1.0 PRODUCT REQUIREMENTS

The Department of Veterans Affairs (VA), Office of Information and Technology (OI&T), Veteran Relationship Management (VRM) has a requirement for software maintenance and support for one, perpetual brand name eGain Enterprise Knowledge Management (KM) software license. The existing Enterprise KM software license includes unlimited agent license for eGain Knowledge Agents, unlimited sessions for the external facing portal hits through eGain Web Self Service, and unlimited access through Application Program Interfaces for Customer Chat deflection and the Inquiry Routing and Information System Widgets. Additionally, the Enterprise KM software license includes a mobile application for iPhone Operating System and Android devices that links to KM and the Virtual Interaction Management Digital Channel Analytic Package.

Software maintenance and support shall include the same periodic upgrades, updates, enhancements, and corrections to software that are offered commercially. Technical support shall be provided 24 hours per day, seven (7) days per week, 365 days per year (24/7/365), and shall include the same enhanced self-help, search capabilities, and live issue resolution support services that are commercially available.

The VA uses its eGain software license in a Software as a Service (SaaS) environment that requires renewed to comply with the Health Insurance Portability and Accountability Act (HIPAA) and payment card industry (PCI) security requirements. The SaaS environment shall be Federal Risk and Authorization Management Program (FedRAMP) compliant. The SaaS environment shall be cloud hosted and managed by a third-party software vendor directly and shall not be hosted in a VA on-premise environment nor the VA Enterprise Cloud (VAEC). The SaaS environment shall be accessible over a secure internet connection, for example by logging into a web application from a web browser or utilizing a Site-to-Site Virtual Private Network (VPN). The Contractor shall support the Government's compliance efforts when requested by the Government.

The Contractor shall provide eGain Premier Support which includes troubleshooting support for end-to-end system problems including collection of proprietary log data and data analysis on the proprietary log data. The Contractor shall provide progress or metric reports as needed and requested by the Contracting Officer Representative.

The Contractor shall provide the following:

Description	Part no.	Unit of Issue	QTY
BASE PERIOD			
The Period of Performance (PoP) shall be June 24, 2026, through June 23, 2027.			
Enterprise KM Maintenance and Technical Support (Standard Support)	KME-E-201-1-EGAN	Month (MO)	12
KM Not Secure (NS) Co-Browse as a FedRAMP compliant SaaS environment	KME-FEDRAMP- 201-1	MO	12

Description	Part no.	Unit of Issue	QTY
eGain Premier Support for KME-E-201-1-EGAN, KM Enterprise Maintenance	EG-PS-Premier-VA	MO	12
eGain User Guided Help	EG-PS-GH-VA	MO	12
OPTION PERIOD 1			
The PoP shall be 12-months, anticipated to from expiration of the base period.			
Enterprise KM Maintenance and Technical Support (Standard Support)	KME-E-201-1-EGAN	MO	12
KM NS Co-Browse as a FedRAMP compliant SaaS environment	KME-FEDRAMP- 201-1	MO	12
eGain Premier Support for KME-E-201-1-EGAN, KM Enterprise Maintenance (including eGain Cloud Services)	EG-PS-Premier-VA	MO	12
eGain User Guided Help	EG-PS-GH-VA	MO	12

1.1 QUALITY LEVEL

The Contractor shall provide maintenance and support of VA's eGain perpetual software license, as described here in, sufficient to maintain no less than 99.9% availability time. In the event the Contractor is unable to meet the specified uptime performance in a particular quarter, the Contractor shall discount that quarter's overall service fee for eGain Premier Support. The Government will take the awarded price for a year and divide by 4 to calculate the price for a quarter.

Quality Level	Discount
100% to 99.9%	0%
99.9% to 99.2%	5%
99.2% to 98.5%	10%
98.5% to 97.8%	15%
< 97.8%	20%

The Contractor shall respond within the VA Quality Level set forth below for each Severity Level. The specifics of the process are listed in the eCSP for VA.

VA Severity Level	Definition	Response Time Quality Level
SEV1	Critical – Inoperable: Defect prevents the performance of an operational/mission essential capability, jeopardizes security, and causes system to not respond or end abnormally. No workaround exists.	Respond to initial ticket or notification within 30 minutes and work with VA's sustainment organization for issue identification and resolution, with a team of resources working 24x7 until issue is resolved.

SEV2	Major – Operable in degraded mode: A process does not work as specified or produces error that significantly degrades system or functionality. No workaround exists.	Respond to initial ticket or notification within one (1) hour and work with VA's sustainment organization for issue identification and resolution, with a team of resources working 24x7 until issue is resolved.
SEV3	Average – A process does not work as specified and/or produces an error that degrades or impacts the system or functionality. A workaround can be developed that provides the required functionality until a fix can be applied.	Respond to initial ticket or notification within 4 hours and work with VA's sustainment organization for issue identification and resolution.
SEV4	Minor: Minor defect that is cosmetic or inconvenient but does not prevent user from using the system to accomplish their task. Minor defect fixes can be applied as schedule allows.	Respond to initial ticket or notification within 8 business hours of discovery and work with VA's sustainment organization for issue identification and resolution.

2.0 NOTICE OF THE FEDERAL ACCESSIBILITY LAW AFFECTING ALL INFORMATION AND COMMUNICATION TECHNOLOGY (ICT) PROCUREMENTS (SECTION 508)

On January 18, 2017, the Access Board issued a final rule that updated accessibility requirements covered by Section 508 and refreshed guidelines for telecommunications equipment subject to Section 255 of the Communications Act. The final rule went into effect on January 18, 2018. The revisions and updates to the Section 508-based standards and Section 255-based guidelines are intended to ensure that information and communication technology (ICT) covered by the respective statutes is accessible to and usable by individuals with disabilities.

2.1 SECTION 508 – INFORMATION AND COMMUNICATION TECHNOLOGY (ICT) STANDARDS

The Section 508 standards established by the Access Board are incorporated into, and made part of all VA orders, solicitations and purchase orders developed to procure ICT. These standards are found in their entirety at: [Revised 508 Standards and 255 Guidelines \(access-board.gov\)](#). A single PDF file version of the Revised Section 508 Standards and 255 Guidelines will be supplied upon request, or can be obtained from the Access Board website. Federal agencies must comply with the Rehabilitation Act of 1973, as amended.

The Contractor shall comply with “508 Chapter 2: Scoping Requirements” for all electronic ICT and content delivered under this contract. Specifically, as appropriate for the technology and its functionality, the Contractor shall comply with the technical standards marked here:

- ☒ E205 Electronic Content – (Accessibility Standard -WCAG 2.0 Level A and AA Guidelines)
- ☒ E204 Functional Performance Criteria
- ☐ E206 Hardware Requirements
- ☒ E207 Software Requirements
- ☒ E208 Support Documentation and Services Requirements

2.2 COMPATABILITY WITH ASSISTIVE TECHNOLOGY

The standards do not require installation of specific accessibility-related software or attachment of an assistive technology device. Section 508 requires that ICT be compatible with such software and devices so that ICT can be accessible to and usable by individuals using assistive technology, including but not limited to screen readers, screen magnifiers, and speech recognition software.

2.3 ACCEPTANCE AND ACCEPTANCE TESTING

Deliverables resulting from this solicitation will be accepted based in part on satisfaction of the Section 508 Chapter 2: Scoping Requirements standards identified above. The Government reserves the right to test for Section 508 Compliance before delivery. The Contractor shall be able to demonstrate Section 508 Compliance upon delivery.

3.0 INFORMATION TECHNOLOGY USING SUSTAINABLE PRODUCTS AND SERVICES

Not Applicable.

4.0 GENERAL REQUIREMENTS

4.1 VA TECHNICAL REFERENCE MODEL

The Contractor shall comply with the VA OIT Technical Reference Model (VA TRM). Compliance with the VA TRM is achieved by using only technologies and standards that are listed as approved for use in the VA TRM. The Contractor shall provide all necessary information requested by VA to ensure TRM approval is obtained prior to use on VA's network.

4.2 ZERO TRUST – VA CRITICAL SECURITY CONTROLS

VA has established minimum mandatory security requirements and requires that any network connected software system or service must meet the VA Critical Security Controls as outlined in the VA Memorandum, "VA Security Controls", <https://www.voa.va.gov/DocumentView.aspx?DocumentID=5010>. VA Critical Security Controls identify the minimum mandatory requirements that must be implemented across all VA enterprise infrastructure, cloud computing environments, information systems, networks, and specialized devices (medical devices/systems, special-purpose systems, and research scientific computing devices) that process, store, and/or transmit VA data. Effective July 1, 2025, the Contractor shall implement these VA Critical Security Controls, within any network connected software system or service prior to being authorized for use in the VA. This functional requirement is not negotiable, and Plan of Action & Milestones (POAM) will not be accepted in the event these controls cannot be implemented for new systems. Critical Security Controls are intended to increase VA's security posture and provide security and privacy risk visibility into the VA network and is not a new requirement. The Contractor's failure to maintain these VA Critical Controls after implementation will result in VA discontinuing the use of the system.

4.3 SOCIAL SECURITY NUMBER (SSN) REDUCTION

The Contractor solution shall support the Social Security Number (SSN) Fraud Prevention Act (FPA) of 2017 which prohibits the inclusion of SSNs on any document sent by mail. The Contractor support shall also be performed in accordance with Section 240 of the Consolidated Appropriations Act (CAA) 2018, enacted March 23, 2018, which mandates VA to discontinue using SSNs to identify individuals in all VA information systems as the Primary Identifier. The Contractor shall ensure that any new IT solution discontinues the use of SSN as the Primary Identifier to replace the SSN with the Integrated Control Number (ICN) in all VA information systems for all individuals. The Contractor shall ensure that all Contractor delivered applications and systems integrate with the VA Master Person Index (MPI) for identity traits to include the use of the ICN as the Primary Identifier. The Contractor solution may only use a Social Security Number to identify an individual in an information system if and only if the use of such number is required to obtain information VA requires from an information system that is not under the jurisdiction of VA.

4.4 INTERNET PROTOCOL VERSION 6 (IPv6)

The Contractor solution shall support IPv6-Only based upon the memo issued by the Office of Management and Budget (OMB) on November 19, 2020 (<https://www.whitehouse.gov/wp-content/uploads/2020/11/M-21-07.pdf>). Which defines IPv6-only as the state of an operational system or service when IPv4 protocol functions (addressing, packet forwarding) are not in use. The NIST USGv6 profile defines technical requirements for a product to be capable of operating in IPv6-Only environments. IPv6-Only technology, in accordance with the USGv6 Program (<https://www.nist.gov/programs-projects/usgv6-program/usgv6-revision-1>), NIST Special Publication (SP) 500-267B Revision 1 "USGv6 Profile"

(<https://doi.org/10.6028/NIST.SP.500-267Br1>), and NIST SP 800-119 “Guidelines for the Secure Deployment of IPv6” (<https://doi.org/10.6028/NIST.SP.800-119>), compliance shall be included in all IT infrastructures, application designs, application development, operational systems and sub-systems, and their integration. In addition to the above requirements, all devices, applications, and systems shall support all applicable functionality on native IPv6-Only as well as dual stack (IPv6 / IPv4) connectivity without additional memory or other resources being provided by the Government, so that they can function in a mixed environment. All public/external facing servers and services (e.g., web, email, DNS, ISP services, etc.) shall support native IPv6-Only and dual stack (IPv6 / IPv4) users and all internal infrastructure and applications shall support using native IPv6-Only and dual stack (IPv6 / IPv4) for all functionality and operations.

4.5 TRUSTED INTERNET CONNECTION (TIC)

The Contractor solution shall meet the requirements outlined in Office of Management and Budget Memorandum M-19-26, “Update to the Trusted Internet Connections (TIC) Initiative” (<https://www.whitehouse.gov/wp-content/uploads/2019/09/M-19-26.pdf>), VA Directive 6513 “Secure External Connections”, and shall comply with the TIC 3.0 Core Guidance Documents, including all Volumes and TIC Use Cases, found at the Cybersecurity & Infrastructure Security Agency (CISA) (<https://www.cisa.gov/publication/tic-30-core-guidance-documents>.)

4.6 POSITION/TASK RISK DESIGNATION LEVEL(S)

In accordance with VA Handbook 0710, Personnel Security and Suitability Program, the position sensitivity and the level of background investigation commensurate with the required level of access for the following tasks within the PWS are:

**Position Sensitivity and Background Investigation Requirements
by Service Task/Item Number**

Service Task / Item Number	Tier1 / Low Risk	Tier 2 / Moderate Risk	Tier 4 / High Risk
1.0	☐	☒	☐
1.1	☐	☒	☐

The Tasks identified above and the resulting Position Sensitivity and Background Investigation requirements identify, in effect, the Background Investigation requirements for Contractor individuals, based upon the tasks the particular Contractor individual will be working. The submitted Contractor Staff Roster must indicate the required Background Investigation Level for each Contractor individual based upon the tasks the Contractor individual will be working, in accordance with their submitted proposal.

4.7 GOVERNMENT FURNISHED PROPERTY

The Government has multiple remote access solutions available to include Citrix Access Gateway (CAG), Site-to-Site Virtual Private Network (VPN), and RESCUE VPN.

The Government's issuance of Government Furnished Equipment (GFE) is limited to Contractor personnel requiring direct access to the network to: development environments; install, configure and run Technical Reference Model (TRM) approved software and tools (e.g., Oracle, Fortify, Eclipse, SoapUI, WebLogic, LoadRunner); upload/download/ manipulate code, run scripts, and apply patches; configure and change system settings; check logs, troubleshoot/debug, and test/QA.

When necessary, the Government will furnish desktops or laptops, for use by the Contractor to access VA networks, systems, or applications to meet the requirements of this PD. The overarching goal is to determine the most cost-effective approach to providing needed access to the VA environment coupled with the need to ensure proper Change Management principles are followed. Contractor personnel shall adhere to all VA system access requirements for on-site and remote users in accordance with VA standards, local security regulations, policies and rules of behavior. GFE shall be approved by the COR and Program Manager on a case-by-case basis prior to issuance.

Based upon the Government assessment of remote access solutions and requirements of this effort, the Government estimates that the following GFE will be required by this effort:

1. laptops

The Government will only consider providing Personal Identity Verification card readers to be connected to other GFE, (i.e. laptops). The Government will not provide IT accessories including but not limited to Mobile Wi-Fi hotspots/wireless access points, additional or specialized keyboards or mice, laptop bags, extra charging cables, extra Personal Identity Verification card readers, peripheral devices, or additional Random Access Memory (RAM) unless specifically authorized for GFE. The Contractor is responsible for providing these types of IT accessories in support of this effort as necessary and any VA installation required for these IT accessories shall be coordinated with the COR.

Additionally, the Contractor shall provide a monthly GFE status report. For purposes of this report, reportable GFE includes equipment that is furnished by the Government as tangible "personal" property which the Contractor takes possession of, physically leaves a Government facility, and needs to be returned at the end of Contractor performance. The following information shall be provided for each piece of GFE:

1. Name of Contractor employee assigned to the GFE
2. Type of Equipment (Make and Model)
3. Tracking Number/Serial Number
4. VA Bar Code
5. Location
6. Anticipated Transfer Date to Government
7. Anticipated Transfer Location

4.8 ADDITIONAL CLOUD-SPECIFIC SECURITY AND PRIVACY ACQUISITION REQUIREMENTS

The Contractor shall support the Government's compliance with ATO and FEDRAMP by assisting and responding timely to inquiries from VA OIT and providing required documentation when requested by the Government to ensure VA's eGain perpetual software license maintains compliance.

The Government's ATO and FEDRAMP include the following:

1. The information system solution selected by the Contractor shall comply with the Federal Information Security Management Act (FISMA).
2. The Contractor shall comply with FedRAMP requirements as mandated by Federal laws and policies, including making available any documentation, physical access, and logical access needed to support this requirement. The contractor shall create, maintain, and update the following documentation using FedRAMP requirements and templates, which are available at www.FedRAMP.gov. The FedRAMP ATO package is comprised of this documentation:
 - a. Privacy Impact Assessment (PIA)
 - b. FedRAMP Test Procedures and Results
 - c. Security Assessment Report (SAR)
 - d. System Security Plan (SSP)
 - e. IT System Contingency Plan (CP)
 - f. IT System Contingency Plan (CP) Test Results
 - g. Plan of Action and Milestones (POA&M)
 - h. Continuous Monitoring Plan (CMP)
 - i. FedRAMP Control Tailoring Workbook
 - j. Control Implementation Summary Table
 - k. Results of Penetration Testing
 - l. Software Code Review
 - m. Interconnection Agreements/Service Level Agreements/Memorandum of Agreements
3. The information system must be assessed by an accredited 3PAO to support initial authorization and whenever there is a significant change to the system's security posture in accordance with the FedRAMP Continuous Monitoring Plan.
4. The Contractor shall apply the appropriate set of baseline controls in accordance with VA's categorization of the system (as defined in FIPS 199), as required in the FedRAMP Security Requirements Baseline document to ensure compliance to security standards.
5. The Contractor shall, where applicable, assist with the VA Authority to Operate (ATO) Process to help achieve agency authorization of a cloud service or migrated application.
6. The Contractor shall maintain a security management continuous monitoring environment based upon the latest edition of FedRAMP Security Controls Baseline and FedRAMP Continuous Monitoring Strategy Plan.
7. To the extent required to carry out the FedRAMP assessment and authorization

process and FedRAMP continuous monitoring, to safeguard against threats and hazards to the security, integrity, and confidentiality of any non-public VA data collected and stored by the Contractor, the Contractor shall afford VA access to the Contractor's and Cloud Service Provider's facilities, installations, technical capabilities, operations, documentation, records, and databases.

8. If new or unanticipated threats or hazards are discovered by either VA or the Contractor, or if existing safeguards have ceased to function, the discoverer shall immediately bring the situation to the attention of the other party in accordance with the SLA and FedRAMP.
9. The Contractor shall comply with all VA and FedRAMP privacy requirements.
10. VA has the right to perform manual or automated audits, scans, reviews, or other inspections of the vendor's IT environment being used to provide or facilitate services for VA.
11. Identified gaps between required FedRAMP Security Control Baselines and Continuous Monitoring controls and the contractor's implementation as documented in the Security Assessment Report shall be tracked by the contractor for mitigation in a Plan of Action and Milestones (POA&M) document. Depending on the severity of the gaps, the Department may require any gaps remediated before a provisional authorization is issued.
12. No data shall be released by the Contractor without the consent of VA in writing. All requests for release must be submitted in writing to the VA Contracting Officer.
13. VA may choose to cancel the Contract and terminate any outstanding orders if the contractor has its ATO revoked, and the deficiencies are greater than VA risk tolerance thresholds.
14. VA reserves the right to perform Penetration Testing. If VA exercises this right, the contractor shall allow VA employees (or designated third parties) to conduct Security Assessment activities to include control reviews in accordance with FedRAMP requirements. This Security Assessment does not omit the FedRAMP requirement for a 3PAO assessment.
15. FedRAMP deliverables shall be labeled "CONTROLLED UNCLASSIFIED INFORMATION" (CUI) or contractor selected designation per document sensitivity. External transmission/dissemination of FOUO and CUI to or from a VA computer must be encrypted. Certified encryption modules must be used in accordance with FIPS PUB 140-2, "Security requirements for Cryptographic Modules."
16. All VA systems must comply with the [Binding Operational Directive 19-01](#). For SaaS systems that are using VA branding, a .gov URL must be used or a POA&M must be created.

Deliverable:

Responses to Government Inquiries

ADDENDUM B – VA INFORMATION AND INFORMATION SYSTEM SECURITY/ PRIVACY LANGUAGE

NOTE: In the event of a conflict, VAAR Security Clauses take precedence over the language in this Addendum B.

APPLICABLE SECTIONS FROM: VA NOTICE 24-12, APRIL 22, 2024, UPDATE TO VA HANDBOOK 6500.6, CONTRACT SECURITY, APPENDIX C VA INFORMATION AND INFORMATION SYSTEM SECURITY/PRIVACY LANGUAGE, FOR INCLUSION INTO CONTRACTS, AS APPROPRIATE

B1. GENERAL

This entire section applies to all acquisitions requiring any Information Security and Privacy language. Contractors, contractor personnel, Subcontractors and subcontractor personnel will be subject to the same federal laws, regulations, standards, VA directives and handbooks, as VA personnel regarding information and information system security and privacy.

B2. VA INFORMATION CUSTODIAL LANGUAGE

- a. The Government shall receive unlimited rights to data/intellectual property first produced and delivered in the performance of this contract or order (hereinafter “contract”) unless expressly stated otherwise in this contract. This includes all rights to nonproprietary source code and all documentation created in support thereof. The primary clause used to define Government and Contractor data rights is FAR 52.227-14 Rights in Data – General. The primary clause used to define computer software license (not data/intellectual property first produced under this Contractor or order) is FAR 52.227-19, Commercial Computer Software License.
- b. Information made available to the Contractor by VA for the performance or administration of this contract will be used only for the purposes specified in the service agreement, SOW, PWS, PD, and/or contract. The Contractor shall not use VA information in any other manner without prior written approval from a VA Contracting Officer (CO). The primary clause used to define Government and Contractor data rights is FAR 52.227-14 Rights in Data – General.
- c. VA information will not be co-mingled with any other data on the Contractor’s information systems or media storage systems. The Contractor shall ensure compliance with Federal and VA requirements related to data protection, data encryption, physical data segregation, logical data segregation, classification requirements and media sanitization.
- d. VA reserves the right to conduct scheduled or unscheduled audits, assessments, or investigations of Contractor Information Technology (IT) resources to ensure

information security is compliant with Federal and VA requirements. The Contractor shall provide all necessary access to records (including electronic and documentary materials related to the contracts and subcontracts) and support (including access to Contractor and Subcontractor staff associated with the contract) to VA, VA's Office Inspector General (OIG), and/or Government Accountability Office (GAO) staff during periodic control assessments, audits, or investigations.

- e. The Contractor may only use VA information within the terms of the contract and applicable Federal law, regulations, and VA policies. If new Federal information security laws, regulations or VA policies become applicable after execution of the contract, the parties agree to negotiate contract modification and adjustment necessary to implement the new laws, regulations, and/or policies.
- f. The Contractor shall not make copies of VA information except as specifically authorized and necessary to perform the terms of the contract. If copies are made for restoration purposes, after the restoration is complete, the copies shall be destroyed in accordance with VA Directive 6500, VA Cybersecurity Program and VA Information Security Knowledge Service.
- g. If a Veterans Health Administration (VHA) contract is terminated for default or cause with a business associate, the related local Business Associate Agreement (BAA) shall also be terminated and actions taken in accordance with VHA Directive 1605.05, Business Associate Agreements. If there is an executed national BAA associated with the contract, VA will determine what actions are appropriate and notify the contractor.
- h. The Contractor shall store and transmit VA sensitive information in an encrypted form, using VA-approved encryption tools which are, at a minimum, Federal Information Processing Standards (FIPS) 140-2, Security Requirements for Cryptographic Modules (or its successor) validated and in conformance with VA Information Security Knowledge Service requirements. The Contractor shall transmit VA sensitive information using VA approved Transport Layer Security (TLS) configured with FIPS based cipher suites in conformance with National Institute of Standards and Technology (NIST) 800-52, Guidelines for the Selection, Configuration and Use of Transport Layer Security (TLS) Implementations.
- i. The Contractor's firewall and web services security controls, as applicable, shall meet or exceed VA's minimum requirements.
- j. Except for uses and disclosures of VA information authorized by this contract for performance of the contract, the Contractor may use and disclose VA information only in two situations: (i) in response to a qualifying order of a court of competent jurisdiction after notification to VA CO (ii) with written approval from the VA CO.

The Contractor shall refer all requests for, demands for production of or inquiries about, VA information and information systems to the VA CO for response.

- k. Notwithstanding the provision above, the Contractor shall not release VA records protected by Title 38 U.S.C. § 5705, Confidentiality of medical quality-assurance records and/or Title 38 U.S.C. § 7332, Confidentiality of certain medical records pertaining to drug addiction, sickle cell anemia, alcoholism or alcohol abuse or infection with Human Immunodeficiency Virus (HIV). If the Contractor is in receipt of a court order or other requests for the above-mentioned information, the Contractor shall immediately refer such court order or other requests to the VA CO for response.
- l. Information made available to the Contractor by VA for the performance or administration of this contract or information developed by the Contractor in performance or administration of the contract will be protected and secured in accordance with VA Directive 6500 and Identity and Access Management (IAM) Security processes specified in the VA Information Security Knowledge Service.
- m. Any data destruction done on behalf of VA by a Contractor shall be done in accordance with National Archives and Records Administration (NARA) requirements as outlined in VA Directive 6300, Records and Information Management, VA Handbook 6300.1, Records Management Procedures, and applicable VA Records Control Schedules.
- n. The Contractor shall provide its plan for destruction of all VA data in its possession according to VA Directive 6500 and NIST 800-88, Guidelines for Media Sanitization prior to termination or completion of this contract. If directed by the COR/CO, the Contractor shall return all Federal Records to VA for disposition.
- o. Any media, such as paper, magnetic tape, magnetic disks, solid state devices or optical discs that is used to store, process, or access VA information that cannot be destroyed shall be returned to VA. The Contractor shall hold the appropriate material until otherwise directed by the Contracting Officer's Representative (COR) or CO. Items shall be returned securely via VA-approved methods. VA sensitive information must be transmitted utilizing VA-approved encryption tools which are validated under FIPS 140-2 (or its successor) and NIST 800-52. If mailed, the Contractor shall send via a trackable method (USPS, UPS, FedEx, etc.) and immediately provide the COR/CO with the tracking information. Self-certification by the Contractor that the data destruction requirements above have been met shall be sent to the COR/CO within 30 business days of termination of the contract.
- p. All electronic storage media (hard drives, optical disks, CDs, back-up tapes, etc.) used to store, process or access VA information will not be returned to the

Contractor at the end of lease, loan, or trade-in. Exceptions to this paragraph will only be granted with the written approval of the VA CO.

B3. ACCESS TO VA INFORMATION AND VA INFORMATION SYSTEMS

- a. A Contractor/Subcontractor shall request logical (technical) or physical access to VA information and VA information systems for their employees and subcontractors only to the extent necessary to perform the services specified in the solicitation or contract. This includes indirect entities, both affiliate of Contractor/Subcontractor and agent of Contractor/Subcontractor.
- b. Contractors and subcontractors shall sign the VA Information Security Rule of Behavior (ROB) before access is provided to VA information and information systems (see Section 4, Training, below). The ROB contains the minimum user compliance requirements and does not supersede any policies of VA facilities or other agency components which provide higher levels of protection to VA's information or information systems. Users who require privileged access shall complete the VA elevated privilege access request processes before privileged access is granted.
- c. All Contractors and Subcontractors working with VA information are subject to the same security investigative and clearance requirements as those of VA appointees or employees who have access to the same types of information. The level and process of background security investigations for contractors shall be in accordance with VA Directive and Handbook 0710, Personnel Suitability and Security Program. The Office of Human Resources and Administration/Operations, Security and Preparedness (HRA/OSP) is responsible for these policies and procedures. Contract personnel who require access to classified information or information systems shall have an appropriate security clearance. Verification of a Security Clearance shall be processed through the Special Security Officer located in HRA/OSP. Contractors shall conform to all requirements stated in the National Industrial Security Program Operating Manual (NISPOM).
- d. All Contractors and subcontractors shall comply with conditions specified in VAAR 852.204-71(d); Contractor operations required to be in United States. All Contractors and Subcontractors working with VA information must be permanently located within a jurisdiction subject to the law of the United States or its Territories to the maximum extent feasible. If services are proposed to be performed abroad the Contractor must state where all non-U.S. services are provided. The Contractor shall deliver to VA a detailed plan specifically addressing communications, personnel control, data protection and potential legal issues. The plan shall be approved by the COR/CO in writing prior to access being granted.

- e. The Contractor shall notify the COR/CO in writing immediately (no later than 24 hours) after personnel separation or occurrence of other causes. Causes may include the following:
 - (1) Contractor/Subcontractor personnel no longer has a need for access to VA information or VA information systems.
 - (2) Contractor/Subcontractor personnel are terminated, suspended, or otherwise has their work on a VA project discontinued for any reason.
 - (3) Contractor believes their own personnel or Subcontractor personnel may pose a threat to their company's working environment or to any company-owned property. This includes Contractor-owned assets, buildings, confidential data, customers, employees, networks, systems, trade secrets and/or VA data.
 - (4) Any previously undisclosed changes to Contractor/Subcontractor background history are brought to light, including but not limited to changes to background investigation or employee record.
 - (5) Contractor/Subcontractor personnel have their authorization to work in the United States revoked.
 - (6) Agreement by which Contractor provides products and services to VA has either been fulfilled or terminated, such that VA can cut off electronic and/or physical access for Contractor personnel.
- f. In such cases of contract fulfillment, termination, or other causes; the Contractor shall take the necessary measures to immediately revoke access to VA network, property, information, and information systems (logical and physical) by Contractor/Subcontractor personnel. These measures include (but are not limited to): removing and then securing Personal Identity Verification (PIV) badges and PIV – Interoperable (PIV-I) access badges, VA-issued photo badges, credentials for VA facilities and devices, VA-issued laptops, and authentication tokens. Contractors shall notify the appropriate VA COR/CO immediately to initiate access removal.
- g. Contractors/Subcontractors who no longer require VA accesses will return VA-issued property to VA. This property includes (but is not limited to): documents, electronic equipment, keys, and parking passes. PIV and PIV-I access badges shall be returned to the nearest VA PIV Badge Issuance Office. Once they have had access to VA information, information systems, networks and VA property in their possessions removed, Contractors shall notify the appropriate VA COR/CO.

B4. TRAINING

- a. All contractors and subcontractors requiring access to VA information and VA information systems shall successfully complete the following before being granted access to VA information and its systems:
 - (1) VA Privacy and Information Security Awareness and Rules of Behavior course (Talent Management System (TMS) #10176) initially and annually thereafter.
 - (2) Sign and acknowledge (electronically through TMS #10176) understanding of and responsibilities for compliance with the Organizational Rules of Behavior, relating to access to VA information and information systems initially and annually thereafter; and
 - (3) Successfully complete any additional cyber security or privacy training, as required for VA personnel with equivalent information system or information access [to be defined by the VA program official and provided to the VA CO for inclusion in the solicitation document – i.e., any role-based information security training].
- b. The Contractor shall provide to the COR/CO a copy of the training certificates and certification of signing the Organizational Rules of Behavior for each applicable employee within five days of the initiation of the contract and annually thereafter, as required.
- c. Failure to complete the mandatory annual training is grounds for suspension or termination of all physical or electronic access privileges and removal from work on the contract until such time as the required training is complete.

B5. SECURITY INCIDENT INVESTIGATION

- a. The Contractor, Subcontractor, their employees, or business associates shall immediately (within one hour) report suspected security / privacy incidents to the VA OIT's Enterprise Service Desk (ESD) by calling (855) 673-4357 (TTY: 711). The ESD is OIT's 24/7/365 single point of contact for IT-related issues. After reporting to the ESD, the Contractor, Subcontractor, their employees, or business associates shall, within one hour, provide the COR/CO the incident number received from the ESD.
- b. To the extent known by the Contractor/Subcontractor, the Contractor/Subcontractor's notice to VA shall identify the information involved and the circumstances surrounding the incident, including the following:
 - (1) The date and time (or approximation of) the Security Incident occurred.
 - (2) The names of individuals involved (when applicable).

- (3) The physical and logical (if applicable) location of the incident.
 - (4) Why the Security Incident took place (i.e., catalyst for the failure).
 - (5) The amount of data belonging to VA believed to have been compromised.
 - (6) The remediation measures the Contractor is taking to ensure no future incidents of a similar nature.
- c. After the Contractor has provided the initial detailed incident summary to VA, they will continue to provide written updates on any new and relevant circumstances or facts they discover. The Contractor, Subcontractor, and their employees shall fully cooperate with VA or third-party entity performing an independent risk analysis on behalf of VA. Failure to cooperate may be deemed a material breach and grounds for contract termination.
 - d. VA IT Contractors shall follow VA Handbook 6500, Risk Management Framework for VA Information Systems VA Information Security Program, and VA Information Security Knowledge Service guidance for implementing an Incident Response Plan or integrating with an existing VA implementation.
 - e. In instances of theft or break-in or other criminal activity, the Contractor/Subcontractor must concurrently report the incident to the appropriate law enforcement entity (or entities) of jurisdiction, including the VA OIG, and the VA Office of Security and Law Enforcement. The Contractor, its employees, and its Subcontractors and their employees shall cooperate with VA and any law enforcement authority responsible for the investigation and prosecution of any possible criminal law violation(s) associated with any incident. The Contractor/Subcontractor shall cooperate with VA in any civil litigation to recover VA information, obtain monetary or other compensation from a third party for damages arising from any incident, or obtain injunctive relief against any third party arising from, or related to, the incident.
 - f. The Contractor shall comply with VA Handbook 6500.2, Management of Breaches Involving Sensitive Personal Information, which establishes the breach management policies and assigns responsibilities for the oversight, management and reporting procedures associated with managing of breaches.
 - g. With respect to unsecured Protected Health Information (PHI), the Contractor is deemed to have discovered a data breach when the Contractor knew or should have known of breach of such information. When a business associate is part of VHA contract, notification to the covered entity (VHA) shall be made in accordance with the executed BAA.
 - h. If the Contractor or any of its agents fails to protect VA sensitive personal information or otherwise engages in conduct which results in a data breach

involving any VA sensitive personal information the Contractor/Subcontractor processes or maintains under the contract; the Contractor shall pay liquidated damages to the VA as set forth in clause [852.211-76, Liquidated Damages—Reimbursement for Data Breach Costs](#).

B6. INFORMATION SYSTEM DESIGN AND DEVELOPMENT

- a. Information systems designed or developed on behalf of VA at non-VA facilities shall comply with all applicable Federal law, regulations, and VA policies. This includes standards for the protection of electronic Protected Health Information (PHI), outlined in 45 C.F.R. Part 164, Subpart C and information and system security categorization level designations in accordance with FIPS 199, Standards for Security Categorization of Federal Information and Information Systems and FIPS 200, Minimum Security Requirements for Federal Information Systems. Baseline security controls shall be implemented commensurate with the FIPS 199 system security categorization (reference VA Handbook 6500 and VA Trusted Internet Connections (TIC) Architecture).
- b. Contracted new developments require creation, testing, evaluation, and authorization in compliance with VA Assessment and Authorization (A&A) processes in VA Handbook 6500 and VA Information Security Knowledge Service to obtain an Authority to Operate (ATO). VA Directive 6517, Risk Management Framework for Cloud Computing Services, provides the security and privacy requirements for cloud environments.
- c. VA IT Contractors, Subcontractors and third-party service providers shall address and/or integrate applicable VA Handbook 6500, VA Handbook 6517, Risk Management Framework for Cloud Computing Services and Information Security Knowledge Service specifications in delivered IT systems/solutions, products and/or services. If systems/solutions, products and/or services do not directly match VA security requirements, the Contractor shall work through the COR/CO to identify the VA organization responsible for governance or resolution. Contractors shall comply with FAR 39.1, specifically the prohibitions referenced.
- d. The Contractor (including producers and resellers) shall comply with Office of Management and Budget (OMB) M-22-18 and M-23-16 when using third-party software on VA information systems or otherwise affecting the VA information. This includes new software purchases and software renewals for software developed or modified by major version change after the issuance date of M-22-18 (September 14, 2022). The term "software" includes firmware, operating systems, applications and application services (e.g., cloud-based software), as well as products containing software. The Contractor shall provide a self-attestation that secure software development practices are utilized as outlined by Executive Order (EO) 14028 and NIST Guidance. A third-party assessment provided by either a certified Federal Risk and Authorization Management Program (FedRAMP) Third Party Assessor Organization (3PAO) or one

approved by the agency will be acceptable in lieu of a software producer's self-attestation.

- e. The Contractor shall ensure all delivered applications, systems and information systems are compliant with Homeland Security Presidential Directive (HSPD) 12 and VA Identity and Access management (IAM) enterprise identity management requirements as set forth in OMB M-19-17, M-05-24, FIPS 201-3, Personal Identity Verification (PIV) of Federal Employees and Contractors (or its successor), M-21-31 and supporting NIST guidance. This applies to Commercial Off-The-Shelf (COTS) product(s) that the Contractor did not develop, all software configurations and all customizations.
- f. The Contractor shall ensure all Contractor delivered applications and systems provide user authentication services compliant with VA Handbook 6500, VA Information Security Knowledge Service, IAM enterprise requirements and NIST 800-63, Digital Identity Guidelines, for direct, assertion-based authentication and/or trust-based authentication, as determined by the design and integration patterns. Direct authentication at a minimum must include Public Key Infrastructure (PKI) based authentication supportive of PIV and/or Common Access Card (CAC), as determined by the business need and compliance with VA Information Security Knowledge Service specifications.
- g. The Contractor shall use VA authorized technical security baseline configurations and certify to the COR that applications are fully functional and operate correctly as intended on systems in compliance with VA baselines prior to acceptance or connection into an authorized VA computing environment. If the Defense Information Systems Agency (DISA) has created a Security Technical Implementation Guide (STIG) for the technology, the Contractor may configure to comply with that STIG. If VA determines a new or updated VA configuration baseline needs to be created, the Contractor shall provide required technical support to develop the configuration settings. FAR 39.1 requires the population of operating systems and applications includes all listed on the NIST National Checklist Program Checklist Repository,
- h. The standard installation, operation, maintenance, updating and patching of software shall not alter the configuration settings from VA approved baseline configuration. Software developed for VA must be compatible with VA enterprise installer services and install to the default "program files" directory with silently install and uninstall. The Contractor shall perform testing of all updates and patching prior to implementation on VA systems.
- i. Applications designed for normal end users will run in the standard user context without elevated system administration privileges.

- j. The Contractor-delivered solutions shall reside on VA approved operating systems. Exceptions to this will only be granted with the written approval of the COR/CO.
- k. The Contractor shall design, develop, and implement security and privacy controls in accordance with the provisions of VA security system development life cycle outlined in NIST 800-37, Risk Management Framework for Information Systems and Organizations: A System Life Cycle Approach for Security and Privacy, VA Directive and Handbook 6500, and VA Handbook 6517.
- l. The Contractor shall comply with the Privacy Act of 1974 (the Act), FAR 52.224-2 Privacy Act, and VA rules and regulations issued under the Act in the design, development, or operation of any system of records on individuals to accomplish a VA function.
- m. The Contractor shall ensure the security of all procured or developed information systems, systems, major applications, minor applications, enclaves and platform information technologies, including their subcomponents (hereinafter referred to as "Information Systems") throughout the life of this contract and any extension, warranty, or maintenance periods. This includes security configurations, workarounds, patches, hotfixes, upgrades, replacements and any physical components which may be necessary to remediate all security vulnerabilities published or known to the Contractor anywhere in the information systems (including systems, operating systems, products, hardware, software, applications and firmware). The Contractor shall ensure security fixes do not negatively impact the Information Systems.
- n. When the Contractor is responsible for operations or maintenance of the systems, the Contractor shall apply the security fixes within the timeframe specified by the associated controls on the VA Information Security Knowledge Service. When security fixes involve installing third party patches (such as Microsoft OS patches or Adobe Acrobat), the Contractor shall provide written notice to the VA COR/CO that the patch has been validated as to not affecting the Systems within 10 business days.

B7. INFORMATION SYSTEM HOSTING, OPERATION, MAINTENANCE OR USE

- a. The Contractor shall comply with all Federal laws, regulations, and VA policies for Information systems (cloud and non-cloud) that are hosted, operated, maintained, or used on behalf of VA at non-VA facilities. Security controls for collecting, processing, transmitting, and storing of VA sensitive information, must be in place. The controls will be tested by VA or a VA sanctioned 3PAO and approved by VA prior to hosting, operation, maintenance or use of the information system or systems by or on behalf of VA. This includes conducting compliance risk assessments, security architecture analysis, routine vulnerability scanning, system patching, change management procedures and the completion

of an acceptable contingency plan for each system. The Contractor's security control procedures shall be the same as procedures used to secure VA-operated information systems.

- b. Outsourcing (Contractor facility, equipment, or staff) of systems or network operations, telecommunications services or other managed services require Assessment and Authorization (A&A) of the Contractor's systems in accordance with VA Handbook 6500 as specified in VA Information Security Knowledge Service. Major changes to the A&A package may require reviewing and updating all the documentation associated with the change. The Contractor's cloud computing systems shall comply with FedRAMP and VA Directive 6517 requirements.
- c. The Contractor shall return all electronic storage media (hard drives, optical disks, CDs, back-up tapes, etc.) on non-VA leased or non-VA owned IT equipment used to store, process or access VA information to VA in accordance with A&A package requirements. This applies when the contract is terminated or completed and prior to disposal of media. The Contractor shall provide its plan for destruction of all VA data in its possession according to VA Information Security Knowledge Service requirements and NIST 800-88. The Contractor shall send a self-certification that the data destruction requirements above have been met to the COR/CO within 30 business days of termination of the contract.
- d. All external internet connections to VA network involving VA information must be in accordance with VA Trusted Internet Connection (TIC) Reference Architecture and VA Directive and Handbook 6513, Secure External Connections and reviewed and approved by VA prior to implementation. Government-owned Contractor-operated systems, third party or business partner networks require a Memorandum of Understanding (MOU) and Interconnection Security Agreements (ISA).
- e. Contractor procedures shall be subject to periodic, announced, or unannounced assessments by VA officials, the OIG or a 3PAO. The physical security aspects associated with Contractor activities are also subject to such assessments. The Contractor shall report, in writing, any deficiencies noted during the above assessment to the VA COR/CO. The Contractor shall use VA's defined processes to document planned remedial actions that address identified deficiencies in information security policies, procedures, and practices. The Contractor shall correct security deficiencies within the timeframes specified in the VA Information Security Knowledge Service.
- f. All major information system changes which occur in the production environment shall be reviewed by the VA to determine the impact on privacy and security of the system. Based on the review results, updates to the Authority to Operate (ATO) documentation and parameters may be required to remain in compliance

with VA Handbook 6500 and VA Information Security Knowledge Service requirements.

- g. The Contractor shall conduct an annual privacy and security self-assessment on all information systems and outsourced services as required. Copies of the assessment shall be provided to the COR/CO. The VA/Government reserves the right to conduct assessment using government personnel or a third-party if deemed necessary. The Contractor shall correct or mitigate any weaknesses discovered during the assessment.
- h. VA prohibits the installation and use of personally owned or Contractor-owned equipment or software on VA information systems. If non-VA owned equipment must be used to fulfill the requirements of a contract, it must be stated in the service agreement, SOW, PWS, PD or contract. All security controls required for government furnished equipment must be utilized in VA approved Other Equipment (OE). Configuration changes to the Contractor OE, must be funded by the owner of the equipment. All remote systems must use a VA-approved antivirus software and a personal (host-based or enclave based) firewall with a VA-approved configuration. The Contractor shall ensure software on OE is kept current with all critical updates and patches. Owners of approved OE are responsible for providing and maintaining the anti-virus software and the firewall on the non-VA owned OE. Approved Contractor OE will be subject to technical inspection at any time.
- i. The Contractor shall notify the COR/CO within one hour of disclosure or successful exploits of any vulnerability which can compromise the confidentiality, integrity, or availability of the information systems. The system or effected component(s) need(s) to be isolated from the network. A forensic analysis needs to be conducted jointly with VA. Such issues will be remediated as quickly as practicable, but in no event longer than the timeframe specified by VA Information Security Knowledge Service. If sensitive personal information is compromised reference VA Handbook 6500.2 and Section 5, Security Incident Investigation.
- j. For cases wherein the Contractor discovers material defects or vulnerabilities impacting products and services they provide to VA, the Contractor shall develop and implement policies and procedures for disclosure to VA, as well as remediation. The Contractor shall, within 30 business days of discovery, document a summary of these vulnerabilities or defects. The documentation will include a description of the potential impact of each vulnerability and material defect, compensating security controls, mitigations, recommended corrective actions, root cause analysis and/or workarounds (i.e., monitoring). Should there exist any backdoors in the products or services they provide to VA (referring to methods for bypassing computer authentication), the Contractor shall provide the VA CO/CO written assurance they have permanently remediated these backdoors.

- k. All other vulnerabilities, including those discovered through routine scans or other assessments, will be remediated based on risk, in accordance with the remediation timelines specified by the VA Information Security Knowledge Service and/or the applicable timeframe mandated by Cybersecurity & Infrastructure Security Agency (CISA) Binding Operational Directive (BOD) 22-01 and BOD 19-02 for Internet-accessible systems. Exceptions to this paragraph will only be granted with the approval of the COR/CO.

B8. SECURITY AND PRIVACY CONTROLS COMPLIANCE TESTING, ASSESSMENT AND AUDITING

- a. Should VA request it, the Contractor shall provide a copy of their (corporation's, sole proprietorship's, partnership's, limited liability company (LLC), or other business structure entity's) policies, procedures, evidence and independent report summaries related to specified cybersecurity frameworks (International Organization for Standardization (ISO), NIST Cybersecurity Framework (CSF), etc.). VA or its third-party/partner designee (if applicable) are further entitled to perform their own audits and security/penetration tests of the Contractor's IT or systems and controls, to ascertain whether the Contractor is complying with the information security, network or system requirements mandated in the agreement between VA and the Contractor.
- b. Any audits or tests of the Contractor or third-party designees/partner VA elects to carry out will commence within 30 business days of VA notification. Such audits, tests and assessments may include the following: (a): security/penetration tests which both sides agree will not unduly impact Contractor operations; (b): interviews with pertinent stakeholders and practitioners; (c): document review; and (d): technical inspections of networks and systems the Contractor uses to destroy, maintain, receive, retain, or use VA information.
- c. As part of these audits, tests and assessments, the Contractor shall provide all information requested by VA. This information includes, but is not limited to, the following: equipment lists, network or infrastructure diagrams, relevant policy documents, system logs or details on information systems accessing, transporting, or processing VA data.
- d. The Contractor and at its own expense, shall comply with any recommendations resulting from VA audits, inspections and tests. VA further retains the right to view any related security reports the Contractor has generated as part of its own security assessment. The Contractor shall also notify VA of the existence of any such security reports or other related assessments, upon completion and validation.
- e. VA appointed auditors or other government agency partners may be granted access to such documentation on a need-to-know basis and coordinated through

the COR/CO. The Contractor shall comply with recommendations which result from these regulatory assessments on the part of VA regulators and associated government agency partners.

B9. PRODUCT INTEGRITY, AUTHENTICITY, PROVENANCE, ANTI-COUNTERFEIT AND ANTI-TAMPERING

- a. The Contractor shall comply with Code of Federal Regulations (CFR) Title 15 Part 7, "Securing the Information and Communications Technology and Services (ICTS) Supply Chain", which prohibits ICTS Transactions from foreign adversaries. ICTS Transactions are defined as any acquisition, importation, transfer, installation, dealing in or use of any information and communications technology or service, including ongoing activities, such as managed services, data transmission, software updates, repairs or the platforming or data hosting of applications for consumer download.
- b. When contracting terms require the Contractor to procure equipment, the Contractor shall purchase or acquire the equipment from an Original Equipment Manufacturer (OEM) or an authorized reseller of the OEM. The Contractor shall attest that equipment procured from an OEM or authorized reseller or distributor are authentic. If procurement is unavailable from an OEM or authorized reseller, the Contractor shall submit in writing, details of the circumstances prohibiting this from happening and procure a product waiver from the VA COR/CO.
- c. All Contractors shall establish, implement, and provide documentation for risk management practices for supply chain delivery of hardware, software (to include patches) and firmware provided under this agreement. Documentation will include chain of custody practices, inventory management program, information protection practices, integrity management program for sub-supplier provided components, and replacement parts requests. The Contractor shall make spare parts available. All Contractor(s) shall specify how digital delivery for procured products, including patches, will be validated and monitored to ensure consistent delivery. The Contractor shall apply encryption technology to protect procured products throughout the delivery process.
- d. If a Contractor provides software or patches to VA, the Contractor shall publish or provide a hash conforming to the FIPS Security Requirements for Cryptographic Modules (FIPS 140-2 or successor).
- e. The Contractor shall provide a software bill of materials (SBOM) for procured (to include licensed products) and consist of a list of components and associated metadata which make up the product. SBOMs must be generated in one of the data formats defined in the National Telecommunications and Information Administration (NTIA) report "The Minimum Elements for a Software Bill of Materials (SBOM)."

- f. Contractors shall use or arrange for the use of trusted channels to ship procured products, such as U.S. registered mail and/or tamper-evident packaging for physical deliveries.
- g. Throughout the delivery process, the Contractor shall demonstrate a capability for detecting unauthorized access (tampering).
- h. The Contractor shall demonstrate chain-of-custody documentation for procured products and require tamper-evident packaging for the delivery of this hardware.

B10. VIRUSES, FIRMWARE, AND MALWARE

- a. The Contractor shall execute due diligence to ensure all provided software and patches, including third-party patches, are free of viruses and/or malware before releasing them to or installing them on VA information systems.
- b. The Contractor warrants it has no knowledge of and did not insert, any malicious virus and/or malware code into any software or patches provided to VA which could potentially harm or disrupt VA information systems. The Contractor shall use due diligence, if supplying third-party software or patches, to ensure the third-party has not inserted any malicious code and/or virus which could damage or disrupt VA information systems.
- c. The Contractor shall provide or arrange for the provision of technical justification as to why any “false positive” hit has taken place to ensure their code’s supply chain has not been compromised. Justification may be required, but is not limited to, when install files, scripts, firmware, or other Contractor-delivered software solutions (including third-party install files, scripts, firmware, or other software) are flagged as malicious, infected, or suspicious by an anti-virus vendor.
- d. The Contractor shall not upload (intentionally or negligently) any virus, worm, malware or any harmful or malicious content, component and/or corrupted data/source code (hereinafter “virus or other malware”) onto VA computer and information systems and/or networks. If introduced (and this clause is violated), upon written request from the VA CO, the Contractor shall:
 - (1) Take all necessary action to correct the incident, to include any and all assistance to VA to eliminate the virus or other malware throughout VA’s information networks, computer systems and information systems; and
 - (2) Use commercially reasonable efforts to restore operational efficiency and remediate damages due to data loss or data integrity damage, if the virus or other malware causes a loss of operational efficiency, data loss, or damage to data integrity.

B11. CRYPTOGRAPHIC REQUIREMENT

- a. The Contractor shall document how the cryptographic system supporting the Contractor's products and/or services protect the confidentiality, data integrity, authentication and non-repudiation of devices and data flows in the underlying system.
- b. The Contractor shall use only approved cryptographic methods as defined in FIPS 140-2 (or its successor) and NIST 800-52 standards when enabling encryption on its products.
- c. The Contractor shall provide or arrange for the provision of an automated remote key-establishment method which protects the confidentiality and integrity of the cryptographic keys.
- d. The Contractor shall ensure emergency re-keying of all devices can be remotely performed within 30 business days.
- e. The Contractor shall provide or arrange for the provision of a method for updating cryptographic primitives or algorithms.

B12. PATCHING GOVERNANCE

- a. The Contractor shall provide documentation detailing the patch management, vulnerability management, mitigation and update processes (to include third-party) prior to the connection of electronic devices, assets or equipment to VA's assets. This documentation will include information regarding the following:
 - (1) The resources and technical capabilities to sustain the program or process (e.g., how the integrity of a patch is validated by VA); and.
 - (2) The approach and capability to remediate newly reported zero-day vulnerabilities for Contractor products.
- b. The Contractor shall verify and provide documentation all procured products (including third-party applications, hardware, software, operating systems, and firmware) have appropriate updates and patches installed prior to delivery to VA.
- c. The Contractor shall provide or arrange the provision of appropriate software and firmware updates to remediate newly discovered vulnerabilities or weaknesses for their products and services within 30 days of discovery. Updates to remediate critical or emergent vulnerabilities will be provided within seven business days of discovery. If updates cannot be made available by Contractor within these time periods, the Contractor shall submit mitigations, methods of exploit detection and/or workarounds to the COR/CO prior to the above deadlines.
- d. The Contractor shall provide or arrange for the provision of appropriate hardware, software and/or firmware updates, when those products, including

open-source software, are provided to the VA, to remediate newly discovered vulnerabilities or weaknesses. Remediations of products or services provided to the VA's system environment must be provided within 30 business days of availability from the original supplier and/or patching source. Updates to remediate critical vulnerabilities applicable to the Contractor's use of the third-party product in its system environment will be provided within seven business days of availability from the original supplier and/or patching source. If applicable third-party updates cannot be integrated, tested and made available by Contractor within these time periods, mitigations and/or workarounds will be provided to the Contracting Officer's Representative (if the order has one) and Contracting Officer before the above deadlines.

B13. DATA CENTER PROVISIONS

- a. The Contractor shall ensure the VA network is accessed by in accordance with VA Directive 6500 and IAM security processes specified in the VA Information Security Knowledge Service.
- b. The Contractor shall ensure network infrastructure and data availability in accordance with VA information system business continuity procedures specified in the VA Information Security Knowledge Service.
- c. The Contractor shall ensure any connections to the internet or other external networks for information systems occur through managed interfaces utilizing VA approved boundary protection devices (e.g., internet proxies, gateways, routers, firewalls, guards or encrypted tunnels).
- d. The Contractor shall encrypt all traffic across the segment of the Wide Area Network (WAN) it manages and no unencrypted Out of Band (OOB) Internet Protocol (IP) traffic will traverse the network.
- e. The Contractor shall ensure tunnel endpoints are routable addresses at each VA operating site.
- f. The Contractor shall secure access from Local Area Networks (LANs) at co-located sites in accordance with VA TIC Reference Architecture, VA Directive and Handbook 6513, and MOU/ISA process specified in the VA Information Security Knowledge Service.
