Due to the specialized systems, proprietary components, and manufacturer-specific service protocols, only technicians trained and certified by CASE Construction Equipment are authorized to perform these repairs.

A review of available CASE-certified service providers within the operational area identified only one authorized CASE dealer capable of performing the required work. As shown in the CASE dealer locator (image provided), Torgerson's LLC is the nearest and only CASE-certified service provider within reasonable distance of the equipment's location. No other authorized CASE service centers are available in the region that can perform maintenance or repairs on a CASE CX210C Excavator to manufacturer specifications.
