engineering fields and their associated impacts as related to architectural design.
- 5.3.2.6. Knowledge and experience with Autodesk software, Microsoft Office products, architectural design and analysis software such as SketchUp Pro, and other applicable DoD computer systems and software used by the Command.
- 5.3.2.7. Ability to produce results of analysis in writing; review and consolidate findings of theirs; and evaluate recommendations and facts. Ability to make oral presentations of proposed designs and results of studies.
- 5.3.2.8. Knowledge of budgeting, planning and project management techniques, including the ability to coordinate the work of others and lead teams.
- 5.3.2.9. Knowledge of and full compliance with Safety Policy and Guidance, and use of personal protective equipment.

5.3.3. Duties and Responsibilities

- 5.3.3.1. Typical types of work include: Supporting professional structural architectural work. Evaluating 3D BIM models of building/facility architectural systems, in coordination with other disciplines. Reviewing Architectural Shop drawings for compliance with contract documents. Reviewing UFGS specifications utilizing SpecsIntact. Supporting documents of reports and/or request for proposals (RFP).
- 5.3.3.2. May perform site investigation field trips to project sites, as required, to collect all pertinent data to perform design support and develop project scope by inspection of existing conditions and through meetings with sponsoring activity.
- 5.3.3.3. Coordinate activities with other engineers and architects to ensure that final detailed working drawings, specifications, and RFPs are properly integrated with the building systems.

5.4. Architect

5.4.1. Performance Requirements and Qualifications:

- 5.4.1.1. Completion of a course of studies accredited by the National Architectural Accrediting Board (NAAB) for an architectural program from a college or university earning a bachelor's or master's degree in Architecture, supplemented by a considerable amount of hands-on facilities design experience, is required.
- 5.4.1.2. Registration Boards (NCARB) accredited Architectural program or approved equivalent experience and minimum of 5 years of architectural design including at least 1 year working on facilities projects for a Federal Agency.
- 5.4.1.3. Registration as a Registered Architect (RA) is desirable.
- 5.4.1.4. A minimum of 5 years of professional, architectural code compliant facilities design experience for new construction, including renovation design experience, is required.
- 5.4.2. Knowledge and Skills Required
 - 5.4.2.1. Broad professional knowledge and skill in architectural concepts, theories, principles, practices, and techniques necessary to plan, design, manage, construct, preserve, restore, rehab, oversee, and maintain a wide range of shore installation facilities projects.
 - 5.4.2.2. Professional knowledge and experience in architectural design demonstrating comprehensive knowledge of all phases of architectural design, including architectural programming, space planning, concept design development, construction documents development, sustainable design, design analyses, construction administration, building envelope commissioning, compliance with codes and standards, drawings, specifications, cost estimates, other required services.
 - 5.4.2.3. Knowledge of DoD and Navy guide specifications, criteria, and policy; the International Building Code; Life Safety Code, industry codes and standards; and standard practices as related to architectural design.
 - 5.4.2.4. Knowledge of local, state, federal, and foreign country laws, codes, and other statutory requirements affecting architectural design throughout the NAVFAC Atlantic area of responsibility (AOR).
 - 5.4.2.5. Knowledge of related architectural and engineering fields and their associated impacts as related to architectural design.
 - 5.4.2.6. Knowledge and experience with Autodesk software, Microsoft Office products, architectural design and analysis software such as SketchUp Pro, and other applicable DoD computer systems and software used by the Command.
 - 5.4.2.7. Ability to produce results of analysis in writing; review and consolidate findings of theirs; and evaluate recommendations and facts. Ability to make oral presentations of proposed designs and results of studies.
 - 5.4.2.8. Knowledge of budgeting, planning and project management techniques, including the ability to coordinate the work of others and lead teams.
 - 5.4.2.9. Knowledge of and full compliance with Safety Policy and Guidance, and use of personal protective equipment.
- 5.4.3. Duties and Responsibilities
 - 5.4.3.1. Provide timely, professional architectural support, services and consultation for the planning, design, construction and maintenance of facilities for the Navy, Marine Corps, and other Supported Commands, including specific projects, special projects, military construction (MILCON), demolition, maintenance, space utilization and facilities development. Participate in conferences with project stakeholders and collaborates with other engineering and architectural disciplines to ensure system coordination and integration with specific project requirements.

5.4.3.2. Support services include, but are not limited to, input and feedback on third party designs, and recommendations with respect to programming, space planning, concept design, development, sustainable practices and codes compliance assurance to include analysis of furnished drawings and specifications, review of cost estimates and other required services. The professional services provided will be part of a Navy team that supports the following facility types: housing; community support facilities (dining hall, clubs, fitness centers, child development centers); medical facilities; education/training facilities; maintenance shops; industrial facilities; hangars; administration buildings; operations buildings (command and control centers); communications facilities; and other shore installation facilities.

5.5. Architect - Senior

5.5.1. Performance Requirements and Qualifications:

- 5.5.1.1. Completion of a course of studies accredited by the National Architectural Accrediting Board (NAAB) for an architectural program from a college or university earning a bachelor's or master's degree in Architecture, supplemented by a considerable amount of hands-on facilities design experience, is required.
- 5.5.1.2. Registration Boards (NCARB) accredited Architectural program or approved equivalent experience and minimum of 10 years of architectural design including at least 1 year working on facilities projects for a Federal Agency.
- 5.5.1.3. Registration as a Registered Architect (RA) is required.
- 5.5.1.4. A minimum of 5 years of professional, architectural code compliant facilities design experience for new construction, including renovation design experience, is required.

5.5.2. Knowledge and Skills Required

- 5.5.2.1. Broad professional knowledge and skill in architectural concepts, theories, principles, practices, and techniques necessary to plan, design, manage, construct, preserve, restore, rehab, oversee, and maintain a wide range of shore installation facilities projects.
- 5.5.2.2. In-depth knowledge and experience in architectural design demonstrating comprehensive knowledge of all phases of architectural design, including architectural programming, space planning, concept design development, construction documents development, sustainable design, design analyses, construction administration, building envelope commissioning, compliance with codes and standards, drawings, specifications, cost estimates, other required services.
- 5.5.2.3. In-depth knowledge of DoD and Navy guide specifications, criteria, and policy; the International Building Code; Life Safety Code, industry codes and standards; and standard practices as related to architectural design.
- 5.5.2.4. Knowledge of local, state, federal, and foreign country laws, codes, and other statutory requirements affecting architectural design throughout the NAVFAC Atlantic area of responsibility (AOR).
- 5.5.2.5. Knowledge of related architectural and engineering fields and their associated impacts as related to architectural design.
- 5.5.2.6. In-depth knowledge and experience with Autodesk software, Microsoft Office products, architectural design and analysis software such as SketchUp Pro, and other applicable DoD computer systems and software used by the Command.
- 5.5.2.7. Ability to produce results of analysis in writing; review and consolidate findings of theirs; and evaluate recommendations and facts. Ability to make oral presentations of proposed designs and results of studies.
- 5.5.2.8. Knowledge of budgeting, planning and project management techniques, including the ability to coordinate the work of others and lead teams.

5.5.2.9. Knowledge of and full compliance with Safety Policy and Guidance, and use of personal protective equipment.

5.5.3. Duties and Responsibilities

5.5.3.1. Provide timely, professional architectural support, services and consultation for the planning, design, construction and maintenance of facilities for the Navy, Marine Corps, and other Supported Commands, including specific projects, special projects, military construction (MILCON), demolition, maintenance, space utilization and facilities development. Participate in conferences with project stakeholders and collaborates with other engineering and architectural disciplines to ensure system coordination and integration with specific project requirements.

5.5.3.2. Support services include, but are not limited to, input and feedback on third party designs, and recommendations with respect to programming, space planning, concept design, development, sustainable practices and codes compliance assurance to include analysis of furnished drawings and specifications, review of cost estimates and other required services. The professional services provided will be part of a Navy team that supports the following facility types: housing; community support facilities (dining hall, clubs, fitness centers, child development centers); medical facilities; education/training facilities; maintenance shops; industrial facilities; hangars; administration buildings; operations buildings (command and control centers); communications facilities; and other shore installation facilities.

5.6. Business Analyst

5.6.1. Performance Requirements and Qualifications

5.6.1.1. Degree: Bachelor's Degree in a technical field preferred.

5.6.1.2. Business Analysis Experience: Minimum 5 years of experience in creation of Key Performance Indicators (KPIs), Business Process Optimization, Project Status Visualizations, and other formats and approaches for data collection, display, and consumption. Experience developing and coordinating related software requirements, test plans, and QA/QC plans with software developers.

5.6.1.3. Certification: PMP required.

5.6.1.4. Project Management: Demonstrated project management and organizational skills are required.

5.6.2. Knowledge and Skills Required

5.6.2.1. Technical Proficiency: High proficiency with creation of requirements for Microsoft SharePoint and Microsoft Power Platform solutions development. Strong skills in Microsoft Office (Word, Excel, PowerPoint), Microsoft SharePoint, Microsoft Power Platform, and ability to learn new applications.

5.6.2.2. Data: Demonstrated experience with data and data/configuration management.

5.6.2.3. Visualizations: Demonstrated experience with data visualization.

5.6.2.4. VBA and Excel: Demonstrated experience with VBA and advanced Excel formulas and data management and manipulation.

5.6.2.5. Forecasting and Budgeting: Knowledge of work program forecasting and budgeting.

5.6.2.6. Communication: Demonstrated ability to clearly communicate issues, requirements, and improvements to a wide range of stakeholders, including technical and non-technical audiences.

5.6.2.7. Project Management: Demonstrated ability to manage timelines, resources, and collaboration with clients, stakeholders, and programmers in a fast-paced de-centralized / virtual environment. Ability to work efficiently under conditions of multiple deadlines and changing priorities to produce a large volume of high-quality material with attention to detail.

5.6.3. Duties and Responsibilities

- 5.6.3.1. Collaboration and Coordination: Collaborate with a range of SMEs and stakeholders to evaluate, design, create, deploy, and maintain a range of solutions for the acquisition, processing, manipulation, analysis, and display of various information products through Microsoft SharePoint and Microsoft Power Platform solutions, including websites, visualizations, dashboards, applications, workflows, graphs, charts, diagrams, and other products.
- 5.6.3.2. Technical Evaluation and Analysis: Review existing data, platforms, and visualizations and recommend innovative improvements to make them more engaging and effective. Assist in automation initiatives, various process, and system improvements, and supporting new systems/tools as they are developed.
- 5.6.3.3. Requirements: Support requirements gathering, data collection and analysis; organize unstructured data and manage corporate information in support of business units across the company. Coordinate and manage maintenance of this information.
- 5.6.3.4. Continuous Process Improvement: Continually assess existing processes for improvement. Track inputs and action items for various tools/systems and working group meetings, owning implementation or action item where necessary. Analyze lessons learned and other forms of feedback and provide reports showing areas of potential improvement, strengths, and weaknesses.
- 5.6.3.5. Reports and Dashboards: Create dashboards, reports, and other types of visualizations that capture and display Key Performance Indicators, labor and budget estimates, labor and budget forecasts, production figures and statistics, and other key programmatic information. Develop reporting structure based on new metric capabilities using Microsoft Excel, Microsoft Power Platform, and/or other platforms.
- 5.6.3.6. Instructional Guidance: Provide instructional guidance and documentation to the user community, and support user requests for assistance; conduct training sessions.
- 5.6.3.7. Community Support: Provide technical support to product stakeholders and end users, as directed.
- 5.6.3.8. Strategic Communications: Superior knowledge of the English language including the ability to read, comprehend, communicate information and ideas effectively to a wide range of audiences.
- 5.6.3.9. Data Collection and Analysis: Analyze quantitative, qualitative, structured, and unstructured data and work collaboratively with other team members to generate requirements, build workflows, and scope solutions for displaying outputs in various formats including – but not limited to – websites, visualizations, dashboards, applications, charts, graphs, and diagrams.
- 5.6.3.10. Administrative Tasks: Support data calls, workshops, trainings, meetings, requests, and system account management.
- 5.6.3.11. Project Management and Coordination: Demonstrated ability to manage timelines, resources, and collaboration with clients, stakeholders, and programmers in a highly de-centralized / virtual environment.

5.7. CAD/BIM Manager

5.7.1. Performance Requirements and Qualifications

- 5.7.1.1. Certificate /Associate Degree of Applied Science in CAD Drafting from college or technical school preferred
- 5.7.1.2. 5+ Years' Experience managing a CAD programs in an A/E environment
- 5.7.1.3. AutoCAD and or Revit Certified Professional certificate highly desirable.

5.7.2. Knowledge and Skills Required

- 5.7.2.1. High proficiency with AutoCAD MEP 2015 and 2016, Revit 2015 and Navisworks platforms
- 5.7.2.2. Experience in an M/E/P, Architectural (Mechanical/Electrical/Plumbing & Fire Protection)
- 5.7.2.3. Understanding of basic drawing setup modeling technique and general knowledge of drafting Standards
- 5.7.2.4. Extensive knowledge of industry information, file translation methods between CAD platforms, and maintenance of CAD industry standards
- 5.7.3. Duties and Responsibilities
 - 5.7.3.1. Responsible for maintaining CAD standards and procedures in compliance with the NAVFAC and U.S. National CAD Standard Guidelines.
 - 5.7.3.2. Develop CAD/BIM training programs and provide training for users. The CBM has advanced experience, training, and competence in AutoCAD, Revit software packages and is familiar with supporting engineering applications. Included responsibilities are the implementation of NAVFAC sheet standards, user support, CAD administration process, and achieving processes. Responsible for NAVFAC CAD standards implementation, both technical and procedural, in the execution of in-house design bid build projects (DDB) and design build (DB) projects. While the CBM is not directly responsible for direct execution of projects, they are expected to be familiar with the work performed by Architects and all Engineer disciplines. Have familiarity with all printing and plotting device hardware and software.
 - 5.7.3.3. Provide CAD & BIM software application support throughout NAVFAC Atlantic's area of responsibility (AOR)
 - 5.7.3.4. Assist with enforcement of NAVFAC CAD Standards, guidelines, and policy
 - 5.7.3.5. Organize and assist with the utilization of CAD content and Revit applications
 - 5.7.3.6. Provide support for plotting and electronic file submissions for projects
 - 5.7.3.7. Provide in-house classroom training for CAD & BIM software across NAVFAC Atlantic's AOR
 - 5.7.3.8. Recommend future software versions and logistics for adoption
 - 5.7.3.9. Support CAD documents archive and retrieval for future projects
 - 5.7.3.10. Assist CIBL in CAD Software inventory for NAVFAC Atlantic's Architects & Engineers
 - 5.7.3.11. Support CIBL with CIO coordination of new hardware and software installation
 - 5.7.3.12. Collection and destruction (shredding) of old project drawings in accordance with Navy Guidelines
- 5.8. Extreme Weather Hazards and Geological Hazards Resilience Specialist
 - 5.8.1. Performance Requirements and Qualifications
 - 5.8.1.1. Education Requirements: Bachelor's Degree in Civil / Structural Engineering; Master's degree preferred.
 - 5.8.1.2. Certification: None.
 - 5.8.1.3. Experience: A minimum of four years of experience with generating resilience strategies and solutions to mitigate extreme weather and geological stressor considerations identified in the latest version of Department of Defense (DoD) Unified Facilities Criteria (UFC) 2-100-01. Experience with identification of planning-level (e.g. pre-design phase) resilience solutions/projects and rough-order-of-magnitude cost estimate and development of related methodology. Experience with creating and delivering related guidance and training that translates extreme weather risks and geological risks into resilience solutions in a manner suitable to urban planners (i.e. who are not experts in engineering, extreme weather science, or geological science).
 - 5.8.2. Knowledge and Skills Required

- 5.8.2.1. Extreme Weather and Geological Risks Resilience Proficiency: Demonstrated proficiency in evaluating vulnerability of capital assets (lands, buildings, infrastructure, and natural resources) to extreme weather events, environmental stressors, and geological stressors, and in identifying planning-level (pre-design) resilience projects and other solutions.
 - 5.8.2.2. Cost Estimation: Experience with identification of planning-level (e.g. pre-design phase) resilience solutions and rough-order-of-magnitude cost estimate for those solutions.
 - 5.8.2.3. Technology Proficiency: Expert engineering and data analysis skills; proficiency in Geographic Information Systems (GIS) and with multiple data formats (Microsoft Excel, maps, charts, graphs, tables) used in characterizing extreme weather and geological risks (i.e. the inputs to inputs to vulnerability evaluation), and GIS and Microsoft Word, Excel, and PowerPoint for presenting analytical outputs (i.e. the resilience solutions).
 - 5.8.2.4. Project Management & Coordination: Demonstrated ability to manage timelines, resources, and collaborate with a wide range of technical Subject Matter Experts (SMEs), clients, and stakeholders in a highly de-centralized / virtual environment.
 - 5.8.2.5. Resilience Methodology & Training: Demonstrated ability to develop extreme weather and geological hazard engineering, extreme weather sciences, or geological sciences resilience methodologies and to translate those methodologies for use in real-world application by a wide range of professionals, including urban planners and other professionals who are not SMEs in extreme weather and geological hazard sciences. Superior English language skills, with ability to read, comprehend, and communicate information and ideas effectively to a wide range of audiences.
- 5.8.3. Duties and Responsibilities
- 5.8.3.1. Requirements: Review requirements for extreme weather sciences, geological sciences, and resilience applicable to military installations.
 - 5.8.3.2. Vulnerability and Mitigation: Use a systems approach to evaluate extreme weather hazards and geological hazards and risks to identify resilience solutions. Coordinate with appropriate Navy SMEs to examine hazard exposure and vulnerability of military installations to extreme weather stressors and geological stressors. Provide technical support to ongoing resilience planning efforts. Support vulnerability analyses of military installations, considering multiple extreme weather hazards and geological hazards. Characterize hazard loads, assess operational risks, and identify mitigation strategies and resilience solutions.
 - 5.8.3.3. Develop Resilience Methodology: In collaboration with Navy SMEs, develop standard methodologies for translating extreme weather risks and geological risks into resilience solutions.
 - 5.8.3.4. Communications: Employ a mix of written, visual, and verbal communication techniques to craft compelling narratives and explain complex technical topics to various audiences. Prepare strategies, plans, studies, reports, briefs, guides, training materials, and other technical documents and communications to support a wide range of end-users, stakeholders, and decision-makers.
 - 5.8.3.5. Curriculum and Training: Assist in developing guidance and training materials that outline the methodology and provide examples for translating extreme weather risks into resilience solutions for military installations. Craft the materials for an audience of professionals who are not extreme weather sciences, geological sciences, or engineering SMEs. Develop and update content on an ongoing basis to reflect evolving requirements and that engages students effectively. Review and evaluate existing educational content and recommend changes to incorporate the resilience methodology and examples of its application to real-world scenarios. Assess course content and delivery and propose and implement improvements on a continuous basis to ensure learning objectives are met, students engaged effectively, and evolving requirements incorporated.

- 5.8.3.6. Training Delivery & Support: Perform a range of logistical duties to support overall training preparation, execution, and improvement. Deliver training in both in-person/classroom settings and virtually to a wide range of audiences, including planning professionals. Domestic and/or international travel may be required to support in-person training, business meetings, courses, conferences, and/or other events.
- 5.8.3.7. Virtual Training Tools: Use the SharePoint Content Management System (CMS) to create, manage, and update website content for resilience training and guidance on an ongoing basis. Assist other Subject Matter Experts (SME) with the development, creation, and maintenance of professional training videos and tools.
- 5.8.3.8. Community Support: Support communications pertaining to training content, courses, and Q&As across multiple communication channels, venues, and formats, including enterprise-wide convenings as well as small group gatherings, trainings, and discussions.
- 5.8.3.9. Products and Services Review: Support review and validation of products and services related to resilience analyses and solutions.
- 5.8.3.10. Logistical Tasks: Support data calls, workshops, trainings, meetings, requests, and system account management.

5.9. Civil Engineer

5.9.1. Performance Requirements and Qualifications

- 5.9.1.1. Civil Engineering: Bachelor Degree from an ABET accredited Civil Engineering or Engineering Technology program.
- 5.9.1.2. Registration as Professional Engineer (PE) in the discipline of civil engineering is desirable.
- 5.9.1.3. A minimum of 5 years of professional civil engineering code compliant facilities design experience for new construction, including renovation design experience, is required.

5.9.2. Knowledge and Skills Required

- 5.9.2.1. Broad professional knowledge and experience in the theories, concepts, principles and practices of civil engineering for the planning, design, construction and maintenance of a wide range of shore based engineering projects, such as: site developments, roads, airfields, water supply, sewer systems, drainage, dredging, waste facilities, shore protection, and other large/industrial civil engineering projects.
- 5.9.2.2. Knowledge of DOD and Navy guide specifications, criteria and policy, industry codes and standards, and standard practices as related to civil engineering design including the International Building Code.
- 5.9.2.3. Knowledge of local, state, federal, and foreign country laws, codes, and other statutory requirements affecting civil engineering design throughout the NAVFAC Atlantic AOR.
- 5.9.2.4. Skill in the use of software/systems, such as Whole Building Design Guide (WBGD) and AutoCAD, civil design/analysis software, and Specs-In-Tact technologies, Autodesk software, Microsoft Office products, civil engineering design and analysis software and other applicable DoD computer systems.
- 5.9.2.5. Knowledge of related architectural and engineering fields and their associated impacts as related to civil engineering design.
- 5.9.2.6. Ability to produce results of analysis in writing and consolidate findings of others and evaluate recommendations and facts.
- 5.9.2.7. Ability to make oral presentations of proposed designs and results of studies.
- 5.9.2.8. Knowledge of budgeting, planning and project management techniques, including the ability to coordinate the work of others and lead teams.
- 5.9.2.9. Knowledge of and full compliance with Safety Policy and Guidance, and use of personal protective equipment.

5.9.3. Duties and Responsibilities

- 5.9.3.1. Provides independent, timely and professional civil engineering support, services and consultation for the planning, design, construction and maintenance of facilities for the Navy, Marine Corps, and other supported Commands, including minor works projects, specific projects, special projects, military construction (MILCON), demolition, maintenance, space utilization and facilities development. Participates in conferences with project stakeholders and collaborates with other engineering and architectural disciplines to ensure system coordination and integration with specific project requirements.
- 5.9.3.2. Responsible for the preparation of detailed civil engineering analysis, calculations and designs, development of plans using AutoCAD, specifications and cost estimates, in support of in-house and A/E design bid build and design-build projects, for a wide range of projects. Typical design projects include Naval Shore Facilities, including multi-story offices and quarters, hospitals, towers, airfields, aircraft overhaul facilities, industrial waste treatment plants, piers, photovoltaic farms, training facilities, waterfront structures, including dry-docks, piers, and wharves, portal crane and railroad track and foundations, and a very wide diversity of other structures and facilities.
- 5.9.3.3. Typical project support includes a broad spectrum of civil engineering projects/services for site developments, roads, airfields, water supply, sewer systems, drainage, dredging, solid waste facilities, shore protection, and other civil works to support new or existing facilities and encompass large industrial facilities, buildings or project sites, with diverse climatic, geographic, and environmental conditions.

5.10. Civil Engineer - Senior

5.10.1. Performance Requirements and Qualifications

- 5.10.1.1. Civil Engineering: Bachelor Degree from an ABET accredited Civil Engineering or Engineering Technology program.
- 5.10.1.2. Registration as Professional Engineer (PE) in the discipline of civil engineering is required.
- 5.10.1.3. A minimum of 10 years of professional civil engineering code compliant facilities design experience for new construction, including renovation design experience, is required.

5.10.2. Knowledge and Skills Required

- 5.10.2.1. Broad professional knowledge and experience in the theories, concepts, principles and practices of civil engineering for the planning, design, construction and maintenance of a wide range of shore based engineering projects, such as: site developments, roads, airfields, water supply, sewer systems, drainage, dredging, waste facilities, shore protection, and other large/industrial civil engineering projects.
- 5.10.2.2. In-depth knowledge of DOD and Navy guide specifications, criteria and policy, industry codes and standards, and standard practices as related to civil engineering design including the International Building Code.
- 5.10.2.3. In-depth knowledge of local, state, federal, and foreign country laws, codes, and other statutory requirements affecting civil engineering design throughout the NAVFAC Atlantic AOR.
- 5.10.2.4. Skill in the use of software/systems, such as Whole Building Design Guide (WBGD) and AutoCAD, civil design/analysis software, and Specs-In-Tact technologies, Autodesk software, Microsoft Office products, civil engineering design and analysis software and other applicable DoD computer systems.
- 5.10.2.5. Knowledge of related architectural and engineering fields and their associated impacts as related to civil engineering design.
- 5.10.2.6. Ability to produce results of analysis in writing and consolidate findings of others and evaluate recommendations and facts.

- 5.10.2.7. Ability to make oral presentations of proposed designs and results of studies.
- 5.10.2.8. Knowledge of budgeting, planning and project management techniques, including the ability to coordinate the work of others and lead teams.
- 5.10.2.9. Knowledge of and full compliance with Safety Policy and Guidance, and use of personal protective equipment.
- 5.10.3. Duties and Responsibilities
 - 5.10.3.1. Provides independent, timely and professional civil engineering support, services and consultation for the planning, design, construction and maintenance of facilities for the Navy, Marine Corps, and other supported Commands, including minor works projects, specific projects, special projects, military construction (MILCON), demolition, maintenance, space utilization and facilities development. Participates in conferences with project stakeholders and collaborates with other engineering and architectural disciplines to ensure system coordination and integration with specific project requirements.
 - 5.10.3.2. Responsible for the preparation of detailed civil engineering analysis, calculations and designs, development of plans using AutoCAD, specifications and cost estimates, in support of in-house and A/E design bid build and design-build projects, for a wide range of projects. Typical design projects include Naval Shore Facilities, including multi-story offices and quarters, hospitals, towers, airfields, aircraft overhaul facilities, industrial waste treatment plants, piers, photovoltaic farms, training facilities, waterfront structures, including dry-docks, piers, and wharves, portal crane and railroad track and foundations, and a very wide diversity of other structures and facilities.
 - 5.10.3.3. Typical project support includes a broad spectrum of civil engineering projects/services for site developments, roads, airfields, water supply, sewer systems, drainage, dredging, solid waste facilities, shore protection, and other civil works to support new or existing facilities and encompass large industrial facilities, buildings or project sites, with diverse climatic, geographic, and environmental conditions.
- 5.11. Civil (Structural) Engineering Technician
 - 5.11.1. Performance Requirements and Qualifications
 - 5.11.1.1. A minimum of 7 years of experience is required in the field of designing and producing structural facility design drawings and specifications.
 - 5.11.2. Knowledge and Skills Required
 - 5.11.2.1. Substantial knowledge and practical application of structural design concepts, theories, principles, practices, and techniques necessary to plan, design, construct and maintain a wide range of shore based engineering projects.
 - 5.11.2.2. Knowledge of DoD and Navy guide specifications, criteria and policy, industry codes and standards, and standard practices as related to structural engineering design, including the International Building Code.
 - 5.11.2.3. Knowledge of local, state, federal, and foreign country laws, codes, and other statutory requirements affecting structural engineering design throughout the NAVFAC Mid- Atlantic AOR.
 - 5.11.2.4. Knowledge of related architectural and engineering fields and their associated impacts as related to structural engineering design.
 - 5.11.2.5. Knowledge and experience with AutoCAD and REVIT software, Microsoft Office products, structural engineering design and analysis software and other applicable DoD computer systems and software used by the Command. Knowledge of US National CAD Standards and Uniform Drawing System.
 - 5.11.2.6. Ability to make oral presentations of proposed designs and construction issues.

- 5.11.2.7. Knowledge of and full compliance with Safety Policy and Guidance and use of personal protective equipment.
- 5.11.3. Duties and Responsibilities
 - 5.11.3.1. Typical types of work include: Supporting professional structural engineering work. Evaluating 3D BIM models of building/facility structural system (Concrete and Steel, building or waterfront structure), in coordination with other disciplines. Reviewing Structural Shop drawings for compliance with contract documents. Reviewing UFGS specifications utilizing SpecsIntact. Supporting documents of reports and/or request for proposals (RFP).
 - 5.11.3.2. May perform site investigation field trips to project sites, as required, to collect all pertinent data to perform design support and develop project scope by inspection of existing conditions and through meetings with sponsoring activity.
 - 5.11.3.3. Coordinate activities with other engineers and architects to ensure that final detailed working drawings, specifications, and RFPs are properly integrated with the building systems.

5.12. Civil Engineer (Structural)

- 5.12.1. Performance Requirements and Qualifications
 - 5.12.1.1. Structural Engineering: Bachelor Degree from an ABET accredited Structural Engineering or Engineering Technology program.
 - 5.12.1.2. Registration as Professional Engineer (PE) in the discipline of civil engineering is desirable.
 - 5.12.1.3. A minimum of 5 years of professional civil engineering - structural code compliant facilities design experience for new construction, including renovation design experience, is required.
- 5.12.2. Knowledge and Skills Required
 - 5.12.2.1. Broad professional knowledge and practical application of civil/structural engineering concepts, theories, principles, practices, and techniques necessary to plan, design, construct and maintain a wide range of shore based engineering projects.
 - 5.12.2.2. Knowledge of DoD and Navy guide specifications, criteria, policy, industry codes and standards, and standard practices as related to structural engineering design, including the International Building Code, and ASCE 7 (Minimum Design Loads for Buildings and Other Structures).
 - 5.12.2.3. Knowledge of local, state, federal, and foreign country laws, codes, and other statutory requirements affecting structural engineering design throughout the NAVFAC Mid- Atlantic AOR.
 - 5.12.2.4. Knowledge of related architectural and engineering fields and their associated impacts as related to structural engineering design.
 - 5.12.2.5. Ability to produce results of analysis in writing and consolidate findings of others and evaluate recommendations and facts.
 - 5.12.2.6. Ability to make oral presentations of proposed designs and results of studies.
 - 5.12.2.7. Knowledge of budgeting, planning and project management techniques, including the ability to coordinate the work of others and lead teams.
 - 5.12.2.8. Knowledge of and full compliance with Safety Policy and Guidance and use of personal protective equipment.
 - 5.12.2.9. Experience with finite element analysis/modeling and/or structural software is required.
- 5.12.3. Duties and Responsibilities

- 5.12.3.1. Responsible for the preparation of detailed structural engineering analysis, calculations and designs, development of plans using AutoCAD, specifications and cost estimates, in support of in-house and A/E design bid build and design-build projects, for a wide range of projects. Typical design projects include Naval Shore Facilities, including multi-story offices and quarters, hospitals, towers, airfields, aircraft overhaul facilities, industrial waste treatment plants, piers, photovoltaic farms, training facilities and a very wide diversity of other structures and facilities.
 - 5.12.3.2. Apply knowledge and skill to research standard structural systems, equipment or techniques in the development of structural design projects. Analyze the applicability of innovative processes, systems, equipment, or techniques and implement such on projects and specifications.
 - 5.12.3.3. Demonstrate knowledgeable of the latest structural materials and methods of construction. Experience in design of concrete, steel, timber, and masonry structures is required.
 - 5.12.3.4. Provides independent, timely and professional structural engineering support, services and consultation for the planning, design, construction and maintenance of facilities for the Navy, Marine Corps, and other Supported Commands, including specific projects, special projects, military construction (MILCON), demolition, maintenance, space utilization and facilities development. Participates in conferences with project stakeholders and collaborates with other engineering and architectural disciplines to ensure system coordination and integration with specific project requirements.
 - 5.12.3.5. Typical projects will involve: calculation of environmental and blast loads; analysis and design of vertical and lateral force resisting system, shallow and deep foundations, retaining structures, and utility supports; and design of structural elements using common building materials (concrete, steel and timber).
- 5.13. Civil Engineer (Structural) – Senior
- 5.13.1. Performance Requirements and Qualifications
 - 5.13.1.1. Completion of a course of studies accredited by the Accreditation Board for Engineers and Technology (ABET) for a civil engineering program from a college or university for a bachelor's or master's degree in civil engineering with emphasis in structural engineering, supplemented by a considerable amount of hands-on facilities design experience, is required.
 - 5.13.1.2. Registration as Professional Engineer (PE) in the discipline of civil engineering – structural is required.
 - 5.13.1.3. A minimum of 10 years of professional civil engineering - structural code compliant facilities design experience for new construction, including renovation design experience, is required.
 - 5.13.2. Knowledge and Skills Required
 - 5.13.2.1. Mastery level knowledge and skill in applying, advanced theories, concepts, and principles of structural engineering. Ability to apply new developments or experimental theories in structural engineering to problems not readily treatable by conventionally accepted methods. Applies engineering skills to effectively assess customer's requirements and develop innovative solutions.
 - 5.13.2.2. In depth knowledge of DOD and Navy guides, specifications, criteria and policy, industry codes and standards, and standard practices as related to civil/structural engineering design.
 - 5.13.2.3. In depth knowledge of local, state, federal, and foreign country laws, codes, and other statutory requirements affecting structural engineering design throughout the NAVFAC Mid-Atlantic AOR.
 - 5.13.2.4. Knowledge of related architectural and engineering fields and their associated impacts as related to structural engineering design.

- 5.13.2.5. Knowledge and experience with Autodesk software, Microsoft Office products, structural engineering design and analysis software and other applicable DoD computer systems and software used by the Command.
- 5.13.2.6. Ability to produce results of analysis in writing and consolidate findings of others and evaluate recommendations and facts. Ability to make oral presentations of proposed designs and results of studies.
- 5.13.2.7. Knowledge of budgeting, planning and project management techniques, including the ability to coordinate the work of others and lead teams.
- 5.13.2.8. Knowledge of and full compliance with Safety Policy and Guidance and use of personal protective equipment.

5.13.3. Duties and Responsibilities

- 5.13.3.1. Provide independent, timely and professional specialized structural engineering support, services and consultation for the planning, design, construction and maintenance of facilities for the Navy, Marine Corps, and other Supported Commands, including minor works projects, specific projects, special projects, military construction (MILCON), demolition, maintenance, space utilization and facilities development. Participate in conferences with project stakeholders and collaborates with other engineering and architectural disciplines to ensure system coordination and integration with specific project requirements.
- 5.13.3.2. Is an expert in advanced structural engineering concepts, principles and practices as they apply to a wide range of shore facilities, including piers, housing, medical facilities, and aviation facilities.
- 5.13.3.3. Is an expert in advanced structural engineering concepts, principles and practices as they apply to a wide range of waterfront facilities, including piers, bulkheads, quays and dry- dock facilities.

5.14. Construction Scheduler

5.14.1. Performance Requirements and Qualifications

- 5.14.1.1. Engineering Degree, Associates Degree in Construction Management, Construction Technology or Building Construction and minimum of 5 years of Construction Scheduling experience or a High School Diploma and 10 years of Construction Scheduling experience.
- 5.14.1.2. A minimum of 5 years of construction scheduling experience utilizing Primavera P6 or MS Project.
- 5.14.1.3. Registration as a Planning and Scheduling Professional (PSP) is desirable.

5.14.2. Knowledge and Skills Required

- 5.14.2.1. Professional knowledge and skill in understanding and applying construction scheduling techniques used by Industry as well as extensive practical experience with the development and successful application of such techniques.
- 5.14.2.2. Knowledge of scheduling programs, forecasting, techniques, and critical path methodology to gather and evaluate contractor schedule and technical performance.

5.14.3. Duties and Responsibilities

- 5.14.3.1. The Scheduler provides assistance and technical guidance to project managers, planners, engineers/architects, construction managers, and several other project team members exercising management and administrative skills in leading the schedule development and coordination in execution of military construction projects.
- 5.14.3.2. Provides support during the planning, design, and procurement phase of construction projects to ensure an appropriate construction duration is established for all military construction projects.

- 5.14.3.3. Review the scope of individual projects and propose reasonable construction duration to be included in the RFP or solicitation.
 - 5.14.3.4. For RFPs or designs developed by others, provide a complete review of the proposed duration to ensure it is project specific and accounts for all requirements of the contract and site restrictions.
 - 5.14.3.5. Participate in the Cost Schedule Risk Analysis (CSRA) process as necessary during the planning and design development phases to ensure schedule risks as adequately accounted for in the project plan and budget.
 - 5.14.3.6. Collaborate with Project Manager to communicate/evaluate proposed initial contract duration with Supported Command during project planning/development/design phases.
 - 5.14.3.7. Development of both design and construction schedules integrating customer execution requirements and making recommendations to optimize the project delivery to assist in project planning. Effort includes identifying potential schedule conflicts and assisting management in prioritizing work packages based on critical paths and program constraints.
 - 5.14.3.8. Determines and makes recommendations regarding proper resource leveling to optimize scope, schedule, and cost while minimizing project risk.
 - 5.14.3.9. Routinely communicate and coordinate with other technical and non-technical NAVFAC personnel within the Facilities Engineering Command (FEC) and the various Field Offices.
- 5.15. Construction Scheduler – Senior
- 5.15.1. Performance Requirements and Qualifications
 - 5.15.1.1. Engineering Degree, Associates Degree in Construction Management, Construction Technology or Building Construction and minimum of 15 years of Construction Scheduling experience or a High School Diploma and 20 years of Construction Scheduling experience.
 - 5.15.1.2. A minimum of 15 years of construction scheduling experience utilizing Primavera P6 or MS Project.
 - 5.15.1.3. Registration as a Planning and Scheduling Professional (PSP) is desirable.
 - 5.15.2. Knowledge and Skills Required
 - 5.15.2.1. Expert knowledge and skill in understanding and applying construction scheduling techniques used by Industry as well as extensive practical experience with the development and successful application of such techniques.
 - 5.15.2.2. Knowledge of scheduling programs, forecasting, techniques, and critical path methodology to gather and evaluate contractor schedule and technical performance.
 - 5.15.3. Duties and Responsibilities
 - 5.15.3.1. The Scheduler provides assistance and technical guidance to project managers, planners, engineers/architects, construction managers, and several other project team members exercising management and administrative skills in leading the schedule development and coordination in execution of military construction projects.
 - 5.15.3.2. Provides support during the planning, design, and procurement phase of construction projects to ensure an appropriate construction duration is established for all military construction projects.
 - 5.15.3.3. Review the scope of individual projects and propose reasonable construction duration to be included in the RFP or solicitation.
 - 5.15.3.4. For RFPs or designs developed by others, provide a complete review of the proposed duration to ensure it is project specific and accounts for all requirements of the contract and site restrictions.

- 5.15.3.5. Participate in the Cost Schedule Risk Analysis (CSRA) process as necessary during the planning and design development phases to ensure schedule risks are adequately accounted for in the project plan and budget.
 - 5.15.3.6. Collaborate with Project Manager to communicate/evaluate proposed initial contract duration with Supported Command during project planning/development/design phases.
 - 5.15.3.7. Development of both design and construction schedules integrating customer execution requirements and making recommendations to optimize the project delivery to assist in project planning. Effort includes identifying potential schedule conflicts and assisting management in prioritizing work packages based on critical paths and program constraints.
 - 5.15.3.8. Determines and makes recommendations regarding proper resource leveling to optimize scope, schedule, and cost while minimizing project risk.
 - 5.15.3.9. Provide input to revise/improve Unified Facilities Guide Specifications based upon Industry standards and needs of the field.
 - 5.15.3.10. Accumulate and maintain historical pre-award construction duration data for use in reference for planning and forecasting
 - 5.15.3.11. Routinely communicate and coordinate with other technical and non-technical NAVFAC personnel within the Facilities Engineering Command (FEC) and the various Field Offices.
 - 5.15.3.12. Developing, maintaining, and providing scheduling training to the field office covering basic understanding of network analysis schedules, critical path method, time impact analysis, baseline, progress, and as-built schedule reviews, and software usage
- 5.16. Construction Engineering Technician
- 5.16.1. Performance Requirements and Qualifications
 - 5.16.1.1. A minimum of 5 years of verified experience as a Superintendent or Quality Control Manager working for General Contractors on Federal Government projects OR 10 years of verified journeymen experience in one or more of following trades: Concrete, Mechanical, Electrical, Masonry, or Carpentry on commercial/industrial/military projects. Residential experience does not qualify.
 - 5.16.1.2. Hold a current certificate of completion for the USACE/NAVFAC CQM for Contractors Course. This course may be completed within 45 calendar days of on-boarding. Certificate is valid for 5-years and must be renewed prior to expiration, if the expiration date falls during the period of performance.
 - 5.16.2. Knowledge and Skills Required
 - 5.16.2.1. Knowledge of USACE EM385-1-1 Safety and Occupational Health Requirements and OSHA 29 CFR Part 1926
 - 5.16.2.2. Knowledge in the use and application of Microsoft Office (Word, Excel, PowerPoint, Outlook).
 - 5.16.2.3. Knowledge of crane safety requirements and weight handling equipment.
 - 5.16.2.4. Provide overall coordination of the construction quality management program for assigned projects.
 - 5.16.2.5. Incumbent keeps the Government sponsor advised as to the status of projects under administrative and technical control, but the responsibility to plan and carry out the assignment is accomplished independently.
 - 5.16.3. Duties and Responsibilities
 - 5.16.3.1. Reviews submittals, request for information (RFI), daily contractor reports, schedules, Accident Prevention Plans (APP) and Activity Hazard Analysis (AHA), and other construction related documentation.

- 5.16.3.2. Coordinates utility connections, lay-down and storage areas, excavation and other construction related permits as required.
- 5.16.3.3. Performs Quality Assurance (QA) on definable features of work.
- 5.16.3.4. Performs witness testing for construction related testing.
- 5.16.3.5. Ensure construction contractor is conducting monthly site safety self-evaluations and submitting the information with the pay vouchers/invoices; perform worksite safety assessments, as needed.
- 5.16.3.6. Supporting collateral equipment installation and phone/data/communication connections.
- 5.16.3.7. Assisting with investigation of potential latent defects.
- 5.16.3.8. Assisting with coordination of the installation of cylinders/cores, keying system, and turnover of keys to owner/occupant and coordination of the facility system training for owner/occupants/PW shops personnel.
- 5.16.3.9. Reviewing pre-final contract drawings and specifications (particularly Division 01 administrative requirements) and technical RFPs, respectively. Perform on-site visits to review constructability and compatibility with actual field conditions. During design development and constructability review, provide technical knowledge of local conditions, including availability of construction materials and skilled labor. For problems found, make solution recommendations for designer consideration.
- 5.16.3.10. Actively participate in partnering sessions, depending on the nature and scope of the construction contract. Facilitate effective relationships and processes between contractors, Supported Command, and government team members. Supporting preliminary scheduling meeting and review 3-week look ahead schedules (as applicable).
- 5.16.3.11. Review updates of the baseline schedule with the CM to determine if contractor is ahead, on or behind. Review the critical activities to ensure the work on the construction contract remains focused on completion in the most reasonable time. As necessary (particularly when a contractor is falling behind schedule), participate in the bi-weekly look ahead meetings with the construction contractor to review project scheduling problems or concerns.
- 5.16.3.12. Reviewing and annotating, as required, contractor daily reports.
- 5.16.3.13. Assuring environmental compliance by contractor and coordinate EPA jobsite visits, when required.
- 5.16.3.14. Reviewing and verifying the accuracy of as-built drawings in support of invoice payments.
- 5.16.3.15. When applicable, coordinating with NAVFAC CM and issue non-compliance notice to contractor.
- 5.16.3.16. Arranging and coordinating pre-final and final acceptance inspections and tracking completion of punch list items.
- 5.16.3.17. Supporting the closeout process, including delivery of as-built drawings, warranties, Operations & Maintenance (O&M) manuals, and spare parts turnover.
- 5.17. Construction Engineering Technician (2nd shift)
 - 5.17.1. Performance Requirements and Qualifications
 - 5.17.1.1. Refer to 5.16 Construction Engineering
 - 5.17.2. Knowledge and Skills Required
 - 5.17.2.1. Refer to 5.16 Construction Engineering
 - 5.17.3. Duties and Responsibilities
 - 5.17.3.1. Refer to 5.16 Construction Engineering
- 5.18. Construction Manager
 - 5.18.1. Performance Requirements and Qualifications

5.18.1.1. Individual for this position shall have at least 5 years of as a Construction Manager or Project Manager on Federal Government construction contracts. Graduation from an accredited engineering or construction management program may be considered equivalent to 2 years of field experience.

5.18.2. Knowledge and Skills Required

5.18.2.1. Knowledge of Primavera P6 or other commercially available construction scheduling software. Must possess a keen understanding of construction schedules utilizing network analysis and the potential impact of modifications to the critical path.

5.18.2.2. Strong leadership and technical skills to resolve complex issues that may arise in the field.

5.18.2.3. Knowledge of the construction management process to include submittals, quality control, safety.

5.18.3. Duties and Responsibilities

5.18.3.1. Review pre-final contract drawings and specifications with respect to constructability and compatibility with actual field conditions.

5.18.3.2. Attend contractor pre-bid project site visits and answer or document questions as permissible.

5.18.3.3. Coordinate mandatory post-award contract meetings such as post-award kickoff meetings, preconstruction conferences, partnering meetings schedule meetings, quality control (QC) (5-part) meetings, design review meetings, coordination and mutual understanding meetings, weekly production meetings, Facility Turnover Planning meetings (NAVFAC Red Zone), final inspections, and all other meeting deemed relevant to the position.

5.18.3.4. Review contractor administrative submittals such as schedules, environmental protection plans, quality control plans, accident prevention plans, and coordinate review and approval of technical "Government approved" submittals such as shop drawings, product data, samples, design data, manufacturer's instructions, test plans/reports, certificates, and operations and maintenance (O&M) data in a timely manner per construction contract requirements.

5.18.3.5. Review construction progress at the site, daily production reports, and construction quality control (CQC) reports.

5.18.3.6. Attend QC meetings involving critical work activities. Take necessary action (including possibly recommending dismissal of QC Manager and/or other QC staff) to assure contractor's quality control program is in accordance with the contract requirements and that three phases of quality control are being utilized.

5.18.3.7. Based on technical knowledge and coordination with designer and contractor, provide technical solutions to unforeseen problems during construction. This may include making recommendations to the official government liaison to approve field changes that have no impact on function of the facility or cost and schedule of the contract (no change in scope).

5.18.3.8. Assist the Integrated Product Team (IPT) Project Manager (PM) in management of Post Construction Award Services (PCAS).

5.18.3.9. Coordinate delivery, acceptance, inspection and installation of Government furnished equipment.

5.18.3.10. Coordinate installation of collateral equipment and connection of phone, data, other communication systems and utility services.

5.18.3.11. Assist in identifying the need (and reason code) for a modification to scope, cost and/or schedule based on collaboration with the contractor, Supported Command, designer and/or other entities.

5.18.3.12. In conjunction with the Engineering Technician (ET), review Activity Hazard Analysis (AHAs) and ensure these are discussed by the prime contractor and their respective subcontractors prior to beginning each work activity or when a new work crew is to perform the work.

- 5.18.3.13. In conjunction with the ET, review and recommend acceptance of Accident Prevention Plan.
 - 5.18.3.14. Prepare or coordinate the preparation of sketches and clarifying drawings in support of proposed changes and issuance of modifications.
 - 5.18.3.15. Review and recommend approval of contractors' cost-loaded network analysis schedules as the basis for payments and subsequent invoices (including recommendations for retainage and/or withholding as required).
 - 5.18.3.16. Provide support to the ET in reviewing and coordinating acceptance of Crane Critical Lift Plans along with crane operation qualifications and certificate of compliance.
 - 5.18.3.17. Provide support to the ET in securing/coordinating outages.
 - 5.18.3.18. Take appropriate, timely action to ensure contractor compliance of safety and health requirements, including recommended dismissal of key contractor staff due to nonperformance or recurring violations.
 - 5.18.3.19. Coordinate property record inventory documents, DD1354 Transfer and Acceptance of Military Real, in accordance with NAVFAC Business Management System (BMS) and in coordination with IPT Project Managers and Installation Real Property Accountable Officer (RPAO).
 - 5.18.3.20. Provide feedback to the assessing official regarding contractor performance for evaluations in CPARS and the processing of awards for outstanding performance, if applicable.
 - 5.18.3.21. Assist in completing required items to effectively close out a contract including receipt and delivery of asbuilt drawings, O&M manuals and warranty documents to the Supported Command/facility manager or local Civil Engineering Squadron (CES).
 - 5.18.3.22. Assist in providing effective and timely contractual correspondence.
 - 5.18.3.23. Assist in ensuring official contractor correspondence and submittals are included in the contract file.
 - 5.18.3.24. Keep the Contracting Officer's Representative (COR) updated as to the specific status of projects under his/her administrative and technical control.
 - 5.18.3.25. Provide certain contract information required in NAVFAC enterprise Information Technology (IT) systems.
 - 5.18.3.26. Provide project status updates to senior personnel within NAVFAC and Supported Commands.
 - 5.18.3.27. When asked, actively engage as assigned on teams formed to improve processes in any area of Design and Construction (D&C) construction business line. The improvement work is managed by the D&C Core and involves significant process analysis and redesign of systems and practices. The incumbent is expected to work with a team or in support of independent actions by process team leaders, lending his/her experience and expertise in the effort to improve D&C processes.
- 5.19. Construction Support Cost Engineer
- 5.19.1. Performance Requirements and Qualifications
 - 5.19.1.1. A minimum of five (5) years' experience working with Architectural, Engineering, or Construction firms in the general construction industry on commercial/industrial type facilities contracts with at least five (5) valued in excess of \$10 million.
 - 5.19.1.2. A minimum of five (5) years of experience using Costworks and MII (Microcomputer Aided Cost Estimating System Second Generation) cost estimating software.
 - 5.19.1.3. Desirable for the individual to have 3 years experience on NAVFAC or ACOE projects.
 - 5.19.2. Knowledge and Skills Required
 - 5.19.2.1. Knowledge of local, state, federal, and foreign country laws, codes, and other statutory requirements affecting cost estimating throughout the area of responsibility.

- 5.19.2.2. Analyzing and estimating extensive architectural/engineering alterations and modifications to existing facilities and new facilities.
- 5.19.2.3. Analysis of designs, drawings, proposals, scopes of work, and/or specifications to determine cost projections; and developing comprehensive budget cost estimates for complex construction assemblies and building systems composites for all facility project types, ranging from administrative and multi-family housing facilities to very complex industrial and operational facilities.
- 5.19.2.4. Development of detailed cost estimates for project under construction, either Design-Build or Design-Bid-Build. Experience required applying knowledge of construction task based scheduling, productivity rates, and development of crews and task durations.
- 5.19.2.5. Comprehensive knowledge of cost estimates, scheduling, and other required services in applying risk analysis concepts and their applicability to cost and schedule risk analysis.
- 5.19.2.6. Performing Quality Control and Quality Assurance and reviews of complex cost estimates, monitoring design-to targets, conformance with criteria and contractual requirements, and accuracy of estimates reviewed at any stage of the project development.
- 5.19.2.7. Experience with the use of Autodesk software, Microsoft Office products, cost engineering software (MII) and other applicable DoD computer systems and software used by the Command.
- 5.19.2.8. Experience in the use of Building Information Modeling (BIM), specifically Revit, is desirable.
- 5.19.2.9. Professional knowledge of cost engineering concepts, theories, principles, practices, and techniques necessary to plan, design, construct and maintain a wide range of shore based engineering projects.
- 5.19.3. Duties and Responsibilities
 - 5.19.3.1. Perform constructability reviews on solicitation packages whether they consist of performance and prescriptive requirements for design-build procurements or plans and specifications for design-bid build procurements as it relates to cost estimating.
 - 5.19.3.2. Prepare and analysis post award cost estimates and drive the development of action items and timely resolutions as they relate to cost estimating.
 - 5.19.3.3. Apply knowledge of construction task based scheduling, productivity rates, and development of crews and task durations to assigned duties.
 - 5.19.3.4. Perform technical analysis on contractor cost proposals and assist CM in developing recommended negotiation positions.
 - 5.19.3.5. Identify cost risks at post award design phase of a project, determine potential impact, and assist in developing governmental mitigation plans to alleviate or reduce the potential impact.
 - 5.19.3.6. Read and understand contractor baseline schedules and required two-week look-ahead and schedule updates. Knowledge and use of Primavera P6 scheduling software is highly desirable.
 - 5.19.3.7. Coordinate with designers, material suppliers, fabricators, and contractors in the development of complete total estimates including all construction trades.

5.20. Cost Engineer

5.20.1. Performance Requirements and Qualifications

- 5.20.1.1. Completion of a course of studies from the Accreditation Board for Engineers and Technology (ABET) or National Architectural Accrediting Board (NAAB) accredited program from a college or university leading to a bachelor's or master's degree in one of the following: electrical, mechanical, civil engineering or architecture. The degree must also be supplemented by a considerable amount of hands-on design experience. It is desired that the candidate have 3-5 years of prior work experience in the design and/or construction fields.

5.20.1.2. Certification as a Certified Cost Professional (CCP) as issued by the American Association of Cost Engineers or a Certification as a Certified Cost Engineer (CCE) issued by the DOD is desirable.

5.20.1.3. A minimum of 5 years of professional cost engineering accepted standard of practice experience for construction cost engineering, including renovation cost engineering experience, is required.

5.20.2. Knowledge and Skills Required

5.20.2.1. Professional knowledge and skill in applying the theories, concepts, principles, computer system applications, and methodology of any one of the following engineering/architectural sciences: Architecture, Construction, Civil, Mechanical, or Electrical Engineering, relevant to the full range of construction activities; conduct of studies and analysis of requirements for cost, labor, and/or materials; evaluation and advice on cost estimates and contract change orders.

5.20.2.2. Professional knowledge of cost engineering products including cost estimating, Cost Schedule and Risk Analysis, construction scheduling necessary to plan, design, construct and maintain a wide range of shore-based engineering projects.

5.20.2.3. Knowledge of DoD and Navy cost engineering criteria and policy.

5.20.2.4. Knowledge of local, state, federal, and foreign country laws, codes, and other statutory requirements affecting cost engineering design throughout the NAVFAC Atlantic AOR.

5.20.2.5. Knowledge of related architectural and engineering fields and their associated impacts as related to cost engineering.

5.20.2.6. Knowledge and experience with Autodesk software, Microsoft Office products, cost engineering software and other applicable DoD computer systems and software used by the Command.

5.20.2.7. Ability to produce results of analysis in writing; consolidate findings of others; and evaluate recommendations and facts.

5.20.2.8. Ability to communicate effectively to make oral presentations of proposed designs and results of studies.

5.20.2.9. Knowledge of budgeting, planning and project management techniques, including the ability to coordinate the work of others and lead teams.

5.20.2.10. Knowledge of and skill to work in full compliance with Safety Policy and Guidance, to include use of personal protective equipment.

5.20.3. Duties and Responsibilities

5.20.3.1. Provide independent, timely and professional cost engineering support, services and consultation for the planning, design, construction and maintenance of facilities for the Navy, Marine Corps, and other Supported Commands, including minor works projects, specific projects, special projects, military construction (MILCON), demolition, maintenance, space utilization and facilities development. Utilizing knowledge of engineering and architecture as it relates to cost, participates in planning, budgeting, designing and construction of substantial new construction, renovation and improvement projects for a variety of complex military construction projects. Participate in conferences with project stakeholders and collaborates with other engineering and architectural disciplines to ensure system coordination and integration with specific project requirements.

5.21. Electrical Engineering Technician

5.21.1. Performance Requirements and Qualifications

5.21.1.1. A minimum of 7 years of experience is required in the field of designing and producing electrical facility design drawings and specifications.

5.21.2. Knowledge and Skills Required

- 5.21.2.1. Substantial knowledge and practical application of electrical design concepts, theories, principles, practices, and techniques necessary to plan, design, construct and maintain a wide range of shore based engineering projects.
- 5.21.2.2. Knowledge of DoD and Navy guide specifications, criteria and policy, industry codes and standards, and standard practices as related to electrical engineering design, including the NFPA 70 (National Electrical Code), IEEE C2 (National Electrical Safety Code), and the International Building Code.
- 5.21.2.3. Knowledge of local, state, federal, and foreign country laws, codes, and other statutory requirements affecting electrical engineering design throughout the NAVFAC Atlantic AOR.
- 5.21.2.4. Knowledge of related architectural and engineering fields and their associated impacts as related to electrical engineering design.
- 5.21.2.5. Knowledge and experience with AutoCAD and/or REVIT software, Microsoft Office products, electrical engineering design and analysis software and other applicable DoD computer systems and software used by the Command.
- 5.21.2.6. Ability to make oral presentations of proposed designs and construction issues.
- 5.21.2.7. Knowledge of and full compliance with Safety Policy and Guidance and use of personal protective equipment.

5.21.3. Duties and Responsibilities

- 5.21.3.1. Typical projects include: new and renovation of administration, industrial, research, recreational, medical, security, waterfront, airfield, and living facilities.
- 5.21.3.2. Typical types of work include: interior and exterior lighting; facility power distribution systems - including standby power generation; telecommunication systems - including voice, data, cable TV and Wi-Fi; security systems – including closed circuit TV; grounding systems; lightning protection systems; medical facility systems; audio visual systems; and site electrical distribution – including medium-voltage distribution switchgear, substations, and transformers; site systems distribution; and overhead and underground distribution.
- 5.21.3.3. Make site investigation field trips to project sites, as required, to collect all pertinent data to perform design support and develop project scope by inspection of existing conditions and through meetings with sponsoring activity.
- 5.21.3.4. Coordinates activities with other engineers and architects to ensure that final detailed working drawings, specifications, and RFPs are properly integrated with the building systems.

5.22. Electrical Engineer

5.22.1. Performance Requirements and Qualifications

- 5.22.1.1. Bachelor Degree from an ABET accredited Electrical Engineering or Engineering Technology program.
- 5.22.1.2. Registration as Professional Engineer (PE) in the discipline of Electrical Engineering is desirable.
- 5.22.1.3. A minimum of 5 years of professional electrical engineering code compliant facilities design experience for new construction, including renovation design experience, is required.

5.22.2. Knowledge and Skills Required

- 5.22.2.1. Substantial knowledge and practical application of electrical engineering concepts, theories, principles, practices, and techniques necessary to plan, design, construct and maintain a wide range of shore based engineering projects.

- 5.22.2.2. Knowledge of DoD and Navy guide specifications, criteria and policy, industry codes and standards, and standard practices as related to electrical engineering design, including the NFPA 70 (National Electrical Code), IEEE C2 (National Electrical Safety Code), and the International Building Code.
- 5.22.2.3. Knowledge of local, state, federal, and foreign country laws, codes, and other statutory requirements affecting electrical engineering design throughout the NAVFAC Atlantic AOR.
- 5.22.2.4. Knowledge of budgeting, planning and project management techniques, including the ability to coordinate the work of others and lead teams.
- 5.22.2.5. Knowledge of related architectural and engineering fields and their associated impacts as related to electrical engineering design.
- 5.22.2.6. Conducts field evaluation and generates review comments for electrical design proficiency in accordance with code standards for in-house and A&E design submittals. Ensures comments are resolved and incorporated into the design. Assures A&E contract work has been satisfactorily completed. Conducts site visits prior to design to conduct assessments to generate electrical systems designs requirements. Assists with construction quality assurance by performing code required special inspections or required electrical observation. Witnesses acceptance testing and provide trouble shooting recommendations of electrical equipment and systems as part of the facility commissioning process.
- 5.22.2.7. Knowledge and experience with AutoCAD and/or REVIT software, Microsoft Office products, electrical engineering design and analysis software and other applicable DoD computer systems and software used by the Command.
- 5.22.2.8. Ability to produce results of analysis in writing and consolidate findings of others and evaluate recommendations and facts. Ability to make oral presentations of proposed designs and results of studies.
- 5.22.2.9. Knowledge of and full compliance with Safety Policy and Guidance and use of personal protective equipment.
- 5.22.3. Duties and Responsibilities
 - 5.22.3.1. Responsible for the preparation of detailed electrical engineering analysis, calculations and designs, development of plans using AutoCAD, specifications and cost estimates, in support of in-house and A/E design bid build and design-build projects, for a wide range of projects. Typical design projects include power generation systems, unit substations, MV overhead and underground distribution systems, lighting systems, power systems, lightning and grounding systems, cathodic protection, communication and AV systems, security systems, and other systems of major complexity for use by Naval Shore Facilities, including multi-story offices and quarters, hospitals, electrical generation and distribution, towers, airfields, aircraft overhaul facilities, industrial waste treatment plants, piers, photovoltaic farms, training facilities and a very wide diversification of other structures and facilities.
 - 5.22.3.2. Apply knowledge and skill to research electrical systems, equipment, or techniques in the development of electrical design projects. Analyze the applicability of innovative processes, systems, equipment, or techniques and implement such in projects and specifications.
 - 5.22.3.3. Demonstrate knowledge of the latest electrical materials and methods of construction. Prepare correspondence, status reports, economic analyses, calculations, engineering studies, fact sheets and technical reports. Experience in operating electrical design software (i.e., SKM, AGi32) is required.

- 5.22.3.4. Provide independent, timely and professional specialized electrical engineering support, services and consultation for the planning, design, construction and maintenance of facilities for the Navy, Marine Corps, and other Supported Commands, including minor works projects, specific projects, special projects, military construction (MILCON), demolition, maintenance, space utilization and facilities development. Participate in conferences with project stakeholders and collaborates with other engineering and architectural disciplines to ensure system coordination and integration with specific project requirements.
- 5.22.3.5. Typical projects include new and renovation of administration, industrial, research, recreational, medical, security, waterfront, airfield, and living facilities. Typical types of work include: interior and exterior lighting; facility power distribution systems, including standby power generation; telecommunication systems - including voice, data, cable TV and Wi-Fi; security systems – including closed circuit TV; grounding systems; lightning protection systems; medical facility systems; audio visual systems; and site electrical distribution including medium-voltage distribution switchgear, substations, and transformers; site systems distribution; and overhead and underground distribution.

5.23. Electrical Engineer – Senior

5.23.1. Performance Requirements and Qualifications

- 5.23.1.1. Completion of a course of studies accredited by the Accreditation Board for Engineers and Technology (ABET) for an electrical engineering program or electrical engineering technology program from a college or university for a bachelor's or master's degree in electrical engineering.
- 5.23.1.0. Registration as Professional Engineer (PE) in the discipline of Electrical Engineering is required.
- 5.23.1.1. A minimum of 10 years of professional electrical engineering code compliant facilities design experience for new construction, including renovation design experience, is required.

5.23.2. Knowledge and Skills Required

- 5.23.2.1. Has the ability to apply new developments or experimental theories in electrical engineering to problems not readily treatable by conventionally accepted methods. The engineer has obtained a mastery of advanced concepts, principles and practices in electrical engineering that enables them to serve as a recognized subject matter expert. Applies engineering skills to effectively assess customer's requirements and develop innovative solutions.
- 5.23.2.2. Expert knowledge of DOD and Navy guide specifications, criteria and policy, industry codes and standards, and standard practices as related to electrical engineering design, including the NFPA 70 (National Electrical Code), IEEE C2 (National Electrical Safety Code), and the International Building Code.
- 5.23.2.3. Expert knowledge of local, state, federal, and foreign country laws, codes, and other statutory requirements affecting electrical engineering design throughout the NAVFAC Mid-Atlantic AOR.
- 5.23.2.4. Knowledge of related architectural and engineering fields and their associated impacts as related to electrical engineering design.
- 5.23.2.5. Knowledge and experience with AutoCAD and/or REVIT software, Microsoft Office products, electrical engineering design and analysis software and other applicable DoD computer systems and software used by the Command.
- 5.23.2.6. Ability to produce results of analysis in writing and consolidate findings of others and evaluate recommendations and facts. Ability to make oral presentations of proposed designs and results of studies.
- 5.23.2.7. Knowledge of budgeting, planning and project management techniques, including the ability to coordinate the work of others and lead teams.

- 5.23.2.8. Knowledge of and full compliance with Safety Policy and Guidance and use of personal protective equipment.
- 5.23.2.9. The selected employee has the ability to apply new developments or experimental theories in electrical engineering to problems not readily treatable by conventionally accepted methods. The engineer has obtained a mastery of advanced concepts, principles and practices in electrical engineering that enables them to serve as a recognized subject matter expert.
- 5.23.2.10. Specific subject matter expertise shall include the following: Power Distribution including Power Plant Operations & Maintenance, Lighting & Security Systems, Life Safety/Fire Alarms-MNS/Emergency Lighting, Emergency/Standby Power Systems, Telecom/Data Distribution, Applies engineering skills to effectively assess customer's requirements and develop innovative solutions.
- 5.23.2.11. Expert knowledge of DOD, UFC and Navy guide specifications, criteria and policy, industry codes and standards, and standard practices as related to electrical engineering design, including the NFPA 70 (National Electrical Code), IEEE C2 (National Electrical Safety Code), and the International Building Code.
- 5.23.2.12. Expert knowledge of local, state, federal, and foreign country laws, codes, PWD ME Electrical Standards and other statutory requirements affecting electrical engineering design throughout the PWD Maine's AOR.
- 5.23.2.13. Expert knowledge of the Portsmouth Naval Shipyard Kittery, Maine; NCTAMSLANT DET Cutler, Maine; NAVSOC DET A Prospect Harbor and other facilities within the PWD ME AOR including expert knowledge of the electrical generation & distribution systems, Life Safety/Fire Alarms-MNS/Emergency Lighting systems, Emergency/Standby Power Systems,
- 5.23.2.14. Telecom/Data Distribution systems, Lighting & Security systems at each facility.
- 5.23.2.15. Expert knowledge of the power requirements for submarines when berthed or dry docked at a Naval Shipyard.
- 5.23.2.16. Knowledge of related architectural and engineering fields and their associated impacts as related to electrical engineering design. The selected employee shall be an electrical utility expert.
- 5.23.2.17. Knowledge and experience with AutoCAD software, Microsoft Office products, electrical engineering design and analysis software including SKM, and other applicable DoD computer systems and software used by the Command.
- 5.23.2.18. Ability to produce results of analysis in writing and consolidate findings of others and evaluate recommendations and facts. Ability to make oral presentations of proposed designs and results of studies.
- 5.23.2.19. The selected employee shall be a power quality and compliance subject matter expert, and be able to provide project management in these areas.
- 5.23.2.20. Knowledge of budgeting, planning and project management techniques, including the ability to coordinate the work of others, multi discipline, and lead teams.
- 5.23.2.21. Knowledge of and full compliance with Safety Policy and Guidance and use of personal protective equipment. The selected employee shall be a life safety subject matter expert.
- 5.23.3. Duties and Responsibilities
 - 5.23.3.1. Provides independent, timely and professional specialized electrical engineering support, services and consultation for the planning, design, construction and maintenance of facilities for the Navy, Marine Corps, and other Supported Commands, including minor works projects, specific projects, special projects, military construction (MILCON), demolition, maintenance, space utilization and facilities development. Participates in conferences with project stakeholders and collaborates with other engineering and architectural disciplines to ensure system coordination and integration with specific project requirements.

- 5.23.3.2. Typical projects include new and renovation of administration, industrial, research, recreational, medical, security, waterfront, airfield, and living facilities.
- 5.23.3.3. Typical types of work include: interior and exterior lighting; facility power distribution systems - including standby power generation; telecommunication systems - including voice, data, cable TV and Wi-Fi; security systems – including closed circuit TV; grounding systems; lightning protection systems; medical facility systems; audio visual systems; and site electrical distribution – including medium-voltage distribution switchgear, substations, and transformers; site systems distribution; and overhead and underground distribution.

5.24. Fire Protection Engineering Technician

5.24.1. Performance Requirements and Qualifications

- 5.24.1.1. NICET Certification in the design of fire alarms, water based suppression and/or special hazard systems is highly desired.
- 5.24.1.2. A minimum of 7 years of experience is required preferably in the field of fire protection engineering technology drafting facility design drawings using AutoDesk applications including REVIT and producing specifications.

5.24.2. Knowledge and Skills Required

- 5.24.2.1. Proficiency in REVIT and AutoCAD is required. Must be capable of operating Microsoft Office products, fire protection engineering design tools (AutoSPRINK, HASS) and other applicable DoD computer systems and software used by the Command.
- 5.24.2.2. Knowledge of DoD and Navy guide specifications, criteria and policy, industry codes and standards, and standard practices as related to fire protection engineering design. Examples include UFC 3-600-01, NFPA Codes and Standards including NFPA 13, 72 and 101 (Life Safety Code) and the International Building Code.
- 5.24.2.3. Ability to produce results of analysis in writing and consolidate findings of others and evaluate recommendations and facts.
- 5.24.2.4. Knowledge of budgeting, planning and project management techniques, including the ability to coordinate the work of others and lead teams.
- 5.24.2.5. Knowledge of and full compliance with Safety Policy and Guidance, and use of personal protective equipment.

5.24.3. Duties and Responsibilities

- 5.24.3.1. Provide technical support for an office of fire protection engineers performing design of new and modification to existing; fire alarm and combination fire alarm/ mass notification systems, water based suppression systems including wet pipe, dry pipe and pre-action systems with nitrogen generators, foam systems and fire pumps, special hazard systems such as clean agent suppression including air sampling detection and releasing controls. Responsibilities also include production of code analysis and summary drawings addressing Unified Facilities Criteria, Life Safety Code and International Building Code compliance.
- 5.24.3.2. Typical facility projects include: administration, educational, industrial, research and testing, storage, hospitals, communications, computer/IT, command and control, dry docks, military training, simulators, hangars, and residential facilities. Infrastructure projects include water supply and base wide fire alarm reporting systems.
- 5.24.3.3. Coordinates activities with design managers and other engineering disciplines and architects to ensure that final detailed working drawings, specifications, and RFPs are properly integrated.
- 5.24.3.4. Could be asked to assist with site investigation/ field trips to collect all pertinent data necessary to develop project scope and perform design support such as inspection of existing conditions by taking measurements and testing systems, fire pumps and water supplies.

5.25. Fire Protection Engineer

5.25.1. Performance Requirements and Qualifications

- 5.25.1.1. Bachelor Degree from an ABET accredited Mechanical Engineering or Fire Protection Engineering program and minimum of 5 years of Fire Protection System design including at least 1 year working on Capital Improvement projects for a Federal Agency.
- 5.25.1.2. Registration as Professional Engineer (PE) in the discipline of Fire Protection Engineering is desirable.
- 5.25.1.3. A minimum of 5 years of professional fire protection engineering code compliant facilities design experience for new construction, including renovation design experience, is required.

5.25.2. Knowledge and Skills Required

- 5.25.2.1. Substantial professional knowledge and practical application of fire protection engineering concepts, theories, principles, practices, and techniques necessary to plan, design, construct and maintain a wide range of shore based engineering projects.
- 5.25.2.2. Knowledge of DoD and Navy guide specifications, criteria and policy, industry codes and standards, and standard practices as related to fire protection engineering design, including the Unified Facilities Criteria (UFC), National Fire Protection Association (NFPA) codes and standards, International Building Code (IBC), International Mechanical Code (IMC), International Residential Code (IRC), FM Global Loss Prevention Data Sheets, Society of Fire Protection Engineer's Handbook, and various other industry standards.
- 5.25.2.3. Knowledge of local, state, federal, and foreign country laws, codes, and other statutory requirements affecting fire protection engineering design throughout the NAVFAC Mid-Atlantic AOR.
- 5.25.2.4. Knowledge of related architectural and engineering fields and their associated impacts as related to fire protection engineering design. Ability to make oral presentations of proposed designs and results of studies.
- 5.25.2.5. Knowledge and experience with Autodesk software, Microsoft Office products, fire protection engineering design and analysis software and other applicable DoD computer systems and software used by the Command.
- 5.25.2.6. Ability to produce results of analysis in writing and consolidate findings of others and evaluate recommendations and facts.
- 5.25.2.7. Knowledge of budgeting, planning and project management techniques, including the ability to coordinate the work of others and lead teams.
- 5.25.2.8. Knowledge of and full compliance with Safety Policy and Guidance, and use of personal protective equipment.

5.25.3. Duties and Responsibilities

- 5.25.3.1. Responsible for the preparation of detailed Building Code and Life Safety Code analyses and analysis of fire detection, mass notification and suppression systems. Prepare designs and plans using AutoCAD, Requests for Proposals (RFPs), specifications, and cost estimates, in support of in-house and Architect/Engineer (A&E) designbid-build and design-build projects, for a wide range of new or rehabilitated DoD facilities and infrastructure projects. Analyze existing buildings and building egress systems to determine adequacy of egress and construction type for existing conditions and proposed changes to buildings and building occupancies. Investigate and recommend corrective measures for deficiencies in existing facilities. Typical design projects include Naval Shore Facilities, including multi-story offices and quarters, hangars, hospitals, towers, aircraft overhaul facilities, piers, training facilities and a very wide diversity of other new and existing structures and facilities.

- 5.25.3.2. Analyze the applicability of fire protection innovative processes, systems, equipment, or techniques and implement such on projects and specifications. Demonstrate knowledge of the latest fire protection systems and methods of construction. Prepare correspondence, engineering studies, and technical reports regarding fire protection and Life Safety related topics. Apply knowledge of detection and suppression system components and how such components are correctly installed or incorrectly installed. Communicate effectively issues to technician level personnel responsible for the installation, testing, and maintenance of fire protection systems and system components.
- 5.25.3.3. Provides independent, timely and professional fire protection engineering support, services and consultation for the planning, design, construction and maintenance of facilities for the Navy, Marine Corps, and other Supported Commands, including minor works projects, specific projects, special projects, military construction (MILCON), demolition, maintenance, space utilization and facilities development. Participates in conferences with project stakeholders and collaborates with other engineering and architectural disciplines to ensure system coordination and integration with specific project requirements.
- 5.25.3.4. Typical projects include: fire protection engineering services for life safety, type of construction, height and area requirements, separation distances, fire rated construction, spray-applied fireproofing, firestopping, sprinkler systems, fire alarm systems, mass notification systems, clean agent fire suppression systems, base-wide fire alarm reporting systems, water distribution systems, hydraulic analysis, fire modeling, and performance based designs of major size and complexity for use in government facilities, including multi-story office buildings, steam plants, hospitals, housing, manufacturing, training, and similar structures.

5.26. Fire Protection Engineer – Senior

5.26.1. Performance Requirements and Qualifications

- 5.26.1.1. Completion of a course of studies accredited by the Accreditation Board for Engineers and Technology (ABET) for a fire protection engineering program from a college or university for a bachelor's or master's degree in fire protections engineering, supplemented by a considerable amount of hands-on facilities design experience, is required.
- 5.26.1.2. Registered as Professional Engineer (PE) in the discipline of Fire Protection Engineering is required.
- 5.26.1.3. A minimum of 10 years of professional fire protection engineering code compliant facilities design experience for new construction, including renovation design experience, is required.

5.26.2. Knowledge and Skills Required

- 5.26.2.1. The employee has the ability to apply new developments or experimental theories in fire protection engineering to problems not readily treatable by conventionally accepted methods. The engineer has obtained a mastery of advanced concepts, principles and practices in fire protection engineering that enables them to serve as a recognized subject matter expert.
- 5.26.2.2. Applies engineering skills to effectively assess customer's requirements and develop innovative solutions.
- 5.26.2.3. An in depth knowledge of DOD and Navy guide specifications, criteria and policy, industry codes and standards, and standard practices as related to fire protection engineering design, including the Unified Facilities Criteria (UFC), National Fire Protection Association (NFPA) codes and standards, International Building Code (IBC), International Mechanical Code (IMC), International Residential Code (IRC), FM Global Loss Prevention Data Sheets, Society of Fire Protection Engineer's Handbook, and various other industry standards.
- 5.26.2.4. An in depth knowledge of local, state, federal, and foreign country laws, codes, and other statutory requirements affecting fire protection engineering design throughout the NAVFAC AOR.

- 5.26.2.5. Knowledge of related architectural and engineering fields and their associated impacts as related to fire protection engineering design.
- 5.26.2.6. Knowledge and experience with Autodesk software, Microsoft Office products, fire protection engineering design and analysis software and other applicable DoD computer systems and software used by the Command.
- 5.26.2.7. Ability to produce results of analysis in writing and consolidate findings of others and evaluate recommendations and facts.
- 5.26.2.8. Ability to make oral presentations of proposed designs and results of studies.
- 5.26.2.9. Knowledge of budgeting, planning and project management techniques, including the ability to coordinate the work of others and lead teams.
- 5.26.2.10. Knowledge of and full compliance with Safety Policy and Guidance, and use of personal protective equipment.
- 5.26.3. Duties and Responsibilities
 - 5.26.3.1. Provides independent, timely and professional specialized fire protection engineering support, services and consultation for the planning, design, construction and maintenance of facilities for the Navy, Marine Corps, and other Supported Commands, including minor works projects, specific projects, special projects, military construction (MILCON), demolition, maintenance, space utilization and facilities development. Participates in conferences with project stakeholders and collaborates with other engineering and architectural disciplines to ensure system coordination and integration with specific project requirements.
 - 5.26.3.2. Typical projects include: fire protection engineering services for life safety, type of construction, height and area requirements, separation distances, fire rated construction, spray-applied fireproofing, firestopping, sprinkler systems, fire alarm systems, mass notification systems, clean agent fire suppression systems, base-wide fire alarm reporting systems, water distribution systems, hydraulic analysis, fire modeling, and performance based designs of major size and complexity for use in government facilities, including multi-story office buildings, steam plants, hospitals, housing, manufacturing, training, and similar structures.

5.27. General Engineer

5.27.1. Performance Requirements and Qualifications:

- 5.27.1.1. Registration as a Professional Engineer (PE) or Registered Architect (RA) is required.
- 5.27.1.2. A minimum of 5 years of project management experience in the execution of military construction (MILCON)

5.27.2. Knowledge and Skills Required

- 5.27.2.1. Broad professional knowledge and skill in project management.
- 5.27.2.2. Mastery of advanced concepts, principles and practices in project management as well as accepted business practices, contract administration, Military Construction program regulations and procedures, design and construction practices, funding management, and functions/procedures of all organizational components is required.
- 5.27.2.3. Broad professional engineering or architectural knowledge and skill, to provide consultative services on the entire range of architectural and engineering activities for facilities construction and to solve problems that may not be resolved by routine methods, theories, concepts, principles and practices in engineering or architecture.
- 5.27.2.4. Professional knowledge and experience in general engineering or architecture. Skill in exercising initiative and leadership through ingenuity, persuasive ability, fairness, integrity, tact and sound judgment to manage teams and provide support to other Project Managers.

- 5.27.2.5. Knowledge of standards, codes and practices of engineering and architecture governing the identification, execution and delivery of technical products and services; knowledge of contracting for government services as well as knowledge of the contractor selection process; and knowledge of organization, budgeting, planning, and project management techniques to review, assess, and resolve design and construction issues.
- 5.27.2.6. Expert knowledge of NAVFAC facilities acquisition, as well as project funding authority levels and sources, contract requirements, contract documents, proposal and bidding procedures, types and use of contracts such as those used in Navy and Marine Corps shore facilities design, construction, environmental compliance, planning and real estate to support procurement on design and construction contracts.
- 5.27.2.7. Ability to communicate effectively through oral and written expressions, and have the ability to work effectively with other professionals; field questions; de-conflict issues and defend policies.
- 5.27.3. Duties and Responsibilities
 - 5.27.3.1. Provides independent, timely and professional project management services for the planning, design and construction of assigned projects for the Navy, Marine Corps, and other Supported Commands, including minor works projects, special projects, military construction (MILCON), demolition, maintenance, space utilization and facilities development.
 - 5.27.3.2. The work includes a broad spectrum of planning, design, and construction projects. Typical services include all aspects of development of project scope, schedule, design cost estimates, construction cost estimates, obtaining permits, development of design and construction contract acquisition strategies, design scope development, design oversight, and construction oversight and other required services.
 - 5.27.3.3. Serves as liaison between project team and Supported Commander. Serves as focal point to Supported Commanders, higher echelon, and field offices, on information for projects assigned regarding status of individual projects, and reviews and acts on correspondence concerning assigned projects.
 - 5.27.3.4. Demonstrates leadership and technical skills while relating these skills to project management functions: project planning, budgeting, programming, engineering, design, execution, and construction of shore facilities.

5.28. General Engineer - Senior

5.28.1. Performance Requirements and Qualifications:

- 5.28.1.1. Registration as a Professional Engineer (PE) or Registered Architect (RA) is required.
- 5.28.1.2. A minimum of 10 years of project management experience in the execution of military construction (MILCON)

5.28.2. Knowledge and Skills Required

- 5.28.2.1. Broad professional knowledge and skill in project management.
- 5.28.2.2. Mastery of advanced concepts, principles and practices in project management as well as accepted business practices, contract administration, Military Construction program regulations and procedures, design and construction practices, funding management, and functions/procedures of all organizational components is required.
- 5.28.2.3. Broad professional engineering or architectural knowledge and skill, to provide consultative services on the entire range of architectural and engineering activities for facilities construction and to solve problems that may not be resolved by routine methods, theories, concepts, principles and practices in engineering or architecture.
- 5.28.2.4. Professional knowledge and experience in general engineering or architecture. Skill in exercising initiative and leadership through ingenuity, persuasive ability, fairness, integrity, tact and sound judgment to manage teams and provide support to other Project Managers.

- 5.28.2.5. Knowledge of standards, codes and practices of engineering and architecture governing the identification, execution and delivery of technical products and services; knowledge of contracting for government services as well as knowledge of the contractor selection process; and knowledge of organization, budgeting, planning, and project management techniques to review, assess, and resolve design and construction issues.
- 5.28.2.6. Expert knowledge of NAVFAC facilities acquisition, as well as project funding authority levels and sources, contract requirements, contract documents, proposal and bidding procedures, types and use of contracts such as those used in Navy and Marine Corps shore facilities design, construction, environmental compliance, planning and real estate to support procurement on design and construction contracts.
- 5.28.2.7. Ability to communicate effectively through oral and written expressions, and have the ability to work effectively with other professionals; field questions; de-conflict issues and defend policies.
- 5.28.3. Duties and Responsibilities
 - 5.28.3.1. Provides independent, timely and professional project management services for the planning, design and construction of assigned projects for the Navy, Marine Corps, and other Supported Commands, including minor works projects, special projects, military construction (MILCON), demolition, maintenance, space utilization and facilities development.
 - 5.28.3.2. The work includes a broad spectrum of planning, design, and construction projects. Typical services include all aspects of development of project scope, schedule, design cost estimates, construction cost estimates, obtaining permits, development of design and construction contract acquisition strategies, design scope development, design oversight, and construction oversight and other required services.
 - 5.28.3.3. Serves as liaison between project team and Supported Commander. Serves as focal point to Supported Commanders, higher echelon, and field offices, on information for projects assigned regarding status of individual projects, and reviews and acts on correspondence concerning assigned projects.
 - 5.28.3.4. Demonstrates leadership and technical skills while relating these skills to project management functions: project planning, budgeting, programming, engineering, design, execution, and construction of shore facilities.

5.29. Geotechnical Engineer

5.29.1. Performance Requirements and Qualifications

- 5.29.1.1. Bachelor Degree from an ABET accredited Civil Engineering or Engineering Technology program with an emphasis in geotechnical engineering and a minimum of 5 years of geotechnical design related experience. A Master's Degree in Geotechnical Engineering is preferred.
- 5.29.1.2. Registration as a Professional Engineer in geotechnical or civil/structural with emphasis in geotechnical engineering is highly desirable.
- 5.29.1.3. A minimum of 5 years of professional geotechnical engineering code compliant facilities design experience for new construction, including renovation design experience, is required.

5.29.2. Knowledge and Skills Required

- 5.29.2.1. Analyzes data and uses geotechnical experience to determine and predict specially developed foundation shear strength and settlement potential for various materials encountered. Determines testing parameters for soil conditions to design structural foundations.

- 5.29.2.2. Initiates field trips to project sites to evaluate scoping, design, and construction. Inspects existing conditions of soils and foundations to ascertain possible problems and recommend corrective measures. Interfaces with customer and other interested parties providing consultation and gathering pertinent information required to complete project scoping, designs and failure analysis and remedial measures.
- 5.29.2.3. Must have the ability to make technical decisions and recommendations for requirements due to the dynamic nature of the position. Mastery of advanced concepts, principles and practices in geotechnical engineering that enables the contractor personnel to serve as an expert in the complex areas of soil mechanics and pavement design.
- 5.29.2.4. Capable of applying new developments and experienced judgment to solve geotechnical engineering problems.
- 5.29.2.5. Knowledge and experience with Autodesk software, Microsoft Office products, geotechnical engineering design and analysis software and other applicable DoD computer systems and software used by the Command.
- 5.29.2.6. Ability to produce results of analysis in writing and consolidate findings of others and evaluate recommendations and facts.
- 5.29.2.7. Ability to make oral presentations of proposed designs and results of studies.
- 5.29.2.8. Knowledge of budgeting, planning and project management techniques, including the ability to coordinate the work of others and lead teams.
- 5.29.2.9. Knowledge of and full compliance with Safety Policy and Guidance and use of personal protective equipment.
- 5.29.3. Duties and Responsibilities
 - 5.29.3.1. Responsible for preparing and reviewing detailed geotechnical engineering analyses, calculations, designs, plans using AutoCAD, Requests-for-Proposals (RFPs), specifications, and cost estimates, in support of in-house and Architect/Engineer (A&E) design-bid-build and design-build projects, for a wide range of facilities projects and foundation systems. Responsible for the preparing and evaluating complex site characterization studies; performing geotechnical analyses including slope stability, seepage, settlement, shallow and deep foundations, seismic, geotechnical considerations for LID features, and pavements. Projects may include administrative, operational, industrial, hangars, waterfront, housing, and other types of structures and geotechnical components for new and existing facilities.
 - 5.29.3.2. Perform construction sites visits to investigate construction activities, evaluate conditions and provide advice to the Government on technical direction for earthwork, foundation, and pavement problems. Demonstrate knowledge in investigating and recommending corrective measures for latent conditions or failures in existing facilities on all geotechnical engineering aspects.
 - 5.29.3.3. Apply knowledge and skill to research standard geotechnical engineering systems, equipment or techniques in the development of design projects. Analyze the applicability of innovative processes, systems, equipment, or techniques and implement such on projects and specifications. Prepare correspondence, engineering studies, and technical reports regarding geotechnical engineering related topics. Performs geotechnical constructability reviews. Experience in operating design software Rockware, MATHCAD, AllPile, PCASE, Settle3d, and SlopeW to support geotechnical evaluations is preferred.

- 5.29.3.4. Provides independent, timely and professional specialized geotechnical engineering support, services and consultation for the planning, design, construction and maintenance of facilities for the Navy, Marine Corps, and other Supported Commands, including minor works projects, specific projects, special projects, military construction (MILCON), demolition, maintenance, space utilization and facilities development. Participates in conferences with project stakeholders and collaborates with other engineering and architectural disciplines to ensure system coordination and integration with specific project requirements.
- 5.29.3.5. Responsible for coordinating all project activities in the specialized area of geotechnical and pavements engineering, in accordance with related UFC Criteria.
- 5.29.3.6. Supports the design of In-House projects and Request for Proposal (RFPs) as a team member for complex projects. Reviews designs (i.e., specs, drawings, and cost) and RFPs prepared by consultant Architects Engineers (AEs). Knowledgeable in the development of final working drawings utilizing current AutoCAD technology. Monitors construction, ensuring the geotechnical aspects of the project are in accordance with the contract plans and specifications. Reviews contractor submittals of shop drawings, samples of materials and other design-related items. Confers with the construction contractor and designer (if A/E work) to resolve problems or latent conditions that may arise after construction. Makes recommendations for corrective/preventative measures, as appropriate. Ensures that changes in costs, quantity, scope, schedules, design, or any other terms and conditions of the contract are coordinated or approved, as appropriate.

5.30. Geotechnical Engineer – Senior

5.30.1. Performance Requirements and Qualifications

- 5.30.1.1. Completion of a course of studies accredited by the Accreditation Board for Engineers and Technology (ABET) for a Civil/Structural with emphasis in geotechnical engineering program from a college or university earning a master's degree, is required.
- 5.30.1.2. Registration as a Professional Engineer in geotechnical or civil/structural with emphasis in geotechnical engineering is required..
- 5.30.1.3. A minimum of 10 years of professional geotechnical engineering code compliant facilities design experience for new construction, including renovation design experience, is required.

5.30.2. Knowledge and Skills Required

- 5.30.2.1. Must have the ability to make technical decisions and recommendations for requirements due to the dynamic nature of the position. Mastery of advanced concepts, principles and practices in geotechnical engineering that enables them to serve as an expert in the complex areas of soil mechanics and pavement design.
- 5.30.2.2. Capable of applying new developments and experienced judgment to solve novel and obscure geotechnical engineering problems.
- 5.30.2.3. Knowledge and experience with Autodesk software, Microsoft Office products, mechanical engineering design and analysis software and other applicable DoD computer systems and software used by the Command.
- 5.30.2.4. Ability to produce results of analysis in writing and consolidate findings of others and evaluate recommendations and facts.
- 5.30.2.5. Ability to make oral presentations of proposed designs and results of studies.
- 5.30.2.6. Knowledge of budgeting, planning and project management techniques, including the ability to coordinate the work of others and lead teams.
- 5.30.2.7. Knowledge of and full compliance with Safety Policy and Guidance and use of personal protective equipment.

5.30.3. Duties and Responsibilities

- 5.30.3.1. Provide independent, timely and professional specialized geotechnical engineering support, services and consultation for the planning, design, construction and maintenance of facilities for the Navy, Marine Corps, and other Supported Commands, including minor works projects, specific projects, special projects, military construction (MILCON), demolition, maintenance, space utilization and facilities development. Participates in conferences with project stakeholders and collaborates with other engineering and architectural disciplines to ensure system coordination and integration with specific project requirements.
- 5.30.3.2. Responsible for coordinating all activities in the specialized area of geotechnical and pavements engineering, in accordance with related UFC Criteria.
- 5.30.3.3. Supports the design of In-House projects and Request for Proposal (RFPs) as a team member for complex projects. Reviews designs (i.e., specs, drawings, and costs) and RFPs prepared by consultant Architects-Engineers (AEs).
- 5.30.3.4. Knowledgeable in the development of final working drawings utilizing current AutoCAD technology. Monitors construction, ensuring the geotechnical aspects of the project are in accordance with the contract plans and specifications. Reviews contractor submittals of shop drawings, samples of materials and other design-related items. Confers with the construction contractor and designer (if A/E work) to resolve problems or latent conditions that may arise after construction. Makes recommendations for corrective/preventative measures, as appropriate. Ensures that changes in costs, quantity, scope, schedules, design, or any other terms and conditions of the contract are coordinated or approved, as appropriate.
- 5.30.3.5. Due to the varied design and construction techniques, geotechnical criteria, seismic activity, climatic conditions, coordination and code requirements design techniques, cost estimating and communications are very complex.
- 5.30.3.6. Analyzes data and uses geotechnical experience to determine and predict specially developed foundation shear strength and settlement potential for various materials encountered. Determines testing parameters for soil conditions to design structural foundations.
- 5.30.3.7. Initiates field trips to project sites to evaluate scoping, design, and construction. Inspects existing conditions of soils and foundations to ascertain possible problems and recommend corrective measures. Interfaces with customer and other interested parties providing consultation and gathering pertinent information required to complete project scoping, designs and failure analysis and remedial measures.

5.31. GIS Analyst

5.31.1. Performance Requirements and Qualifications

- 5.31.1.1. Education Requirements: Bachelor's Degree in Geographic Information Systems (GIS)/Science, Geography; or related physical or social science such as geology, biology, environmental science, engineering, anthropology, political science, cartography, computer science, urban studies, or planning, or related field; Master's degree preferred.
- 5.31.1.2. Certification: American Institute of Certified Planners (AICP) preferred and Geographic Information Systems Professional (GISP) required.
- 5.31.1.3. Experience: A minimum of five years of GIS experience, including three years with a large multi-user GIS and using advanced level spatial analysis. Experience with ArcGIS Enterprise, ArcGIS Online, and ArcGIS Pro and extensions including Data Reviewer, Data Interoperability, and Spatial Analyst. Additional experience should include 3D modeling, scene depiction, and animations via GIS software. Preferred additional experience should include: relationship diagram creation, developing scripts in SQL and Python, and experience in the master planning field.
- 5.31.1.4. Project Management: Demonstrated project management and organizational skills are required.

5.31.2. Knowledge and Skills Required

- 5.31.2.1. Technology Proficiency: Proficient with ArcGIS Enterprise, ArcGIS Online, and ArcGIS Pro and extensions including Data Reviewer, Data Interoperability, and Spatial Analyst. Familiarity with additional Environmental Systems Research Institute (ESRI) tools and applications, Microsoft SharePoint Content Management System (CMS), and Microsoft Power Platform. Ability to translate training improvements and requirements to clients, stakeholders, and programmers. Proficiency with word-processing, graphics, and presentation tools (MS Word, PowerPoint, Excel, and Visio). Ability to develop clear and concise linear and non-linear storyboards for programmers/developers including graphic concepts, user interactions, navigation, and related elements.
- 5.31.2.2. Project Management and Coordination: Demonstrated ability to manage timelines, resources, and collaboration with clients, stakeholders, and programmers in a highly de-centralized / virtual environment. Support requirements building and generation for emerging efforts through documentation, diagramming, charting, system architecture, etc.
- 5.31.2.3. Strategic Communications: Superior knowledge of the English language including the ability to read, comprehend, communicate information and ideas effectively to a wide range of audiences.

5.31.3. Duties and Responsibilities

- 5.31.3.1. Curriculum Planning: Recommend and develop additions to training curriculum, including design and organization of educational content.
- 5.31.3.2. Data Creation & Maintenance: Create, edit, and maintain GIS data in the Navy Data Model (NDM) schema for Navy products & services. Review and evaluate Data Collection Guidance (DCG) specifications for accuracy and consistency.
- 5.31.3.3. Map/Product/Solution Creation & Maintenance: Create, edit, and maintain GIS maps, products, and solutions.
- 5.31.3.4. Data Review: Review and validate GIS data for compliance with the Navy Data Model (NDM) schema in accordance with the Navy IGI&S Data Collection Guidance (DCG) specifications. Perform data conversion migration, and translation activities utilizing advanced processing techniques.
- 5.31.3.5. Data Health Management: Review and validate reports and GIS data metrics for compliance with the Navy Data Model (NDM).
- 5.31.3.6. Reporting & Engagement: Develop and distribute reports, briefings, and products. Present relevant information in an understandable way in meetings and presentations.
- 5.31.3.7. Continuous Training Improvement: Conduct assessment of trainings, documentation, course content, and delivery and propose and implement improvements on a continuous basis to ensure course content and delivery meet learning objectives and engage students effectively. Update curriculum content and format to reflect evolving requirements and improve participant learning experience. Identify training and curriculum gaps, make recommendations, and develop new training materials to advance learning.
- 5.31.3.8. Website Management: Use the SharePoint Content Management System (CMS) to manage and update website content on an ongoing basis. Assist other Subject Matter Experts (SME) with the development, creation, and maintenance of professional videos and tools.
- 5.31.3.9. Program Support: Perform a range of logistical and administrative duties to support overall training preparation, execution, and improvement. Domestic and/or international travel may be required to support in-person courses and other types of GIS support. Analyze geographical data, work collaboratively with other team members, and understand and communicate GIS theories, applications, technologies, and concepts. Research and develop geospatial products for enterprise-wide or project use.

- 5.31.3.10. Application Development, Implementation, Testing, and M&S Support: Support software design and development for various Navy tools. This includes requirements development and creation of related product documentation (including but not limited to system architecture diagrams, wireframes, workflow diagrams, wireframes, and QA/QC test plans). Conduct QA/QC testing and support maintenance and sustainment (M&S) of platforms, as directed.
- 5.31.3.11. Administrative Tasks: Support data calls, workshops, trainings, meetings, requests, system account management, the following administrative tasks: development, delivery, and evaluation of regular training demand surveys; technology, and logistics; development of agenda, notes, and supporting materials; real-time support during course delivery for A/V setup, management, and breakdown and other on-site coordination, as assigned. Support onboarding of new users of various GIS tools and platforms.
- 5.31.3.12. Community Support: Provide GIS technical support through available communications channels and through training and Q&A sessions and ad hoc assistance.

5.32. Instructional Design Project Manager

5.32.1. Performance Requirements and Qualifications

- 5.32.1.1. Instructional Design: Bachelor's Degree in Instructional Design, Education, or related field; Master's degree preferred.
- 5.32.1.2. Certification: None required. PMP preferred.
- 5.32.1.3. Experience: A minimum of 5 years of Instructional Systems Design (ISD) experience, including full lifecycle of ISD process with experience in evaluating existing curriculum and updating and developing engaging, experiential, instructor-led training as well as web-based and blended training materials and instructional delivery methods that are Section 508-compliant. Ability to develop clear and concise linear and non-linear storyboards for programmers/online developers including graphic concepts, audio scripts, user interactions, navigation, and related elements.
- 5.32.1.4. Project Management: Demonstrated project management and organizational skills are required.

5.32.2. Knowledge and Skills Required

- 5.32.2.1. Technical Proficiency: Familiarity with Microsoft SharePoint Content Management System (CMS), and Microsoft Power Platform. Ability to translate training improvements and requirements to clients, stakeholders, and programmers. Proficiency with word-processing, graphics, and presentation tools (MS Word, PowerPoint, Visio, and Adobe Creative Suite). Experience with SCORM, Section 508 requirements, and technical specifications for Learning Management. Application of sound instructional design principles. Visual design for adult education. Excellent written communication skills.
- 5.32.2.2. Project Management and Coordination: Demonstrated ability to manage timelines, resources, and collaboration with clients, stakeholders, and programmers in a highly de-centralized / virtual environment.
- 5.32.2.3. Strategic Communications: Superior knowledge of the English language including the ability to read, comprehend, communicate information and ideas effectively to a wide range of audiences.
- 5.32.2.4. Proficiency with innovative content creation and delivery: Demonstrated experience using a wide range of approaches for content generation and delivery, preferably including graphics and motion graphics, videos, charts, photos, professional voice-over narration, instructor talking points and other coaching/supportive materials.
- 5.32.2.5. Collaboration and Coordination: Strong interpersonal and teaming skills. People management and Task management skills.

5.32.3. Duties and Responsibilities

- 5.32.3.1. Curriculum Evaluation: Assist in reviewing and evaluating existing educational content and recommend innovative improvements to make the content more engaging and effective.
- 5.32.3.2. Curriculum Planning: Implement improvements, including through design and organization of educational content. Apply Instructional Systems Design (ISD) knowledge and experience to develop in-classroom, virtual (group), and virtual (self-paced) instructional materials and methods including, but not limited to, training plans, storyboards, narrative scripts, graphics, tests and evaluation methods, and scenarios.
- 5.32.3.3. Course Development: Responsible for conceptualizing, designing and producing solutions for a wide variety of formats and dissemination outputs, and will work as part of an interdisciplinary team managing multiple design projects under minimal supervision. Interpret subject matter content and develop original designs, visual styles, effects, and presentations using adult learning principles. Utilize extensive knowledge of graphics software to design and produce interactive multimedia presentations to enhance course material. Develop fully functional eLearning courses, instructor-led courses, blended learning courses, and assist in the creation of learning labs and exercises. Ensure courses are Section 508 compliant.
- 5.32.3.4. Innovative Approaches: Using a variety of media, clearly convey information and ideas to the learning audience in a manner that engages them and helps them understand and retain the content. Provide advice and guidance to senior management on technical advantages and disadvantages of multimedia formats and styles; and the most effective industry methods and practices for designing.
- 5.32.3.5. Course Development Team: Advise on all imaging, video and graphic matters. Perform research of subject matter to convert text themes or ideas into content, illustrations and/or graphics. Partner with Course Development Team and other SMEs to develop course outlines, design documents, storyboards, and other learning design deliverables.
- 5.32.3.6. Documentation: Supports course documentation including, but not limited to the course design document, instructor/facilitator and student guides, course syllabus, practical exercises, presentations, assessments, and related materials.
- 5.32.3.7. Instructor Coaching: Provide critical review and feedback to instructors (“training the trainer,”) for virtual and in-person training delivery to improve student engagement, experience, and knowledge absorption and retention.
- 5.32.3.8. Continuous Course Improvement: Conduct assessment of course content and delivery and propose and implement improvements on an ongoing basis to ensure learning objectives are met and students are effectively engaged. Update curriculum content and format to reflect evolving requirements, improve participant learning experience, and reflect cutting-edge course delivery systems and approaches.
- 5.32.3.9. Website Support: Coordinate with client, stakeholders, and developers to create and maintain a training website that will serve as a hub for all training communications using Microsoft applications, including SharePoint and Microsoft Power Platform. Use the SharePoint Content Management System (CMS) to manage and update training website content on an ongoing basis, including course availability, sign-up and registration forms, course pre-reads, training news and updates, and FAQs.
- 5.32.3.10. Logistical Support: Perform a range of logistical duties to support overall training travel, preparation, execution, and post-mortem/improvement lifecycle. Domestic and/or international travel may be required to support in-person courses. Support development, delivery, and evaluation of training demand surveys; training venue identification and suitability assessment (technology, furniture, logistics, configuration, etc.); student and instructor travel logistics and budgets; development of agenda, notes, and supporting materials; real-time support during course delivery for A/V setup, management, and breakdown, and other on-site coordination.

- 5.32.3.11. Community Support: Support communications pertaining to training content, courses, and Q&As across multiple communication channels, venues, and formats, including enterprise-wide convenings as well as small group gatherings, trainings, and discussions. Provide technical support to instructors, students, and other stakeholders, as directed. Assists with identifying and creating instructional material to address field-driven performance shortfalls and client training needs.
- 5.32.3.12. SME Coordination and Collaboration: Partner with subject matter experts (SMEs) to ensure learning objectives and proposed content are appropriate for the audience and align with business objectives.

5.33. Interior Designer

5.33.1. Performance Requirements and Qualifications

- 5.33.1.1. Bachelor's Degree from a CIDA accredited Interior Design program or Bachelor of Fine Arts degree for interior design.
- 5.33.1.2. Contractor staff must also be in possession of an Interior Design License or NCIDQ certification.
- 5.33.1.3. A minimum of 5 years of professional interior design code compliant facilities design experience for new construction, including renovation design experience, is required.

5.33.2. Knowledge and Skills Required

- 5.33.2.1. The position requires professional knowledge of interior design concepts, principles, practices and procedures.
- 5.33.2.2. Knowledge, as demonstrated by recent relevant experience, to prepare interior designs that meet functional and aesthetic requirements, and produce final working drawings for facilities, such as multi-story office buildings, operational facilities, personnel support facilities, industrial type shops, housing, and other facilities normally found on military installations.
- 5.33.2.3. Knowledge of interior design concepts, principles, and practices applicable to the full range of duties concerned with the design, layout, and construction of facilities.
- 5.33.2.4. Requires ability to supplement standard practices and adapt techniques to solve a wide variety of technical issues. Requires the ability to apply innovative theories and state of the art methods to technical principles, practices, and problems not resolvable through conventional methods. The possession of an Interior Design License or NCIDQ certification is considered demonstration of this ability.
- 5.33.2.5. Knowledge and skill to use computer software, including word processing, spreadsheet, presentation, electronic mail, Internet, and database type software as well as Specs Intact word processing software, and cost estimating software. Knowledge and proficiency in the use of computer aided design and drafting software and hardware used in the preparation and presentation of concept designs and the preparation of final working drawings.
- 5.33.2.6. Knowledge of related engineering disciplines (i.e., architectural, structural, mechanical, electrical, civil, and fire protection) to assure that areas of overlapping responsibilities receive proper design consideration and that total project objectives are met.
- 5.33.2.7. Ability to produce results of analysis in writing and the ability to consolidate the findings of others, and evaluate recommendations and facts. Ability to make oral presentations of proposed designs and results of studies.
- 5.33.2.8. Knowledge of budgeting, planning, and project management techniques, including the ability to coordinate the work of others and motivate and lead individuals of a variety of backgrounds.
- 5.33.2.9. Knowledge of and full compliance with Safety Policy and Guidance and use of personal protective equipment.

5.33.3. Duties and Responsibilities

- 5.33.3.1. Responsible for the preparation of detailed interior design solutions that meet functional and aesthetic requirements, development of plans using AutoCAD, interior finish and furniture specifications, furniture, fixtures and equipment (FF&E) packages, interior finish packages, and cost estimates in support of in-house and A/E design-bid-build and design- build projects for a wide range of projects. Typical design projects include Naval Shore Facilities, including multistory administration facilities, quarters, hospitals, dining facilities, housing, recreational facilities, operational and support facilities, training facilities, industrial shops, and a very wide diversity of other new and existing structures and facilities.
 - 5.33.3.2. Apply knowledge and skill to research and evaluate interior finish systems and FF&E in the development of interior design projects and specifications. Demonstrate detailed knowledge of the latest commercial interior finish materials and furnishings. Produce results of research in writing and evaluate recommendations and facts. Prepare and give oral presentations of proposed designs and other related topics.
 - 5.33.3.3. Demonstrate knowledge of related engineering disciplines such as architectural, structural, mechanical, electrical, and fire protection to assure that areas of overlapping responsibilities receive proper design consideration and that total project objectives are met.
 - 5.33.3.4. Provides independent, timely and professional specialized interior design support, services and consultation for the planning, design, construction and maintenance of facilities for the Navy, Marine Corps, and other Supported Commands, including minor works projects, specific projects, special projects, military construction (MILCON), demolition, maintenance, space utilization and facilities development. Participates in conferences with project stakeholders and collaborates with engineering and architectural disciplines to ensure system coordination and integration with specific project requirements.
 - 5.33.3.5. The position provides a broad range of interior design services to all activities and tenants. This includes a large number of customer activities with varied missions, dispersed over a sizable geographical region with numerous facility types, ranging from administrative and housing facilities to very complex industrial and operational facilities and equipment. This position will involve innovative interior designs of new facilities as well as the maintenance and repair of existing facilities. Such services are complicated and intensified by the following factors: aging and obsolete facilities; customer activity mission changes; and variable funding sources among the customer activities.
- 5.34. Landscape Architect
- 5.34.1. Performance Requirements and Qualifications
 - 5.34.1.1. Bachelor Degree from a Landscape Architectural Accreditation Board (LAAB) accredited college or university program.
 - 5.34.1.2. Professional registration as a Landscape Architect (RLA) is highly desirable.
 - 5.34.1.3. A minimum of 5 years of professional landscape architecture code compliant facilities design experience for new construction, including renovation design experience, is required.
 - 5.34.2. Knowledge and Skills Required
 - 5.34.2.1. Knowledge, as demonstrated by recent relevant experience, to prepare landscape architecture designs that meet functional and aesthetic requirements, and produce final working drawings for building sites, such as multi-story office buildings, operational facilities, personnel support facilities, industrial type shops, housing, and other facilities normally found on military installations.
 - 5.34.2.2. Knowledge of landscape architecture concepts, principles, and practices applicable to the full range of duties concerned with the design, layout, and building sites.

- 5.34.2.3. Knowledge of related architectural/engineering disciplines (i.e., architecture and civil) to assure that areas of overlapping responsibilities receive proper design consideration and that total project objectives are met.
- 5.34.2.4. Ability to produce results of analysis in writing and the ability to consolidate the findings of others, and evaluate recommendations and facts.
- 5.34.2.5. Ability to make oral presentations of proposed designs and results of studies.
- 5.34.2.6. Knowledge of budgeting, planning, and project management techniques, including the ability to coordinate the work of others and motivate and lead individuals of a variety of backgrounds.
- 5.34.3. Duties and Responsibilities
 - 5.34.3.1. Responsible for the preparation of detailed plans including but not limited to: site programming, site analysis, building orientation and placement including major entries to buildings, vehicular and pedestrian circulation including development of major entries to the project site, landform, LEED requirements/analysis/incorporation, water quality features and low impact development (LID) practices, sustainable design methods, incorporation of Architectural Barriers Act (ABA) requirements, and site features to reinforce Anti-Terrorism/Force Protection. Detailed designs shall include but are not limited to: design and development of hardscape areas such as plazas and patios, steps and ramps, handrails and guardrails, walls, fire lanes, shade structures, site furnishings, signage and wayfinding, lighting, bioretention cells, planting, and irrigation. Knowledge of specific plant materials that are native or naturalized to a specific project location within the Region is required. Working knowledge of design and detailing of irrigation systems, specifications, and calculations is preferred.
 - 5.34.3.2. Apply knowledge and skill to landscape architecture system, equipment, or techniques in the development of design projects. Analyze the applicability of innovative processes, systems, equipment, or techniques and implement such in projects and specifications. Demonstrate knowledge of the latest landscape architecture materials and methods of construction. Prepare correspondence, status reports, economic analyses, calculations, studies, fact sheets and technical reports. Experience in operating PhotoShop, SketchUp, and Adobe Creative Suite software is preferred.
 - 5.34.3.3. Provides independent, timely and professional specialized landscape architecture support, services and consultation for the planning, design, construction and maintenance of facilities for the Navy, Marine Corps, and other Supported Commands, including minor works projects, specific projects, special projects, military construction (MILCON), demolition, maintenance, space utilization and facilities development. Participates in conferences with project stakeholders and collaborates with other engineering and architectural disciplines to ensure system coordination and integration with specific project requirements.
 - 5.34.3.4. Typical projects include: landscape architecture services for design and construction contract documents for such facilities as officers and enlisted men's quarters, chapels, training buildings, clubs and recreational facilities, administrative, medical/dental and community facilities.
 - 5.34.3.5. This position requires the ability to work in close cooperation with architects and engineering design personnel to support the development of integrated designs appropriate to the facilities concerned, within governing control costs designs and regulatory requirements. Participate as an active member of multi-discipline teams responsible for design charrettes for both in-house and A/E (Architect/Engineer) projects.
 - 5.34.3.6. Effectively deals with a wide variety of people, senior military officers, base commanders and civilians for the presentation of landscape designs.

5.35. Landscape Architect - Senior

5.35.1. Performance Requirements and Qualifications

- 5.35.1.1. Bachelor Degree from a Landscape Architectural Accreditation Board (LAAB) accredited college or university program.
- 5.35.1.2. Professional registration as a Landscape Architect (RLA) is required.
- 5.35.1.3. A minimum of 10 years of professional landscape architecture code compliant facilities design experience for new construction, including renovation design experience, is required.

5.35.2. Knowledge and Skills Required

- 5.35.2.1. Knowledge, as demonstrated by recent relevant experience, to prepare landscape architecture designs that meet functional and aesthetic requirements, and produce final working drawings for building sites, such as multi-story office buildings, operational facilities, personnel support facilities, industrial type shops, housing, and other facilities normally found on military installations.
- 5.35.2.2. In-depth knowledge of landscape architecture concepts, principles, and practices applicable to the full range of duties concerned with the design, layout, and building sites.
- 5.35.2.3. Knowledge of related architectural/engineering disciplines (i.e., architecture and civil) to assure that areas of overlapping responsibilities receive proper design consideration and that total project objectives are met.
- 5.35.2.4. Ability to produce results of analysis in writing and the ability to consolidate the findings of others, and evaluate recommendations and facts.
- 5.35.2.5. Ability to make oral presentations of proposed designs and results of studies.
- 5.35.2.6. Knowledge of budgeting, planning, and project management techniques, including the ability to coordinate the work of others and motivate and lead individuals of a variety of backgrounds.

5.35.3. Duties and Responsibilities

- 5.35.3.1. Responsible for the preparation of detailed plans including but not limited to: site programming, site analysis, building orientation and placement including major entries to buildings, vehicular and pedestrian circulation including development of major entries to the project site, landform, LEED requirements/analysis/incorporation, water quality features and low impact development (LID) practices, sustainable design methods, incorporation of Architectural Barriers Act (ABA) requirements, and site features to reinforce Anti-Terrorism/Force Protection. Detailed designs shall include but are not limited to: design and development of hardscape areas such as plazas and patios, steps and ramps, handrails and guardrails, walls, fire lanes, shade structures, site furnishings, signage and wayfinding, lighting, bioretention cells, planting, and irrigation. Knowledge of specific plant materials that are native or naturalized to a specific project location within the Region is required. Working knowledge of design and detailing of irrigation systems, specifications, and calculations is preferred.
- 5.35.3.2. Apply knowledge and skill to landscape architecture system, equipment, or techniques in the development of design projects. Analyze the applicability of innovative processes, systems, equipment, or techniques and implement such in projects and specifications. Demonstrate knowledge of the latest landscape architecture materials and methods of construction. Prepare correspondence, status reports, economic analyses, calculations, studies, fact sheets and technical reports. Experience in operating PhotoShop, SketchUp, and Adobe Creative Suite software is preferred.

- 5.35.3.3. Provides independent, timely and professional specialized landscape architecture support, services and consultation for the planning, design, construction and maintenance of facilities for the Navy, Marine Corps, and other Supported Commands, including minor works projects, specific projects, special projects, military construction (MILCON), demolition, maintenance, space utilization and facilities development. Participates in conferences with project stakeholders and collaborates with other engineering and architectural disciplines to ensure system coordination and integration with specific project requirements.
- 5.35.3.4. Typical projects include: landscape architecture services for design and construction contract documents for such facilities as officers and enlisted men's quarters, chapels, training buildings, clubs and recreational facilities, administrative, medical/dental and community facilities.
- 5.35.3.5. This position requires the ability to work in close cooperation with architects and engineering design personnel to support the development of integrated designs appropriate to the facilities concerned, within governing control costs designs and regulatory requirements. Participate as an active member of multi-discipline teams responsible for design charrettes for both in-house and A/E (Architect/Engineer) projects.
- 5.35.3.6. Effectively deals with a wide variety of people, senior military officers, base commanders and civilians for the presentation of landscape designs.

5.36. Mechanical Engineering Technician

5.36.1. Performance Requirements and Qualifications

- 5.36.1.1. Minimum of 5 to 10 years experience supporting development of work with facilities.

5.36.2. Knowledge and Skills Required

- 5.36.2.1. Must be able to independently plan and accomplish complete projects or studies of broad scope and complexity.

5.36.3. Duties and Responsibilities

- 5.36.3.1. Performs, at this level, one or a combination of such typical duties as: Prepares designs and specifications for various complex equipment or systems (e.g., a heating system in an office building, or new electronic components such as solid state devices for instrumentation equipment); Plans approach to solve design problems; conceives and recommends new design techniques; resolves design problems with contract personnel, and assures compatibility of design with other parts of the system; Designs and coordinates test set ups and experiments to prove or disprove the feasibility of preliminary design; uses untried and untested measurement techniques; and improves the performance of the equipment. May advise equipment users on redesign to solve unique operational deficiencies; Plans approach and conducts various experiments to develop equipment or systems characterized by (a) difficult performance requirements because of conflicting attributes such as versatility, size, and ease of operation; or (b) unusual combination of techniques or components. Arranges for fabrication of pilot models and determines test procedures and design of special test equipment.
- 5.36.3.2. Complexity of assignments typically requires considerable creativity and judgment to devise approaches to accomplish work, resolve design and operational problems, and make decisions in situations where standard engineering methods, procedures, and techniques may not be applicable. Supervisor or professional engineer provides advice on unusual or controversial problems or policy matters; completed work is reviewed for compliance with overall project objectives.

5.37. Mechanical Engineer

5.37.1. Performance Requirements and Qualifications

- 5.37.1.1. Bachelor Degree in an ABET accredited Mechanical Engineering or Engineering Technology program.
- 5.37.1.2. Registration as Professional Engineer (PE) in the discipline of Mechanical Engineering is desired.
- 5.37.1.3. A minimum of 5 years of professional mechanical engineering code compliant facilities design experience for new construction, including renovation design experience, is required.
- 5.37.2. Knowledge and Skills Required
 - 5.37.2.1. Professional knowledge and skill in applying the theories, concepts, principles, computer systems applications, and methodology of mechanical engineering relevant to a wide range of construction projects and mechanical utility systems to develop engineering designs and plans for mechanical utility systems (e.g., heating, ventilating, air conditioning, and refrigeration) as a part of complex construction projects.
 - 5.37.2.2. Knowledge of DoD and Navy guide specifications, criteria and policy, industry codes and standards, and standard practices as related to mechanical engineering design, including the American Society of Mechanical Engineers (ASME) standards and Boiler and Pressure Vessel Code (BPVC), American Society of Heating, Refrigerating and Air-Conditioning Engineers (ASHRAE) standards such as 189.1, 90.1, 62.1, various ASHRAE handbooks, National Fire Protection Association Codes such as 54,58, 90A, 96, Sheet Metal and Air Conditioning Contractors National Association, Inc. (SMACNA) Standards, International Mechanical Code (IMC), International Plumbing Code (IPC), and the International Building Code.
 - 5.37.2.3. Knowledge of local, state, federal, and foreign country laws, codes, and other statutory requirements affecting mechanical engineering design throughout the NAVFAC Mid- Atlantic AOR. Knowledge of related architectural and engineering fields and their associated impacts as related to mechanical engineering design.
 - 5.37.2.4. Knowledge and experience with Autodesk software, Microsoft Office products, mechanical engineering design and analysis software and other applicable DoD computer systems and software used by the Command.
 - 5.37.2.5. Ability to produce results of analysis in writing and consolidate findings of others and evaluate recommendations and facts. Ability to make oral presentations of proposed designs and results of studies.
 - 5.37.2.6. Knowledge of budgeting, planning and project management techniques, including the ability to coordinate the work of others and lead teams.
 - 5.37.2.7. Knowledge of and full compliance with Safety Policy and Guidance, and use of personal protective equipment.
- 5.37.3. Duties and Responsibilities
 - 5.37.3.1. Provides independent, timely and professional specialized mechanical engineering support, services and consultation for the planning, design, construction and maintenance of facilities for the Navy, Marine Corps, and other Supported Commands, including minor works projects, specific projects, special projects, military construction (MILCON), demolition, maintenance, space utilization and facilities development. Participates in conferences with project stakeholders and collaborates with other engineering and architectural disciplines to ensure system coordination and integration with specific project requirements.

5.37.3.2. Typical projects include: mechanical engineering services for plumbing, heating, ventilation and air conditioning systems; chilled water, steam, hot water, compressed gasses, natural gas, fuel distribution and storage, and power distribution and generation systems, large utility plants and distribution systems, air pollution control, water and waste water control systems, process and chemical process piping systems, piping and instrumentation diagrams, instrumentation and control systems, security controls and Anti- Terrorism and Force Protection (ATFP) for mechanical design of major size and complexity for use in government facilities, including, multistory office buildings, steam plants, hospitals, housing, manufacturing, training, waterfront structures, laboratories, command and control centers, hangars, medical facilities, and large and complex utility systems.

5.38. Mechanical Engineer - Senior

5.38.1. Performance Requirements and Qualifications

- 5.38.1.1. Bachelor Degree in an ABET accredited Mechanical Engineering or Engineering Technology program.
- 5.38.1.2. Registration as Professional Engineer (PE) in the discipline of Mechanical Engineering is required.
- 5.38.1.3. A minimum of 10 years of professional mechanical engineering code compliant facilities design experience for new construction, including renovation design experience, is required.

5.38.2. Knowledge and Skills Required

- 5.38.2.1. The employee has the ability to apply new developments or experimental theories in mechanical engineering to problems not readily treatable by conventionally accepted methods. The engineer has obtained a mastery of advanced concepts, principles and practices in mechanical engineering that enables them to serve as a recognized subject matter expert.
- 5.38.2.2. Applies engineering skills to effectively assess customer's requirements and develop innovative solutions.
- 5.38.2.3. An in depth knowledge of DOD and Navy guide specifications, criteria and policy, industry codes and standards, and standard practices as related to mechanical engineering design, including the ASHRAE 90.1, 189.1, 62.1, and 55 standards, and the International Mechanical Code.
- 5.38.2.4. An in depth knowledge of local, state, federal, and foreign country laws, codes, and other statutory requirements affecting mechanical engineering design throughout the NAVFAC AOR.
- 5.38.2.5. Knowledge of related architectural and engineering fields and their associated impacts as related to mechanical engineering design.
- 5.38.2.6. Knowledge and experience with Autodesk software, Microsoft Office products, mechanical engineering design and analysis software and other applicable DoD computer systems and software used by the Command.
- 5.38.2.7. Ability to produce results of analysis in writing and consolidate findings of others and evaluate recommendations and facts.
- 5.38.2.8. Ability to make oral presentations of proposed designs and results of studies.
- 5.38.2.9. Knowledge of budgeting, planning and project management techniques, including the ability to coordinate the work of others and lead teams.
- 5.38.2.10. Knowledge of and full compliance with Safety Policy and Guidance and use of personal protective equipment.

5.38.3. Duties and Responsibilities

- 5.38.3.1. Provides independent, timely and professional specialized mechanical engineering support, services and consultation for the planning, design, construction and maintenance of facilities for the Navy, Marine Corps, and other Supported Commands, including minor works projects, specific projects, special projects, military construction (MILCON), demolition, maintenance, space utilization and facilities development. Participates in conferences with project stakeholders and collaborates with other engineering and architectural disciplines to ensure system coordination and integration with specific project requirements.
- 5.38.3.2. Typical project support includes: HVAC systems, industrial, HVAC controls, DoD fuel piping systems and storage facilities, mechanical utilities, plumbing, compressed air and gasses, industrial processes, industrial ventilation systems, and commissioning.

5.39. Motion Graphics Designer/Animator

5.39.1. Performance Requirements and Qualifications

- 5.39.1.1. Degree: Bachelor's Degree in a related field preferred.
- 5.39.1.2. Minimum of 5 years of motion graphics/designing/animating/editing/content creation experience for digital platforms.
- 5.39.1.3. Certification: None required.
- 5.39.1.4. Project Management: Demonstrated project management and organizational skills are required.

5.39.2. Knowledge and Skills Required

- 5.39.2.1. Technical Proficiency: Superior proficiency with Adobe Creative Suite; including Adobe Animate, After Effects, Premiere, Character Animator, Photoshop, Illustrator, Dimension, and related motion graphics, animation, and video editing software. High familiarity with Microsoft SharePoint, Microsoft Power Platform, and related applications in the Microsoft 365 Cloud Suite. Experience with the Navy's Flank Speed environment is preferred.
- 5.39.2.2. Communication: Demonstrated ability to clearly communicate issues, requirements, and improvements to a wide range of stakeholders, including technical and non-technical audiences.
- 5.39.2.3. Project Management: Demonstrated ability to manage timelines, resources, and collaboration with stakeholders in a highly de-centralized / virtual environment.

5.39.3. Duties and Responsibilities

- 5.39.3.1. Assets and Content: Support graphic design and develop motion graphics, animations, visual effects, and videos for websites and Navy tools. Blend art and technology to communicate ideas visually. Create and source professional audio and narration to support videos and other assets.
- 5.39.3.2. Design and Animate: Storyboard, design, and animate 2D and 3D motion graphics and videos. Incorporate typography, photography, live video, and 2D animation.
- 5.39.3.3. Develop Storyboards and Styleframes: Create storyboards, styleframes, and video mock-ups. Design high-quality motion graphics for various video formats (reels, recap videos, native content, presentations, videos for applications, and trainings).
- 5.39.3.4. Collaboration and Coordination: Collaborate with a range of SMEs and stakeholders to develop and enhance Navy products.
- 5.39.3.5. Logistical Tasks: Support data calls, workshops, trainings, meetings, and requests.
- 5.39.3.6. Strategic Communications: Superior knowledge of the English language including the ability to read, comprehend, communicate ideas and information through visual means including graphic design, illustrations and motion graphics information and ideas effectively to a wide range of audiences.
- 5.39.3.7. Community Support: Provide technical support to product stakeholders, as directed.

5.40. Planner

5.40.1. Performance Requirements and Qualifications

5.40.1.1. Bachelor Degree in Planning or Engineering/Architecture

5.40.1.2. Minimum 5 years experience in planning OR experience planning at a shipyard to include experience with Basic Facility Requirements (BFRs), Internet Navy Facility Assets Data Store (iNFADS), Installation Geospatial Information and Services (IGI&S), Installation Condition Assessment Program (ICAP), development of planning support A&E scopes of services, experience with DD1391s and project development systems such as Electronic Project Generator (EPG) or Programming Administration Execution (PAX) systems, experience with master long range planning as well as shipyards.

5.40.2. Knowledge and Skills Required

5.40.2.1. Knowledge of the principles of community planning methods and techniques in order to provide technical advice to others in design, construction, and alteration of facilities.

5.40.2.2. Analytical Skills in order to analyze engineering, management, and economic data, develop appropriate alternatives, and identify benefits and liabilities.

5.40.2.3. Knowledge and understanding with the following systems and instructions: Shore Facilities Planning System (SFPS), internet Navy Facilities Assets Data Store (iNFADS), Geospatial Information Systems (GIS), and OPNAV Instruction 11010.20 (latest revision) Facilities Projects Manual Classification of Work Assistance.

5.40.3. Duties and Responsibilities

5.40.3.1. Global and Regional Plans & Studies - Preparation of plans & studies that address the infrastructure investment requirements and strategies at the global and regional scale. These plans can be functional or platform-based, are broadly scoped, and guide more detailed installation planning efforts. Plans can involve more than one installation within the region including plans for fleet concentration areas. Examples are: Global Shore Integration Plans (GSIPs), Regional Integration Plans (RIPs) and Functional Regional Shore Infrastructure Plans (RSIP), Analysis of Alternatives (AoAs), Special planning studies, and Business Case Analyses.

5.40.3.2. Develops installation plans & studies - This includes plans that are at or within the installation level that address both the Land Use and Capital Investment requirements. Examples are: Installation Development Plans (IDPs), Area Development Plans (ADPs), Capital Improvement Plans and Recapitalization Plans, Installation Appearance Plan (IAP), Antiterrorism/Force Protection (ATFP) Plans, Master Plans, Land Use Development Plans, Shore Capability Area (SCA) studies, and Special planning studies that cover this area are also included.

5.40.3.3. Encroachment Management Plans & Studies - This product includes Encroachment Action Plans (EAPs), Encroachment Partnering projects, Air Installation Compatible Use Zones (AICUZ), Range Air Installation Compatible Use Zones (RAICUZ), Noise and Naval Aviation Simulation Model (NASMOD) studies.

5.40.3.4. Basic Facility Requirements (BFR) and Facility Planning Document (FPD) Preparation - Preparation of Basic Facility Requirements (BFRs) and Facility Planning Documents (FPDs) for significant efforts (fence-to-fence, functional, etc.), to meet currency requirements as well as for Platform BFRs. This effort includes updating BFRs and FPDs in iNFADS.

5.40.3.5. Asset Evaluation of Facilities - Performance of Asset Evaluations (AEs) needed to maintain data currency. The effort involves updating property records as well as the corresponding asset related fields on the FPDs in iNFADS.

- 5.40.3.6. Site Approval Documents - Preparation of documentation and requests as well as conducting & tracking review/approval process to final approval per applicable instructions and processes (which also includes requests for technical review as required). This includes all Safety and Non-Safety related site approvals, coordination with impacted stakeholders, using Installation Site Approval Request Tool (ISART), incorporation of geospatial data using GeoReadiness Explorer (GRX), and use of systems such as WebSAR, Automated Site Planning Tool (ASPT)/Explosive Safety Siting (ESS), Infrastructure Business Operations Navy-NAVAIR-NAWC Support (IBONS), and Electromagnetic Environmental Effects (E3).
- 5.40.3.7. Planning Services - This service includes the following: AICUZ/RAICUZ program management and oversight; OPNAVINST 11010.20 (latest version) technical consultation and Anti-Deficiency Act (ADA) investigations, facility planning criteria development and update, planner training development and delivery, support and facilitation of planning charrettes, preparation of presentations, briefing materials and reports, and general planning technical consultations.
- 5.40.3.8. Military Construction (MILCON) DD 1391 Project Development - Development of a MILCON DD 1391 package. Products include, as required: DD 1391 (entered into PAX), project scope, ROM cost estimate, economic analysis, updated AEs/BFRs/FPDs, and location map/site plan. Also includes development of Project Data Sheets, Project Readiness Sheet, Business Case Analysis (for NF), siting analysis and approval, Environmental (EV) checklist, RONA and National Environmental Policy Act (NEPA) Categorical Exclusion (CATEX) as applicable; development of briefing slides for Assistant Regional Engineer (ARE)/ Regional Mission Integration Group (RMIG) support; and update of various data related to ratings used in Project Data Sheets.
- 5.40.3.9. Sustainment, Restoration, and Modernization (SRM) Project Development - Development of an SRM Project package. Includes validation and clarification of project scope. The Project Package (as required) includes: DD 1391 (entered into PAX), detailed cost estimates by work classification, location map and site plans, site approval request, economic analysis, safety system review/documents, updated AEs/BFRs/FPDs, NEPA (Categorical Exclusion), Anti-Terrorism Force Protection (ATFP) questionnaire, Facility Readiness and Evaluation System (FRES)/iNFADS data, photographs, and SRM Project checklist. Includes supporting Navy Working Capital Fund (NWCF), Non-Appropriated Fund (NAF), United States Marine Corps (USMC) and other special projects and clients. Includes Dredging projects, permit coordination, and developing packages to submit to the Deputy Assistant Secretary of the Navy (DASN Packages) as required by policy.
- 5.40.3.10. Enhanced Use Lease (EUL) - Includes identification of site alternatives and Market Feasibility Studies (Phase 1).
- 5.40.3.11. Space Planning - Provide Draft Space requests in accordance with current Regional space management instructions. Manage space requests, letters and documentation. Analyze, propose and staff space request solutions; facilitate meetings. Work with Region (ARE) on requests spanning Installations. Accommodate churn – multiple requests, briefings and preparations - sometimes to RMIG level. Provide coordination on outfitting of space with tenants.
- 5.40.3.12. Commander, Navy Installations Command (CNIC) and Other Claimant/Data Calls / Support - Data calls, historical data, and reporting; Coordination across Directorates, Divisions and PWD support; various budget line inputs, tracking and spend plans; ; Congressional taskers and special interest items; requests for information (RFI's); Tenant support, meetings, info, consult; work permits; Design reviews; and support of Fleet Civil Engineer and/or CNIC.

- 5.40.3.13. Real Estate Requirements Generation - Requirements generation of Real Estate Requests, all work in this item is prior to Real Estate Division Execution; Ingrants / Out grants (Development, Renewals, Request letters); Leases, licenses, and permits requirements development; EUL Phase I and II support, site identification; Encroachment partnering coordination, Acquisitions and Disposals document preparation and request letters; Public Private Venture (PPV) coordination (land swap, siting, access, represent Installation interests); and, modular / relocatable request packages, includes cost analysis, siting and requirements.
- 5.40.3.14. Integrated Product Support (IPS) and Integrated Logistics Systems (ILS) studies, to include: surveys, facility management plans, requirements and criteria generation, and logistics element manager support.

5.41. Program Analyst

5.41.1. Performance Requirements and Qualifications

- 5.41.1.1. Bachelor's degree required; business degree preferred.

5.41.2. Knowledge and Skills Required

- 5.41.2.1. Knowledge in the use and application of Microsoft Office (Word, Excel, PowerPoint, Outlook, Tableau, Power BI, etc.).
- 5.41.2.2. Ability to accept, track, and manage budgetary aspects of multiple independent programs.
- 5.41.2.3. Ability to learn various NAVFAC financial programs such as Facilities Information System (FIS), Advana, Jupiter, Tableau, Navy Enterprise Resource Planning (ERP), Procurement Integrated Enterprise Environment (PIEE), etc.

5.41.3. Duties and Responsibilities

- 5.41.3.1. Assist with programming, analysis, and evaluation of program plans and execution and identifying actual or potential issues.
- 5.41.3.2. Review obligations against expenditures monthly and provide analysis.
- 5.41.3.3. Coordinate acceptance and issuance of funding documents between Comptroller and customers/service providers.
- 5.41.3.4. Assist in the development and execution of performance metrics.
- 5.41.3.5. Generates reports and graphs that depict program performance metrics at a regularity determined by the Government.

5.42. Project Risk Analyst

5.42.1. Performance Requirements and Qualifications

- 5.42.1.1. Engineering Degree, Architecture Degree, Associates Degree in Construction Management, Construction Technology or Building Construction and minimum of 10 years of Construction Risk experience.
- 5.42.1.2. Certification as a Project Risk management Professional (PRMP) is desirable.

5.42.2. Knowledge and Skills Required

- 5.42.2.1. Expert knowledge in establishing and communicating an effective risk management plan (RMP)
- 5.42.2.2. Knowledge of risk programs, forecasting, techniques, and methodology to evaluate risk and uncertainty at the project level
- 5.42.2.3. Knowledge of Cost Schedule and Risk Analysis (CSRA)
- 5.42.2.4. Knowledge of the use and application of Microsoft Office (Word, Excel, PowerPoint, Outlook, etc), Primavera, CostWorks, Monte Carlo Simulation packages, and Success Estimator, etc.

5.42.3. Duties and Responsibilities

- 5.42.3.1. The Project Risk Analyst provides assistance and technical guidance to project managers, planners, engineers/architects, construction managers, and several other project team members exercising management and administrative skills in leading the CSRA development and coordination in the execution of military construction projects.
 - 5.42.3.2. Provides support during the planning, design, and procurement phase of construction projects to ensure an appropriate level of risk and uncertainty is considered for all military construction projects.
 - 5.42.3.3. For designs developed by others, provide a complete review of the proposed CSRA to ensure it is project specific and accounts for all requirements of the contract and site restrictions.
 - 5.42.3.4. Collaborate with Project Manager to communicate/evaluate proposed risk and uncertainty impacts with Supported Command during project planning/development/design phases.
 - 5.42.3.5. Generating, maintaining and monitoring a risk identification checklist based on historical information and knowledge that has been accumulated from similar previous programs/projects and from other sources of information.
 - 5.42.3.6. Maintaining a log of decisions made that corresponds to the Risk Register, contains reasons and COAs vetted and considered and includes date of issue, date of decisions, date of dissemination of risk response actions and monitoring dates. Ensure Area Coordinator and Program Coordinator are both aware and on the distribution. Include risks that are still pending decision, reason for the hold – further research needed, other risk response actions that are in progress, target date of resolution, prioritization of risk and etc.
 - 5.42.3.7. Determines and makes recommendations regarding proper resource leveling to optimize scope, schedule, and cost while minimizing project risk.
 - 5.42.3.8. Provide input to revise/improve Unified Facilities Guide Specifications based upon Industry standards and needs of the field.
 - 5.42.3.9. Accumulate and maintain historical CSRA data for use in reference for planning and forecasting
 - 5.42.3.10. Routinely communicate and coordinate with other technical and non-technical NAVFAC personnel within the Facilities Engineering Command (FEC) and the various Field Offices.
 - 5.42.3.11. Developing, maintaining, and providing scheduling training to the field office covering basic understanding of network analysis schedules, critical path method, time impact analysis, baseline, progress, and as-built schedule reviews, and software usage
- 5.43. SharePoint & Power Platform Developer
- 5.43.1. Performance Requirements and Qualifications
 - 5.43.1.1. Degree: Bachelor's Degree in a technical field preferred.
 - 5.43.1.2. Experience: A minimum of 5 years of experience with MS Power Platform and SharePoint development.
 - 5.43.1.3. Certification: None required. PMP preferred.
 - 5.43.1.4. Project Management: Demonstrated project management and organizational skills are required.
 - 5.43.2. Knowledge and Skills Required
 - 5.43.2.1. Technical Proficiency: High proficiency with Microsoft SharePoint Development, Microsoft Power Platform Development and related applications in the Microsoft 365 Cloud Suite. Experience with the Navy's Flank Speed environment is preferred.
 - 5.43.2.2. Communication: Demonstrated ability to clearly communicate issues, requirements, and improvements to a wide range of stakeholders, including technical and non-technical audiences.

5.43.2.3. Project Management: Demonstrated ability to manage timelines, resources, and collaboration with clients, stakeholders, and programmers in a highly de-centralized / virtual environment.

5.43.3. Duties and Responsibilities

5.43.3.1. Collaboration and Coordination: Collaborate with a range of SMEs and stakeholders to maintain and enhance websites, visualizations, dashboards, applications, workflows, and other products.

5.43.3.2. Technical Evaluation: Collaborate with appropriate team members and stakeholders to review and evaluate existing sites, teams, applications, workflows, diagrams, and content and recommend innovative improvements to make them more engaging and effective.

5.43.3.3. Guidance and Instructional Materials: Generate and maintain onboarding, guidance, and training materials to optimize UI/UX.

5.43.3.4. Data Collection and Analysis: Analyze quantitative, qualitative, structured, and unstructured data and work collaboratively with other team members to gather requirements, build workflows to consume, process and manipulate the data, and create solutions that display outputs in various formats including – but not limited to – websites, visualizations, dashboards, applications, charts, graphs, and diagrams.

5.43.3.5. SharePoint and Microsoft Power Platform Development: Design, develop, test, and implement Microsoft SharePoint and Microsoft Power Platform business solutions based on requirements and create related documentation (including, but not limited to, requirements documentation, system architecture diagrams, workflow diagrams, wireframes, data migration, and QA/QC test plans). Support maintenance and sustainment (M&S).

5.43.3.6. Logistical Tasks: Support data calls, workshops, trainings, meetings, requests, and system account management.

5.43.3.7. Community Support: Provide technical support to product stakeholders and end users.

5.44. Strategic Planner

5.44.1. Performance Requirements and Qualifications

5.44.1.1. Degree: Master's Degree in Urban Planning or City Planning.

5.44.1.2. Certification: AICP. Not required but preferred: PMP.

5.44.1.3. Experience: A minimum of 5 years of experience in supporting planning endeavors, including requirements development, stakeholder engagement and management, data acquisition and analysis, event and budget management.

5.44.1.4. Project Management: Demonstrated project management and organizational skills are required.

5.44.2. Knowledge and Skills Required

5.44.2.1. Planning Principles: Knowledge of the principles of comprehensive planning and master planning methods and techniques.

5.44.2.2. Analytical Skills: Ability to review and analyze requirements and inter-disciplinary data that support the master planning process, including geospatial, quantitative, qualitative information from multiple sources and systems.

5.44.2.3. Technology Proficiency: Demonstrated proficiency with Microsoft Word, Excel, PowerPoint and SharePoint. Familiarity with Microsoft SharePoint Content Management System (CMS), Microsoft Power Platform, and GIS systems. Proficiency with graphics and presentation tools (PowerPoint, Visio, and Adobe Creative Suite). Ability to onboard to and learn new software platforms easily.

- 5.44.2.4. Project Management and Coordination: Demonstrated ability to manage timelines, resources, and collaborate with a wide range of technical Subject Matter Experts (SMEs), clients, and stakeholders in a fast-paced, de-centralized / virtual environment. Ability to work efficiently under conditions of multiple deadlines and changing priorities to produce a large volume of high-quality material with attention to detail.
- 5.44.2.5. Forecasting and Budgeting: Knowledge of work program forecasting and budgeting.
- 5.44.2.6. Communication: Superior knowledge of the English language including the ability to read, comprehend, communicate information and ideas effectively to a wide range of audiences. Demonstrated ability to clearly communicate issues, requirements, and improvements to a wide range of stakeholders, including non-technical and technical audiences.
- 5.44.3. Duties and Responsibilities
 - 5.44.3.1. Navy Master Planning: Provide technical and administrative support to Navy installation master planning requirements, processes, procedures, platforms, guides, products, and training.
 - 5.44.3.2. Requirements Gathering and Development: Support research and analysis of military master planning requirements, including policies, instructions, laws, criteria, and guides. In coordination with other team members, generate requirements and develop, deliver, and/or present related white papers, briefs, presentations, and reports. Support related maintenance of and updates to planning tools, guides, websites, and datasets. Review Navy instructions, taskers, data calls, manuals, guides, handbooks, and Unified Facility Criteria related to master planning and conduct a wide range of related research and analysis.
 - 5.44.3.3. Products and Services: Support development, compliance evaluation, and status tracking of master planning products and services. Support forecasting activities for outyear product action plans including labor and cost estimation. Support related communications and data gathering across Commands and Echelons.
 - 5.44.3.4. Collaboration and Coordination: Support development, maintenance, and communication of master planning educational training content and related guides; support development of websites, visualizations, dashboards, applications, workflows, and other products.
 - 5.44.3.5. Administrative Tasks: Support data calls, workshops, trainings, meetings, requests, and system account management. Domestic and/or international travel may be required to support in-person business meetings, courses, conferences, and/or other events.
 - 5.44.3.6. Project Management and Coordination: Demonstrated ability to manage timelines, resources, and collaboration with clients, stakeholders, and software programmers in a fast-paced de-centralized / virtual environment.
 - 5.44.3.7. Community Support: Support a wide range of communications pertaining to requirements, guides, tools, training content, courses, and Q&As across multiple communication channels, venues, and formats, including enterprise-wide convenings as well as small group gatherings, trainings, and discussions.
 - 5.44.3.8. Strategic Communications: Superior knowledge of the English language including the ability to read, comprehend, communicate information and ideas effectively to a wide range of audiences.

6. OTHER PERFORMANCE REQUIREMENTS

6.1. TRAINING

- 6.1.1. Professional certifications that have a requirement for “Continuous Learning” shall be met and maintained at the Contractor’s expense. The Government may provide other training as deemed appropriate.

6.2. ORIENTATION BRIEFING

- 6.2.1. Within two weeks after award, the Contractor shall conduct an orientation briefing for the Government not to exceed two hours in duration. The intent of the briefing is to initiate the communication process between the Government and Contractor by introducing key participants and explaining their roles, reviewing communication ground rules, and assuring a common understanding of subtask requirements and objectives.
- 6.2.2. The Orientation Briefing will be held at NAVFAC Atlantic in Norfolk, Virginia, another designated location or by teleconference/virtual meeting, and the date and time will be mutually agreed upon by both parties.
- 6.2.3. The completion of this briefing will result in the following:
 - 6.2.3.1. Introduction of both Contractor and Government personnel performing work under this contract. The Contractor will demonstrate confirmation of their understanding of the work to be accomplished under this PWS.

6.3. SECURITY REQUIREMENTS

- 6.3.1. Unless otherwise determined by NAVFAC Atlantic, work under this contract is unclassified / Controlled Unclassified Information (CUI). However, Trustworthiness Security, see paragraph 6.4, is required as determined by NAVFAC Atlantic. The Contractor shall comply with all applicable Department of Defense (DoD) security regulations and procedures – including the National Industrial Security Program Operating Manual (NISPOM) – during the performance of this Contract. The Contractor must have or acquire a Contractor and Government Entity Code (CAGE Code). The Contractor shall not disclose and must safeguard procurement sensitive information, IT systems and data, privacy act data, and Government personnel work products, which are obtained or generated in the performance of this contract. The Contractor must possess a favorable background investigation at the T3 level to access CUI material.
- 6.3.2. If access is needed to perform duties or gain access to government IT systems and databases, any Contractor employee, who remains under a pending investigation, will not be allowed on site.
- 6.3.3. Contractor shall immediately report to the Contracting Officer and COR any lapse in an employee's security clearance, and any investigations or reinvestigations of employees being performed by the Government. The Contractor shall comply with all Federal, state, and local security statutes, regulations, and requirements. The Contractor shall become acquainted with and comply with all Government regulations as posted, or as requested by the Contracting Officer when required to enter a Government site.
- 6.3.4. Investigations for public trust positions, to include IT-II (Limited Privileged) and IT-III (NonPrivileged) positions that access unclassified sensitive information when clearance eligibility is not required, will be submitted to the Office of Personnel Management (OPM) utilizing the SF- 86 (code 08B for IT-II and code 02B for IT-III) and will include the SF-87 Fingerprint Card or electronic fingerprint transmission. The Government Security Manager will process the Trustworthiness NAC.
- 6.3.5. The contract employee shall provide the completed Personnel Security Investigation (PSI) to the Security Manager along with the original signed release statements and applicant fingerprint card. The responsibility for providing the fingerprint card rests with the Contractor. The Security Manager will review the form for completeness, accuracy and suitability issues and will forward the completed SF86 along with attachments to OPM. The Department of Defense Central Adjudication Facility (DoD CAF) will perform adjudicating contractor investigations for public trust positions.

- 6.3.6. Contractor fitness determinations made by the DoD CAF will be maintained in the DISS program. Favorable fitness determinations will support public trust positions only and not national security eligibility. If no issues are discovered, according to respective guidelines a “Favorable Determination” will be populated in DISS and will be reciprocal within DoD. If issues are discovered, the DoD CAF will place a “No Determination Made” in DISS and forward the investigation to the submitting office for Government command’s final determination.

6.4. TRUSTWORTHINESS SECURITY – NAVY CONTRACT

- 6.4.1. Purpose: Reference is hereby made to Navy-awarded contracts requiring Contractor access to Navy information systems, CUI, or areas critical to the operations of the command. Although this contract is not classified and therefore Contractor employees are not required to have obtained a National Agency Check (NAC) trustworthiness determination, the Department of the Navy (DoN) has determined that all DoN information systems are sensitive regardless of whether the information is classified or unclassified. A Contractor whose work involves access to sensitive unclassified information warrants a judgment of an employee’s trustworthiness. Therefore, all personnel accessing DoN Computer systems must pass a National Agency Check (T3) investigation to verify their trustworthiness and the Contractor shall provide acceptable substitute(s) for those personnel that are rejected.
- 6.4.2. Reference is hereby made to Navy-awarded contracts requiring Contractor access to sensitive unclassified information / CUI material. Although these contracts are not classified and Contractor employees are not required to have a security clearance, the Department of the Navy (DoN) has determined that all DoN information systems are sensitive regardless of whether the information is classified or unclassified. A Contractor whose work involves access to sensitive unclassified information warrants a judgment of an employee’s trustworthiness. Therefore, all personnel must undergo a National Agency Check (T3 investigation) to verify their trustworthiness.
- 6.4.3. Contractor will not be required to receive, generate, or have custody of classified/sensitive material at the Contractor’s facility or Government facility. Generation of classified material will not take place.
- 6.4.4. If the Contractor employee is exposed to any classified information, the Contractor employee shall immediately report the exposure to the local security officer, so that appropriate procedures can be followed. Additionally, the contractor employee should inform the Contracting Officer, COR, Project Manager and Design Manager about the exposure, but should not convey the actual classified information.
- 6.4.5. The following addresses those requirements for Trustworthiness Security.
- 6.4.5.1. Each Contractor employee will have a favorably completed National Agency Check (NAC) / T3 investigation.
 - 6.4.5.2. Visit requests not required for unclassified / CUI access.
 - 6.4.5.3. If no previous investigation exists, the Contractor personnel will complete the requirement for a Trustworthiness NAC / T3 investigation.
 - 6.4.5.4. If the Contractor employee is a Foreign National, prior approval of the Information Assurance Manager (IAM) is required. Access may be granted to Foreign Nationals who have a need to know, when at least one of the following applies:
 - 6.4.5.4.1. Foreign National is employed by DoD, or
 - 6.4.5.4.2. Foreign National possesses a current Functional Accreditation approved by the Navy International Program Office (NAVIPO), or
 - 6.4.5.4.3. Foreign National possesses a current Visit Request Form (OPNAV 5521/27 (1-73) as defined in OPNAVINST 5510.1H), which is on file with the requesting activity.

- 6.4.5.5. The Trustworthiness NAC is processed through the Command Security Manager. The Contractor shall provide the completed SF-85P and two applicant fingerprint cards (FD 258). The Security Manager will review the form for completeness, accuracy and suitability issues. The completed SF 85P along with attachments will be forwarded to (OPM) who will conduct the NAC.
- 6.4.5.6. The Department of the Navy Central Adjudication Facility will provide the completed investigation to the requesting command security manager for the trustworthiness determination. The command will provide written notification to the Contractor advising whether or not the Contractor employee will be admitted to command areas or be provided access to unclassified but sensitive business information.
- 6.4.5.7. Trustworthiness determinations are the sole prerogative of the Commanding Officer of the sponsor activity. If the Commanding Officer determines, upon review of the investigation, that allowing a person to perform certain duties or access to certain areas, would pose an unacceptable risk, that decision is final. No due process procedures are required.
- 6.4.5.8. The Contractor employee shall take all lawful steps available to ensure that information provided or generated pursuant to this arrangement is protected from further disclosure unless the agency provides written consent to such disclosure.

7. ACCESS TO GOVERNMENT NETWORK

- 7.1. The Contractor shall provide stand-alone computers (not connected to the government network), printers, scanners, software, digital camera, web camera, cell phone and other IT equipment and software necessary to support the requirements of the individual SOW. If indicated during negotiations or written in the individual SOW that the Contractor' personnel will serve in a remote capacity, the Contractor shall provide all peripheral equipment and hardware to support the requirements of the individual SOW that can accommodate both the Contractor-provided and (if applicable) Government-provided laptop computers, including but not limited to two (2) large-size computer monitors, keyboard, mouse, and applicable cable connections. Use of Government computers and printers should not be expected for Contractor personnel's primary, daily use unless specified in the individual SOW. The Government may authorize Contractor personnel to use Government furnished computers when access to the government systems is necessary due to the scope of work.

8. WORKING ON A GOVERNMENT INSTALLATION

- 8.1. The Contractor and their employees and subcontractors shall become familiar with and obey installation regulations, including fire, traffic, and security regulations. Personnel employed on the installation shall keep within the limits of the work (and avenues of ingress and egress), and shall not enter restricted areas unless required to do so and are cleared for such entry. The Contractor's equipment shall be conspicuously marked for identification.
- 8.2. Contractor employees must be clearly identifiable while on Government property by wearing appropriate badges at all times. The Contractor shall provide each employee with an identification badge, which identifies, by photograph, the individual as an employee of the Contractor. These badges shall be worn at all times and presented for examination upon request from the Contracting Officer, COR, quality assurance personnel, Military Police, or any other Government Official with a need to see the badge.
- 8.3. The Contractor and its employees shall be subject to all traffic, security, and registration regulations for personnel and vehicles.
- 8.4. All contracted personnel attending meetings, answering Government telephones, in electronic messages or correspondence related to this contract, working on site, where their Contractor status is not known to third parties, must identify themselves as Contractor personnel, to include wearing ID badges.

- 8.5. Contracted personnel shall also ensure that when logged onto Government equipment that their profile shows them as Contractor personnel. All documents produced or revised by Contractors or developed through Contractor participation must be marked as "Contractor Generated Documents" or otherwise identified in a manner that discloses the Contractor's participation.
- 8.6. Contractor-occupied facilities (on Government installations), such as offices, separate rooms, or cubicles must be clearly identified with Contractor supplied signs, name plates or other identification, showing that these are work areas for Contractor personnel.

9. DATA, SOFTWARE AND INTELLECTUAL PROPERTY RIGHTS

- 9.1. All data, regardless of format, created, generated, produced or provided under, or as a result of, this contract shall become the property of the U. S. Government/NAVFAC. This data includes reports, materials, data, information, and all electronic/digital files. It also includes all training and training-related materials, which consists of all evaluations and evaluation criteria, computer software/applications and hardware, source code, interfaces, tools, works, and other related items. The items described herein, and any other items, are hereinafter referred to individually or collectively as "the work" or "works." NAVFAC shall be the owner of all of these works and all intellectual property rights in or to these works. Therefore, any restricted data rights, information, software, materials and/or other items, including the contractor's or a third-party's proprietary data, information, software, materials and/or items must not be used under this contract without the specific written approval by the Contracting Officer prior to start of any work.

10. USE OF WORK

- 10.1. Except as provided in writing by the Contracting Officer, no work material and/or other item created, generated, produced or provided under, or as a result of, this PWS/contract/task order shall be used by the Contractor or any of its employees/agents, subcontractors and/or representatives, for any purpose other than for the support and performance of this PWS/contract/task order. Therefore, the Contractor and its personnel are obligated to protect the works from unauthorized use and shall incorporate this paragraph in each of its contracts/subcontracts associated with the goods and/or services provided under this PWS/contract.

11. CONTRACTOR INTERFACES

- 11.1. The Contractor and/or its Subcontractors may be required as part of the performance of this effort to work with other Contractors working for the Government. Such other Contractors shall not direct this Contractor or this Contractor's Subcontractors in any manner. Also, this Contractor and/or its Subcontractors shall not direct the work of such other Contractors in any manner.

12. NON-PERSONAL SERVICES STATEMENT

- 12.1. Contractor employees performing services under this Contract will be controlled, directed, and supervised at all times by management personnel of the Contractor. Contractor management will ensure that employees properly comply with the performance work standards outlined in the statement of work.
- 12.2. Contractor employees will perform their duties independent of, and without the supervision of, any Government official or other Defense Contractor. The tasks, duties, and responsibilities set forth in the contract may not be interpreted or implemented in any manner that results in any Contractor employee creating or modifying Federal policy, obligating the appropriated funds of the United States Government, overseeing the work of Federal employees, providing direct personal services to any Federal employee, or otherwise violating the prohibitions set forth in Parts 7.5 and 37.1 of the Federal Acquisition Regulation (FAR). The Government will control access to the facility and will perform the inspection and acceptance of the completed work.

- 12.3. This contract is a “non-personal services contract” as defined in FAR 37.101. It does not create employment rights with the U.S. Government whether actual, inherent, or implied. By agreeing to perform the services described in these specifications, the Contractor acknowledges that he/she is not, and shall not become, an employee of the U.S. Government. The Contractor further agrees that he/she shall not bring any cause of action in any forum claiming that he/she has become an employee of the U.S. Government.

13. GOVERNMENT-CONTRACTOR RELATIONSHIPS

- 13.1. Contractor employees performing services under this order will be controlled, directed, and supervised at all times by management personnel of the contractor. Contractor management will ensure that employees properly comply with the performance work standards outlined in the statement of work. Contractor employees will perform their duties independent of, and without the supervision of, any Government official or other Defense Contractor.
- 13.2. The tasks, duties, and responsibilities set forth in the contract/task order may not be interpreted or implemented in any manner that results in any contractor employee creating or modifying Federal policy, obligating the appropriated funds of the United States Government, overseeing the work of Federal employees, providing direct personal services to any Federal employee, or otherwise violating the prohibitions set forth in Parts 7.5 and 37.1 of the Federal Acquisition Regulation (FAR).
- 13.3. The Government will control access to the facility and will perform the inspection and acceptance of the completed work.
- 13.4. The Government and the Contractor understand and agree that the services to be delivered under this contract by the Contractor to the Government are non-personal services and the parties recognize and agree that no employer-employee or master servant relationships exist or will exist under the contract between the Government and the contractor and/or between the Government and the contractor’s employees.

14. DISCLOSURE OF INFORMATION

- 14.1. Contractor employees performing services under this order will be controlled, directed, and supervised at all times by management personnel of the Contractor. Contractor management will ensure that employees properly comply with the perform their duties independent of, and without the supervision of, any Government official or other Defense Contractor. The tasks, duties, and responsibilities set forth in the contract/task order may not be interpreted or implemented in any manner that results in any Contractor employee creating or modifying Federal policy, obligating the appropriated funds of the United States Government, overseeing the work of Federal employees, providing direct personal services to any Federal employee, or otherwise violating the prohibitions set forth in Parts 7.5 and 37.1 of the Federal Acquisition Regulation (FAR). The Government will control access to the facility and will perform the inspection and acceptance of the completed work.
- 14.2. Information made available to the Contractor by the Government for the performance or administration of this effort shall be used only for those purposes and shall not be used in any other way without the written agreement of the Contracting Officer.
- 14.3. The Contractor agrees to assume responsibility for protecting the confidentiality of Government records and other records disclosed or made available to the Contractor in connection with the performance of this contract, which is not public information. Each Contractor or employee of the Contractor to whom information may be made available or disclosed shall be notified in writing by the Contractor that such information may be disclosed only for a purpose and to the extent authorized herein.
- 14.4. The Contractor and all employees having access to information shall be required to execute a nondisclosure agreement and provide all original signatures to the orientation briefing.

- 14.5. The Contractor and all of its employees having access to information shall be required to execute a non-disclosure agreement prior to task beginning.
- 14.6. The Contractor, any sub-contractors and their personnel shall make no public announcements or disclosures relative to information developed from this contract (including plans or programs resulting from this effort) nor to government-owned information made available to the Contractor. All requests for information shall be directed to COR. Information or other related data shall not be released, by the Contractor or any sub-Contractor(s) or its personnel, to other government agencies (DoD and Non- DoD), private groups, private individuals or private agencies without prior written approval from the Contracting Officer.

15. ACCESS TO PROPRIETARY DATA

- 15.1. Performance of this effort may require the Contractor to access and use data and information proprietary to a Government agency or Government Contractor which is of such a nature that its dissemination or use, other than in performance of this effort, would be adverse to the interests of the Government and/or others. Contractor and/or Contractor personnel shall not divulge or release data or information developed or obtained in performance of this effort except to authorize Government personnel or upon written approval of the Contracting Officer. The Contractor shall not use, disclose, or reproduce proprietary data that bears a restrictive legend, other than as required in the performance of this effort. Nothing herein shall preclude the use of any data independently acquired by the Contractor without such limitations or prohibit an agreement at no cost to the Government between the Contractor and the data owner which provides greater rights to the Contractor.

16. PHOTOGRAPH

- 16.1. Photographs may be required for the contract to document existing conditions and are permitted with prior approval by on-site federal Government personnel. Photographs taken by the contractor are the property of the Government and cannot be used or disclosed to non-federal government personnel without prior written approval by the Contracting Officer.

17. ORGANIZATIONAL CONFLICTS OF INTEREST

- 17.1. The Contractor acknowledges that it is familiar with FAR Subpart 9.5, Organizational and Consultant Conflicts of Interest, and agrees to avoid, neutralize or mitigate such conflicts of interest in accordance with the principles set forth in the FAR. If performance of any PWS requires the Contractor (to include Subcontractors) to supply technical support related to systems or projects with which the Contractor is already directly concerned, either by prime or subcontract, the Contractor shall so immediately inform the Contracting Officer. The PWS may be withdrawn if a conflict is found. The Contractor shall not undertake performance of any PWS that requires it to supply technical support regarding such systems until the notice is given and written consent to proceed is issued by the Contracting Officer.

18. HOURS OF WORK

- 18.1. Contract employees' work schedules will be compatible with the Government's operating hours. Typically, operating hours are 7:00 AM to 3:30 PM, Monday through Friday, with the exception of Federal Government holidays. Normally, a shift will consist of eight working hours and conform to customer's working hours. Shift work may be required in the performance of this contract. Work on both second and third shifts may be ordered. First shift is defined as work starting between the hours of 6:00 AM and 12:00 PM. Second shift is defined as work starting between the hours of 12:01 PM and 23:00 PM. Third shift is defined as work starting between the hours of 23:01 PM and 5:59 AM. Contractor requests for alternate working schedules shall require approval from the Designated Point of Contact.

18.2. Telework and/or compressed work schedule may be authorized. Services delineated in this PWS are expected to be performed by Contractor-provided personnel paced at no more than forty (40) work hours per week (estimated 1,920 hours per year, which excludes federal holidays). Contractor requests for alternate working schedules shall require written approval from the Contracting Officer. Any overtime will be addressed on a case-by-case, project-specific basis.

19. OVERTIME

19.1. Overtime may be required and authorized by the Contracting Officer. Overtime is employee effort in excess of forty (40) hours in a standard work week, or if otherwise required by law is defined as employee effort in excess of eight (8) hours per day. In order for the Government to pay overtime labor rates, the task order must have previously authorized the overtime. The Government will not be liable for payment of overtime that was not authorized by the Contracting Officer in a Task Order.

20. PRODUCTIVE DIRECT LABOR HOURS

21. The Contractor shall charge the Government only for "Productive Direct Labor Hours". "Productive Direct Labor Hours" are defined as those hours expended by Contractor personnel in performing work under this effort. This does not include sick leave, vacation, Government or Contractor holidays, jury duty, military leave, or any other kind of administrative leave such as acts of God (i.e. hurricanes, snow storms, tornadoes, etc.), Presidential funerals or any other unexpected government closures. It is anticipated that the majority of the contractor employees will be full-time. Full-time employee is defined as 80 hours/two weeks for exempt employees and 8 hours a day for non-exempt employees. Part time employees can be provided under this contract with the approval from the Designated Point of Contact and if the person(s) possess a special knowledge or skill required by the contract. Coordination is required for space and computer concerns. The part-time Contractor employees cannot exceed the full-time equivalent hours provided.

22. CHANGES

22.1. The Contractor is advised that only a duly appointed Contracting Officer, acting within the scope of the contract, has the authority to make changes that may affect the contract terms and conditions, specifications, quality, quantity, price, and/or delivery. The Contractor must contact the Contracting Officer for approval in the event there are changes prior to proceeding. No other individual has the authority to make this binding changes and/or commitments.

22.2. In the event that the contractor commits to such changes at the direction of any person other than a duly appointed Contracting Officer, the changes shall be considered to have been made without proper authority, and no adjustment shall be made in contract price to cover any increase in costs and/or time incurred as a result thereof.

23. PAYMENT FOR UNAUTHORIZED WORK

23.1. No payments will be made for any unauthorized supplies and/or services or for any unauthorized changes to the work specified herein. This includes any services performed by the Contractor of their own volition or at the request of an individual other than a duly appointed Contracting Officer. Only a duly appointed Contracting Officer is authorized to change the specifications, terms, and conditions under this effort.

24. CONTRACTOR PERSONNEL

- 24.1. The Contractor shall be responsible for managing and overseeing the activities of all Contractor personnel, as well as Sub-Contractor efforts used in performance of this effort. The Contractor's management responsibilities shall include all activities necessary to ensure the accomplishment of timely and effective support, performed in accordance with the requirements contained in the statement of work. Resumes submitted for employees assigned to perform under this statement of work shall contain documented experience directly applicable to the functions to be performed. Further, these prior work experiences shall be specific and of sufficient variety and duration that the employee is able to effectively and efficiently perform the functions assigned.

25. PROGRAM MANAGER

- 25.1. The Contractor shall provide a Program Manager to facilitate Government-Contractor communications. The Program Manager shall be the primary technical and managerial interface between the Contractor and Contracting Officer located at NAVFAC Atlantic. The name of this person, and an alternate or alternates, who shall act for the Contractor when the Program Manager is absent, shall be designated in writing to the Contracting Officer. The Program Manager or alternate will have full authority to act for the Contractor on all contract matters relating to daily operations. The Program Manager shall be the Contractor's authorized point of contact with the Government and the designated point of contact. The Program Manager shall be responsible for formulating and enforcing work standards, assigning schedules, reviewing work discrepancies, and communicating policies, purposes, and goals of the organization to subordinates.
- 25.2. The Program Manager or alternate must be available during normal duty hours, as specified herein and to meet with Government personnel within 24 hours to discuss issues.
- 25.3. The Contractor's Program Manager shall meet with the Contracting Officer/Designated point of contact as necessary to maintain satisfactory performance and to resolve other issues pertaining to Government/Contractor procedures. At these meetings, a mutual effort will be made to resolve any problems identified. Written minutes of these meetings shall be prepared by the Contractor, signed by the Contractor's designated representative, and furnished to the Government within two (2) workdays of the subject meeting.
- 25.4. The Program Manager's effort shall be incorporated into the hourly rate of the required positions and will not be funded separately.

26. PHYSICAL SECURITY

- 26.1. The Contractor shall be responsible for safeguarding all government property provided for Contractor use. At the end of normal duty hours and/or after normal duty hours, all Government facilities, equipment and materials must be secured.

27. KEY CONTROLS

- 27.1. The Contractor shall establish and implement methods of making sure all keys issued to the Contractor by the Government are not lost or misplaced and are not used by unauthorized persons. The Contractor shall not duplicate any keys issued by the Government. The Contractor shall immediately report (within one hour) to the CO any occurrences of lost or duplicated keys.
- 27.2. In the event keys, other than master keys, are lost or duplicated, the Contractor may be required, upon written direction of the CO, to re-key or replace the affected lock or locks at no cost to the Government. The Government may, however, at its option, replace the affected lock or locks or perform re-keying and deduct the cost of such from the monthly payment due the Contractor. If a master key is lost or duplicated, the Government will replace all locks and keys for that system and deduct the total cost of that replacement from the monthly payment due the Contractor.

27.3. The Contractor must prohibit the use of keys issued by the Government by any persons other than the Contractor's employees. Opening of locked areas by Contractor employees to permit entrance of persons other than Contractor employees engaged in performance of work requirements in those areas is prohibited.

28. APPLICABLE LAWS AND REGULATIONS

28.1. It shall be the contracted personnel's responsibility to identify the applicable Federal, state, local, and DoD regulations and to apply issues, procedures and protocols, as required. All work performed under this contract shall comply with the most current issue or version of DoD, DoN, Federal, state and local statutes, regulations and accepted standards of design in effect.

29. POTENTIAL HAZARD

29.1. In the event the contractor personnel detects conditions that pose an immediate danger to the health and safety of personnel, or hazard to the environment, the contracted personnel shall report to onsite personnel immediately to have observed action stopped immediately. If contractor's personnel stop work on site due to observed imminent danger, the contractor shall also provide the facts to the COR immediately after imminent danger has been removed. A written report of such incidence forwarded to the COR is also required within five (5) working days of the detection.

30. PLACE OF PERFORMANCE

30.1. Services may be provided off-site, on-site, or a combination thereof, within the NAVFAC Atlantic Area of Responsibility depending on the position description requirements. The primary work sites will be in Portsmouth, VA and Kittery, ME; however, other areas may be included. Per diem for Contractor employees that commute beyond a 50-mile radius to their work site location will not be reimbursed by the Government.

31. PERIOD OF PERFORMANCE

31.1. To be determined at the time of award. The period of performance will end one year from the date of the actual award, with four (4) one-year option periods, in accordance with FAR 52.217-9, Option to Extend the Term of the Contract (Mar 2000). Each Task Order will specify a period of performance relevant to the requirement of the specific Task Order. The total contract performance shall not exceed 60 months.

32. DELIVERABLES/DELIVERABLE SCHEDULE

32.1. In fulfillment of this effort, the Contractor shall provide the following deliverables. All deliverables shall be submitted to the designated points of contact, unless otherwise agreed upon.

32.2. Unless otherwise specified, the Government will have a maximum of ten (10) working days from the day the draft deliverable is received to review the document, provide comments back to the Contractor, and approve or disapprove the deliverable(s). The Contractor will also have a maximum of ten (10) working days from the day comments are received to incorporate all changes and submit the final deliverable to the Government. All days identified below are intended to be workdays unless otherwise specified.

32.3. Deliverables shall follow the Contractor's format. Contractor shall provide one copy of the final deliverables on Microsoft compatible electronic media in a required software format specified by the Contracting Officer.

- 32.4. MONTHLY EXPENDITURE REPORT - The Contractor is required to submit a monthly report to the Contracting Officer and COR on expenditures, showing hours ordered, hours used to date, and remaining hours for each position under a task order. Within ten (10) days after the award, the Contractor must provide the Contracting Officer with a template spreadsheet to be used for the Monthly Expenditure Report.
- 32.5. ACCIDENT AND DAMAGE REPORTING/NOTIFICATION - The Contractor shall report an accident or property damage as soon as practicable, but not later than four (4) hours after occurrence.
- 32.6. COMMUNICATION PLAN - The Contractor shall provide a plan outlining the processes to be used by the Contractor to assure effective and timely communication with its employees and the Government. Contract employees shall provide a communication plan outlining the task/project points of contacts and the communication chain, as required.
- 32.7. MONTHLY STATUS REPORT - The Contractor shall document the efforts performed under this PWS in a detailed Monthly Status Report due on or before the 10th of each Month. The status report shall include, at a minimum:
- 32.7.1. Progress for the period: detailed progress report of findings, activities, and accomplishments during the reporting period, and summary of work accomplished during the reporting period and percent complete.
 - 32.7.2. Activities planned for the next reporting period: planned activities, as well as the status of any/all deliverables, including planned delivery date(s) and actual and/or anticipated delivery date(s).
 - 32.7.3. Problems encountered: identification of any problems, issues or delays, and recommendations as to their resolution, and any corrective action that was taken to correct identified problems.
 - 32.7.4. Strategy revisions: recommended changes to include any lessons learned.
 - 32.7.5. Expenditures by task order and ELIN showing hours ordered, hours used to date, and remaining hours.
- 32.8. FINAL REPORT - The Contractor shall provide a final report, to the designated point of contact, within 30 days of the conclusion of this contract. The report will summarize tasks accomplished, turn-over of project files, unresolved ongoing projects and issues, objectives achieved, significant issues, problems and recommendations to improve the process.

32.9. WORK OUTSIDE REGULAR WORK HOURS

32.9.1. The Contractor shall provide a report seven (7) working days prior to the date requested for work outside of the regular working hours.

32.10. MEETING AGENDAS, HANDOUTS, AND MINUTES

32.10.1. The Contractor shall provide a Meeting Agenda and handouts within two (2) days before the start of the meeting. The Contractor shall provide Meeting Minutes within two (2) workdays following the meeting.

32.11. CERTIFICATE OF INSURANCE

32.11.1. The Contractor shall provide a Certificate of Insurance within fifteen (15) working days after contract award and at least thirty (30) calendar days written notice prior to cancellation or material change or policy coverage. See FAR 52.228-5 for more detailed information.

32.12. DRUG ABUSE PREVENTION PLAN

32.12.1. The Contractor shall develop a plan to explain how it will satisfy the drug-free work force requirement as stated in DFARS Clause 252.223-7004, Drug Free Workforce (Sep 1988). The Contractor shall provide a Drug Abuse Prevention Plan within thirty (30) days of contract award.

32.13. QUALITY CONTROL

32.13.1. The Contractor is responsible for the completeness and accuracy of all work performed under this contract, and for compliance with all parts of the contract, and with properly identifying the requirements design standards and codes. The Government is relying upon the professional quality of the work that the Contractor and its employees shall perform.

32.14. QUALITY CONTROL PLAN

32.14.1. The Contractor shall provide a Quality Control Plan (QCP) within fifteen (15) days after award.

32.14.2. The work and any services performed shall be accepted only when in full compliance with the contract specifications. The plan shall explain the manner in which the Contractor shall ensure all contract requirements are being accomplished in accordance with this PWS.

32.14.3. The plan shall emphasize deficiency prevention over deficiency detection and subcontract oversight (if applicable). The plan shall contain a reporting system that will provide information to the Contracting Officer on Contractor performance. The Contractor shall maintain the QCP for the duration of the contract and submit any changes to the plan for Contracting Officer review prior to implementation. A sustaining focus throughout the program shall be the attainment of continuous quality improvement.

32.14.4. The plan shall address at a minimum: periodic monitoring of required work tasks to provide quality checks on performance drivers, such as internal processes, materials, employee skills, and equipment. A process for investigation and corrective action when needed. A process for responding to Government complaints and communication actions taken. Methods of documenting and enforcing QC operations of both Contractor and subcontractor work (if applicable), including inspection and testing.

32.15. QUALITY CONTROL FILES

32.15.1. The Contractor shall maintain an electronic file of all inspections or tests conducted by the Contractor, to include any corrective actions taken. This file shall be subject to review by Government personnel designated by the Contracting Officer.

32.15.2. The Contractor shall maintain a QC Inspection File. The file shall be made available to the Government during the Government's regular working hours and shall be turned over to the Contracting Officer within five (5) calendar days of completion/termination of the contract.

32.16. QUALITY CONTROL MEETINGS

- 32.16.1. The Contracting Officer and/or COR shall conduct a Quality Control Meeting at a minimum once per month.
- 32.16.2. The Contractor or Contracting Officer and/or COR may at times schedule additional meetings to review contract performance and discuss process deficiencies, financial compliance and problem resolution. The Contractor and the Government shall make a mutual effort to resolve any problems identified. Meetings may be held in person or through teleconference. In lieu of a meeting, contract performance may be discussed through telephone and/or e-mail correspondence.
- 32.16.3. The Contractor will provide and maintain Quality Control Meeting minutes. Draft Meeting minutes for review and comment are to be provided within three (3) business days of the meeting to all attendees. Government comments are to be provided with five (5) days of receipt of the Draft Meeting Minutes. Concurred and consolidated Final meeting minutes are to be issued within three (3) days of Government provide Draft review and comment.

32.17. IMPLEMENTATION PLAN

- 32.17.1. The Contractor shall develop and submit an Implementation Plan to the Contracting Officer and COR no later than ten (10) days after the award. The Implementation Plan shall outline how Contractor personnel will be managed to ensure performance of the requirements of the PWS, contract, and task order(s). The plan shall address, but is not limited to, management authority, supervision, span of control and accountability, key personnel (include name, title, responsibilities and authority level), planning and coordinating leave, continuity of services, designation of alternate personnel, conduct and removal processes and procedures, monitoring and management of subcontractor effort (if applicable).

32.18. PERSONNEL LIST, ORGANIZATIONAL CHART, AND EMPLOYEE LISTING

- 32.18.1. The Contractor shall submit a Personnel list addressing the personnel qualifications in accordance with the scope of services and an Organizational Chart within fifteen (15) days after award. The Contractor shall provide a listing of employees to the Government upon request.

33. DEPARTMENT OF HOMELAND SECURITY (DHS) FORM I-9, EMPLOYMENT ELIGIBILITY VERIFICATION

- 33.1. The Contractor shall provide the DHS Form I-9 prior to the start of work for any Contractor or Subcontractor employee.

34. ACCIDENT PREVENTION PLAN

- 34.1. The Contractor shall provide an Accident Prevention Plan (APP) within fifteen (15) days after award. The Contractor shall review, update, submit a revised APP annually and within fifteen (15) calendar days of a change in work conditions, hazards, or activities occur.

35. ACCIDENT AND DAMAGE REPORTING/NOTIFICATION

- 35.1. The Contractor shall report an accident or property damage as soon as practicable, but not later than four (4) hours after occurrence.

- 35.2. The Contractor shall notify the Contracting Officer and COR of all damages, accidents, mishaps, and near misses that occur on or related to Government property as soon as practical, but not later than four hours. For recordable injuries and illnesses, property damage accidents resulting in at least \$2,000 in damages, and Weight Handling Equipment (WHE) accidents, the Prime Contractor shall conduct an accident investigation to establish the root cause(s) of the accident. For recordable injuries and illnesses and property damage accidents resulting in at least \$2,000 in damages complete the Navy Contractor Significant Incident Report (CSIR) form and provide the report to the Contracting Officer and COR within 1 calendar day of the accident. Comply with current 29CFR1904 for OSHA/HIOSH record keeping and reporting requirements.
- 35.3. The Contractor shall report all accidents, mishaps, and near misses to the Contracting Officer and COR in a timely manner as described below: An Initial Accident Reporting Notification Report shall be developed by the Contractor and provided to the Contracting Officer immediately after that an accident, or near miss, has occurred. The Contractor may not have all the facts and information regarding the actual incident or near miss at the time of the initial report. However, it is the Government's desire to receive notification of all mishap situations as early as possible. The Contractor shall develop a Follow-on Accident Reporting Notification Report and shall provide a copy to the Contracting Officer by close of business the day of the accident, or if the accident occurs after hours, at start of business the following morning.
- 35.4. Follow-on reports shall be required daily until the Contractor can send a final, conclusive report of the nature, cause, and outcome of the accident. The Contractor shall provide a Final Accident Reporting Notification Report of the accident to the Contracting Officer within 24 hours after completing the investigation of the accident.

36. SAFETY CERTIFICATION

- 36.1. The Contractor shall provide copies of all of the required Federal, state, county, city or industry related certifications for work performed under this Contract. Provide new versions of certifications as the old certifications expire.

37. INSPECTION AND ACCEPTANCE OF WORK

- 37.1. Final inspection and acceptance of all work performed, reports and other deliverables will be performed at the place of delivery (work site) by the designated point of contact. Acceptance by the Government of satisfactory services provided is contingent upon the Contractor performing in accordance with the terms and conditions of the contract.

38. GENERAL PERFORMANCE STANDARDS

- 38.1. General quality measures, as set forth below, will be applied to each work product received from the Contractor under this statement of work.
- 38.2. ACCURACY - Work Products shall be accurate in presentation, technical content, and adherence to accepted elements of style.
- 38.3. CLARITY - Work Products shall be clear and concise. Any/All diagrams shall be easy to understand and be relevant to the supporting narrative.
- 38.4. CONSISTENCY OF REQUIREMENTS - All work products must satisfy the requirements of this statement of work.
- 38.5. FILE EDITING - All text and diagrammatic files shall be editable by the Government.
- 38.6. FORMAT - Work Products shall be submitted in hard copy (where applicable) and in media mutually agreed upon prior to submission. Hard copy formats shall follow any specified Directives or Manuals.

38.7. TIMELINESS - Work Products shall be submitted on or before the due date specified in this statement of work or submitted in accordance with a later scheduled date determined by the Government.

39. QUALITY ASSURANCE

39.1. The Government designated point of contact will review, for completeness, preliminary or draft documentation that the Contractor submits, and may return it to the Contractor for correction. Absence of any comments by the designated point of contact will not relieve the Contractor of the responsibility for complying with the requirements of this work statement. Final approval and acceptance of documentation required herein shall be by written approval and acceptance by the designated point of contact. The Contractor shall not construe any letter of acknowledgment of receipt material as a waiver of review, or as an acknowledgment that the material is in conformance with this work statement. Any approval given during preparation of the documentation, or approval for shipment shall not guarantee the final acceptance of the completed documentation.

39.2. All work under the task orders shall be monitored by the Contracting Officer's Representative (COR), who will act as the primary technical representative of the Government. The COR for the assigned duty station will provide general instructions to the Contractor on limitations and deadlines, and is responsible for administration of the contract in compliance with the contract to include inspection and acceptance of deliverables. The COR is NOT a Contracting Officer and DOES NOT have authority to take any action, either directly or indirectly, that would change the pricing, quantity, quality, place of performance, delivery schedule, or any other terms and conditions of the contract, or to direct the accomplishment of effort which goes beyond the scope of this PWS.

40. ADMINISTRATIVE CONSIDERATIONS

40.1. CORRESPONDENCE - To promote timely and effective administration, correspondence shall be subject to the following procedures:

40.1.1. Technical correspondence (where technical issues relating to compliance with the requirements herein) shall be addressed to the designated point of contact with an information copy to the Contract Administrator (CA).

40.1.2. All other correspondence (that which proposes or otherwise involves waivers, deviations or modifications to the requirements, terms or conditions of this PWS) shall be addressed to the CA with an information copy to the designated point of contact.

41. REIMBURSABLE OTHER DIRECT COSTS

41.1. Training, travel, vehicles, fuel, and other pre-approved miscellaneous costs are considered Other Direct Costs (ODCs). Should any ODCs become necessary under this contract, the travel information will be included in task order(s) with a "Not to Exceed" dollar amount for fuel, training, travel, and vehicles. The Contractor will be reimbursed for reasonable and necessary costs actually incurred in the performance of the contract. The Contractor shall obtain Government approval prior to expending any ODCs.

41.2. Travel: Local travel (less than 50 miles) may be required as a condition of Contractor performance and is not reimbursable. All other travel shall be approved, by the Contracting Officer, prior to commencement of travel. Approved travel will be reimbursed in accordance with the Federal Travel Regulations. Travel vouchers and supporting documentation must be presented for payment with its invoice.

41.3. It is expected that Contractor personnel shall be located at or near the Government facilities at duty sites identified and no per diem or relocation costs will be reimbursed under this contract.

41.4. It is estimated that travel from the assigned duty station to meetings and project sites, including overnight travel, may be necessary approximately 30% of the time. Any travel requirements will be handled on an as needed basis through each task order and task order modifications.

42. TRAINING

- 42.1. Government specific training may be required. Reimbursable training must be only that training that is required to perform the specific duties that are particular to NAVFAC ML operations and procedures. All government specific training shall be approved by the designated point of contact prior to commencement of any training. Training vouchers and supporting documentation must be presented for payment with its invoice. Contractor's office training or employee training required to qualify for minimum scope requirements will not be reimbursable and must be borne by the Contractor.

43. INVOICING

- 43.1. The Contractor shall bill no more than once monthly. Invoices must include, at a minimum, the following information for each individual:
 - 43.1.1. Contract and Task Order number Contractor name and point of contact Invoice number and date
 - 43.1.2. Time period covered
 - 43.1.3. Total value of contract through modification Percentage of performance complete
 - 43.1.4. Value of completed performance Total of prior payments
 - 43.1.5. Amount of this invoice
 - 43.1.6. Productive Direct Labor Hours for the current billing period and cumulative to date Labor Category(s)
 - 43.1.7. Hourly Rate
 - 43.1.8. Any travel or Other Direct Costs (ODCs) incurred (including supporting documentation/receipts for all charges) for the current billing period and cumulative to date, if previously authorized by the Contracting Officer.
- 43.2. A designated point of contact will be provided to the Contractor within ten (10) days after award. All payment requests must be submitted electronically through Wide Area WorkFlow (WAWF) (See DFARS 252.232-7006).
- 43.3. Hardcopy invoices shall not be accepted, unless requested by NAVFAC Atlantic. "Payment Request" means any request for contract financing payment or invoice payment by a Contractor. To constitute a proper invoice, the payment request must conform to the requirements identified in FAR 32.905, "Payment Documentation and Process" and FAR 52.232-25, "Prompt Payment (Jan 2017)." Supporting documentation shall be attached to the invoice in the form of an Adobe PDF file.
- 43.4. The Contractor is required to submit a monthly report on expenditures by Task Order and ELIN showing hours ordered, hours used to date, and remaining hours for each position under the contract.
- 43.5. Release of Claims
 - 43.5.1. The contractor shall, with the final invoice for the base period and each option period, provide a release of claims worded similar to the following:
 - 43.5.1.1. The undersigned Contractor does, and by the receipt of said sum shall for itself, its successors and assigns, remise, release and forever discharge the Government, its officers, agents, and employees, of and from all liabilities, obligations and claims whatsoever in law and in equity under or arising to day out of said contract.

44. POST AWARD EVALUATION OF CONTRACTOR PERFORMANCE

- 44.1. Interim and final evaluations of Contractor performance will be prepared on this effort in accordance with FAR Subpart 42.1500. A final performance evaluation will be prepared, by the designated point of contact, at the time of completion of work. In addition to the final evaluation, interim evaluations may be prepared, by the designated point of contact, annually to coincide with the anniversary date of this effort.

44.2. Interim and final evaluations will be provided to the Contractor as soon as practicable after completion of the evaluation. The Contractor will be permitted thirty (30) calendar days to review the document and to submit additional information or a rebutting statement. Any disagreement between the parties regarding an evaluation will be referred to an individual one level above the Contracting Officer, whose decision will be final.

44.3. Copies of the evaluations, Contractor responses, and review comments, if any, will be retained as part of the contract file, and may be used to support future award decisions.

45. SECTION 508 COMPLIANCE REQUIREMENTS - Not Applicable

46. GOVERNMENT-FURNISHED PROPERTY AND INFORMATION

46.1. GOVERNMENT-FURNISHED INFORMATION - The Government shall provide introductions to all key Government representatives along with a briefing on their roles and functions in the organization, initial familiarization/orientation of task requirements, and any required hardware and software manuals or other documentation. Published guidance will be provided by the Government as needed, including but not limited to a variety of Federal, Department of Defense, Department of Navy, Naval Facilities Engineering Systems Command, publications, manuals, directives, standards, policies, and procedures.

46.2. GOVERNMENT-FURNISHED FACILITIES, EQUIPMENT, MATERIALS, AND SERVICES

46.3. In accordance with FAR 52.245-1, Government Property (Apr 2012), the Government will furnish or make available to the Contractor certain Government-owned facilities, utilities, materials, and equipment for use in connection with this contract. Any government-furnished property, materials and services will be identified at the task order level.

46.4. The Government will provide safety vests and hard hats. All other Personal Protective and Safety Equipment shall be provided by the Contractor.

46.5. Contractor employee access to some data is prohibited, and contractor employees may not have access to systems that would contain such data. The NAVFAC Atlantic Command Information Office will administer the Contractor's access privileges. The Contractor cannot use flash drives or any other storage device found not to be acceptable by the Government.

46.6. The Contractor will not be permitted to load any software on Government computers. However, the Contractor is not prevented from using their company resources to accomplish tasking unless directed otherwise. There is no expectation of WiFi to be provided by the Government, although WiFi may be available.

46.7. Contractor employees are permitted to use, ride in or drive government vehicles. The contractor must be covered by their company's worker's compensation liability and insurance coverage shall be extended to Contractor personnel operating Government owned equipment and vehicles. Contractor employees must be covered by their company's worker's compensation liability when using, riding in or driving a vehicle while traveling for contracted Government work. All insurance is to be provided by the Contractor for its personnel traveling for Government contracted work.

47. PROTECTION OF GOVERNMENT PROPERTY - During execution of the work, the Contractor shall protect Government property. The Contractor shall return areas damaged as a result of negligence under this contract to their original condition at no cost to the Government. The Contractor shall be held responsible for equipment, facilities or other Government property damaged under this contract, at no cost to the Government.

48. CONTRACTOR-FURNISHED PROPERTY/INFORMATION - The Contractor may be required to provide vehicles, cell phones, or position specific supplies as Other Direct Costs (ODC's) for individual Task Orders.

49. PERSONAL PROTECTIVE EQUIPMENT REQUIREMENTS (PPE) - In accordance with OSHA 29 CFR 1910 and the UFC 3-560-01 (dtd 24 JULY 2017), any worker whose normal job includes working on or near exposed energized electrical equipment operating at 50 volts or more must wear PPE that provides appropriate arc flash protection working (Note: Additional PPE requirements are needed for employees that work on systems 600V and greater).

49.1. The required PPE includes:

49.1.1. Arc-Rated Clothing, Minimum Arc Rating of 8 cal/cm²

49.1.2. Arc-rated long-sleeve shirt and pants or arc-rated coverall

49.1.3. Arc-rated flash suit hood or arc-rated face shield (see Note 1) and arc-rated balaclava

49.1.4. Optional PPE:

49.1.4.1. Protective Equipment

49.1.4.2. Hard hat (AR)

49.1.4.3. Safety glasses or safety goggles (SR)

49.1.4.4. Hearing protection (ear canal inserts)

49.1.4.5. Rubber Gloves (must meet proper voltage ratings and gloves are required to be tested biannually).

49.1.4.6. Heavy duty leather gloves (see Note 2)

49.1.4.7. Leather footwear

49.1.5. Optional PPE (PPE required for employees working in inclement weather conditions) includes:

49.1.5.1. Arc-rated jacket

49.1.5.2. Parka

49.1.5.3. Rainwear

49.1.5.4. Hard hat liner

49.1.6. Notes:

49.1.6.1. Face shields are to have wrap-around guarding to protect not only the face but also the forehead, ears, and neck. Use an arc-rated balaclava with an arc-rated face shield when the back of the head is within the arc flash boundary. As an alternative, an arc-rated arc flash suit hood can be worn instead of an arc-rated face shield and balaclava.

49.1.6.2. If rubber insulating gloves with leather protectors are used, additional leather or arc-rated gloves are not required. The combination of rubber insulating gloves with leather protectors satisfies the arc flash protection requirement.

49.1.7. Additional PPE Clothing Requirements:

60.1.7.1. Wear arc flash rated clothing properly inside the arc flash boundary. This includes:

- 49.1.7.1.1. Long sleeves must be rolled down and buttoned.
- 49.1.7.1.2. The top button of shirts, coveralls, and jackets must be fastened.
- 49.1.7.1.3. Tuck shirts into the trousers.
- 49.1.7.1.4. Shorts are prohibited and trousers must extend the full length of the leg.
- 49.1.7.1.5. Garments with exposed metallic fasteners must not be worn, unless the garments are properly arc rated.
- 49.1.7.1.6. Garments, including safety harnesses, worn over arc flash rated protective clothing must be arc flash rated.
- 49.1.8. The following is prohibited:
 - 49.1.8.1. Do not wear conductive articles of jewelry (including but not limited to cloth with conductive thread, metal frame glasses, metal headgear, wristbands, watch chains, rings, bracelets, necklaces, body jewelry and piercings) within the restricted approach boundary or where they present an electrical contact hazard with exposed energized electrical conductors or circuit parts.
 - 49.1.8.2. Do not wear clothing that could increase the extent of injuries when exposed to electric arcs or open flames. Clothing made from acetate, nylon, polyester, and rayon, either alone or in blends, cannot be worn as undergarments when working on or near energized equipment of greater than 50 V. Military clothing such as DCUs, field jackets, field jacket liners, Gortex jackets and pants, Gortex fleece liners, nylon cold weather gloves, nylon upper combat boots, chemical warfare suits, winter parkas, winter parka pants, all are polyester blend materials and not allowed to be worn when working on or near energized equipment of greater than 50
 - 49.1.8.3. Shorts are prohibited and trousers must extend the full length of the leg.
 - 49.1.8.4. Do not wear anything made of celluloid or other flammable plastic when working near electric arcs or open flames. This may include cap visors, collars, and cuff protectors.
 - 49.1.8.5. Do not wear loose clothing, dangling sleeves, or neckties when working on or near moving machinery.
 - 49.1.8.6. Do not wear garments equipped with metal slides or zipper fasteners, unless the slide or fastener is effectively covered.
 - 49.1.8.7. Do not wear coveralls half-dressed where the top-half is wrapped around the waist area.
 - 49.1.8.8. Do not wear clothing in a way in which it was unintended to be worn, such as an arc rated shirt tied around waist with the sleeves.
 - 49.1.8.9. Do not wear any torn, ripped or oil stained garments (Have garments exchanged immediately)

50. PERSONNEL REQUIREMENTS

50.1. PERSONNEL DEFINITION/DESIGNATION

- 50.1.1. No substitutions shall be made of accepted personnel except for sudden illness or death, or termination of employment. For the purpose of the overall performance of this effort, the Contractor's Program Manager shall also be considered under Contractor's "personnel". Substitutions shall only be accepted if in compliance with "Substitution of Personnel" provision identified below.
- 50.1.2. During the first ninety (90) days following the start date of each Contractor employee, no substitutions by the Contractor shall be made with regard to such Contractor employee except for sudden illness, death, or termination of employment. In any of these events, the Contractor shall promptly notify the Contracting Officer and provide the information required under "Substitution of Personnel." Substitutions after the initial ninety (90) day period of placement shall only be accepted if in compliance with "Substitution of Personnel" provision identified below.

50.1.3. The Contractor agrees to assign to this contract those persons whose resumes were submitted and approved by the Government, and who meet the PWS for the respective position and level. If, during the performance of services set forth in this PWS, any Contractor employee cannot continue to meet the requirements for any reason, the Contractor shall ensure that there is no gap in services provided. All contractor requests for approval of substitutions hereunder shall be submitted in writing to the Contracting Officer at least two weeks (14 calendar days) in advance of the effective date, whenever possible, and shall provide a detailed explanation of the circumstances necessitating the proposed substitution, a complete resume for the proposed substitute, and any other information requested by the Contracting Officer necessary to approve or disapprove the proposed substitution. Proposed substitute personnel must have similar documentation (i.e., resumes reflecting qualifications equal to or higher than the qualifications stated in the PWS, with confirmation of any required certification) presented for Government acceptance and verification of qualifications in comparison to the requirements described in this PWS. The Contracting Officer will evaluate such requests and promptly notify the contractor of approval or disapproval in writing.

50.1.4. The Government reserves the right to request the replacement of any contractor personnel, if said personnel does not meet the position experience requirements; is not providing quality deliverables; or is not performing in a professional and at a minimum, satisfactory manner.

50.2. SUBSTITUTION OF PERSONNEL

50.2.1. All Contractor requests for approval of substitutions hereunder shall be submitted in writing to the designated point of contact and the Contracting Officer at least two weeks (14 calendar days) in advance of the effective date, whenever possible, and shall provide a detailed explanation of the circumstances necessitating the proposed substitution, a complete resume for the proposed substitute, and any other information requested by the Contracting Officer necessary to approve or disapprove the proposed substitution. An interview may also be requested. The designated point of contact and the Contracting Officer will evaluate such requests and promptly notify the Contractor of approval or disapproval in writing. The Government reserves the right to request the replacement of Contractor personnel if said personnel does not meet the position experience requirements; is not providing quality deliverables; or is not performing in a professional manner.

50.3. MANAGEMENT - The Contractor shall manage the total work effort associated with the services required herein to meet the performance objectives and standards. Such management includes but is not limited to planning, scheduling, report preparation, establishing and maintaining records, and quality control. The Contractor shall provide a staff with the necessary management expertise to assure performance objectives and standards are met.

50.4. ORGANIZATION CHART - The Contractor shall submit an Organizational Chart showing lines of authority of the key personnel and supervisor(s) with the offer for this contract.

50.4.1. NOTE: An on-site supervisor is not required for this contract; however, a supervisor shall be available to be on-site within one hour of Government's request, during normal working hours.

50.4.2. EMPLOYEE LISTING - The Contractor shall maintain and provide upon request a current Employee List. The list shall include employee's name, labor discipline and service start date.

50.5. EMPLOYEE REQUIREMENTS - The Contractor shall provide experienced, qualified, and capable personnel to perform the work in this contract. Personnel shall be fully knowledgeable of all safety and environmental requirements associated with the work they perform. Competent personnel shall be provided as required. Personnel shall speak, read, and comprehend English to the extent that they can perform the contract requirements and comply with installation emergency procedures.

50.6. Additional Contractor employee requirements include:

50.6.1. Valid Driver's License.

50.6.2. Strong Communication skills in English language, both written and oral.

50.6.3. Proof of US Citizenship will be required.

50.6.4. Ability to acquire a Common Access Card (CAC) in accordance with security requirements.

50.6.5. Ability to complete all required training prior to being granted access to Department of Defense (DOD) information systems.

50.6.6. U.S. Occupational Safety & Health Administration (OSHA) Hazardous Waste Operations and Emergency Response Standard (HAZWOPER) certification and appropriate refresher (if needed).

50.6.7. Ability to perform regular and recurring field inspections, investigations, or surveys in which there is a considerable amount of walking, stooping, bending, and climbing.

50.6.8. Ability to perform work in an office setting, with occasional visits to construction sites. Work involves moderate risks of discomforts that require adherence to safety precautions.

50.7. KEY PERSONNEL - The Contractor shall not replace key personnel without approval from the Contracting Officer. Within 15 calendar days after award of the contract, for other than qualification requirements required to be submitted with the offer, the Contractor shall submit to the Contracting Officer a List of Key Personnel, their qualifications and any additional information requested by the Contracting Officer to certify their qualifications.

50.8. EMPLOYEE APPEARANCE

50.8.1. The Contractor shall ensure that all employees present a professional appearance that is appropriate for their position. The Contracting Officer reserves the right to determine the acceptability of any clothing worn. All Contractor/subcontractor employees working under this contract shall be identified by a distinctive nameplate, emblem, or patch attached in a prominent place on an outer garment. Employee identification shall not be substituted for station required passes or badges.

50.8.2. Contractor employees shall adhere to the dress code of business casual attire and conduct themselves in a responsible and professional manner suitable for a government, business, and engineering office setting. Contract personnel are expected to work with a team or in support of independent actions. Performance shall include good attitude and cooperation with others, while demonstrating willingness to work with others to promote best interests of the U. S. Government. The Contracting Officer reserves the right to determine the acceptability of any clothing worn.

50.9. EMPLOYEE CONDUCT - Contractor employees shall conduct themselves in a proper, efficient, courteous and businesslike manner.

50.10. REMOVAL OF EMPLOYEES - The Contractor shall remove from the site any individual whose continued employment is deemed by the Contracting Officer to be contrary to the public interest or inconsistent with the best interests of National Security.

50.11. PROOF OF LEGAL RESIDENCY - No employee or representative of the Contractor will be admitted to the site of work unless satisfactory Proof of Legal Residency is furnished.

50.12. COMMON ACCESS CARD (CAC) - The Government will furnish common access cards to eligible Contractor "key" and "additional" personnel. The contractor employees must be able to obtain a CAC in accordance with security requirements. The CAC is the property of the U.S. Government. The Contractor shall ensure all employee CAC cards are returned to the Contractor Verification System (CVS) Trusted Agent upon end of contract or termination of an employee. Each employee who received a CAC card is required to take the required Government mandatory training.

50.13. PASSES AND BADGES - All Contractor employees shall obtain the required employee and vehicle passes. The Government will issue badges without charge. The Contractor employees must be able to obtain CAC in accordance with security requirements. Each employee shall wear the Government issued badge over the front of the outer clothing. When an employee leaves the Contractor's service, the employee's Passes and Badges shall be returned within 1 calendar day.

50.14. ACCESS TO BASE/BUILDINGS

50.14.1. The Contractor shall monitor and control access into restricted areas under their responsibility, allowing only those individuals who have been properly cleared into restricted areas or other controlled access areas. The Contractor shall comply with security requirements, plus those imposed by the installation Commander at all times. Personnel with access to special areas will have the appropriate screening and/or security clearance, and personnel requiring routine access to restricted areas will wear special badges authorizing access for those areas. Contractor personnel shall not enter restricted or controlled areas or installation facilities unless specifically authorized in performance of their duties. The Contractor shall secure all buildings and facilities entered during non-duty hours and will secure all building and facilities under the Contractor's cognizance at the end of each work day or shift period.

50.14.2. The contractor will be required to work with NAVFAC Atlantic to complete the onboarding process for the selected candidates, including the receipt of a Common Access Card (CAC) (see below for further details), prior to the start date of the contractor's employees. The contractor shall comply with security requirements imposed by the installation Commander at all times.

50.14.3. Contractor personnel shall meet the requirements of the Homeland Security Presidential Directive 12 (HSPD-12) requirements for a CAC - National Agency Check with Local Agency Check and Credit (NACLC)/Tier 3 Investigation (T3), on file to verify their suitability and to meet eligibility requirements.

50.14.4. If the Contractor personnel currently have a favorably adjudicated NACLC/T3, the Contractor shall notify the Government Command Security Manager, who will validate this in the Joint Personnel Adjudication System (JPAS). The general CAC process for NAVFAC is typically (minor variations are possible depending on location) as follows:

50.14.4.1. SF-86 (NACLC/T3): NOTE: This level of investigation may be required for the contracted positions requiring a Confidential clearance or higher. Should a security clearance for any contracted position be determined to be necessary, the following information would be applicable: For CAC badging to gain access to NAVFAC IT systems and access to classified/sensitive information and/or base and facilities for specified locations, Contractor personnel must come onboard with a completed and closed NACLC/T3 investigation on file. The NACLC/T3 investigation must be favorably adjudicated.

50.14.5. The Contractor shall be granted access to certain government facilities, government and Navy Marine Corps Internet (NMCI) computers, and some limited government data and software applications. CACs will be acquired from a Navy pass office. All IT system policies that apply to Government employees shall also apply to the Contractor (see SAAR-N user agreement for specific IT system policies). The Contractor employee must be able to obtain a CAC through the security processing and DOD JPAS information. It is the Contractor's responsibility to initiate any security investigation processes needed to obtain the CAC and DISS credentials.

50.14.6. Entry to non-restricted access buildings will be granted to Contractor staff. Contracted employees are required to wear site-access badges at all times while on-site. Contractor personnel may require access to Government facilities after hours. After hour access to Government facilities will be on a case-by-case basis, as determined necessary for project delivery. Access shall be requested at a minimum of five (5) business days prior to the needed access. Approval shall be from the COR. Consequently, contracted personnel shall follow procedures established for each project for ensuring the security of the building, equipment, materials and personnel who are working in and around facilities.

50.15. ACCESS ARRANGEMENTS - The Contractor shall make all arrangements through the appropriate office necessary to obtain access to buildings, facilities and other work areas, and when necessary, arrange for them to be opened and closed by the controlling authority. The Government may issue keys to the Contractor. The Contractor shall use due diligence and be responsible for compromised security systems to include replacement costs that result from its action or inaction.

50.16. VEHICLES (if applicable) - The company name shall be displayed on each of the Contractor's vehicles in a manner and size that is clearly visible. All vehicles shall display a valid state license plate that complies with State Vehicle Code. Vehicles shall meet all other requirement of the State Vehicle Code, such as safety standards, and shall carry proof of insurance and state registration, if applicable.

50.17. IDENTIFICATION BADGES AND INSTALLATION ACCESS - Application for and use of badges or one day passes will be as specified herein and as otherwise directed by the Contracting Officer or his/her authorized representative. Obtain access to the installation by participating in the Navy NCACS, or by obtaining passes each day from the Base Pass and Identification Office. Costs for obtaining passes through the NCACS are the responsibility of the Contractor. One-day passes, issued through the Base Pass and Identification Office, will be furnished without charge. Furnish a completed Employment Eligibility Verification (DHS Form I-9) form for all personnel requesting access. This form is available at <http://www.uscis.gov/portal/site/uscis> by searching or selecting Employment Verification (Form I-9). Immediately report instances of lost or stolen badges to the Contracting Officer.

50.18. ONE-DAY PASSES - Participation in the NCACS Program is not mandatory. In lieu of participating in the program, the Contractor may elect to have its personnel obtain daily passes from the installation's pass and decal office in accordance with applicable installation security regulations/procedures. Note that Contractor personnel obtaining installation access via daily passes will be subject to, among other things, daily mandatory vehicle inspection and will have limited access to the installation. The Government will not be responsible for any cost/price or schedule impacts that may result from the Contractor electing to have its personnel obtain one-day passes instead of choosing to participate in the NCACS Program.

51. NCACS PROGRAM

51.1. NCACS is a voluntary program in which Contractor personnel who enroll, and are approved, are subsequently granted access to the installation for a period up to one year, or the length of the contract, whichever is less, and are not required to obtain a new pass from the Base Pass and Identification Office for each visit. The Government performs background screening and credentialing. Throughout the year the Contractor employee must continue to meet background screening standards. Periodic background screenings are conducted to verify continued NCACS participation and installation access privileges. Under the NCACS program, no commercial vehicle inspection is required, other than for Random Anti-Terrorism Measures (RAM) or in the case of an elevation of Force Protection Conditions (FPCON). Information on costs and requirements to participate and enroll in.

- 51.2. NCACS is available at <http://www.rapidgate.com/vendors/how-to-enroll> or by calling 1877-727-4342. Contractors should be aware that the costs incurred to obtain NCACS credentials, or costs related to any means of access to a Navy Installation, are not reimbursable. No equitable adjustment in contract cost/price or schedule shall be allowed on account of the Contractor participating in/utilizing the NCACS Program to obtain installation access. Should the Contractor elect to use the RAPIDGate Program to speed up access to any government facility, procedures are set forth in Attachment J-03, General References, Instructions, and Directives.

52. SECURITY CLEARANCES

- 52.1. The government, NAVFAC Atlantic Security office will process the security investigations (T1/T3) for all required contractor personnel assigned to this contractor prior to their access to government IT systems or Controlled Unclassified information (CUI). The contractor shall work with the NAVFAC Atlantic Security Office to ensure their personnel quickly complete and submit their investigations for processing and a favorable adjudication.
- 52.2. Clearance Level: This contract is for Unclassified / CUI access. If required, additional clearance level requirements will require a contract modification to the base contract and the issuance of a task order with the higher-level requirements. Specific trade support requests submitted on the task order will detail what level of clearance is required for the specific work to be performed. An inability to obtain the required clearance as specified in the task order will be cause for dismissal.
- 52.3. When a clearance at the confidential level or higher is required, the following information must be provided in the base contract modification and at the Task Order Level:
- 52.3.1.1. Clearance Level: At a minimum, all contractor personnel shall be United States citizens and shall possess a Department of Defense Personal Security Clearance at the Confidential level or higher, in accordance with DD Form 254 for performance on this contract. Specific trade support requests submitted on the task order will detail what level of clearance is required for the specific work to be performed. An inability to obtain the required clearance with an NNSY badge color as specified in the Task Order will be cause for dismissal.

53. Badging: Contractor employees shall require an individual identification badge, and will require additional badges i.e., CAC, to gain access to job sites. The contractor shall work with the NAVFAC Atlantic Security Office at 757-322-8116, 8044, 8115 to initiate the CAC badge process.

- 53.1. Lack of proper identification badge(s) shall result in denial of access to the Naval Installation, and/or the ship, resulting in a delay at the Contractor's expense.
- 53.2. Contractor personnel are authorized to retain temporary badges until the badge expiration date or termination of employment. Upon badge expiration date, termination of employment, or completion of contract, the Contractor is required to immediately notify the Contracting Officer's Security Officer and return all badges.
- 53.3. Badges must be displayed on the outermost garment above the waist at all times. The only exception would be while the contractor personnel is engaged in work which could cause a safety hazard if the badge were worn while performing the work.
- 53.4. Lost or misplaced badges shall be reported immediately to the Contracting Officer's Security Officer, or to the Security & Pass Office.
- 53.5. All additional badging or access requirements will be identified on a case-by-case basis via individual task order.

54. ANTICIPATED PERSONNEL NEEDS - These needs are subject to change.

55. **CONTRACTOR SAFETY PROGRAM** - The Contractor shall develop and implement a Safety Program for the contract, detailing how the Contractor plans, staffs, performs, and controls all safety practices while delivering best value services to the Government without any accidents or mishaps. The Contractor's safety program shall comply with all safety standards identified in the U.S. Army Corps of Engineers Safety and Health Requirements Manual, EM-385-1-1 and Public Law 91-596, Occupational Safety and Health Act.
56. **FALL PROTECTION AND PREVENTION PLAN** - When directed by the Contracting Officer, the Contractor shall develop a plan to explain how fall hazards will be eliminated or prevented at the site. The plan will explain how the Contractor will protect and prevent its service workers from falling from heights of 4 feet or more. A competent person and/or Qualified Person for fall protection shall prepare and sign the plan. See EM 385-1-1, ANSI A10.32, ANSI Z359 Fall Protection Code and ANSI/ASSE A10.34.
57. **OSHA CITATIONS AND VIOLATIONS** - If the Contractor causes any violations that result in an OSHA citation, the Contractor shall promptly resolve the issue and provide a copy of each OSHA citation and OSHA report with written OSHA Citations and Violations Corrective Action Report to the Contracting Officer within 48 hours after receiving a citation.
58. **SAFETY INSPECTIONS AND MONITORING** - The Contractor shall be responsible for regularly inspecting its work areas, job sites, and work crews to ensure that all Contractor operations are being conducted safely. These inspections shall ensure:
- 58.1. The site is safe and free of job-site hazards
 - 58.2. Proper PPE is being utilized and worn.
 - 58.3. Safe work practices and processes are being followed.
 - 58.4. Workers are familiar with the hazards covered in the respective AHA for that work activity.
 - 58.5. All equipment and tools are in good condition and being used safely.
 - 58.6. The Government reserves the right to inspect and monitor Contractor operations for safety compliance. In general, the Government approach will be to conduct Performance Assessment on the quality and effectiveness of the Contractor's safety program. The Government reserves the right to stop any work activity that it deems to be unsafe. Contractor personnel shall work in a safe manner and comply with all applicable safety regulations. The Contractor shall be subject to safety inspections of its work sites by the Government. Contractor safety records shall be available to the Contracting Officer upon request.
 - 58.7. Whenever the Contracting Officer becomes aware of any safety noncompliance or any condition which poses a serious or imminent danger or hazard to the health or safety of the public or Government Personnel, the Contracting Officer will notify the Contractor orally, with written confirmation, and request immediate corrective action. This notice, when delivered to the Contractor's representative or SSHO, shall be deemed sufficient notice of noncompliance and that corrective action is required. After receiving this notice, the Contractor shall immediately take corrective action. If the Contractor fails, delays, or refuses to promptly take corrective action, the Contracting Officer may issue a stop work order for all or part of the services or work until satisfactory corrective action has been taken. Whenever such a stop work order has been issued, the Contractor shall waive all equitable adjustments to the contract related to the stop work ordered issued. The Contractor shall include this requirement in all of its subcontracts and vendor contracts in support of contract safety.

59. SAFETY CERTIFICATION - The Contractor shall submit copies of all required Federal, state, county, and city or industry safety related Safety Certifications for work performed under this contract. These certifications shall be kept up to date by the Contractor. The Contractor shall submit new versions of certifications to the Contracting Officer as the old certifications expire. No work, that requires a certification, shall start without a valid and approved certification.

60. SAFETY APPAREL ON JOBSITES - The Contractor personnel shall wear appropriate high-visibility safety apparel (garment, vest, or harness of retro-reflective and fluorescent material) meeting ANSI/ISEA 107-2004 requirements. Appropriate garment shall be based on the worker hazards and tasks, complexity of the work environment or background, and vehicular traffic and speed. As a minimum, the Contractor personnel shall wear ANSI/ISEA 107-2004 Class I compliant apparel.

61. ENVIRONMENTAL PROTECTION - The Contractor shall comply with all applicable Federal, state, and local laws, and with the regulations and standards. All environmental protection matters shall be coordinated with the Contracting Officer. Inspection of any of the facilities operated by the Contractor may be accomplished by the Activity Environmental Protection Coordinator, or authorized officials on a no-notice basis during Government regular working hours. In the event that a regulatory agency assesses a monetary fine against the Government for violations caused by Contractor negligence, the Contractor shall reimburse the Government for the amount of that fine, costs of defending against administrative or other legal action, remedial action, and other costs. The Contractor shall comply with the instructions of the cognizant Navy Medical Department with respect to avoidance of conditions which create a nuisance or which may be hazardous to the health of military or civilian personnel. The Contractor is responsible for ensuring that its employees receive applicable environmental and occupational health and safety training, and is kept up to date on regulatory required specific training for the type of work to be conducted onsite. All on-site Contractor personnel, and their subcontractor personnel, performing tasks that have the potential to cause a significant environmental impact shall be competent on the basis of appropriate education, training or experience.

62. INHERENTLY GOVERNMENTAL FUNCTIONS

62.1. The Contractor and its employees are not allowed to perform any inherently governmental functions. The term “inherently governmental function” is defined by OFPP Policy Letter 11-01 (<http://www.gpo.gov/fdsys/pkg/FR-2011-09-12/html/2011-23165.htm>), and is used when referring to a particular task or function that must be performed by a Government official. An inherently governmental function is one that is so closely related to the public interest as to mandate performance by Federal Government employees.

62.2. Government policy limits contractors to the performance of services related to gathering information on its behalf for the purpose of advising, offering opinions, providing recommendations and/or presenting ideas. These types of services are not inherently governmental because they do not require contractors to establish Government policies, render actionable mission/organizational decisions, or expend taxpayer dollars.

62.3. To illustrate- A contracting officer’s authority to obligate Government funds on a contract represents discretionary decision-making and an outlay of taxpayer dollars. This responsibility and authority belongs to individuals who are employed by the U.S. Government and who execute their duties in accordance with the code of ethics for government service. Conversely, a contractor is primarily motivated to serve the interests of his or her private sector employer, and is presumed to have a lesser obligation or motivation to guard the public trust.

63. CONTRACTOR OBLIGATIONS UNDER THIS CONTRACT

63.1. It is in the best interest of the Government to afford the parties a full and complete understanding of their respective obligations. It is understood and agreed that the Contractor and/or the Contractor's employees or subcontractor shall:

63.1.1. Perform the services specified herein as independent Contractors, not as employees of the Government.

63.1.2. Manage and administer the work required and bear sole responsibility for complying with any and all technical, schedule, or financial requirements or constraints attendant to the performance of this contract.

63.1.3. Be free from supervision or control by any government employee with respect to the manner or method of performance of the services specified; but

63.1.4. Pursuant to the government's right and obligation to inspect, accept, or reject the work, comply with such general direction of the Contracting Officer, or the duly authorized representative of the Contracting Officer as is necessary to ensure accomplishment of the contract objectives.

63.2. It is understood and agreed that the Contractor and/or the Contractor's employees or subcontractor shall not:

63.2.1. Be placed in a position where they are appointed or employed by a Federal Officer, or are under the supervision, direction, or evaluation of a Federal Officer, Military or Civilian.

63.2.2. Be placed in a staff or policy making position.

63.2.3. Be placed in a position of command, supervision, administration, or control over Military or Civilian personnel, or personnel of other contractors, or become a part of the Government organization.

63.2.4. Be used for the purpose of avoiding manpower ceilings or other personnel rules and regulations of DA or the Civil Service Commission.

63.2.5. Be used in administration or supervision of military procurement activities.

64. EMPLOYEE RELATIONSHIPS

64.1. The services to be performed under this contract do not require the contractor or its employees to exercise personal judgment and discretion on behalf of the Government, but rather the Contractor's employees will act and exercise personal judgment and discretion on behalf of the Contractor.

64.2. Rules, regulations, directions, and requirements which are issued by command authorities under their responsibility for good order, administration, and security are applicable to all personnel who enter the installation, or who travel on Government transportation.

64.3. This is not to be construed or interpreted to establish any degree of Government control which is inconsistent with a non-personal services contract.

65. OTHER TERMS AND CONDITIONS

65.1. Individuals assigned as Contractor employees will not serve on Source Selection Boards as a voting member. Contractor employees will not serve as an advisory member to such a board without first receiving approval for the use of advisory and assistance services. In addition, these contractor employees will not be assigned as a Contracting Officer's Authorized Representative.

65.2. If the Contractor fails to meet any of the terms outlined in the PWS, the Contractor shall make adjustments required as necessary to prevent undue interruption of the services defined.
