*** End of Narrative A0000 ***

Solicitation W56HZV-24-R-0035 proposes to award a new five-year, single award, Indefinite Delivery Indefinite Quantity (IDIQ) contract with five priced, one year ordering periods (OP) for Abrams Integrated Logistics Services (AILS) supporting the Abrams Family of Vehicles (FoV).

This requirement is subject to Full and Open Competition. A single contract award is anticipated to the source which represents a best value acquisition using a source selection process. Proposals will be evaluated using a trade-off process to determine which proposal provides the most advantageous proposal. Award will be made to the responsible offer whose proposal represents the best value to the Government. This may not be the offeror with the lowest price. This acquisition will be awarded as all or nothing.

*** END OF NARRATIVE A0001 ***

CONTINUATION SHEET	Reference No. of Document Being Continued W56HZV-24-R-0035 PIIN/SIIN	Page 4 of 50 MOD/AMD
---------------------------	--	---------------------------------------

Name of Offeror or Contractor:

B.1. ORDERING

This contract is an Indefinite Delivery, Indefinite Quantity (IDIQ) as defined by FAR 16.504. In accordance with (IAW) FAR 52.216-18, Ordering, the Government may issue orders pursuant to the following terms and conditions:

B.2. IDIQ ORDERING PERIODS (OP)

OP 1: Date of contract award through 364 days
OP 2: 365 days through 729 days after contract award
OP 3: 730 days through 1,094 days after contract award
OP 4: 1,095 days through 1,459 days after contract award
OP 5: 1,460 days through 1,824 days after contract award

B.3. ORDER PRICING

Order pricing will be based on the OP that the order is issued and not the date of delivery or completion. Orders will be issued utilizing the labor rate schedules listed in Section B. The amounts shown on each order constitute individual cost estimates IAW FAR 52.232-20, Limitation of Cost. See paragraph H.1 for additional ordering provisions.

B.4 IDIQ CONTRACT MINIMUM / MAXIMUM ORDER

IAW FAR 52.216-22 Indefinite Quantity:

B.4.1 Minimum 5-year quantity: 1 Lot for Phase In Period (FFP)
B.4.2 Maximum 5-year quantity: 7,242,735 labor hours
B.4.3 Maximum including 6-month optional extension: 7,967,009 labor hours

B.4.4 The contract Minimum is the contract Phase In. Ordering of this Phase In CLIN will constitute the contract minimum ordering quantity. The contract Maximum is the contract Phase In plus a total of 7,242,735 labor hours, with a 6-month optional extension of 724,274 labor hours.

B.4.5 The Government will provide the contractor at least 30 calendar day notice of its intent to exercise the 6-month option IAW FAR 52.217-8, Option to Extend Services.

B.5 FIXED FEE

B.5.1 The fixed fee, together with the reimbursement of cost shall constitute full and complete consideration for the contractor services in connection with the work required and performed under this contract. The contractor will be paid the total fixed fee for the scope of work IAW Section B.5.2 and B.5.3 below.

B.5.2 COMPLETION TASK ORDER(S) (TO)

B.5.2.1 The contractor shall be paid the total fixed fee stated in Section B opposite the CLIN awarded for the performance of work IAW the contract clause entitled FIXED FEE, FAR 52.216-8. The fixed fee together with the reimbursement of cost shall constitute full and complete consideration for the contractor services in connection with the work required and performed under this contract. IAW FAR 16.306(d)(1), the total fixed fee is payable at the end of performance upon satisfactory delivery of the specified end product within the estimated cost. The total fixed fee payment shall be subject to the withholding provisions.

B.5.2.2 Pursuant to FAR 52.232-20 Limitation of Cost and FAR 16.306(d) Cost-Plus-Fixed-Fee Contracts, in the event the contractor cannot complete the scope within the estimated cost, the Government may require more effort without increase in fixed fee, provided the Government increases the estimated cost.

B.5.3 TERM TASK ORDER(S) (TO)

B.5.3.1 The payable fixed fee amount is directly tied to the actual Term hours expended. Each time the contractor invoices for fee, it shall calculate a cumulative billable fee amount by identifying the amount of hours performed for each labor category multiplied by the proposed composite fixed fee dollar per hour for each respective labor category. Accordingly, the contractor shall only invoice the hourly fixed fee dollar per hour for each hour performed. The fixed fee dollar per hour does not change in the event that the contractors invoiced fully burdened labor rate (less fee) changes. Fixed fee payment(s) shall be subject to the withholding provisions.

B.5.3.2 Fixed Fee CLIN Value. The Fixed Fee indicated on each CPFF CLIN indicates the maximum allowable fee, and the contractor shall perform 100% of the specified Term hours for the stated period of performance in order to be entitled to that full amount. Facilities Capital Cost of Money (FCCM) is not factored into fee calculations.

B.5.3.3 Fixed Fee Example. The below examples include generic scenarios to illustrate the authorized fixed fee calculations. These scenarios do not pertain to the actual costs or labor requirements of this contract and are for demonstration purposes only.

Name of Offeror or Contractor:

Scenario 1: 100% of Hours Performed

Position 1: The Proposed FBLR (less fee) was \$50.00, but the Actual FBLR (less fee) is \$50.75. The required hours on the TO were 1920, and the Actual Hours Performed are 1920. The Proposed Composite Fixed Fee is \$2.50. The Invoiced Labor would equal \$97,440.00 (\$50.75 * 1920) or (Actual FBLR * Actual Hours Performed). The Invoiced Fee would equal \$4,800.00 (\$2.50 * 1920) or (Proposed Composite Fixed Fee \$ Per Hour * Actual Hours). The invoice total would be \$102,240.

Scenario 2: 95% of Hours Performed

Position 1: The Proposed FBLR (less fee) was \$50.00, but the Actual FBLR (less fee) is \$50.75. The required hours on the TO were 1920, but the Actual Hours Performed are 1824. The Proposed Composite Fixed Fee is \$2.50. The Invoiced Labor would equal \$92,568.00 (\$50.75 * 1824) or (Actual FBLR * Actual Hours Performed). The Invoiced Fee would equal \$4,560.00 (\$2.50 * 1824) or (Proposed Composite Fixed Fee \$ Per Hour * Actual Hours). The invoice total would be \$97,128.

Note: Fixed fee is a dollar amount per hour based on the proposed composite fee percentage applied to the initial proposed FBLRs. The fixed fee amount per hour is fixed and does not fluctuate with actual costs (i.e. fixed fee is NOT the proposed fee percentage applied to actual costs). Fixed fee is the proposed dollar amount per hour multiplied by the actual hours performed as shown in the scenarios above.

B.5.3.4 The payable fixed fee amount on each invoice is based upon the fixed fee dollar amounts per hour(s) multiplied by the actual hours worked for the associated labor categories, while satisfactorily completing the specified Term hours for the stated period of performance. In the event the Government wants to increase the specified Term hours, the additional hours are subject to more estimated cost and fixed fee. The contractor is not authorized to incur effort in excess of the specified Term hours. Any costs incurred for excess effort are unallowable.

B.5.3.5 Pursuant to FAR 52.232-20 Limitation of Cost , in the event the contractor cannot perform Term hour(s) within the estimated cost set forth in the CLIN, the Government may increase the estimated cost of the hour(s) but will not increase the fixed fee for the hour(s).

- C.12 Special Tools and Support Equipment
- C.13 Supply Support
- C.14 Outside Continental United States (OCONUS) Support
- C.15 Security Requirements

C.1 Management and Administration

The contractor shall provide Integrated Logistics Fielding Support Services for the Abrams Family of Vehicles, Joint Assault Bridge (JAB), Assault Breacher Vehicle (ABV) and Foreign Military Sales (FMS) countries. The contractor shall manage and ensure timely achievement of all contract requirements in a manner that is both the most economical and beneficial to the Government. The contractor shall receive, respond to, and track Government requests for information, requests for proposals, and investigation and analysis, as specified further in Section C of this contract. All work performed under this contract shall be accomplished under and controlled by Task Orders (TOs) awarded and put on contract by the Contracting Officer. The contractor shall perform no effort unless authorized by a TO.

C.1.1. Scope

This Statement of Work (SOW) describes contractor-required services related to maintenance, repair and overhaul, equipment modification, installation of equipment and technical representative services to keep machines, systems, and vehicles functioning and in working order. Services that shall be provided to Active U.S. Army and National Guard units as well as for FMS customers under this contract include Materiel Fielding and De-processing, Field Service Representative, Maintenance Teams, Modification Work Order (MWO), Total Package Fielding (TPF) and New Equipment training (NET) in support of the Abrams, JAB and ABV programs. These services shall be provided at sites located in both Continental United States (CONUS) and Outside Continental United States (OCONUS) locations. The contractors responsibilities shall include maintaining control of subcontractor efforts to ensure Government requirements are met. As used herein, the phrase contractor personnel includes both prime and subcontractor personnel and the contractor shall ensure that these requirements are included in all subcontracts.

C.1.2 General Requirements

C.1.2.1 Work Authorization

All work awarded hereunder shall be performed to the extent authorized and individually funded under a TO(s) put on contract by the Contracting Officer.

C.1.2.2 Limitations

Contractor personnel shall not perform inherently Governmental services under this contract, nor shall any work described herein be considered inherently Governmental services.

C.1.2.3 Contractor Personnel

Contractor personnel providing services hereunder are employees of the contractor and subcontractor(s) and are under its sole administrative control and supervision. Accordingly, the contractor shall select, assign, and provide direction to its employees performing services under all TOs awarded hereunder. The Government will not exercise any supervision or control over the contractor's employees in their performance of services. If the Government determines the schedule contractor employees are required to work changes from initial planning, contractor shall identify any change to the Contracting Officers Representative (COR) within 2 business days to address impacts to include changes in hours, cost and material. The contractor is not authorized to execute any changes in schedule without COR approval prior to execution.

C.1.2.3.1 Replacement Personnel

In the event a contractor employee is deemed not capable of supporting the effort or incurs disciplinary action while supporting an effort, the contractor or subcontractor shall remove that person from the support location and replace them at the earliest possible time. Upon learning that a contractor employee needs to leave the location, contractor shall notify the Contracting Officer and COR, in writing, within 48 hours. Notification shall include a summary of the reason why the employee is leaving the support location as well as

CONTINUATION SHEET	Reference No. of Document Being Continued W56HZV-24-R-0035 PIIN/SIIN MOD/AMD	Page 7 of 50
----------------------------------	---	----------------------------

Name of Offeror or Contractor:

the time when a replacement will be on site to continue support. At the time of this written notification, the Government will make a determination, within 5 business days, if replacement is still required to meet the mission. This determination will be provided to the contractor by the Contracting Officer and COR.

C.1.2.4 Contractor Personnel Qualifications

The contractor shall utilize employees IAW the minimum qualifications called out in Section H and as specified at the TO level. All contractor personnel assigned to perform work hereunder shall meet the minimum qualifications specified in the TO; to include the proper licenses and ability to operate required machinery or equipment in fulfillment of the mission. If there are concerns regarding the qualifications of a contractor employee, final determination will be made by the Government.

C.1.2.5 Period of Performance

Each individual TO awarded hereunder will specify a period of performance or schedule. TOs may be in support of missions during peace time, contingency operations, and war. TOs may be on a full-time, part-time, or project-related basis.

C.1.2.6 Performance Locations

Services performed under this contract may be performed at either an on-site or off-site location. On-site locations may be any U.S. Government base or installation or other contractor facility within the CONUS or OCONUS. Off-site locations may be a contractor's home office, branch office, or any facility/location utilized by the contractor which is not under the control of a Government agency. Each individual TO awarded hereunder will specify the specific location(s) for the performance of the service(s).

C.1.2.7 Travel

Individual TOs awarded hereunder may require travel of contractor personnel, within CONUS or OCONUS, IAW with FAR 31.205-46. Contractor shall provide support at various CONUS and OCONUS locations, to include USEUCOM, USAFRICOM, USCENTCOM, USINDOPACOM, USNORTHCOM, USSOUTHCOM. Specific locations will be called out in a TO.

Travel shall be required to provide support at locations IAW the schedules and manning levels established by the Government or FMS IAW a TO. The contractor is responsible for making all necessary travel arrangements. The Government or FMS shall be notified of early departure or late arrival of personnel assigned to the contractor team on a mission. The contractor shall be authorized to perform all travel related activities, to include airfare, hotel, rental car reservations, documentation (IAW C.1.2.8.1), prior to the effort being conducted. Those activities shall be authorized to be performed under a TO for Program Management.

C.1.2.8 Deploying Personnel

Individual TOs awarded hereunder may require deployment of contractor personnel to OCONUS locations. TOs requiring deployment will include pertinent details and requirements for contractors to deploy. Deployable personnel shall meet the requirements specified in Army Regulation (AR) 715-9.

The contractor shall document all contractor personnel acknowledgement prior to deployment.

Depending on the Status of Forces Agreement (SOFA) or other international agreements, all contractor employees may be subject to the customs, processing procedures, laws, agreements and duties of the country in which they are deploying to and the procedures, laws and duties of the United States upon re-entry. The contractor shall verify and comply with all requirements.

The contractor is responsible for documenting technical expert status of their employees for performance in Germany. The contractor shall work with the COR to provide information required by the German Government to secure technical expert status as required.

The contractor is responsible and authorized for obtaining (i) all passports, visas, and other documents necessary for contractor personnel to transverse through and within the Area of Operation and (ii) the customs, immigration, or similar liabilities of its contractor personnel. Upon arrival in the host country, the contractor personnel may be required to obtain locally required identification cards.

C.1.2.8.1 Documentation of Deploying Personnel

In support of OCONUS deployment of contractor personnel, the contractor shall identify to the Government all documentation requirements needed NLT 90 calendar days prior to deployment. If the contractor receives notification less than 90 calendar days prior to an OCONUS effort begin date, they shall identify documentation requirements to the COR within 3 business days. Contractor shall be responsible for completing the documentation required for deployment; the contractor shall timely request assistance from the Government when required. If information is required to be provided to the COR or Government, contractor shall provide that information completely and in a timely fashion.

C.1.2.9 Contracting Officer's Representative (COR)

Individual TOs awarded hereunder will have a Contracting Officer appointed COR IAW DFARS 201.602-2(2). The contractor shall direct communications on TO technical matters to the appointed COR.

C.1.2.10 Contractor Management Focal Point

The contractor shall establish a single management focal point and maintain a supporting program management system tailored to accomplish the administrative, management, security, quality control, technical, and financial requirements associated with individual

---------------------------	--	---------------------------------------

Name of Offeror or Contractor:

T0s awarded hereunder. These efforts shall be done IAW a Program Management T0 awarded under this contract.

C.1.2.11 Quality Assurance Surveillance Plan (QASP)

A QASP will be issued in support of this contract that will contain the performance metrics the Government will use to evaluate and ensure the quality of service(s) provided is acceptable. The QASP will be in effect for the duration of the contract.

C.1.2.12 Quality Assurance Program

The contractor shall establish and maintain a quality assurance program governing performance of all T0s awarded hereunder for identifying and correcting deficiencies in the quality of services. The contractor shall ensure that it has an auditable quality assurance process commensurate with the scope and content of the requirements of each T0. The contractor shall be required to establish a certified quality management system (ISO 9000 or ISO 9001) to the extent the system applies.

C.1.2.13 Non-Disclosure Agreements (NDA)

An NDA for contractor employees may be required at the T0 level, if required this would be coordinated with the Government.

C.1.2.14 Contractor Field Support Status

The contractor shall submit CDRL A011 Contractor Field Services (CFS) Support Status Report, a description of contractor activities that have occurred within the reporting period.

C.1.3 Deliverables

The contractor shall submit deliverables IAW the awarded contract hereunder. The schedule and format required for those deliverables shall be called out in associated CDRLs.

C.1.4 Applicable Documents

Performance may be required IAW any of the documents listed in this section. The specific sections of the applicable document will be specified in the individual T0. The contractor shall be responsible to adhere to the most recent version of the regulations, standards, handbooks, specifications, and other Government publications unless otherwise specified in the individual T0. This is not an exhaustive list and other documents may be required as specified in the individual T0s.

C.1.4.1 Specification, Standards and Handbooks:

- 1) 49 CFR HAZMAT Transportation Regulations
- 2) AFMAN 24-204 Preparing Hazardous Materials for Military Air Shipments
- 3) AMC-P-715-18 Contracts and Contractors Supporting Military Operations

C.1.5. Phase in Objectives

Phase in maximum period is anticipated to be completed in 6 months.

C.1.5.1. The contractor shall have a management process established to oversee employee duties, expectations and scope as stated herein which must be in place and briefed to Government within 30 days of contract award. The contractor shall be prepared to discuss at the phase in plan at the start of work meeting details in C.2.1.1.

C.1.5.2 The contractor shall have a sufficient number of personnel to begin contract performance, CAC certified within 90 days of contract award in order to access Government bases and Government inventory/fielding/NET to successfully perform the contract.

C.1.5.3 By the end of the Phase in period the following instructor certifications shall be accomplished.

a. Operator New Equipment Training (OPNET) Requirements during Phase in Period. OPNET Instructors must be certified on the Abrams FoV platforms.

b. Field Maintenance New Equipment Training (FMNET) Requirements during Phase in Period. Instructors shall be certified on the Abrams FoV platforms.

C.1.5.4 The contractor shall have 100% of required FSR personnel capable to beginning performance at the necessary unit locations immediately upon completion of Phase in Period.

C.1.5.5 The contractor shall meet requirements to obtain commercial driver's license (CDL) as required to support mission essential needs/schedules immediately upon completion of Phase in Period.

C.1.5.6 The contractor shall have required IT/Communication equipment and be trained on required databases for supply immediately upon completion of Phase in Period.

C.1.5.7 The contractor shall have personnel for the Supply Support operations trained to inventory and issue material and equipment immediately upon completion of Phase in Period.

C.1.5.8 The contractor shall have a trained/certified environmental POC in place immediately upon completion of the Phase in Period.

C.2 Reviews and Meetings

The contractor shall conduct, participate in and schedule meetings, reviews, Integrated Product Team (IPTs) boards, conferences, and groups as listed below and host them at the contractors facility, an offsite facility, or via an approved virtual meeting software as approved by the Government. The contractors or offsite facility shall have adequate space to accommodate personnel up to a quantity of 20 people (inclusive of 10 Government). For any meeting that will require space for a larger audience, the contractor shall work with the Government on securing approval for an alternate site if contractor cannot accommodate the larger audience.

C.2.1 Meetings

C.2.1.1 Start of Work Meeting

Within 30 business days of the base contract award, the contractor shall host a start of work meeting with Government and contractor personnel. Presentation Materials shall be provided IAW CDRL A001, Presentation Materials no Later Than (NLT) 3 business days prior to the meeting. At the start of work meeting, the Government will brief the overall program structure, requirements, deliverables, schedule, and any other pertinent information for the management of the program. The contractor shall brief their organizational structure, performance requirements, their ability to meet the requirements along with any potential issues foreseen, and any other topics as requested by the Government.

CONTINUATION SHEET	Reference No. of Document Being Continued W56HZV-24-R-0035 PIIN/SIIN	Page 11 of 50 MOD/AMD
---------------------------	--	--

Name of Offeror or Contractor:

After the start of work meeting has been conducted, future discussions shall take place at meetings, as required, listed in Section C.2.1.2. At each meeting and review the contractor shall be prepared to discuss or present cost, schedule, performance risks, risks mitigation, issues, and resolution strategies.

C.2.1.2 Other Meetings

The contractor shall conduct or participate in reviews to the Government as specified in the list below. In addition, the contractor shall provide the COR with notice no less than 5 business days prior to review meetings scheduled with subcontractors so that Government representatives can attend at their discretion. The requirements of the contractor and frequency for these meetings shall be called out in TOs.

- a) MWO IPT
- b) Government Fielding Branch
- c) Integrated Logistics Field Support Services Status Reviews
- d) COR Field Support Services Review
- e) Program Management Reviews (PMR)
- f) Field Problem Review Board (FPRB)
- g) System Safety Working Group (SSWG)
- h) Ad Hoc Meetings
- i) Fielding Synchronization

If required, the contractor shall prepare, and issue meeting invites in electronic form compatible with Government Microsoft Outlook Calendar Appointment or any other authorized Government format. To the extent possible, the contractor shall attend the meetings in person with appropriate personnel to present or answer questions as required. If its not possible to attend in person, the contractor shall ensure the appropriate personnel are available to attend the meetings virtually.

C.2.1.2.1 MWO IPT

Contractor shall attend, on a bi-weekly basis, an MWO IPT meeting to be led by the Government. Contractor shall participate in discussions relating to specific MWO efforts, schedule, personnel, shipping and inventory assistance, and any known issues with any of the MWO missions covered under a TO.

C.2.1.2.2 Government Fielding Branch

Contractor shall attend the Government led Fielding Branch meeting held on a weekly basis. Contractor shall be prepared to discuss all aspects of their Integrated Logistics Field Support Services efforts currently under a TO and answer questions as required. If required, contractor shall prepare briefing materials IAW CDRL A001, Presentation Materials.

C.2.1.2.3 Integrated Logistics Field Support Services Status Review

The contractor shall support status review meetings on a bi-weekly basis and be prepared to discuss any ongoing efforts and provide status on existing TOs with any issues that require administrative changes. Contractor shall be prepared to discuss all facets of the Sustainment Services program at these meetings to include cost, schedule and performance.

C.2.1.2.4 COR Field Support Services Review

The contractor shall conduct, on a quarterly basis, Field Support Services reviews of all efforts under the TOs. Briefings shall contain, by TO, efforts previously performed; upcoming efforts; any known issues or problems; description of hours authorized, hours expended, material dollars expended, and material dollars committed; and any variances from planned efforts and reasons for the variances. Following each meeting, contractor shall provide meeting minutes IAW CDRL A002, Record of Meeting Minutes Report, Meeting Minutes and Action Items.

C.2.1.2.5 Abrams PMR

Contractor shall attend in person, or virtually if unable to have representation in person, the Abrams PMR held on an annual basis. Contractor shall ensure they have proper representation at the PMR to engage in discussions regarding the Abrams program, to cover both US Army and FMS customers, and provide comments and answers, should there be any, regarding their Field Support Services efforts in support of the Abrams program. The contractor shall provide cost, schedule, performance, and risk status to support the annual PMR and be prepared for detailed discussion with the Government IAW CDRL A001, Presentation Materials.

C.2.1.2.5.1 ILS PMR

The contractor shall host and prepare materials to support an ILS PMR on a semi-annual basis. Contractor shall present cost, schedule, performance, and any risks for each active TO performed under this contract and be prepared for detailed discussion with the Government. Contractor shall prepare briefing materials IAW CDRL A001, Presentation Material.

C.2.1.2.6 FPRB

The contractor shall participate in the Government hosted bi-annual discussions regarding field problems identified during performance of the contract with a wide range of participants from working-group level personnel to leadership. The contractor shall be prepared to propose resolutions and risks with risk mitigation(s) at each FPRB meeting and be prepared to engage in discussions.

C.2.1.2.7 SSWG

CONTINUATION SHEET	Reference No. of Document Being Continued W56HZV-24-R-0035 PIIN/SIIN MOD/AMD	Page 12 of 50
---------------------------	---	----------------------

Name of Offeror or Contractor:

The contractor shall participate in the Government hosted bi-annual discussions regarding safety issues with a wide range of participants from working-group level personnel to leadership. The contractor shall identify potential risks, propose resolutions and mitigation plans at each meeting as necessary.

C.2.1.2.8 Ad Hoc Meetings

As required, contractor shall attend, virtually or in person, ad hoc meetings required to manage the various efforts performed under this contract. Government will provide notice of meetings to extent possible. For ad hoc meetings, contractor shall support discussion of the issues and take any actions out of the meetings delegated to them. These meetings will be required to facilitate the management of the Field Support Services efforts as they operate in a changing environment.

C.2.1.2.9 Fielding Synchronization

The contractor shall discuss analysis, schedules, milestones, accomplishments, future planning, corrective action planning, risks, risk mitigation strategies and issues regarding worldwide fielding synchronizations. These meeting will be attended by the contractor and Government fielding teams worldwide. These meeting will be chaired by the Chief, Materiel Fielding Team. The contractor shall make no changes to fielding schedule(s) or change the make-up of any TPF package without approval of the Chief Materiel Fielding Team.

C.2.2 Meeting Attendance

Any contractor employee attending meetings with Government employees within or outside the Detroit Arsenal boundaries, shall, at the beginning of the meeting, announce that they are a contractor employee. Employee must state the contractor's name and state the name of all other companies or persons that (a) currently employ them, or (b) that they currently represent.

C.2.3 Agendas and Briefing Materials

The contractor shall submit an agenda and briefing materials IAW CDRL A001, Presentation Materials no later than two (2) business days prior to meetings and reviews identified in Section C.2.1.2, unless specified otherwise in a TO.

C.2.3.1 Briefing Materials

The contractor shall prepare and furnish photograph productions, posters, brochures, viewgraph transparencies, Microsoft PowerPoint briefing slides, and electronic media for briefings and presentations IAW CDRL A001, Presentation Materials for all meetings, reviews and conferences listed in C.2.1.2. The briefing material shall contain current status of effort, cost, schedule, performance, and any identified or known risks.

C.2.3.2 Audio and Network Accessibility for Briefings

The contractor shall provide audio and network meeting capabilities in a Government compatible format when the meeting location is not at a Government facility for all meetings listed in C.2.1.2.

C.2.3.3 Meeting Minutes

The contractor shall prepare and deliver meeting minutes and action items IAW CDRL A002, Record of Meeting Minutes Report, Meeting Minutes and Action Items for all meetings, reviews, or conferences outlined in C.2.1.2.

C.2.3.4 Cost and Performance Report (CPR)

The contractor shall prepare and submit a CPR with all supporting data to evaluate applied hours and cost IAW CDRL A003, Services Performance & Cost Report (PCR). The CPR shall provide monthly and cumulative-to-date Budget, Performance, and Expenditure data by TO number. The CPR shall separately list costs incurred as a result of hours worked, materials purchased or placed on order and Other Direct Costs (ODCs) (i.e. travel costs, per diem, etc.). All costs shall be reported by the month the costs were actually incurred (if costs are reported in the subsequent month, the CPR shall document which costs are associated with which month). The CPR shall include the Period of Performance (PoP) for each TO. The contractor shall notify the Government via email or letter to the Contracting Officer upon hitting the 75% expenditure threshold IAW FAR 52.232-20, Limitation of Cost per TO.

C.2.4 Rough Order Magnitude (ROMs)

ROMs may be requested for completion efforts in support of FSR, MWO, Fielding and De-processing, NET, TPF, and Vehicle Maintenance. ROMs shall be submitted IAW CDRL A004, Manhour Estimate, Technical Cost Proposals, ROM Estimates.

C.3 Contract Data Requirements List (CDRL)

The contractor shall deliver data IAW the Department of Defense (DD) Form 1423, CDRLs, as set forth in Section J and as called out in the SOW. The days specified in the CDRL are calculated as calendar days unless otherwise specified in a specific CDRL or TO. If a CDRL delivery date falls on a non-working day, the contractor shall deliver the CDRL on the next business day. All data specified in this contract shall be provided using the Government CDRL Delivery Tool, accessible at <https://gcscdrl.army.mil/>, unless otherwise specified in the CDRLs. Personnel shall be required to have an Identity, Credential, and Access Management (ICAM) account in order to be provided access to the CDRL Delivery Tool. CDRL Delivery Tool user instructions and training will be provided at the Start of Work Meeting. The contractor shall deliver CDRLs without encryption, locks, passwords, or other security protection features which prevent the Government from editing, sorting, merging, or otherwise manipulating the data for Government purposes.

C.4 Contractor Cost Data Reporting

C.4.1 Cost and Software Data Reporting (CSDR)

CONTINUATION SHEET	Reference No. of Document Being Continued W56HZV-24-R-0035 PIIN/SIIN	Page 13 of 50 MOD/AMD
---------------------------	--	--

Name of Offeror or Contractor:

Cost and Software Data are the primary means by which the Department of Defense (DoD) collects data on the costs that contractors incur on DoD programs. Reliable and comprehensive cost data is essential to produce credible cost estimates as required in both statute and regulation. The Governments goals and use of CSDR data is to improve the quality of cost estimates; ensure proper resource allocation occurs within the DoD; and enable data driven decision making by program and department leadership.

The contractor shall systematically collect and report actual contract costs IAW the following CDRLs:

Report Title	CDRL
Resource Distribution Table (RDT)	A005
Cost and Hour Report (FlexFile)	A006
Contractor Business Data Report (DD Form 1921-3)	A007
Maintenance and Repair Parts Data Report	A008

C.4.1.1 Application to Subcontractors

The contractor shall flow-down CSDR requirements referenced in sections C.4.1 and its sub-paragraphs to subcontractors (regardless of subcontractor tier) when the subcontract value is expected to exceed \$50 million using the maximum allowable contract quantities, hours, or options (as applicable), as required by DoD 5000.04-M-1 - CSDR Manual. The contractor shall require subcontractors to electronically submit CSDR deliverables directly to the Defense Cost and Resource Center (DCARC). The contractor shall ensure that Subcontractors subject to CSDR reporting thresholds collect data in sufficient detail to meet Attachment 0001 - CSDR Plan. The contractor shall collect and deliver data on all subcontractors to comply with CDRL A005 - Resource Distribution Table (RDT) and Attachment 0001 - CSDR Plan. A subcontractor is any organization which the prime contractor has any agreement, purchase order, or instrument other than a prime contract calling for work or for the material required for the performance of one or more prime contracts. It covers procurement of major components or subsystems that require the subcontractor to do extensive design, development, engineering, and testing to meet a prime contractors procurement specifications.

C.4.1.2 RDT

The contractor shall prepare and submit CDRL A005, Resource Distribution Table. This document is meant to identify the value of work assigned to the contractor and its subcontractors.

C.4.1.3 Cost and Hour Report (FlexFile)

The contractor shall prepare and submit the Cost and Hour Report (FlexFile) IAW CDRL A006. This document is meant to report actual costs and hours related business data incurred in order to perform this contract.

The contractor shall develop and maintain a Contractor Work Breakdown Structure (CWBS) and CWBS Dictionary IAW CDRL A006, Cost and Hour Report (FlexFile), throughout the life of the contract. The contractor shall use the CWBS as the primary framework for contract planning, budgeting, and reporting of the cost, schedule, and technical performance status to the Government. The contractor shall extend the CWBS to provide adequate internal management, surveillance, and performance measurement of the contract. For any given parent WBS element, additional child WBS may be utilized to collect other costs, however, the Other WBS shall not contain more than 10% of the total anticipated cost of the parent WBS element. The contractor shall ensure all CWBS oriented reporting is compliant with at least the lowest WBS levels identified by Attachment 0001 - CSDR Plan.

C.4.1.4 Maintenance and Repair Parts Data Report

The contractor shall prepare and submit the Maintenance and Repair Parts Data Report IAW CDRL A008, Maintenance and Repair Parts Data Report

C.4.2 Post-Award Cost and Software Data Reporting Conference

Within 30 calendar days of completing the Start of Work Meeting or CSDR Readiness Review, whichever is later, the Government will inform the contractor of the exact date and location of the Post-Award CSDR Conference. This conference has an anticipated duration of one business day. The contractor shall host the Post-Award CSDR Conference at the contractors facility where CSDRs are prepared with the Governments Cost Working Group Integrated Product Team (CWIPT) IAW DFARS 242.503-2(b) and DoD 5000.04-M-1 (CSDR Manual). The purpose of the Post-Award CSDR conference is to review the contracts CSDR requirements and assess how the contractors accounting system satisfies the CSDR requirements found in DoD 5000.04-M-1, CSDR Manual and Attachment 0001 - CSDR Plan. In a briefing presented by the contractor in its own format, the contractor shall:

- Demonstrate how it collects cost data in its accounting system and how that data will be utilized to provide actual cost transactions and minimize cost allocations when preparing CSDR data deliverables.
- Describe how recurring vs non-recurring costs are segregated in its accounting system and for the purpose of CSDR reporting.
- Demonstrate how the data from its accounting system will be mapped into the CSDR reports required by Attachment 0001 - CSDR Plan.
- Present the methodologies used for mapping internal cost accounts to the CWBS, specifically showing how individual CWBS elements and functional element codes will be populated.
- Propose changes to Attachment 0001- CSDR Plan in order to tailor the plan to the contractors accounting system, to include any contractor recommended changes or additions to the CWBS elements in Attachment 0001 - CSDR Plan. These changes may include adjustments to the contractors submission events and/or submission timeline, particularly in the case of a direct-reporting subcontractor performing against a different delivery schedule than the associated prime contractor.

The contractor and CWIPT will also review the initial submission for CDRL A005, Resource Distribution Table in order to finalize which

CONTINUATION SHEET	Reference No. of Document Being Continued W56HZV-24-R-0035 PIIN/SIIN MOD/AMD	Page 14 of 50
--	---	---

Name of Offeror or Contractor:

subcontractors will be required to provide CSDR reporting and electronic submission of deliverables directly to the DCARC and which subcontractors may qualify for a CSDR direct reporting subcontractor waiver IAW CDRL A005, Resource Distribution Table and Attachment 0001 - CSDR Plan.

C.4.3 Contractor Business Data Report (CBDR)

The contractor shall prepare and submit CDRL A007, Contractor Business Data Report (DD Form 1921-3), to provide the means to facilitate estimating and analysis of indirect contract costs, as specified in Attachment 0001 - CSDR Plan.

C.5 Government Furnished Property (GFP)

GFP will be provided by the Government on a by-mission basis IAW Attachment 0002. If GFP is provided, the contractor shall be responsible for maintaining a GFP list as specified in a TO IAW CDRL A009 Equipment and Material Inventory Report. If additional GFP is required, the contractor shall submit requests to the COR for it to be added to the contract as an Attachment. Contractor shall have access to that GFP for the duration of the mission. Contractor shall be responsible for its own Personal Protective Equipment (PPE) and general maintenance tools required to perform the scope.

C.6 Analysis of Field Problems

The contractor shall maintain a continuing program for field analysis on the vehicle system and component problems based upon inputs obtained by field support or Government data sources. This activity shall include all disciplines required to perform analysis of field problems.

C.6.1 Test Incident Reports (TIR) and Associated Documentation Evaluation

During the performance of their efforts, the contractor shall provide input to Equipment Improvement Recommendations (EIRs) and Recommended Changes to Publications (DA Form 2028) as required when noticed in the field as work is performed and changes are needed.

C.7 Field Service Representatives (FSR)

FSRs shall provide technical advice and assistance to vehicle users and maintainers, and the FSRs may perform hands-on maintenance for the purpose of providing instruction and advice to both Soldier and civilian maintainers. In providing this support, the FSR may reference Interactive Electronic Technical Manuals (IETM), original equipment manufacturer (OEM) procedures, or best commercial practices. FSRs shall also be capable of providing on the job training as part of their duties.

The contractor shall provide all administrative support and site supervision for the FSR as described herein. The contractor shall provide all the personnel, equipment, tools, expendable materials, and supervision necessary to maintain all vehicle operations. With respect to vehicles supported under this contract, the FSRs shall provide instruction and assistance for technical repairs and make recommendations to orient and instruct key Government personnel with respect to operations, maintenance, repair, and parts supply. During support for any unit, either CONUS or OCONUS, the FSR shall report problems and trends IAW CDRL A010 Field Problem Reports and Fire, Injury, Accident Reports attendant to their responsibilities to PM Abrams. The FSRs shall be located at field sites as called out in a TO to meet the requirements of the contract in a manner that is both economical and beneficial to the Government. The FSRs shall be experienced, qualified, and certified IAW C.7.1 to perform the functions laid out in this contract. The contractor shall provide FSRs to CONUS and OCONUS locations for fielding and sustainment activities as required by individual TOs. The FSRs shall perform and assist with vehicle retrofit upgrades and kit installation at various locations.

The contractor shall provide FSRs as Subject Matter Experts (SME)s for the requirements set forth within the TOs.

During the performance of their duties the FSRs shall recommend the need for Failure Analysis (FA).

The FSRs work schedule shall coincide with that of the associated Government personnel they are supporting.

The contractor shall also provide FSRs for de-processing, sustainment maintenance, and stay behind maintenance to include Leave Behind Equipment (LBE) and RESET programs as required in individual TOs.

C.7.1 FSR Certification

The contractor shall, in conjunction with the Government, develop a FSR certification test that will be reviewed and approved by PM Abrams Fielding Branch management. The FSR certification test shall be developed and approved by the PM Abrams Fielding Branch management within 30 days of contract award, and the contractor shall begin administering the test within 45 days of contract award. The contractor shall, in conjunction with the Government, update the FSR certification test bi-annually.

The passing of the test shall be a requirement to become an FSR and the FSR shall pass the test with a 90% score to be certified. The test will be administered biannually, within 60 days from the date of the last passed test, to retain FSR status. Test results shall be submitted IAW CDRL A025 Abrams FSR Certification.

C.8 Vehicle Maintenance

Contractor mechanic personnel shall assist Government personnel with vehicle maintenance of tracked combat vehicles (tank). The contractor mechanic shall assist with analyzing malfunctions; rebuilding and maintaining power equipment; operating and inspecting

CONTINUATION SHEET	Reference No. of Document Being Continued W56HZV-24-R-0035 PIIN/SIIN MOD/AMD	Page 15 of 50
---------------------------	---	----------------------

Name of Offeror or Contractor:

machines or equipment to diagnose defects; dismantling and reassembling equipment; using hoists, cranes, and hand tools; examining parts for damage or excessive wear; using micrometers and gauges; replacing defective engines and subassemblies such as transmissions; and testing overhauled equipment to insure operating efficiency. The contractor mechanic may recommend to Government personnel methods of maintenance of parts and equipment, such as methods used in cleaning parts along with assembly and disassembly of equipment. Contractor mechanics shall be capable of repairing cables using the Daniels repair kit. Contractor mechanics shall have knowledge of the care and use of hand tools as per TM 9-243.

C.8.1 Maintenance teams

The contractor shall provide maintenance teams and work with Government and FMS customers as required in individual TOs as those customers conduct their field and operator level maintenance, to include scheduled, unscheduled, and sustainment maintenance along with diagnostic tests for hull and turret items, in support of Abrams missions at CONUS and OCONUS locations.

The contractor maintenance teams will be provided space and resources by the requesting Government/FMS customer to accomplish the required tasks detailed in the TO. If there are facilities or tools/equipment not provided by the Government or FMS customer, the contractor shall notify the COR within 48 hours of discovery with a detailed listing of items and/or facilities it requires to perform the TO, including the specific costs of tools/equipment it may purchase. The contractor shall not purchase any tools/equipment without COR approval.

The contractor shall ensure they have adequate number of personnel licensed to operate the tanks and materiel handling equipment. The contractor shall ensure they have adequate number of personnel trained on Hazardous Material (HAZMAT), fuel handling, and environmental restrictions and regulations to maintain operations at multiple locations concurrently.

C.9 Modification Work Orders (MWO)

The contractor shall perform Modifications to the Abrams FoV IAW AR 750-10 1-6, AR 770-2 and DA PAM 770-2. Contractor MWO personnel shall be skilled at pre-installation inspection of vehicles, utilizing a Government provided inspection checklist developed from current US Army Technical Manuals (TMs) covering the Abrams Main Battle Tank systems and sub systems, to determine whether or not they are capable of receiving proposed MWOs. If vehicle(s) do not meet the induction checklist criteria, they will be returned to the unit to perform corrective action before resubmitting. The knowledge will require the contractor MWO personnel to have a strong maintenance background on the system along with ability to diagnose faults, install and troubleshoot software/firmware updates, knowledge of Item Unique Identification (IUID) policies and practices IAW AR 700-145 and provide feedback to soldiers and civilians on proposed fixes prior to installation of the MWOs.

C.9.1 MWO Process

The contractor shall follow the MWO process as put forth in AR 750-10. The contractor shall attend and participate in meetings which will discuss the plan to procure and install the required vehicle modification kits for each MWO IAW C.2.1.2. As required, the contractor shall support Government led MWO verifications as SMEs providing insight from a field application perspective. This may occur during Technical Publication events scheduled throughout the year to verify various MWO installations with instructions of new technologies prior to document authentication.

C.9.1.1 MWO Classifications

Modifications will be classified as emergency, urgent, or routine IAW AR 750-10 Section 3-6 based on the modification to be applied, or deficiency to be corrected. The contractor shall work with the Government to apply the MWOs IAW AR 750-10 Section 3-6.

C.9.1.2 MWO Application

During preparation and application of MWOs, the contractor shall provide SMEs to implement the MWO to include both software and/or hardware MWOs. All completed MWOs shall be reported on DA Form 2408-5 prior to being loaded into the Modification Management Information System (MMIS) via CAC enabled US Army website link <https://apps.ldac.army.mil/mmis/landing-page>. Section C.15.6 describes the process to obtain a CAC. The contractor shall perform a post modification QA operations /functionality check upon completion of all MWO applications.

The gaining unit may observe the contractors MWO MWOs application.

When required for MWO installation, the contractor shall provide certified welders qualified to weld on armor IAW MIL-STD 3040. Contractor shall have the capability of deploying up to 24 certified welders at one time, working concurrently across CONUS and OCONUS locations. Welders shall be certified on an annual basis. On an annual basis, welders shall be required to perform a sample weld on a piece of armor that will be evaluated by Government recognized authority to certify the quality of the weld to ensure it meets the standards required under MIL-STD 3040. If welder doesnt pass the certification process, they will not be authorized to weld on armor until such time as they pass the certification process. Contractor shall provide certification IAW CDRL A012, Abrams Welder Certification. The annual certifications will be held at the Government provided facility for Welding School (Building B) in Belton, TX). This facility shall be used for the contractor training or cross training to complete and maintain certification(s).

C.9.2 Reports

In support of their MWO efforts, and to clarify status and accomplishments, contractor shall submit the reports as detailed below.

C.9.2.1 Equipment Change Accomplishment Record (ECAR)

CONTINUATION SHEET	Reference No. of Document Being Continued W56HZV-24-R-0035 PIIN/SIIN MOD/AMD	Page 16 of 50
---	--	---

Name of Offeror or Contractor:

The contractor shall submit an ECAR utilizing DA Form 2408-5 in the frequency required as called out in a TO and IAW CDRL A013 ECAR. The contractor shall ensure that the information on the ECAR is complete and accurate prior to submittal.

C.9.2.2 MWO Application Status Report

The contractor shall submit a weekly MWO Application Status Report, U.S. Army MWO program IAW CDRL A014 for US Army MWO application efforts.

C.9.2.3 MWO Equipment

Equipment will be inventoried and signed for on a DD Form 1149 available at https://www.esd.whs.mil/Directives/forms/dd1000_1499/DD1149/ by either the MWO Team Lead, MWO Team Supply Manager, or Government MWO Site Lead. Upon completion of the MWO, equipment will be inventoried and returned to the Government on a DD Form 1149.

C.9.2.4 MWO property access

In support of activities to support installation of MWOs on Abrams tanks, contractor shall submit a DA Form 3161 requesting GFP required to perform field modifications. The DA Form shall be submitted to the COR and Government property Administrator who will coordinate with the appropriate Government personnel to verify requirement and approve the request. If the request is not approved, Government shall provide reasoning and recommendations for GFP to be provided. The Government will monitor all GFP transferred to the contractor for use during MWO missions. GFP will be tracked by the Government using DD Form 1149 and the Defense Property Accountability System (DPAS system). Warehouse operations will be completed IAW C.13.5.

C.10 Total Package Fielding (TPF) De-processing

The contractor shall process TPF by preparing, taking inventory, and issuing a vehicle system to Gaining Units IAW AR 770-12 and DA PAM 770-2. Fielded material will be provided to the gaining unit at the Armys maintenance standards as per AR 750-1. The contractor shall perform a baseline inspection based on the TMs and correct all faults to meet the standards called out in AR 750-1. De-processing and hand-off occurs at sites, both CONUS and OCONUS, as determined by the Government and FMS customers and specified in individual TOs. Once the vehicle has completed the baseline inspection and met the standards, the contractor shall perform sustainment maintenance on the vehicle as required in individual TOs. Vehicles shall be made ready for issue and shipped to the issue site as required in individual TOs. The contractor shall perform QA at all phases of the operation. At the fielding sight, the contractor and Government shall conduct the final QA review and joint inventory of the vehicles and the contractor shall correct any faults, including missing or discrepant items, found before a vehicle is issued to assure the vehicle meets the Army Maintenance standard per AR 750-1 and is ready to operate. The contractor shall work with the appropriate Government personnel to ensure any faults found during the final QA review and joint inventory are corrected IAW standards listed in AR 750-1 prior to handoff. Contractor shall execute the de-processing actions below which shall include:

- a) Unpackaging, filling with oil and fuel, charging batteries.
- b) Removing all preservative coatings, grease, tape, and packing materials.
- c) Inspecting for any damage from shipment.
- d) De-processing will be performed IAW procedures as called out in the associated TM. The Abrams TMs and trends found during baseline technical inspections include review of vehicle operations, oil analysis, road testing (if applicable), and replacement of failed or discrepant components.
- e) All aspects of vehicle operation are checked and verified, and all known faults are corrected to ensure vehicle is fully operational.
- f) De-processing may include the integration of radios and C4ISR equipment. This equipment could come from the gaining command.
- g) Submittal of transit damage reports.

C.11 New Equipment Training (NET)

The contractor shall provide certified instructor personnel IAW C.11.1 to conduct NET and meet CONUS and OCONUS requirements. Certification of instructors is required. Initial certification of individuals shall be done by a panel consisting of the Government Abrams NET Manager and the contractor NET site manager, or appointed representatives, IAW Attachment 0006 NET Certification Standard Operating Procedures (SOP).

Depending on the mission, the contractor shall be prepared to utilize existing materials, revising or creation of the structure of training and training materials to conduct Operator New Equipment Training (OPNET) and Field Maintenance New Equipment Training (FMNET) with the approval of the Government Abrams NET Manager. The training site manager may conduct risk analysis to identify risk, the levels of risk severity and risk mitigation measures before each training event. Much of the training is hands on and will include Training, Aids, Devices, Simulators, and Simulations (TADSS). Electronic and paper-training support packages may be required in individual TOs to be provided for training and to the units as a stay behind training packet. As provided by the Government team, copies of approved instructional materials, written test(s), score sheets, practical exercise evaluation checklist(s), critique sheets, etc. are to be provided, either electronically or paper copy, prior to the start of training through the assigned team during mission preparation and rehearsal.

Instructors shall have the experience, background and knowledge of the Abrams FOV with a preference for having previous Military Occupational Specialty (MOS) of 19K for Operator and 91A for maintainer instructors. All instructors shall possess and maintain a

CONTINUATION SHEET	Reference No. of Document Being Continued W56HZV-24-R-0035 PIIN/SIIN MOD/AMD	Page 17 of 50
---------------------------	---	----------------------

Name of Offeror or Contractor:

civilian drivers license and be licensed to operate vehicles.

Instructors shall be trained use of the training devices that will be used during NET.

The contractor shall be responsible for providing instructors with safety shoes, PPE, uniforms, hearing protection, and any other item required to perform their duties and comply with applicable safety and identifying regulations IAW with ISO 9000 or ISO 9001.

C.11.1 Certification of Instructors

The contractor shall verify that all instructors are certified by the Government IAW approved SOP (See Attachment 0006).

C.11.2 NET Meetings

The contractor shall be prepared to provide input to schedules, training, and other materials requested by the Abrams NET Manager or their appointed representative and attend meetings as necessary.

C.11.3 Conduct of Training

The contractor shall plan, coordinate, and conduct individual, crew, and field maintenance training. Contractor instructors shall execute the duties of range personnel during vehicle qualification tables. Duties may include Vehicle Crew Evaluator, Instructor, Range Safety Officer, Timer, and various other duties as deemed necessary by the NET Manager. The contract instructors shall provide sustainment training when requested by the Abrams NET Manager.

C.11.3.1 Instructor Key Personnel Training (IKPT)

Contractor instructors shall attend IKPT, if required, per the direction of the Abrams NET Manager.

C.11.4 Task Instruction

Contractor instructors shall teach tasks IAW the Government provided U.S. Army Program of Instruction (POI) for the conduct of training as approved by the Abrams NET Manager. The POI shall be specific to the mission and will be provided by the Government for each mission in a timely fashion to ensure contractor has sufficient time to review and become familiar with POI prior to conduct of training. Contractor instructors, in conjunction with the Government, shall provide feedback and recommendations to the Government to inform on how to update lesson plans and guides used during task instruction IAW associated POI. Presentations and lessons will not be presented during training without prior approval from the Abrams NET Manager or appointed representative.

C.11.5 Training Material

All training tools, equipment and material necessary to perform NET will be provided to the contractor as GFP detailed in Attachment 0002. Contractor shall maintain accountability of GFP with Team Leader of assigned teams.

C.11.6 Training Equipment

With prior approval from the COR, in conjunction with the Government, the contractor is authorized to utilize unserviceable Line Replaceable units (LRUs) and existing materials to fabricate training equipment in support of maintenance or troubleshooting. The Government shall maintain control of any training equipment as GFP. All GFP considered training devices shall be returned to the Government by the contractor upon completion of mission for accountability and serviceability checks. The Government shall store such training equipment until the next mission.

C.11.7 Team Member Movement

When more than one team is utilized, movement of the team members from a training site or between teams shall be approved in advance by the Government Abrams NET Manager. Individuals shall follow the schedule of their assigned team, to include dry runs prior to formal instruction to include set up and rehearsal, site preparation and team activities to properly prepare for missions assigned to that team.

C.11.8 Reports

Certificate of Services Technical Assistance Activity Report shall be submitted electronically in contractor format IAW CDRL A015, Maintenance Training Activity Report, Certificate of Services Technical Assistance Activities Report.

C.12 Special Tools and Support Equipment

C.12.1 Test, Measurement and Diagnostic Equipment (TMDE) GFP Repair.

The Government will provide maintenance of all GFP TMDE provided for the performance of this contract.

C.12.2 Contractor Acquired Property (CAP)

CAP will be managed and controlled based on the funding source.

C.12.2.1 PM Abrams funded efforts

CAP will immediately transfer title from the contractor to the Government. If acquired while away from home station, upon arrival at home station, CAP will transfer title from the contractor to the Government upon completion of the mission. Material and equipment purchased by the contractor at field/mission sites will remain CAP, until it is retrograded back to home station.

CONTINUATION SHEET	Reference No. of Document Being Continued W56HZV-24-R-0035 PIIN/SIIN	Page 18 of 50 MOD/AMD
---------------------------	--	--

Name of Offeror or Contractor:

Material and equipment purchased by the contractor above the amount of \$500.00 must be approved by the Government through the PM Abrams Accountable Property Officer (APO) and COR prior to purchase. Material and equipment below \$500.00 that are directly consumed onto the Tank through the execution of the mission can be made without Government approval. Purchases of material and equipment of any dollar amount that are not consumed onto the Tank through mission execution require Government approval. Split procurements are prohibited.

C.12.2.2 Army Unit funded efforts

Upon material and equipment receipt at Unit site, CAP items will immediately transfer title to Government with marking of the support unit who funded the TO. The contractor and Unit Personnel will be required to work with the PM Abrams APO to ensure documentation and accountability of these CAP items. PM Abrams APO is not part of the approval process but maintains all fiduciary records.

Material and equipment purchased by the contractor above the amount of \$500.00 must be approved by the supported Unit S-4 prior to purchase. Material and equipment below \$500.00 that are directly consumed onto the Tank through the execution of the mission can be made without Unit S-4 approval. Purchases of material and equipment of any dollar amount that are not consumed onto the Tank through mission execution require Unit S-4 approval. Split procurements are prohibited.

C.12.2.3 FMS and other PM office funded efforts

Upon material and equipment receipt at site, CAP items will immediately transfer title to the FMS Case or PM office with marking of the support FMS Case or PM office designation who funded the TO. The contractor and FMS Case Personnel or other PM office personnel will be required to work with the PM Abrams APO to ensure documentation and accountability of these CAP items. PM Abrams APO is not part of the approval process for but maintains all fiduciary records.

Material and equipment purchased by the contractor above the amount of \$500.00 must be approved by the supported FMS Case Manager(s) and/or PM office. Material and equipment below \$500.00 that are directly consumed onto the Tank through the execution of the mission can be made without FMS Case Manager or PM office approval. Purchases of material and equipment of any dollar amount that are not consumed onto the Tank through mission execution require FMS Case Manager and/or PM office approval. Split procurements are prohibited.

C.12.3 Facility and Operational Support

The contractor personnel shall aid and assist in the facility operations and basic facility maintenance. Facility Operations shall include assisting with receiving, storing, picking, packing, kitting, tracking and preparation for shipment for warehousing facilities. Basic facility maintenance shall include ensuring cleanliness and upkeep of the facility and the team area.

C.12.4 Equipment in Support of Missions

All equipment and tooling required to execute a mission will be authorized by the GFP Attachment 0002. Prior to each mission, the contractor and Government shall agree upon which tools and equipment are required in support of the individual mission. Government will then issue those tools and equipment to the contractor for use during the duration of that mission using DD Form 1149. Upon completion of the mission, the contractor shall return all tools and equipment used to the Government.

C.13 Supply Support

C.13.1 General

As set forth within TOs, the contractor shall accomplish successful fielding of the vehicle and the (TPF packages (e.g. Basic Issue Items (BII), Components of End Item (COEI), Authorized Allowance List (AAL), TMs, and Authorized Stockage List (ASL)) to the Gaining Unit. The contractor shall maintain all information, documents (DA Form 3161, DA Form 2062), and automated databases relative to the Supply Support and TPF process for the duration of the contract and execute disposition per instructions of the Contracting Officer or COR.

C.13.2 Contractor Support Requirements

The contractor shall comply with the terms of this contract and any changes IAW applicable local installation policies during the performance period of a TO. The contractor shall immediately bring to the attention of the Contracting Officer, for final resolution, any conflict between compliance with the directives, policies, rules, and regulations.

C.13.3 Electronic Reports

C.13.3.1 Electronic Supply Support System

The contractor shall use an Electronic Supply Support system that has the capability to allow the exchange of data between the contractors home base service center, the various Product Managers Offices, and fielding locations worldwide. All data shall be transmitted to the Government via Electronic Data Interface or E-mail. The system shall be able to:

- a) Access, through High-Speed internet access, the Logistics Information Database (LIDB).
- b) Maintain the Materiel Requirements List (MRL) with 100% accuracy.
- c) Generate the appropriate transactions to keep the Supply Support packages in the Government Supply System Database in agreement with the MRL as changes are made to it as it goes from a draft to a final document.
- d) Maintain an audit trail of changes made to each MRL as it goes from a draft to final document.
- e) Generate the appropriate transactions to build Supply Support Packages (SSP) utilizing the Government Supply System and Material Requirements Planning System that match the quantities in the Final MRL.

CONTINUATION SHEET	Reference No. of Document Being Continued W56HZV-24-R-0035 PIIN/SIIN MOD/AMD	Page 19 of 50
---------------------------	---	----------------------

Name of Offeror or Contractor:

- f) Track supply transactions to ensure they meet the required delivery date. Contractor shall also take action to correct any transaction that will not meet the required delivery date. Any transaction that will not meet the delivery date will be brought to the attention of the Government TPF manager, Government Chief of the Materiel Fielding Team, and Government Materiel Fielding Team supply manager.
- g) Generate requisitions for TMs and publications that can be sent to the designated Publications Center. The contractor shall requisition a starter set of Electronic Technical Manuals (ETM) and publications, for each gaining unit as per the MRL and directed by the Materiel Fielding Team.
- h) The contractor shall generate all actions required to provide customer Documentation to the Gaining Unit. The contractor shall provide the Gaining Unit with the loading of all transactions necessary to complete the Gaining Command requirements.
- i) The contractor shall develop and maintain an on-line tracking report that tracks TPF packages by each brigade to be fielded. The report will list the NSN, document number, quantity, status of the document in the supply system, unit of issue, and showing when the packages are due in or received. Contractor shall also take action to follow up on lines that will not be on hand in time for the fielding of that TPF package.

C.13.4 Tank De-processing and Fielding

The contractor shall operate a de-processing hand-off at each fielding, post, installation site, or central staging site designated to be supported in individual TOs. The contractor shall use an electronic system that integrates and monitors all aspects of maintenance management as per DA Pamphlet 750-8 and the Supply Support process as per AR 710-1 & AR 710-2.

The contractor shall have appropriate personnel present full time at the de-processing hand-off site. The team shall include mechanics that are cross trained to operate materiel handling equipment, environmental and fuel handling. All contractor personnel supporting the Materiel Fielding Team shall have CAC cards before being assigned to the fielding team.

All request for parts must be approved by the Government site lead or the deputy site lead.

During the inspection of vehicles and joint inventory with the Gaining Unit, if the contractor notices that items require adjustment, repair, cleaning, or replacement, they shall notify the Government who will provide resolution for items found discrepant or missing and provide those to the contractor.

The contractor shall perform a 100% joint inventory of all material being fielded with the Gaining Unit.

The contractor shall provide assistance to the gaining unit to ensure proper posting of documentation that will close out requisitions for material that was issued during the joint inventory.

At time of hand-off, the contractor shall formally transfer accountability of all material, by requiring the Gaining Units Property Book Officer to sign appropriate documentation.

The contractor shall report to the MFT Government supply manager any material shortages found during joint inventories.

The contractor shall prepare and provide to the Government Transportation Discrepancy Reports for material found to be damaged, non-conforming, or missing during the fielding process IAW the requirements, quantities, and schedules set forth, IAW CDRL A016, Transportation and Traffic Management, Transportation Discrepancy Report.

The contractor shall perform an inventory for the Gaining and Fielding Commands and provide the status to the gaining command and the Government COR and the MFT Government supply manager.

C.13.5 Warehouse Supply Support

The contractor shall perform the following warehouse functions: receipt, storage, kitting, issue, and shipping of material associated with the performance of this contract. The contractor shall provide inventory reports per CDRL A009 Equipment and Material Inventory Report, as identified in the TO. The contractor shall utilize software approved by the Government capable of executing the TO requirements. The contractor shall have 50% of the personnel hazardous material certified IAW 49 Code of Federal Regulation (49 CFR), International Air Transportation Association (IATA), International Maritime Dangerous Goods (IMDG), and AFMAN24-204 for Military Air.

C.13.6 Inventory Management

The contractor shall perform inventory management of Government material and equipment. Inventory management includes the procurement, replenishment, property accountability, inventory counts, discrepancy reporting, excess reporting, inventory adjustments, inventory modernization and distribution of components. The contractor shall be required to have a CAC to access and utilize Logistics Modernization Program (LMP) automation system to manage inventory. For items turned into the MFT from units, the Government will determine what can be economically returned to an issuable state. The contractor will execute the repairs to the items. This could include but not limited to the cleaning, painting and lubrication.

The contractor shall submit Inventory reports IAW CDRL A009 Equipment and Material Inventory Report. The contractor shall contact the COR if resolution is required for any of the data points listed in CDRL A009.

C.13.7 Government Furnished Property (GFP)

The COR will notify the contractor, no less than fifteen (15) calendar days in advance, of when a GFP inspection or inventory is

CONTINUATION SHEET	Reference No. of Document Being Continued W56HZV-24-R-0035 PIIN/SIIN	Page 20 of 50 MOD/AMD
---------------------------	--	--

Name of Offeror or Contractor:

required. This notification will be in order to ensure proper access to facilities and property is available. The Government notification will include: the names of authorized Government personnel that will be conducting the inspection or inventory; a list of items to be inspected or inventoried; and an estimated timeframe that Government personnel will be on site performing the inspections or inventories.

The contractor shall identify GFP at contractor operated facilities as required by FAR 52.245-1 and IAW CDRL A009, Equipment and Material Inventory Report. If an NSN is not available, the contractor shall request a Material Control Number through the COR.

The Government will transfer the stewardship of all GFP to the contractor via one of the following forms: DD Form 1149, DD Form 1348-1A, or DD Form 250. The document utilized will be signed by both the Program Management Office APO or designated represented and the contractors site Property Officer IAW CDRL A017 Stewardship Transfer Document.

The contractor shall identify and notify the Government of GFP that is no longer required for current and follow-on requirements and the contractor shall request disposition instruction for property (equipment and material) identified on CDRL A009 Equipment and Material Inventory Report. For any property that contractor discovers is lost, damaged or missing, contractor shall notify the COR and the PM Property Manager within 48 hours of discovery.

C.14 Outside Continental United States (OCONUS) Support

C.14.1 Treaties and International Agreements (e.g., Status of Forces Agreements, Host Nation Support Agreements, and Defense Technical Agreements)

The contractor shall comply with the following for OCONUS performance.

(a) AR 715-9, Operational Contract Support Planning and Management at https://armypubs.army.mil/ProductMaps/PubForm/Details.aspx?PUB_ID=1026535

(b) ATP 4-10 Operational Contract Support Tactics, Techniques, and Procedures at http://armypubs.army.mil/doctrine/DR_pubs/dr_a/pdf/attp4_10.pdf

The contractor is obligated to request any specific information not provided in this language, but needed at the time of deployment, to the Contracting Officer or the designated COR.

C.14.2 Contact Information

The contractor shall provide the COR information for its primary and backup POC who are familiar with the contractors operations relating to OCONUS efforts.

C.14.3 Individual Readiness File (IRF)

C.14.3.1 Medical Screening

Deploying contractor personnel shall carry with them a minimum of a 180-day supply of any medication they require. Military facilities will not be able to replace many medications required for routine treatment of chronic medical conditions such as high blood pressure, heart conditions, asthma and arthritis. Contractor employees shall review both the amount of the medication and its suitability in the foreign area with their personal physician and make any necessary adjustments prior to deployment.

If glasses are required, contractor employees shall deploy with two pairs of glasses and a current prescription. Copies of the prescription shall be provided by the employee to the CRC so that eyeglass inserts for use in compatible chemical protective mask can be prepared. Wearing contact lenses in a field environment is not recommended.

Contractor employees shall take along with them medical aides such as spare hearing aid batteries, and any other supplies related to their individual physical requirements.

If bio-defense vaccines are required, such as anthrax and smallpox for the Area of Operations being deployed, the vaccine will be provided to the contractor personnel by the Government on a reimbursable basis. Generally, the vaccines will be provided at the CRC or at the nearest Medical Treatment Facility (MTF).

C.14.4 Letter of Authorization (LOA)

Unless prohibited by international agreement, the Contracting Officer will issue a LOA for contractor personnel deployment and re-deployment to and from the OCONUS location. This is the document contractor personnel must carry with them as authorization for use of Government transportation, medical facilities, billeting, and other entitlements. Invitational travel orders shall not be issued in lieu of this letter of authorization. These LOAs will state the intended length of assignment in the OCONUS location and shall identify planned use of Government facilities and privileges in the theater of operations, as authorized by the contract.

C.14.5 Clothing and Equipment Issue

An individual's status as contractor personnel shall be conspicuously displayed on their clothing unless prohibited for operational reasons.

CONTINUATION SHEET	Reference No. of Document Being Continued W56HZV-24-R-0035 PIIN/SIIN	Page 21 of 50 MOD/AMD
Name of Offeror or Contractor:		

C.14.6 Tour of Duty

The contractor may rotate contractor employees into and out of OCONUS locations provided there is no degradation in mission results. For employees who have deployed less than six months, when fully funded for 12 months from date of initial TO award, the contractor may rotate personnel at no additional cost to the Government. The costs for rotating employees who have deployed for longer than six (6) months will be an allowable cost under the contract. The contractor shall communicate personnel changes with the Government.

The contractor shall comply with all duty hours and tours of duty identified in this contract. This, however, could be subject to change to ensure the Governments ability to continue to execute its mission. The duty hours and tours of duty may be the same as military personnel or may be based on operational needs.

The contractor shall be available to work extended hours to perform mission essential tasks based on the operational situation to ensure the Governments ability to continue to execute its mission.

The contractor shall submit a report on all deployment activities IAW CDRL A018, Deployment Status Report.

C.14.7 Personnel Recovery (PR) Training

PR is the sum of diplomatic, civil, and military efforts to report, locate, support, recover, return and repatriate U.S. military, DoD civilians, DoD contractors, and others as directed by the Secretary of Defense who are captured, detained, evading, isolated or missing, while participating in a U.S. activity or mission. Preserving the lives of US Military, DoD Civilians and DoD contractors placed in danger of isolation, detention or capture, while in a US sponsored mission, is one of the highest priorities of the Government. PR is a critical element for the Government in fulfilling its moral obligation to protect its personnel, prevent exploitation and reduce the potential for the capture of personnel. PR encompasses prevention training, conducting military search and rescue, combat search and rescue, recovery of isolated personnel, and repatriation of hostages, detainees, prisoners of war or persons missing or killed in action. All contractor personnel conducting OCONUS missions are required to have PR Training IAW DoDI 3020.41. The COR will make arrangements for the contractor personnel to fulfill the PR requirements. Contractor personnel accompanying the armed forces in the AO shall receive their PR Training at CRC. Through the Synchronized Personnel Operational Tracker (SPOT) a Civilian Personnel Verification Data Card will be completed at CRC, it shall also be completed at home station and provided to PM Abrams to hold as backup for the theater. Contractor personnel conducting OCONUS missions shall meet theater specific entry requirements. Theater specific entry requirements can be found on the applicable website home page for CENTCOM, EUCOM, PACOM, AFRICOM, and NORTHCOM. Contractor personnel on OCONUS travel shall meet and adhere to all Army Regulations related to foreign travel. The contractor shall be thoroughly familiar with United States Forces Korea Regulation 525-40 (USFK Reg 525-40).

C.15 Security Requirements

C.15.1 Classification

The contract will not require access to classified information in performance of this contract. The contractor will have access to Controlled Unclassified information (CUI). CUI provided to or generated pursuant to this contract shall be protected. The requirement to include the CUI marking applies to deliverables under this contract. The procedures for the protection of CUI are below and in DFARS 252.204-7012.

C.15.1.1 General

There are types of information that are not classified but that require application of access and distribution controls and protective measures for a variety of reasons. This information is known as CUI. The types of information considered CUI for the program are information marked For Official Use Only (FOUO) by the U.S. Government and technical information. When handling CUI material, all personnel are to comply with these requirements and follow their company policy and/or applicable Proprietary Information Agreements concerning the protection of proprietary information in situations not clearly stated herein.

C.15.1.2 Technical Information Description

Any recorded information related to experimental, developmental, or engineering works that can be used to define an engineering or manufacturing process, or can be used to design, procure, produce, support, maintain, operate, repair, or overhaul program material. The information may be graphic or pictorial delineations in media (e.g., computer software, drawings, or photographs), text in specifications, related performance or design documents, or computer printouts. Examples of technical information include research and engineering data, engineering drawings, and associated lists, specifications, standards, process sheets, manuals, technical reports, catalog-item identifications, and related information, and computer software documentation.

C.15.1.3 CUI Description

CUI is a Government designation applied to UNCLASSIFIED information that requires safeguarding or dissemination controls pursuant to and consistent with applicable law, regulations, and Government-wide (LRGWP) policies but is not classified under EO 13526, (Classified National Security Information). For example, privacy, law enforcement, critical technical information and some forms of agency defined operational information traditionally marked FOUO have their own category and can be designated as CUI. CUI includes information identified as such in the CUI Registry, the Security Classification Guide (SCG), or information from a Government document marked CUI or with the legacy marking FOUO. The CUI Registry is a catalogue of what the Executive Branch (e.g., DoD, MILDEPS, etc.) should be protecting. The contractor shall utilize the CUI Registry category list which identifies all approved CUI categories; provides a general description for each; identifies the basic controls, markings, and includes guidance on handling procedures: <https://www.dodcui.mil/> .

CONTINUATION SHEET	Reference No. of Document Being Continued W56HZV-24-R-0035 PIIN/SIIN MOD/AMD	Page 22 of 50
Name of Offeror or Contractor:		

C.15.1.4 CUI Markings

Marking of CUI documents will be IAW AR 25-55 and DoDI 5200.48. Information extracted from a CUI document will carry the CUI marking until formally reviewed by the Government. Information extracted from an FOUO document will be updated to the current CUI markings IAW DODI 5200.48. Marking of Technical information will include the statement provided IAW Attachment 0004, Abrams Family of Vehicles SCG. If the contents of the technical document require more than one Distribution Statement, apply the most restrictive statement. This does not preclude additional mandated markings as may be required by the contract.

C.15.1.5 Protection of CUI Information

C.15.1.5.1 Access

CUI may be released only to an individual who has a valid need for such access in connection with the accomplishment of a lawful and authorized Government purpose. Information in any media format may only be disseminated on a need-to-know basis. The need-to-know restricts the use or dissemination of CUI data to those individuals or organizations with direct affiliation with the given program or project. Further dissemination of such information will be at the discretion of the Government Security Manager. Personnel no longer requiring access to CUI must dispose (see Disposal below) or surrender any in their possession and terminate future access to it.

C.15.1.5.2 Storing/Handling

During working hours, take reasonable steps to minimize risk of access to CUI by unauthorized personnel. After working hours, when not in physical possession of the owner, all CUI (whether hardcopy or optical media (e.g., DVDs, CDs) that contain CUI) must be afforded a reasonable degree of physical protection to prevent theft of program information (e.g., store CUI information in locked desks or file cabinets, locked rooms, cable lock laptops, storing in a trunk, storing out of site or similar means). Do not display CUI in public places (e.g., airports, airplanes, restaurants). Electronic storing and processing of CUI shall be IAW DFARS 252.204-7012 Safeguarding Controlled Defense Information and Cyber Incident Reporting. Do not process CUI on public computers (e.g., those available for use by the general public in kiosks, hotel business centers), public wireless networks or computers that do not have access control. Personally owned computers and personally owned devices are not authorized to process CUI. Portable electronic devices (e.g., smartphones, laptop computers, and tablets), non-portable computers, and removable media (e.g., external hard drives, flash drives, USB drives; not including optical media) must be physically and electronically protected as described in this instruction and the DFARS 252.204-7012.

C.15.1.5.3 Dissemination

CUI printed documents and material may be transmitted through mail channels, commercial carrier or hand carried without formal courier orders. FOUO information may be disseminated to DoD personnel and DoD contractors to conduct official business for the program. If dissemination is required outside of DoD personnel or DoD contractors, contact the Government Security Manager for approval. Technical information will follow the release instructions identified in the Distribution Statement. Use secure communications whenever possible; however, land-line telephones are more secure than cellular telephones and should be used whenever available for discussions involving CUI. Transmit voice and facsimile transmissions only when you have a reasonable assurance that only authorized recipients will have access to the transmission. Digital transmission shall comply with the below.

C.15.1.5.3.1 All transmission and/or dissemination of CUI (i.e., email and file transfers) must use National Institute for Standards and Technology/National Information Assurance Partnership (NIST/NIAP) approved cryptographic products/algorithms, e.g., DoD-approved Public Key Infrastructure Certification or DoD Safe Exchange at <https://safe.apps.mil/>. These are available at <http://csrc.nist.gov/groups/STM/cmvp/documents/140-1/140val-all.htm>. This encryption requirement includes communications that contain passcodes to teleconferences or web conferences where there is a reasonable expectation that CUI may be discussed. When encryption is not available, a Government collaborative suite (aka Integrated Digital Environment [IDE]) must be used to transmit CUI.

C.15.1.5.3.2 Contractor-hosted collaborative suites may be used for digital transmission and/or dissemination of CUI by personnel not located on a Government backbone (e.g., NIPRNET), provided the following conditions apply: 1) use only NIST/NIAP approved cryptographic products/algorithms. The latest validation lists may be obtained at <http://csrc.nist.gov/groups/STM/cmvp/documents/140-1/140val-all.htm>; and 2) use an internally hosted service that does not use a third-party collaborative suite service provider.

C.15.1.5.3.3 Do not post CUI to web pages that are publicly available or have access limited only by domain/IP restrictions. As permitted by other contract provisions, CUI may be posted to web pages that control access through the use of a DoD approved Public Key Infrastructure Certification and that provide protection via use of secure sockets, or other equivalent technologies.

C.15.1.5.3.4 As new technologies become available in the electronics arena, care should be given to providing a reasonable degree of protection from known vulnerabilities.

C.15.1.5.3.5 The Internet is Public Access. CUI must be reviewed and officially approved by the PEO GCS Public Affairs Officer (PAO) for public release before placing on the Internet, as outlined in the SCG. This is not applicable when the Internet is used for e-mail transmissions and encryption is used as noted above.

C.15.1.6 Disposal

Destroy CUI documents by any means approved for the destruction of classified information, i.e. cross-cut shredding or other means that would make it difficult to recognize or reconstruct the information. The contractor shall ensure any covered defense information

CONTINUATION SHEET	Reference No. of Document Being Continued W56HZV-24-R-0035 PIIN/SIIN	Page 23 of 50 MOD/AMD
---------------------------	--	--

Name of Offeror or Contractor:

provided by the Government under this contract is destroyed or sanitized from contractor-owned media and reported IAW NIST Special Publication (SP) 800-88, Rev 1or returned to the owning organization upon the completion of the contract or as directed by the Contracting Officer.

C.15.1.7 Report of Loss of CUI

Report any loss of CUI to the Government Security Manager. Initial reports shall be made as expeditiously as possible in all cases within 72 hours of discovery. If additional information is required after submission and review of the initial report, guidance will be provided at that time. Mark any reports FOUO, exemptions 2 and 5 apply. Initial report content shall include the following information as available.

Applicable dates, including dates of compromise and dates of discovery

Threat methodology, including all known resources used (e.g. IP addresses, domain names, software tools)

Account of what actions the threat(s) may have taken on victim system/network

What information may have been compromised or lost, and its potential impact on Government programs

C.15.2 Public Release Requests

The contractor shall screen all information submitted for determination of public release to ensure it is both unclassified and technically accurate. The contractor shall provide a letter of transmittal certifying a screening was conducted and that the contractor attests that the information is unclassified and technically accurate, to the best of the contractor's knowledge. The contractor shall not release program information outside of program channels until the Government review process is complete. The contractor shall submit all requests for public release approval through the Contracting Officer for a review by Government technical and security personnel and by the Government's PAO. The Contracting Officer will, after appropriate review, either authorize or reject the request to disseminate Government information publicly. Note that authorization may be given contingent on specified changes being made to the material for which public release has been requested. The program requires 45 calendar days to process the request and render a decision. Requests for public release shall be sent electronically via encrypted email using cryptographic products that are NIST/NIAF approved or mail a Compact Disc/Digital Video Disc (CD/DVD) using U.S. Postal First Class mail.

C.15.3 Operations Security (OPSEC) Requirements

The contractor is not required to produce an OPSEC Plan. U.S. contractors with access to CUI (e.g. technical information, information marked with a distribution statement or FOUO) information shall be required to follow the PM Abrams OPSEC plan, Attachment 0005. To ensure awareness of the PM Abrams OPSEC Plan, the contractor shall provide annual training for personnel supporting this contract on the contents of the PM Abrams OPSEC Plan. The contractor shall ensure that new personnel receive PM Abrams OPSEC Plan specific training within 30 days of program assignment. Personnel who have taken the PM Abrams OPSEC Plan training within the last 12 months shall be considered compliant unless the PM Abrams OPSEC Plan has been revised since the last training. The contractor shall report IAW CDRL A019, Certificate of Compliance, OPSEC Training Report.

C.15.3.1 Requirement for an OPSEC Standing Operation Procedure/Plan

(a) The contractor is subject to provisions of the OPSEC Standing Operating Procedures (SOP/Plan), or other U.S. Government OPSEC plan, per AR 530-1, Operations Security. This SOP/Plan specifies the Governments critical information, why it needs to be protected, where it is located, who is responsible for it, and how to protect it.

(b) The contractor will receive a copy of the SOP/Plan at time of award. Local form STA Form 7114 (or similar) will be used to document and record security OPSEC reviews which are conducted by G2, TACOM LCMC or individual organizations supporting OPSEC Officers.

(c) The contractor shall identify an individual who will be an OPSEC Coordinator. The contractor will ensure that this individual is OPSEC Level I.

C.15.4 Information Flow Down

The contractor shall ensure the security requirements and guidelines contained in section C.15 are flowed down to U.S. subcontractors and consultants.

C.15.5 OPSEC Awareness Training Requirements

All contractor employees shall complete OPSEC Awareness for Military Members, DoD Employees and Contractors training. This training is available at:

<https://www.cdse.edu/Training/eLearning/GS130/> . All training shall be completed and reported IAW CDRL A020, Certificate of Compliance, OPSEC Awareness Training Report and have available upon request all certificates of completion for initial and annual reporting requirements. An alternative method is to conduct face-to-face training in a classroom or auditorium setting, utilizing a downloaded version of the CDSE OPSEC Awareness training with a sign-in or attendance sheets along with copies of the completed test questions/exam from the CDSE training for each participant verifying passing with a test score of 75% or better in lieu of certificates. The instructor will be OPSEC Level II certified to perform this alternative training method.

C.15.6 Common Access Card (CAC) or Installation Access Identification

Issuance of a CAC is authorized under this contract if one of the following requirements under Issuance is met.

C.15.6.1 Issuance

The contractor employee shall be issued a CAC only if duties involve one of the following: (1) Logical access to a DoD network that

CONTINUATION SHEET	Reference No. of Document Being Continued W56HZV-24-R-0035 PIIN/SIIN MOD/AMD	Page 24 of 50
---------------------------	---	----------------------

Name of Offeror or Contractor:

requires a CAC for login or a DoD website that only accepts the CAC for login access; or (2) Both physical access to a DoD facility and access, via logon, to DoD network on-site or remotely. Access to a DoD network must require the use of a computer with Government-controlled configuration or use of a DoD-approved remote access procedure IAW Defense Information Systems Agency; or (3) Physical access to multiple DoD facilities or multiple non-DoD federally controlled facilities on behalf of the DoD on a recurring basis for a period of 6 months or more. Contractor employees who meet these requirements shall be issued a CAC as explained at <http://www.cac.mil/common-access-card/getting-your-cac/for-contractors/> . Contractor employees who do not meet the requirements for a CAC but are required to have access to a Government installation shall be sponsored for an Installation Identification card by the COR and provide all information to comply with adjudication standards and procedures using the National Crime Information Center Interstate identification Index (NCIC-III) and Terrorist Screening Database (TSDB) (Army Directive 2014-05/AR 190-13), applicable installation, facility and area commander agreements and other theater regulations.

C.15.7 Protection and Handling of Identification (ID) Cards and Reporting Lost or Stolen Cards

For CAC, refer to <http://www.cac.mil/common-access-card/managing-your-cac/> . Installation identification or badge shall be displayed while on the installation on the front of the outer garment between the shoulder and waist. The contractor is responsible for ensuring all ID cards are properly safeguarded and accounted for at all times. The contractor shall immediately file an installation police report in cases of loss, theft, forgery, or damage and report to the COR.

C.15.8 Return of ID Cards

The contractor shall ensure that all employees, including all subcontractor employees at all tiers, return installation and/or access badges IAW FAR 52.204-9 to the Visitor Control Center for deactivation and destruction. If a contractor employees badge is not returned, the contractor shall report, as soon as the incident is discovered, the unrecovered badge to the Installation Police. Contractor employees in possession of a CAC shall be responsible for turning in the CAC IAW FAR 52.204-9 and providing the CAC to the COR. All ID cards (installation or CAC) are property of the Government.

C.15.9 Antiterrorism (AT) Level 1 Training

All contractor employees conducting work on a DoD controlled installation, facility or area shall complete initial AT Level 1 training and annual training thru the life of the contract. AT level I awareness training is available at the following website: <https://jkodirect.jten.mil> . All contractors shall adhere to CDRL A021, Certificate of Compliance, Antiterrorism Level 1 Training Report training and reporting requirements. An alternative method is to conduct face-to-face training in a classroom or auditorium setting, using a sign-in or attendance sheets in lieu of certificates. The instructor will be Antiterrorism Level II certified and be an appointed Antiterrorism Officer to perform this alternative training method.

C.15.10 iWatch Training

The contractor shall use Government provided iWatch training for all contractor personnel supporting the contract who are operating on a DoD controlled installation, facility or area. This training will be used to inform employees of the types of behavior to watch for and instruct employees to report suspicious activity to the COR. All contractors are required to adhere to CDRL A022, Certificate of Compliance, iWatch Training Report training and reporting requirements. Training shall be obtained at: <https://www.mepcom.army.mil/Home/contractors.aspx>

C.15.11 Access to Government Information Systems Requirements

All contractor employees with access to a Government info system shall be registered in the ATCTS (Army Training Certification Tracking System) <https://atc.us.army.mil/iastar/index.php> . All contractor employees shall complete the DoD Information Assurance Awareness training prior to being granted access to the Government information systems. This training is required to be completed annually for the duration of the contract. The minimum-security investigative requirements for access to Government information systems is Tier 1 formally known as National Agency Check with Inquiries (NACI) and Defense Information System for Security (DISS) needs to reflect IT-III (Non-Privileged Access).

C.15.12 Anti-Terrorism (AT) Awareness Training for Contractors Traveling OCONUS

Contractor employees and associated subcontractor employees shall receive Government-provided AT awareness training specific to the area of responsibility (AOR) as directed by AR 525-13. Specific AOR training content is to be directed by the combatant commander, with the unit Anti-Terrorism Officer (ATO) being the local point of contact.

C.15.13 Covered Defense Information

C.15.13.1 Identify all covered defense information associated with the execution and performance of this contract. At the post-award conference the contractor and the Government shall identify and affirm marking requirements for all covered defense information, as prescribed by DoDI 5200.48, CUI, and DoDI 5230.24, to be provided to the contractor, and/or to be developed by the contractor, associated with the execution and performance of this contract.

C.15.13.2 Track all covered defense information associated with the execution and performance of this contract. The contractor shall document, maintain, and provide to the Government, a record of tier 1 level subcontractors, vendors, and/or suppliers who will receive or develop covered defense information as defined in DFARS Clause 252.204-7012, and associated with the execution and performance of this contract. The contractor shall report IAW CDRL A023 Contractors Record of Tier 1 Level Suppliers Receiving/Developing Covered Defense Information.

CONTINUATION SHEET	Reference No. of Document Being Continued W56HZV-24-R-0035 PIIN/SIIN	Page 25 of 50 MOD/AMD
Name of Offeror or Contractor:		

C.15.13.3 Restrict unnecessary sharing and/or flow down of covered defense information associated with the execution and performance of this contract.

The contractor shall restrict unnecessary sharing and/or flow down of covered defense information as defined in DFARS Clause 252.204-7012 and associated with the execution and performance of this contract IAW marking and dissemination requirements specified in the contract and based on a need-to-know to execute and perform the requirements of this contract.

C.15.13.4 The contractor shall flow down the requirements to their tier 1 level subcontractors, vendors, and/or suppliers.

C.15.14 System Security Plan

C.15.14.1 System Plan and Plans of Action and Milestones (SSP/POAM) Reviews

C.15.14.1.1 Within thirty (30) days of contract award, unless otherwise notified by the Government, the contractor shall make its System Security Plan(s) (SSP(s)) for its covered contractor information system(s) available for review by the Government at the contractors facility. The SSP(s) shall describe how the National Institute of Standards and Technology (NIST) Special Production (SP) 800-171 security requirements are implemented as required by DFARS 252.204-7012, included in this contract, and identify all applicable Commercial and Government Entity Code codes affected. The contractor shall fully cooperate in the Governments review of the SSP(s) at the contractors facility. The contractor shall report IAW CDRL A024 Contractor SSP.

C.15.14.1.2 If the Government determines that the SSP(s) does not adequately describe how the NIST SP 800-171 security requirements are implemented, then the Government shall notify the contractor of each identified deficiency. The contractor shall correct any identified deficiencies within thirty (30) days of notification by the Government. The Contracting Officer may provide for a correction period longer than thirty (30) days and, in such a case, may require the contractor to submit a Plan of Action and Milestones (POAM) for the correction of the identified deficiencies. The contractor shall immediately notify the Contracting Officer of any failure or anticipated failure to meet a milestone in such a POAM.

C.15.14.1.3 Upon conclusion of the correction period, the Government may conduct a follow-on review of the SSP(s) at the contractors facilities. The Government may continue to conduct follow-on reviews until the Government determines that the contractor has corrected all identified deficiencies in the SSP(s).

C.15.14.1.4 The Government may, in its sole discretion or in response to a cyber incident, conduct subsequent reviews at the contractors site to verify the information in the SSP(s). The Government may conduct reviews at any time upon thirty (30) days notice to the contractor.

C.15.14.2 Compliance to NIST SP 800-171

C.15.14.2.1 The contractor shall fully implement the CUI Security Requirements in NIST SP 800-171 in effect at the time of the solicitation is issued or as authorized by the Contracting Officer, or establish a SSP(s) and POAM(s) that varies from NISP SP 800-171 only IAW DFARS 252.204-7012(b)(2), for all covered information systems affecting this contract.

C.15.14.2.2 Notwithstanding the allowance for such variation, the contractor shall identify in any SSP and POAM their plans to implement the following, at a minimum:

- (1) Implement Requirement 3.5.3 (Multi-factor authentication). This means that multi-factor authentication is required for all users, privileged and unprivileged accounts that log into a network. In other words, any system that is not standalone is not should be required to utilize acceptable multi-factor authentication. For legacy systems and systems that cannot support this requirement, a combination of physical and logical protections acceptable to the Government may be substituted;
- (2) Implement Requirement 3.1.5 (least privilege) and associated Requirements, and identify practices that the contractor implements to restrict the unnecessary sharing with, or flow of, covered defense information to its subcontractors, suppliers, or vendors based on need-to-know principles;
- (3) Implement Requirement 3.1.12 (monitoring and control remote access sessions) Require monitoring and controlling of remote access sessions and include mechanisms to audit the sessions and methods;
- (4) Audit user privileges on at least an annual basis;
- (5) Implement Requirement 3.13.11 (Federal Information Processing Standards (FIPS) 140-2 validated cryptology or implementation of National Security Agency or NIST-approved algorithms (i.e., FIPS 140-2 Annex A: Advanced Encryption Standard (AES) or Triple Data Encryption Standard (DES) or compensating controls as documented in a SSP and POAM));
- (6) Implement Requirement 3.13.16 (Protect the confidentiality of CUI at rest) or provide a POAM for implementation which can be evaluated by the Government Program Manager for risk to the program;
- (7) Implement Requirement 3.1.19 (encrypt CUI on mobile devices) or provide a plan of action for implementation which can be evaluated by the Government Program Manager for risk to the program.

C.15.14.3 Cyber Incident Response:

C.15.14.3.1 The contractor shall, within fifteen (15) days of discovering the cyber incident (inclusive of the 72-hour reporting period

CONTINUATION SHEET	Reference No. of Document Being Continued W56HZV-24-R-0035 PIIN/SIIN MOD/AMD	Page 26 of 50
---	--	---

Name of Offeror or Contractor:

in DFARS 252.204-7012), deliver all data used in performance of the contract that the contractor determines is impacted by the incident and begin assessment of potential warfighter/program impact. Incident data shall be delivered IAW the Department Cyber Crimes Center (DC3) Instructions for Submitting Media available at https://www.acq.osd.mil/dpap/dars/pgi/docs/Instructions_for_Submitting_Media.docx. In delivery of the incident data, the contractor shall, to the extent practical, remove contractor-owned information from Government covered defense information.

C.15.14.3.2 If the contractor subsequently identifies any such data not previously delivered to DC3, then the contractor shall immediately notify the Contracting Officer in writing and shall deliver the incident data within ten (10) days of identification. In such a case, the contractor may request a delivery date later than ten (10) days after identification. The Contracting Officer will approve or disapprove the request after coordination with DC3.

C.15.14.3.3 Army Counterintelligence (CI) Outreach
The contractor shall engage, whenever practicable, with Army CI industry outreach efforts and consider recommendations for hardening of covered contractor information systems affecting Army programs and technologies; and make contractor personnel available for threat briefings specific to foreign intelligence threats to Army programs and technologies.

C.15.14.4 Army CI/Industry Monitoring

C.15.14.4.1 In the event of a cyber incident or at any time the Government has indication of a vulnerability or potential vulnerability, the contractor shall cooperate with the Army CI, which may include cooperation related to: threat indicators; pre-determined incident information derived from the contractors infrastructure systems; and the continuous provision of all contractor, subcontractor, or vendor logs that show network activity, including any additional logs the contractor, subcontractor or vendor agrees to initiate as a result of the cyber incident or notice of actual or potential vulnerability.

C.15.14.4.2 If the Government determines that the collection of all logs does not adequately protect its interests, the contractor will coordinate with Army CI to implement additional measures, which may include allowing the installation of an appropriate network device that is owned and maintained by the Army CI, on the contractors information systems or information technology assets. The specific details (e.g., type of device, type of data gathered, monitoring period) regarding the installation of an Army CI network device shall be the subject of a separate agreement negotiated between Army CI and the contractor. In the alternative, the contractor may install network sensor capabilities or a network monitoring service, either of which must be reviewed for acceptability by Army CI. Use of this alternative approach shall also be the subject of a separate agreement negotiated between Army CI and the contractor.

C.15.14.4.3 In all cases, the collection or provision of data and any activities associated with this statement of work shall be IAW federal, state, and non-US law.

C.15.14.4.4 Threat Awareness Reporting Procedures (TARP)
Annual TARP training and reporting requirements are applicable to all Army contractors if included in the contract (DD Form 254), this is applicable to all contract employees not just those contractor employees with security clearances. Per AR 381-12, TARP, contractor employees must receive annual TARP training by a Counter Intelligence agent or other trainer as specified in AR 381-12, paragraph 2-4.i.

---------------------------	--	--

Name of Offeror or Contractor:

SECTION H - SPECIAL CONTRACT REQUIREMENTS

H.1 ADDITIONAL ORDERING PROVISIONS

H.1.1 All efforts shall be performed IAW TOs issued by the Contracting Officer. Labor hours will be awarded for TOs, which can either be Term or Completion efforts. The individual TO will define if it is Term or Completion.

H.1.1.1 Term describes the scope in general terms and obligates the contractor to devote specified Term hours for a stated time period. At its discretion, the Government may award additional Term hours to complete the effort. The contractor is not authorized to incur effort in excess of the specified Term hours and total cost. Any costs incurred for excess effort are unallowable.

H.1.1.2 Completion scope describes a TO with a definite goal or target and specifies an end product, regardless of the number of hours ordered or performed. In the event the contractor cannot complete the scope within the estimated cost, the Government may require more effort without increase in fixed fee, provided that the Government increases the estimated cost.

H.1.1.3 TOs will be awarded IAW Section B of this contract, which will establish the estimated labor cost and fixed fee for each TO. Labor rates will be based on the OP in which the labor is added to the TO (see Section B.3). The Government reserves the right to unilaterally exercise Term or Completion TOs based on Basis of Estimate (BOE) delivered IAW H.1.2. The labor hours required on each TO will be decided by the Government. Any ODC and Travel required on a TO shall be proposed pursuant to H.1.2.

H.1.2 Prior to issuance of a TO, the contractor will review a draft TO provided by the Contracting Officer and shall deliver a BOE estimating the ODC/Travel commensurate with the TO within 10 business days of receipt of the draft TO. If a BOE is not provided to the Contracting Officer within 10 business days, the Contracting Officer will estimate the ODC/Travel costs utilizing relevant data (i.e. GSA rates, State Department Allowances, etc.) and unilaterally award the TO. Pricing for each TO will be determined using a Government technical review of the contractors proposed BOE for ODC/Travel and resultant negotiations, if applicable. All ODC/Travel proposed at the TO level are subject to FAR 15.403-4 and shall consist of:

H.1.2.1 Travel and ODCs shall be proposed on a cost no fee basis and will be negotiated at the TO level.

H.1.2.2 Supporting data for the Government to substantiate the contractor's estimated Travel and ODC costs.

H.1.2.3 Identification of any OCONUS labor categories that will require Contracting Officer authorization for exemption from the Labor Ceiling Rates as established in H.2.1.1, along with the associated labor hours, anticipated labor rate(s), rationale, and supporting data.

H.1.3 The contractor is not authorized to begin work on any TO until the Government issues an awarded TO. The Government has the unilateral right to increase, decrease and prioritize the work to be performed hereunder by the issuance of awarded TOs. It is understood and agreed that such adjustments shall be made within the general scope of the contract.

H.2 LABOR CATEGORIES

H.2.1 Upon contract award, the labor rates found in the GFPM on the Composite Labor Rates tab will be incorporated into the contract as an Attachment. These rates will be utilized to calculate the estimated labor cost for all TOs, and the fixed fee dollars per hour will be utilized to calculate the total estimated fixed fee.

H.2.2 Ceiling Rates. Upon contract award, the Prime and Subcontractor ceiling rates found in the GFPM on the Prime Ceiling Rates and Subcontractor Ceiling Rates tabs will be incorporated into the contract as an Attachment. These ceiling rates are equal to the Offerors proposed fully burdened labor rates (less fee) plus 10% for CONUS labor categories or 20% for OCONUS labor categories, for each applicable period of performance. At no time during contract performance shall the contractor invoice the Government at a rate which exceeds these ceiling rates, applicable to the period during which the performance was rendered, regardless of actual cost incurred.

H.2.2.1 Ceiling rates may be waived at the Contracting Officers discretion on individual TOs containing OCONUS locations with uplifts exceeding 20%.

H.3 LABOR CATEGORY DESCRIPTIONS AND MINIMUM QUALITIFICATIONS

H.3.1 The Service Contract Act (SCA) applies to all work performed by all non-exempt labor categories within the United States. For purposes of the SCA, the term "United States" includes any State, the District of Columbia, Puerto Rico, the Virgin Islands, Outer Continental Shelf lands as defined in the Outer Continental Shelf Lands Act, American Samoa, Guam, Wake Island, Johnston Island, and the Commonwealth of the Northern Mariana Islands. The SCA does not apply to work performed in any other territory under the jurisdiction of the United States or any United States base or possession within a foreign country. The SCA does not apply to work performed on ships operating in international or foreign waters. If a portion of the contract services is performed within the United States and a portion is performed outside the United States, the SCA applies to the portion performed in the United States.

CONTINUATION SHEET	Reference No. of Document Being Continued W56HZV-24-R-0035 PIIN/SIIN MOD/AMD	Page 28 of 50
---	--	--

Name of Offeror or Contractor:

H.3.1.1 For Wage Grade positions as identified below, the labor categories will be subject to conforming to the requirements of the SCA Wage Determination (WD) 2015-0025 "Nationwide Contract Field Teams" or, for the employees whose main area of operation is Fort Cavazos, TX, SCA WD 2015-5237 "Bell County, Texas". The distinction between the contractor's main area of operation will be determined as the location in which they spend the preponderance of their hours. If a contractor is on CONUS TDY outside of Fort Cavazos, TX for a period greater than 179 days continuously, they will be considered part of the contract field teams and subject to Nationwide WD 2015-0025. The latest versions of each WD will be listed in Section J of the contract. Prior to issuing orders within each OP, these WD's will be updated and attached to the respective TO. Below is a description of each labor category to aid in mapping to the correct minimum wage rate as detailed in the WD.

****For the purposes of the solicitation, the SCA Wage Determination criteria utilized shall be the Nationwide WD 2015-0025****

H.3.2 Supply/Procurement Specialist will be expected to meet the qualifications of the Supply Technician, Occupation Code 01410. The Supply/Procurement Specialist is responsible for managing and supporting supply management, logistics, inventory control, and order fulfillment operations for parts, supplies, and equipment as transportation coordinator and transportation liaison between various sites. They shall be responsible for direct dispatching, routing, and shipping of equipment, parts, and support equipment repair parts. The Supply/Procurement Specialist will be responsible to order, receive, stock, and issue Class II, IV, VII and IX parts, as well as generate reports, in addition to managing the site's inventory stock levels. Supply/ Procurement Specialist is responsible for utilization of government automated program to manage inventory. They shall be responsible for the use of web-based systems such as Army Enterprise Systems Integration Program, FedMall, Web Visual Logistics Information Processing System, ETA, Radio Frequency/In-Transit Visibility, and Product Data Reporting and Evaluation Program or similar systems to retrieve/expedite status, track shipments, manage container inventory and report discrepancies. Supply/ Procurement Specialist is responsible for automated management and transfer of Total Package Fielding MILSTRIP documentation to gaining units Property Book and Stock Record accounts to allow property and CL IX acceptance in gaining commands automated systems for property accountability.

H.3.3 Material Handling Specialist will be expected to meet the qualifications of the Material Coordinator, Occupation Code 21030. The Material Handling Specialist will be responsible for maintaining warehouse stock, as well as assisting in fulfilling requisitions and purchase orders. They will be responsible for loading, unloading and kitting Abrams related materials, staging products based on requirements executing inventories with the gaining unit at fielding events. In addition, they shall assist with organizing and maintaining existing inventory. Current and valid OSHA forklift operation certificate, HAZMAT certificate and environmental certificate required as well as 2+ years inventory management experience with a strong attention to detail. Material Handlers must also have valid Hazardous Material (HAZMAT) certification IAW Department of Defense regulation 4500.9-R, 49 CFR.

H.3.4 Heavy Equipment Mechanic: Shall meet the qualifications of the Heavy Equipment Mechanic, Occupation Code 23430 with the following minimum level of experience. The Heavy Equipment Mechanic supporting this contract scope of work shall have at least five (5) years of experience in tracked combat vehicle maintenance to include general automotive and turbine engine maintenance; or at least three (3) years of experience performing or supervising military automotive and turbine engine maintenance; or at least two (2) years of experience of performing or supervising vehicle maintenance. The Heavy Equipment Mechanic will be responsible for analyzing malfunctions and repairs, rebuilding and maintaining power equipment. The mechanic will be skilled in the care and use of hand and power tools. This worker operates, troubleshoots, and inspects tank machines or equipment to diagnose defects, dismantles and reassembles equipment, using hoists and hand tools, examines parts for damage or excessive wear, using micrometers and gauges, replaces defective engines and subassemblies, such as transmissions, and tests overhauled equipment to insure operating efficiency. Mechanic shall have knowledge of fielding practices and policies to include de-processing, technical inspection and loading/unloading of combat equipment. The mechanic may direct workers engaged in cleaning parts and assisting with assembly and disassembly of equipment. The mechanic must also be licensed to operate cranes capable of lifting up to 35 tons.

H.3.5 Welder: Shall meet the qualifications of Welder, Combination, Maintenance, Occupation Code 23960, with the following minimum responsibilities/experience. Welder should have minimum five (5) years experience welding on military equipment with a strong preference for extensive knowledge welding on ground combat vehicles and/or armored equipment. Welders shall be capable of repairing defects on existing welds and armor steel castings. Welder shall have experience performing welding on a variety of materials to include Aluminum Armor. Welder shall also be qualified to perform cutting, soldering, and brazing efforts on armor vehicles. Welder should have experience working with US Army welding procedures, guidelines, and regulations. Welder shall have experience working with different welding methods (pulse welding, stick welding). The qualification of welders, welding operators, and tack welders for non-ballistic structures shall be IAW the applicable AWS welding code.

H.3.6 Software: Shall meet the qualifications of the Heavy Equipment Mechanic, Occupation Code 23430 with the following minimum responsibilities. Shall have experience with working in the development process of software and identifying what computer peripheral(s) would be required to install software on combat systems. Shall have a minimum of 1-3 years experience performing installations, preventive maintenance, testing, and troubleshooting on complex systems. Shall have experience working with complex systems with hardware, software and/or firmware configurations. Shall be able to work with US Government systems in resolving issues related to equipment failure, repair, and documentation of issues. Shall be able to diagnose and resolve system problems, including connectivity between electronic components. Shall have experience in system configuration and software installation. Shall be able to read and comprehend complex software language and instructions and describe instructions to others. Prefer education and/or certification in computer science or other relevant field.

H.3.7 MW0: Shall meet the qualifications of the Heavy Equipment Mechanic, Occupation Code 23430 with the following minimum responsibilities. Shall have experience in the diagnosing and resolution of technical issues during modification application on US

CONTINUATION SHEET	Reference No. of Document Being Continued W56HZV-24-R-0035 PIIN/SIIN MOD/AMD	Page 29 of 50
--------------------	--	---------------

Name of Offeror or Contractor:

Government equipment. Shall have experience working with US Government technical documentation to include a general understanding of process to gain formal approval of technical documents along with processes to update documents once in use. Shall have experience working with some or all of, but not limited to, the following: turbine/diesel engines, transmissions, AC/DC electrical systems, hydraulics, or other sensitive systems to be used in combat. Shall have experience providing guidance and informal training to users of complex equipment describing the modifications made to the equipment.

H.3.8 Instructor Supervisor: Shall meet the qualifications of the Technical Instructor, Occupation Code 15090 with the following responsibilities. There is currently no direct mapping for an Instructor Supervisor from this contract to an applicable Wage Determination at this time, it will be required that they meet the same qualifications as a Technical Instructor, Occupation Code 15090. In the event that the applicable WDs are updated through the Department of Labor, the published rates will supersede this requirement. FLMNET Instructor Supervisors will be further required to meet, at a minimum, the qualifications of Heavy Equipment Mechanic. The Instructor Supervisor will be certified, IAW Attachment 0006 NET Instructor Certification SOP to provide instructions on all vehicle platforms and Mission Equipment Packages, to include BII, STTE, and Associated Support Items of Equipment related to the system. In addition to being certified to instruct all vehicle platforms, the Instructor Supervisor will supervise, and coordinate activities of instructors assigned under their supervision. The Instructor Supervisor is responsible for conferring with department managers and US Government representatives to determine training requirements. In coordination with the US Government Training Manager, the Instructor Supervisor determines training requirements and assists instructors in securing required training aids and scheduling classroom space. They assign instructors to teach US Government approved POI, as well as monitor classes to determine effectiveness of instruction while suggesting methods designed to improve the training program. The Instructor Supervisor ensures all training is IAW the current IETMs and Technical Manuals.

H.3.9 Instructor: Shall meet the qualifications of the Technical Instructor, Occupation Code 15090 with the following responsibilities. FLMNET Instructors shall be further required to meet the qualifications of Heavy Equipment Mechanic. The Instructor will be certified, IAW Attachment 0006 NET Instructor Certification SOP to provide instructions on the vehicle platform and Mission Equipment Packages, to include BII, STTE, and Associated Support Items of Equipment related to the system to include Training Aids and Devices (TADDS). Planning lessons, monitoring and assessing student progress on an ongoing basis, participating in the accountability of the Soldiers and training aid process as requested, creating Individual Learning Plans with students, and collecting, recording and reporting all necessary information related to students in accordance with the scope of work. Ensure all training is IAW the current IETMs, TMs, POI, and lesson plans.

H.3.10 Field Service Representative: Shall meet the requirements of a Heavy Equipment Mechanic, Occupation Code 23430, in addition to a minimum of ten (10) years of experience maintaining and/or supervising. The FSR shall be responsible for inspection, testing, installation, calibration, troubleshooting and providing informal training. Also conducts on site field testing and provides technical directions to maintainers and operators. The FSR identifies the technical problems and takes initiative to resolve those issues immediately. They are responsible for ensuring excellent customer satisfaction by demonstrating commitment and delivering quality services. They make sure that the administrative functions, along with the generation of reports, is IAW the CDRLs and has been completed within the given time limit. They conduct all the field work within the given budget, considering the labor and travel costs. The FSR will comply with the unit's policies and ensure that they adhere to the local military and government safety regulations. The FSR will wear the appropriate gear to support the customer unit in training or deployed. This could include MILS gear and load bearing equipment. FSR shall be certified to meet the requirements to perform the above duties.

H.3.11 Quality Assurance: Shall meet the qualifications of the Heavy Equipment Mechanic, Occupation Code 23430 with the following minimum responsibilities: Shall have experience performing quality inspections on work performed on complex systems to determine work quality meets standards/specifications as called out in requirements documents. Shall have experience working with US Government regulations and guidance on maintenance standards for complex equipment. Shall have experience working with US Government TMs with at minimum the ability to read and understand maintenance procedures and instructions. Shall have experience with complex working systems to be able to troubleshoot and diagnose any known or observed faults on equipment after modifications have been performed to the system.

H.3.12 Project Management Specialist: Shall meet the qualifications of the Project Management Specialist with the following responsibilities (note that this labor category does not have an assigned Occupation Code at this time, but is found under 92000 Non Standard Occupations): Shall have experience managing government programs with responsibility for coordinating meetings, providing presentation materials, submitting contractual deliverables, reviewing and providing input to proposed contractual work (TOs). Program Management experience shall also demonstrate a working knowledge of various Government documents and forms required for traveling purposes, both CONUS and OCONUS. Program Management shall also demonstrate experience with foreign countries entry and working requirements and documentation. Program Management shall also entail the ability to react in a changing environment and dynamic requirements calling for quick movement of personnel and timely support to meet mission requirements. Program Management shall also demonstrate a working knowledge of existing US Government contractual requirements and restrictions as they relate to support in a field environment.

(a) The use in this solicitation of any Federal Acquisition Regulation (48 CFR Chapter 1) provision with an authorized deviation is indicated by the addition of "(DEVIATION)" after the date of the provision.

(b) The use in this solicitation of any DoD FAR SUPPLEMENT (48 CFR Chapter 2) provision with an authorized deviation is indicated by the addition of "(DEVIATION)" after the name of the regulation.

(End of clause)

L.1 General Proposal Information

Offerors are cautioned to consult the Contracting Officer IN WRITING before submitting an offer that proposes any deviations or exceptions to any of the requirements, terms, and conditions of the solicitation because it may be cause for rejection of the proposal (See Section M.2)

L.1.1 The proposal, subject to the Submission, Modification, Revision, and Withdrawal paragraph of Competitive Acquisitions (FAR Provision 52.215-1) contained in Section L of the solicitation, shall be submitted in the format and quantities set forth below. All information necessary for the review and evaluation of a proposal is to be contained in the proposal volumes set forth below. Section M of the solicitation sets forth the evaluation criteria and delineates the Factors to be evaluated and their relative order of importance. The offeror's proposal, as required by this section, will be evaluated as set forth in Section M of this solicitation. The Government will not assume the offeror possesses any capability, understanding, or commitment not specified in its proposal. It is an offeror's responsibility to submit a well-written proposal, with adequately detailed information, which clearly demonstrates an understanding of and the ability to comply with the solicitation requirements to allow for a meaningful evaluation. The Government does not assume the duty to search for data to cure problems it finds in proposals.

L.1.2 Minimum Acceptance Period.
ACCEPTANCE PERIOD means the number of calendar days available to the Government for awarding a contract from the date specified in this solicitation for receipt of offers.

L.1.2.1. The Government specified minimum acceptance period of 240 calendar days.

L.1.2.2. The offeror shall clearly state in its proposal Administrative volume the acceptance period. Offerors may specify a longer acceptance period than the Government's minimum acceptance period stated above.

L.1.2.3. An offer allowing less than the Government's minimum acceptance period, or fails to provide a proposal acceptance period, may be rejected. Please note that if the proposal's signed SF33 has a blank Box 12 (which defaults to a 60 day proposal acceptance period) and DOES NOT contain elsewhere in the Administrative Volume a clearly written statement of the proposals acceptance period that meets the requirements of L.1.2 may be grounds to reject the proposal.

L.2 Proposal Content, Format and Submission Instructions

L.2.1 Proposal Content

L.2.1.1 All proposals shall be in English (American Standard) and shall be in US dollars. Proposals not in English (American Standard) or in US Dollars may be rejected. The proposal shall include all information specified and shall address all requirements outlined in Section L. The offeror's proposal shall be submitted in separate volumes set forth below. The offerors proposal shall consist of the following volumes:

Volume Number	Title
Volume 1	Experience Factor
Volume 2	Cost/Price Factor
Volume 3	Small Business Participation Factor
Volume 4	Administrative Volume

L.2.1.2 Each volume shall include a (i) title page, (ii) table of contents, and (iii) list of tables and figures. When applicable, the title page, table of contents, and list of tables and figures are excluded from any page count limit established for a proposal volume. Each page of the proposal shall be numbered, and it is recommended each paragraph of the proposal have a reference number. A list of all attachments and substantiating data shall be provided in the table of contents. The table of contents shall include the following information for each Factor, attachment, and for all substantiating data listed:

- (a) Cross-reference to related Section L paragraph number
- (b) Page number
- (c) File name

CONTINUATION SHEET	Reference No. of Document Being Continued W56HZV-24-R-0035 PIIN/SIIN	Page 33 of 50 MOD/AMD
Name of Offeror or Contractor:		

L.2.1.3 A Proposal Executive Summary or transmittal letter is optional. It will neither be considered as part of the volumes required, nor will it be evaluated. If a Proposal Executive Summary is submitted, it should be no more than five pages in length and be submitted as part of the Administrative volume.

L.2.2 Proposal Format

The proposal shall be submitted in electronic format, as outlined in these instructions.

L.2.2.1 Electronic Files. Each proposal file shall be labeled so it is easily identifiable for evaluation purposes. The proposal electronic files names should not exceed 50 characters in length and does not contain any periods (not including the file extension).

L.2.2.2 Acceptable File Formats. All electronic information provided in response to the solicitation must be provided in Microsoft (MS) Office Suite 2016 compatible or Adobe Acrobat Reader 11 compatible format or except as noted in instructions for individual volumes. For files in PDF format, scanners should be set to 200 dots per inch. The Offeror shall not embed sound or video (e.g., MPEG) files into the proposal files. The proposal shall not contain citations for, or active links to live Internet sites or pages. All information shall be contained within the electronic proposal. Any linked or referenced information that is not contained in the proposal will not be accepted.

L.2.2.3 Unless otherwise specified, it is recommended that the proposal be formatted for 8.5 inch x 11 inch paper with a minimum font size of 10 pt. and with a minimum of 0.5 inch margins. Schedules, drawings and other documents more appropriate to larger size should be formatted for no larger than 8.5 inch x 14 inch dimensions.

L.2.2.4 Provide spreadsheets that include all formulas, function, macros, computations, or equations used to compute the proposed amounts. For each workbook, all Rows, Columns, Cells, and Worksheets are to be visible. Do not include Zero height and zero width rows and columns in Worksheets. Do not format Worksheet cells with the font color equal to the fill color. If Workbooks or Worksheets are password protected, then the passwords must be provided. Do not submit Print image files or pictures or files containing only values. Failure to provide fully functional excel spreadsheets in the proposal may result in the proposal being rejected (See Section M.2.1 (a)).

L.2.2.5 The offeror shall make every effort to ensure that the proposal is virus-free, such as running an anti-virus scan, prior to proposal submission. Proposals (or portions thereof) submitted which indicate the presence of a virus, or which are otherwise rendered unreadable by damage in electronic transit, shall be treated as "unreadable" as described in FAR 15.207(c).

L.2.3 UNCLASSIFIED Proposal Submission Instructions

Proposals shall be submitted in accordance with the below instructions. It is not anticipated that any requested proposal information will be CLASSIFIED. The below are instructions for UNCLASSIFIED proposals only.

L.2.3 UNCLASSIFIED Proposal Submission Instructions

Proposals (including any modifications/revisions) shall be submitted in accordance with the below instructions. It is not anticipated that any requested proposal information will be CLASSIFIED. The below instructions are for UNCLASSIFIED proposals only.

L.2.3.1 Solicitation Module of the Procurement Integrated Enterprise Environment (PIEE)

The proposal shall be submitted through the Solicitation Module of the Procurement Integrated Enterprise Environment (PIEE) suite at <https://piee.eb.mil>. For information on PIEE Solicitation, which includes information on how to submit a proposal, please refer to the web-based training (WBT) at: <https://pieetraining.eb.mil/wbt/> and click on the Solicitation Module. The offeror shall contact the PIEE Help Desk to troubleshoot any technical issues it may experience. The Contracting Officer and Contract Specialist are not able to assist with technical issues.

PLEASE NOTE that once an offer is submitted in the Solicitation Module of PIEE, it cannot be modified or edited. The PIEE Solicitation Module allows an offeror to withdraw its offer and submit a new offer prior to the solicitation closing date/time.

L.2.3.1.1 The offeror is responsible for following the registration instructions found on the PIEE website. It is advised that all appropriate offeror points of contact are registered on the PIEE website based on the associated Commercial and Government Entity (CAGE) code, and the proper roles have been assigned well in advance of the solicitation closing date.

L.2.3.2 It is highly recommended the offeror print or save a screenshot of the submission confirmation to validate the submission was accepted in PIEE Solicitation in response to this solicitation. The Government is not obligated to search for incorrectly submitted proposals in PIEE.

L.2.3.3 In the event that the Solicitation Module is offline, the offeror must obtain Contracting Officer approval to use an alternate submission method prior to the solicitation due date/time. It is recommended that requests for approval of an alternate submission

CONTINUATION SHEET	Reference No. of Document Being Continued W56HZV-24-R-0035 PIIN/SIIN MOD/AMD	Page 34 of 50
---	--	---

Name of Offeror or Contractor:

method be made a minimum of 2 hours before the closing time on the closing date of the RFP.

L.2.3.4 Unless formally approved by the Contracting Officer, pursuant to L.2.3.3 above, no alternate method of proposal submission is authorized.

L.2.3.5 Submission Due Date

The offeror must ensure its proposal, in its entirety, reaches the required destination before the solicitation due date/time established in this solicitation. The lateness rules for submitted proposals are outlined in FAR 52.215-1 "Instructions to Offeror(s) Competitive Acquisitions" and are incorporated into this solicitation.

NOTE: Please note that when submitting through PIEE Solicitation, it may take time for the files to be uploaded and scanned, and digitally signed before submission completion; File size, network connection, connection type, and number of files are factors in the time needed to timely complete its submission, therefore offerors are strongly cautioned when submitting proposals to allow ample time for completion. Offerors should also take into account potential time needed to troubleshoot technical issues directly with the PIEE Help Desk prior to the solicitation closing date and time.

L.2.4 Single Proposal Submission

Offerors are limited to submitting one proposal with one approach to meeting the requirements of this solicitation. An offeror is defined as an entity competing independently that does not share a common parent with any other offeror or, does not have a parent/subsidiary relationship with any other offeror, or is not affiliated with any other offeror. For the purposes of Section L.2.4 (Single Proposal Submission), the Government will consider affiliation to exist if associated business concerns or individuals, directly or indirectly, either controls the other or can control the other (control can exist through common ownership, common management, or a contractual relationship such as a joint venture, where members have the power to control performance of the contract); or a third party controls or can control both.

L.2.5 Organizational Conflict of Interest

L.2.5.1 The provisions of FAR 9.5, Organizational Conflict of Interest (OCI), apply to any award under this Request For Proposal (RFP). Potential offerors should review their current and planned participation in any other Government contracts, subcontracts, consulting, or teaming arrangements where they may be in a position of actual or perceived bias or unfair competitive advantage.

L.2.5.2 Offerors should disclose any potential OCI situations to the Contracting Officer as soon as identified including prior to proposal submission. The disclosure should include the facts and an analysis of the actual or perceived conflict and a recommended approach(s) to neutralize or mitigate the potential conflict. The preferred approach to potential conflicts is to negate/obviate the conflict. Mitigation is considered only if it is not practical to negate/obviate the conflict. The Contracting Officer will promptly respond to resolve any potential conflicts.

L.3 All or None

Offers in response to this solicitation must be submitted for all the requirements identified in the solicitation. Offers submitted for less than all the requirements called for by this solicitation may be rejected or ineligible for award. Proposals that contain alternative terms and conditions may be considered as taking exception to the requirements of the solicitation. See Section M.2.

L.4 Evaluation Factors

Offeror proposals shall address the following Factors:

- a. Experience Factor
- b. Cost/Price Factor
- c. Small Business Participation Factor

L.4.1 Volume 1 Experience Factor Proposal

L.4.1.1 General Information: The below instructions are provided to advise offerors as to the information required by the Government to assess the contractors proposed experience. It is the offeror's responsibility to submit detailed and complete information as required so the Government may evaluate its Experience volume, and imperative that the offeror present its experience in a clear and complete manner. Failure to provide the applicable information may result in an assessment that the referenced experience lacks comparability or recency and be discounted in the evaluation. The Government does not assume the duty to search for data to cure problems it finds in proposals. The burden of providing thorough and complete information remains with the offeror.

L.4.1.2 Definitions used in the Experience Factor:

CONTINUATION SHEET**Reference No. of Document Being Continued**

W56HZV-24-R-0035

Page 35 of 50**PIIN/SIIN****MOD/AMD****Name of Offeror or Contractor:**

L.4.1.2.1 Contract: For the purpose of this Factor, a Contract is defined as a written instrument that requires the performance of a distinct effort and demonstrates the distinct effort was actually performed. Indefinite Delivery Contracts (FAR 16.5), Basic Ordering Agreements (BOA), Blanket Purchase Agreements (BPA), and Federal Supply Schedules (FSS) are written instruments that typically DO NOT demonstrate actual performance, and as such, would not meet the definition of a Contract. Written instruments that could demonstrate actual performance may include a single task or delivery order, a single work directive/technical instruction, or a single definite quantity contract provided it demonstrates a distinct effort was actually performed. If a contract instrument executed under a broad ordering instrument (such as a task or delivery order, etc) also functions as a broad ordering instrument and does not require or demonstrate that a distinct effort be performed (i.e requires other written instruments to execute performance), then this contract instrument would NOT meet the definition of a Contract. An offeror may submit, or the Government may require, written instruments that enhance the Governments understanding of the distinct effort actually performed if it is not identified on the Contract itself. It is incumbent upon the offeror to demonstrate that a distinct effort was actually performed.

L.4.1.2.2 Submission: For the purpose of this Factor, a submission is defined as the offerors proposed historical contractual instrument identified in the Experience Matrix (Attachment 0019). It is incumbent upon the Offeror to ensure each proposed submission meets the definition of a Contract (See L.4.1.2.1). The offerors proposed Experience Matrix (Attachment 0019) will serve as the basis of identifying the Offerors proposed submission(s) for each criteria consideration.

L.4.1.2.2.1 Submission Limits: The offeror is limited to only proposing two submission for each criteria consideration. See L.4.1.6.4.1 for further submission limitations for proposed submissions performed by proposed key subcontractors.

L.4.1.2.2.2 The Government will not evaluate a submission across all criteria considerations. The offeror may propose the same submission for more than one criteria consideration, but it must be proposed under each criteria consideration separately, and it will count toward the submission limit for each criteria consideration separately.

L.4.1.2.2.3 Each proposed submission must have been performed by the offeror as the prime contractor, unless otherwise allowed by L.4.1.6. In this context, the prime contractor is the party that executes an agreement with another party to perform work. Submissions may include foreign, federal, state, local and private industry Contracts. The prime contractor of the proposed submission is NOT required to be a U.S. Government contract holder. Private industry Contract(s) (e.g., an agreement between U.S. Government contract holder and its subcontractor) may be considered as the proposed experience. The Government will not consider the experience of individuals or key personnel. Only corporate experience will be considered.

L.4.1.3 The Government will only consider recent experience in the evaluation. Recent experience is defined as tasks completed on a recent Contract (as defined by L.4.1.2.1 above). Recent Contract(s) are those performed within five years of the date of issuance of this Request for Proposal (RFP).

L.4.1.4 The Government will evaluate the extent to which the proposed recent experience is comparable the following criteria considerations:

(a) Consideration #1: Performance of Total Package Fielding (TPF) and De-processing activities for two or more fielding missions, at different locations simultaneously, for military ground combat or tactical vehicles across a consecutive 12 month period at to ensure vehicle is fully operational IAW the Army Maintenance Standard as per AR 750. TPF and deprocessing activities performed IAW AR 770-2 and DA PAM 770-2 for this effort involve the following: conducting baseline inspection and correct faults, perform sustainment/routine maintenance as needed, deprocessing vehicles (inspection, transit damage repair, cleanliness, unscheduled maintenance, install of mission equipment packages), execution of loading/offloading/movement of vehicle, to include rail and port operations, and vehicle hand-off to unit(s), warehouse supply support, inventory management, handling/shipping of equipment and material, packing and assembly of TPF packages (e.g. Basic Issue Items (BII), Components of End Item (COEI), Authorized Allowance List (AAL), TMs, and Authorized Stockage List (ASL)) to the Gaining Unit.

In order to be considered in the evaluation, a key subcontractor for this consideration must represent a minimum of 25% of the total labor cost (no fee) per ordering period, for all five ordering periods across CONUS/CONUS-OT and OCONUS for the following labor categories: Heavy Equipment Mechanic, Material Handling Specialist, and Supply/Procurement Specialist.

(b) Consideration #2: Performance of New Equipment Training (NET) conducted on military ground combat or tactical vehicles at two or more locations, concurrently, on at least a combined 100 vehicles, or at least a combined 300 users trained, in a consecutive 12 month period. NET training activities for this effort involve the scheduling and conduct of both full vehicle Operator Training (OPNET) and Field Maintenance NET (FMNET) utilizing the Government provided POI, package and delivery of course material, provide necessary recommendation/analysis for updates to the POI, and performing any necessary vehicle repairs during course instruction.

In order to be considered in the evaluation, a key subcontractor for this consideration must represent a minimum of 25% of the total labor cost (no fee) per ordering period, for all five ordering periods across CONUS/CONUS-OT and OCONUS for the following labor categories: Instructor-Supervisor and Instructor.

(c) Consideration #3: General Maintenance (both Scheduled and Unscheduled) that involved the knowledge and use of technical manuals or IETMS, of at least a combined total of 350 military ground combat or tactical vehicles, performed at four or more locations concurrently, both within the United States and internationally across a consecutive 12-month period, ensuring vehicles are maintained

CONTINUATION SHEET	Reference No. of Document Being Continued W56HZV-24-R-0035 PIIN/SIIN MOD/AMD	Page 36 of 50
---	--	--

Name of Offeror or Contractor:

to the Army Maintenance standard as per AR 750-1 and maintenance records maintained as per DA PAM 750-8.

In order to be considered in the evaluation, a key subcontractor for this consideration must represent a minimum of 25% of the total labor cost (no fee) per ordering period, for all five ordering periods across CONUS/CONUS-OT and OCONUS for the following labor categories: Heavy Equipment Mechanic.

(d) Consideration #4: Performance of MWO installation processes IAW AR 750-10 on at least 100 military ground combat or tactical vehicles, in a consecutive 12 month period that involve an installation time of a minimum of 80 man-hours per vehicle. MWOs installations must have involved hardware installation, and may also include welding or software updating, downloading and/or troubleshooting. This process also involves pre-installation inspection process based upon the vehicles technical manual to determine system functionality/ability to accept MWO prior to MWO installation and formal reporting of completed MWO installations.

In order to be considered in the evaluation, a key subcontractor for this consideration must represent a minimum of 25% of the total labor cost (no fee) per ordering period, for all five ordering periods across CONUS/CONUS-OT and OCONUS for the following labor categories: Modified Work Orders, Welder, and Software.

L.4.1.5 Experience Factor Proposal Information Requested. It is incumbent upon the offeror to substantiate the comparability of the proposed experience. The offerors proposal shall substantiate what executed work was performed under each proposed submission by providing the requested information below (NOTE: Failure to provide the information requested below may result in the Government not considering the proposed experience, reference M.4.1.1.3).

L.4.1.5.1 The offeror shall provide a completed Experience Matrix (Attachment 0019). Failure to provide a completed Experience Matrix (Attachment 0019) may result in the proposal being rejected (See M.2.1(a)).

L.4.1.5.2 For each submission proposed in the Experience Matrix (Attachment 0019), provide the following information, which are recommended to be submitted as stand-alone attachments within this Factor volume:

(a) A copy of the executed contractual instrument cover sheet(s) and/or other content that identifies the Contract number, entities/parties of the proposed submission and the execution date.

(b) A copy of the complete Performance Work Statement (PWS) or SOW, and/or other pertinent section(s) of the Contract that substantiate the performed work.

(c) A copy of the submissions period of performance and copies of any other information necessary to substantiate recency (which may include complete copies of executed modifications to extend the period of performance /performance schedule, exercise an option/option period(s), etc.).

*** (d) The offeror shall provide a written narrative. The written narrative shall identify each proposed submission separately and shall describe each proposed submissions comparability to the respective criteria consideration listed in Section L.4.1.4 for which it is proposed. Unclear or vague assertions of experience that are not clearly or directly attributable to the proposed submission may not be considered in the evaluation. The offeror shall provide sufficient explanation within the written narrative of any additional documentation provided not explicitly requested above to describe the purpose.

Note: Do not provide a breakdown of comparability of all past Contract requirements to all current RFP requirements, only discuss the comparability the executed work performed to the proposed criteria consideration. To the extent practicable, when citing specific work performed on the proposed submission, provide references to the specific locations within the scope or other substantiating documents, such as paragraph or page number, when possible. When applicable, in its description, the offeror should specify the location in the proposal (to include filename or document reference with page and paragraph of the past contract information) that further substantiates comparability if stand-alone attachments are submitted in this volume.

*** Page Limit: An eight (8) page limit applies to the written narrative for each proposed submission. This page limit does not apply to any table of contents or cover page, any substantiating documents submitted in response to Section L.4.1.5, or other requested documentation or narratives in Section L.4.1.6. Offerors are cautioned that the Government will not review any pages beyond eight (8) pages for any proposed submission.

(e) The offeror may submit additional documentation to further substantiate its proposed experience, such as documentation of related contractual instruments that enhance the Governments understanding of the work performed.

L.4.1.6 The Government may consider the experience of an entity other than the prime offeror who performed as the prime contractor subject to the following (NOTE: Failure to provide the information requested below may result in the Government not considering the proposed experience, reference M.4.1.1.3 and M.4.1.1.4):

L.4.1.6.1 Associated Corporate Entities. The Government may consider the experience of an associated entity if the offeror successfully demonstrates the associated entity will perform significant and critical aspects of the contract if awarded.

CONTINUATION SHEET	Reference No. of Document Being Continued W56HZV-24-R-0035 PIIN/SIIN	Page 37 of 50 MOD/AMD
Name of Offeror or Contractor:		

L.4.1.6.1.1 An associated entity may include a parent company, separate corporate division within the same parent company, subsidiary company, a legally affiliated company, etc. The offeror shall provide to the Government a narrative that explains the offerors relationship to the associated entity. The offeror shall support the narrative with legal documentation, including but not limited to corporate papers, establishing the legal nexus between the offeror and the associated entity.

L.4.1.6.1.2 The offeror shall provide to the Government a copy of a written agreement between the associated entity and the offeror describing what the associated entity will provide and/or be responsible for, and a written narrative that explains the significant and critical aspects the associated entity will provide to the proposed effort. This may include a description of the associated entitys resources, such as its workforce, facilities, and/or other resources that will be provided or relied upon in the proposed effort.

L.4.1.6.2 Predecessor Companies. The Government may consider the experience of a predecessor company if the offeror successfully demonstrates the experience of the predecessor company is reasonably predictive of the offerors performance under the proposed effort.

L.4.1.6.2.1 A predecessor company may include a company which was acquired by the offeror or merged with the offeror. It may also include other instances where the predecessor company was reorganized, restructured, or otherwise altered. A predecessor company does not include an entity which remains separate and distinct from the offeror. The offeror shall provide to the Government a narrative that explains the offerors relationship to the predecessor company. The offeror shall support the narrative with documentation evidencing the offerors status as the successor company.

L.4.1.6.2.2 Offeror shall provide to the Government a narrative that explains why the predecessors experience is predictive of the offerors performance under the proposed effort. Evidence may include, but is not limited to, continuity of operations such as the continued employment of the predecessors employees and the transfer of assets including buildings, furnishings, and fixtures.

L.4.1.6.3 Individual Partners of a Joint Venture. If the offeror is a Joint Venture, the Government may consider the experience of each partner of the Joint Venture and any work performed by the Joint Venture itself previously. The offeror must successfully demonstrate that the Joint Venture partner will perform significant and critical aspects of the contract, if awarded.

L.4.1.6.3.1 Offeror shall provide to the Government a narrative that discloses the individual partners of the Joint Venture and shall provide documentation evidencing the Joint Venture

L.4.1.6.3.2 Offeror shall provide to the Government a narrative that explains the significant and critical aspects the Joint Venture partner will perform to the proposed effort. This may include a description of the partners resources, such as its workforce, facilities, and/or other resources that will be provided or relied upon in the proposed effort.

L.4.1.6.4 Proposed Key Subcontractor:

A proposed key subcontractor is defined in differently and distinctly for each Experience Factor criteria consideration above (See L.4.1.4 (a)-(d)). The Government may consider the experience of a proposed key subcontractor in the Experience Factor evaluation subject to the following:

L.4.1.6.4.1 For any individual criteria consideration (See L.4.1.4 (a)-(d)), offerors are limited to proposing no more than one submission where its proposed key subcontractor performed as the prime contractor, and no more than two submissions across the entire Experience Factor.

L.4.1.6.4.2 The proposed key subcontractor shall meet the dollar threshold criteria for the Experience criteria consideration for which its proposed (NOTE, proposed key subcontractor is defined differently for each consideration, See L.4.1.4 (a)-(d)). In order to substantiate the proposed key subcontractor meets the established definition, the offeror shall provide a cross-reference to where the cost/price information can be found in its submitted Cost/Price Factor Volume. Detail what labor categories and ordering period/option years within the GFPM the subcontractor is included.

L.4.1.6.4.3 The offeror shall provide a brief written narrative describing its performance approach for the proposed key subcontractor for whom it is submitting experience information will perform under this contract. The offeror shall demonstrate how, and the extent to which the resources of the experience of its key subcontractor cited in the proposal will be utilized for the same or similar SOW activities of this effort.

L.4.1.6.4.4 The offeror shall submit an executed written agreement or a bilaterally signed contract with the proposed key subcontractor that substantiates the activities to be performed by the subcontractor under this effort.

L.4.2 Volume 2 Cost / Price Factor

IAW FAR 15.403-5(a)(1), certified cost or pricing data is not required for initial proposal submission. However, after initial proposal submission, if only one offer is received, the Government reserves the right to request certified cost or pricing data IAW DFARS 252.215-7008. In the event certified cost or pricing data is required, the offeror may submit a written request for exception based on the applicable clauses contained herein.

CONTINUATION SHEET	Reference No. of Document Being Continued W56HZV-24-R-0035 PIIN/SIIN	Page 38 of 50 MOD/AMD
Name of Offeror or Contractor:		

Do not enter any proposed prices into Section B of the RFP.

L.4.2.1 General Information. The Cost/Price Factor volume preparation instructions set forth herein are applicable to the Prime Offeror and any proposed Subcontractors.

L.4.2.1.1 Table of Contents. The Offeror shall provide a table of contents showing each file submitted as part of the Cost/Price Factor with a short description of the contents of the file.

L.4.2.1.2 The Cost/Price Factor includes five parts, as follows:

Part One - Prime Offeror Attachment 0015 - Government Format Pricing Model (GFPM)

Part Two Subcontractors Attachment 0016 Government Format Pricing Model Subcontractors (GFPM-Subs)

Part Three - Prime Offeror and Subcontractors - Cost Narrative including Basis of Estimate for all proposed costs.

Part Four Prime Offeror - Offeror Format Pricing Model (OFPM) IAW the Offerors normal accounting practices. The Offeror shall include a roadmap tracking differences between the OFPM and the GFPM.

Part Five Prime Offeror and Subcontractors - Defense Contract Audit Agency (DCAA) and Defense Contract Management Agency (DCMA) information.

L.4.2.1.3 The Government has established direct labor rate floor rates that, by definition, are realistic. The GFPM and GFPM-Subs will auto-calculate the proposed direct labor rate as the floor rate in instances where the Prime Offeror or Subcontractor proposes a direct labor rate below the floor rate. If the GFPM or GFPM-Subs are modified in any way that results in corruption of the auto-calculation, any direct labor rates proposed below these Government established floor rates will be increased to the Government established floor rate through a cost realism adjustment.

L.4.2.1.4 The Government established direct labor floor rates are for evaluation purposes only and are not contractually binding. A successful offeror is allowed to hire and retain employees at salaries and resultant direct labor rates below the floor rates, but at or above any required Wage Determination rates established by the DOL (where applicable). The ceiling rates calculated within the prime offerors proposal and GFPM are contractually binding. The successful contractor cannot exceed prime and subcontractor ceiling rates in performance.

L.4.2.2 Proposal Structure

L.4.2.2.1 Offerors shall propose Cost Plus Fixed Fee (CPFF) Level of Effort (LOE) Fully Burdened Labor Rates (FBLR). Sufficient detail shall be included to allow the Government to evaluate the Offeror's cost/price proposal for reasonableness and realism of the CPFF FBLRs. Prime Offerors shall show complete development of the elements of its FBLRs in the GFPM and OFPM. Subcontractors shall show complete development of the elements of its FBLRs in the GFPM-Sub. Offerors may submit any other additional cost/price and financial information considered to be helpful in the Government's evaluation of the cost/price proposal.

L.4.2.2.2 The Offeror shall provide all costs and prices in U.S. dollars only, including costs and prices for the Prime Offeror and any potential Subcontractors.

L.4.2.2.3 All formulas used in the GFPM (Microsoft Excel spreadsheets) shall be clearly visible in the individual cells and verifiable. Whereas linking among the spreadsheets is necessary, use of external links (source data not provided) of any kind is prohibited. The GFPM, OFPM, and all other associated workbooks/files shall not be locked/protected or secured by passwords by the Offeror.

L.4.2.2.4 The Government may use other resources in the evaluation of the Cost/Price Factor, including DCAA and DCMA. In addition to the information identified below, the Government reserves the right to request additional data or a more detailed price breakdown to support a determination of reasonableness or realism.

L.4.2.3 Part One - Government Format Pricing Model (GFPM) Workbook.

L.4.2.3.1 The Prime Offeror shall complete Attachment 0015 - GFPM IAW the Instructions tab in the attachment.

L.4.2.3.2 Within the GFPM, on the Minimum Qualifications tab, Prime Offerors shall certify that it will provide employees (Prime and Subcontractor employees) that meet or exceed the minimum education/experience requirements identified by the Government for each labor category.

L.4.2.3.3 The Government requirement is for the direct labor categories necessary to complete the work required under this effort. These positions are divided between CONUS & OCONUS locations as described in the scope within Section C and the Minimum Qualifications within Section H.

CONTINUATION SHEET	Reference No. of Document Being Continued W56HZV-24-R-0035 PIIN/SIIN	Page 39 of 50 MOD/AMD
Name of Offeror or Contractor:		

L.4.2.3.4 Offerors may use what it considers commonly used formulas such as VLOOKUP, IF, IFERROR, COUNT, COUNTIF, SUMIF, SUMIFS, ROUND, and Inequalities in its OFPM Spreadsheets; however, the GFPM should be self-contained in order for the Government Evaluator to trace simple formulas and lower the risk of misinterpretation of the data provided. Simple formulas like +, -, *, /, sum, etc. are preferred in order to assist the Government with understanding how the proposed costs were developed.

L.4.2.3.5 The GFPM is locked in certain areas where cells cannot be modified. There may be instances where the GFPM is not consistent with the Offerors accounting system in relation to application of indirect rates. In such cases, the Offeror may submit additional cost data in its own format, along with its OFPM and Cost Narrative, to further justify the proposed single elements of costs. Offerors should also provide a roadmap demonstrating how the OFPM reconciles with the GFPM.

L.4.2.3.6 Offerors shall not alter the GFPM file formats except in cells reserved for the Offeror (which are highlighted in yellow and are typically associated with developing the Total Proposed Price).

L.4.2.3.7 Direct Labor Rates. The Government has established direct labor rate floor rates that, by definition, are realistic. The GFPM will auto-calculate the proposed direct labor rate as the floor rate in instances where the Prime Offeror or Subcontractor proposes a direct labor rate below the floor rate. If the GFPM is modified in any way that results in corruption of the auto-calculation, any direct labor rates proposed below these Government established floor rates will be increased to the Government established floor rate through a cost realism adjustment.

L.4.2.3.7.1 Proposed labor rates shall include all reportable wages and any non-discretionary incentives that the Offeror determines is necessary and complies with FAR 31.205-6.

L.4.2.3.7.2 Recruitment and Retention Incentives for OCONUS labor categories, designed to recruit employees to posts where living conditions may be difficult or dangerous, are not included in ODCs / Travel and shall be proposed in labor costs. Post Hardship Differential and Danger Pay are considered recruitment and retention allowances. The OCONUS and OCONUS-Iraq Government established direct labor floor rates include Post Hardship Differential and Danger Pay.

L.4.2.3.7.3 The Government requires substantiation for all labor rates. The proposed rates shall be in line with justifying supporting data (incurred cost data for similar contract, redacted payroll data, salary survey data, Service Contract Act Wage Determination (SCA-WD) criteria, Forward Pricing Rate Proposals (FPRP), DCMA approved Forward Pricing Rate Recommendations (FPRR) / Forward Pricing Rate Agreements (FPRA), etc.) for each labor category. The Offeror shall provide a detailed crosswalk between all provided justifying data and the labor categories requested under this effort. For purposes of this solicitation, the SCA-WD criteria utilized shall be Wage Determination No. 2015-0025, Nationwide.

L.4.2.3.8 Ceiling Rates. The Government is requiring Contractors to propose a cost ceiling on their proposed Fully Burdened Labor Rates (FBLRs), less fee, where the ceiling is equal to the proposed FBLR (less fee) plus 10% for each CONUS labor category or 20% for each OCONUS labor category.

L.4.2.3.8.1 Prime Offeror proposed FBLRs, less fee, plus 10% CONUS or 20% OCONUS shall be Ceiling Rates for each designated Period of Performance (PoP), and the successful Offeror may not invoice rates that are higher than these ceiling rates in each PoP. The Prime Ceiling Rates tab in the GFPM will auto-calculate a ceiling using the Prime Offeror proposed FBLR, less fee, and adding 10% for CONUS labor categories or 20% for OCONUS labor categories. Offerors should ensure that the Ceiling Rates can absorb any changes in Direct and Indirect Rates over the entire PoP.

L.4.2.3.8.2 Subcontractor proposed FBLRs, less fee, plus 10% CONUS or 20% OCONUS shall be Ceiling Rates for each designated Period of Performance (PoP), and the successful Offeror may not invoice rates that are higher than these ceiling rates in each PoP. The Subcontractor Ceiling Rates tab in the GFPM will auto-calculate a ceiling using the Subcontractor proposed FBLR, less fee, and adding 10% for CONUS labor categories or 20% for OCONUS labor categories. Subcontractors bid as Fixed Rates, including but not limited to FFP-LOE, Labor-Hours, Time and Material (T&M), are expected to be fixed over the life of the contract and proposed Subcontractor Fixed Rates will be added to Section H, Special Instructions, of the resulting task order. However, in the event of unforeseen circumstances related to subcontractors, the ceiling rates calculated in the GFPM per labor category apply for any subcontractor who performs work under the proposed subcontractor allotted labor categories. Offerors should ensure that the Ceiling Rates can absorb any changes in Subcontractor rates over the entire PoP.

L.4.2.3.9 Subcontractors. If Subcontractor labor is proposed, the Prime Offeror is responsible for ensuring that the Subcontractor provides a full and complete labor rate build that provides complete transparency for the direct labor rate component and each indirect rate applied to it along with profit or fee, regardless of contract type. The labor rate build shall be provided by all Subcontractors within the GFPM-Subs to include all formulas that demonstrate how the fully burdened labor rate is computed. Subcontractors may submit their un-sanitized cost proposals electronically IAW L.2.3.

L.4.2.3.9.1 Subcontractors that have fixed price agreements with Prime Offeror may propose Subcontractor fully burdened labor rates (FBLRs) that are fixed rates that are not to be exceeded regardless of actual cost.

L.4.2.3.9.2 All proposed Subcontractor FBLRs (whether Fixed Rates or not) shall be justified by a full labor buildup, detailing all

CONTINUATION SHEET	Reference No. of Document Being Continued W56HZV-24-R-0035 PIIN/SIIN MOD/AMD	Page 40 of 50
---	--	---

Name of Offeror or Contractor:

elements of cost that comprise the proposed FBLRs IAW the GFPM-Subs. Any proposed Subcontractor Fixed Rates and associated hours will be added to Section H, Special Instructions, of the resulting task order.

L.4.2.3.10 For evaluation purposes only, the Government has pre-populated Prime direct labor escalation in the GFPM using the following rates: Ordering Period Two at 3.0%, Ordering Period Three at 2.7%, Ordering Period Four at 2.7%, and Order Period Five at 2.7%. Offerors can propose alternative escalation factors, however, any proposed escalation less than the Government pre-populated factors for each Ordering Period is unallowable.

L.4.2.3.11 The Government has provided Government plug cost numbers for Other Direct Costs (ODCs) and Travel. The Prime Offeror may propose an indirect ceiling rate that will auto calculate the amount of proposed indirect expense to be included in the Total Evaluated Price. This indirect rate is inclusive of any Prime and Subcontractor indirect expense that may be applied and reimbursed. Indirect rates for ODCs and Travel will be included in Section H of the resulting contract and will be inclusive of the ceiling rate that may be allocated to ODC and Travel during the entire Period of Performance. Furthermore, no Profit or Fee is allowable on ODC and Travel expenses.

L.4.2.3.11.1 The ODC/Travel plug numbers include Cost of Living Allowance (COLA), Living Quarters Allowance, Transfer Allowance, and other costs as defined in SOW Section C. Allowable and allocable taxes arising from OCONUS work are also included in ODC/Travel and shall not be proposed in labor. Recruitment and Retention Incentives for OCONUS labor categories, designed to recruit employees to posts where living conditions may be difficult or dangerous, are not included in ODCs/Travel. Post Hardship Differential and Danger Pay are considered recruitment and retention allowances.

L.4.2.3.12 Defense Base Act (DBA) Insurance (Cost Only with No Indirect Expense or Fee). The Prime Offeror shall enter its estimated DBA Insurance Amount for itself and for any proposed Subcontractor. The prime offeror shall instruct its subcontractor that it may not include DBA Insurance in its FBLRs and it must be segregated from labor so that the prime can be reimbursed by the Government for its subcontractor DBA Expense. The estimated amount may not have indirect expense or fee added to it and, for evaluation purposes, this DBA Insurance Amount will not be included in the Total Evaluated Price. Prime Offerors shall demonstrate on the DBA Tab of the GFPM or within its OFPM how the estimated DBA Insurance Amount was calculated. Subcontractors shall demonstrate on the DBA Tab of the GFPM-Subs how the estimated DBA Insurance Amount was calculated, if applicable. Prime Offerors shall provide copies of its DBA Insurance Quotations for itself and any applicable subcontractors.

L.4.2.3.13 Reconciliation Differences. If reconciliation differences exist between the Prime Contractors GFPM and any additional Offeror format cost data (Prime Contractor or Subcontractor), the Government will utilize the data entered into the Prime Contractors GFPM as the basis for evaluation.

L.4.2.3.14. Phase-In: A 6 month Phase-In period has been identified. The Offeror shall submit a Firm Fixed Price (FFP) Phase-In inclusive of all costs that do not correspond to the labor categories in Attachment 0015 - GFPM and that is inclusive of Travel and ODCs associated with its Phase-In. The successful offeror is authorized to incur labor costs under the appropriate Cost Plus Fixed Fee Labor CLINs when the employee starts work at the contract location. ODC and Travel costs may be incurred under the appropriate Cost, no fee ODC/Travel CLINs when the Phase-In periods ends. Offerors shall provide a narrative explaining its proposed FFP Phase-In.

L.4.2.4 Part Two Government Format Pricing Model Subcontractors (GFPM-Subs)

L.4.2.4.1 All Subcontractors shall complete Attachment 0016 GFPM-Subs IAW the Instructions tab in the attachment.

L.4.2.4.2 Direct Labor Rates. The Government has established direct labor rate floor rates that, by definition, are realistic. The GFPM-Subs will auto-calculate the proposed direct labor rate as the floor rate in instances where the Subcontractor proposes a direct labor rate below the floor rate. If the GFPM-Subs is modified in any way that results in corruption of the auto-calculation, any direct labor rates proposed below these Government established floor rates will be automatically increased to the Government established floor rate through a cost realism adjustment.

L.4.2.4.2.1 Proposed labor rates shall include all reportable wages and any non-discretionary incentives that the Subcontractor determines is necessary and complies with FAR 31.205-6.

L.4.2.4.2.2 Recruitment and Retention Incentives for OCONUS labor categories, designed to recruit employees to posts where living conditions may be difficult or dangerous, are not included in ODCs / Travel and shall be proposed in labor costs. Post Hardship Differential and Danger Pay are considered recruitment and retention allowances. The OCONUS and OCONUS-Iraq Government established direct labor floor rates include Post Hardship Differential and Danger Pay.

L.4.2.4.2.3 The Government requires substantiation for all labor rates. The proposed rates shall be in line with justifying supporting data (incurred cost data for similar contract, redacted payroll data, salary survey data, (SCA-WD) criteria, (FPRP), DCMA approved(FPRR) / Forward Pricing Rate Agreements (FPRA), etc.) for each labor category. The Offeror shall provide a detailed crosswalk between all provided justifying data and the labor categories requested under this effort. For purposes of this solicitation, the SCA-WD criteria utilized shall be Wage Determination No. 2015-0025, Nationwide.

L.4.2.4.3 All proposed Subcontractor FBLRs (whether Fixed Rates or not) shall be justified by a full labor buildup, detailing all

CONTINUATION SHEET	Reference No. of Document Being Continued W56HZV-24-R-0035 PIIN/SIIN MOD/AMD	Page 41 of 50
---	--	---

Name of Offeror or Contractor:

elements of cost that comprise the proposed FBLRs as comprised in the GFPM-Subs. Any proposed Subcontractor Fixed Rates will be added to Section H, Special Instructions, of the resulting TO.

L.4.2.4.4 Escalation. For evaluation purposes only, the Government has pre-populated Subcontractor direct labor escalation in the GFPM-Subs using the following rates: Ordering Period Two at 3.0%, Ordering Period Three at 2.7%, Ordering Period Four at 2.7%, and Order Period Five at 2.7%. Subcontractors can propose alternative escalation factors, however, any proposed escalation less than the Government pre-populated factors for each Ordering Period is unallowable.

L.4.2.4.5 Defense Base Act (DBA) Insurance (Cost Only with No Indirect Expense or Fee). Subcontractors shall demonstrate on the DBA Tab of the GFPM-Subs how the estimated DBA Insurance Amount was calculated, if applicable. DBA Insurance shall not be included in any FBLRs, and it must be segregated from labor so that the Prime can be reimbursed by the Government for DBA Expenses. The estimated amount may not have indirect expense or fee added to it and, for evaluation purposes, this DBA Insurance Amount will not be included in the Total Evaluated Price. Subcontractors shall provide copies of its DBA Insurance Quotations.

L.4.2.4.6 Subcontractors may submit their un-sanitized cost proposals electronically IAW L.2.3.

L.4.2.5 Part Three - Cost Narrative and Basis of Estimate.

L.4.2.5.1 Prime Offerors and Subcontractors shall provide a cost narrative explaining their Basis of Estimate for the following:

L.4.2.5.1.1 All proposed labor rates including explanations for the various elements of cost proposed in the labor buildup on the period of performance tabs of the GFPM or GFPM-Subs.

L.4.2.5.1.2 All proposed indirect costs and rates used in the CPFF Prime Contractor labor build-up and in the Subcontractor Prime Add-Ons section (fringe benefits, including any paid time off, labor overhead, G&A, material handling, FCCOM, etc.) of the GFPM and all proposed indirect costs and rates used in the labor buildup of the GFPM-Subs.

L.4.2.5.1.2.1 Offerors (Prime & Sub) proposing indirect rates utilizing a Forward Pricing Rate Proposal (FPRP), Forward Pricing Rate Recommendation (FPRR), or Forward Pricing Rate Agreement (FPRA) shall provide the FPRP/FPRR/FPRA rates and a copy of the official FPRP, FPRR, or FPRA. Any differences between the indirect rates included in the FPRP/FPRR/FPRA and the proposal shall be fully explained and supported.

L.4.2.5.1.2.2 Offerors (Prime & Sub) proposing indirect rates utilizing DCAA/DCMA established Provisional Billing Rates shall provide (a) the approved rates; (b) a detailed narrative supporting how the approved rates were used to develop the proposed indirect rates; (c) the previous three years of incurred indirect rate data for each indirect rate; and (d) a copy of the official DCAA/DCMA letter head showing the established Provisional Billing Rates.

L.4.2.5.1.2.3 For offerors (Prime & Sub) that are not basing the proposed indirect rates on FPRP, FPRR, FPRA, or established Provisional Billing Rates, the Offeror shall provide the base and pool amount for each proposed indirect rate, and the previous three years incurred indirect rate data (including all base and pools for each rate). Offerors shall provide narratives and supporting calculations on differences between the historical pool and base amounts and the projected pool and base amounts utilized within the proposed indirect rates. Pool amounts shall include a breakout of all individual expense pool elements of cost that equate to the total pool amount of each indirect rate. Base amounts shall include a breakout of all elements and amounts that equate to the total base of each indirect rate. Pool and base amounts within the proposed indirect rates, with the inclusion of any assumptions impacting business base and/or pool expenses, shall be traceable to historical pool and base amounts with supporting calculations. The Offeror shall provide any assumptions it made when projecting its proposed indirect rates within its proposal. Examples include, but are not limited to, references to anticipated contracts with projected dollar values, historical probabilities of obtaining competitive awards, financial data, and supporting narratives to support pool and base estimates that deviate from historical incurred data.

L.4.2.5.1.2.4 The Prime Offeror shall explain in its Cost Narrative the indirect rate ceiling that it proposed on ODC and Travel. The Prime Offeror shall acknowledge in its Cost Narrative that its Subcontractors will be reimbursed for actual costs and will share in any indirect rate that the Prime Offeror receives based on the indirect rate ceilings proposed. In other words, the Prime shall be responsible for covering any Subcontractor indirect expenses using the funds available from the Prime Contractors indirect rate ceilings. The combination of Subcontractor and Prime Contractor indirect expenses may not exceed the proposed indirect rate ceiling. No Profit or Fee is allowable on ODC and Travel expenses.

L.4.2.5.1.3 If the Prime Offerors proposed labor includes Subcontractor costs, the Prime Offeror shall explain how the Subcontractor rates were determined to be reasonable and realistic. If more than one Subcontractor is proposed for a labor category, the Prime Offeror shall explain how the rate was blended together, the identity of the Subcontractors, and the type of subcontract agreement with the Prime Offeror.

L.4.2.5.1.3.1 In addition, if Subcontractor Fixed Rates are proposed, the Prime Offeror shall provide proof that the Subcontractor has agreed not to exceed the proposed Fixed Rate(s), regardless of actual cost. (A letter from the Subcontractor may serve as proof that the Subcontractor has agreed to the Fixed Rates.)

CONTINUATION SHEET	Reference No. of Document Being Continued W56HZV-24-R-0035 PIIN/SIIN	Page 42 of 50 MOD/AMD
---------------------------	--	--

Name of Offeror or Contractor:

L.4.2.5.1.4 There is no page limitation for the cost narrative. Spreadsheets supporting the development of indirect rates can be included in the OFPM or as a separate Excel Workbook.

L.4.2.6 Part Four Offeror Format Pricing Model (OFPM).

L.4.2.6.1 Prime Offeror shall submit a time-phased labor buildup in its own format, showing how the proposed Cost Plus Fixed Fee rates were developed. The labor buildup should show the elements of cost (direct labor, fringe, overhead, G&A) used to develop the composite rate and also explain the Basis of Estimate in the Cost Narrative. Within the OFPM, Offerors shall provide clear evidence that depicts how indirect expenses will be allocated on the various allocation bases that the Prime Offeror uses IAW its normal accounting procedures. If unexplained and unsupported reconciliation differences exist between the Prime Offerors GFPM and OFPM, the Government will utilize the Prime Offerors GFPM as the basis for evaluation and basis for calculating the total proposed price.

L.4.2.7 Part Five DCAA and DCMA Information.

L.4.2.7.1 Offerors and Subcontractors shall include their points of contact for both DCAA and DCMA. Additionally, Offerors and Subcontractors shall include copies of any FPRP submitted to DCAA/DCMA, FPRR, FPRA, or DCAA/DCMA Provisional Billing Rates.

L.4.2.7.2 The DCAA/DCMA point of contact information shall be included as part of the Offerors cost narrative submission. Forward pricing data or Provisional Billing Rate data may be submitted as part of the Offerors cost narrative or as a separate document (with supporting Excel files) directly to the Government. Pool and base or historical rate information may be submitted as part of the OFPM or as a separate Microsoft Excel file directly to the Government.

L.4.2.8 Use of Existing Government-Furnished Property (if applicable).

L.4.2.8.1 If the Prime Offeror is proposing to utilize Government-Furnished Property (GFP) that it received on another Government contract in performance of this contract on a rent-free basis, then the offeror must provide a list of GFP that includes the following for each item:

- Acquisition cost;
- Age;
- Type of GFP;
- The accountable contract under which the property is held;
- The dates during which the property will be available for use (including the first, last, and all intervening months) and, for any property that will be used concurrently in performing two or more contracts, the amounts of the respective uses in sufficient detail to support prorating the rent;
- The amount of rent that would otherwise be charged in accordance with FAR 52.245-9, Use and Charges;
- Evidence that it obtained authorization for its rent-free use from the contracting officer having cognizance of the property; and
- Any additional information required IAW Attachment 0002 Government Furnished Property List.

L.4.2.8.2 The offeror is to obtain any rental equivalent amounts (or any other data required) from the cognizant contracting officer necessary to determine the GFP Price Adjustment calculated IAW Attachment 0002 Government Furnished Property list.

L.4.2.8.3 The offeror shall identify the total GFP Price Adjustment (for all classifications of property) that it calculated IAW Attachment 0002 Government Furnished Property List, and provide all calculations showing how the total GFP Price Adjustment was developed. If applicable, the offeror is to also identify the rationale for any allocations to each CLIN.

L.4.3 Volume 3 Small Business Participation Factor

L.4.3.1 Application: The Small Business Participation proposal submission instructions apply to every Offeror (U.S. and non-U.S.), regardless of size, socioeconomic status, or locations of working facilities or headquarters.

L.4.3.2 Small Business Participation Factor Workbook (Attachment 0017) and Small Business Participation Factor Workbook Instructions (Attachment 0018):

- a. All Offerors, including Offerors who are themselves small business concerns for the North American Industry Classification System (NAICS) code assigned to this requirement, are required to complete the SBP Factor Workbook using the detailed SBP Factor Workbook Instructions. The Offerors submission of the SBP Factor Workbook is the Offerors proposed extent of Small Business Participation in each Small Business category.
- b. An Offeror shall fill out the SBP Factor Workbook with goals for this solicitation specifically, even if it is an Other-Than-Small-Business (OTSB) submitting a Comprehensive Subcontracting Plan.
- c. When filling in the Workbook, the Offeror shall include the dollars for prime contractor participation and subcontractor participation that are a part of the Total Contract Amount. The Total Contract Amount for the purposes of this Factor is defined as:

CONTINUATION SHEET	Reference No. of Document Being Continued W56HZV-24-R-0035 PIIN/SIIN	Page 43 of 50 MOD/AMD
---------------------------	--	--

Name of Offeror or Contractor:

The total proposed price, as calculated by GFMP (Attachment 0015), Totals Tab, Cell F60.

d. The Offeror shall use the automatic Roll-Up tab in the Workbook to check for consistency between the SBP Factor Submittal and other parts of the proposal (i.e Cost/Price Factor), and (for offerors who are OTSB) the submitted Subcontracting Plan.

L.4.3.3. Registrations, Agreements, and Certifications:

a. The Government may use the System for Award Management (SAM) to verify size, ownership, and any other information provided about the prime and subcontractors listed in the proposal. The Government may use the Small Business Administration (SBA) Dynamic Small Business Search (DSBS) Database to verify any SBA certifications for 8(a), 8(a) JV, and WOSB/EDWOSB SBs (prime contractor and/or subcontractor). Any proposed HUBZone SBs (prime contractor and/or subcontractor) must be verifiable in the Small Business Administration (SBA) Dynamic Small Business Search (DSBS) Database. Offerors should be aware of how SB concerns are defined (see Small Business Participation Factor Workbook Instructions (Attachment 0018) and 13 CFR 121, Small Business Size Regulations). Offerors are advised to review 13 CFR 121.103, "How Does SBA Determine Affiliation; FAR 2.101, Small Business Teaming Arrangement; and FAR 19.101, Affiliates.

b. Failure to register in SAM for the corresponding NAICS code identified in FAR clause 52.204-8 prior to submitting a proposal for this solicitation may preclude an award being made to your company.

c. Joint Venture Registration. If the Offeror is a small business joint venture, the joint venture shall be registered in SAM under its own name in accordance with 13 CFR 121.103(h). In addition, each member in a small business joint venture shall be registered in SAM for the type of work it does. To be recognized as a small business joint venture and be eligible for award of a contract, the membership arrangements of the joint venture shall be identified and the company relationships fully disclosed in the Offerors proposal in accordance with FAR 9.603.

d. Affiliate Registration. If the Offeror is a small business that has first tier affiliates that will be performing work on the proposed contract, each first tier affiliate shall be registered in SAM for the type of work it does.

e. Subcontractor Registration or Certification. According to FAR Clauses 52.219-8 and 52.219-9 in this solicitation, the Offeror may not require subcontractors to be registered in SAM. For any small business subcontractor listed in the SBP Factor Workbook that is not registered in SAM, the Offeror shall provide in accordance with 13 CFR 121.411(g), a Certification Form (Attachment 0017) from that subcontractor verifying its small business size and socioeconomic status. This certification shall contain, on the same page as the size and status claimed, the signature of the official authorized to sign for the subcontractor.

L.4.3.4. Other Resources/Additional Data: In addition to the data submitted by the Offeror, and the data found in Government systems specifically referenced throughout this L.4.3, the Government may use other resources to evaluate the Offerors SBP Factor Submittal. The Government reserves the right, during clarification or discussion under FAR 15.306, to request additional data to support its assessment.

L.5 Administrative Volume. In addition to the proposal evaluation factor volumes above, provide the following information:

L.5.1 Signature Actions/offeror Fill-Ins. Provide a scanned image of a signed copy of the SF33 cover page, a copy of all completed fill-ins for Sections A through K, and (if applicable) a signed copy of all Amendments to the solicitation. System for Award Management (SAM) certifications need not be separately submitted; however, all offerors must be successfully registered and valid in SAM.

L.5.1.1 Where certifications and approved systems are required for an offeror, if the proposal is being submitted by a Joint Venture, certifications and approved systems for the principals (partners) of the joint venture will be considered as valid for that offeror providing the necessary documentation from all principals (partners) is provided with the proposal.

L.5.1.2 Joint Venture (JV): To be recognized as a JV and eligible for award, the membership arrangements of the JV must be identified and the company relationships fully disclosed in the offeror's proposal in accordance with FAR 9.603. A copy of the agreement establishing the JV must contain the signatures of all of the members comprising the JV.

L.5.2 The offerors proposal acceptance period in terms of calendar days from the date for receipt of offers specified in the RFP. (See Section L.1.2). Pursuant to L.1.2.3. an offer allowing less than the Government's minimum acceptance period, or fails to provide a proposal acceptance period, may be rejected.

L.5.3 Statement of Acknowledgement. A statement specifying the extent of agreement with all terms, conditions, and provisions of the RFP, and a statement of agreement to furnish and deliver the items or perform services set forth in the RFP in consideration for offerors proposed price(s) set opposite each item. Any exceptions taken to the attachments, exhibits, enclosures, or other solicitation terms, conditions, or documents may be determined to be a Deficiency or grounds for the Government to reject the proposal from further consideration in the source selection process (Reference M.2.1).

L.5.4 Assumptions. The offeror shall consolidate and identify all offeror's generated "assumptions" contained anywhere in the proposal. The offeror shall include a statement that none of the "assumptions" contradict or take exception to any terms, conditions, or requirements of the solicitation. Any exceptions taken to the attachments, exhibits, enclosures, or other solicitation terms,

CONTINUATION SHEET	Reference No. of Document Being Continued W56HZV-24-R-0035 PIIN/SIIN MOD/AMD	Page 44 of 50
----------------------------------	---	-----------------------------

Name of Offeror or Contractor:

conditions, or documents may be determined to be a Deficiency or grounds for the Government to reject the proposal from further consideration in the source selection process (Reference M.2.1).

L.5.5 Organizational Conflict of Interest (OCI). The offeror shall provide an affirmative statement that the offeror does not have an OCI as it applies to this solicitation. (Reference L.2.4)

L.5.6 Property Management Plan.

L.5.6.1 The offeror is required to submit a Property Management Plan (PMP) with their proposal that is consistent with the requirements of the solicitation. Submit the PMP as a stand-alone Attachment to the offer in response to this solicitation and ensure the PMP addresses the following:

L.5.6.1.1 An overview description of the contractors Property Management System (PMS).

L.5.6.1.2 The purpose of the offerors PMS, specifying what laws, regulations, and/or instructions it complies with.

L.5.6.1.3 Describe the scope of the assets that are applicable to the offerors PMS.

L.5.6.1.4 The ten (10) outcomes of Government Property requirements that are required by FAR 52.245-1(f):

- a) Acquisition of Property
- b) Receipt of Government Property. If the contract has Item Unique Identification (IUID) requirements, the PMP must address these requirements.
- c) Records of Government property
- d) Physical inventory
- e) Subcontractor control
- f) Reporting Requirements: Please also describe intervals, format of reports, who/whom they will be reported to, how they will be delivered (Email, Hard Copies))
- g) Relief of stewardship responsibility and liability
- h) Utilizing Government property
- i) Maintenance
- j) Property closeout

L.5.6.1.5 Describe any additional standards (e.g., customary commercial practices, voluntary consensus standards, industry leading practices) that the contractor intends to use in the management of Government Property, and how they are applicable to the tasks being performed on the effort.

L.5.7 Small Business Subcontracting Plan.

L.5.6.1. If the offeror is other than a U.S. Small Business concern as defined by the North American Industry Classification System (NAICS) code applicable to this solicitation, the offeror shall submit an acceptable small business subcontracting plan in accordance with FAR Clause 52.219-9 and its ALT II and Defense FAR Supplement (DFARS) Clause 252.219-7003 and provide this plan as part of the proposal submission. Offerors are encouraged to review the DoD checklist at <http://business.defense.gov/Acquisition/Subcontracting/>. Note that such a plan is not required of offerors that are small businesses.

L.5.7.2. The plan shall be submitted as an Attachment to the offer in response to this solicitation.

L.5.7.3. Each page of the subcontracting plan shall be marked with the solicitation number and date, and may also be marked with other codes or identification symbols to aid in later identification.

L.5.7.4 Dollars: The Small Business Participation Factor includes specific instructions as to what to include in the dollars for the Factor Submittal, for example, specific CLINS, options, task orders, proposed prices, target prices, or weighted average prices, etc. To ensure consistency with the Small Business Participation Factor, the offeror shall follow those same instructions in developing the Small Business Subcontracting Plan dollars.

L.5.7.5. Percentages: The offeror shall submit the Small Business Subcontracting Plan with goals expressed in TWO ways:

CONTINUATION SHEET	Reference No. of Document Being Continued W56HZV-24-R-0035 PIIN/SIIN	Page 45 of 50 MOD/AMD
---------------------------	--	--

Name of Offeror or Contractor:

- (a) as a percentage of Total Subcontracting Amount and
(b) as a percentage of Total Contract Amount as defined in the Small Business Participation Factor in this Section L.

L.5.7.6. Breakout: The offeror shall note the differences between the Small Business Participation Factor and the Small Business Subcontracting Plan, as explained in the Small Business Participation Factor, including the proper breakout of the Small Business Subcontracting Plan.

L.5.7.7. Failure to submit and negotiate an acceptable subcontracting plan which, in the judgment of the Contracting Officer, provides the maximum practicable opportunity for small business and small disadvantaged business concerns to participate in the awarded contract may render the offeror ineligible for award. In this connection, offerors should be aware of the statutory goal that has been placed on the Department of Defense to award five percent of its total planned subcontracting dollars to small disadvantaged businesses at the prime contract and subcontract levels. In view of this Congressional mandate, the offeror shall provide, within the plan, a specific explanation of any aggregate small disadvantaged business goal of less than five percent of the proposal's total subcontracting dollars.

L.5.7.8. If the offeror participates in the Small Business Subcontracting Plan (Test Program) described in DFARS 219.702, an approved DoD Comprehensive Subcontracting Plan may be submitted with the offer. DFARS 252.219-7004 shall be added to any contract that incorporates a DoD Comprehensive Plan.

L.5.8 Cost Accounting System. In order to be eligible for award, the offeror must have adequate financial management and fund tracking procedures to accommodate a cost-reimbursement type contract. Lack of DCMA or DCAA verification of the adequacy of the offerors accounting system may result in the offeror being determined ineligible for award. If the offeror has evidence in the form of a letter from either DCMA or DCAA that states that the offeror has an adequate accounting system to accommodate a cost-reimbursement type contract, it should provide that at time of proposal submission. If the offeror does not have such evidence, the offeror shall complete the DCAA Pre-award Survey of Prospective Contractor Accounting System Checklist (Attachment 0020), ensuring that it provides responses to validate or explain each response to the questions. The offeror may provide any other evidence it feels supports the adequacy of its accounting system. The Offeror shall then submit this via email to the Contracting Officer prior to submitting a proposal. The Contracting Officer may request that the cognizant Contract Administration Office (CAO) conduct a review of the adequacy of the contractors cost accounting system.

L.5.9 Facility Clearance. Include documentation demonstrating, as applicable, that the offeror and Subcontractors have a Facility Clearance (FCL) for any location that will handle classified material. Offerors must submit documentation indicating their facility has been granted a SECRET FCL. Offerors who are considering a subcontractor must also submit documentation indicating that its subcontractor has obtained the necessary clearance in order to be considered for award for those subcontractors that will handle classified material.

L.5.10 Export Controlled Information. This solicitation contains Export Controlled information in Controlled Unclassified Attachments. It is the responsibility of the offeror, not the Government, to obtain the appropriate export licenses, or process appropriate export license exemption, necessary for authorization to share any such information with subcontractors who are foreign persons as defined in applicable export laws and regulations, or to obtain access to the files themselves. The Government shall consider the failure or inability of an offeror to obtain the appropriate export compliance documentation and provide that in its proposal as grounds for rejection IAW M.2. The Government will not sponsor or in any way assist the offeror and its subcontractor(s) in obtaining the appropriate level of security clearance.

CONTINUATION SHEET	Reference No. of Document Being Continued W56HZV-24-R-0035 PIIN/SIIN MOD/AMD	Page 46 of 50
---------------------------	---	----------------------

Name of Offeror or Contractor:

SECTION M - EVALUATION FACTORS FOR AWARD

This document incorporates one or more provisions by reference, with the same force and effect as if they were given in full text. Upon request, the Contracting Officer will make their full text available. Also, the full text of a provision may be accessed electronically at these addresses:

For FAR clauses: <https://www.acquisition.gov/>

For DFARS clauses: <https://www.acq.osd.mil/dpap/dars/dfarspgi/current/index.html>

If the provision requires additional or unique information, then that information is provided immediately after the provision title.

M.1 Basis of Award

M.1.1 The Government intends to award a five (5) year, single award, Indefinite Delivery Indefinite Quantity (IDIQ) CPFF contract with five (5) priced, one (1) year ordering periods (OP) for Abrams Integrated Logistics Services (AILS) Fielding Support Services. An award will be made to the offeror whose proposal represents the best value to the Government in accordance with the criteria set forth below, and is eligible for award.

M.1.1.1 There are three evaluation factors:

- a. Experience Factor
- b. Cost/Price Factor
- c. Small Business Participation Factor

The relative order of importance of these Factors are described in Section M.4 below.

M.1.1.2 Proposal selection will be made utilizing the source selection trade-off process, considering the evaluation Factors and their relative order of importance (see Section M.4), to identify the proposal which represents the best value and is most advantageous to the Government. The Government will weigh the evaluation factors (other than the Cost/Price Factor) against the final evaluated price to the Government. As part of the best value determination, the relative strengths, weaknesses, and risks of each proposal shall be considered in selecting the offer that is most advantageous and represents the best overall value to the Government. The Government reserves the right to choose not to award a contract if such action is in the Governments best interest.

M.1.1.3 In making the award decision, the Government will review proposals to determine if any other price adjustments (beyond the GFP Price adjustment already included in the total evaluated price) are required in accordance with the FAR, DFARS, or clauses or provisions contained within this solicitation. If an additional price adjustment is determined to be applicable, then the Government will develop a final price for those offerors impacted by the adjustment(s) and base the final award decision on this final price. When FAR 52.219-4 is included in the RFP and a HUBZone price adjustment is applicable, then all other price adjustments described in the solicitation shall be applied before the application of the HUBZone price adjustment.

M.1.1.4 Importance of Cost/Price. Award will be made to the offeror whose proposal represents the best value to the Government and is otherwise eligible for award. This may not be the offeror with the lowest evaluated cost/price. However, the closer offeror's evaluations are to each other in those Factors other than the Cost/Price Factor, the more important cost/price becomes in the decision. Notwithstanding the relative order of importance of the evaluation Factors stated herein, cost/price may be controlling when:

- a. Proposals are otherwise considered approximately equal in non-price factors; or
- b. An otherwise superior proposal is unaffordable; or
- c. The advantages of a higher rated, higher priced proposal are not considered to be worth the price premium.

M.1.2 Eligibility for Award. Award will only be made to an offeror who is eligible for award. To be eligible for award:

- a. The offeror must be determined responsible (See Section M.3.6)
- b. The proposal must not contain a Deficiency(s) (per FAR Part 15.001); and
- c. The offeror must be registered in the System for Award Management (SAM) - see provision 52.204-7, and
- d. The offeror must have a SECRET Facility Clearance (FCL)

M.2 Rejection of Offers

M.2.1 The Government may reject any proposal if in the Government's best interest at any time after receipt of proposal. Examples include, but are not limited to, the following proposal conditions:

CONTINUATION SHEET	Reference No. of Document Being Continued W56HZV-24-R-0035 PIIN/SIIN MOD/AMD	Page 47 of 50
----------------------------------	---	-----------------------------

Name of Offeror or Contractor:

- a. The proposal fails to meaningfully respond to the instructions in Section L of this solicitation (e.g. a proposal provides some data but omits significant material data and information required by Section L, the offeror fails to submit pricing Attachment 0015 in accordance with the instructions, fails to provide Experience Matrix (Attachment 0019) and/or significant portions of the requested information in the Experience Factor, the proposal fails to follow key proposal instructions or format requirements in Section L, etc.).
- b. A proposal merely offers to perform work according to the solicitation terms or fails to present more than a statement indicating its capability to comply with the solicitation terms and does not provide support and elaboration as specified in Section L of this solicitation.
- c. The proposal proposes exceptions to the RFP requirements, attachments, exhibits, enclosures, or solicitation terms and conditions.
- d. The proposal contains one or more Organizational Conflicts of Interest (OCIs) that cannot be avoided or mitigated. Refer to Section L paragraph L.2.5 of this solicitation, "Organizational Conflict of Interest."
- e. The proposal is unbalanced as to price. See Section M.4.2.9.
- f. The proposal submitted is for less than all the requirements called for by the solicitation.
- g. The proposals acceptance period does not meet the Governments required minimum acceptance period, or the offeror fails to provide a proposal acceptance period (Refer to Section L.1.2).
- h. The proposal is not in English (American Standard) or in US Dollars.
- i. Proposal does not contain required Export Control licenses.
- j. The offeror does not have a SECRET Facility Clearance at time of proposal.

M.3 Source Selection Process

M.3.1 Compliance Review. After receipt of proposals, but prior to the evaluation process, the Government will perform a compliance review of the offerors proposal to determine the extent of compliance to the solicitation instructions.

M.3.2 Evaluation Process. Selection of the successful offeror will be made following an assessment of each proposal not otherwise rejected, based on the response to the information called for in Section L of this RFP, and against the solicitation requirements and the evaluation criteria described herein. Proposals not otherwise rejected will be evaluated as specified herein, to include developing narrative support for the evaluation conclusions under each Factor.

M.3.3 Source Selection Authority. The Source Selection Authority (SSA) is the official designated to direct the source selection process and select the offeror for contract award. A Source Selection Advisory Council (SSAC) will provide a written comparative analysis of the proposals and an award recommendation for the SSA prior to the selection decision.

M.3.4 Source Selection Evaluation Board (SSEB). An SSEB has been established by the Government to evaluate proposals in response to this solicitation. The SSEB is comprised of technically qualified individuals who have been selected to conduct this evaluation in accordance with the evaluation criteria for this solicitation. All proposals not otherwise rejected will be given careful, full and impartial consideration by a team of Government personnel in the evaluation, pursuant to the criteria in this solicitation.

M.3.5 Award without Discussions. This RFP includes FAR Provision 52.215-1 Instructions to Offerors Competitive Acquisition in Section L which advises offerors that the Government intends to make award without conducting discussions. Where awards will be made without discussions, exchanges with offerors are limited to Clarifications as defined in FAR 15.306(a). Therefore, the offerors initial proposal should contain the offerors best terms from a Price and non-Price Factor standpoint. However, under FAR 52.215-1(f)(4), the Government reserves the right to hold discussions, if necessary. If the Contracting Officer determines that the number of proposals that would otherwise be in the competitive range exceeds the number at which an efficient competition can be conducted, the Contracting Officer may limit the number of proposals in the competitive range to the greatest number that will permit an efficient competition among the most highly rated proposals.

M.3.6 Determination of Responsibility. Per FAR Part 9.103, a contract will be placed only with the offeror that the Contracting Officer determines to be responsible. Prospective offeror(s), in order to be eligible for award for this acquisition, must be able to demonstrate that they meet standards of responsibility set forth in FAR Part 9.104, or refer the matter to the SBA per FAR 19.602 when applicable. In addition, the Government may assess the offeror's financial and management capabilities to meet the solicitation requirements. The Government reserves the right to conduct a Pre-Award Survey on any or all offeror(s) or their subcontractors to aid the Contracting Officer in the evaluation of each offeror's proposal and ensure that a selected offeror is responsible. No award can be made to an offeror who has been determined to be not responsible by the Contracting Officer. To make sure that you meet the responsibility criteria at FAR Part 9.104, the Government may:

CONTINUATION SHEET	Reference No. of Document Being Continued W56HZV-24-R-0035 PIIN/SIIN	Page 48 of 50 MOD/AMD
Name of Offeror or Contractor:		

a. Arrange a visit to your facility and perform a necessary Pre-Award Survey. The offeror's refusal to authorize the Government to visit the offerors facility may result in a determination that the offeror is not responsible.

And/or

b. Request an offeror provide financial, technical, production, or managerial background information. If the requested information is not submitted within seven calendar days from the date of the receipt of the request, or if an offeror refuses the Government access to its facility, the Government may determine the offeror non-responsible. If the Government visits the offeror's facility, please ensure that current data relevant to the proposal is available for Government personnel to review.

M.3.7 Consistency. Each volume of the offerors proposal shall be consistent with the other proposal volumes and shall demonstrate the understanding and ability to perform according to the statement of work of the contract. The offeror should provide supporting documentation in sufficient detail to permit a complete evaluation of the proposal. The Government may conduct a crosswalk between the information provided in offerors proposal volumes to assess whether the offeror submits consistent proposal information.

M.4 Evaluation Criteria

There are three evaluation factors:

- a. Experience Factor
- b. Cost/Price Factor
- c. Small Business Participation Factor

The relative order of importance of these factors is as follows: The Experience Factor is more important than the Cost/Price Factor. The Cost/Price Factor is significantly more important than Small Business Participation Factor. The non-price factors, when combined, are significantly more important than the Cost/Price Factor.

M.4.1 Factor 1: Experience Factor

M.4.1.1 The Experience Factor will assess the offerors approach and understanding of requirements, and risk associated with the offer successfully performing the required effort, based on the extent to which the offerors proposed recent experience is comparable to the criteria considerations listed in L.4.1.4 (a)-(d).

M.4.1.1.1 The Government will only consider recent experience in the evaluation, as defined in Section L.4.1.3 . Reference L.4.1.2.1 for the Definition of a Contract. The Government will only consider up to two Contracts (as defined in L.4.1.2.1) per criteria consideration, and will base the evaluation on the submission(s) identified in the Experience Matrix (Attachment 0019). The Government reserves the right to not consider a proposed submission in the evaluation if it is determined that the submission does not meet the Definition of a Contract, a single submission contains more than one Contract (as defined by L.4.1.2.1), or any submissions (for the offeror or its proposed subcontractor) which breaches the submission limits set forth in L.4.1.2.2.1 and L.4.1.6.4.1, which may result in the offeror being assessed with higher risk.

M.4.1.1.2 When assessing the risk associated with recent experience to the criteria considerations listed in L.4.1.4 (a)-(d), more comparable experience may be assessed as lower risk, which may be assessed as a strength(s), while less comparable experience may be assessed with higher risk, which may be assessed as a weakness(s) or significant weakness(s).

M.4.1.1.2.1 For Consideration #1 for TPF and Deprocessing activities and Consideration #2 for NET activities, the Government may give an additional strength(s)/significant strength(s) for experience that involved deployment of personnel to perform on military ground combat or tactical vehicles at locations in CENTCOM, EUCOM, PACOM, or AFRICOM in durations of at least 6 months.

M.4.1.1.2.2 For the Consideration #2, the Government may give an additional strength(s)/significant strength(s) for experience that involved NET activities on military ground combat or tactical vehicles on significantly higher quantities of vehicles or users trained if it is determined that such excess of quantity(s) provides additional benefit and risk reduction.

M.4.1.1.2.3 For the Consideration #3, the Government may give an additional strength(s)/significant strength(s) for general maintenance experience that involved significantly higher quantities of military ground combat or tactical vehicles and/or locations if it is determined that such excess of quantity(s) provides additional benefit and risk reduction.

M.4.1.1.2.2 For the consideration identified in above, the Government may give an additional strength for experience that involved installation of MWOs IAW AR 750-10 that involved welding of armor IAW MIL-STD-3040.

M.4.1.1.2.2 For the consideration identified in above, the Government may give an additional strength for experience that involved installation of MWOs IAW AR 750-10 on military ground combat or tactical vehicles at multiple locations concurrently.

M.4.1.1.3 Any experience which is identified in the offeror's Experience Factor proposal that is not substantiated with the information

CONTINUATION SHEET	Reference No. of Document Being Continued W56HZV-24-R-0035 PIIN/SIIN	Page 49 of 50 MOD/AMD
---------------------------	--	--

Name of Offeror or Contractor:

requested in L.4.1.5 and/or L.4.1.6 may not be considered, in whole or in part, and thus lack comparability, which may result in the offeror being assessed with higher risk.

M.4.1.1.4 Any experience cited in the offeror's Experience Factor proposal that is not supported with the information requested in the instructions in L.4.1.5, and/or L.4.1.6 to demonstrate how the Government will realize the benefit of the proposed experience during contract performance, or if any other proposal volume indicates the cited experience is not intended to be used by the offeror during contract performance, may result in the proposed experience not being considered in the evaluation, which may result in being assessed with higher risk.

M.4.1.2 Offerors are advised that the Government may contact any of the references the offeror provides, may contact internal sources regarding the proposed experience, and/or may utilize other internal resources for information and reserves the right to use any information received as part of our evaluation.

M.4.2 Factor 2: COST/PRICE FACTOR (Reference the proposal submission information required in Section L.4.2). The Government will evaluate the Cost/Price Factor, as follows:

M.4.2.1. The Cost/Price evaluation will result in the development of the Total Evaluated Price to the Government. The cost/price evaluation will also include consideration of the reasonableness, cost realism of the cost-reimbursement CLINs only, completeness, and unbalanced pricing. The Total Evaluated Price may differ from the total proposed price. The Total Evaluated Price, rather than the total proposed price, shall be used in the tradeoff evaluation to determine best value.

M.4.2.2 The Total Proposed Price shall be identified within the Totals & USG MPC tab of Attachment 0015 - GFPM of the Offerors proposal. The Total Proposed Price is calculated as follows:

- i. Phase-In (6 month), PLUS
- ii. Ordering Period 1 Subtotal, PLUS
- iii. Ordering Period 2 Subtotal, PLUS
- iv. Ordering Period 3 Subtotal, PLUS
- v. Ordering Period 4 Subtotal, PLUS
- vi. Ordering Period 5 subtotal, PLUS
- vii. Option to Extend Services FAR 52.217-8

M.4.2.3 The Total Evaluated Price equals the sum of the following:

- (a) The proposed price for the FFP Phase-In CLIN; PLUS
- (b) The most probable cost to the Government for the cost-reimbursement CLINs. The most probable cost to the Government will consist of the Offerors Total Proposed Price for the cost reimbursable CLINs only, plus or minus any cost realism adjustments determined necessary IAW the Governments Cost Realism analysis (detailed in Section M.4.2.6 below); PLUS
- (c) Any other price adjustments, for evaluation purposes only, that are required IAW the (i) FAR; (ii) DFARS; or (iii) the RFP (to include RFP attachments);
- (d) however, it does not include DBA Insurance Cost.

M.4.2.4 Reasonableness. The Government will evaluate the price reasonableness of the Offerors total proposed price to ensure that in its nature and amount, it does not exceed that which would be incurred by a prudent person in the conduct of competitive business. The Government will employ the techniques described in FAR 15.404-1(b) to determine that a price is fair and reasonable.

M.4.2.5 For the cost-plus-fixed-fee CLINs, the Government will verify that the Offerors proposed fee meets the requirements of FAR 15.404-4. If the Offerors proposed fee does not meet the requirements of FAR 15.404-4, the Offerors proposal will be ineligible for award.

M.4.2.6 Cost Realism (cost-reimbursement CLINs only): For the cost-reimbursement CLINs only, the Government will conduct a cost realism analysis IAW FAR 15.404-1(d) by independently reviewing and evaluating the specific elements of the offerors proposed cost estimate to determine whether the estimated proposed cost elements are realistic. The result of the cost realism evaluation will be a determination of the most probable cost to the Government (which consists of cost and fee (if applicable)). The most probable cost will be determined by adjusting the Offerors proposed cost to reflect any additions or reductions to cost elements to realistic levels based on the results of the cost realism analysis.

M.4.2.7 The Government will verify that all direct labor rates proposed by the Prime AND its Subcontractors are at or above the Direct Labor Floor Rates as specified in paragraph L.4.2.1.3 of this RFP. The GFPM and GFPM-Subs will auto-calculate the proposed direct labor rate as the floor rate in instances where a prime offeror or subcontractor proposes a direct labor rate below the floor rate. If the GFPM or GFPM-Subs is modified in any way that results in corruption of the auto-calculation, resulting in any of the proposed direct labor rates by either the Prime or its Subcontractors being below the Government established Direct Labor Floor Rates, then the proposed direct labor rates will be increased to the Government established Direct Labor Floor Rates through a cost realism adjustment. Offerors are reminded that they are responsible for ensuring that any and all Subcontractors provide a full and complete labor rate build that provides complete transparency for the direct labor rate component, and each indirect rate applied to it, along with the profit or fee,

CONTINUATION SHEET	Reference No. of Document Being Continued W56HZV-24-R-0035 PIIN/SIIN MOD/AMD	Page 50 of 50
--------------------	--	---------------

Name of Offeror or Contractor:

regardless of contract type.

M.4.2.8 Completeness. The Government requires complete proposals with respect to price. A complete proposal will include all information required by the RFP. Attachment 0015 - GFPM, shall include pricing for each Ordering Period, Phase-In, Travel/ODC, and Defense Base Act (DBA) Insurance, and must be consistent with the instructions contained in this RFP.

M.4.2.9 Unbalanced Pricing. The Government will evaluate the Offerors proposal for unbalanced pricing. Unbalanced pricing exists when, despite an acceptable total evaluated price, the price of one or more contract line items is significantly overstated or understated as indicated by the application of cost and price analysis techniques. Offerors are cautioned that a proposal the Government assesses to be unbalanced as to price may either be rejected or determined unacceptable for award. See FAR 15.404-1(g) for more information on unbalanced pricing.

M.4.3 Factor 3: Small Business Participation Factor

M.4.3.1 The Government will evaluate the extent of the Offerors approach to achieving the Government's objective of providing opportunities in meeting the SBP Factor goals identified in this solicitation. The evaluation will be based on the extent of SBP proposed and credibility of the data provided in the proposal measured against the SBP Factor goals for this solicitation. During its evaluation, the Government will check for consistency within the proposal, and any inconsistencies found may impact the assessed credibility of the offerors proposed goal(s) and/or the Offerors rating in this Factor. Please note the solicitation goals are expressed as a percentage of 'Total Contract Amount', which is defined for this SBP Factor in Section L.4.3.2(c). The Government's small business participation goals for this solicitation are:

- ___ % Small Business (SB)
- ___ % Small Disadvantaged Business (SDB)
- ___ % Woman Owned Small Business (WOSB)
- ___ % Historically Underutilized Business Zone Small Business (HUBZone SB)
- ___ % Veteran Owned Small Business (VOSB)
- ___ % Service Disabled Veteran Owned Small Business (SDVOSB)

For Other Than Small Business Offerors ONLY, the Small Disadvantaged Business (SDB) goal is BOTH of the following:

- ___ % of Total Contract Amount
- ___5 % of Total Subcontracting Amount

M.4.3.2 Assessment of Proposed Goals Above or Below Each of the Government Goals. Where the Offeror proposes small business participation higher than the Government's goal and the Government has determined that achievement of said small business participation is credible, or where the Offeror is assessed as credibly being able to achieve or exceed the Government's goal, the Government may assign the Offeror a strength against such proposal. Where the Offeror proposes small business participation lower than the Government's goal, or where the Offeror is assessed as not credibly being able to achieve the Government's goal, the Government may assign a weakness or significant weakness against such proposal.

*** END OF NARRATIVE M0001 ***

DRAFT
