RFI NO.: 001	DATE: 4/10/2026	SPEC/DWG. REFERENCE(s):
REPLY NEEDED BY:		

INFORMATION NEEDED:

Is there a sqft. weight limit of material stored in the interstitial floors?

Yes, do not exceed 40 psf for patient rooms and 100 psf for corridors, Interstitial Floor is 25 psf
VA can confirm design loads.

REPLY:

RFIs will be answered via amendment(s).

Attached drawing indicates the interstitial areas are designed to 25 psf. - Eric Dodson VA COR

RFI NO.: 003	DATE: 4-10-2026	SPEC/DWG. REFERENCE(s):
REPLY NEEDED BY:		

INFORMATION NEEDED:

In lieu of "Port - A - John's" can the contractors use a general public restroom within the hospital if cleaned at the end of each work shift?

[The contractor may use the public restrooms however if cleanliness becomes an issue the contractor shall provide facilities outside of hospital. COR will assign restrooms that can be used.](#)

REPLY:

RFIs will be answered via amendment(s).

Contractor is allowed to use toilets B-B031 and B-B030 in the basement B-wing corridor. Cleanliness is expected and shall be maintained otherwise public restroom privileges will be revoked and the contractor should expect to provide outside facilities. - Eric Dodson VA COR

RFI NO.: 004	DATE: 4/10/2026	SPEC/DWG. REFERENCE(s): GI-03
REPLY NEEDED BY:		

INFORMATION NEEDED:

Will staging the dumpster at the maintenance dock be available for use? Please advise.

No contractor dumpster's can remain at the dock area. The contractor will be allowed to schedule a truck or fork lift to the loading dock area during loading and unloading.

A dumpster location will be allowed on campus.

REPLY:

RFIs will be answered via amendment(s).

A dumpster will be allowed on campus, but it cannot be guaranteed to be located at the engineering dock area. The dumpster must be able to fit into a standard size parking spot. - Eric Dodson VA COR

RFI NO.: 006	DATE: 4/10/2026	SPEC/DWG. REFERENCE(s): GI-01 & GI-02 Note C
REPLY NEEDED BY:		

INFORMATION NEEDED:

Note C states plumbing and electrical to be fire and/or smoke sealed.

- 1) Are the contractors to only seal the plumbing due the scope of replacing sanitary waste and vent?
- 2) Existing risers are not all fire sealed inside the interstitial space. Does this need to be sealed even if the existing pipe is not being replaced through to the floor above?

REPLY:

RFIs will be answered via amendment(s).

All new work will need to comply. Existing pipe that is not being changed can remain in place without updating. Existing pipe that is removed and reinstalled will need to comply.

Refer to SOW II.A.3 - Contractor to seal plumbing penetrations through existing fire-rated partitions...for the sections of piping that are demolished and replaced. Existing penetrations that are not sealed can remain. - Eric Dodson VA COR

RFI NO.: 007	DATE: 4/10/2026	SPEC/DWG. REFERENCE(s): GI-05 & GI-07
REPLY NEEDED BY:		

INFORMATION NEEDED:

Will existing piping that does not have a hanger or support before the 1st connection inside the interstitial space have support from the floor above? Will all existing hangers need to be replaced?

New hangers supported from the floor above to be provided for existing piping in accordance to specification 220511.

Existing hangers need replaced with new and all pipe that is being worked on shall comply with the design intent.

REPLY:

RFIs will be answered via amendment(s).

Refer to EoR response above in blue. - Eric Dodson VA COR
