The Government will make award(s) to the responsible offeror(s), offering the lowest price(s), whose offer(s) conforms to all of the terms and conditions set forth in this solicitation. Instructions for the entire proposal package to offerors is provided in this section, including the full requirement for Government FAT.

Compliance with Solicitation Requirements (Technical)

Compliance with solicitation requirements will be defined as an offer that meets the requirements of the solicitation and takes no exception to its terms and conditions. Proposals being evaluated against this requirement will receive a rating of acceptable/unacceptable:

Acceptable: Proposal meets the minimum requirements of the solicitation as specified in the caution notice section of the solicitation.

Unacceptable: Proposal does not meet the minimum requirements of the solicitation as specified in the caution notice section of the solicitation.

Past Performance Requirements

The past performance evaluation is an assessment of the offeror's probability of meeting the solicitation requirements. Each offeror will be assigned one overall past performance rating of Acceptable or Unacceptable based on the chart below. In the case of an offeror without a record of relevant part performance or for whom information on past performance is not available or so sparse that no meaningful past performance rating can be reasonably assigned, the offeror may not be evaluated favorably or unfavorably on past performance (see FAR 15.305(a)(2)(iv)). Therefore, the offeror shall be determined to have unknown or neutral past performance. In the context of acceptability/unacceptability, "unknown" shall be considered "acceptable."

Acceptable: Based on the offeror's performance record, the Government has a reasonable expectation that the offeror will successfully perform the required effort, or the offeror's performance record is unknown.

Unacceptable: Based on the offeror's performance record, the Government has no reasonable expectation that the offeror will be able to successfully perform the required effort.

If multiple awards are made, each delivery order will be competed amongst the multiple awardees to the extent that they have passed the FAT in accordance with MIL DTL 32488 and are not subject to quality investigations resulting from Supply Discrepancy Reports (SDRs) and/or Product Quality Deficiency Reports (PQDRs) as a result of performance under this contract. The evaluation factors for the competed delivery orders will be price and delivery. The lowest-priced response to each delivery order e-mail will receive the subsequent delivery order.

6. Offers will be considered on an all or none basis and will be using Lowest-Priced Technically Acceptable Best Value Procedures. Please ensure that pricing is provided for all CLINs to be considered for an award. Offerors must submit ceiling prices for the base period and each option period for each NSN as identified in the solicitation in Section B. Offers that fail to provide pricing for one or more items may be rejected as non-responsive and/or technically unacceptable for award. Prices submitted by the offeror and accepted by the Government will become fixed ceiling prices for the applicable NSN and contract period upon award. This means that these prices will constitute a NOT TO EXCEED ceiling price for the base period and each option period, if exercised. When competing for delivery orders, if multiple awards are made, the contractor may quote a price that is below its ceiling price but may not quote a price that exceeds its ceiling price.

7. The resultant contracts will have a guaranteed minimum of \$1,410,000.00 (10% of the Annual Estimated Quantity - AEQ) per contract and a maximum of \$500,000,000.00 which is a shared maximum for all resulting contracts awarded. The estimated annual contract value is \$25,000,000.00. All negotiated pricing will be fixed price.

8. The lowest-priced offers submitted for each CLIN will be the only proposals considered for awards of those CLINs provided their proposals are technically acceptable, the proposed price(s) can be determined fair and reasonable, and the vendors can be determined responsible.

9. Pricing: proposed unit ceiling prices shall be annotated in the schedule of supplies of this solicitation. Note that the (AEQ) Annual Estimated Quantity is provided as information only. The quantity represented is the annual estimated quantity and is not a fixed quantity. It represents no guarantee of future purchase quantities.

10. Offerors must submit unit ceiling pricing for all four pricing periods (two-year base period and three, one-year option periods) for all CLINs.

11. Each offeror's price proposal will be evaluated for price reasonableness. All EBS sizes should be priced the same regardless of color. EBS 1B (beige/sand color) and EBS 1G (green color) should be priced the same per unit. Pricing that is not the same for each color will not be accepted and the proposal will be deemed technically unacceptable.

12. Certified cost and pricing data is not required at this time; however, the offeror may be required to submit certified cost and pricing data or data other than certified cost or pricing data during discussions, if held, to the extent deemed necessary by the Contracting Officer.

13. The award(s) will be based on the lowest evaluated price proposal meeting or exceeding the acceptability standards for non-price factors that will be most advantageous to the Government. The non-price evaluation factors will be technical acceptability and past performance.

13a. Technical acceptability is defined as the ability to meet all technical specifications and meet all other terms and conditions of this solicitation. The Government will review and consider past performance including but not limited to performance on contracts of similar scope and complexity and performance data obtained in the Supplier Performance Risk System (SPRS) and the Contractor Performance Assessment Reporting System (CPARS).

13b. Past performance will be evaluated in accordance with Revolutionary FAR Overhaul (RFO) 15.202(c). The awards will be made based on the lowest evaluated price of the proposal meeting or exceeding the acceptability standards for non-cost factors. Fair and reasonable prices are expected, as this is a competitive solicitation. The lowest priced, technically acceptable source selection process is appropriate when best value is expected to result from selection of the technically acceptable proposal with the lowest evaluated price.

14. The contract(s) will be awarded to the vendor(s) who provide the lowest fair and reasonable price, that meets all the terms and conditions in the solicitation, and can be determined responsible in accordance with FAR 9.104 and FAR 9.105.

15. *** Please be advised that all 'fill-in' clause(s) must be completed. Failure to complete these clauses may render your proposal technically unacceptable ***

16. Price evaluation: all offered prices will be evaluated against the requirements of the solicitation. The offered pricing will be calculated by multiplying the unit price, (F.O.B. Origin), for each CLIN by the corresponding Annual Estimated Quantity (AEQ) to arrive at the total offered price. The sum of the five (5) total amounts of evaluated prices will calculate the total evaluated proposed price for these contracts. Offerors are required to complete and return the solicitation and take no exception to the requirements of the solicitation.

17. The Annual Estimated Quantity (AEQ) listed in the solicitation is only an estimate based on data available to the Government at the time of issuance. The AEQ represents the Government's good faith estimate of the annual demand for the item. The AEQ is for informational purposes only and the Government is in no way obligated to purchase this quantity when offering pricing, offerors must take into account any business risk associated with this estimate. The award decision factors include: price, delivery and past performance on previous orders.

A pricing spreadsheet for Production and FAT CLINs is included in the RFP as Attachment A to assist vendors in keeping their pricing streamlined and in one location. FAT pricing is entered in the last column. The proposed unit price for the FAT will be multiplied by the FAT sample quantity to calculate the Total Evaluated FAT Price. SECTION C - SPECIFICATIONS/SOW/SOO/ORD

C03 CONTRACTOR RETENTION OF SUPPLY CHAIN TRACEABILITY DOCUMENTATION (JUN 2023)

SECTION E - INSPECTION AND ACCEPTANCE

E08 FIRST ARTICLE TESTING REQUIREMENTS (MAR 2025)

- (1) If there is not a separate contract line item number (CLIN) for FAT, the offeror shall include all costs and risk associated with completion of the FAT requirement in the production CLIN price.
- (2) If there is a separate FAT CLIN, the offeror shall include all costs and risk associated with completion of the FAT requirement in the FAT CLIN price. The unit of issue for the FAT CLIN, EACH, is equal to one First Article Test (1EA=1FAT). To receive payment for any costs associated with FAT, the offeror shall propose costs associated with FAT on a separate CLIN. The offeror shall base the production CLIN price solely on all costs associated with completion of the production units and shall exclude all FAT-related costs.
- (3) The contracting officer will use the total award price in selecting the best value offer from among all eligible offerors. However, for an offeror to be eligible for award, the contracting officer must determine that the FAT CLIN price (unless FAT is waived) and the production CLIN price are fair and reasonable; and, if set-aside under FAR Part 19, a fair market price. The offeror shall not propose a FAT CLIN price that is materially unbalanced in relation to the production CLIN price. In the event an offeror receives a waiver of the FAT requirement, the contracting officer will deduct the FAT CLIN price for the waived source in determining the total award price.
- (4)(a) Notwithstanding the conditions for waiving first article, the contracting officer may order an additional first article sample, or portion thereof, in writing if there is a --
- (i) Major change to the technical data;
 - (ii) Lapse in production for a period in excess of 90 days; or
 - (iii) Change in the place of performance (manufacturing facility), manufacturing process, material used, drawing, specification or source of supply.
- (b) When conditions in paragraphs (4)(a)(i), (ii), or (iii) occur, the contractor shall notify the contracting officer; who will determine whether to order an additional first article sample or portion thereof and provide instructions concerning the submission, inspection, and notification of results. The contractor shall bear the costs of the additional first article testing resulting from any of the causes in paragraphs (4)(a)(i)-(iii) instituted by the contractor and not due to changes directed by the Government.
- (5) Waivers. The offeror may submit a request for FAT waiver to the contracting officer, who may waive the FAT requirement when all of the following criteria apply:
- (a) The offeror requesting waiver has successfully manufactured, delivered and the government accepted the item or a similar item. The offeror shall provide the following information and be prepared to provide documentary evidence upon the contracting officer's request:
 - (i) Contract number(s), date(s), and issuing Government agency or agencies.
 - (ii) Description of item previously furnished, identified by part number, type, model number and/or other identifying information. If the item previously furnished is similar but not identical to the item being acquired under the current buy, the offeror shall explain why manufacture of the item previously furnished is sufficient to demonstrate its ability to manufacture the item being acquired under the current buy without need for a first article test.
 - (iii) Engineering control document/change number of item previously furnished.
 - (b) There have been no changes to manufacturing processes, tooling, or place of performance.
 - (c) There have been no changes to manufacturing data (e.g., drawing revisions that change materials, dimensions, processes, inspection or testing requirements; or subcontractors used to manufacture the items successfully in the past).
 - (d) The offeror shall supply an item of the same design and manufactured by the same method at the same facilities as the item or similar item previously furnished and accepted under subparagraph (5)(a).
 - (6) Contractor-Performed FAT.
 - (a) The contractor shall test the quantities as outlined in paragraph (a) of FAR clause 52.209-3 as specified in the contract. The contractor shall submit reports in accordance with paragraph (b) of FAR clause 52.209-3, as supplemented in this procurement note.
 - (b) For test report preparation and delivery of contractor FAT, the contractor shall --
 - (i) Use the data item description DI-NDT1-80809B report format.
 - (ii) Mark the test report with the following: "First article test report - Contract number: [] and lot/item number: [].
 - (iii) Sign the FAT Report, accompanied by the system of record receiving report (i.e, WAWF or] DD Form 250) and contractor confirmation that the same process and facilities used to manufacture the first article units will be used to manufacture the production units, to the contracting officer at the applicable address shown below:
 - (A) For awards issued by DLA Aviation; or DLA Troop Support Clothing and Textile (C&T), Medical Materiel, or Subsistence, submit the report to the procuring activity in Block 6 of the DD Form 1155, Block 7 of Standard Form (SF) 33, Block 5 of SF 26, or Block 9 of SF 1449 award.

Technical information means technical data or computer software, as those terms are defined in the clause at DFARS 252.227-7013, Rights in Technical Data --Other Than Commercial Products and Commercial Services, regardless of whether or not the clause is incorporated in this solicitation or contract. Examples of technical information include research and engineering data, engineering drawings, and associated lists, specifications, standards, process sheets, manuals, technical reports, technical orders, catalog-item identifications, data sets, studies and analyses and related information, and computer software executable code and source code.

(b) *Adequate security.* The Contractor shall provide adequate security on all covered contractor information systems. To provide adequate security, the Contractor shall implement, at a minimum, the following information security protections:

(1) For covered contractor information systems that are part of an Information Technology (IT) service or system operated on behalf of the Government, the following security requirements apply:

- (i) Cloud computing services shall be subject to the security requirements specified in the clause 252.239-7010, Cloud Computing Services, of this contract.
- (ii) Any other such IT service or system (i.e., other than cloud computing) shall be subject to the security requirements specified elsewhere in this contract.

(2) For covered contractor information systems that are not part of an IT service or system operated on behalf of the Government and therefore are not subject to the security requirement specified at paragraph (b)(1) of this clause, the following security requirements apply:

(i) Except as provided in paragraph (b)(2)(ii) of this clause, the covered contractor information system shall be subject to the security requirements in National Institute of Standards and Technology (NIST) Special Publication (SP) 800-171, "Protecting Controlled Unclassified Information in Nonfederal Information Systems and Organizations", Revision 2 (available via the internet at <http://dx.doi.org/10.6028/NIST.SP.800-17>).

The Contractor need not implement any security requirement adjudicated by an authorized representative of the DoD CIO to be nonapplicable or to have an alternative, but equally effective, security measure that may be implemented in its place.

(C) If the DoD CIO has previously adjudicated the contractor's requests indicating that a requirement is not applicable or that an alternative security measure is equally effective, a copy of that approval shall be provided to the Contracting Officer when requesting its recognition under this contract.

(D) If the Contractor intends to use an external cloud service provider to store, process, or transmit any covered defense information in performance of this contract, the Contractor shall require and ensure that the cloud service provider meets security requirements equivalent to those established by the Government for the Federal Risk and Authorization Management Program (FedRAMP) Moderate baseline (<https://dramp.gov/resources/documents/>) and that the cloud service provider complies with requirements in paragraphs (c) through (g) of this clause for cyber incident reporting, malicious software, media preservation and protection, access to additional information and equipment necessary for forensic analysis, and cyber incident damage assessment.

(3) Apply other information systems security measures when the Contractor reasonably determines that information systems security measures, in addition to those identified in paragraphs (b)(1) and (2) of this clause, may be required to provide adequate security in a dynamic environment or to accommodate special circumstances (e.g., medical devices) and any individual, isolated, or temporary deficiencies based on an assessed risk or vulnerability. These measures may be addressed in a system security plan.

SECTION M - EVALUATION FACTORS FOR AWARD

PRICING EVALUATION:

The solicitation sets forth instructions to the offeror and evaluation factors for award. Proposals will be evaluated according to Lowest Price Technically Acceptable (LPTA) source selection procedures. The Government will make award(s), as a result of this solicitation, to the responsible offeror(s), offering the lowest price(s), whose offer(s) conforms to all of the terms and conditions set forth in this solicitation. Instructions for the entire proposal package to offerors is provided in this section, including the full requirement for Government FAT. Passing FAT is a condition to receive delivery orders upon award.

Compliance with Solicitation Requirements (Technical)

Compliance with solicitation requirements will be defined as an offer that meets the requirements of the solicitation and takes no exception to its terms and conditions. Proposals being evaluated against this requirement will receive a rating of acceptable/unacceptable:

Acceptable: Proposal meets the minimum requirements of the solicitation as specified in the caution

SECTION I - CONTRACT CLAUSES (CONTINUED)

notice section of the solicitation .

Unacceptable: Proposal does not meet the minimum requirements of the solicitation as specified in the caution notice section of the solicitation .

Past Performance Evaluation:

The past performance evaluation is an assessment of the offeror's probability of meeting the solicitation requirements. Each offeror will be assigned one overall past performance rating of Acceptable or Unacceptable as mentioned below. In the case of an offeror without a record of relevant past performance or for whom information on past performance is not available or so sparse that no meaningful past performance rating can be reasonably assigned, the offeror may not be evaluated favorably or unfavorably on past performance (see FAR 15.305(a)(2)(iv)) . Therefore, the offeror shall be determined to have unknown or neutral past performance . In the context of acceptability/unacceptability, "unknown" shall be considered "acceptable ."

Acceptable: Based on the offeror's performance record, the Government has a reasonable expectation that the offeror will successfully perform the required effort, or the offeror's performance record is unknown .

Unacceptable: Based on the offeror's performance record, the Government has no reasonable expectation that the offeror will be able to successfully perform the required effort.

If multiple awards are made, each delivery order will be evaluated differently than the IDIQ awards . Each delivery order will be competed amongst the multiple awardees to the extent that they have passed the required testing in MIL DTL 32488 and are not subject to quality investigations resulting from Supply Discrepancy Reports (SDRs) and/or Product Quality Deficiency Reports (PQDRs) . The evaluation factors for the competed delivery orders will be price and delivery. The lowest-priced response to each delivery order e-mail will receive the subsequent delivery order .

6. Offers will be considered on an all or none basis and will be using Lowest-Priced Technically Acceptable Best Value Procedures . Please ensure that pricing is provided for all items to be considered for an award . Offerors must submit ceiling prices for the base period and each option period for each NSN as identified in the solicitation in Section B . Offers that fail to provide pricing for one or more items may be rejected as non-responsive and/or technically unacceptable for award. Prices submitted by the offeror and accepted by the Government will become fixed ceiling prices for the applicable NSN and contract period upon award . This means that these prices will constitute a NOT TO EXCEED ceiling price for the base period and each option period, if exercised . When competing for delivery orders, if multiple awards are made, the contractor may quote a price that is below its ceiling price but may not quote a price that exceeds its ceiling price .
