Basis For Decision That Only One Source Is Available

The XG-75 system operates on the existing AN/SRC-55(V) Hierarchical Yet Dynamically Reprogrammable Architecture (HYDRA) system infrastructure already installed on T-AKE vessels. The XG-75 is the only radio compatible with this proprietary software and hardware from L3 Harris Technologies, Inc. This information is confirmed by the T-AKE install contract award, in support of T-ALT 472, N32205219P6102; and install contract award N3220523P2086,

JUSTIFICATION (NTE SAT) IN ACCORDANCE WITH FAR 12.102(a)**

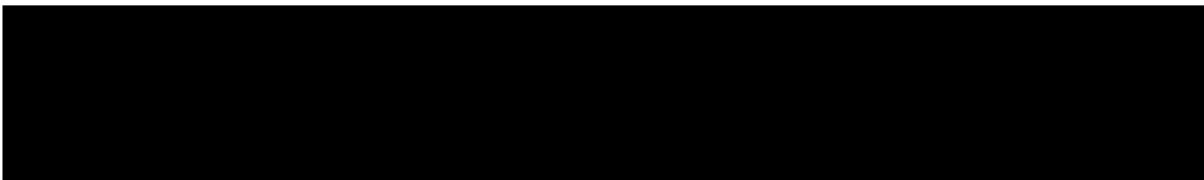

Changes to the ship's infrastructure and antenna system to support an alternative system or radio would require a complete redesign of the HYDRA system, significant ship alterations, and dramatically increase costs associated not only with a new system but also with logistics, training, and supportability. Any work performed by any company other than the OEM would void any liability or warranty on this equipment.

Additionally, The technical data governing performance of the required services is contained in Tech Manual No. TE100-A6-MMC-010_0_0; Drawing No. AD-EA-018720 & AD-EA101601V5 (Ref 2). The items associated technical data are controlled under 22 CFR Parts 120-130 (ITAR). Disclosure of the controlling technical data is restricted to authorized persons and entities only; listing L3 Harris Technologies as the OEM.
