Section B: Description of the Supplies/Services Required

The 805 requires access to Offensive Security's enterprise training platform and the PEN-200 course for six users for one year. The Penetration Testing with Kali Linux (PEN-200) course is a comprehensive training program offered by Offensive Security (OffSec) for aspiring penetration testers and cybersecurity professionals.

Section C: Justification for Soliciting from a Single Source or Brand Name

The 805th does not have the capability to provide continuation training, initial qualification training, or mission qualification training for cyber operators, and because the 57th Information Aggressor Squadron uses PEN-200 as their Initial Qualification Training. This training will give our operators the opportunity to become qualified on the 57th IAS weapon system and augment their operations and stay current with their peers. Without this continuation training our 1B4s will be severely disadvantaged at future assignments compared to operators that have been through initial or mission qualification training.

Section D: Efforts to Obtain Competition

In an effort to promote competition, this requirement will be solicited as a total small business set-aside on SAM.gov under the NAICS code 541519 and PSC 7A21.

Section E: Steps to Preclude Future Single Source or Brand Name Awards

In the future, continual market research shall be performed for similar or like requirements to ascertain if other company's can provide training that aligns with 1B4's CFETP items and Initial Qualification Training (IQT).

Section F: Contracting Officer's Determination

I have determined, in accordance with RFO 12.102, that the circumstances of this contract action deem only a single source is reasonably available.
