PART I - THE SCHEDULE

THE INFORMATION SET FORTH IN **SECTION A - SOLICITATION/CONTRACT FORM**, HEREIN CONTAINS IMPORTANT INFORMATION FOR ANY OFFEROR INTERESTED IN RESPONDING TO THIS SOLICITATION. ANY CONTRACT RESULTING FROM THIS SOLICITATION WILL INCLUDE IN ITS **SECTION A - SOLICITATION/CONTRACT FORM**, ACCOUNTING, APPROPRIATION AND GENERAL INFORMATION APPLICABLE TO THE CONTRACT AWARD.

THE CONTRACT SCHEDULE SET FORTH IN **SECTIONS B THROUGH H**, HEREIN, CONTAINS CONTRACTUAL INFORMATION PERTINENT TO THIS SOLICITATION. IT IS NOT AN EXACT REPRESENTATION OF THE CONTRACT DOCUMENT THAT WILL BE AWARDED AS A RESULT OF THIS SOLICITATION. THE CONTRACT COST OR PRICE AND OTHER CONTRACTUAL PROVISIONS PERTINENT TO THE OFFEROR (i.e., those relating to the organizational structure [e.g., Non-Profit, Commercial] and specific cost authorizations unique to the Offeror's proposal and requiring Contracting Officer Prior Approval) WILL BE DISCUSSED IN THE NEGOTIATION PROCESS AND WILL BE INCLUDED IN THE RESULTANT CONTRACT. THE ENCLOSED CONTRACT SCHEDULE IS INTENDED TO PROVIDE THE OFFEROR WITH THE NECESSARY INFORMATION TO UNDERSTAND THE TERMS AND CONDITIONS OF THE RESULTANT CONTRACT.

SECTION B – SUPPLIES OR SERVICES AND PRICES/COSTS

ARTICLE B.1. BRIEF DESCRIPTION OF SUPPLIES OR SERVICES

This contract is for the management and operation of the CRPMC to support NIAID sponsored clinical research trials, with a core focus of HIV/AIDS and its co-morbidities. The Contractor shall provide cGMP-compliant facilities for the receipt, storage, handling, shipping, and disposition of study products. All functions must be conducted in accordance with all federal, local and other applicable regulations governing study product including but not limited to, the CFR, ICH GCP, cGMP, Good Distribution Practices (GDP), Good Documentation Practices and all applicable regulation or guidance.

ARTICLE B.2. ESTIMATED COST - OPTION

- a. The estimated cost of the Base Period of this contract is \$ _____.
- b. The fixed fee for the Base Period of this contract is \$ _____. The fixed fee shall be paid in direct ratio to the level of effort expended; that is, the percent of fee paid shall be equal to the percent of total effort expended. Payment shall be subject to the withholding provisions of the clauses ALLOWABLE COST AND PAYMENT and FIXED FEE referenced in the General Clause Listing in Part II, ARTICLE I.1. of this contract.
- c. The total estimated amount of the contract, represented by the sum of the estimated cost plus the fixed fee for the Base Period is \$ _____.

- d. If the Government exercises its option pursuant to the OPTION PROVISION Article in SECTION H of this contract, the Government's total estimated contract amount represented by the sum of the estimated cost plus the fixed fee will be increased as follows:

	Estimated Cost (\$)	Fixed Fee (\$)	Estimated Cost Plus Fixed Fee (\$)
Base Period			
Option Period(s):			
Total [Base Period and Option(s)]			

ARTICLE B.3. PROVISIONS APPLICABLE TO DIRECT COSTS

This article will prohibit or restrict the use of contract funds, unless otherwise approved by the Contracting Officer. The following is a list of items that may be included in the resultant contract as applicable. 1) Conferences & Meetings, 2) Food for Meals, Light Refreshments & Beverages, 3) Promotional Items, 4) Acquisition, by purchase or lease, of any interest in real property; 5) Special rearrangement or alteration of facilities; 6) Purchase or lease of any item of general purpose office furniture or office equipment regardless of dollar value; 7) Travel Costs including Foreign Travel; 8) Consultant Costs; 9) Subcontract Costs; 10) Patient Care Costs; 11) Accountable Government Property; 12) Printing costs; and 13) Research Funding.

ARTICLE B.4. ADVANCE UNDERSTANDINGS

Specific elements of cost, which normally require prior written approval of the Contracting Officer before incurrence of the cost (e.g., foreign travel, consultant fees, subcontracts) will be included in this Article if the Contracting Officer has granted his/her approval prior to contract award.

1. INVOICES – COST AND PERSONNEL REPORTING AND VARIANCES FROM THE NEGOTIATED BUDGET

The Contractor agrees to provide a detailed breakdown on invoices of the following cost categories:

1. Direct Labor – List individuals by name, title/position, hourly/annual rate, level of effort, and amount claimed.
2. Fringe Benefits – Cite rate and amount.
3. Materials & Supplies – Include detailed breakdown when total amount is over \$1,000.
4. Travel – Identify travelers, dates, destination, purpose of trip, and amount. Cite COA, if appropriate. List separately, domestic travel, general scientific meeting travel, and foreign travel.
5. Consultant Fees – Identify individuals and amounts.
6. Subcontracts – Attach subcontractor invoice(s).
7. Equipment – Cite authorization and amount.
8. Facilities and Administrative Costs (F&A) – Cite rate and amount.
9. Total Cost

Monthly invoices must include the cumulative total expenses to date, adjusted (as applicable) to show any amounts suspended by the Government.

The Contractor agrees to immediately notify the Contracting Officer in writing if there is an anticipated overrun (any amount) or unexpended balance (greater than 10 percent) of the amount allotted to the contract, and the reasons for the variance. Also refer to the requirement of Limitation of Cost Clause in the contract.

2. INVOICE PROCESSING PLATFORM (IPP)

NIH is using a phased transition approach from the NIH Office of Financial Management (OFM) Electronic Invoice Submission instructions to the Department of Treasury's Invoice Processing Platform (IPP). This award will transition to IPP in the future. The Contractor/Vendor shall use the attached NIH OFM Electronic Invoice Submission Instructions until the Contractor/Vendor has transitioned to IPP as specified on the OALM IPP website at <https://oalm.od.nih.gov/IPP>. It is the Contractor/Vendor's responsibility to periodically check the OALM IPP website and be prepared to transition to IPP on the designated transition date. Questions concerning the transition to IPP should be directed to NIH-IPPinvoicing@mail.nih.gov. Questions concerning this award should be directed to the NIH Contracting Officer.

All IPP invoices must contain a Unique Entity Identifier (UEI) which is located in the System for Award Management (SAM) and replaces the Dun & Bradstreet Data Universal Numbering System (DUNS) number.

3. Protection of Proprietary Data

All materials, data and other information supplied by third-party providers or laboratories under this contract or the Contracting Officer's Representative (COR) shall be assumed to be confidential unless specifically identified as not confidential in writing by the COR.

SECTION C – DESCRIPTION/SPECIFICATIONS/WORK STATEMENT

ARTICLE C.1. STATEMENT OF WORK

Independently and not as an agent of the Government, the Contractor shall be required to furnish all the necessary services, qualified personnel, material, equipment, and facilities, not otherwise provided by the Government, as needed to perform the Statement of Work, dated February 12, 2026, attached hereto and made a part of this Solicitation (See SECTION J - List of Attachments).

ARTICLE C.2. REPORTING REQUIREMENTS

REPORTING REQUIREMENTS FOR USE WITH THE ELECTRONIC REPORT DELIVERABLE SUBMISSION (eRDS) SITE

All reports required herein must be submitted in electronic format. All electronic contract deliverables must be submitted via the NIAID electronic Report Deliverable Submission (eRDS) Site, available at the following website: <https://erds.niaid.nih.gov/>. These reports shall be compliant with Section 508 of the Rehabilitation Act of 1973. Additional information about testing documents for Section 508 compliance, including guidance and specific checklists, by application, can be found at: <https://www.hhs.gov/web/section-508/index.html> and at: <https://www.section508.gov/create/documents> , "Create Accessible Documents."

a. Technical Progress Reports

In addition to the required reports set forth elsewhere in this Schedule, the preparation and submission of regularly recurring Technical Progress Reports will be required in any contract resulting from this solicitation. These reports will require descriptive information about the activities undertaken during the reporting period and will require information about planned activities for future reporting periods. The frequency and specific content of these reports will be determined prior to contract award. *[Note: Beginning May 25, 2008, the Contractor shall include the applicable PubMed Central or NIH Manuscript Submission reference number when citing publications that arise from its NIH funded research.]*

The Contractor shall submit to the CO and to the COR technical progress reports covering the work accomplished during each reporting period. These reports are subject to technical inspection and requests for clarification by the COR. These reports shall be brief and factual and prepared in accordance with the format described below.

Format of Cover Page: All reports shall include a cover page prepared in accordance with the following format:

- Contract Number and Project Title
- Period of Performance Being Reported
- Contractor's Name and Address
- Author(s)
- Date of Submission
- Delivery Address

1. Monthly Progress Report

This report shall include a description of the activities during the reporting period, and the activities planned for the ensuing reporting period. The first reporting period consists of the first full month of performance plus any fractional part of the initial month. Thereafter, the reporting period shall consist of each calendar month. The report must include:

- a) Progress report: A section consisting of a detailed description of overall progress for each task or segment of work as per the Statement of Work (SOW) that was conducted during the reporting period.
- b) Personnel changes: A section describing any changes in personnel or level of effort during the reporting period.
- c) Deviations and problems: A section describing technical and process deviations encountered and corrective action taken to resolve any issues.
- d) Financial report: A section describing the financial status of the contract. This should include trending of the previous month(s) within the contract year and anticipated costs for the next reporting period. Identification of potential high budget items should also be included. A graph to compare expected expenditure and actual expenditure must be included.
- e) Maintenance of facilities, inventory, supplies and equipment: A section describing problems encountered and corrective actions within the reporting period.
- f) Projected Resources Impact Analysis Report: Include a summary of this report (see SOW, paragraph 3.B.7).
- g) Study Product Evaluations (SPEs): A summary of the SPEs completed during the month shall be included (see SOW paragraph 3.B.3).
- h) Clinical Supply Plan (CSP): Include a summary of new CSPs or updates (see SOW paragraph 3.B.2).
- i) Pharmacy Establishment Plan (PEP): Include a summary of the PEPs or all PEP reviews (see SOW paragraph 3.C.4).
- j) Outcome of Quality Assessment: Provide outcomes of Quality Assessments as described in SOW paragraph 3.D.9).
- k) Samples of Packaging, auxiliary (secondary) labels and Kits: Provide a summary of the samples, packaging, auxiliary (secondary) labels and kits that were provided for COR review (see SOW paragraph 3.A.2.h).
- l) Protocol Specific notifications: Provide a summary of protocol specific notifications (see SOW paragraph 3.B.8 and 3.B.9).
- m) Shipping Preparation Procedures and Equipment: Provide a summary of shipping preparation procedures and equipment (see SOW paragraph 3.A.3.a)
- n) Inventory Report: Provide a summary of the Inventory Report (see SOW 3.A.5.a and 3.A.5.g)).
- o) Provide an evaluation/measurement of 5 predetermined metrics related to the deliverables in the SOW or activities related to the CRPMC. These topics shall be discussed with the COR.

2. Annual Progress Report

This report includes a summation of the results of the entire contract work for the period covered. An Annual Progress Report will not be required for the period when the Final Report is due. A Monthly Progress Report shall not be submitted when an Annual Progress Report is due.

The Contractor shall provide the Contracting Officer's Representative and Contracting Officer with an electronic copy of the Annual Progress Report in draft form in accordance with the DELIVERIES Article in SECTION F of this contract 30 calendar days prior to the delivery date for the Final Version of the Annual Progress Report. The Contracting Officer's Representative will review the draft report and provide the Contracting Officer with comments within 15 calendar days after receipt. The Annual Progress Report shall be corrected by the Contractor, if necessary and the final version delivered as specified in the above paragraph.

This report includes a summation of the results of the entire contract work for the period covered, with an emphasis on activities completed after submission of the semi-annual report. An Annual Progress Report will not be required for the period when the Final Report is due. A Semi-Annual Progress Report shall not be submitted when an Annual Progress Report is due. The annual report should not exceed 100 pages. Appendices are allowed.

3. Final Report

This report shall consist of the work performed and results obtained for the entire contract period of performance as stated in SECTION F of this contract. This report shall be in sufficient detail to describe comprehensively the results achieved. The Final Report shall be submitted on or before the last day of the contract performance period. An Annual Progress Report and Monthly Progress Report will not be required for the period when the Final Report is due.

The Contractor shall provide the Contracting Officer's Representative and Contracting Officer with [2] copies of the Final Report in **draft** form in accordance with the DELIVERIES Article in SECTION F of this contract 30 calendar days prior to the completion date of this contract. The Contracting Officer's Representative will review the draft report and provide the Contracting Officer with comments within 15 calendar days after receipt. The Final Report shall be corrected by the Contractor, if necessary and the final version delivered as specified in the above paragraph.

4. Summary of Salient Results

The Contractor will be required to prepare and submit, with the final report, a summary (not to exceed 200 words) of salient results achieved during the performance of the contract. This report will be required on or before the expiration date of the contract.

b. Other Reports/Deliverables**1. Reporting of Financial Conflict of Interest (FCOI)**

All reports and documentation required by 45 CFR Part 94, Responsible Prospective Contractors including, but not limited to, the New FCOI Report, Annual FCOI Report, Revised FCOI Report, and the Mitigation Report, shall be submitted to the Contracting Officer in Electronic Copy format. Thereafter, reports shall be due in accordance with the regulatory compliance requirements in 45 CFR Part 94. 45 CFR Part 94 is available at: <https://www.ecfr.gov/current/title-45/part-94>.

See Part 94.5, Responsibilities of Institutions regarding Investigator financial conflicts of interest for complete information on reporting requirements.

(Reference the INSTITUTIONAL RESPONSIBILITY REGARDING INVESTIGATOR FINANCIAL CONFLICTS OF INTEREST Article in SECTION H of this contract.)

2. Source Code and Object Code

Unless otherwise specified herein, the Contractor shall deliver to the Government, upon the expiration date of the contract, all source code and object code developed, modified, and/or enhanced under this contract.

3. Section 508 Annual Report

The Contractor must submit an annual Section 508 report in accordance with the schedule set forth by the Contracting Officer (CO)/Contracting Officer Representative (COR). The Section 508 Report Template and Instructions for completing the report are available at: https://www.hhs.gov/sites/default/files/web/508/contracting/technology/section_508_annual_report.doc.

4. Other Reports and Deliverables Required by the Contract and Statement of Work

Item	Deliverables	SOW Reference	Recipient	Delivery Schedule
1.	Projected Resources Impact Analysis Report (PRIAR)	SOW paragraph 3.B.7.	1 electronic copy to COR	Make available to the COR within 3 business days of request via email and add a summary to the monthly report.

Item	Deliverables	SOW Reference	Recipient	Delivery Schedule
2.	Study Product Evaluation (SPE)	SOW paragraph 3.B.3.	1 electronic copy to the COR	Study Product Evaluations shall be provided to the COR within 5 business days after receipt of the protocol, unless requested sooner by the COR. A summary of the SPEs completed during the month should be included in the monthly report.
3.	Clinical Supply Plan (CSP)	SOW paragraph 3.B.2.	1 electronic copy to COR	Email to the COR within 3 business days of request and include a summary of new plans and updates in the monthly report.
4.	Summary and Recommendations from Site Pharmacy Monitoring	SOW paragraph 3.C.1 and 3.I.3.	1 electronic copy to COR	Monthly and Quarterly, 1 week prior to Pharmacy Monitoring Working Group Meeting
5.	PEP Review Summary	SOW paragraph 3.C.4.	1 electronic copy to COR	Provide a summary email to the COR after 5 business days. Include a summary of all PEP reviews in the monthly report.
6.	Clinical Site Pharmacy Visit	SOW paragraph 3.C.2.	1 electronic copy to COR	Within 10 business days after completion of each visit
7.	Clinical Site Pharmacy Guidance Activities Summary	SOW paragraph 3.C.3.	1 electronic copy to COR	10 business days after completion of activities.
8	Protocol and Study Products Status Worksheet	SOW paragraph 3.I.2.	Electronic copy and a summary of weekly changes resulting from the meeting to COR and all attendees	Make worksheet readily available to the COR and provide a summary of changes weekly with those indicated by the COR. Include a summary of changes by week in the monthly report.

Item	Deliverables	SOW Reference	Recipient	Delivery Schedule
9.	Outcome of Quality Assessment	SOW paragraph C.1.1.3.	Include in Monthly Report	Provide as a section in the Monthly report
10.	Quality Management Plan	SOW paragraph 3.D.5.	1 electronic copy to COR	Draft to the COR within 30 business days of the contract effective date
11.	Inventory Reports	SOW paragraph 3.A.5.a. and 3.A.5.g.	1 electronic copy to COR	Include a copy in the monthly or provide to the COR within 2 hours as needed prior to submitting to product manufacturer.
12.	TMF Audit Reports	SOW paragraph 3.A.7.b.	Include in Annual Report	Copy of the results to be included in the Annual Report.
13.	Destruction Reports	SOW paragraph 3.A.6.k.	1 electronic copy to the COR	Include a summary of final destructions in the monthly report in the month immediately following receipt of final destruction report
14.	CoA Review	SOW paragraph 3.A.3.j.	1 electronic copy to the COR	Provide as directed by the COR for review with each new batch within 3 business days of receipt
15.	cGMP Audit Reports of Manufacturer	SOW paragraph 3.J.	1 electronic copy to the COR	Copy to the COR for review with each new batch within 15 business days after completion
16.	Samples of packaging, auxiliary (secondary) or mock labels and kits	SOW paragraph 3.A.2.h.	1 electronic copy to the COR and NIAID assigned Pharmacist	Email copy to the COR for review within 2 business days of preparation. Provide a summary in monthly report

Item	Deliverables	SOW Reference	Recipient	Delivery Schedule
17.	Protocol specific notification	SOW paragraph 3.B.8. and 3.B.9.	1 electronic copy to the COR and NIAID assigned Pharmacist	Email copy to the COR for review within 3 business days of receipt of study products. Provide a summary in monthly report.
18.	Shipping preparation procedures and equipment	SOW paragraph 3.A.2 and 3.A.3.	1 electronic copy to the COR and NIAID assigned Pharmacist	Provide a summary in the monthly report.
19.	Section 508 Annual Report		1 electronic copy to CO	Due on/before the 30 th of the month following each anniversary date of the contract.
20.	Annual Utilization Report	ARTICLE C.3.	1 electronic copy to CO	Due on/before the 30 th of the month following each anniversary date of the contract.
21.	Final Invention Statement	ARTICLE C.3.	1 electronic copy to CO	Due on/before completion date of the contract.
22.	All reports and documentation including the invention disclosure report, the confirmatory license, and the government support certification	ARTICLE C.3.	1 electronic copy to CO	As required by FAR Clause 52.227-11.
23.	Information Security Reporting Requirements	NA	1 electronic copy to CO	As required by Article Information Security and/or Physical Access Security
24.	Source Code and Object Code	NA	1 electronic copy to CO	As required by Electronic and Information Technology Accessibility Article in Section H of the contract.

Item	Deliverables	SOW Reference	Recipient	Delivery Schedule
25.	Standard Operating Procedure (specified at the time of request)	3.K.1.	1 Electronic Copy to CO and COR	Copy to the COR or CO for review within one business day of request or upon revision

ARTICLE C.3. INVENTION REPORTING REQUIREMENTS

All reports and documentation required by FAR 52.227-11, Patent Rights-Ownership by the Contractor, including, but not limited to, the invention disclosure report, the confirmatory license, and the Government support certification, shall be directed to the Division of Extramural Inventions and Technology Resources (DEITR), OPERA, OER, NIH, 6705 Rockledge Drive, Suite 310, MSC 7980, Bethesda, Maryland 20892-7980 (Telephone: 301-435-1986). In addition, one copy of an annual utilization report, and a copy of the final invention statement, shall be submitted to the Contracting Officer. The final invention statement (see FAR 27.303(b)(2)(ii)) shall be submitted to the Contracting Officer on the expiration date of the contract.

The first annual utilization report shall be due on or before April 15, 2028. Thereafter, reports shall be due on or before the 30th calendar day following the reporting period. The final invention statement (see FAR 27.303(b)(2)(ii)) shall be submitted on the expiration date of the contract. All reports shall be sent to the following address:

Contracting Officer
Office of R&D and Professional Services Contracts
Office of Acquisition & Logistics Management
6701 Rockledge Drive, Room 412-G
Bethesda, MD 20817-1816

If no invention is disclosed or no activity has occurred on a previously disclosed invention during the applicable reporting period, a negative report shall be submitted to the Contracting Officer at the address listed above.

To assist contractors in complying with invention reporting requirements of the clause, the NIH has developed "Interagency Edison," an electronic invention reporting system. Use of Interagency Edison is required as it streamlines the reporting process and greatly reduces paperwork. Access to the system is through a secure interactive Web site to ensure that all information submitted is protected. Interagency Edison and information relating to the capabilities of the system can be obtained from the Web (<http://www.iedison.gov>), or by contacting the Extramural Inventions and Technology Resources Branch, OPERA, NIH.

SECTION D – PACKAGING AND MARKETING

All deliverables required under this contract shall be packaged, marked and shipped in accordance with Government specifications. At a minimum, all deliverables shall be marked with the contract number and Contractor name. The Contractor shall guarantee that all required materials shall be delivered in immediate usable and acceptable condition.

ARTICLE D.1. PACKAGING

The Contractor shall be responsible for packaging of products/shipments in accordance with the attached Statement of Work under Paragraph C.1.d. - Labeling, Packaging and Repackaging of Study Products, and Paragraph C.1.e. - Shipping and Distribution of Study Products.

ARTICLE D.2. MARKING

The Contractor shall be responsible for marking of products/shipments in accordance with the attached Statement of Work, under Paragraph C.1.d. - Labeling, Packaging and Repackaging of Study Products, and Paragraph C.1.e. - Shipping and Distribution of Study Products.

ARTICLE D.3. SHIPPING

The Contractor shall ship in accordance with the attached Statement of Work, under Paragraph C.1.d. - Labeling, Packaging and Repackaging of Study Products, and Paragraph C.1.e. - Shipping and Distribution of Study Products.

SECTION E – INSPECTION AND ACCEPTANCE

- a. The Contracting Officer or the duly authorized representative will perform inspection and acceptance of materials and services to be provided.
- b. For the purpose of this SECTION, the Contracting Officer's Representative is the authorized representative of the Contracting Officer.
- c. Inspection and acceptance will be performed at:

Pharmaceutical Affairs Branch
Office of Clinical Site Oversight
Division of AIDS
National Institute of Allergy and Infectious Diseases
National Institutes of Health
Department of Health and Human Services
5601 Fishers Lane
Bethesda, MD 20852

Acceptance may be presumed unless otherwise indicated in writing by the Contracting Officer or the duly authorized representative within 30 days of receipt.

- d. This contract incorporates the following clause by reference, with the same force and effect as if it were given in full text. Upon request, the Contracting Officer will make its full text available.

FAR Clause 52.246-8, Inspection of Research and Development - Cost-Reimbursement (May 2001).

Alternate I (April 1984) is not applicable to this contract.

SECTION F – DELIVERIES OR PERFORMANCE

ARTICLE F.1. PERIOD OF PERFORMANCE

- a. The period of performance of this contract shall be from March 16, 2027 through March 15, 2028.
- b. If the Government exercises its option(s) pursuant to the OPTION PROVISION Article in Section H of this contract, the period of performance will be increased as listed below:

Option	Option Period
Option 1 (Contract Year 2)	March 16, 2028 – March 15, 2029
Option 2 (Contract Year 3)	March 16, 2029 – March 15, 2030
Option 3 (Contract Year 4)	March 16, 2030 – March 15, 2031
Option 4 (Contract Year 5)	March 16, 2031 – March 15, 2032
Option 5 (Contract Year 6)	March 16, 2032 – March 15, 2033
Option 6 (Contract Year 7)	March 16, 2033 – March 15, 2034

ARTICLE F.2. LEVEL OF EFFORT

- a. During the period of performance of this contract, the Contractor shall provide _____ direct labor hours. The labor hours include vacation, holiday, and sick leave. These labor hours include subcontractor labor hours. It is estimated that the labor hours are constituted as specified below and will be expended approximately as follows:

Labor Category	Year 1	Year 2	Year 3	Year 4	Year 5	Year 6	Year 7
Professional							
Other Professional							
Support							
Totals							

- b. The Contractor shall have satisfied the requirement herein if not less than 90% nor more than 110% of the total direct labor hours specified herein are furnished. These terms and conditions do not supersede the requirements of either the "Limitation of Cost" or "Limitation of Funds" clause.
- c. In the event fewer hours than the minimum specified number of direct labor hours in the total categories are used by the Contractor in accomplishing the prescribed work and the Government has not invoked its rights under FAR Clause 52.249-6, TERMINATION (Cost-Reimbursement) incorporated in this contract, these parties agree that the fee will be adjusted

based solely upon the quantity of hours by which the number of direct labor hours furnished is less than the number of direct labor hours specified in this ARTICLE. The resulting adjustment shall be evidenced by a contract modification.

ARTICLE F.3. CLAUSES INCORPORATED BY REFERENCE, FAR 52.252-2 (FEB 1998).

This contract incorporates the following clause(s) by reference, with the same force and effect as if it were given in full text. Upon request, the Contracting Officer will make its full text available. Also, the full text of a clause may be accessed electronically at this address:

<https://www.acquisition.gov/?q=browsefar>.

FEDERAL ACQUISITION REGULATION (48 CFR CHAPTER 1) CLAUSE:

52.242-15, Stop Work Order (August 1989).

Alternate I (April 1984) is applicable to this contract.

52.247-35, F.o.b. Destination Within Consignees Premises (April 1984).

SECTION G – CONTRACT ADMINISTRATION DATA

ARTICLE G.1. CONTRACTING OFFICER REPRESENTATIVE (COR)

The following Contracting Officer Representative (COR) will represent the Government for the purpose of this contract: TBD

The COR is responsible for: (1) monitoring the Contractor's technical progress, including the surveillance and assessment of performance and recommending to the Contracting Officer changes in requirements; (2) interpreting the statement of work and any other technical performance requirements; (3) performing technical evaluation as required; (4) performing technical inspections and acceptances required by this contract; and (5) assisting in the resolution of technical problems encountered during performance.

The Contracting Officer is the only person with authority to act as agent of the Government under this contract. Only the Contracting Officer has authority to: (1) direct or negotiate any changes in the statement of work; (2) modify or extend the period of performance; (3) change the delivery schedule; (4) authorize reimbursement to the Contractor for any costs incurred during the performance of this contract; (5) otherwise change any terms and conditions of this contract; or (6) sign written licensing agreements. Any signed agreement shall be incorporated by reference in Section K of the contract

The Government may unilaterally change its COR designation.

ARTICLE G.2. KEY PERSONNEL, HHSAR 352.237-75 (December 2015)

The key personnel specified in this contract are considered to be essential to work performance. At least 30 days prior to the contractor voluntarily diverting any of the specified individuals to other programs or contracts the Contractor shall notify the Contracting Officer and shall submit a justification for the diversion or replacement and a request to replace the individual. The request must identify the proposed replacement and provide an explanation of how the replacement's skills, experience, and credentials meet or exceed the requirements of the contract (including, when applicable, Human Subjects Testing requirements). If the employee of the contractor is terminated for cause or separates from the contractor voluntarily with less than thirty days' notice, the Contractor shall provide the maximum notice practicable under the circumstances. The Contractor shall not divert, replace, or announce any such change to key personnel without the written consent of the Contracting Officer. The contract will be modified to add or delete key personnel as necessary to reflect the agreement of the parties.

(End of clause).

The following individual(s) is/are considered to be essential to the work being performed hereunder:

Name	Title
To be specified prior to award	

ARTICLE G.3. INVOICE SUBMISSION/CONTRACT FINANCING REQUEST AND CONTRACT FINANCIAL REPORT

- a. Invoice Submission/Contract Financing Request and Contract Financial Reporting, NIH(RC)-4 for NIH Cost-Reimbursement Type Contracts are attached and made part of this contract. The Contractor shall follow the attached instructions and submission procedures specified below to meet the requirements of a "proper invoice" pursuant to FAR Subpart 32.9, Prompt Payment.
 1. The Contractor must submit invoices to the Department of Treasury's Invoice Processing Platform (IPP) at <https://www.ipp.gov> with a copy of the invoice to the approving official, as directed below.
 2. Until the Contract has transitioned to IPP as specified on the OALM IPP website, the Contractor must follow step-by-step instructions as stated in the NIH/OFM [Electronic Invoicing Instructions for NIH Contractors/Vendors](#), which is included as an attachment in Section J of this contract. The invoice submitted to the NIH/OFM must be transmitted as an attachment via email to the address listed above in one of the following formats: Word, or Adobe Portable Document Format (PDF). The Contractor must submit only one invoice per email. Do not submit supporting documentation (e.g., receipts, time sheets, vendor invoices, etc.) with your invoice unless specified elsewhere in the contract or requested by the Contracting Officer.
 3. The Contractor must submit invoices to the Department of Treasury's Invoice Processing Platform (IPP) at <https://www.ipp.gov> with a copy of the invoice to the approving official, as directed below.

The Contractor shall submit a copy of the electronic invoice to the following Approving Official (Contracting Officer) and Contracting Officer Representative:

Approving Official: Contracting Officer
Name: TBD, Email Address: TBD

Contracting Officer's Representative
Name: TBD, Email Address: TBD

For inquiries regarding the status of invoices, contact OFM Customer Service via email at ofm_customer_service@mail-cmp.niceincontact.com or via phone at 301-496-6088. To send your inquiries via other available communication methods refer to the OFM Customer Service website at <https://ofm.od.nih.gov/Pages/Customer-Service.aspx>.

Note: The OFM Customer Service is open Eastern Standard Time Monday - Friday from 8:30 a.m. to 5:00 p.m. and is closed between 12:00 p.m. to 1:00 p.m.

4. In addition to the requirements specified in FAR 32.905 for a proper invoice, the Contractor shall include the following information on the face page of all payment requests:
 - a. Name of the Office of Acquisitions. The Office of Acquisitions for this contract is National Institute of Allergy and Infectious Diseases (NIAID).

- b. Federal Taxpayer Identification Number (TIN). If the Contractor does not have a valid TIN, it shall identify the Vendor Identification Number (VIN) on the payment request. The VIN is the number that appears after the Contractor's name on the face page of the contract. *[Note: A VIN is assigned to new contracts awarded on or after June 4, 2007, and any existing contract modified to include the VIN number.]* If the Contractor has neither a TIN, Unique Entity Identifier (UEI), or VIN, contact the Contracting Officer. Note: The Contractor shall not include TIN if it is a Social Security Number.
- c. Unique Entity Identifier (UEI). The UEI is located in the System for Award Management (SAM) and replaces the Dun & Bradstreet Data Universal Numbering System (DUNS) number. The UEI number must identify the Contractor's name and address exactly as stated in the contract and as registered in the Central Contractor Registration (CCR) database. If the Contractor does not have a valid UEI number, it shall identify the Vendor Identification Number (VIN) on the payment request. The VIN is the number that appears after the Contractor's name on the face page of the contract. *[Note: A VIN is assigned to new contracts awarded on or after June 4, 2007, and any existing contract modified to include the VIN number.]* If the Contractor has neither a TIN, UEI, or VIN, contact the Contracting Officer.
- d. Invoice Matching Option. This contract requires a two-way match.
- e. Unique Invoice Number. Each payment request must be identified by a unique invoice number, which can only be used one time regardless of the number of contracts or orders held by an organization.
- f. The Contract Title is: "Virology Quality Assurance"
- g. Contract Line Items as follows:

Line Item #	Line Item Description	Period of Performance	Funded Amount

- b. Inquiries regarding payment of invoices shall be directed to the designated billing office, (301) 496-6452.
- c. The Contractor shall include the following certification on every invoice for reimbursable costs incurred with Fiscal Year funds subject to HHSAR Clause 352.231-70, Salary Rate Limitation in SECTION I of this contract. For billing purposes, certified invoices are required for the billing period during which the applicable Fiscal Year funds were initially charged through the final billing period utilizing the applicable Fiscal Year funds:

"I hereby certify that the salaries charged in this invoice are in compliance with HHSAR Clause 352.231-70, Salary Rate Limitation in SECTION I of the above referenced contract."

ARTICLE G.4. FAR 52.232-40 PROVIDING ACCELERATED PAYMENTS TO SMALL BUSINESS SUBCONTRACTORS (MAR 2023)

- a. In accordance with 31 U.S.C. 3903 and 10 U.S.C. 3801, within 15 days after receipt of accelerated payments from the Government, the Contractor shall make accelerated payments to its small business subcontractors under this contract, to the maximum extent practicable and prior to when such payment is otherwise required under the applicable contract or subcontract, after receipt of a proper invoice and all other required documentation from the small business subcontractor.

The Contractor agrees to make such payments to its small business subcontractors without any further consideration from or fees charged to the subcontractor.

- b. The acceleration of payments under this clause does not provide any new rights under the Prompt Payment Act.
- c. Include the substance of this clause, including this paragraph (c), in all subcontracts with small business concerns, including subcontracts with small business concerns for the acquisition of commercial products or commercial services.

ARTICLE G.5. INDIRECT COST RATES

In accordance with Federal Acquisition Regulation (FAR) (48 CFR Chapter 1) Clause 52.216-7 (d)(2), Allowable Cost and Payment incorporated by reference in this contract in PART II, SECTION I, the cognizant Contracting Officer Representative responsible for negotiating provisional and/or final indirect cost rates is identified as follows:

Director, Division of Financial Advisory Services
Office of Acquisition Management and Policy
National Institutes of Health
6011 EXECUTIVE BLVD, ROOM 549C, MSC-7663
BETHESDA MD 20892-7663

These rates are hereby incorporated without further action of the Contracting Officer. Go to the Indirect Cost Submission web page: <https://oamp.od.nih.gov/division-of-financial-advisory-services/indirect-cost-branch/indirect-cost-submission> for electronic copies of the Branch's information package documents.

ARTICLE G.6. POST AWARD EVALUATION OF CONTRACTOR PERFORMANCE

a. Contractor Performance Evaluations

Interim and Final evaluations of Contractor performance will be prepared on this contract in accordance with FAR Subpart 42.15. The Final performance evaluation will be prepared at the time of completion of work. In addition to the Final evaluation, Interim evaluation(s) will be prepared Annually.

Interim and Final evaluations will be provided to the Contractor as soon as practicable after completion of the evaluation. The Contractor will be permitted sixty days to review the document and to submit additional information or a rebutting statement. If agreement cannot be reached between the parties, the matter will be referred to an individual one level above the Contracting Officer, whose decision will be final.

Copies of the evaluations, Contractor responses, and review comments, if any, will be retained as part of the contract file, and may be used to support future award decisions.

b. Electronic Access to Contractor Performance Evaluations

Contractors may access evaluations through a secure Web site for review and comment at the following address: <https://www.cpars.gov> .

End of clause.

ARTICLE G.7. GOVERNMENT PROPERTY

If this RFP will result in the acquisition or use of Government Property provided by the contracting agency or if the Contracting Officer authorizes in the preaward negotiation process, the acquisition of property (other than real property), this ARTICLE will include applicable provisions and incorporate the HHS Publication, entitled, "HHS Contracting Guide for Contract of Government Property," Appendix Q, which can be found at:

<https://oamp.od.nih.gov/sites/default/files/DGS/HHS%20Contracting%20Guide%20for%20Contract%20of%20Government%20Property-Appendix%20Q.pdf>

SECTION H – SPECIAL CONTRACT REQUIREMENTS

ARTICLE H.1. HUMAN SUBJECTS

It is hereby understood and agreed that research involving human subjects shall not be conducted under this contract, and that no material developed, modified, or delivered by or to the Government under this contract, or any subsequent modification of such material, will be used by the Contractor or made available by the Contractor for use by anyone other than the Government, for experimental or therapeutic use involving humans without the prior written approval of the Contracting Officer.

ARTICLE H.2. CERTIFICATE OF CONFIDENTIALITY

Section 2012 of the 21st Century Cures Act, enacted December 13, 2016, enacts new provisions governing the authority of the Secretary of Health and Human Services (Secretary) to protect the privacy of individuals who are the subjects of research, including significant amendments to the previous statutory authority for such protections, under subsection 301(d) of the Public Health Service Act.

Effective October 1, 2017, all research that was commenced or ongoing on or after December 13, 2016 and is within the scope of the NIH Policy for Issuing Certificate of Confidentiality (CoC) NOT-OD-17-109, the Contractor shall protect the privacy of individuals who are subjects of such research in accordance with subsection 301(d) of the Public Health Service Act as a term and condition of the contract. The certificate will not be issued as a separate document.

NIH considers research in which identifiable, sensitive information is collected or used, to include:

- Human subjects research as defined in the Federal Policy for the Protection of Human Subjects (45 CFR 46), including exempt research (except for human subjects' research that is determined to be exempt from all or some of the requirements of 45 CFR 46) if the information obtained is recorded in such a manner that human subjects cannot be identified or the identity of the human subjects cannot readily be ascertained, directly or through identifiers linked to the subjects);
- Research involving the collection or use of biospecimens that are identifiable to an individual or for which there is at least a very small risk that some combination of the biospecimen, a request for the biospecimen, and other available data sources could be used to deduce the identity of an individual;
- Research that involves the generation of individual level, human genomic data from biospecimens, or the use of such data, regardless of whether the data is recorded in such a manner that human subjects can be identified or the identity of the human subjects can readily be ascertained as defined in the Federal Policy for the Protection of Human Subjects (45 CFR 46); or
- Any other research that involves information about an individual for which there is at least a very small risk, as determined by current scientific practices or statistical methods, that some combination of the information, a request for the information, and other available data sources could be used to deduce the identity of an individual, as defined in subsection 301(d) of the Public Health Service Act.

The Contractor shall not:

- Disclose or provide, in any Federal, State, or local civil, criminal, administrative, legislative, or other proceeding, the name of such individual or any such information, document, or biospecimen that contains identifiable, sensitive information about the individual and that was created or compiled for purposes of the research, unless such disclosure or use is made with the consent of the individual to whom the information, document, or biospecimen pertains; or
- Disclose or provide to any other person not connected with the research the name of such an individual or any information, document, or biospecimen that contains identifiable, sensitive information about such an individual and that was created or compiled for purposes of the research.

The Contractor is permitted to disclose only in below circumstances. The Contractor shall notify the CO minimum ten (10) calendar days prior to disclosure.

- Required by Federal, State, or local laws (e.g., as required by the Federal Food, Drug, and Cosmetic Act, or state laws requiring the reporting of communicable diseases to State and local health departments), excluding instances of disclosure in any Federal, State, or local civil, criminal, administrative, legislative, or other proceeding;
- Necessary for the medical treatment of the individual to whom the information, document, or biospecimen pertains and made with the consent of such individual;
- Made with the consent of the individual to whom the information, document, or biospecimen pertains; or
- Made for the purposes of other scientific research that is in compliance with applicable Federal regulations governing the protection of human subjects in research.

In accordance with 45 CFR Part 75.303(a), the Contractor shall maintain effective internal controls (e.g., policies and procedures) that provide reasonable assurance that the award is managed in compliance with Federal Statutes and regulations.

The recipient of CoCs shall ensure that any company/institution/individual not funded by NIH who receives a copy of identifiable, sensitive information protected by a Certificate understand that they are also subject to the requirements of subsection 301(d) of the Public Health Service Act. The Contractor shall ensure that Subcontractors who receive funds to carry out part of the Federal award understand they are also subject to subsection 301(d) of the Public Health Service Act and the NIH Policy for Issuing CoC.

ARTICLE H.3. HUMAN MATERIALS

The acquisition and supply of all human specimen material (including fetal material) used under this contract shall be obtained by the Contractor in full compliance with applicable State and Local laws and the provisions of the Uniform Anatomical Gift Act in the United States, and no undue inducements, monetary or otherwise, will be offered to any person to influence their donation of human material.

ARTICLE H.4. HUMAN MATERIALS (ASSURANCE OF OHRP COMPLIANCE)

The acquisition and supply of all human specimen material (including fetal material) used under this contract shall be obtained by the Contractor in full compliance with applicable State and Local laws and the provisions of the Uniform Anatomical Gift Act in the United States, and no undue inducements, monetary or otherwise, will be offered to any person to influence their donation of human material.

The Contractor shall provide written documentation that all human materials obtained as a result of research involving human subjects conducted under this contract, by collaborating sites, or by subcontractors identified under this contract, were obtained with prior approval by the Office for Human Research Protections (OHRP) of an Assurance to comply with the requirements of 45 CFR 46 to protect human research subjects. This restriction applies to all collaborating sites without OHRP-approved Assurances, whether domestic or foreign, and compliance must be ensured by the Contractor.

Provision by the Contractor to the Contracting Officer of a properly completed "Protection of Human Subjects Assurance Identification/IRB Certification/Declaration of Exemption", Form OMB No. 0990-0263 (formerly Optional Form 310), certifying IRB review and approval of the protocol from which the human materials were obtained constitutes the written documentation required. The human subject certification can be met by submission of a self-designated form, provided that it contains the information required by the "Protection of Human Subjects Assurance Identification/IRB Certification/Declaration of Exemption", Form OMB No. 0990-0263 (formerly Optional Form 310).

ARTICLE H.5. NIH POLICY ON ENHANCING REPRODUCIBILITY THROUGH RIGOR AND TRANSPARENCY

Contractors shall adhere to the NIH policy of enhancing reproducibility through rigor and transparency by addressing each of the four areas of the policy in performance of the Statement of Work and in publications, as applicable: 1) Scientific Premise; 2) Scientific Rigor; 3) Consideration of Relevant Biological Variables, including Sex; and 4) Authentication of Key Biological and/or Chemical Resources. This policy applies to all NIH funded research and development, from basic through advanced clinical studies. See NIH Guide Notice, [NOT-OD-15-103](#), "Enhancing Reproducibility through Rigor and Transparency" and [NOT-OD-15-102](#), "Consideration of Sex as a Biological Variable in NIH-funded Research" for more information. In addition, publications are expected to follow the guidance at <https://www.nih.gov/research-training/rigor-reproducibility/principles-guidelines-reporting-preclinical-research>, whether preclinical or otherwise, as appropriate. More information is available at <https://grants.nih.gov/policy/reproducibility/index.htm>, including FAQs and a General Policy Overview.

ARTICLE H.6. ACKNOWLEDGEMENT OF FEDERAL FUNDING

The Contractor shall clearly state, when issuing statements, press releases, requests for proposals, bid solicitations and other documents describing projects or programs funded in whole or in part with Federal money: (1) the percentage of the total costs of the program or project which will be financed with Federal money; (2) the dollar amount of Federal funds for the project or program; and (3) the percentage and dollar amount of the total costs of the project or program that will be financed by nongovernmental sources.

ARTICLE H.7. CONTINUED BAN ON FUNDING ABORTION AND CONTINUED BAN ON FUNDING OF HUMAN EMBRYO RESEARCH, HHSAR 352.270-13 (December 2015).

- a. The Contractor shall not use any funds obligated under this contract for any abortion.
- b. The Contractor shall not use any funds obligated under this contract for the following:
 - 1. The creation of a human embryo or embryos for research purposes; or
 - 2. Research in which a human embryo or embryos are destroyed, discarded, or knowingly subjected to risk of injury of death greater than that allowed for research on fetuses in utero under 45 CFR part 46 and Section 498(b) of the Public Health Service Act (42 U.S.C. 289g(b)).
- c. The term "human embryo or embryos" includes any organism, not protected as a human subject under 45 CFR part 46 as of the date of the enactment of this Act, that is derived by fertilization, parthenogenesis, cloning, or any other means from one or more human gametes of human diploid cells.
- d. The Contractor shall not use any Federal funds for the cloning of human beings.

Furthermore, per the [NIH Director's Statement of April 28, 2015](#), NIH will not fund any use of gene-editing technologies in human embryos.

ARTICLE H.8. DISSEMINATION OF FALSE OR DELIBERATELY MISLEADING INFORMATION

The Contractor shall not use contract funds to disseminate information that is deliberately false or misleading.

ARTICLE H.9. RESTRICTION ON PORNOGRAPHY ON COMPUTER NETWORKS

The Contractor shall not use contract funds to maintain or establish a computer network unless such network blocks the viewing, downloading, and exchanging of pornography.

ARTICLE H.10. GUN CONTROL

The Contractor shall not use contract funds in whole or in part, to advocate or promote gun control.

ARTICLE H.11. OPTION PROVISION

Unless the Government exercises its option pursuant to the Option Clause set forth in SECTION I., the contract will consist only of the Base Period of the Statement of Work as defined in Sections C and F of the contract. Pursuant to FAR 52.217-9, Option to Extend the Term of the Contract, and FAR 52.217-7, Option for Increased Quantity – Separately Priced Line Item, set forth in SECTION I. of this contract, the Government may, by unilateral contract modification, require the Contractor to perform additional options set forth in the Statement of Work and also defined in Sections C and F of the contract. If the Government exercises this option, notice must be given at least 60 days prior to the expiration date of this contract, and the estimated cost-plus fixed fee of the contract will be increased as set forth in the ESTIMATED COST – OPTION Article in SECTION B of this contract.

ARTICLE H.12. PUBLICATION AND PUBLICITY

In addition to the requirements set forth in HHSAR Clause 352.227-70, Publications and Publicity incorporated by reference in SECTION I of this contract, the Contractor shall acknowledge the support of the National Institutes of Health whenever publicizing the work under this contract in any media by including an acknowledgment substantially as follows:

"This project has been funded in whole or in part with Federal funds from the National Institute of Allergy and Infectious Diseases, National Institutes of Health, Department of Health and Human Services, under Contract No. **TBD**"

a. Advanced Copies of Press Releases

Press releases shall be considered to include the public release of information to any medium, excluding peer-reviewed scientific publications. The contractor shall ensure that the Contracting Officer Representative (COR) has received an advance copy of any press release related to this contract not less than four (4) working days prior to the issuance of the press release.

ARTICLE H.13. REPORTING MATTERS INVOLVING FRAUD, WASTE AND ABUSE

Anyone who becomes aware of the existence or apparent existence of fraud, waste and abuse in NIH funded programs is encouraged to report such matters to the HHS Inspector General's Office in writing or on the Inspector General's Hotline. The toll-free number is 1-800-HHS-TIPS (1-800-447-8477). All telephone calls will be handled confidentially. The website to file a complaint on-line is: <https://oig.hhs.gov/fraud/report-fraud/> and the mailing address is:

US Department of Health and Human Services
Office of Inspector General
ATTN: OIG HOTLINE OPERATIONS
P.O. Box 23489
Washington, D.C. 20026

ARTICLE H.14. USE OF FUNDS FOR CONFERENCES, MEETINGS AND FOOD

The Contractor shall not use contract funds (direct or indirect) to conduct meetings or conferences in performance of this contract without prior written Contracting Officer approval.

In addition, the use of contract funds to purchase food for meals, light refreshments, or beverages is expressly prohibited.

ARTICLE H.15. SUBCONTRACTING PROVISIONS

a. Small Business Subcontracting Plan

1. In accordance with FAR 19.704 and FAR Clause 52.219-9, the submission of a subcontracting plan by other than small business offeror(s) is a requirement as a part of the proposal submission process and is to be submitted separately from the technical and cost proposals. An offeror's subcontracting plan must be determined to be acceptable, by the Contracting Officer, prior to the contract award.
2. The failure of any Contractor or subcontractor to comply in good faith with FAR Clause 52.219-8, entitled " Utilization of Small Business Concerns" incorporated in this contract and the attached Subcontracting Plan, will be a material breach of such contract or subcontract and subject to the remedies reserved to the Government under FAR Clause 52.219-16 entitled, "Liquidated Damages- Subcontracting Plan."

b. Subcontracting Reports

1. An offeror is to submit their respective subcontracting plan electronically using the U.S. Department of Health and Human Services (HHS) Small Business Customer Experience (SBCX) system at <https://osdbu.hhs.gov> . The offeror shall follow the instructions outlined in the SBCX Industry Guide at: <https://oamp.od.nih.gov/nih-document-generation-system/dgs-workform-information/attachment-files-section-j> to successfully submit their subcontracting plan by the proposal submission deadline.
2. The official point of receipt for determining timely submission of an offeror's subcontracting plan is the SBCX system and/or email notification. Once the subcontracting plan is successfully submitted in the SBCX system the offeror should receive an email notification and confirmation message of completion upon submission.
3. If an offeror's subcontracting plan is not confirmed as received within the SBCX system by the proposal submission date specified in the solicitation, it will be considered late in accordance with subparagraph (c)(3) of FAR Clause 52.215-1, Instructions to Offeror- Competition Acquisition. Disposition of late submittals of a subcontracting plan by an offeror via the SBCX system is at the discretion of the Contracting Officer.
4. Any technical questions regarding the use of the SBCX system may be submitted via email message to the SBCX help desk at client.support@apexlogic.com. The client support hours of operation are Monday - Friday, 6:00 a.m. - 8:00 p.m. Eastern Standard Time (EST). Note: help desk tickets can be submitted 24 hours a day / 7

days a week and a representative will respond within the presented client support hours of operation for assistance.

5. Individual Subcontract Reports (ISR)

The Contractor must submit the following Subcontracting reports electronically via the Subcontracting Reporting System (eSRS) at <https://www.esrs.gov/>. Regardless of the effective date of this contract, the Report shall be due on the following dates for the entire life of this contract:

April 30th
October 30th
Expiration Date of Contract

6. Summary Subcontract Report (SSR)

Regardless of the effective date of this contract, the Summary Subcontract Report must be submitted annually on the following date for the entire life of this contract:

October 30th

For both the Individual and Summary Subcontract Reports, the Contracting Officer and Contract Specialist must be included as a contact for notification purposes at the following e-mail address: To be specified at the time of the award.

ARTICLE H.16. INFORMATION AND COMMUNICATION TECHNOLOGY ACCESSIBILITY NOTICE, HHSAR 352.239-78 (March 2024) (DEVIATION).

- a. Any offeror responding to this solicitation must comply with established HHS Information and Communication Technology (ICT) accessibility standards. Information about Section 508 is available at <https://www.hhs.gov/web/section-508/index.html>.
- b. The Section 508 accessibility standards applicable to this solicitation are stated in the clause at 352.239-79 Information and Communication Technology Accessibility. In order to facilitate the Government's determination whether proposed ICT supplies, products, platforms, information, and documentation meet applicable Section 508 accessibility standards, offerors must submit an appropriate HHS Section 508 Accessibility Conformance Checklist (see <https://www.hhs.gov/web/section-508/accessibility-checklists/index.html>) or an Accessibility Conformance Report (ACR) (based on the Voluntary Product Accessibility Template (VPAT) see <https://www.itic.org/policy/accessibility/vpat>), in accordance with the completion instructions. The purpose of the checklists and conformance reports are to assist HHS acquisition and program officials in determining whether proposed ICT supplies, products, platforms, information, and documentation conform to applicable Section 508 accessibility standards. Checklists and ACRs evaluate—in detail—whether the ICT conforms to specific Section 508 accessibility standards and identifies remediation efforts needed to address conformance issues.
- c. If an offeror claims its supplies or services meet applicable Section 508 accessibility standards, and it is later determined by the Government, *i.e.*, after award of a contract or order, that supplies, products, platforms, information, documentation, or services support

delivered do not conform to the described accessibility standards, remediation of the supplies, products, platforms, information, documentation, or services support to the level of conformance specified in the contract will be the responsibility of the Contractor at its expense.

- d. In order to facilitate the Government's determination whether proposed ICT supplies meet applicable Section 508 accessibility standards, offerors must submit an Accessibility Conformance Report, in accordance with its completion instructions and tailored to the requirements in the solicitation. The purpose of the Report is to assist HHS acquisition and program officials in determining whether proposed ICT supplies conform to applicable Section 508 accessibility standards. The template allows offerors or developers to self-evaluate their supplies and document, in detail, whether they conform to a specific Section 508 accessibility standard, and any underway remediation efforts addressing conformance issues. Instructions for preparing the HHS Section 508 Evaluation Template are available at <https://Section508.gov/>.
- e. In order to facilitate the Government's determination whether proposed ICT services meet applicable Section 508 accessibility standards, offerors must provide enough information to assist the Government in determining that the ICT services conform to Section 508 accessibility standards, including any underway remediation efforts addressing conformance issues.
- f. Respondents to this solicitation must identify any inability to conform to Section 508 requirements. If an offeror claims its supplies or services meet applicable Section 508 accessibility standards, and it is later determined by the Government, i.e., after award of a contract or order, that supplies or services delivered do not conform to the described accessibility standards, remediation of the supplies or services to the level of conformance specified in the contract will be the responsibility of the Contractor at its expense.
- g. Items delivered as electronic content must be accessible to HHS acceptance criteria. Checklist for various formats are available at <http://508.hhs.gov/>. Materials, other than items incidental to contract management, that are final items for delivery should be accompanied by the appropriate checklist, except upon approval of the Contracting Officer or Contracting Officer's Representative.

ARTICLE H.17. INFORMATION AND COMMUNICATION TECHNOLOGY ACCESSIBILITY, HHSAR 352.239-79 (March 2024) (DEVIATION).

- a. Pursuant to Section 508 of the Rehabilitation Act of 1973 (29 U.S.C. 794d), as amended by the Workforce Investment Act of 1998, all information and communication technology (ICT) supplies, products, platforms, information, documentation, and services support developed, acquired, maintained or delivered under this contract or order must comply with the Revised 508 Standards, which are located at 36 C.F.R. 1194.1 and Appendices A, B, and C, and are available at <https://www.access-board.gov/ict/>. Information about Section 508 is available at <https://www.hhs.gov/web/section-508/index.html>.
- b. Additional Section 508 accessibility standards applicable to this contract or order may be identified in the specification, statement of work, or performance work statement. If it is determined by the Government that ICT supplies, products, platforms, information,

documentation, and services support provided by the Contractor do not conform to the described accessibility standards in the contract, remediation of the supplies, products, platforms, information, documentation, or services support to the level of conformance specified in the contract will be the responsibility of the Contractor at its own expense.

- c. In the event of a modification(s) to this contract or order, which adds new ICT supplies or services or revises the type of, or specifications for, supplies, products, platforms, information, documentation, or services support, the Contracting Officer shall require that the Contractor submit a completed HHS Section 508 Accessibility Conformance Checklist (see <https://www.hhs.gov/web/section-508/accessibility-checklists/index.html>) or an Accessibility Conformance Report (ACR) (based on the Voluntary Product Accessibility Template (VPAT) see <https://www.itic.org/policy/accessibility/vpat>), and any other additional information necessary to assist the Government in determining that the ICT supplies or services conform to Section 508 accessibility standards. If it is determined by the Government that ICT supplies, products, platforms, information, documentation, and services support provided by the Contractor do not conform to the described accessibility standards in the contract, remediation of the supplies, products, platforms, information, documentation, or services support to the level of conformance specified in the contract will be the responsibility of the Contractor at its own expense.
- d. If this is an Indefinite-Delivery type contract, a Blanket Purchase Agreement or a Basic Ordering Agreement, the task/delivery order requests that include ICT supplies, products, platforms, information, documentation, or services support will define the specifications and accessibility standards for the order. In those cases, the Contractor shall be required to provide a completed HHS Section 508 Accessibility Conformance Checklist (see <https://www.hhs.gov/web/section-508/accessibility-checklists/index.html>) or an ACR (based on the VPAT see <https://www.itic.org/policy/accessibility/vpat>), and any other additional information necessary to assist the Government in determining that the ICT supplies, products, platforms, information, documentation, or services support conform to Section 508 accessibility standards. If it is determined by the Government that ICT supplies and services provided by the Contractor do not conform to the described accessibility standards in the provided documentation, remediation of the supplies, products, platforms, information, documentation, or services support to the level of conformance specified in the contract will be the responsibility of the Contractor at its own expense.
- e. The contractor shall identify to the Contracting Officer any perceived exception or exemption to Section 508 requirements.

ARTICLE H.18. RESPONSIBILITIES OF INSTITUTIONS REGARDING INVESTIGATOR FINANCIAL CONFLICTS OF INTEREST

The Institution (includes any Contractor, public or private, excluding a Federal agency) shall comply with the requirements of 45 CFR Part 94, Responsible Prospective Contractors, which promotes objectivity in research by establishing standards to ensure that Investigators (defined as the project director or principal Investigator and any other person, regardless of title or position, who is responsible for the design, conduct, or reporting of research funded under NIH contracts, or proposed for such funding, which may include, for example, collaborators or consultants) will not be biased by any Investigator financial conflicts of interest. 45 CFR Part 94 is available at the following Web site: <https://www.ecfr.gov/current/title-45/part-94>.

As required by 45 CFR Part 94.4, **Responsibilities of Institutions regarding Investigator financial conflicts of interest**, each Institution shall:

- a. Maintain an up-to-date, written, enforced policy on financial conflicts of interest that complies with this part, and make such policy available via a publicly accessible Web site. If the Institution does not have any current presence on a publicly accessible Web site (and only in those cases), the Institution shall make its written policy available to any requestor within five business days of a request. If, however, the Institution acquires a presence on a publicly accessible Web site during the time of the NIH award, the requirement to post the information on that Web site will apply within 30 calendar days. If an Institution maintains a policy on financial conflicts of interest that includes standards that are more stringent than this part (e.g., that require a more extensive disclosure of financial interests), the Institution shall adhere to its policy and shall provide FCOI reports regarding identified financial conflicts of interest to the NIH Awarding Component in accordance with the Institution's own standards and within the timeframe prescribed by this part.
- b. Inform each Investigator of the Institution's policy on financial conflicts of interest, the Investigator's responsibilities regarding disclosure of significant financial interests, and of these regulations, and require each Investigator to complete training regarding the same prior to engaging in research related to any NIH-funded contract and at least every four years, and immediately when any of the following circumstances apply:
 1. The Institution revises its financial conflict of interest policies or procedures in any manner that affects the requirements of Investigators;
 2. An Investigator is new to an Institution; or
 3. An Institution finds that an Investigator is not in compliance with the Institution's financial conflict of interest policy or management plan.
- c. If the Institution carries out the NIH-funded research through a subrecipient (e.g., subcontractors, or consortium members), the Institution (awardee Institution) must take reasonable steps to ensure that any subrecipient Investigator complies with this part by incorporating as part of a written agreement with the subrecipient terms that establish whether the financial conflicts of interest policy of the awardee Institution or that of the subrecipient will apply to the subrecipient's Investigators.
 1. If the subrecipient's Investigators must comply with the subrecipient's financial conflicts of interest policy, the subrecipient shall certify as part of the agreement referenced above that its policy complies with this part. If the subrecipient cannot provide such certification, the agreement shall state that subrecipient Investigators are subject to the financial conflicts of interest policy of the awardee Institution for disclosing significant financial interests that are directly related to the subrecipient's work for the awardee Institution;
 2. Additionally, if the subrecipient's Investigators must comply with the subrecipient's financial conflicts of interest policy, the agreement referenced above shall specify time period(s) for the subrecipient to report all identified financial conflicts of interest to the awardee Institution. Such time period(s) shall be sufficient to enable the awardee Institution to provide timely FCOI reports, as necessary, to the NIH as required by this part;
 3. Alternatively, if the subrecipient's Investigators must comply with the awardee Institution's financial conflicts of interest policy, the agreement referenced above shall

specify time period(s) for the subrecipient to submit all Investigator disclosures of significant financial interests to the awardee Institution. Such time period(s) shall be sufficient to enable the awardee Institution to comply timely with its review, management, and reporting obligations under this part.

4. Providing FCOI reports to the NIH Awarding Component regarding all financial conflicts of interest of all subrecipient Investigators consistent with this part, i.e., prior to the expenditure of funds and within 60 days of any subsequently identified FCOI.
- d. Designate an institutional official(s) to solicit and review disclosures of significant financial interests from each Investigator who is planning to participate in, or is participating in, the NIH-funded research.
- e. Require that each Investigator who is planning to participate in the NIH-funded research disclose to the Institution's designated official(s) the Investigator's significant financial interests (and those of the Investigator's spouse and dependent children) no later than date of submission of the Institution's proposal for NIH-funded research
- f. Require each Investigator who is participating in the NIH-funded research to submit an updated disclosure of significant financial interests at least annually, in accordance with the specific time period prescribed by the Institution, during the period of the award. Such disclosure shall include any information that was not disclosed initially to the Institution pursuant to [paragraph \(e\)\(1\)](#) of this section, or in a subsequent disclosure of significant financial interests (e.g., any financial conflict of interest identified on a NIH-funded project that was transferred from another Institution), and shall include updated information regarding any previously disclosed significant financial interest (e.g., the updated value of a previously disclosed equity interest).
- g. Require each Investigator who is participating in the NIH-funded research to submit an updated disclosure of significant financial interests within thirty days of discovering or acquiring (e.g., through purchase, marriage, or inheritance) a new significant financial interest.
- h. Provide guidelines consistent with this part for the designated institutional official(s) to determine whether an Investigator's significant financial interest is related to NIH-funded research and, if so related, whether the significant financial interest is a financial conflict of interest. An Investigator's significant financial interest is related to NIH-funded research when the Institution, through its designated official(s), reasonably determines that the significant financial interest: Could be affected by the NIH-funded research; or is in an entity whose financial interest could be affected by the research. The Institution may involve the Investigator in the designated official(s)'s determination of whether a significant financial interest is related to the NIH-funded research. A financial conflict of interest exists when the Institution, through its designated official(s), reasonably determines that the significant financial interest could directly and significantly affect the design, conduct, or reporting of the NIH-funded research.
- i. Take such actions as necessary to manage financial conflicts of interest, including any financial conflicts of a subrecipient Investigator pursuant to [paragraph \(c\)](#) of this section. Management of an identified financial conflict of interest requires development and implementation of a management plan and, if necessary, a retrospective review and mitigation report pursuant to [§ 94.5\(a\)](#).
- j. Provide initial and ongoing FCOI reports to the NIH as required pursuant to [§ 94.5\(b\)](#).
- k. Maintain records relating to all Investigator disclosures of financial interests and the Institution's review of, and response to, such disclosures (whether or not a disclosure resulted in the Institution's determination of a financial conflict of interest), and all actions under the Institution's policy or retrospective review, if applicable, for at least three years from the date

of final payment or, where applicable, for the time periods specified in [48 CFR part 4, subpart 4.7.](#)

- I. Establish adequate enforcement mechanisms and provide for employee sanctions or other administrative actions to ensure Investigator compliance as appropriate.
- m. Certify, in each contract proposal to which this part applies, that the Institution:
 1. Has in effect at that Institution an up-to-date, written, and enforced administrative process to identify and manage financial conflicts of interest with respect to all research projects for which funding is sought or received from the NIH;
 2. Shall promote and enforce Investigator compliance with this part's requirements including those pertaining to disclosure of significant financial interests;
 3. Shall manage financial conflicts of interest and provide initial and ongoing FCOI reports to the NIH Awarding Component consistent with this part;
 4. Agrees to make information available, promptly upon request, to the HHS relating to any Investigator disclosure of financial interests and the Institution's review of, and response to, such disclosure, whether or not the disclosure resulted in the Institution's determination of a financial conflict of interest; and Shall fully comply with the requirements of this part.
- n. As required by 45 CFR Part 94.5, Management and reporting of financial conflicts of interest:
 - a. Management of financial conflicts of interest.
 - b. Prior to the Institution's expenditure of any funds under a NIH-funded research project, the designated official(s) of an Institution shall, consistent with [§ 94.4\(f\)](#) : review all Investigator disclosures of significant financial interests; determine whether any significant financial interests relate to NIH-funded research; determine whether a financial conflict of interest exists; and, if so, develop and implement a management plan that shall specify the actions that have been, and shall be, taken to manage such financial conflict of interest. Examples of conditions or restrictions that might be imposed to manage a financial conflict of interest include, but are not limited to:
 - i. Public disclosure of financial conflicts of interest (e.g., when presenting or publishing the research);
 - ii. For research projects involving human subjects research, disclosure of financial conflicts of interest directly to participants;
 - iii. Appointment of an independent monitor capable of taking measures to protect the design, conduct, and reporting of the research against bias, resulting from the financial conflict of interest;
 - iv. Modification of the research plan;
 - v. Change of personnel or personnel responsibilities, or disqualification of personnel from participation in all or a portion of the research;
 - vi. Reduction or elimination of the financial interest (e.g., sale of an equity interest); or
 - vii. Severance of relationships that create financial conflicts.
- o. Whenever, in the course of an ongoing NIH-funded research project, an Investigator who is new to participating in the research project discloses a significant financial interest or an existing Investigator discloses a new significant financial interest to the Institution, the designated official(s) of the Institution shall, within sixty days: review the disclosure of the significant financial interest; determine whether it is related to NIH-funded research; determine whether a financial conflict of interest exists; and, if so, implement, on at least an interim basis, a management plan that shall specify the actions that have been, and will be, taken to manage such financial conflict of interest. Depending on the nature of the significant financial interest, an Institution may determine that additional interim measures are necessary with

regard to the Investigator's participation in the NIH-funded research project between the date of disclosure and the completion of the Institution's review.

- p. Whenever an Institution identifies a significant financial interest that was not disclosed timely by an Investigator or, for whatever reason, was not previously reviewed by the Institution during an ongoing NIH-funded research project (e.g., was not timely reviewed or reported by a subrecipient), the designated official(s) shall, within sixty days: review the significant financial interest; determine whether it is related to NIH-funded research; determine whether a financial conflict of interest exists; and, if so:
1. Implement, on at least an interim basis, a management plan that shall specify the actions that have been, and will be, taken to manage such financial conflict of interest going forward;
 2. In addition, whenever a financial conflict of interest is not identified or managed in a timely manner including failure by the Investigator to disclose a significant financial interest that is determined by the Institution to constitute a financial conflict of interest; failure by the Institution to review or manage such a financial conflict of interest; or failure by the Investigator to comply with a financial conflict of interest management plan, the Institution shall, within 120 days of the Institution's determination of noncompliance, complete a retrospective review of the Investigator's activities and the NIH-funded research project to determine whether any NIH-funded research, or portion thereof, conducted during the time period of the noncompliance, was biased in the design, conduct, or reporting of such research.

The Institution is required to document the retrospective review; such documentation shall include, but not necessarily be limited to, all of the following key elements:

1. Project number;
 2. Project title;
 3. PD/PI or contact PD/PI if a multiple PD/PI model is used;
 4. Name of the Investigator with the FCOI;
 5. Name of the entity with which the Investigator has a financial conflict of interest;
 6. Reason(s) for the retrospective review;
 7. Detailed methodology used for the retrospective review (e.g., methodology of the review process, composition of the review panel, documents reviewed);
 8. Findings of the review; and
 9. Conclusions of the review.
- q. Based on the results of the retrospective review, if appropriate, the Institution shall update the previously submitted FCOI report, specifying the actions that will be taken to manage the financial conflict of interest going forward. If bias is found, the Institution is required to notify the NIH Awarding Component promptly and submit a mitigation report to the NIH Awarding Component. The mitigation report must include, at a minimum, the key elements documented in the retrospective review above and a description of the impact of the bias on the research project and the Institution's plan of action or actions taken to eliminate or mitigate the effect of the bias (e.g., impact on the research project; extent of harm done, including any qualitative and quantitative data to support any actual or future harm; analysis of whether the research project is salvageable). Thereafter, the Institution will submit FCOI reports annually, as specified elsewhere in this part. Depending on the nature of the financial conflict of interest,

an Institution may determine that additional interim measures are necessary with regard to the Investigator's participation in the NIH-funded research project between the date that the financial conflict of interest or the Investigator's noncompliance is determined and the completion of the Institution's retrospective review.

- r. Whenever an Institution implements a management plan pursuant to this part, the Institution shall monitor Investigator compliance with the management plan on an ongoing basis until the completion of the NIH-funded research project.
- s. Prior to the Institution's expenditure of any funds under a NIH-funded research project, the Institution shall ensure public accessibility, via a publicly accessible Web site or written response to any requestor within five business days of a request, of information concerning any significant financial interest disclosed to the Institution that meets the following three criteria:
 - 1. The significant financial interest was disclosed and is still held by key personnel as defined in this part;
 - 2. The Institution determines that the significant financial interest is related to the NIH-funded research; and
 - 3. The Institution determines that the significant financial interest is a financial conflict of interest.
- t. The information that the Institution makes available via a publicly accessible Web site or written response to any requestor within five business days of a request, shall include, at a minimum, the following: The Investigator's name; the Investigator's title and role with respect to the research project; the name of the entity in which the significant financial interest is held; the nature of the significant financial interest; and the approximate dollar value of the significant financial interest (dollar ranges are permissible: \$0-\$4,999; \$5,000-\$9,999; \$10,000-\$19,999; amounts between \$20,000-\$100,000 by increments of \$20,000; amounts above \$100,000 by increments of \$50,000), or a statement that the interest is one whose value cannot be readily determined through reference to public prices or other reasonable measures of fair market value.
- u. If the Institution uses a publicly accessible Web site for the purposes of this subsection, the information that the Institution posts shall be updated at least annually. In addition, the Institution shall update the Web site within sixty days of the Institution's receipt or identification of information concerning any additional significant financial interest of the senior/key personnel for the NIH-funded research project that was not previously disclosed, or upon the disclosure of a significant financial interest of senior/key personnel new to the NIH-funded research project, if the Institution determines that the significant financial interest is related to the NIH-funded research and is a financial conflict of interest. The Web site shall note that the information provided is current as of the date listed and is subject to updates, on at least an annual basis and within 60 days of the Institution's identification of a new financial conflict of interest. If the Institution responds to written requests for the purposes of this subsection, the Institution will note in its written response that the information provided is current as of the date of the correspondence and is subject to updates, on at least an annual basis and within 60 days of the Institution's identification of a new financial conflict of interest, which should be requested subsequently by the requestor.
- v. Information concerning the significant financial interests of an individual subject to [paragraph \(a\)\(5\)](#) of this section shall remain available, for responses to written requests or for posting via the Institution's publicly accessible Web site for at least three years from the date that the information was most recently updated.
- w. In addition to the types of financial conflicts of interest as defined in this part that must be managed pursuant to this section, an Institution may require the management of other

financial conflicts of interest in its policy on financial conflicts of interest, as the Institution deems appropriate.

2. Reporting of financial conflicts of interest.

- a. Prior to the Institution's expenditure of any funds under a NIH-funded research project, the Institution shall provide to the NIH Awarding Component an FCOI report regarding any Investigator's significant financial interest found by the Institution to be conflicting and ensure that the Institution has implemented a management plan in accordance with this part. In cases in which the Institution identifies a financial conflict of interest and eliminates it prior to the expenditure of NIH-awarded funds, the Institution shall not submit an FCOI report to the NIH Awarding Component.
- b. For any significant financial interest that the Institution identifies as conflicting subsequent to the Institution's initial FCOI report during an ongoing NIH-funded research project (e.g., upon the participation of an Investigator who is new to the research project), the Institution shall provide to the NIH Awarding Component, within sixty days, an FCOI report regarding the financial conflict of interest and ensure that the Institution has implemented a management plan in accordance with this part. Pursuant to [paragraph \(a\)\(3\)\(ii\)](#) of this section, where such FCOI report involves a significant financial interest that was not disclosed timely by an Investigator or, for whatever reason, was not previously reviewed or managed by the Institution (e.g., was not timely reviewed or reported by a subrecipient), the Institution also is required to complete a retrospective review to determine whether any NIH-funded research, or portion thereof, conducted prior to the identification and management of the financial conflict of interest was biased in the design, conduct, or reporting of such research. Additionally, pursuant to [paragraph \(a\)\(3\)\(iii\)](#) of this section, if bias is found, the Institution is required to notify the NIH Awarding Component promptly and submit a mitigation report to the NIH Awarding Component.
- c. Any FCOI report required under [paragraphs \(b\)\(1\)](#) or [\(b\)\(2\)](#) of this section shall include sufficient information to enable the NIH Awarding Component to understand the nature and extent of the financial conflict, and to assess the appropriateness of the Institution's management plan. Elements of the FCOI report shall include, but are not necessarily limited to the following:
 - i. Project/Contract number;
 - ii. PD/PI or Contact PD/PI if a multiple PD/PI model is used;
 - iii. Name of the Investigator with the financial conflict of interest;
 - iv. Name of the entity with which the Investigator has a financial conflict of interest;
 - v. Nature of the financial interest (e.g., equity, consulting fee, travel reimbursement, honorarium);
 - vi. Value of the financial interest (dollar ranges are permissible: \$0-\$4,999; \$5,000-\$9,999; \$10,000-\$19,999; amounts between \$20,000-\$100,000 by increments of \$20,000; amounts above \$100,000 by increments of \$50,000), or a statement that the interest is one whose value cannot be readily determined through reference to public prices or other reasonable measures of fair market value;
 - vii. A description of how the financial interest relates to the NIH-funded research and the basis for the Institution's determination that the financial interest conflicts with such research; and
 - viii. A description of the key elements of the Institution's management plan, including:
 - A. Role and principal duties of the conflicted Investigator in the research project;
 - B. Conditions of the management plan;

- C. How the management plan is designed to safeguard objectivity in the research project;
 - D. Confirmation of the Investigator's agreement to the management plan;
 - E. How the management plan will be monitored to ensure Investigator compliance; and
 - F. Other information as needed.
- d. For any financial conflict of interest previously reported by the Institution with regard to an ongoing NIH-funded research project, the Institution shall provide to the NIH Awarding Component an annual FCOI report that addresses the status of the financial conflict of interest and any changes to the management plan for the duration of the NIH-funded research project. The annual FCOI report shall specify whether the financial conflict is still being managed or explain why the financial conflict of interest no longer exists. The Institution shall provide annual FCOI reports to the NIH Awarding Component for the duration of the project period (including extensions with or without funds) in the time and manner specified by the NIH Awarding Component.
 - e. In addition to the types of financial conflicts of interest as defined in this part that must be reported pursuant to this section, an Institution may require the reporting of other financial conflicts of interest in its policy on financial conflicts of interest, as the Institution deems appropriate.

ARTICLE H.19. OBTAINING AND DISSEMINATING BIOMEDICAL RESEARCH RESOURCES

Unique research resources arising from NIH-funded research are to be shared with the scientific research community. NIH provides guidance, entitled, "Principles and Guidelines for Recipients of NIH Research Grants and Contracts on Obtaining and Disseminating Biomedical Research Resources: Final Notice," (Federal Register Notice, December 23, 1999 [64 FR 72090]), concerning the appropriate terms for disseminating and acquiring these research resources. This guidance, found at: <http://www.gpo.gov/fdsys/pkg/FR-1999-12-23/pdf/99-33292.pdf> is intended to help Contractors ensure that the conditions they impose and accept on the transfer of research tools will facilitate further biomedical research, consistent with the requirements of the Bayh-Dole Act and NIH funding policy.

Note: For the purposes of this Article, the terms, "research tools", "research materials", and "research resources" are used interchangeably and have the same meaning.

ARTICLE H.20. CONFIDENTIAL INFORMATION, HHSAR 352.224-71 (FEB 2024) (DEVIATION).

(a) *Definition.* As used in this clause—

Confidential information means information or data of a personal nature about an individual, or proprietary information or data submitted by or pertaining to an institution or organization.

(b) *Identification of information.* Specific confidential information or categories of information that the Government will furnish to the Contractor, or that the Contractor is expected to generate is identified in this contract.

(c) *Disclosure.* The Contractor shall not disclose confidential information or records until written notice is provided to the Contracting Officer at least 45 days in advance of the Contractor's intent to release findings of studies or research, to which an agency response may be appropriate to protect the public interest or that of the agency. The Contractor shall not disseminate or publish such information without the written consent of the Contracting Officer.

(d) *Government furnished or provided information:* For information provided by or on behalf of the government—

(1) The publication or dissemination of the following types of information are restricted under this contract: None

(e) The Contractor shall consult with the Contracting Officer when there is uncertainty with regard to the confidentiality of, or a property interest in, information under this contract prior to the release, disclosure, dissemination, or publication of such information.

(End of clause).

PART II – CONTRACT CLAUSES

SECTION I – CONTRACT CLAUSES

THE FOLLOWING ARTICLE I.1. CLAUSE LISTING(S) WILL BE APPLICABLE TO MOST CONTRACTS RESULTING FROM THIS RFP. HOWEVER, THE ORGANIZATIONAL STRUCTURE OF THE SUCCESSFUL OFFEROR(S) WILL DETERMINE THE SPECIFIC CLAUSE LISTING TO BE CONTAINED IN THE CONTRACT(S) AWARDED FROM THIS RFP.

ARTICLE I.1. GENERAL CLAUSES FOR A COST-REIMBURSEMENT RESEARCH AND DEVELOPMENT CONTRACT

This solicitation incorporates the following clauses by reference, with the same force and effect as if they were given in full text. Upon request, the Contracting Officer will make their full text available. Also, the full text of a clause may be accessed electronically as follows: FAR Clauses at: <https://www.acquisition.gov/> . HHSAR Clauses at: <https://www.hhs.gov/grants-contracts/contracts/contract-policies-regulations/hhsar/part-352-solicitation-provisions-contract-clauses/index.html>

ARTICLE I.2. AUTHORIZED SUBSTITUTION OF CLAUSES

Any authorized substitutions and/or modifications other than the General Clauses which will be based on the type of contract/Contractor will be determined during negotiations.

It is expected that the following substitution(s) will be made part of the resultant contract:

- a. Alternate II (Aug 2016) of FAR Clause **52.215-2, Audit and Records--Negotiation** (Jun 2020) is added.
- b. FAR Clauses **52.215-15, Pension Adjustments and Asset Reversions** (Oct 2010); **52.215-18, Reversion or Adjustment of Plans for Post-Retirement Benefits (PRB) Other Than Pensions** (Jul 2005); and, **52.215-19 , Notification of Ownership Changes** (Oct 1997), are deleted in their entirety.
- c. **Alternate IV** (Oct 2010) of FAR Clause **52.215-21, Requirements for Certified Cost or Pricing Data and Data Other Than Certified Cost or Pricing Data--Modifications** (Nov 2021) is added.
- d. FAR Clause **52.215-23, Limitations on Pass-Through Charges** (Jun 2020), is added.
- e. **Alternate II** (Nov 2016) of FAR Clause **52.219-9, Small Business Subcontracting Plan** (Sep 2023) is added.
- f. FAR Clause **52.232-17, Interest** (May 2014) is deleted.
- g. **Alternate I** (Feb 2002), of FAR Clause **52.232-25, Prompt Payment** (Jan 2017).

ARTICLE I.3. ADDITIONAL CONTRACT CLAUSES

Additional clauses other than those listed below which are base don the type of contract/Contractor shall be determined during negotiations. Any contract awarded from this solicitation will contain the following:

This contract incorporates the following clauses in full text.

a. FEDERAL ACQUISITION REGULATION (FAR) (48 CFR CHAPTER 1) CLAUSES

1. **RFO FAR Clause 52.203-13, Contractor Code of Business Ethics and Conduct** (Nov 2021).
2. **FAR Clause 52.203-14, Display of Hotline Poster(s)** (Nov 2021).

"...(3) Any required posters may be obtained as follows:

Poster(s)	Obtain From:
HHS Contractor Code of Ethics and Business Conduct Poster	https://core-docs.s3.amazonaws.com/documents/asset/uploaded_file/576385/OIG Hotline Poster 1 .pdf

3. **FAR Clause 52.203-15, Whistleblower Protections Under the American Recovery and Reinvestment Act of 2009** (Jun 2010).
4. **FAR Clause 52.203-16, Preventing Personal Conflicts of Interest** (Jun 2020).
5. **FAR Clause 52.204-14, Service Contract Reporting Requirements.** (Deviation August 2025) (RFO August 2025).
6. **RFO FAR Clause 52.210-1, Market Research** (Deviation July 2025)
7. **FAR Clause 52.243-2, Changes-Cost-Reimbursement** (Deviation August 2025) (RFO August 2025), **Alternate V** (Deviation August 2025) (RFO August 2025).
8. **FAR Clause 52.217-8 Option to the Term of the Contract** (NOV 1999)
9. **FAR Clause 52.217-9 Option to Extend Services** (NOV 1999)
10. **FAR Clause 52.219-6 Notice of Total Small Business Set-Aside.** (NOV 2020) (Deviation Nov 2025)
11. **FAR Clause 52.219-28 Post-Award Small Business Program Representation.** (JAN 2025) (Deviation Nov 2025)
12. **FAR Clause 52.227-14 Rights in Data-General.** (MAY 2014) - Alternate II (DEC 2007)
13. **FAR Clause 52.227-16 Additional Data Requirements.** (JUN 1987)

14. FAR Clause **52.232-18 Availability of Funds.** (APR 1984) FAR Clause 52.237-3 Continuity of Services. (JAN 1991)
15. FAR Clause **52.246-25 Limitation of Liability - Services.** (FEB 1997)
16. FAR Clause **52.247-63 Preference for U.S.-Flag Air Carriers.** (JAN 2025)
17. FAR Clause **52.237-3 Continuity of Services.** (JAN 1991)
18. FAR Clause **52.246-25 Limitation of Liability - Services.** (FEB 1997)
19. FAR Clause **52.247-63 Preference for U.S.-Flag Air Carriers.** (JAN 2025)
- b. DEPARTMENT OF HEALTH AND HUMAN SERVICES ACQUISITION REGULATION (HHSAR) (48 CHAPTER 3) CLAUSES:
 1. HHSAR Cause **352.208-70 Printing and Duplication.** (DEC 2015)
 2. HHSAR Clause **352.211-3 Paperwork Reduction Act.** (DEC 2015)
 3. HHSAR Clause **352.223-70 Safety and Health.** (DEC 2015)
 4. HHSAR Clause **352.231-70 Salary Rate Limitation** (December 2015).
 5. HHSAR Clause **352.232-71 Electronic Submission of Payment Requests** (February 2, 2022)

ARTICLE I.4. ADDITIONAL FAR CONTRACT CLAUSES INCLUDED IN FULL TEXT

Additional clauses other than those listed below which are based on the type of contract/Contractor shall be determined during negotiations. Any contract awarded from this solicitation will contain the following:

This contract incorporates the following clauses in full text.

FEDERAL ACQUISITION REGULATION (FAR) (48 CFR CHAPTER 1) CLAUSES:

1. **RFO FAR Clause 52.209-9, Updates of Publicly Available Information Regarding Responsibility Matters (Oct 2018) (Deviation NOV 2025)**

(a) The Contractor shall update the information in the Federal Awardee Performance and Integrity Information System (FAPIIS) on a semi-annual basis, throughout the life of the contract, by posting the required information in the System for Award Management via <https://www.sam.gov>.

(b) As required by section 3010 of the Supplemental Appropriations Act, 2010 (Pub. L. 111-212), all information posted in FAPIIS on or after April 15, 2011, except past performance reviews, will be publicly available. FAPIIS consists of two segments-

(1) The non-public segment, into which Government officials and the Contractor post information, which can only be viewed by--

(i) Government personnel and authorized users performing business on behalf of the Government; or

(ii) The Contractor, when viewing data on itself; and

(2) The publicly-available segment, to which all data in the non-public segment of FAPIIS is automatically transferred after a waiting period of 14 calendar days, except for-

(i) Past performance reviews required by subpart 42.15;

(ii) Information that was entered prior to April 15, 2011; or

(iii) Information that is withdrawn during the 14-calendar-day waiting period by the Government official who posted it in accordance with paragraph (c)(1) of this clause.

(c) The Contractor will receive notification when the Government posts new information to the Contractor's record.

(1) If the Contractor asserts in writing within 7 calendar days, to the Government official who posted the information, that some of the information posted to the non-public segment of FAPIIS is covered by a disclosure exemption under the Freedom of Information Act, the Government official who posted the information must within 7 calendar days remove the posting

from FAPIIS and resolve the issue in accordance with agency Freedom of Information procedures, prior to reposting the releasable information. The contractor must cite 52.209-9 and request removal within 7 calendar days of the posting to FAPIIS.

(2) The Contractor will also have an opportunity to post comments regarding information that has been posted by the Government. The comments will be retained as long as the associated information is retained, i.e., for a total period of 6 years. Contractor comments will remain a part of the record unless the Contractor revises them.

(3) As required by section 3010 of Pub. L. 111-212, all information posted in FAPIIS on or after April 15, 2011, except past performance reviews, will be publicly available.

(d) Public requests for system information posted prior to April 15, 2011, will be handled under Freedom of Information Act procedures, including, where appropriate, procedures promulgated under E.O. 12600.

(End of clause)

2. FAR 52.217-9 Option to Extend the Term of the Contract. (MAR 2000)

(a) The Government may extend the term of this contract by written notice to the Contractor within 15 days; provided that the Government gives the Contractor a preliminary written notice of its intent to extend at least 30 days before the contract expires. The preliminary notice does not commit the Government to an extension.

(b) If the Government exercises this option, the extended contract shall be considered to include this option clause.

(c) The total duration of this contract, including the exercise of any options under this clause, shall not exceed 7 years.

(End of clause)

3. FAR Clause 52.240-93, Basic Safeguarding of Covered Contractor Information Systems (RFO August 2025)

(a) Definitions. As used in this clause—

Covered contractor information system means an information system that is owned or operated by a contractor that processes, stores, or transmits Federal contract information.

Federal contract information—

(1) Means information, not intended for public release, that is provided by or generated for the Government under a contract to develop or deliver a product or service to the Government; but

(2) Does not include information provided by the Government to the public (such as on public websites) or simple transactional information (such as information necessary to process payments).

Information means any communication or representation of knowledge such as facts, data, or opinions, in any medium or form, including textual, numerical, graphic, cartographic, narrative, or audiovisual (Committee on National Security Systems Instruction (CNSSI) 4009).

Information system means a discrete set of information resources organized for the collection, processing, maintenance, use, sharing, dissemination, or disposition of information (44 U.S.C. 3502).

Safeguarding means measures or controls that are prescribed to protect information systems.

(b) *Safeguarding requirements.*

(1) Basic requirements. The Contractor shall safeguard its covered contractor information systems by implementing, at minimum, the following security controls:

- (i) Limit information system access to authorized users, processes acting on behalf of authorized users, or devices (including other information systems).
- (ii) Limit information system access to the types of transactions and functions that authorized users are permitted to execute.
- (iii) Verify and control/limit connections to and use of external information systems.
- (iv) Control information posted or processed on publicly accessible information systems.
- (v) Identify information system users, processes acting on behalf of users, or devices.
- (vi) Authenticate (or verify) the identities of those users, processes, or devices, as a prerequisite to allowing access to organizational information systems.
- (vii) Sanitize or destroy information system media containing Federal Contract Information before disposal or release for reuse.
- (viii) Limit physical access to organizational information systems, equipment, and the respective operating environments to authorized individuals.

(ix) Escort visitors and monitor visitor activity; maintain audit logs of physical access; and control and manage physical access devices.

(x) Monitor, control, and protect organizational communications (i.e., information transmitted or received by organizational information systems) at the external boundaries and key internal boundaries of the information systems.

(xi) Implement subnetworks for publicly accessible system components that are physically or logically separated from internal networks.

(xii) Identify, report, and correct information and information system flaws in a timely manner.

(xiii) Provide protection from malicious code at appropriate locations within organizational information systems.

(xiv) Update malicious code protection mechanisms when new releases are available.

(xv) Perform periodic scans of the information system and real-time scans of files from external sources as files are downloaded, opened, or executed.

(2) Other requirements. This clause does not relieve the Contractor of any other specific safeguarding requirements specified by Federal departments and agencies relating to covered contractor information systems generally or other Federal safeguarding requirements for controlled unclassified information (CUI) as established by Executive Order 13556.

(c) Subcontracts. The Contractor shall include the substance of this clause, including this paragraph (c), in subcontracts under this contract (including subcontracts for the acquisition of commercial products, other than commercially available off-the-shelf items, or commercial services), in which the subcontractor may have Federal contract information residing in or transiting through its information system.

(End of clause)

PART III - LIST OF DOCUMENTS, EXHIBITS AND OTHER ATTACHMENTS

SECTION J - List of Documents, Exhibits and Other Attachments

The following documents are incorporated into this RFP:

SOLICITATION ATTACHMENTS

Attachment No.	Title	Location
Attachment 1:	Packaging and Delivery of Proposals for Use with the NIH electronic Contract Proposal Submission (eCPS) Website	See Attachments at the end of this RFP.
Attachment 2:	Proposal Intent Response Sheet	See Attachments at the end of this RFP.
Attachment 3:	Statement of Work	See Attachments at the end of this RFP.
Attachment 4:	Additional Technical Proposal Instructions	See Attachments at the end of this RFP.
Attachment 5:	Additional Business Proposal Instructions	See Attachments at the end of this RFP.
Attachment 6:	Additional RFP-Specific Materials	See Attachments at the end of this RFP.
Attachment 7:	Government Furnished Property	See Attachments at the end of this RFP.
Attachment 8:	CRPMC Online Site Management and Ordering System (COSMOS) User Manual	See Attachments at the end of this RFP.
Attachment 9:	CRPMC Online Site Management and Ordering System (COSMOS) Clinical Research Site User Manual	See Attachments at the end of this RFP.
Attachment 10:	CRPMC Online Site Management and Ordering System (COSMOS) Configuration/Design Specification Document	See Attachments at the end of this RFP.
Attachment 11:	Section K - Representations, Certifications, and Other Statements of Offerors	Section J National Institutes of Health (nih.gov)

TECHNICAL PROPOSAL ATTACHMENTS

Attachment No.	Title	Location
Attachment 12:	Technical Proposal Cost Summary	https://oamp.od.nih.gov/sites/default/files/DGS/contracting-forms/Tech-Prop-Cost-Summ.pdf
Attachment 13:	Summary of Related Activities	https://oamp.od.nih.gov/sites/default/files/DGS/contracting-forms/summary-related-activities.pdf
Attachment 14:	Protection of Human Subjects: Assurance Identification/IRB Certification/Declaration of Exemption, OMB Form No. 0990-0263 (Formerly Optional Form 310)	https://oamp.od.nih.gov/nih-document-generation-system/dgs-workform-information/attachment-files-section-j

BUSINESS PROPOSAL ATTACHMENTS

Attachment No.	Title	Location
Attachment 12:	Proposal Summary and Data Record, NIH-2043	https://oamp.od.nih.gov/sites/default/files/DGS/contracting-forms/NIH2043.pdf
Attachment 13:	Small Business Subcontracting Plan	https://oamp.od.nih.gov/nih-document-generation-system/dgs-workform-information/attachment-files-section-j

PART IV – REPRESENTATIONS AND INSTRUCTIONS

SECTION K – REPRESENTATIONS, CERTIFICATIONS AND OTHER STATEMENTS TO OFFERORS

IF YOU INTEND TO SUBMIT A PROPOSAL, YOU MUST:

1. Go to the **System for Award Management (SAM)** and complete the Representations and Certifications. The SAM website may be accessed at: <https://www.sam.gov/content/home>
2. Complete, and **INCLUDE as part of your BUSINESS PROPOSAL:**

SECTION K - REPRESENTATIONS, CERTIFICATIONS, AND OTHER STATEMENTS OF OFFERORS

which is included as an Attachment in Section J – LIST OF ATTACHMENTS, SOLICITATION ATTACHMENTS of this solicitation.

If you are unable to access this SECTION K - REPRESENTATIONS, CERTIFICATIONS, AND OTHER STATEMENTS OF OFFERORS electronically, you may request a copy from the Contracting Officer identified on the cover page of this solicitation.

3. FAR Clause **52.204-19 Incorporation by Reference of Representations and Certifications** (December 2014).

The Contractor's representations and certifications, including those completed electronically via the System for Award Management (SAM), are incorporated by reference into the contract.

(End of clause)

SECTION L - INSTRUCTIONS, CONDITIONS, AND NOTICES TO OFFERORS

GENERAL INFORMATION

a. **INSTRUCTIONS TO OFFERORS--COMPETITIVE ACQUISITION** FAR 52.215-1 (Nov 2021).

(a) *Definitions.* As used in this provision-

Discussions are negotiations that occur after establishment of the competitive range that may, at the Contracting Officer's discretion, result in the offeror being allowed to revise its proposal.

In writing, "writing," or "written" means any worded or numbered expression that can be read, reproduced, and later communicated, and includes electronically transmitted and stored information.

Proposal modification is a change made to a proposal before the solicitation's closing date and time, or made in response to an amendment, or made to correct a mistake at any time before award.

Proposal revision is a change to a proposal made after the solicitation closing date, at the request of or as allowed by a Contracting Officer as the result of negotiations.

Time, if stated as a number of days, is calculated using calendar days, unless otherwise specified, and will include Saturdays, Sundays, and legal holidays. However, if the last day falls on a Saturday, Sunday, or legal holiday, then the period shall include the next working day.

(b) *Amendments to solicitations.* If this solicitation is amended, all terms and conditions that are not amended remain unchanged. Offerors shall acknowledge receipt of any amendment to this solicitation by the date and time specified in the amendment(s).

(c) Submission, modification, revision, and withdrawal of proposals.

(1) Unless other methods (e.g., electronic commerce or facsimile) are permitted in the solicitation, proposals and modifications to proposals shall be submitted in paper media in sealed envelopes or packages (i) addressed to the office specified in the solicitation, and (ii) showing the time and date specified for receipt, the solicitation number, and the name and address of the offeror. Offerors using commercial carriers should ensure that the proposal is marked on the outermost wrapper with the information in paragraphs (c)(1)(i) and (c)(1)(ii) of this provision.

(2) The first page of the proposal must show-

(i) The solicitation number;

(ii) The name, address, and telephone and facsimile numbers of the offeror (and electronic address if available);

(iii) A statement specifying the extent of agreement with all terms, conditions, and provisions included in the solicitation and agreement to furnish any or all items upon which prices are offered at the price set opposite each item;

(iv) Names, titles, and telephone and facsimile numbers (and electronic addresses if available) of persons authorized to negotiate on the offeror's behalf with the Government in connection with this solicitation; and

(v) Name, title, and signature of person authorized to sign the proposal. Proposals signed by an agent shall be accompanied by evidence of that agent's authority, unless that evidence has been previously furnished to the issuing office.

(3) Submission, modification, revision, and withdrawal of proposals.

(i) Offerors are responsible for submitting proposals, and any modifications or revisions, so as to reach the Government office designated in the solicitation by the time specified in the solicitation. If no time is specified in the solicitation, the time for receipt is 4:30 p.m., local time, for the designated Government office on the date that proposal or revision is due.

(ii) (A) Any proposal, modification, or revision received at the Government office designated in the solicitation after the exact time specified for receipt of offers is "late" and will not be considered unless it is received before award is made, the Contracting Officer determines that accepting the late offer would not unduly delay the acquisition; and-

(1) If it was transmitted through an electronic commerce method authorized by the solicitation, it was received at the initial point of entry to the Government infrastructure not later than 5:00 p.m. one working day prior to the date specified for receipt of proposals; or

(2) There is acceptable evidence to establish that it was received at the Government installation designated for receipt of offers and was under the Government's control prior to the time set for receipt of offers; or

(3) It is the only proposal received.

(B) However, a late modification of an otherwise successful proposal that makes its terms more favorable to the Government, will be considered at any time it is received and may be accepted.

(iii) Acceptable evidence to establish the time of receipt at the Government installation includes the time/date stamp of that installation on the proposal wrapper, other documentary evidence of receipt maintained by the installation, or oral testimony or statements of Government personnel.

(iv) If an emergency or unanticipated event interrupts normal Government processes so that proposals cannot be received at the office designated for receipt of proposals by the exact time specified in the solicitation, and urgent Government requirements preclude amendment of the solicitation, the time specified for receipt of proposals will be deemed to be extended to the same time of day specified in the solicitation on the first work day on which normal Government processes resume.

(v) Proposals may be withdrawn by written notice received at any time before award. Oral proposals in response to oral solicitations may be withdrawn orally. If the solicitation authorizes facsimile proposals, proposals may be withdrawn via facsimile received at any time before award, subject to the conditions specified in the provision at [52.215-5](#), Facsimile Proposals. Proposals may be withdrawn in person by an offeror or an authorized representative, if the identity of the person requesting withdrawal is established and the person signs a receipt for the proposal before award.

(4) Unless otherwise specified in the solicitation, the offeror may propose to provide any item or combination of items.

(5) Offerors shall submit proposals in response to this solicitation in English, unless otherwise permitted by the solicitation, and in U.S. dollars, unless the provision at FAR [52.225-17](#), Evaluation of Foreign Currency Offers, is included in the solicitation.

(6) Offerors may submit modifications to their proposals at any time before the solicitation closing date and time, and may submit modifications in response to an amendment, or to correct a mistake at any time before award.

(7) Offerors may submit revised proposals only if requested or allowed by the Contracting Officer.

(8) Proposals may be withdrawn at any time before award. Withdrawals are effective upon receipt of notice by the Contracting Officer.

(d) Offer expiration date. Proposals in response to this solicitation will be valid for the number of days specified on the solicitation cover sheet (unless a different period is proposed by the offeror).

(e) Restriction on disclosure and use of data. Offerors that include in their proposals data that they do not want disclosed to the public for any purpose, or used by the Government except for evaluation purposes, shall-

(1) Mark the title page with the following legend:

This proposal includes data that shall not be disclosed outside the Government and shall not be duplicated, used, or disclosed-in whole or in part-for any purpose other than to evaluate this proposal. If, however, a contract is awarded to this offeror as a result of-or in connection with-the submission of this data, the Government shall have the right to duplicate, use, or disclose the data to the extent provided in the resulting

contract. This restriction does not limit the Government's right to use information contained in this data if it is obtained from another source without restriction. The data subject to this restriction are contained in sheets [insert numbers or other identification of sheets]; and

(2) Mark each sheet of data it wishes to restrict with the following legend:

Use or disclosure of data contained on this sheet is subject to the restriction on the title page of this proposal.

(f) Contract award.

(1) The Government intends to award a contract or contracts resulting from this solicitation to the responsible offeror(s) whose proposal(s) represents the best value after evaluation in accordance with the factors and subfactors in the solicitation.

(2) The Government may reject any or all proposals if such action is in the Government's interest.

(3) The Government may waive informalities and minor irregularities in proposals received.

(4) The Government intends to evaluate proposals and award a contract without discussions with offerors (except clarifications as described in FAR [15.306](#) (a)). Therefore, the offeror's initial proposal should contain the offeror's best terms from a cost or price and technical standpoint. The Government reserves the right to conduct discussions if the Contracting Officer later determines them to be necessary. If the Contracting Officer determines that the number of proposals that would otherwise be in the competitive range exceeds the number at which an efficient competition can be conducted, the Contracting Officer may limit the number of proposals in the competitive range to the greatest number that will permit an efficient competition among the most highly rated proposals.

(5) The Government reserves the right to make an award on any item for a quantity less than the quantity offered, at the unit cost or prices offered, unless the offeror specifies otherwise in the proposal.

(6) The Government reserves the right to make multiple awards if, after considering the additional administrative costs, it is in the Government's best interest to do so.

(7) Exchanges with offerors after receipt of a proposal do not constitute a rejection or counteroffer by the Government.

(8) The Government may determine that a proposal is unacceptable if the prices proposed are materially unbalanced between line items or subline items. Unbalanced pricing exists when, despite an acceptable total evaluated price, the price of one or more line items is significantly overstated or understated as indicated by the application of cost or price analysis techniques. A proposal may be rejected if the Contracting

Officer determines that the lack of balance poses an unacceptable risk to the Government.

(9) If a cost realism analysis is performed, cost realism may be considered by the source selection authority in evaluating performance or schedule risk.

(10) A written award or acceptance of proposal mailed or otherwise furnished to the successful offeror within the time specified in the proposal shall result in a binding contract without further action by either party.

(11) If a post-award debriefing is given to requesting offerors, the Government shall disclose the following information, if applicable:

(i) The agency's evaluation of the significant weak or deficient factors in the debriefed offeror's offer.

(ii) The overall evaluated cost or price and technical rating of the successful and the debriefed offeror and past performance information on the debriefed offeror.

(iii) The overall ranking of all offerors, when any ranking was developed by the agency during source selection.

(iv) A summary of the rationale for award.

(v) For acquisitions of commercial products, the make and model of the product to be delivered by the successful offeror.

(vi) Reasonable responses to relevant questions posed by the debriefed offeror as to whether source selection procedures set forth in the solicitation, applicable regulations, and other applicable authorities were followed by the agency.

(End of provision).

Alternate I (Oct 1997). As prescribed in FAR 15.209(a)(1), substitute the following paragraph (f)(4) for paragraph (f)(4) of the basic provision:

(f) (4) The Government intends to evaluate proposals and award a contract after conducting discussions with offerors whose proposals have been determined to be within the competitive range. If the Contracting Officer determines that the number of proposals that would otherwise be in the competitive range exceeds the number at which an efficient competition can be conducted, the Contracting Officer may limit the number of proposals in the competitive range to the greatest number that will permit an efficient competition among the most highly rated proposals. Therefore, the offeror's initial proposal should contain the offeror's best terms from a price and technical standpoint.

Alternate II (Oct 1997). As prescribed in FAR 15.209(a)(2), add a paragraph (c)(9) substantially the same as the following to the basic clause:

(9) Offerors may submit proposals that depart from stated requirements. Such proposals shall clearly identify why the acceptance of the proposal would be advantageous to the Government. Any deviations from the terms and conditions of the solicitation, as well as the comparative advantage to the Government, shall be clearly identified and explicitly defined. The Government reserves the right to amend the solicitation to allow all offerors an opportunity to submit revised proposals based on the revised requirements.

b. NAICS CODE AND SIZE STANDARD

Note: The following information is to be used by the offeror in preparing its Representations and Certifications (See Section K of this RFP), specifically in completing the provision entitled, SMALL BUSINESS PROGRAM REPRESENTATION, FAR Clause 52.219-1.

1. The North American Industry Classification System (NAICS) code for this acquisition is 541715
2. The small business size standard is 1,000.

THIS REQUIREMENT IS NOT SET-ASIDE FOR SMALL BUSINESS. However, the Federal Acquisition Regulation (FAR) requires in every solicitation, (except for foreign acquisitions) the inclusion of the North American Industry Classification System (NAICS) Code and corresponding size standard which best describes the nature of the requirement in the solicitation.

c. TYPE OF CONTRACT AND NUMBER OF AWARDS

It is anticipated that one award will be made from this solicitation and that the award will be made on/about March 16, 2027.

It is anticipated that the award from this solicitation will be a multiple-year Cost-Reimbursement type, level of effort/term contract with a Base Period and 6 one-year Options for a total period of performance of 7 years (See Section L.2.c. Business Proposal Instructions).

d. LEVEL OF EFFORT

The Government's requirement for the work set forth in the Statement of Work of this solicitation is 10 Full Time Equivalents (FTEs). **PLEASE NOTE: The number of FTEs includes the effort of subcontractors and/or consultants during the Base year of the contract and each Term Option.** It is estimated that the labor hours are constituted as specified below and will be expended approximately as follows:

Labor Category	Years 1 - 7
Project Director	1.0
Assistant Project Director	1.0
DEPOT, Assistant Project Director	1.0
USA Pharmacist	5.48
DEPOT Pharmacist	1.19
Computer Programmer	1.17
Operations Supervisor	1.19
Scientist III, Chemistry	1.19
USA Pharmacist Other	5.34
Repository Other	1.19
Depot Pharmacist Other	3.57
Other	1.19
Total	27

Options 7-48: Increased Level of Effort: In addition, the Government may exercise options for increased level of effort that may result from unanticipated increases in demand for clinical research study product management support of NIAID related studies or to support additional trials or studies that were not anticipated at the writing of this solicitation. This may include increases in labeling, packaging, and shipments of study products, as well as increases in U.S. and international distribution activities. This chart is included to show you the numbering of these Options:

a. Options 7-34: Increased Level of Effort

Should the Government elect to exercise these options, the Contractor shall provide resources for the unanticipated increase in work volume by 2 Full Time Equivalents (FTEs) for each option exercised. These options may be exercised up to 4 times each year. A separate cost proposal which includes a breakdown of costs on an annual basis should be provided for Options 7-34.

It is estimated that the labor mix is to be constituted as specified below and will be expended approximately as follows:

Labor Category	Years 1 – 7
Pharmacist	1.0
Assistant Project Director	1.0
Total	2.0

NOTE: While delivery of the total number of FTEs is a requirement for satisfactory performance of the contract, the labor mix provided above is the Government's estimate and should not be considered restrictive. Offerors should propose the labor mix they consider most appropriate for satisfactory completion of the work.

The following cost assumptions should be considered when preparing the cost proposal for Options 7 through 34:

- a) Ongoing Activities on the effective date of the contract - assume responsibility for the following:
 - Assume 15 new clinical protocols shall be conducted
 - Assume a total n = 5,500 participants
- b) New activities during the contract period of performance –Assume 150 clinical research site pharmacies located in varying regions, time zones and climates, 3,000 miles from the central distribution center.
 - 1) Secondary (auxiliary) Labeling, packaging and repackaging study products
 - Assume that the 4 different study products consisting of 15,000 individual units per year will be repackaged; 45% frozen vials (-20 C), 40% frozen vials (-80 C)
 - 2) Shipping and distribution of study products
 - Assume approximately 2,500 additional shipments of study products

b. Options 35-48: Increased Level of Effort

Should the Government elect to exercise these options, the Contractor shall provide resources for the unanticipated increase in work volume by 0.50 FTE for each option exercised. These options may be exercised up to 2 times each year. A separate cost proposal which includes a breakdown of costs on an annual basis should be provided for Options 35-48.

It is estimated that the labor mix is to be constituted as specified below and shall be expended approximately as follows:

Labor Category	Years 1 – 7
Pharmacist	.25
Assistant Project Director	.25
Total	.5

NOTE: While delivery of the total number of FTEs is a requirement for satisfactory performance of the contract, the labor mix provided above is the Government's estimate and should not be considered restrictive. Offerors should propose the labor mix they consider most appropriate for satisfactory completion of the work.

The following cost assumptions should be considered when preparing the cost proposal for Options 35 through 48:

- a) Ongoing Activities on the effective date of the contract - assume responsibility for the following:
 - Assume 2 new clinical protocols
 - Assume a total n=1,500 participants

- b) New activities during the contract period of performance – assume the following:
 - a. 150 clinical research site pharmacies located in varying regions, time zones and climates, 3000 miles from the central distribution center.
 - b. Labeling, packaging and repackaging study products
 - o Assume that 2 different study products consisting of 5,000 individual units per year will require repackaging and labelling
 - o Assume study product will be all frozen vials (-80 C)
 - c. Shipping and distribution of study products
 - o Assume 800 additional shipments of study product to clinical research site pharmacies located in varying regions, time zones and climates, up to 3,000 miles from the central distribution center.

c. Summary of Base Period and Options 1-48:

Provide a Summary Page that shows the total cost of the Base Period, and each of the Options separately.

e. COMMITMENT OF PUBLIC FUNDS

The Contracting Officer is the only individual who can legally commit the Government to the expenditure of public funds in connection with the proposed procurement. Any other commitment, either explicit or implied, is invalid.

f. PROMOTING EFFICIENT SPENDING

On September 21, 2011, the Office of Management and Budget issued [Memorandum M-11-35](https://obamawhitehouse.archives.gov/sites/default/files/omb/memoranda/2011/m11-35.pdf), <https://obamawhitehouse.archives.gov/sites/default/files/omb/memoranda/2011/m11-35.pdf> entitled, "Eliminating Conference Spending and Promoting Efficiency in Government," emphasizing the President's priority to ensure that the Government operates with the utmost efficiency and eliminates unnecessary or wasteful spending. This was followed by the Executive Order on Delivering an Efficient, Effective, and Accountable Government ([EO 13576](#)) and the Executive Order on Promoting Efficient Spending ([EO 13589](#)). On January 23, 2015, the Department of Health and Human Services (DHHS) issued the memorandum "HHS Policy on Promoting Efficient Spending: Use of Appropriated Funds for Conferences and Meetings Spaces, Food, Promotional Items, and Printing, and Publications" (See http://www.hhs.gov/asfr/ogapa/acquisition/effspendpol_memo.html).

In support of these directives, the NIH issued a November 1, 2015, Memorandum, entitled, "NIH Guidance Related to the HHS Policies on Promoting Efficient Spending: Use of Appropriated Funds for Conferences and Meeting Space, Food, Promotional Items, and Printing and Publications." (See <https://oamp.od.nih.gov/news/NIH-efficient-spending-policy>)

Any contract awarded as a result of this solicitation will:

- Specifically prohibit the use of contract funds for the provision of food for meals, light refreshments and beverages for any NIH funded meeting or conference; and
- Limit the procurement of meeting space, promotional items, printing and publications.

g. COMMUNICATIONS PRIOR TO CONTRACT AWARD

Offerors shall direct all communications to the attention of the Contract Specialist or Contracting Officer cited on the face page of this SOLICITATIONS. Communications with other officials may compromise the competitiveness of this acquisition and result in cancellation of the requirement.

h. RELEASE OF INFORMATION

Contract selection and award information will be disclosed to offerors in accordance with regulations applicable to negotiated acquisition. Prompt written notice will be given to unsuccessful offerors as they are eliminated from the competition, and to all offerors following award.

i. PREPARATION COSTS

This RFP does not commit the Government to pay for the preparation and submission of a proposal.

j. SERVICE OF PROTEST FAR 52.233-2 (Sep 2006).

(a) Protests, as defined in section 33.101 of the Federal Acquisition Regulation, that are filed directly with an agency, and copies of any protests that are filed with the Government Accountability Office (GAO), shall be served on the Contracting Officer (addressed as follows) by obtaining written and dated acknowledgment of receipt from:

Shawnice Williams, Contracting Officer
Office of R&D and Professional Services Contracts
Office of Acquisition & Logistics Management
6701 Rockledge Drive, Room 412-G
Bethesda, MD 20817-1816

Ashley Kinderdine, Contracting Officer
Office of R&D and Professional Services Contracts
Office of Acquisition & Logistics Management
6701 Rockledge Drive, Room 400-C
Bethesda, MD 20817-1816

(b) The copy of any protest shall be received in the office designated above within one day of filing a protest with the GAO.

(End of provision).

INSTRUCTIONS TO OFFERORS

a. GENERAL INSTRUCTIONS

INTRODUCTION

The following instructions will establish the acceptable minimum requirements for the format and contents of proposals. Special attention is directed to the requirements for technical and business proposals to be submitted in accordance with these instructions.

1. Contract Type and General Clauses

It is contemplated that a cost-reimbursement, level of effort/term type contract will be awarded. (See General Information) Any resultant contract shall include the clauses applicable to the selected offeror's organization and type of contract awarded as required by Public Law, Executive Order, or acquisition regulations in effect at the time of execution of the proposed contract.

2. Authorized Official and Submission of Proposal

The proposal must be signed by an official authorized to bind your organization and must stipulate that it is predicated upon all the terms and conditions of this RFP. Your proposal shall be submitted in the number of copies, to the addressees, and marked as indicated in the Attachment entitled, PACKAGING AND DELIVERY OF PROPOSAL, Part III, Section J hereof. Proposals will be typewritten, paginated, reproduced on letter size paper, printed/copied double-sided, on at least 30 percent post-consumer fiber paper, as required by FAR 4.302(b), and will be legible in all required copies. To expedite the proposal evaluation, all documents required for responding to the SOLICITATION should be placed in the following order:

I. COVER PAGE

Include RFP title, number, name of organization, UEI No., identification of the proposal part, and indicate whether the proposal is an original or a copy.

II. TECHNICAL PROPOSAL

It is recommended that the technical proposal consist of a cover page, a table of contents, and the information requested in the Technical Proposal Instructions and as specified in SECTION J, List of Attachments.

III. BUSINESS PROPOSAL

It is recommended that the business proposal consist of a cover page, a table of contents, and the information requested in the Business Proposal Instructions and as specified in SECTION J, List of Attachments.

3. Proposal Summary and Data Record (NIH-2043)

The Offeror must complete the Form NIH-2043, attached, with particular attention to the length of time the proposal is firm and the designation of those personnel authorized to conduct negotiations. (See SECTION J, Attachment entitled, PROPOSAL SUMMARY AND DATA RECORD)

4. Separation of Technical and Business Proposals

The proposal must be prepared in two parts: a "Technical Proposal" and a "Business Proposal." Each of the parts shall be separate and complete in itself so that evaluation of one may be accomplished independently of, and concurrently with, evaluation of the other. The technical proposal must include direct cost and resources information, such as labor-hours and categories and applicable rates, materials, subcontracts, travel, etc., and associated costs so that the offeror's understanding of the project may be evaluated (See SECTION J, Attachment entitled, TECHNICAL PROPOSAL COST SUMMARY.) However, the technical proposal should not include pricing data relating to individual salary information, indirect cost rates or amounts, fee amounts (if any), and total costs. The technical proposal should disclose your technical approach in as much detail as possible, including, but not limited to, the requirements of the technical proposal instructions.

5. Alternate Proposals

You may, at your discretion, submit alternate proposals, or proposals which deviate from the requirements; provided, that you also submit a proposal for performance of the work as specified in the statement of work. Such proposals may be considered if overall performance would be improved or not compromised and shall clearly identify why the acceptance of the proposal would be advantageous to the Government. Any deviations from the terms and conditions of the solicitation, as well as the comparative advantage to the Government, shall be clearly identified and explicitly defined. The Government reserves the right to amend the solicitation to allow all offerors an opportunity to submit revised proposals based on the revised requirements.

6. Evaluation of Proposals

The Government will evaluate proposals in accordance with the factors set forth in PART IV, SECTION M of this RFP.

7. Potential Award Without Discussions

The Government reserves the right to award a contract without discussions if the Contracting Officer determines that the initial prices are fair and reasonable and that discussions are not necessary.

8. Use of the Metric System of Measurement

It is the policy of the Department of Health and Human Services to support the Federal transition to the metric system and to use the metric system of measurement in all procurements, grants, and other business related activities unless such use is impracticable or is likely to cause significant inefficiencies.

The offeror is encouraged to prepare their proposal using either "Hard Metric," "Soft Metric," or "Dual Systems" of measurement. The following definitions are provided for your information:

Hard Metric - - The replacement of a standard inch-pound size with an accepted metric size for a particular purpose. An example of size substitution might be: selling or packaging liquids by the liter instead of by the pint or quart (as for soft drinks), or instead of by the gallon (as for gasoline).

Soft Metric - The result of a mathematical conversion of inch-pound measurements to metric equivalents for a particular purpose. The physical characteristics are not changed.

Dual Systems - The use of both inch-pound and metric systems. For example, an item is designed, produced, and described in inch-pound values with soft metric values also shown for information or comparison purposes.

9. Standards for Privacy of Individually Identifiable Health Information

The Department of Health and Human Services (DHHS) issued final modifications to the "Standards for Privacy of Individually Identifiable Health Information," the "Privacy Rule," on August 14, 2002. The Privacy Rule is a federal regulation under the Health Insurance Portability and Accountability Act (HIPAA) of 1996 that governs the protection of individually identifiable health information and is administered and enforced by the DHHS Office for Civil Rights (OCR). Those who must comply with the Privacy Rule (classified under the Rule as "covered entities" must do so by April 14, 2003 (with the exception of small health plans which have an extra year to comply).

Decisions about the applicability and implementation of the Privacy Rule reside with the Contractor and his/her institution. The OCR Web site (<http://www.hhs.gov/ocr/>) provides information of the Privacy Rule, including a complete Regulation Text and a set of decision tools on "Am I a covered entity?" Information on the impact of the HIPAA Privacy Rule on NIH processes involving the review, award, and administration of grants, cooperative agreements and contracts can be found at: <http://grants1.nih.gov/grants/guide/notice-files/NOT-OD-03-025.html>

10. Privacy Act - Treatment of Proposal Information

The Privacy Act of 1974 (P.L. 93-579) requires that a Federal agency advise each individual whom it asks to supply information, the authority which authorizes the solicitation, whether disclosure is voluntary or mandatory, the principal purpose or purposes for which the information is intended to be used, the uses outside the agency

which may be made of the information, and the effects on the individual, if any, of not providing all or any part of the requested information.

The NIH is requesting the information called for in this SOLICITATION pursuant to the authority provided by Sec. 301(a)(7) of the Public Health Service Act, as amended, and P.L. 92-218, as amended.

Providing the information requested is entirely voluntary. The collection of this information is for the purpose of conducting an accurate, fair, and adequate review prior to a discussion as to whether to award a contract.

Failure to provide any or all of the requested information may result in a less than adequate review.

In addition, the Privacy Act of 1974 (P.L. 93-579, Section 7) requires that the following information be provided when individuals are requested to disclose their social security number.

Provision of the social security number is voluntary. Social security numbers are requested for the purpose of accurate and efficient identification, referral, review and management of NIH contracting programs. Authority for requesting this information is provided by Section 301 and Title IV of the PHS Act, as amended.

The information provided by you may be routinely disclosed for the following purposes:

to the cognizant audit agency and the Government Accountability Office for auditing.
to the Department of Justice as required for litigation.
to respond to congressional inquiries.
to qualified experts, not within the definition of Department employees, for opinions as a part of the review process.

11. Selection of Offerors

- a. The acceptability of the scientific and technical portion of each research contract proposal will be evaluated by a technical review committee. The committee will evaluate each proposal in strict conformity with the evaluation factors of the RFP, utilizing point scores and written critiques. The committee may suggest that the Contracting Officer request clarifying information from an offeror.
- b. The business portion of each contract proposal found to be technical acceptable will be subjected to a cost and price analysis, management analysis, etc.
- c. If award will be made without conducting discussions, offerors may be given the opportunity to clarify certain aspects of their proposal (e.g., the relevance of an offeror's past performance information and adverse past performance information to which the offeror has not previously had an opportunity to respond) or to resolve minor or clerical errors.
- d. If the Government intends to conduct discussions prior to awarding a contract -
 1. Communications will be held with offerors whose past performance information is the determining factor preventing them from being placed within the competitive range. Such communications shall address

adverse past performance information to which an offeror has not had a prior opportunity to respond. Also, communications may be held with any other offerors whose exclusion from, or inclusion in, the competitive range is uncertain.

Such communications shall not be used to cure proposal deficiencies or omissions that alter the technical or cost elements of the proposal, and/or otherwise revise the proposal, but may be considered in rating proposals for the purpose of establishing the competitive range.

2. The Contracting Officer will, in concert with program staff, decide which proposals are in the competitive range. The competitive range will be comprised of all of the most highly rated proposals. Oral or written discussions will be conducted with all offerors in the competitive range.

While it is NIAID's policy to conduct discussions with all offerors in the competitive range, NIAID reserves the right, in special circumstances, to limit the number of proposals included in the competitive range to the greatest number that will permit an efficient competition. All aspects of the proposals are subject to discussions, including cost, technical approach, past performance, and contractual terms and conditions. At the conclusion of discussions, each offeror still in the competitive range shall be given an opportunity to submit a written Final Proposal Revision (FPR) with the reservation of the right to conduct finalization of details with the selected source in accordance with HHSAR Part 315.

- e. The process described in FAR 15.101-1 will be employed, which permits the Government to make tradeoffs among cost or price and non-cost factors and to consider award to other than the lowest price offeror or other than the highest technically rated offeror.
- f. The NIAID reserves the right to make a single award, multiple awards, or no award at all to the SOLICITATION. In addition, the SOLICITATION may be amended or canceled as necessary to meet NIAID requirements. Synopses of awards exceeding \$25,000 will be published in Contract Opportunities at: <https://sam.gov/content/home>

12. Institutional Responsibility Regarding Investigator Conflicts of Interest

45 CFR Part 94 promotes objectivity in research by establishing standards to ensure there is no reasonable expectation that the design, conduct, or reporting of research to be performed under NIH contracts will be biased by any Investigator financial conflicts of interest. The Institution shall comply with all requirements of 45 CFR Part 94 at:

<https://www.ecfr.gov/current/title-45/subtitle-A/subchapter-A/part-94>

13. Certification Regarding Tax Matters, FAR 52.209-12 (Oct 2020).

(a) This implements section 523 of Division B of the Consolidated and Further Continuing Appropriations Act, 2015 (Pub. L. 113- 235), and similar provisions, if contained in subsequent appropriations acts.

(b) If the Offeror is proposing a total contract price that will exceed \$5.5 million (including options), the Offeror shall certify that, to the best of its knowledge and belief, it

(1) Has [] filed all Federal tax returns required during the three years preceding the certification;

(2) Has [] been convicted of a criminal offense under the Internal Revenue Code of 1986; and

(3) Has not [] , more than 90 days prior to certification, been notified of any unpaid Federal tax assessment for which the liability remains unsatisfied, unless the assessment is the subject of an installment agreement or offer in compromise that has been approved by the Internal Revenue Service and is not in default, or the assessment is the subject of a non- frivolous administrative or judicial proceeding.

(End of provision).

14. Past Performance Information

- a. Offerors shall submit the following information as part of their Business proposal.

A list of the last 5 contracts completed during the past three years and at least three contracts awarded currently being performed that are similar in nature to the solicitation workscope. Contracts listed may include those entered into by the Federal Government, agencies of state and local governments and commercial concerns. Offerors may also submit past performance information regarding predecessor companies, key personnel who have relevant experience or subcontractors that will perform major or critical aspects of the requirement when such information is relevant to the instant acquisition. For the purposes of this solicitation, a "major subcontract" is defined as exceeding \$750,000 in cost.

Include the following information for each contract or subcontract listed:

1. Name of Contracting Organization
2. Contract Number (for subcontracts, provide the prime contract number and the subcontract number)
3. Contract Type
4. Total Contract Value
5. Description of Requirement
6. Contracting Officer's Name and Telephone Number
7. Program Manager's Name and Telephone Number
8. North American Industry Classification System (NAICS) Code

The offeror may provide information on problems encountered on the identified contracts and the offeror's corrective actions.

- b. The Government is not required to contact all references provided by the offeror. Also, references other than those identified by the offeror may be contacted by

the Government to obtain additional information that will be used in the evaluation of the offeror's past performance.

15. Electronic and Information Technology Accessibility Notice, HHSAR 352.239-73 (December 2015).

- a. Section 508 of the Rehabilitation Act of 1973 (29 U.S.C. 794d), as amended by the Workforce Investment Act of 1998 and the Architectural and Transportation Barriers Compliance Board Electronic and Information (EIT) Accessibility Standards (36 CFR part 1194), require that when Federal agencies develop, procure, maintain, or use electronic and information technology, Federal employees with disabilities have access to and use of information and data that is comparable to the access and use by Federal employees who are not individuals with disabilities, unless an undue burden would be imposed on the agency. Section 508 also requires that individuals with disabilities, who are members of the public seeking information or services from a Federal agency, have access to and use of information and data that is comparable to that provided to the public who are not individuals with disabilities, unless an undue burden would be imposed on the agency.
- b. Accordingly, any offeror responding to this solicitation must comply with established HHS EIT accessibility standards. Information about Section 508 is available at <http://www.hhs.gov/web/508> . The complete text of the Section 508 Final Provisions can be accessed at <https://www.access-board.gov/ict.html> .
- c. The Section 508 accessibility standards applicable to this solicitation are stated in the clause at 352.239-74, Electronic and Information Technology Accessibility. In order to facilitate the Government's determination whether proposed EIT supplies meet applicable Section 508 accessibility standards, offerors must submit an HHS Section 508 Product Assessment Template, in accordance with its completion instructions. The purpose of the template is to assist HHS acquisition and program officials in determining whether proposed EIT supplies conform to applicable Section 508 accessibility standards. The template allows offerors or developers to self-evaluate their supplies and document--in detail--whether they conform to a specific Section 508 accessibility standard, and any underway remediation efforts addressing conformance issues. Instructions for preparing the HHS Section 508 Evaluation Template are available under Section 508 policy on the HHS Web site <http://www.hhs.gov/web/508> . In order to facilitate the Government's determination whether proposed EIT services meet applicable Section 508 accessibility standards, offerors must provide enough information to assist the Government in determining that the EIT services conform to Section 508 accessibility standards, including any underway remediation efforts addressing conformance issues.
- d. Respondents to this solicitation must identify any exception to Section 508 requirements. If a offeror claims its supplies or services meet applicable Section 508 accessibility standards, and it is later determined by the Government, i.e., after award of a contract or order, that supplies or services delivered do not conform to the described accessibility standards, remediation of the supplies or services to the level of conformance specified in the contract will be the responsibility of the Contractor at its expense.

(End of provision).

16. Solicitation Provisions Incorporated by Reference, FAR 52.252-1 (Feb 1998).

- A. This Solicitation incorporates one or more solicitation provisions by reference, with the same force and effect as if they were given in full text. Upon request, the Contracting Officer will make their full text available. The offeror is cautioned that the listed provisions may include blocks that must be completed by the offeror and submitted with its quotation or offer. In lieu of submitting the full text provisions, the offeror may identify the provision by paragraph identifier and provide the appropriate information with its quotation or offer. Also, the full text of a solicitation provision may be accessed electronically at this address:
<http://www.acquisition.gov/far/index.html>.

FEDERAL ACQUISITION REGULATION (48 CFR CHAPTER 1):

- a. System for Award Management, FAR Provision 52.204-7 (Oct 2018).
 Alternate I (Oct 2018) is not applicable to this solicitation.
- b. Unique Entity Identifier, FAR Provision 52.204-6 (Oct 2016).
- c. Facilities Capital Cost of Money, FAR Clause 52.215-16, (June 2003).
- d. Order of Precedence-Uniform Contract Format, FAR Clause 52.215-8, (Oct 1997).
- e. Limitations on Pass-Through Charges--Identification of Subcontract Effort, FAR Provision 52.215-22, (Oct 2009).
- f. Preaward On-Site Equal Opportunity Compliance Evaluation, (\$10,000,000 or Over), FAR Clause 52.222-24, (Feb 1999).
- g. Identification of Uncompensated Overtime, FAR Clause 52.237-10, (Mar 2015).

b. TECHNICAL PROPOSAL INSTRUCTIONS

A detailed work plan must be submitted indicating how each aspect of the statement of work is to be accomplished. Your technical approach should be in as much detail as you consider necessary to fully explain your proposed technical approach or method. The technical proposal should reflect a clear understanding of the nature of the work being undertaken. The technical proposal must include information on how the project is to be organized, staffed, and managed. Information should be provided which will demonstrate your understanding and management of important events or tasks.

Note to Offerors: Beginning May 25, 2008, the offeror shall include the applicable PubMed Central (PMC) or NIH Manuscript Submission reference number when citing publications that arise from its NIH funded research.

1. Technical Discussions

The technical discussion included in the technical proposal should respond to the items set forth below:

a. Statement of Work

1. Objectives

State the overall objectives and the specific accomplishments you hope to achieve. Indicate the rationale for your plan, and relation to comparable work in progress elsewhere. Review pertinent work already published which is relevant to this project and your proposed approach. This should support the scope of the project as you perceive it.

2. Approach

The offeror must submit an explanation of the proposed technical approach in conjunction with the tasks to be performed in achieving the project objectives. Proposals which merely restate the requirements of the Government's scope of work will not be eligible for award.

Use as many subparagraphs, appropriately titled, as needed to clearly outline the general plan of work. Discuss phasing of research and, if appropriate, include experimental design and possible or probable outcome of approaches proposed.

3. Methods

Describe in detail the methodologies you will use for the project, indicating your level of experience with each, areas of anticipated difficulties, and any unusual expenses you anticipate.

4. Schedule

Provide a schedule for completion of the work and delivery of items specified in the statement of work. Performance or delivery schedules shall be indicated for phases or segments of work, as applicable, by contract year as well as for the overall contract. Schedules shall be shown in terms of calendar months from the date of authorization to proceed or, where applicable, from the date of a stated event, as for example, receipt of a required approval by the Contracting Officer. Unless the request for proposal indicates that the stipulated schedules are mandatory, they shall be treated as desired or recommended schedules. In this event, proposals based upon the offeror's best alternative schedule, involving no overtime, extra shift or other premium, will be accepted for consideration.

b. Personnel

Describe the experience and qualifications of personnel who will be assigned for direct work on this program. Information is required which will show the composition of the task or work group, its general qualifications, and recent experience with similar equipment or programs. Special mention shall be made of direct technical supervisors and key technical personnel, and the approximate percentage of the total time each will be available for this program.

OFFERORS SHOULD ASSURE THAT THE PRINCIPAL INVESTIGATOR, AND ALL OTHER PERSONNEL PROPOSED, SHALL NOT BE COMMITTED ON FEDERAL GRANTS AND CONTRACTS FOR MORE THAN A TOTAL OF 100% OF THEIR TIME. IF THE SITUATION ARISES WHERE IT IS DETERMINED THAT A PROPOSED EMPLOYEE IS COMMITTED FOR MORE THAN 100% OF HIS OR HER TIME, THE GOVERNMENT WILL REQUIRE ACTION ON THE PART OF THE OFFEROR TO CORRECT THE TIME COMMITMENT.

1. Single Principal Investigator/Project Director

List the name of the Principal Investigator/Project Director responsible for overall implementation of the contract and key contact for technical aspects of the project. Even though there may be co-investigators, identify the Principal Investigator/Project Director who will be responsible for the overall implementation of any awarded contract. Discuss the qualifications, experience, and accomplishments of the Principal Investigator/Project Director. State the estimated time to be spent on the project, his/her proposed duties, and the areas or phases for which he/she will be responsible.

2. Other Investigators

List all other investigators/professional personnel who will be participating in the project. Discuss the qualifications, experience, and accomplishments. State the estimated time each will spend on the project, proposed duties on the project, and the areas or phases for which each will be responsible.

3. Additional Personnel

List names, titles, and proposed duties of additional personnel, if any, who will be required for full-time employment, or on a subcontract or consultant basis. The technical areas, character, and extent of subcontract or consultant activity will be indicated and the anticipated sources will be specified and qualified. For all proposed personnel who are not currently members of the offeror's staff, a letter of commitment or other evidence of availability is required. A resume does not meet this requirement. Commitment letters for use of consultants and other personnel to be hired must include:

1. The specific items or expertise they will provide.
2. Their availability to the project and the amount of time anticipated.

3. Willingness to act as a consultant.
4. How rights to publications and patents will be handled.

4. Resumes

Resumes of all key personnel are required. Each must indicate educational background, recent experience, specific or technical accomplishments, and a listing of relevant publications.

2. Other Considerations

Record and discuss specific factors not included elsewhere which support your proposal. Using specifically titled subparagraphs, items may include:

- a. Any agreements and/or arrangements with subcontractor(s). Provide as much detail as necessary to explain how the statement of work will be accomplished within this working relationship.
- b. Unique arrangements, equipment, etc., which none or very few organizations are likely to have which is advantageous for effective implementation of this project.
- c. Equipment and unusual operating procedures established to protect personnel from hazards associated with this project.
- d. Other factors you feel are important and support your proposed research.
- e. Recommendations for changing reporting requirements if such changes would be more compatible with the offeror's proposed schedules.

3. Technical Evaluation

Proposals will be technically evaluated in accordance with SECTION M - Evaluation Factors for Award of this solicitation.

4. Enhancing Reproducibility through Rigor and Transparency

The offeror shall demonstrate compliance with the NIH Policy on enhancing Reproducibility through Rigor and Transparency as described in NIH Guide Notice [NOT- OD-15-103](#) . Specifically, the offeror shall describe in its technical proposal the information described below:

Compliance Factors

- a. Describe the scientific premise for the Technical Proposal. The scientific premise is the research that is used to form the basis for the proposed research. Offerors should describe the general strengths and weaknesses of the prior research being cited by the offeror as crucial to support the proposal. It is expected that this consideration of general strengths and weaknesses could include attention to the rigor of the previous experimental designs, as well as the incorporation of relevant biological variables and authentication of key resources.
- b. Describe the experimental design and methods proposed and how they will achieve robust and unbiased results.

- c. Explain how relevant biological variables, including sex, [if deemed necessary by the IC, additional variables may be included here] are factored into research designs and analyses for studies in vertebrate animals and humans. For example, strong justification from the scientific literature, preliminary data, or other relevant considerations, must be provided for proposals proposing to study only one sex. If your proposal involves human subjects, the sections on the Inclusion of Women and Minorities and Inclusion of Children can be used to expand your discussion and justify the proposed proportions of individuals (such as males and females) in the sample. Refer to [NOT-OD-15-102](#) for further consideration of NIH expectations about sex as a biological variable.
- d. If applicable to the proposed science, briefly describe methods to ensure the identity and validity of key biological and/or chemical resources used in the proposal. Key biological and/or chemical resources may or may not be generated with NIH funds and: 1) may differ from laboratory to laboratory or over time; 2) may have qualities and/or qualifications that could influence the research data; and 3) are integral to the proposed research. These include, but are not limited to, cell lines, specialty chemicals, antibodies, and other biologics.

Standard laboratory reagents that are not expected to vary do not need to be included in the plan. Examples are buffers and other common biologicals or chemicals. If the Technical Proposal does not propose the use of key biological and/or chemical resources, a plan for authentication is not required, and the offeror should so state in its proposal.

5. Obtaining and Disseminating Biomedical Research Resources

As a public sponsor of biomedical research, the National Institutes of Health (NIH) has a dual interest in accelerating scientific discovery and facilitating product development. Intellectual property restrictions can stifle the broad dissemination of new discoveries and limit future avenues of research and product development. At the same time, reasonable restrictions on the dissemination of research tools are sometimes necessary to protect legitimate proprietary interests and to preserve incentives for commercial development. To assist NIH contractors achieve an appropriate balance, the NIH has provided guidance in the form of a two-part document, consisting of Principles setting forth the fundamental concepts and Guidelines that provide specific information to patent and license professionals and sponsored research administrators for implementation.

The purpose of these Principles and Guidelines is to assist NIH funding recipients in determining: 1) Reasonable terms and conditions for making NIH-funded research resources available to scientists in other institutions in the public and private sectors (disseminating research tools); and 2) Restrictions to accept as a condition of receiving access to research tools for use in NIH-funded research (acquiring research tools). The intent is to help recipients ensure that the conditions they impose and accept on the transfer of research tools will facilitate further biomedical research, consistent with the requirements of the Bayh-Dole Act and NIH funding policy.

This policy, entitled, "SHARING BIOMEDICAL RESEARCH RESOURCES: Principles and Guidelines for Recipients of NIH Research Grants and Policy," (Federal Register

Notice, December 23, 1999 [64 FR 72090] will be included in any contract awarded from this solicitation. It can be found at the following website:

<http://www.gpo.gov/fdsys/pkg/FR-1999-12-23/pdf/99-33292.pdf>.

6. Management and Sharing of Research Data

Note: This policy applies to **all** NIH contracts, regardless of dollar value or level or type of funding, degree of funding (whole or partial), or type of NIH funding mechanism, that are expected to generate research data.

NIH encourages, to the maximum extent practicable, the sharing of final research data to expedite the translation of research results into knowledge, products, services, and/or procedures to improve the human health condition. This contract is anticipated to generate such research data. Therefore, the Offeror shall submit a plan in its technical proposal for data management and sharing or state why such data sharing is not possible. If data sharing is limited, the Offeror shall explain the rationale and nature of such limitations in its Data Management and Sharing Plan. NIH's Data Management and Sharing Policy may be found at the following Web site:

[NOT-OD-21-013: Final NIH Policy for Data Management and Sharing.](#)

NIH Sharing Policies and Related Guidance on NIH-Funded Research Resources are found at: <https://grants.nih.gov/policy/sharing.htm>.

If the resultant contract is part of a collaborative program involving multiple sites, all data management and sharing shall be governed by a data management, sharing, and dissemination plan to be jointly developed prior to award. A Coordinating Center's proposal shall describe the methods by which to coordinate such data management, sharing, and dissemination planning and implementation efforts. In its proposal the Coordinating Center shall include a budget with all proposed costs and justification for/of any costs of such collaborative effort(s).

c. BUSINESS PROPOSAL INSTRUCTIONS

1. Basic Cost/Price Information

The business proposal must contain sufficient information to allow the Government to perform a basic analysis of the proposed cost or price of the work. This information shall include the amounts of the basic elements of the proposed cost or price. These elements will include, as applicable, direct labor, fringe benefits, travel, materials, subcontracts, purchased parts, shipping, indirect costs and rate, fee, and profit.

2. Proposal Cover Sheet

The following information shall be provided on the first page of your pricing proposal:

1. Solicitation, contract, and/or modification number;
2. Name and address of Offeror;

3. Name and telephone number of point of contact;
4. Name, address, and telephone number of Contract Administration Office, (if available);
5. Name, address, and telephone number of Audit Office (if available);
6. Proposed cost and/or price; profit or fee (as applicable); and total;
7. The following statement: By submitting this proposal, the offeror, if selected for discussions, grants the contracting officer or an authorized representative the right to examine, at any time before award, any of those books, records, documents, or other records directly pertinent to the information requested or submitted.
8. Date of submission; and
9. Name, title and signature of authorized representative.

This cover sheet information is for use by offerors to submit information to the Government when certified cost or pricing data are not required but information to help establish price reasonableness or cost realism is necessary. Such information is not required to be certified in accordance with FAR 15.406-2.

3. Data Other than Certified Cost or Pricing Data

- a. Data submitted shall be sufficient to permit the Contracting Officer and authorized representatives to determine price reasonableness or cost realism, e.g., data to support an analysis of material costs (when sufficient data on labor and overhead rates is already available), or data on prices and quantities at which the offeror has previously sold the same or similar items.

Data submitted must support the price proposed. The offeror shall include sufficient detail or cross references to clearly establish the relationship of the data provided to the price proposed. The offeror shall support any data provided with explanations or supporting rationale, as needed, to permit the Contracting Officer and authorized representative to evaluate the documentation.

[Unless otherwise stated in this solicitation, the information may be submitted in the offeror's own format.]

- b. The data submitted shall be at the level of detail described below.

1. Direct Labor

Provide a time-phased (e.g., monthly, quarterly, etc.) breakdown of labor hours, rates, and cost by appropriate category. Key personnel will be separately estimated as above and identified. Give the basis for the estimates in each case.

2. Materials

Provide a consolidated price summary of individual material quantities included in the various tasks, orders, or contract line items being

proposed and the basis for pricing (vendor quotes, invoice prices, etc.).

3. Subcontracted Items

Include parts, components, assemblies, and services that are to be produced or performed by others in accordance with offeror's design, specifications, or direction and that are applicable only to the prime contract. For each subcontract over \$750,000, the support should provide a listing by source, item, quantity, price, type of subcontract, degree of competition, and basis for establishing source and reasonableness of price, as well as the results of review and evaluation of subcontract proposals when required by FAR 15.404-3.

4. Raw Materials

Consists of material in a form or state that requires further processing. Provide priced quantities of items required for the proposal.

5. Purchased Parts

Includes material items not covered above. Provide priced quantities of items required for the proposal.

6. Fringe Benefits

Show fringe benefits as a separate line item. Include the rate(s) and/or method of calculating fringe benefits. Provide a copy of your fringe benefit rate or institutional guidelines.

7. Indirect Costs

Indicate how offeror has computed and applied offeror's indirect costs, including cost breakdowns, and provide a basis for evaluating the reasonableness of proposed rates. Indicate the rates used and provide an appropriate explanation. Where a rate agreement exists, provide a copy.

8. Special Equipment

If direct charge, list any equipment in accordance with Item (13) Other Administrative Data, subparagraph (2) Government Property of this Section L.2.c of this solicitation.

9. Travel

Provide the cost of travel including destination, duration, purpose, per diem, transportation, and the basis for pricing.

10. Other Costs

List all other costs not otherwise included in the categories described above (e.g., computer services, consultant services) and provide basis for pricing.

4. Requirements for Certified Cost or Pricing Data and Data Other than Certified Cost or Pricing Data, FAR Clause 52.215-20 (Nov 2021).

(a) Exceptions from certified cost or pricing data.

(1) In lieu of submitting certified cost or pricing data, offerors may submit a written request for exception by submitting the information described in the following paragraphs. The Contracting Officer may require additional supporting information, but only to the extent necessary to determine whether an exception should be granted, and whether the price is fair and reasonable.

(i) *Identification* of the law or regulation establishing the price offered. If the price is controlled under law by periodic rulings, reviews, or similar actions of a governmental body, attach a copy of the controlling document, unless it was previously submitted to the contracting office.

(ii) *Commercial product and commercial service exception*. For a commercial product and commercial service exception, the offeror shall submit, at a minimum, information on prices at which the same item or similar items have previously been sold in the commercial market that is adequate for evaluating the reasonableness of the price for this acquisition. Such information may include:

(A) For catalog items, a copy of or identification of the catalog and its date, or the appropriate pages for the offered items, or a statement that the catalog is on file in the buying office to which the proposal is being submitted. Provide a copy or describe current discount policies and price lists (published or unpublished), e.g., wholesale, original equipment manufacturer, or reseller. Also explain the basis of each offered price and its relationship to the established catalog price, including how the proposed price relates to the price of recent sales in quantities similar to the proposed quantities;

(B) For market priced items, the source and date or period of the market quotation or other basis for market price, the base amount, and applicable discounts. In addition, describe the nature of the market;

(C) For items included on an active Federal Supply Service Multiple Award Schedule contract, proof that an exception has been granted for the schedule item.

(2) The offeror grants the Contracting Officer or an authorized representative the right to examine, at any time before award, books, records, documents, or other directly pertinent records to verify any request for an exception under this provision, and the reasonableness of price. For items priced using catalog or market prices, or law or regulation, access does not extend to cost or profit information or other data relevant solely to the offeror's determination of the prices to be offered in the catalog or marketplace.

(a) *Requirements for certified cost or pricing data.* If the offeror is not granted an exception from the requirement to submit certified cost or pricing data, the following applies:

(1) The offeror shall prepare and submit certified cost or pricing data, data other than certified cost or pricing data, and supporting attachments in accordance with the instructions contained in Table 15-2 of FAR 15.408, which is incorporated by reference with the same force and effect as though it were inserted here in full text. The instructions in Table 15-2 are incorporated as a mandatory format to be used in this contract, unless the Contracting Officer and the Contractor agree to a different format and change this clause to use Alternate I.

(2) As soon as practicable after agreement on price, but before contract award (except for unpriced actions such as letter contracts), the offeror shall submit a Certificate of Current Cost or Pricing Data, as prescribed by FAR 15.406-2.

(End of provision).

Alternate I (October 2010) of FAR Clause 52.215-20, Requirements for Certified Cost or Pricing Data and Data Other than Cost or Pricing Data (Nov 2021).

5. **Salary Rate Limitation**

Offerors are advised that no NIH funds may be used to pay the direct annual salary of an individual through any contract awarded as a result of this solicitation at a rate in excess of the Executive Schedule, Level II* (direct salary is exclusive of Overhead, Fringe Benefits and General and Administrative expenses, also referred to as "indirect cost" or "facilities and administrative (F&A) costs"). Direct salary has the same meaning as the term "institutional base salary." An individual's direct salary (or institutional base salary) is the annual compensation that the Contractor pays for an individual's appointment whether that individual's time is spent on research, teaching, patient care or other activities. Direct salary (or institutional base salary) excludes any income that an individual may be permitted to earn outside of duties to the Contractor.

This does not preclude the offeror from absorbing that portion of an employee's annual salary (plus the dollar amount for fringe benefits and associated indirect costs) that exceeds a rate of the Executive Schedule, Level II*. The Executive Schedule, Level II*

annual salary rate limitation also applies to individuals proposed under subcontracts and to consultants. **LINK TO EXECUTIVE SCHEDULE RATES OF PAY:**

<https://www.opm.gov/policy-data-oversight/pay-leave/salaries-wages/>
(For current year rates, click on Salaries and Wages/Executive Schedule/Rates of Pay for the Executive Schedule. For prior year rates, click on Salaries and Wages/select Another Year at the top of the page/Executive Schedule/Rates of Pay for the Executive Schedule. Rates are effective January 1 of each calendar year unless otherwise noted.)

***Note to Offerors:** The current Fiscal Year Executive Level II Salary Rate shall be adhered to in the preparation of your proposal. All costs associated with any resultant contract award shall be in compliance with the current Fiscal Year Executive Level II Salary rates.

6. Small Business Subcontracting Plan

If the proposed contract exceeds a total estimated cost of \$750,000 for the entire period of performance, the offeror shall be required to submit an acceptable subcontracting plan in accordance with the terms of the clause entitled "Small Business Subcontracting Plan," FAR Clause No. 52.219-9, incorporated herein by reference in the Solicitation. In accordance with FAR 19.704 and FAR Clause 52.219-9, the submission of a subcontracting plan by other than small business offeror(s) is a requirement as a part of the proposal submission process and is to be submitted separately from the technical and cost proposals. An offeror's subcontracting plan must be determined to be acceptable, by the Contracting Officer, prior to the contract award.

1. An offeror is to submit their respective subcontracting plan electronically using the U.S. Department of Health and Human Services (HHS) Small Business Customer Experience (SBCX) system at <https://osdbu.hhs.gov>. The offeror must follow the instructions outlined in the SBCX Industry Guide instructions outlined in the SBCX Industry Guide at: <https://oamp.od.nih.gov/nih-document-generation-system/dgs-workform-information/attachment-files-section-j> to successfully submit their subcontracting plan by the proposal submission deadline.
2. The official point of receipt for determining timely submission of an offeror's subcontracting plan is the SBCX system and/or email notification. Once the subcontracting plan is successfully submitted in the SBCX system the offeror should receive an email notification and confirmation message of completion upon submission.
3. If an offeror's subcontracting plan is not confirmed as received within the SBCX system by the proposal submission date specified in the solicitation, it will be considered late in accordance with subparagraph (c)(3) of FAR Clause 52.215-1, Instructions to Offeror-Competition Acquisition. Disposition of late submittals of a subcontracting plan by an offeror via the SBCX system is at the discretion of the Contracting Officer.
4. Any technical questions regarding the use of the SBCX system may be submitted via email message to the SBCX help desk at client.support@apexlogic.com. The client support hours of operation are

Monday - Friday, 6:00 a.m. - 8:00 p.m. Eastern Standard Time (EST). Note: help desk tickets can be submitted 24 hours a day / 7 days a week and a representative will respond within the presented client support hours of operation for assistance.

- a. THIS PROVISION DOES NOT APPLY TO SMALL BUSINESS CONCERNS.
- b. The term "subcontract" means any agreement (other than one involving an employer-employee relationship) entered into by a Federal Government prime Contractor or subcontractor calling for supplies or services required for the performance of the original contract or subcontract. This includes, but is not limited to, agreements/purchase orders for supplies and services such as equipment purchase, copying services, and travel services.
- c. The offeror understands that:
 - i. No contract will be awarded unless and until an acceptable plan is negotiated with the Contracting Officer which plan will be incorporated into the contract, as a material part thereof.
 - ii. An acceptable plan must, in the determination of the Contracting Officer, provide the maximum practicable opportunity for Small Businesses, Small Disadvantaged Businesses, Women-Owned Small businesses, HUBZone Small Businesses, Veteran-Owned Small Businesses, and Service Disabled Veteran-Owned Small Businesses to participate in the performance of the contract.
 - iii. If a subcontracting plan acceptable to the Contracting Officer is not negotiated within the time limits prescribed by the contracting activity and such failure arises out of causes within the control and with the fault or negligence of the offeror, the offeror shall be ineligible for an award. The Contracting Officer shall notify the Contractor in writing of the reasons for determining a subcontracting plan unacceptable early enough in the negotiation process to allow the Contractor to modify the plan within the time limits prescribed.
 - iv. Prior compliance of the offeror with other such subcontracting plans under previous contracts will be considered by the Contracting Officer in determining the responsibility of the offeror for award of the contract.
 - v. It is the offeror's responsibility to develop a satisfactory subcontracting plan with respect to Small Business Concerns, Small Disadvantaged Business Concerns, Women-Owned Small Business Concerns, HUBZone Small Business Concerns, Veteran-Owned Small Business Concerns, and Service Disabled Veteran-Owned Small Business Concerns that each such aspect of the offeror's plan will be judged independent of the other.
 - vi. The offeror will submit, as required by the Contracting Officer, subcontracting reports in accordance with the instructions thereon, and as further directed by the Contracting Officer. Subcontractors will also submit these reports to the Government's Contracting Officer or as otherwise directed, with a copy to the prime Contractor's designated small and disadvantaged business liaison.

d. Each plan must contain the following:

- i. Goals, expressed in terms of percentages of total planned subcontracting dollars, for the use of Small, Small Disadvantaged, Women-Owned, HUBZone, Veteran-Owned, and Service Disabled Veteran-Owned Small Business Concerns as subcontractors.
- ii. A statement of total dollars planned to be subcontracted. A statement of total dollars to be subcontracted to each of the following type of small business concerns: Small, Small Disadvantaged, Women-Owned, HUBZone, Veteran-Owned, and Service Disabled Veteran-Owned Small Businesses.
- iii. A description of the principal types of supplies and services to be subcontracted with an identification of which supplies and services are expected to be subcontracted to Small, Small Disadvantaged, Women-Owned, HUBZone, Veteran-Owned and/or Service Disabled Veteran-Owned Small Business Concerns.
- iv. A description of the method used to develop the subcontracting goals.
- v. A description of the method used to identify potential sources for solicitation purposes.
- vi. A statement as to whether or not indirect costs were included in establishing subcontracting goals. If they were, a description of the method used to determine the proportionate share of indirect costs to be incurred with Small, Small Disadvantaged, Women-Owned, HUBZone, Veteran-Owned, and Service Disabled Veteran-Owned Small Businesses.
- vii. The name of the individual employed by the offeror who will administer the offeror's subcontracting program and a description of his/her duties.
- viii. A description of the efforts the offeror will make to assure that Small, Small Disadvantaged, Women-Owned, HUBZone, Veteran-Owned, and Service Disabled Veteran-Owned Small Businesses have an equitable chance to compete for subcontracts.
- ix. Assurances that the offeror will include in all subcontracts the contract clause "Utilization of Small Business Concerns." Assure that all subcontractors, other than small businesses, in excess of \$750,000 adopt a plan similar to the plan agreed upon by the offeror.
- x. Assurances that the offeror (and any required subcontractors) will cooperate in studies or surveys as required and submit required reports (Individual Subcontract Reports (ISRs) and Summary Subcontract Reports (SSRs) to the Government at <https://www.esrs.gov/>.
- xi. List the types of records the offeror will maintain to demonstrate procedures that have been adopted to comply with the requirement and goals in the plan, including establishing source lists. Also, the offeror shall describe its efforts to locate Small, Small Disadvantaged, Women-Owned, HUBZone, Veteran-Owned, and Service Disabled Veteran-Owned Small Businesses and award subcontracts to them.

For additional information about each of the above elements required to be contained in the subcontracting plan, see FAR Clause 52.219-9, Small Business Subcontracting Plan.

HHS expects each procuring activity to establish minimum subcontracting goals for all procurements. The anticipated minimum goals for this RFP are as follows:

32% for Small Business; 5% for Small Disadvantaged Business; 5% for Women-Owned Small Business; 3% for HUBZone Small Business; and 3% for Veteran-Owned Small Business and Service-Disabled Veteran-Owned Small Business.

7. Mentor-Protégé Program, HHSAR 352.219-70 (December 2015).

- a. Large business prime Contractors serving as mentors in the HHS Mentor-Protégé Program are eligible for HHS subcontracting plan credit, and shall submit a copy of their HHS Office of Small and Disadvantaged Business Utilization (OSDBU) approved mentor-protégé agreements as part of their offers. The amount of credit provided by the Contracting Officer to a mentor firm for protégé firm developmental assistance costs shall be calculated on a dollar for dollar basis and reported by the mentor firm in the Summary Subcontract Report via the Electronic Subcontracting Reporting System (eSRS) at <https://www.esrs.gov/>. The mentor firm and protégé firm shall submit to the Contracting Officer a signed joint statement agreeing on the dollar value of the developmental assistance the mentor firm provided. (For example, a mentor firm would report a \$10,000 subcontract awarded to a protégé firm and provision of \$5,000 of developmental assistance as \$15,000 of subcontracting plan credit.) The mentor firm may use this additional credit towards attaining its subcontracting plan participation goal under this contract.
- b. The program consists of--
 1. Mentor firms--large businesses that:
 - (i) Demonstrate the interest, commitment, and capability to provide developmental assistance to small business protégé firms; and
 - (ii) Have a Mentor-Protégé agreement approved by HHS' OSDBU;
 2. Protégé firms--firms that:
 - (i) Seek developmental assistance;
 - (ii) Qualify as small businesses, veteran-owned small businesses, service-disabled veteran-owned small businesses, HUBZone small businesses, small disadvantaged businesses, or woman-owned small businesses; and
 - (iii) Have a Mentor-Protégé agreement approved by HHS' OSDBU; and
 3. Mentor-Protégé agreements--joint agreements, approved by HHS' OSDBU, which detail the specific terms, conditions, and responsibilities of the mentor-protégé relationship.

(End of provision).

8. HUBZone Small Business Concerns

Small Business offerors located in underutilized business zones, called "HUBZones," will be evaluated in accordance with FAR Clause 52.219-4, NOTICE OF PRICE EVALUATION PREFERENCE FOR HUBZONE SMALL BUSINESS CONCERNS,

which is incorporated by reference in ARTICLE I.3. of this solicitation. Qualified HUBZone firms are identified in the Small Business Administration website at <http://www.sba.gov/hubzone>

9. Total Compensation Plan

a. Instructions

1. Total compensation (salary and fringe benefits) of professional employees under service contracts may, in some cases, be lowered by recompetition of these contracts. Lowering of compensation can be detrimental in obtaining the necessary quality of professional services needed for adequate performance of service contracts. It is, therefore, in the best interest of the Government that professional employees, as defined in 29 CFR Part 541, be properly compensated in these contracts. All offerors as a part of their Business Proposal will submit a "Total Compensation Plan" (salaries and fringe benefits) for these professional employees for evaluation purposes.
2. The Government will evaluate the Total Compensation Plan to ensure that this compensation reflects a sound management approach and an understanding of the requirements to be performed. It will include an assessment of the offeror's ability to provide uninterrupted work of high quality. The total compensation proposed will be evaluated in terms of enhancing recruitment and retention of personnel and its realism and consistency with a total plan for compensation (both salaries and fringe benefits).
3. Evaluation for award, therefore, will include an assessment of the Total Compensation Plan submitted by each offeror.

b. Evaluation

1. Total Compensation Plan (Professional Employees)

In establishing compensation levels for professional employees, the total compensation (both salaries and fringe benefits) proposed shall reflect a clear understanding of the requirements of the work to be accomplished and the suitability of the proposed compensation structure to obtain and retain qualified personnel to meet mission objectives. The salary rates or ranges must recognize the distinct differences in professional skills and the complexity of varied disciplines as well as job difficulty. Proposals offering total compensation levels less than currently being paid by the predecessor Contractor for the same work will be evaluated, in addition to the above, on the basis of maintaining program continuity, uninterrupted work of high quality, and availability of required competent professional employees. Offerors are cautioned that instances of lowered compensation for essentially the same professional work may be considered a lack of sound management judgment in addition to indicating a lack of understanding of the requirement.

2. **Cost (Professional Compensation)**

Proposals which are unrealistically low or do not reflect a reasonable relationship of compensation to the professional job categories so as to impair the Contractor's ability to recruit and retain competent professional employees, may be viewed as reflecting a failure to comprehend the complexity of the contract requirements. The Government is concerned with the quality and stability of the work force to be employed on this contract. The compensation data required will be used in evaluation of the offeror's understanding of the contract requirements.

3. **Other (Labor Relations)**

An assessment of the potential for adverse effect upon performance and maintenance of the required number of professional employees with requisite skills resulting from an unrealistically low compensation structure will also be made.

4. **Federal Acquisition Regulation Clauses incorporated by Reference**

FAR Clause 52.222-46, Evaluation of Compensation for Professional Employees.

10. **Other Administrative Data**

a. **Property**

1. It is HHS policy that Contractors will provide all property necessary for contract performance. Exception may be granted to provide Government property (Government-furnished or Contractor-acquired), but only when approved by the Contracting Officer. If the offeror requests that Government property be provided, other than that specified under "Government Furnished Property," below, the proposal must include a comprehensive justification addressing the following items:

- a. State why the property is essential to contract performance and whether the property will be used exclusively for this contract.
- b. Describe other alternatives (e.g., purchase, lease, etc.) pursued and why they were not viable options.

2. **Government Property**

The offeror shall identify Government property in its possession which it proposes to use in the performance of the prospective contract as follows:

- a. A list or description of all Government property that the offeror or its subcontractors propose to use on a rent-free basis. The list shall identify the accountable contract under which the property is

held and the authorization for its use (from the Contracting Officer having cognizance of the property);

- b. The dates during which the property will be available for use (including the first, last, and all intervening months) and, for any property that will be used concurrently in performing two or more contracts, the amounts of the respective uses in sufficient detail to support prorating the rent;
- c. The amount of rent that would otherwise be charged in accordance with FAR 52.245-9, Use and Charges; and
- d. A description of the offeror's property management system, plan, and any customary commercial practices, voluntary consensus standards, or industry-leading practices and standards to be used in the offeror in managing Government property.

NOTE: The Contracting Officer will consider any potentially unfair competitive advantage that may result from an offeror or Contractor possessing Government property. This will be done by adjusting the offers by applying, for evaluation purposes only, a rental equivalent evaluation factor, as specified in FAR 52.245-9.

b. Government-Furnished Property

- 1. The management and control of any Government property shall be in accordance with the HHS Publication entitled, "Appendix Q, HHS Contracting Guide for Contract of Government Property," which can be found at: [https://oamp.od.nih.gov/sites/default/files/DGS/HHS Contracting Guide for Contract of Government Property-Appendix Q.pdf](https://oamp.od.nih.gov/sites/default/files/DGS/HHS%20Contracting%20Guide%20for%20Contract%20of%20Government%20Property-Appendix%20Q.pdf).

c. **Submission of Electronic Funds Transfer Information with Offer, FAR Clause 52.232-38 (Jul 2013).**

The offeror shall provide, with its offer, the following information that is required to make payment by electronic funds transfer (EFT) under any contract that results from this solicitation. This submission satisfies the requirement to provide EFT information under paragraphs (b)(1) and (j) of the clause at 52.232 34, Payment by Electronic Funds Transfer Other than System for Award Management.

- (1) The solicitation number (or other procurement identification number).
- (2) The offeror's name and remittance address, as stated in the offer.
- (3) The signature (manual or electronic, as appropriate), title, and telephone number of the offeror's official authorized to provide this information.
- (4) The name, address, and 9 digit Routing Transit Number of the offeror's financial agent.
- (5) The offeror's account number and the type of account (checking,

savings, or lockbox).

(6) If applicable, the Fedwire Transfer System telegraphic abbreviation of the offeror's financial agent.

(7) If applicable, the offeror shall also provide the name, address, telegraphic abbreviation, and 9 digit Routing Transit Number of the correspondent financial institution receiving the wire transfer payment if the offeror's financial agent is not directly on line to the Fedwire and, therefore, not the receiver of the wire transfer payment.

(End of provision).

d. Financial Capacity

The offeror shall indicate if it has the necessary financial capacity, working capital, and other resources to perform the contract without assistance from any outside source. If not, indicate the amount required and the anticipated source.

2. Adequate Accounting System

FAR Part 16 sets forth the requirements and limitations for consideration of contract type. As stated in Section L.1., General Instructions of this solicitation, the resultant contract will not be Firm-Fixed Price. Therefore, the offeror's/contractor's accounting system and practices must be adequate and suitable for accumulating costs under government contracts.

To be considered for an award under this solicitation, the offeror shall include, in the Business Proposal, the following Certification:

"By submission of its signed offer, the Offeror certifies that its accounting system:

1. Complies with Generally Accepted Accounting Principles (GAAP).
2. Provides for:
 - a. Proper segregation of direct costs from indirect costs.
 - b. Identification and accumulation of direct costs by contract.
 - c. A logical and consistent method for the allocation of indirect costs to intermediate and final cost objectives.
 - d. Accumulation of costs under general ledger control.
 - e. A timekeeping system that identifies employees' labor by intermediate or final cost objectives.
 - f. A labor distribution system that charges direct and indirect labor to the appropriate cost objectives.
 - g. Interim (at least monthly) determination of costs charged to a contract through routine posting of books of account.
 - h. Exclusion from costs charged to government contracts of amounts that are not allowable in terms of FAR 31, "Contract Cost Principles and Procedures," or other contract provisions.
 - i. Identification of costs by contract line item and by units (as if each unit or line item were a separate contract) if required by the proposed contract.

- j. Segregation of preproduction costs from production costs, if applicable.
- 3. Accounting system provides financial information:
 - a. Required by contract clause concerning limitation of cost (FAR 52.232-20) or limitation on payments (FAR 52.216-16).
 - b. Required to support requests for progress payments.
- 4. Accounting system was designed, and records are maintained in such a manner that adequate, reliable data are developed for use in pricing follow-on acquisitions.
- 5. Accounting system is currently in full operation.

The Contracting Officer reserves the right to request, with the Final Proposal Revision (FPR), a current (within 18 months) CPA opinion confirming that the Offeror's accounting system is compliant as certified above.
(End of provision).

11. **Facilities Capital Cost of Money, FAR 52.215-16, (Jun 2003).**

(This is applicable if you are a commercial organization.)

(a) Facilities capital cost of money will be an allowable cost under the contemplated contract, if the criteria for allowability in FAR 31.205-10(b) are met. One of the allowability criteria requires the prospective Contractor to propose facilities capital cost of money in its offer.

(b) If the prospective Contractor does not propose this cost, the resulting contract will include the clause Waiver of Facilities Capital Cost of Money.

(End of Provision).

If the offeror elects to claim this cost, the offeror shall specifically identify or propose it in the cost proposal for the contract by checking the appropriate box below.

[] Fac Cap Cost of Money (Has) The prospective Contractor **has** specifically identified or proposed facilities capital cost of money in its cost proposal and elects to claim this cost as an allowable cost under the contract. Submit Form CASB-CMF (see FAR 31.205-10).

[] Fac Cap Cost of Money (Has Not) The prospective Contractor **has not** specifically identified or proposed facilities capital cost of money in its proposal and elects not to claim it as an allowable cost under the contract.

12. **Qualifications of the Offeror**

You are requested to submit a summary of your "General Experience, Organizational Experience Related to this RFP, Performance History and Pertinent Contracts."

a. **General Experience**

General experience is defined as general background, experience and

qualifications of the offeror. A discussion of proposed facilities which can be devoted to the project may be appropriate.

b. Organizational Experience Related to the RFP

Organizational experience is defined as the accomplishment of work, either past or on-going, which is comparable or related to the effort required by this RFP. This includes overall offeror or corporate experience, **but not** the experience and/or past performance of individuals who are proposed as personnel involved with the Statement of Work in this RFP.

c. Performance History

Performance history is defined as meeting contract objectives within **delivery** and **cost schedules** on efforts, either past or on-going, which is comparable or related to the effort required by this RFP.

d. Pertinent Contracts

Pertinent contracts is defined as a listing of each related contract completed within the last three years or currently in process. The listing should include: 1) the contract number; 2) contracting agency; 3) contract dollar value; 4) dates contract began and ended (or ends); 5) description of contract work; 6) explanation of relevance of work to this RFP; 7) actual delivery and cost performance versus delivery and cost agreed to in the contract(s). For award fee contracts, separately state in dollars the base fee and award fee available and the award fee actually received. The same type of organizational experience and past performance data should be submitted.

e. Pertinent Grants

List grants supported by the Government that involved similar or related work to that called for in this RFP. Include the grant number, involved agency, names of the grant specialist and the Science Administrator, identification of the work, and when performed.

You are cautioned that omission or an inadequate or inaccurate response to this very important RFP requirement could have a negative effect on the overall selection process. Experience and past performance are factors which are relevant to the ability of the offerors to perform and are considered in the source selection process.

13. Subcontractors

If subcontractors are proposed, please include a commitment letter from the subcontractor detailing:

- a. Willingness to perform as a subcontractor for specific duties (list duties).
- b. What priority the work will be given and how it will relate to other work.
- c. The amount of time and facilities available to this project.

- d. Information on their cognizant field audit offices.
- e. How rights to publications and patents are to be handled.
- f. A complete cost proposal in the same format as the offeror's cost proposal.

14. Proposer's Annual Financial Report

A copy of the organization's most recent annual report must be submitted as part of the business proposal.

15. Travel Costs/Travel Policy

a. Travel Costs - Commercial

Costs for lodging, meals, and incidental expenses incurred by Contractor personnel shall be considered to be reasonable and allowable to the extent they do not exceed on a daily basis the per diem rates set forth in the Federal Travel Regulations, General Services Administration (GSA). Therefore, if travel costs are applicable and proposed by offerors, please be advised that they shall be calculated using the per diem rate schedule as established by GSA.

Reimbursement of travel costs under any contract awarded from this RFP shall be in accordance with FAR 31.205-46.

b. Travel Policy

One copy of the offeror's (and any proposed subcontractor's) written travel policy shall be included in the business proposal (original only). If an offeror (or any proposed subcontractor) does not have a written travel policy, the offeror shall so state.

SECTION M - Evaluation Factors for Award

GENERAL

Selection of an offeror for contract award will be based on an evaluation of proposals against three factors. The factors in order of importance are: technical, cost, and past performance. Although technical factors are of paramount consideration in the award of the contract, past performance and cost/price are also important to the overall contract award decision. All evaluation factors other than cost or price, when combined, are more important than cost. The Government intends to make an award(s) to that offeror whose proposal provides the best overall value to the Government.

The evaluation will be based on the demonstrated capabilities of the prospective Contractors in relation to the needs of the project as set forth in the SOLICITATION. The merits of each proposal will be evaluated carefully. Each proposal must document the feasibility of successful implementation of the requirements of the SOLICITATION. Offerors must submit information sufficient to evaluate their proposals based on the detailed factors listed below.

COST/PRICE EVALUATION

Offeror(s) cost/price proposal will be evaluated for reasonableness. For a price to be reasonable, it must represent a price to the government that a prudent person would pay when consideration is given to prices in the market. Normally, price reasonableness is established through adequate price competition, but may also be determined through cost and price analysis techniques as described in FAR 15.404.

Cost Realism: The specific elements of each offeror(s) proposed costs are realistic when the proposed cost elements are evaluated and found to: 1) be realistic for the work to be performed; 2) reflect a clear understanding of the requirements; and 3) be consistent with the unique methods of performance and materials described in the offeror(s) technical proposal.

Cost Realism will be evaluated only on the offeror(s) inputs which the Government will use to determine the most probable cost to perform the contract in a manner consistent with the offeror's proposal. Cost realism analysis will be conducted in accordance with FAR 15.404-1(d). The result of the cost realism analysis will be considered in the making the best value tradeoff decision.

EVALUATION OF OPTIONS

It is anticipated that any contract(s) awarded from this solicitation will contain option provision(s) and period(s). In accordance with FAR Clause 52.217-5, Evaluation of Options, (July 1990), the Government will evaluate offers for award purposes by adding the total price for all options to the total price for the basic requirement, except when it is determined in accordance with FAR 17.206(b) not to be in the Government's best interests. Evaluation of options will not obligate the Government to exercise the option(s).

EVALUATION OF DATA MANAGEMENT AND SHARING PLAN

An Offeror's plan for the management and sharing of final research data (Data Management and Sharing Plan) shall be assessed for appropriateness, adequacy, and reasonableness.

If an Offeror's proposal does not include a Data Management and Sharing Plan (Plan) or if the Plan in an Offeror's proposal is considered "unacceptable," and the Government includes Offeror's proposal in the competitive range (for competitive proposals), or if the Government holds discussions with the selected source (for sole source acquisitions), the Offeror will be afforded the opportunity to further discuss, clarify, and/or modify its Plan during discussions and in its Final Proposal Revision (FPR). However, if the Plan is still considered "unacceptable" by the Government after discussions, the Offeror may not be further considered for award.

PRE-AWARD SITE VISIT OR SITE AUDIT

Offerors determined, upon completion of the scientific/technical peer review, to be in the Competitive Range may be subject to a pre-award site visit or auditing of their facilities and Quality Assurance and Quality Control (QA/QC) capabilities. The decision to conduct a pre-award site visit or audit specific facilities will be made by the Contracting Officer's Representative. Offerors, including proposed subcontractors, will be requested to make all non-proprietary records, including previous regulatory inspection records, and staff available in response to a pre-award site visit or audit by the NIAID or its designee. Due to timeline requirements, pre-award site visits may be made with short notice. Offerors are expected to guarantee the availability of key staff or other staff determined by the Government as essential for purposes of this site visit.

TECHNICAL EVALUATION FACTORS

The evaluation criteria are used by the technical evaluation committee when reviewing the technical proposals. The criteria below are listed in the order of relative importance with weights assigned for evaluation purposes.

TECHNICAL EVALUATION CRITERIA	WEIGHT
CRITERION 1: TECHNICAL PLAN/APPROACH	45
Appropriateness, feasibility, and adequacy of the proposed technical plan/approach for accomplishing the tasks outlined in the Statement of Work and the overall objectives of the solicitation.	
CRITERION 2: SCIENTIFIC AND TECHNICAL PERSONNEL	25
Appropriateness and adequacy of the education, training, experience, expertise, and proposed levels of effort of the Principal Investigator and scientific and technical staff including subcontractors/consultants for accomplishing the tasks outlined in the Statement of Work and the overall objectives of the solicitation.	
CRITERION 3: PROJECT MANAGEMENT	20

Appropriateness and adequacy of the Project Management Plan in terms of staffing, organizational structure and lines of authority, management of subcontracts/consultants, tracking of project activities, monitoring progress and timelines, and communication with stakeholders.	
CRITERION 4: FACILITIES, EQUIPMENT, AND OTHER RESOURCES	10
Appropriateness and adequacy of facilities, equipment, space and other resources including those of subcontractors/consultants for accomplishing the tasks outlined in the Statement of Work and the overall objectives of the solicitation.	
TOTAL POSSIBLE WEIGHT	100

EVALUATION OF ELECTRONIC AND INFORMATION TECHNOLOGY ACCESSIBILITY - SECTION 508

The offeror's proposal must demonstrate compliance with the "Electronic and Information Technology Accessibility Provisions" set forth by the Architectural and Transportation Barriers Compliance Board (also referred to as the "Access Board") in 36 CFR part 1194 for all electronic and information technology (EIT) products and services developed, acquired, maintained, or used under this contract/order, including EIT deliverables such as electronic documents and reports.

If your proposal does not include a completed HHS "Section 508 Product Assessment Template" (hereafter referred to as the "Template") which demonstrates that EIT products and services proposed support applicable Section 508 accessibility standards, or, if the completed "Template" included in your proposal is considered "noncompliant," and the Government includes your proposal in the competitive range (for competitive proposals), or if the Government holds discussions with the selected source (for sole source acquisitions), you will be afforded the opportunity to further discuss, clarify or modify the "Template" during discussions and in your Final Proposal Revision (FPR). If your "Template" is still considered "noncompliant" by the Government after discussions, your proposal may not be considered further for award.

PAST PERFORMANCE FACTOR

Offerors' past performance information will be evaluated prior to establishment of the competitive range. However, this evaluation will not be conducted on any offeror whose proposal is determined to be technically unacceptable.

The evaluation will be based on information obtained from references provided by the offeror, other relevant past performance information obtained from other sources known to the Government, and any information supplied by the offeror concerning problems encountered on the identified contracts and corrective action taken.

The government will assess the relative risks associated with each offeror. Performance risks are those associated with an offeror's likelihood of success in performing the acquisition requirements as indicated by that offeror's record of past performance.

The assessment of performance risk is not intended to be a product of a mechanical or mathematical analysis of an offeror's performance on a list of contracts but rather the product of subjective judgment by the Government after it considers relevant information.

When assessing performance risks, the Government will focus on the past performance of the offeror as it relates to all acquisition requirements, such as the offeror's record of performing according to specifications, including standards of good workmanship; the offeror's record of controlling and forecasting costs; the offeror's adherence to contract schedules, including the administrative aspects of performance; the offeror's reputation for reasonable and cooperative behavior and commitment to customer satisfaction; and generally, the offeror's business-like concern for the interest of the customer.

The Government will consider the currency and relevance of the information, source of the information, context of the data, and general trends in the offeror's performance.

The lack of a relevant performance record may result in an unknown performance risk assessment, which will neither be used to the advantage nor disadvantage of the offeror.

Attachment 1 - Packaging and Delivery of Proposals for Use with the NIH electronic Contract Proposal Submission (eCPS) Website

I. PROPOSAL SUBMISSION

A. eCPS

1. Proposals must be submitted via the electronic Contract Proposal Submission (eCPS) website at <https://ecps.nih.gov>.
2. Proposals submitted by facsimile or e-mail will not be accepted.
3. Follow the “How to Submit an Electronic Proposal” instructions provided on the eCPS website at: <https://ecps.nih.gov/home/howto>. Please note that creating an account to submit may take up to three (3) business days. Please apply for a new account early to allow enough time for the registration process.
4. Offerors are solely responsible for submitting proposals and any modifications or revisions so as to reach the Government office designated above by the date and time specified in the solicitation. If your proposal is not received by the date and time specified in the solicitation, it will be considered a “late proposal,” in accordance with **FAR Clause 52.215-1 Instructions to Offerors – Competitive Acquisition**.

B. Creating and Naming Files:

1. **Create one PDF file of your Technical Proposal, including all attachments.** The Technical Proposal should be created in a PDF format that enables word searches to the maximum extent practicable. Forms and/or documents requiring signature(s) may be scanned, but must be merged into the Technical Proposal PDF file.

2. **Create one PDF file of your Business Proposal, including all attachments:**

The Business Proposal should be created in a PDF format that enables word searches to the maximum extent practicable. Forms and/or documents requiring signature(s) may be scanned, but must be merged into the Business Proposal PDF file.

Additionally, the “Breakdown of Proposed Estimated Costs (plus Fee) with Excel Spreadsheet” (http://oamp.od.nih.gov/sites/default/files/DGS/contracting-forms/spshexcl_dec2012.xlsx) must be included in the Business Proposal.

3. **Create your Business Document Excel.** The Excel file should be the “Breakdown of Proposed Estimated Costs (plus Fee) with Excel Spreadsheet” (http://oamp.od.nih.gov/sites/default/files/DGS/contracting-forms/spshexcl_dec2012.xlsx) included in the Business Proposal in its original Excel format, not PDF. Multiple Excel files may be included, as necessary.
4. Each of the proposals, Technical and Business, must be separate and complete in itself. Do not reference one proposal in another.

5. File naming convention: It is requested that the filenames for your Technical Proposal, Business Proposal, and Excel Workbook include the name of the offeror, the solicitation number and the type of proposal (i.e., Technical, Business, or Excel Workbook).

Examples:

Technical Proposal: *XYZ Company_NIHAI2012001_Technical.pdf*

Business Proposal: *XYZ Company_NIHAI2012001_Business.pdf*

Excel Workbook: *XYZ Company_NIHAI2012001_Business.xlsx*

II. FORMATTING AND PAGE LIMITATIONS:

A. Formatting for proposals

1. Proposal page layout shall be letter size 8.5" x 11" for all pages.
2. Proposals shall not include links to internet web site addresses (URLs) or otherwise direct readers to alternate sources of information.
3. Font size must be 10 to 12 points.
4. Spacing should be no more than 15 characters per inch. Within a vertical inch, there must be no more than six lines of text.
5. Margins must be at least one-inch on all sides.
6. **Failure to adhere to the formatting requirements above may impact whether your proposal is reviewed in its entirety.**

B. Page limitations:

1. The total page count of the Technical proposal shall not exceed 200 pages.
2. Total page count does not include:
 - a. Title and Back Page; Table of Contents; Section Dividers that do not contain information other than title of Section
3. Each Curriculum Vitae (CV) shall not exceed 3pages.
4. **Pages exceeding limitations will be removed from the proposal and will not be considered.**

ATTACHMENT 2 - PROPOSAL INTENT RESPONSE FORM

RFP No: 75N93026R00003

RFP Title: Clinical Research Products Management Center (CRPMC)

Please review the Request for Proposal (RFP). Furnish the information requested below and return this page to the Contracting Officer/Contract Specialist identified on **Section A-Solicitation/Contract Form** by the following date: April 30, 2026

Your expression of intent is not binding but will greatly assist us in planning for proposal evaluation.

Choose one of the following Options:

- ☒ Do intend to submit a proposal
- ☐ Do Not intend to submit a proposal

If you are not responding to this RFP, please provide your reason(s):

Please provide the following contact information:

Name (First, Middle Initial, Last):

Title:

Organization:

E-mail:

ATTACHMENT 1: STATEMENT OF WORK

Clinical Research Products Management Center (CRPMC)

1. BACKGROUND AND INTRODUCTION

The National Institute of Allergy and Infectious Diseases (NIAID) of the National Institutes of Health (NIH) plans, sponsors, and directs extramural research programs involving evaluation of the safety and efficacy of vaccines, therapeutics, and prevention modalities. Through these programs, clinical trials at more than 145 clinical research sites are supported.

NIAID is required to provide oversight and management of investigational study product for clinical trials to ensure compliance with all applicable regulations, including Title 21 Code of Federal Regulations (CFR) Part 312 and Human Subjects Protection Title 45 CFR Part 46. Investigational study product management includes the receipt, storage, handling, and distribution of investigational product. These activities are mission critical functions and high priority in ensuring the integrity of study products used in human clinical trials.

This contract is for the continuation of a Clinical Research Products Management Center (CRPMC) that provides investigational study product management expertise and pharmaceutical services that adhere to current Good Manufacturing Practice (cGMP), the International Conference on Harmonisation of Technical Requirements for Registration of Pharmaceuticals for Human Use (ICH)/Good Clinical Practice (GCP), the Food and Drug Administration (FDA), Code of Federal Regulations (CFR), and all applicable regulations in support of NIAID supported clinical trials networks and programs.

This contract was initially awarded in 1988. The current contract (number 75N93020C00032) is with Fisher BioServices, Inc., Rockville, Maryland.

This contract is to continue to provide a broad range of pharmaceutical and investigational study product management services to the current and evolving clinical research portfolio, including adult, pediatric, vaccine and prevention trials. For the purposes of this contract, study product is defined as investigational product (IP) or investigational medicinal product (IMP). The CRPMC securely ships study products to clinical research sites to ensure the timely continuation of NIAID supported studies. The CRPMC also plays an essential role in the management of study product documents of the regulatory trial master file (TMF) for NIAID sponsored, (Investigational New Drug) IND studies and is responsible for maintaining a readily accessible, validated and compliant electronic system for document management. The Contractor provides regulatory guidance and expertise regarding study product management as it pertains to ICH, CFR and other critical regulations. The contract will emphasize improving adaptability and use cutting-edge forecasting models and conservative study product distribution models.

2. SCOPE

This contract is for the management and operation of the CRPMC to support NIAID sponsored clinical research trials, with a core focus of HIV/AIDS and its co-morbidities. The

Contractor shall provide cGMP-compliant facilities for the receipt, storage, handling, shipping, and disposition of study products. All functions must be conducted in accordance with all federal, local and other applicable regulations governing study product including but not limited to, the CFR, ICH GCP, cGMP, Good Distribution Practices (GDP), Good Documentation Practices and all applicable regulation or guidance.

3. TECHNICAL REQUIREMENTS

Independently and not as an agent of the Government, the Contractor shall furnish all the necessary services, qualified personnel, material, equipment, and facilities, not otherwise provided by the Government as needed to perform the Statement of Work as stated herein. Specifically, the Contractor shall:

A) STUDY PRODUCT MANAGEMENT

1. Receive Study Products and Ancillary Supplies

- a. Receive and store study products from product manufacturers, commercial and non-commercial companies, suppliers and distributors, labeling clinical research organizations (CROs) and packaging firms, as indicated by the COR.
- b. Ensure that all applicable regulatory compliance requirements for the study product are met prior to receipt of a study product.
- c. Obtain manufacturer's written instructions for storage, shipping and handling.
- d. Receive shipments, perform inspection and document that shipments have been received in good condition pursuant to cGMP. Notify the COR and the sender within 2 hours of receipt of shipment and of any discrepancies.
- e. Develop and maintain Standard Operating Procedures (SOPs) and processes to ensure that the study product has been received in accordance with ICH, GCP and cGMP, and that all documentation has been received and reviewed accordingly and provided to the COR for review.

2. Storage of Study Products

- a. Store study products at temperatures and conditions indicated by the manufacturer in accordance with GCP and cGMP. Use facilities and equipment as required per the study products specifications for pre-release, active and quarantined study products. Deviations must be documented.
- b. Continuously monitor, record, and document temperature and storage conditions. Maintain temperature, storage conditions and document changes in accordance with cGMP standards. Temperature and storage monitoring records must be immediately accessible and retrievable upon request by the COR.

- c. Ensure that study products are labeled and packaged appropriately for clinical trial use and comply with all applicable regulations:
- d. Provide and maintain the necessary clean room(s) and equipment for packaging and repackaging of study products, as well as facility space to apply auxiliary (secondary) labels under all storage conditions, including cold chain conditions, in compliance with cGMP.
- e. Design, generate and apply auxiliary(secondary) labels under cGMP as needed to meet study requirements for execution of the clinical trial.
- f. Review labels or label proofs from manufacturers or labeling CROs for regulatory and shipping requirements. Report deficits to the COR within 4 business hours of identification. Contractor may be requested to prepare draft-mock, primary labels.
- g. Procure packaging necessary to accommodate study products or assemble kits for study products or ancillary supplies.
- h. Obtain COR approval of all auxiliary (secondary) labels, kits, and packaging prior to utilization. Provide samples of packaging, auxiliary (secondary) labels or kits for review to the COR within 2 business days following receipt of the request from the COR. A summary of the samples, packaging, auxiliary (secondary) labels and kits that were provided for COR review should be included in the Monthly Progress Report.

3. Shipping and Distribution of Study Products

Provide comprehensive shipping and distribution services for study products and ancillary supplies according to GCP requirements and ICH guidelines as follows:

- a. Use appropriate commercially available qualified and validated packaging materials, shippers, as well as GDP compliant shipping and distribution procedures and equipment for study products and ancillary supplies. Successfully ship under specified temperature and other conditions. The total percentage of excursions related to shipping should not exceed 1% of annual shipments. Provide a summary of shipping and distribution preparation, procedures and equipment in the Monthly Progress Report.
- b. For shipping materials not already validated by the manufacturer for the shipping of study products and ancillary supplies, conduct validation testing for the packaging and shipping of study products under appropriate temperature conditions for supporting the shipping logistics to any clinical research site. Prepare and implement SOPs, processes and procedures for shipping study products based on results of the validation testing.

- c. Obtain and maintain appropriate licenses, permits and approvals for the storage, handling, transportation, and distribution of study products. Comply with all applicable laws and regulations for shipping and distribution of study products.
- d. Possess and maintain a current U.S. Drug Enforcement Agency license and wholesale distributor license, as well as licenses and permits, as required for any depot(s) for the storage and distribution of controlled substances. As appropriate, accommodate conditions required for controlled substances (as defined by the U.S. Drug Enforcement Agency), biologics, ethanol-containing products, hazardous goods, electronic devices, and products sensitive to air pressure, humidity, vibrations, and carbon dioxide.
- e. Maintain current information regarding regulations and documents required for shipment of study products to all clinical research site pharmacies. This information should be frequently updated and reviewed at least every 6 months. This information should be readily available to the COR and other NIAID staff upon request.
- f. Generate, obtain, provide and store all required regulatory and shipping documents as directed by the COR, including but not limited to: U.S. Department of Agriculture permits, pro forma invoices, letters of donation, Certificates of Analysis (CoAs), package inserts, commercial invoices, Safety Data Sheets (SDS), transmissible spongiform encephalopathy (TSE)/bovine spongiform encephalopathy (BSE) certificates, GMP/CoC Compliance Certificates, Certificates of Pharmaceutical Product (or equivalent), stability data, pedigree documentation, therapeutic equivalency for generics, and any other documents and or permits that may be needed to complete shipments.
- g. Receive and send study product shipments as required to ensure that clinical trial timelines and clinical research site needs with regards to the study product are met. Study products are to be received by the clinical research pharmacy within 1 business day when feasible but no longer than within 5 business days.
- h. Establish procedures for emergency shipments or other exceptional tasks that may be required after normal hours of operation or more expedient timeframes at the request of the COR. Provide all shipping materials and supplies required to ensure the safe, intact arrival of the contents of each package shipped under conditions specific for the product and the protocol.
- i. Identify and engage freight forwarders and couriers for shipments of study product that meet the needs of the study product based on product specifications, destination, protection required, cost, and performance history.
- j. Use courier services and brokers to ensure that clinical research sites have obtained necessary shipment documentation. prior to shipment. Confirm site regulatory approval to conduct the study, approval to ship (if applicable), and

document and maintain records of the clinical release of study product, including a process to review the Certificate of Analysis (CoA).

- k. Prior to shipment, ensure that all required permits have been received from the Pharmacist of Record (PoR).
 - l. Evaluate, reconcile, fill and package study product orders appropriately for shipping.
 - m. Provide electronic monitoring of temperature, humidity, vibrations and environmental gases during shipment.
 - n. Receive and provide information from in-transit shipment temperature monitoring as soon as possible, no longer than within 24 hours.
 - o. Obtain confirmation from the PoR that shipments were received under appropriate conditions. Document verification of the accuracy of the packing slip, the condition of the shipment containers, and the status and functionality of the temperature monitoring from the clinical research site upon acknowledgement of receipt by the PoR.
 - p. Maintain documentation of temperature monitoring during shipment.
 - q. Coordinate, manage and document the reporting and adjudication of temperature excursions.
4. Information, Documents and Regulations for Study Products
- a. All electronic systems used by the Contractor shall be validated.
 - b. Unless otherwise specified, all documents are to be electronic and 508 compliant. Communications shall be electronic. The Contractor shall minimize the use of paper documents and paper information distribution to the greatest extent possible. Paper documentation shall be used only when required by regulations or where validated electronic systems are not available. The duration of electronic documentation storage is as required by regulation.
5. Inventory Management and Tracking of Study Products
- a. Maintain a real-time and physical accounting inventory of all study products and ancillary supplies. Provide an Inventory Report for all products in the monthly report and within 2 hours when requested by the COR. The Inventory Report must include the study product name and all study product specific information including, but not limited to, the protocol to which the product is assigned, lot number, quantity per package, use by date and strength. Notify the COR of any discrepancies that cannot be rectified.

- b. Provide an electronic method to monitor all study product use rates and forecast clinical supply needs based on the individual and specific needs of each protocol including but not limited to: type of study, blinding, number of sites, location of sites, storage conditions of the study product, stability and expiration dating of the study product, predicted study duration, and enrollment projections. The Pharmaceutical Affairs Branch (PAB) Protocol Pharmacist must be notified immediately within one day of significant changes in the study product use rates. This information must be highlighted in the weekly Protocol and Study Product Status Worksheet, as indicated by the COR.
- c. Obtain, maintain, and monitor repass, expiration and use by dates of all study products in inventory and of the products shipped to the sites. Use this data to identify potential shortfalls in study supply. Coordinate with manufacturers to ensure no gaps in study product provision and distribution. Upon initial contact with product manufacturer/supplier the Contractor shall request and maintain stability program timelines for retest dates. The Contractor shall analyze the impact on the study and study timelines. The Contractor shall inform the manufacturer/supplier of study product management and provision needs with respect to the timing of retest date provision. Notify the COR within 15 business days of supply issues that may delay study enrollment or study continuation.
- d. Provide guidance and assist site PoRs with documentation, logistics, shipping instructions for study product ordering, transfer of study products between protocols, and return or final disposition. Obtain manufacturer and COR approval prior to study product transfers.
- e. Perform reconciliation of site accountability records, reconciling study products shipped with those used, returned or destroyed.
- f. Develop and maintain a Protocol and Study Product Status worksheet, organized by Network, protocol and version number, which includes, but is not limited to the following:
 - 1) a list of study products,
 - 2) identifies the protocol and CRPMC pharmacists
 - 3) list of sites participating in the study
 - 4) identifies manufacturers and modes of acquisition for a particular product
 - 5) pending use by dates of study products
 - 6) shortages of study product
 - 7) status of pending documents, for compliance with regulations
 - 8) changes in study product use rates
 - 9) other pertinent information related to the management of study product
- g. This worksheet should be readily available to the COR electronically and a summary of changes shared weekly with the COR. Include a summary of changes by week and a copy of the most recent Inventory Report for all products in the Monthly Progress Report.

6. Recovery and Final Disposition of Study Products

- a. Establish programs and SOPs for study product return (recall and recovery), destruction and final accountability of all study product received and distributed in accordance with all applicable laws and regulations, and originating source instruction.
- b. Notify the COR within 4 business hours of receipt of notification of study product recall, return, recovery, or destruction. As directed by the COR, notify site PoRs as appropriate.
- c. Provide a process and space to manage quarantined, returned, unused, expired and recalled study product. This process must include a complete reconciliation of study product received by the Contractor for distribution for a particular protocol.
- d. Maintain study products under appropriate storage conditions and temperatures as necessary for the final disposition of the product.
- e. Provide to site PoRs all applicable special handling instructions (i.e., in the case of dangerous or hazardous materials) for study product returns and destructions.
- f. Provide a list of all protocols of the affected lot to the site PoRs.
- g. Prepare and maintain documentation of all study product returns. Provide a receipt to the PoR within 10 business days.
- h. Dispose of unused study products in accordance with all applicable regulations. This may require destruction or return of the product to the manufacturer.
- i. Establish a final disposition program that meets all applicable regulations. To ensure that study products that can no longer be used at clinical research sites are returned or destroyed, as per guidelines established by NIAID.
- j. Maintain destruction certificates and provide a copy to the clinical research sites if needed.
- k. Provide a summary of destructions in the monthly report.
- l. Final accountability and reconciliation must be documented and stored in the TMF.

7. Study Product Documentation for Trial Master File

- a. Develop and maintain an SOP for the maintenance of the TMF documentation. Maintain records and documents in a system to fully comply with Sponsor

responsibilities of maintaining the TMF as required by ICH GCP, cGMP and 21CFR in accordance with the Sponsor TMF. Examples include:

- 1) Clinical Supply Plan
- 2) Study product request letter or equivalent
- 3) Communications with the manufacturers
- 4) Maintenance logs and certificates
- 5) Study product temperature stability documentation
- 6) Study product handling instructions from the manufacturer and excursion documentation
- 7) Label samples
- 8) Retention samples
- 9) Confirmation of sites regulatory approval to conduct a study
- 10) Shipping records
- 11) Certificate(s) of Analysis for each lot
- 12) Destruction records
- 13) Recall documentation
- 14) Final reconciliation

- b. Perform audits of the TMF documentation and provide reports as directed.
Provide a summary of all audits, and reports to the COR in the annual report

B) PROTOCOL DEVELOPMENT AND MANAGEMENT

The Contractor shall collaborate with NIAID staff to develop protocols as follows:

1. Upon request of the COR, review, evaluate and provide guidance on protocol versions. The review shall also include, but may not be limited to, a review of study product specifications (labeling, packaging, child resistant packaging, expiration dating, storage conditions, any special conditions etc.), and an audit of the manufacturer (when requested by the COR).
2. At the beginning of each study, develop, update and maintain a Clinical Supply Plan (CSP) for each protocol for the planning and management of study products and ancillary supplies. The CSP should include a copy of the Study Product Request Letter or equivalent (initial and updates), and all forecasts. The CSP shall be submitted electronically within three (3) business days upon request to the COR. CSPs and updates should be made available to the protocol pharmacist, identified stakeholders, and the COR, upon request. A summary of new plans and updates should be provided in the monthly progress reports.
3. Provide a Study Product Evaluation (SPE) for each protocol. This evaluation shall include, but may not be limited to, a study product projection calculation, recommendations for ordering frequency, comments about any deviations, labeling, or packaging (child resistance assessment, etc.), a list of documents necessary to ship the study product. Evaluations may require revision after protocol or study product changes. Forecasting technology should be employed to optimize study product

ordering, use and distribution. SPEs shall be provided to the COR within 5 business days after receipt of the protocol, unless requested earlier by the COR. A summary of the SPEs should be included in the Monthly Progress Report.

4. Provide an SOP and technology for the projection and forecasting of study product quantities for individual protocols. This projection must factor:
 - a. sample size
 - b. enrollment rate
 - c. number of participating clinical research sites
 - d. randomized treatment
 - e. participant population
 - f. dosage form requirements
 - g. stability of dosage form
 - h. participant discontinuation
 - i. protocol-specific visit schedule
 - j. critical evaluation of contributing factors that inform the calculated overage
 - k. manufacturing and/or labeling runs for new study product
5. On an on-going basis, review, evaluate and forecast study product quantities and analyze use. Forecasts shall include, but are not limited to, both immediate and future need, for at least 1 year, whenever possible. Forecasts shall consider the expiration dating of the product available, the production schedule, manufacture and/or labeling runs, the current enrollment, planned enrollment, site locations and other special circumstances. Commercial electronic forecasting tools should be used. The results of the evaluation shall be provided to the NIAID protocol pharmacist and the COR in an email and summaries provided in the monthly report.
6. The SPE and the CSP shall be retained as part of the TMF.
7. Develop and provide, upon request by the COR, a Projected Resources Impact Analysis Report (PRIAR) that describes the impact of a new protocol on the contract resources over time. The analysis shall include projected labor hours, shipping, recovery and any additional use of resources. The results of the analysis shall be made available to the COR within 3 business days of request via email and within a summary in the Monthly Progress Report.
8. Develop a process for protocol specific notification to notify site PoRs of the study products and ancillary supplies for a particular protocol available through the CRPMC. This notification should include product ordering information, dosage-strength, and labeling and should be updated with each protocol version. A draft of the notification for each protocol and update should be submitted to the COR within 3 business days of receipt of all study products.
9. This notification should be distributed to sites with the appropriate regulatory approvals to conduct each protocol (i.e. protocol registration). The sites will confirm receipt, and the Contractor shall document receipt confirmation. The Contractor shall

review the status of protocol registration of each site for each protocol. The notification of study products available shall be distributed only to protocol registered sites. The Contractor shall notify the COR if indicated sites have not protocol registered or have not acknowledged receipt of the notification. A summary of the protocol specific notifications should be included in the Monthly Progress Report.

10. Provide, on an as needed basis, guidance to the COR regarding availability of products not donated by manufacturers. This includes research regarding currently available dosage forms, packaging, expiration dating, shipment requirements, preparation, product management, inventory management and alternatives in cases of shortages and distribution at the clinical research site (CRS) level.

C) CLINICAL RESEARCH PHARMACY SITE OVERSIGHT SUPPORT

1. Review NIAID-provided pharmacy site monitoring reports within 15 business days of availability. Identify all critical, major and minor issues, concerns and trends. Inform the COR and the COR designee of critical findings within 1 business day when they are identified. Resolve issues and document resolution of findings in the NIAID Clinical Research Management System (N-CRMS) or as directed by the COR. Track and trend issues in a system that is validated for tracking, trending and able to run reports for identifying and reviewing deviations and able to identify areas in which targeted monitoring is required. Provide to the COR recommendations for site pharmacies to receive follow-up monitoring visits.
2. As directed by the COR, conduct site visits or ‘for cause’ audits at site pharmacies. Provide a comprehensive report to the COR within 10 business days of visit completion of the visit or audit of visit completion.
3. As directed by the COR, support pharmacy establishment activities at CRSs to ensure that the pharmacy meets applicable standards and regulations. Provide guidance to the site pharmacists to ensure that the pharmacy is equipped to conduct clinical trials, and guidance in the development of pharmaceutical care in the context of research pharmacy/clinical research and protocol-specific procedures. This may require travel to site pharmacies by Contractor staff. Provide a summary of activities to the COR within 10 business days of completion of activity.
4. Review pharmacy establishment plans (PEPs) submitted by the site PoR, including additional locations and protocol-specific sites. Provide a summary of recommendations to the COR within 5 business days of receipt of the PEP(s). A summary of the PEPs, or a copy of all PEP reviews should be included in the Monthly Progress Report.
 - a. As directed by the COR, the Contractor shall provide training to site pharmacists and staff.

D) QUALITY MANAGEMENT SYSTEM

1. Develop and implement a Quality Management System for study product management activities that is compliant with ICH GCP and GMP.
2. Provide a draft Quality Management (QM) Plan within 30 business days of the contract effective date detailing the following. A final plan shall be in place within 60 days of contract effective date.
3. Develop standard processes to ensure internal quality study product management with respect to all aspects of contract activities performed;
4. - Develop measures/metrics to assess performance and the quality of contract activities;
5. Develop approaches/methods to document and address problems and deficiencies identified; including improvements in the internal QM Plan;
6. Develop plans for training of Contractor staff on standard processes and measures used for internal Quality Management;
7. Develop processes for the re-assessment of any implemented changes.
8. Conduct regular assessments of Contractor performance as described in the QM Plan. Report any major deficiencies/problems (including lack of adequate training of Contractor personnel or inadequate technical knowledge of the regulations) to the COR within 24 hours of identification and include Contractor recommendations for resolution.
9. Provide the outcomes of Contractor quality assessment to the COR as part of the Monthly Progress Report. Include the following:
 - a. all identified deficiencies and problems,
 - b. recommended approaches/actions to be taken to correct deficiencies and resolve problems,
 - c. the outcome of COR-approved resolution actions, and
 - d. any recommended modifications to the QM Plan.
10. NIAID may authorize, at any time during the contract period of performance, independent audits of Contractor performance with respect to the functions specified in the Statement of Work, including review of Contractor processes, procedures and operations at the Contractor site and product management centers. For audits conducted at Contractor facilities, the Contractor shall ensure that appropriate staff and all necessary information/ documentation are available. For-cause audits may be performed at any time and without advance notice to the Contractor in instances of suspected non-performance and/or non-compliance. NIAID shall notify the Contractor of plans for independent audits 10 business days in advance of the scheduled audit.

E) SECURITY, SAFETY, MONITORING AND MAINTENANCE OF FACILITIES, PRODUCTS AND EQUIPMENT

1. The Contractor shall provide safe, secure, facilities, monitored 24-hours a day, 7 days a week, compliant with cGMP and appropriate to maintain study products under required conditions. Maintain operating hours of 8:30 AM to 5:00 PM Eastern Standard/Daylight Time, Monday through Friday, except for official U.S. Federal holidays. Establish procedures for emergency closings due to weather conditions or other unexpected closings mandated by local, state and Federal government authorities. Remain open during emergency closings upon request of the COR to support critical time-sensitive clinical research activities.
2. Provide a clean agent fire suppression system that will not compromise study product and leaves no residues. The equivalent fire suppression shall:
 - a. be non-corrosive
 - b. not support combustion
 - c. not react chemically with most substances
 - d. not be a water-based system
 - e. not hazardous
 - f. protect study products, while permitting use even after discharge of the system
3. Provide an Incident Response Plan inclusive of power outages, natural disasters, staffing shortages and computer downtime. Include a contingency plan for the transfer of study products to alternative appropriate storage conditions in the event of power failure, fire, flood, or other occurrences capable of damaging study products.
4. Meet the requirements of the U.S. Drug Enforcement Agency and all applicable requirements for secure storage of controlled substances.

F) ELECTRONIC INFORMATION SYSTEMS, DATA MANAGEMENT, AND SYSTEM SECURITY

1. Information Security
 - a. The Contractor shall ensure the protection of third party intellectual property, information provided by third parties or by the Government, as well as data generated through this contract, and the confidentiality of human subjects. Information obtained from the study product manufacturer shall be deemed as proprietary and shall not be used or distributed without the expressed consent from that manufacturer or as authorized in the Clinical Trials Agreement between NIAID and the provider.
 - b. The Contractor shall maintain and operate a secure centralized 21CFR-compliant clinical study product management system, document library, and site pharmacy ordering and accountability interface. The system shall meet all applicable regulatory standards for clinical trials, including ICH and Good Documentation

Practices. Information system change control plans shall be submitted to the COR for review and technical acceptance prior to requirements development for software or system modification.

- c. The Contractor's information system shall be one integrated system, accessible by NIAID and available to clinical site pharmacy staff via NIAID -CRPMC web-site access. The CRPMC Information Systems shall meet NIAID informational needs and provide for the following features and capabilities:
 - 1) Compatibility with NIAID Office of Cyber Infrastructure and Computational Biology, Operations and Engineering Branch (OCICB) standards.
 - 2) Consistency with NIAID informatics standards, industry standards, and other applicable standards for data integrity, confidentiality, and security. Any clinical research data in this system shall include identifying numbers only. Participant names and other identifiable personal information shall not be collected.
 - 3) Data tracking and customizable reporting for all CRPMC activities and metrics; all clinical research activities supported under the contract and ensure accurate reporting, integrated quality assurance, quality control and query procedures.
 - 4) Data exchange with other systems as required, if applicable.
- d. Upon request of the COR and CO, components of the data system shall be transferred to NIAID facilities:
 - 1) The Contractor shall coordinate and collaborate with NIAID to develop a transition plan for the transfer of data and data structure to implement the transfer and continue to support data collection, data entry and Quality Assurance/Quality Control (QA/QC) activities as needed.
 - 2) The Contractor shall develop/deploy data interchange mechanisms required to receive, store and exchange data with and from the N-CRMS or alternative NIAID clinical management system, in accordance with specifications provided by NIAID which may include Application Programming Interfaces (APIs), eXtensible Markup Language (XML)-based web services, database-to-database connections.
 - 3) See Attachment 6 – Additional RFP-Specific Materials for documentation on current N-CRMS Data Exchange Summary.

2. Inventory Management

- a. Provide a validated, interoperable, web-based ordering, accountability, and tracking system for the management of study and ancillary product.

- b. Provide controlled access and a process to verify that requests and communications come from authorized pharmacy staff at clinical sites that have met regulatory approvals.
- c. Maintain complete records for each study product from plans for receipt through final disposition including, but not limited to: study product receipt, storage location and quantities, distribution, shipping documentation including confirmation of receipt, repass dates, expiration dates, use by dates, lot numbers, required storage conditions, of all study products in inventory and of products shipped to PoRs and final disposition.
- d. Provide a mechanism for clinical sites to obtain status information on study-product orders, such as: receipt of order, study product transfer approval process, and shipping progress.
- e. Store CoAs and other documents related to the study product as required for the TMF.
- f. Produce various reports including, but not limited to: projected study product inventory reports, distribution reports by protocol, study product or clinical research site, shipping confirmation receipt, and stability reports.
- g. Provide a web based controlled access interface for clinical sites to request study products and supplies and perform study product management activities such as: study product and ancillary supplies accountability, shipment confirmation receipt, transfer of study product, initiation of study product returns or destructions, study product stability notifications.
- h. Provide an electronic system for forecasting and study product distribution modeling.
- i. Provide and maintain site pharmacy data including:
 - 1) PoR Name
 - 2) Associate Pharmacist(s) of Record Name
 - 3) Clinical Research Site and Pharmacy Name
 - 4) Clinical Research Site and Pharmacy Number
 - 5) Mailing address
 - 6) Shipping address
 - 7) Phone number
 - 8) E-mail address
- j. Use the N-CRMS electronic system or equivalent alternative for the tracking, and analysis of site pharmacy monitoring findings. Track issues identified until resolution and for future use in developing quality assurance reports and tools.

- k. Provide and maintain a User's Guide and IT support for all systems and make it available to users at clinical research site pharmacies, NIAID staff and others, as directed by the COR or CO.

G) COMMUNICATE AND COORDINATE WITH OTHER NIAID CLINICAL RESEARCH SUPPORT CONTRACTORS AND RECIPIENTS INCLUDING USE OF N-CRMS

As directed by the COR, communicate and coordinate with NIAID contractors, recipients, and partners, as needed, to carry out pharmacy responsibilities. Specifically, the Contractor shall utilize the N-CRMS system or equivalent alternative for the following tasks:

1. Retrieve protocol data, clinical site information, pharmacy site monitoring reports (including revisions) and to track issue resolution of monitoring findings.
2. Implement and adhere to nomenclature, format, numbering, vocabulary, definitions and other data standards specified by the N-CRMS or equivalent alternative for all contract activities, including: (i) clinical research site names and site identifications (IDs); (ii) protocol and document numbering; (iii) protocol status and milestones; (iv) participant identifications; (v) access to protocol and protocol-registration database; and (vi) drug coding.
3. When applicable, develop/deploy Contractor's systems to allow data interchange with N-CRMS or equivalent alternative, to receive, store and exchange data in accordance with specifications provided by NIAID [e.g., N-CRMS specified software Application Programming Interfaces (APIs), extensible Markup Language (XML)-based web services, XML Schema Definitions (XSD), RDBMS, NET Framework, UDDI, IIS, Web Browsers (e.g., Internet Explorer, Goggle, Chrome, Firefox, etc.), Service Oriented Architecture (SOA), Design Patterns, Frameworks and Templates, Microsoft Office, including specific versions thereof]. The Contractor shall adhere to these guidelines and standards on a continuous basis.
4. Provide input in identifying requirements and specifications for new functionality within N-CRMS or equivalent alternative and adapt to new system features, as implemented by NIAID. Examples of potential new N-CRMS features may include: (i) electronic capturing of site monitoring data using discrete data elements; (ii) support for recordings and reporting data for auditing activities; (iii) electronic tools for issue resolution at clinical sites after site visit completion; and (iv) off-line data capture. Provide feedback, on problems or system bugs encountered in the current N-CRMS system or equivalent alternative, to the monitoring contract COR.

H) STAFF TRAINING

Maintain documentation of contractor required training of pharmacists, pharmacy technicians and staff including, but not limited to, safety and facility training (e.g., handling of measures for study products, facility security, fire drills, the fire suppression system, dry ice handling, personal protection and protection equipment (as needed),

employee-monitoring-systems for use in walk-in freezers and chemical spill clean-up procedures). The Contractor shall document and maintain documentation of contract-specific training for all pharmacists, pharmacy technicians and staff on Pharmacy Guidelines and SOPs.

I) PROJECT COORDINATION

Project Meetings: Meetings shall take place via tele/videoconference or in person as determined by the meeting organizers and the needs of the meeting. Minutes of meetings are expected within 2 business days of the meeting unless otherwise noted. The following meetings are anticipated:

1. **Contract Initiation Meeting:** Within thirty (30) business days of the effective date of the contract, participate in a one-day in-person Contract Initiation Meeting with the COR, the Contracting Officer and other NIAID personnel designated by the COR. The purpose of the Contract Initiation Meeting shall be to orient the Contractor to NIAID contract procedures, review contract requirements, and discuss upcoming support services to be provided. Contractor attendees shall include the Project Director, Assistant Project Director, Project Manager, Pharmacists and a Business Representative.
2. **Protocol Status meetings:** The meetings shall take place on a weekly basis for up to two hours. The purpose of the meeting is for NIAID staff, the COR and CRPMC staff to review protocol status, the Protocol and Study Product Status worksheet and for the COR to inspect, review, and approve study product samples, packaging configuration, labeling, and any other study product related materials. At least 1 business day before each meeting the Contractor shall provide a summary sheet of the changes since the previous meeting to the Protocol and Study Product Status Report.
3. **Site Pharmacy Monitoring Report meetings:** The purpose of the meeting is to review site pharmacy monitoring reports, develop resolution on issues and to identify trends from monitoring report findings. Meetings generally occur monthly. Contractor pharmacists assigned to manage site pharmacy reports are expected to participate. The Contractor shall provide the agenda and a summary of recommendations to the COR 2 business days prior to the meeting. The Contractor is responsible for follow up action items resulting from these meetings, which must be provided to the COR within 2 business days following the meeting.
4. **Operation Meetings:** The Project Director (PD) shall meet with the COR twice a month to review current issues. Other NIAID staff or Contractor staff may be invited on an as needed basis. The agenda shall be collaboratively developed and shared at least one business day before the meeting.
5. **Meetings with Manufacturers:** Coordinate and attend meetings between NIAID staff, the COR and manufacturers or providers of study product to establish or clarify terms of the agreements, including sponsor responsibilities. These meetings may be via video/teleconference or in person.

6. Ad Hoc meetings: The COR may request ad hoc meetings for various purposes. Meetings may be required within 24 hours to address emergent and urgent issues. Ad hoc meetings may occur and shall be by tele/video conference or in person.
7. Clinical Research Trials Network meetings: The PD and up to two staff pharmacists shall attend meetings of the NIAID Clinical Research Trials Networks, upon request of the COR. This is to support forecasting and planning for study product management. The Contractor shall participate in any meetings organized by NIAID or the Clinical Research Trials Networks as directed by the COR to provide or participate in protocol training or other protocol related activities.

J) CONDUCT CURRENT GOOD MANUFACTURING PRACTICES (CGMP) AUDITS

The Contractor shall perform audits of product manufacturing facilities to determine adherence to cGMP standards. The facilities to be audited shall be identified by the COR, and are to be performed within 30-45 business days after the need is identified. Within 15 business days after completion of each cGMP audit, the Contractor shall provide the COR a report which incorporates all the elements of the FDA Good Manufacturing Practice (GMP) Guidelines/Inspection Checklist that indicates whether cGMP standards are being met.

K) IMPLEMENT AND MAINTAIN STANDARD OPERATING PROCEDURES

1. Provide and maintain Standard Operating Procedures (SOPs) governing the conduct of all routine activities performed under this contract, in accordance with cGMP, GCP and Good Distribution Practices and Good Documentation Practices. SOPs should be provided within 20 business days of contract award. The COR shall review SOPs within fifteen (15) business days of receipt. The Contractor shall finalize SOPs within fifteen (15) business days of receipt of COR review. SOPs shall be implemented within fifteen (15) business days of COR approval. SOPs shall be added, reviewed and modified on an established schedule and when necessary due to a change in regulation, or due to participant safety, study, or study product integrity concerns. SOPs shall be stored in electronic format and shall be at a location accessible to the COR. Upon request of the COR or CO provide electronic copies of SOPs for the purpose of evaluating compliance with all applicable regulatory requirements.
2. Monitor all applicable requirements governing human subjects' research, GCP and ICH guidelines, and DAIDS policies and procedures for any changes. Update SOPs, as necessary, within thirty (30) business days of the effective date of all such changes and submit to the COR for review and approval. Updated SOPs shall be implemented by the Contractor only after receipt of written approval from the COR.

L) DOCUMENT PREPARATION AND STORAGE

1. Develop and use standardized templates for documents, memoranda and letters. These must be shared with the COR for comment and approval within 5 business days of finalization.
2. Maintain organized, legible copies of all electronic and written communications.
3. Provide compliant storage for all records related to studies as required by ICH GCP, cGMP, CFR.
4. Maintain an inventory of stored documents.

OPTIONS

In addition to the services/quantities outlined above to be provided for the base requirement, Options(s) for additional services/quantities under the contract may be exercised at the discretion of the Government and are defined as follows:

- 1. Options 1 through 6 - Extend the Term of the Contract:** The Government may exercise options to extend the period of the contract beyond the base period annually for a total contract period of up to 7 years. If Options 1-6 are exercised the services required shall be the same as provided during the Base Period.
- 2. Options 7 through 34 - Increased Level of Effort:** The Government may exercise Options for increased level of effort that may result from unanticipated increases in services required within the same scope as the those provided for the base level of effort requirements. Should the Government elect to exercise these options, the Contractor shall provide resources for the unanticipated increase in work volume by 2 Full Time Equivalents (FTEs) for each option exercised. These options may be exercised up to 4 times each year. The period of performance of options for increased level of effort shall not exceed the term of the base year or option year in which the option is exercised.
- 3. Options 35 through 48 - Increased Level of Effort:** The Government may exercise options for increased level of effort that may result from unanticipated increases in services required within the same scope as those provided for the base level of effort requirements. Should the Government elect to exercise these options, the Contractor shall provide resources for the unanticipated increase in work volume by 0.5 FTE per option. These options may be exercised up to 2 times each year. The period of performance of options for increased level of effort shall not exceed the term of the base year or option year in which the option is exercised.

INITIAL AND FINAL TRANSITION OPTIONS

In the event a new Contractor assumes the requirements of the contract:

1. Within 5 calendar days of the effective date of the contract, the COR shall provide the Contractor with a copy of the incumbent Contractor's Final Transition Plan, which shall specify transition requirements and processes.

2. Within 14 calendar days of the effective date of the contract, the Contractor shall submit to the COR and Contracting Officer for approval, one copy each of an Initial Transition Plan and timeline for the transition of activities and contract-related materials from the incumbent Contractor, and the activities required for having the Contractor's facility ready for study initiation. This transition plan shall include the tasks that are associated with the relocation effort, as well as the manner in which operations shall be conducted during this transition period. This includes the effective coordination with the current Contractor at the start of the new contract period for safe transfer of contract-related materials, including the following:
 - A) Study product inventory
 - B) Inventory records
 - C) Files of correspondence with all stakeholders including but not limited to: product manufacturers, clinical research sites, and NIAID
 - D) Trial Master File
 - E) Shipping records
 - F) Databases, software systems and other software
 - G) Government-furnished property
 - H) Shipping materials, cartons, labels, packing and materials
 - I) Validated shipping procedures
 - J) NIAID approval documents
 - K) Certificates of Analysis (CoAs) and any other product-related documents
 - L) Any other items requiring maintenance by the Contractor for the duration of the contract
3. Provide for the safe and efficient assumption of activities from the incumbent Contractor to ensure a seamless transition without loss of time, loss of products or that would not pose obstacles to the conduct of ongoing clinical trials. Provide training time for the transfer of operations to the Contractor.
4. The transition must be accomplished within the first 30 calendar days following the effective date of the contract. The functions of the Contractor must be maintained during the transition period, and distribution of the study products for all studies must not be interrupted at any time.
5. Immediately obtain data from existing and historical information systems containing information on inventory, and necessary documentation of the contract activities of the incumbent contractor. Types of data to be obtained shall include information to track individual clinical research site product requests, documents for the study product section of the TMF, standard reports, such as receiving and shipping, and more specialized reports including inventory by product and by study protocol, as well as a list of clinical research sites and PoRs. The incumbent Contractor's computer files/source code shall be obtained.

FINAL TRANSITION (CONTRACT COMPLETION)

- 1) The Contractor shall provide a Final Transition Plan for the orderly, safe, and efficient transition of contract-related materials, data, and activities, to a successor Contractor or the Government, if other than the Contractor is awarded a follow-on contract. This Plan shall be subject to written approval by the COR and Contracting Officer.

- 2) A draft of the Final Transition Plan shall be submitted to the COR and the Contracting Officer 12 months prior to the expiration date of the contract, for review and comment. Upon receipt of the COR's and Contracting Officer's comments, the Contractor shall revise the Draft Final Transition Plan as necessary and submit to the COR and Contracting Officer for review and approval. The Final Transition Plan shall include the tasks that are associated with the relocation effort from the current Contractor and the manner of operations required by the COR during the transition period. This shall include effective coordination with the current Contractor at the start of the new contract period for safe transfer of contract-related materials including:
 - A) Study product inventory
 - B) Inventory records
 - C) All relevant correspondence files with product manufacturers, clinical research sites, and NIAID/DAIDS
 - D) Shipping records
 - E) Databases, software systems and other software
 - F) Government-furnished property
 - G) Shipping materials, cartons, labels, packing materials
 - H) Validated shipping procedures
 - I) NIAID approval documents
 - J) CoAs and any other product-related documents
 - K) Any other items the Contractor is required to maintain for the contract
- 3) The Final Transition Plan that incorporates all agreed to terms and conditions identified during the review of the Draft Plan, shall be submitted by the Contractor to the COR and the Contracting Officer six (6) months prior to the expiration date of the contract. The Contractor shall implement and complete the transition during the contract's period of performance.
- 4) In the event of a transition to a successor Contractor, the Contractor shall provide to the successor Contractor (or the Government) the existing data base management system, ordering and inventory management system and necessary documentation, including source code.

ATTACHMENT 4: ADDITIONAL TECHNICAL PROPOSAL INSTRUCTIONS, FORMAT FOR TECHNICAL PROPOSAL, and TABLE OF CONTENTS

**Clinical Research Products Management Center (CRPMC)
75N93026R00003**

It is strongly recommended that offerors use the following template as the Table of Contents for the Technical Proposal. All information presented in the Technical Proposal should be presented in the order specified below.

These additional Technical Proposal instructions reflect the requirements of the solicitation and provide specific instructions and formatting for the Technical Proposal. While Section L of the solicitation provides a generic set of Technical Proposal instructions applicable to all NIH R&D solicitations, these instructions are tailored to the specific requirements of the RFP. The information requested in these instructions should be used to format and prepare the Technical Proposal, and should be used as a Table of Contents for your Technical Proposal. Offerors should follow the instructions in Section L of the solicitation, and include the information requested here.

Offerors are advised to give careful consideration to the Statement of Work, all reference materials, and attachments, the Technical Evaluation Criteria in Section M, and the solicitation as a whole in the development of their Technical Proposals.

Offerors proposing subcontracts to perform portions of the Statement of Work should clearly identify the specific tasks for which they plan to utilize subcontractors, as well as the method and level of integration/coordination between the prime Contractor and all proposed subcontractors, and the expected advantages of such an approach.

Offerors must refer to the solicitation Attachment entitled “Packaging and Delivery of the Proposal,” which details strict guidelines, including page limitations, formatting and layout of proposals, and prohibits the offerors use of links to internet web site addresses (URLs) to direct readers to alternate sources of information.

TECHNICAL PROPOSAL – TABLE OF CONTENTS

SECTION 1:

- 1) PROPOSAL TITLE PAGE. Include RFP title and number, name of organization, DUNS number, and identify if the proposal is an original or a copy. Offerors that include in their proposals data that they do not want disclosed to the public for any purpose, or used by the Government except for evaluation purposes, shall also include the legend regarding Restriction on Disclosure and Use of Data prescribed by FAR [52.215-1\(e\)](#)
- 2) TABLE OF CONTENTS

SECTION 2: TECHNICAL PROPOSAL OVERVIEW (suggested 3-page maximum)

Provide a brief overview of the Technical Proposal, including:

- 1) A brief description of the activities proposed by the offeror and all proposed subcontractors, including identification of all proposed subcontractors and a list of key personnel for the offeror and the proposed subcontractors with degrees, titles, and role in the project.
- 2) By area of expertise, provide the total number of staff, the number available to be assigned to the contract for the offeror and all proposed subcontractors, and total number of additional staff to be hired and trained.
- 3) A brief description of the facilities and equipment to be made available by the offeror and all proposed subcontractors.

SECTION 3: TECHNICAL PLAN/APPROACH

Study Product Management (see SOW, Paragraph 3.A)

- 1) Provide a Staffing Plan that describes roles, responsibilities, and level of effort for scientific and technical personnel, including any staff proposed for regional distribution center(s), subcontractors and consultants. Provide an administrative and technical framework indicating clear lines of authority and responsibility for all proposed personnel, reporting requirements, fiscal oversight and management. Include a chart of the proposed organizational/management structure for the project. Include a plan to document and maintain cGMP trained personnel.
- 2) Outline communication plans for the Project Director (PD) with the Contracting Officer's Representative and Contracting Officer and how the PD shall monitor and manage activities at any subcontractor facilities and interactions with clinical site pharmacies.
- 3) Describe the following:
 - a. The process of receiving, managing and distributing a study product. Provide an example of a clinical study product that required unique storage and shipping conditions and the measures that you used to address those challenges.
 - b. The process to provide a mechanism to support a Quality System that is compliant with ICH GCP and cGMP (21CFR) for the activities of this contract. This should be comprehensive and include all documentation, as well as facility processes. Describe Quality Systems and any relationship with external Quality assurance personnel.
 - c. Include a Quality Management Plan or a Quality Management Plan for a project of similar size and complexity.
 - d. The incident response plan and systems to mitigate the risk of loss of study product at every stage to maintain study product integrity and quality systems. The plan should address risk mitigation, redundancy, and service and engineering strategies, such as back up equipment, equipment replacement plans, contingency plans for power interruption, fire suppression, power failure and staffing shortages.
 - e. Current storage and monitoring processes to maintain product integrity during storage and distribution to the clinical research sites including cold chain management.

- f. Process for validating and qualifying shippers.
 - g. Describe procedures to prepare and ship a study product to clinical research sites of varying regions, time zones and climates. Describe the different times of years, study products of varying storage requirements and degrees of fragility.
 - h. Provide a SOP for the coordination and maintenance of study product documents required for the Trial Master File according to ICH GCP.
- 4) Use the following scenarios to describe investigational product management and shipment:
- a. One of the NIAID clinical trial networks has just announced approval of a study on long-term cardiovascular risk in HIV participants involving 3200 participants over 3 years. The study shall be at 25 clinical research sites. The study products for this study are Active X and Placebo Y. Participants shall be randomized 1:1 Describe the steps necessary to manage inventory, monitor usage rates and their impact on study product forecasting and distribution.
 - b. The COR notified you of a protocol under development that requires a purely investigational study product containing *Salmonella* that shall be donated by LPSisgood, Inc. There shall be 300 participants divided among six clinical research sites of varying regions, time zones and climates. Outline the activities of the contract from receipt of draft protocol through final disposition of the product at the end of the study. Highlight unique requirements for the management of this study product.
 - c. A highly sensitive protein-based vaccine is to be used in a protocol that will be conducted at 6 clinical research sites at long distances in various climates. The vaccine requires storage at or below -80°C. Describe the process for packaging and shipping this product to any NIAID clinical research site.

SECTION 4: SCIENTIFIC AND TECHNICAL PERSONNEL

Provide information relevant to document individual training, experience, qualifications, and expertise necessary for the successful completion of all contract requirements. Limit CVs to 2-3 pages and provide selected references for publications relevant to the scope of the contract.

- 1) **Principal Investigator (PI):** Describe the experience, training, expertise, and qualifications, and level of effort of the proposed Principal Investigator, also referred to as the Project Director, to lead and direct the activities to be carried out under this contract. In particular, address scientific and technical expertise in investigational product distribution. They should have documented appropriate and adequate education and demonstrated experience to lead and direct the work as it is in the SOW. Documentation that the PD is a registered pharmacist, with documented experience managing ICH GCP, cGMP, Good Distribution Practice, compliant study product management functions to commensurate with the SOW in support of sponsor related activities. Demonstrated facility that meets the requirements of cGMP.
- 2) **Other Key Scientific and Technical Personnel:** Describe the experience, training, expertise, and qualifications, as well as the level of effort, for all proposed key scientific and technical personnel. Documentation of demonstrated experience and education to carry out the activities of the SOW. Demonstrated knowledge of ICH GCP and cGMP. Demonstrated experience with regulatory authorities, manufacturers, embassies,

customs officials, domestic and international shipping companies and clinical research sites for the safe and accurate management and distribution of study product. Documented cGMP trainings including safety and facility training (e.g., handling of measures for study products, facility security, fire drills the fire suppression system, dry ice handling, personal protection and protection equipment (as needed), employee-monitoring-systems for use in walk-in freezers and chemical spill clean-up procedures).

- 3) Adequacy of the demonstrated experience in the clinical site pharmacy oversight, QA activities, and auditing.

SECTION 5: FACILITIES, EQUIPMENT, AND OTHER RESOURCES

The Technical Proposal should document availability and adequacy of facilities, equipment, space and other resources necessary to carry out the Statement of Work, including:

- 1) Describe the location and features of facilities, including a detailed floor plan and a comprehensive list of equipment and resources dedicated to the project including any proposed subcontractors (lease or ownership information should be provided). Indicate the types of activity in various locations. Identify locations for storage of study products under the following conditions:
 - storage under liquid nitrogen
 - -80°C
 - -20°C to -10°C
 - 2°C to 8°C
 - cool temperature, as defined by the United States Pharmacopoeia (USP)
 - room temperature
 - controlled room temperature, as defined by the USP
- 2) Provide contingency plans for equipment or facility failure.
- 3) Describe systems and record keeping for continuous monitoring of security, redundant systems and equipment, facilities monitoring (including temperature and humidity) and fire suppression systems.
- 4) Describe the information technology systems and equipment to be made available by the offeror and all proposed subcontractors including current software licenses (including versions), approach for ongoing hardware and software maintenance including lifecycle replacement and security updates. Describe and provide a justification for the type of technical support proposed (software as a service, vs. site licenses, cloud costs, hardware). State whether information technology systems are FISMA compliant.

An electronic system has been used under the current contract to order and track study products, manage inventory and distribute products and process returned products. It also supports Investigator site, protocol management and shipping process. The electronic system, CRPMC Online Site Management and Ordering System (COSMOS), is currently under development to make it a web based application and the development is scheduled for completion within the next 2-3 months. This system is transferable and is available to any offeror for use under the proposed contract. Below are the software and hardware environment descriptions required to run the COSMOS application.

Software	Version
Windows/Mac	7 and above/10.12 and above
Browser – Chrome/IE/Safari/Firefox	62 and above/ 10 and above/ 11/55 and above
Java	V1.7 and above
Power BI (Reporting	Power BI desktop with pro-licensing (to download power BI reports)

Hardware	Version
Processor	Pentium 4 or newer process that supports SSE2
Hard Drive Space	Minimum 32 GB and above
RAM	Minimum 4GB and above

Please see the following COSMOS attachments included in the Solicitation:

1. Attachment 8: CRPMC Online Site Management and Ordering System (COSMOS) User Manual
 2. Attachment 9: CRPMC Online Site Management and Ordering System (COSMOS) Clinical Research Site User Manual
 3. Attachment 10: CRPMC Online Site Management and Ordering System (COSMOS) Configuration/Design Specification Document
- 5) Identify and describe resources required to maintain appropriate licenses and permits required by all applicable regulatory authorities for the receipt, storage, and distribution of the study products in full compliance with cGMP and ICH GCP.

SECTION 6: PROJECT MANAGEMENT

- 1) Describe the organizational experience with all aspects of study product management and distribution. Include the scale and scope of projects of this sort in the most recent five years.
- 2) Provide documentation of the capacity to increase level of effort support for unanticipated increases in services required within the same scope. Describe problems and mitigation approaches to securing sufficient pharmacists and staff with experience in the management of investigational drugs.
- 3) Describe experience preparing for and participating in an audit by a regulatory body such as US FDA or other regulatory agency.
- 4) Provide a Project Management Plan for the contract overall that addresses the planning, initiation, implementation, conduct, monitoring and completion of tasks identified in the Statement of Work. If consultants and/or subcontractors are proposed, include a plan to manage, coordinate, and oversee the work performed by consultants and/or subcontractor(s).
- 5) Describe the project management systems that shall be used to track activities in relation to timelines and budgets associated with clinical trial management.
- 6) Provide the Quality Management Plan that shall be used to ensure the effective and efficient initiation, implementation, management, and oversight of contract requirements.

- 7) Describe the Quality System to ensure activities are conducted in a cGMP compliant manner in accordance with ICH GCP.
- 8) Provide SOP's for the Executive Management Review of Quality Management System
 - Quality Record Retention
 - Controlled Document Management
 - Investigational Product Trial Master File Management
 - Employee Training
 - Regulatory Inspections
 - Vendor/Supplier Assessment and Approval
 - Equipment and Facility Maintenance
 - Physical and Electronic Security
 - Receiving Study Products
 - Approval and Processing of Study Product
 - Preparing Study Products for Shipments
 - Document Preparation for Shipment of Investigational Drug Products
 - Secured Shipments by Commercial Courier
 - CRPMC Study Product Inventory Assessment and Reordering
 - Repass Procedures
 - Documentation of Product Study Destruction at Clinical Research Sites
 - Recovery Procedures
 - Reporting Suspected Counterfeit Contraband
 - Approval and Processing of the Certificate of Analysis
 - Verification of Site Approval to Receive Study Product

SECTION 7: OPTIONS

Options should be presented as a separate part of the Technical Proposal and clearly identified as such.

1) OPTIONS 1 through 6: Extend the Term of the Contract

Discuss plans and procedures for continuing and providing the same services indicated in the Statement of Work beyond the contract base period. To address this option, offerors should describe the methods and procedures to maintain the operations specified in the Statement of Work beyond the base period, including retaining or recruiting necessary staff, and maintaining and/or acquiring required equipment and facility space.

2) OPTION 7 - 48: Increased Level of Effort

Discuss approaches for increasing the level of effort to respond to the need for unanticipated additional capacity related to the research conducted in accordance with the Statement of Work.

Options 7-34: Increased Level of Effort

Discuss approaches for incrementally increasing the level of effort by 2 Full Time Equivalents (FTEs) up to 4 times per year for unanticipated additional capacity related to the research conducted in accordance with the Statement of Work. Each increase should be a separate option.

Options 35-48: Increased Level of Effort

Discuss approaches for incrementally increasing the level of effort by 0.5 Full Time Equivalents (FTEs) up to 2 times per year for unanticipated additional capacity related to the research conducted in accordance with the Statement of Work. Each increase should be a separate option.

3) **TRANSITION**

Discuss approaches for providing an orderly, secure, and efficient transition of contract activities and contract-related data, documents and other materials from (initial transition) and to (final transition) another Contractor if a transition is required.

SECTION 8: OTHER CONSIDERATIONS

Other than those detailed in the Government Furnished Property clause or otherwise publicly available, the offeror shall not propose government furnished resources, to include government employees, facilities, intellectual property, or biological materials. If you propose government furnished resources, your proposal will not be considered further for award.

ATTACHMENT 5: ADDITIONAL BUSINESS PROPOSAL INSTRUCTIONS AND UNIFORM COST ASSUMPTIONS

**Clinical Research Products Management Center (CRPMC)
75N93026R00003**

In addition to the format requirements for the Business Proposal that are contained in Section L of the solicitation, the information presented in this section of the RFP is intended to provide uniform cost assumptions and business clarifications.

Offerors are advised to give careful consideration to the Statement of Work, all reference material provided as attachments, the Technical Evaluation Criteria, and the RFP as a whole, in the development of your proposal. The information requested in these instructions should be used as a guide for the development and formatting of your Business Proposal. Offerors should consider and include the information requested here, as well as **any other** information which will benefit the proposal.

BUSINESS PROPOSAL – TABLE OF CONTENTS

SECTION 1 – PROPOSAL COVER SHEET (use form NIH 2043 identified in Section J of the solicitation)

SECTION 2 – COST OR PRICE SUPPORT

Section L of the RFP specifies the minimum documentation requirements for cost data and all cost-related support. All related documentation should be included in a clearly marked section of the proposal.

SECTION 3 – UNIFORM COST ASSUMPTIONS

1) Technical Cost Assumptions

a. Ongoing Activities on the effective date of the contract - assume responsibility for the following:

- Assume 65 new clinical protocols will be conducted annually
- Assume 160 ongoing clinical protocols annually
- Assume 5 audits of suppliers/manufacturers annually

b. New activities during the contract period of performance – assume the following:

1. Number of clinical research sites and locations:
 - 100 clinical research sites located in varying regions, time zones and climates.
2. Study product destruction at clinical research sites
 - Assume quarterly visits by 1 FTE to a clinical research site for the purposes of study product destruction and study product accountability reconciliation.
 - assume 3 days on site
 - 2 days total travel

2) Travel

- a. Contract Initiation Meeting: Assume one meeting in Rockville, Maryland within one month after the effective date of the contract to discuss contract initiation. Assume that this meeting will require a three-night stay in Rockville, Maryland and will be attended by the Project Director and the Business Representative.
- b. Training Workshops: Assume 4 one-day NIAID-sponsored training workshops per year for clinical site staff, to be held in the Rockville, Maryland area, each requiring 4 Contractor staff presenters.
- c. Clinical Site Pharmacy Visits: Assume 8 four-day-day clinical research site pharmacy visits per year.
- d. Weekly Protocol Meetings: Assume a weekly 2-hour meeting requiring all Contractor staff pharmacists actively involved with protocols. These meetings may be virtual or in-person.
- e. Clinical Research Trials Network Meetings: Assume the Project Director and 2 other contract pharmacists shall attend 4 clinical research trials network meetings per year within a 50-mile radius of Washington, D.C., for a duration of 3 to 4 days per meeting. This is to support forecasting and planning for study product management.
- f. Audit Visits: Assume 10 vendor/supplier/manufacture GMP audit visits per year.
- g. Destruction Visits: Assume quarterly visits by 1 FTE to clinical research sites for the purposes of study product destruction
 - assume 3 days on site
 - 2 days total travel

For costing purposes only, assume 150 clinical research site pharmacies located in varying regions, time zones and climates, 3000 miles from the central distribution center.

3) Special Shipping, Packaging, and Storage

- A. Offerors should include a uniform cost assumption for secondary (auxiliary) labeling, packaging and repackaging study products:

Assume the following:

- Assume that 30 different study products consisting of 78,000 individual units per year will be repackaged; 40% of those will be oral dosage forms, 20% frozen vials (-20 C), 20% frozen vials (-80 C)
- Assume that 8 protocols per year will require secondary repackaging to patient-specific-unit of use packaging from bulk product.
- Each protocol will consist of 7 study products each.
- Assume secondary (auxiliary) labeling of 250,000 individual units per year, 350 different study products.

- B. Offerors should include a uniform assumption of 20,000 shipments per year.

- Assume 8 different shipping packaging configurations will be validated per year.

- 20% of study product will be shipped to clinical research sites located in varying regions, time zones and climates that are at least 3,000 miles away from the central distribution facility and must be delivered within one to five days.
- 30% of study product shipment to clinical research sites will originate from suppliers outside the U.S.
- 50% of study product shipments will be delivered within 24 hours
- assume 40% of shipments will require wet and/or dry ice
- assume 20% of shipments will require 5 to 8 pallets per shipment

4) Government Furnished Property

- ☒ Government Furnished Property is offered for this acquisition.
- ☐ No Government Furnished Property is offered for this acquisition.
- ☐ The purchase of Government Furnished Property will not be authorized as a direct charge under the resultant contract.

3) Type of Contract and Estimate of Effort

It is anticipated that a cost reimbursement, term/level of effort (LOE) type contract will be awarded as a result of this solicitation. The period of performance will be for one year (Base Period) plus six (6) one-year Options to extend the term of the contract that may be exercised by the Government unilaterally, for a total possible period of performance of seven (7) years, beginning approximately March 16, 2027. The requirement will be the delivery of 27 full time equivalents (FTEs) per year for the base period (Year 1) and 27 FTEs per year for Options 1-6 (Years 2-7). **PLEASE NOTE: The number of FTEs includes the effort of subcontractors and consultants.** While the total LOE provided below is a requirement, the labor mix is the Government's estimate and should not be considered restrictive for proposal purposes. Offerors should propose the labor mix they consider most appropriate for satisfactory completion of the work.

Labor Category	Years 1 - 7
Project Director	1.0
Assistant Project Director	1.0
DEPOT, Assistant Project Director	1.0
USA Pharmacist	5.48
DEPOT Pharmacist	1.19
Computer Programmer	1.17
Operations Supervisor	1.19
Scientist III, Chemistry	1.19
USA Pharmacist Other	5.34
Repository Other	1.19
Depot Pharmacist Other	3.57
Other	1.19
Total	27

SECTION 4 – OPTIONS

Options 1-6: Extend the Term of the Contract: The Government may exercise Options to extend the term of the contract beyond the base period (Year 1), and to increase the level of effort to cover unanticipated increase in demand. A breakdown of the estimate of effort for the Base Period and Options 1-6 is provided above.

Options 7-48: Increased Level of Effort: In addition, the Government may exercise options for increased level of effort that may result from unanticipated increases in demand for clinical research study product management support of NIAID related studies or to support additional trials or studies that were not anticipated at the writing of this solicitation. This may include increases in labeling, packaging, and shipments of study products, as well as increases in U.S. and international distribution activities. This chart is included to show you the numbering of these Options:

Option Type	Year 1	Year 2	Year 3	Year 4	Year 5	Year 6	Year 7
Options for Additional Effort 2 FTEs up to 4 times per year	Option 7	Option 11	Option 15	Option 19	Option 23	Option 27	Option 31
	Option 8	Option 12	Option 16	Option 20	Option 24	Option 28	Option 32
	Option 9	Option 13	Option 17	Option 21	Option 25	Option 29	Option 33
	Option 10	Option 14	Option 18	Option 22	Option 26	Option 30	Option 34
Options for Additional Effort 0.5 FTEs up to 2 times per year	Option 35	Option 37	Option 39	Option 41	Option 43	Option 45	Option 47
	Option 36	Option 38	Option 40	Option 42	Option 44	Option 46	Option 48

A. Options 7-34: Increased Level of Effort

Should the Government elect to exercise these options, the Contractor shall provide resources for the unanticipated increase in work volume by 2 Full Time Equivalents (FTEs) for each option exercised. These options may be exercised up to 4 times each year. A separate cost proposal which includes a breakdown of costs on an annual basis should be provided for Options 7-34.

It is estimated that the labor mix is to be constituted as specified below and will be expended approximately as follows:

Labor Category	Years 1 – 7
Pharmacist	1.0
Assistant Project Director	1.0
Total	2.0

NOTE: While delivery of the total number of FTEs is a requirement for satisfactory performance of the contract, the labor mix provided above is the Government's estimate and should not be considered restrictive. Offerors should propose the labor mix they consider most appropriate for satisfactory completion of the work.

The following cost assumptions should be considered when preparing the cost proposal for Options 7 through 34:

- a) Ongoing Activities on the effective date of the contract - assume responsibility for the following:
 - Assume 15 new clinical protocols shall be conducted
 - Assume a total n = 5,500 participants
- b) New activities during the contract period of performance –Assume 150 clinical research site pharmacies located in varying regions, time zones and climates, 3,000 miles from the central distribution center.
 - 1) Secondary (auxiliary) Labeling, packaging and repackaging study products
 - Assume that the 4 different study products consisting of 15,000 individual units per year will be repackaged; 45% frozen vials (-20 C), 40% frozen vials (-80 C)
 - 2) Shipping and distribution of study products
 - Assume approximately 2,500 additional shipments of study products

B. Options 35-48: Increased Level of Effort

Should the Government elect to exercise these options, the Contractor shall provide resources for the unanticipated increase in work volume by 0.50 FTE for each option exercised. These options may be exercised up to 2 times each year. A separate cost proposal which includes a breakdown of costs on an annual basis should be provided for Options 35-48.

It is estimated that the labor mix is to be constituted as specified below and shall be expended approximately as follows:

Labor Category	Years 1 – 7
Pharmacist	.25
Assistant Project Director	.25
Total	.5

NOTE: While delivery of the total number of FTEs is a requirement for satisfactory performance of the contract, the labor mix provided above is the Government's estimate and should not be considered restrictive. Offerors should propose the labor mix they consider most appropriate for satisfactory completion of the work.

The following cost assumptions should be considered when preparing the cost proposal for Options 35 through 48:

- a) Ongoing Activities on the effective date of the contract - assume responsibility for the following:
 - Assume 2 new clinical protocols
 - Assume a total n=1,500 participants
- b) New activities during the contract period of performance – assume the following:
 - a. 150 clinical research site pharmacies located in varying regions, time zones and climates, 3000 miles from the central distribution center.
 - b. Labeling, packaging and repackaging study products

- Assume that 2 different study products consisting of 5,000 individual units per year will require repackaging and labelling
- Assume study product will be all frozen vials (-80 C)
- c. Shipping and distribution of study products
 - Assume 800 additional shipments of study product to clinical research site pharmacies located in varying regions, time zones and climates, up to 3,000 miles from the central distribution center.

C. Summary of Base Period and Options 1-48:

Provide a Summary Page that shows the total cost of the Base Period, and each of the Options separately.

SECTION 5 - TABLE OF CONTENTS FOR DOCUMENTATION REQUIRED UNDER SECTION L OF THE SOLICITATION

Refer to Section L of the solicitation for documentation requirements. All relevant documentation should be included in a clearly marked section of the proposal.

ATTACHMENT 6: ADDITIONAL RFP-SPECIFIC MATERIALS

Clinical Research Products Management Center (CRPMC) 75N93026R00003

CONTENTS:

- SECTION 1: Current NIAID/DAIDS and Other NIAID HIV-Related Clinical Research Programs
- SECTION 2: Current NIAID/DAIDS-Supported Clinical Research Contracts
- SECTION 3: NIAID CRMS (DAIDS) Data Exchange Summary
- SECTION 4: Sample Reports

Section 1: Current NIAID/DAIDS and Other NIAID HIV-Related Clinical Research Programs

HIV/AIDS Clinical Trials Networks: Clinical site and study monitoring services shall be provided for the five (5) NIAID-sponsored HIV/AIDS Clinical Trials Networks for Phase I, II, III clinical trials of therapeutics, preventive vaccines, topical microbicides and other prevention strategies, as well as optimization of clinical management of HIV infection and co- morbidities, treatment of substance abuse, and behavioral change modalities.

a. Advancing Clinical Therapeutics Globally (ACTG) www.actgnetwork.org

The ACTG conducts trials in translational research and drug development; optimization of clinical management; vaccine research and development; prevention of mother-to- child transmission of HIV; and prevention of HIV infection. Currently the ACTG includes 32 Clinical Trial Units comprised of 34 domestic clinical sites; 25 international clinical sites located in 12 countries.

b. HIV Prevention Trials Network (HPTN) www.hptn.org

HPTN conducts trials related to prevention strategies to reduce the rate of HIV transmission through use of antiretroviral drugs; control and prevention of sexually transmitted infections; treatment of substance abuse; and application of behavioral change modalities. HPTN works with 17 Clinical Trial Units associated with 11 domestic clinical sites and 12 international clinical sites located in 10 countries.

c. HIV Vaccine Trials Network (HVTN) www.hvtn.org

HVTN supports trials of preventive vaccines against HIV/AIDS through 18 Clinical Trial Units associated with 12 domestic and; 11 international clinical sites located in 8 countries.

d. International Maternal Pediatric Adolescent AIDS Clinical Trials Group (IMPAACT) <http://impaactnetwork.org>

IMPAACT conducts clinical trials for interruption of mother-to-child transmission of HIV; treatment for HIV-infected children, adolescents, and pregnant women; approaches for TB prevention in HIV infected children, adolescents and pregnant women; and vaccines for the prevention of HIV sexual transmission among adolescents. This effort currently involves 15 Clinical Trial Units utilizing 7 domestic and 17 international clinical sites located in 10 countries.

Section 2: Current NIAID/DAIDS-Supported Clinical Research Contracts

CRPMC activities may require coordination and collaboration with these NIAID contracts:

- a. **NIAID-Clinical Study and Site Monitoring (CSSM) Contract:**
The Clinical Site and Study Monitoring (CSSM) Contract provides comprehensive clinical site and study monitoring services for the NIAID extramural clinical trial research portfolio. The services provided under the CSSM contract ensure that the conduct of clinical trials is in compliance with NIAID, domestic- and country- specific regulatory requirements and guidelines, currently approved protocols/ amendments, Good Clinical Practices (GCP). Additional services include verifying that the rights and well-being of human subjects are protected, ensuring the accuracy and completeness of reported clinical trial data, and verifying source documents.
CSSM activities include specialized site monitoring visits for a variety of purposes, including regulatory audits, assessment of overall and protocol-specific research pharmacy operations and management of investigational products, and remedial or for cause site visits to implement and ensure adherence to corrective actions required to address site or study deficiencies identified through routine site monitoring.
- b. **Clinical Research Support Services (CRSS) Contract**
The CRSS contract provides flexible clinical research management support services at multiple levels, including clinical site assessments to determine the readiness/ capacity of individual clinical sites with respect to facilities, equipment, personnel expertise and training, etc. The CRPMC contractor shall coordinate and collaborate with the CRSS contractor to produce specialized training materials when requested.
- c. **NIAID/DAIDS Regulatory Support Center (RSC)**
The RSC contract provides regulatory support relating to regulatory submissions and IND/NDA/BLA amendments, clinical research site compliance with regulatory requirements for human subjects research, protocol registration and other regulatory or related requirements.

Section 3: NIAID CRMS (DAIDS) Data Exchange Summary

Revision History

Version Date	Version Number	Brief Description of Change	Author
October 10, 2018	1.0	Initial version of the document	Suresh Varghese
February 13, 2026	2.0	Updated to include data exchange for submission to FDA	Suresh Varghese

Introduction

To manage the rising number of clinical trials with an increased focus on trial conduct, NIAID's Division of Acquired Immunodeficiency Syndrome (DAIDS);

Division of Allergy, Immunology and Transplantation (DAIT); Division of Microbiology and Infectious Diseases (DMID) and Vaccine Research Center (VRC) are working towards enhancing and integrating their Clinical Research Information Management Systems, tools, and communication methods. The divisional systems comprise the NIAID Clinical Research Management System (NIAID CRMS).

The DAIDS has developed several components in NIAID CRMS to manage the operational, regulatory, and administrative needs supporting its clinical research information needs. These components provide capabilities to track, manage, select, sort, and generate reports on data supporting clinical research.

The key components of the NIAID CRMS (DAIDS) and their basic functions are:

- **Master Contact** – Repository of contact information for the people and organizations of DAIDS and its collaborators across the DAIDS-sponsored research.
- **Protocol Management** – Tracks protocols managed and/or supported by the DAIDS. This component also tracks protocol statuses in a standardized way across all network and non-network protocols.
- **Protocol Registration** – Tracks protocol registration activities involving registering a Clinical Research Site (CRS) to a protocol. Enables the CRSs to submit documents to DAIDS regulatory contractor, and track and monitor progress of their submission. Provides the DAIDS Protocol Registration Team (PRT) the ability to view submissions and approve investigators of record (IoR).
- **Protocol Development Tracking** – Provides tracking of protocol development activities. The component provides an ability to track Investigator's Brochure (IB) and Package Inserts (PI) for the DAIDS sponsored studies. Also provides support for sending notifications to site personnel for important announcements.
- **Investigational New Drug Application (IND) Management** – Tracks all IND submissions tendered by the DAIDS to the U.S. Food and Drug Administration (FDA). IND Management enables DAIDS regulatory contractor and the DAIDS users to track and monitor progress of IND processing and submissions.
- **Clinical Site Monitoring** – Enables DAIDS to track clinical site monitoring activities. This component provides the DAIDS personnel the ability to oversee clinical site monitoring activities to assure overall adherence to protocols and the DAIDS-approved policy guidelines at clinical research sites. The component tracks site monitoring visit reports, issues identified during site visits and issue resolution.
- **Adverse Experience Reporting System** – Enables DAIDS CRSs to report Expedited Adverse Events (EAEs) effectively, in accordance with the safety reporting guidelines set forth by DAIDS.

- **Adverse Experience Processing System** – Enables DAIDS regulatory contractor and DAIDS Medical Officers to review the EAEs and ensure they are complete enough to make an independent assessment of the safety data and to determine if an expedited IND safety report to the FDA is warranted.
- **Site Hub** – Supports tracking of DAIDS clinical trials units' and clinical research sites' compliance with Good Clinical Practice (GCP) / Human Subjects Protection (HSP) trainings to facilitate grants management and tracks site population characteristics.

DAIDS Collaborators

Any organization that receives funding from NIAID/DAIDS to conduct or manage clinical research is a DAIDS collaborator for NIAID CRMS. NIAID CRMS uses a multi-directional flow of key information between DAIDS and their collaborators to enhance the interoperability of its clinical trials networks. The NIAID CRMS data exchange services provide support for the exchange of information between DAIDS and collaborator systems.

Through close coordination with various collaborators, the following data was transferred to the “new” site in NIAID CRMS to reflect the site composition based on the FY 14 Clinical Trials Units award: protocol registration, accrual, expedited adverse events, and site monitoring.

This document provides a high level summary of key data exchanges available in NIAID CRMS for DAIDS collaborators.

Data Exchange Overview

To provide the necessary oversight of the NIAID/DAIDS sponsored clinical trials, NIAID CRMS tracks information such as organizations, personnel, protocols, protocol registration, and expedited adverse events. Some of this key information is available to collaborators via data exchange services between NIAID CRMS and collaborator systems on heterogeneous platforms. For instance, collaborators have the ability to access current list of clinical research sites, and protocols in NIAID CRMS along with the ability to maintain protocol information using the data exchange services.

In addition to exchanging organization, people and protocol information, collaborators may require other pertinent data from NIAID CRMS to support clinical trials operations. This includes protocol registration data and expedited adverse event information to facilitate reconciliation of adverse events.

Key Data Exchange Services Available in NIAID CRMS

Organization and People Information

Data associated with organizations and people in the NIAID CRMS can be broadly classified into the following areas:

- Organizations and related address and contact information
- Organization/Person/Study Association

To share the organization and people information, NIAID CRMS provides following data exchange services to collaborators:

Services	Description	Data Exchange Frequency	Type of Data
Organizations	Provides the ability to access information about organizations (e.g., clinical research sites) in the NIAID CRMS.	On demand by collaborators	Organization Type, Name, Identifier (ID), FWA, IRB, Address, Contact, etc.
Organization and Study Specific Personnel	Provides the ability to access a person and his/her associations with organizations and any protocols.	On demand by collaborators	Organization ID, Association Role, Associated Organization/Person, Association address/contact, Study Team Role, etc.

Protocol Information

Data associated with protocols in the NIAID CRMS can be broadly classified into the following areas:

- Protocol Summary
- Protocol Status
- Accrual Data

To maintain the protocol related information, as well as to share this information with collaborators, NIAID CRMS provides following data exchange services to collaborators:

Services	Description	Data Exchange Frequency	Type of Data
Protocol Details	Provides collaborators to access protocol related information from NIAID CRMS.	On demand by collaborators	Protocol Summary - Number, Title, IND Holder, Network, Type, Phase, Target Accrual, Interventions, Status/Milestone, etc.
Maintain Protocol Status	Provides collaborators the ability to maintain the study status, milestones and events in NIAID CRMS.	When protocol status changes or a milestone is reached or an event occurs	Protocol Number, status/milestone/event, etc.
Accrual Data Update	Enables data management centers to provide accrual data update to DAIDS.	Daily	Protocol Number, Participant Demographics, Site, Participant Status, etc.

Protocol Registration Information

Data associated with protocol registration in the NIAID CRMS can be broadly classified into the following areas:

- Registration status of protocols at clinical research sites
- Authorized Investigator of Record (IoR)

To share the protocol registration related information, NIAID CRMS provides following data exchange services to collaborators:

Services	Description	Data Exchange Frequency	Type of Data
Protocol Registration	Provides collaborators the ability to access protocol registration related information from NIAID CRMS to facilitate clinical trials operations.	On demand by collaborators	Protocol Number, Version Number, Site ID, Registration Type, Registration Status, IRB information, etc.
Authorized Investigator Of Record	Provides collaborators the ability to access information about authorized IoR for a protocol at a site.	On demand by collaborators	Protocol Number, Site ID, Investigator of Record, IoR Authorization Date, etc.

Expedited Adverse Event Information

Expedited Adverse Events (EAE) data exchange service in the NIAID CRMS is primarily intended for the collaborators to reconcile EAEs with collaborator systems.

Data associated with EAEs in the NIAID CRMS can be broadly classified into the following areas:

- Summary of Expedited Adverse Events
- EAE Reporting Compliance

To share the EAE related information, NIAID CRMS provides following data interchange services to collaborators:

Services	Description	Data Exchange Frequency	Type of Data
EAE Summary	Provides collaborators the ability to access EAE Report information needed for reconciliation of EAEs within collaborator systems.	On demand by collaborators	Protocol Number, EAE Number, ICH Seriousness Criteria, MedDRA codes, Primary Adverse Event, Onset Date, Site Awareness Date, Intervention Details, Assessments, etc.
EAE Reporting Compliance	Provides collaborators the ability to access EAE information needed to determine if sites submitted initial EAE reports on time.	On demand by collaborators	Protocol Number, EAE Number, Days to Report Initial EAE, Initial Report Date, etc.
EAE for FAERS submission	Provides Regulatory Support Center (RSC) the ability to access Individual Case Safety Report (ICSR) for submission to FDA's Adverse Event Reporting System (FAERS)	On demand by collaborators	ICSR compliant EAE data

Section 4: Sample Reports

About this Document

Purpose

This manual has been written to help users understand and use COSMOS (CRPMC Online Site Management and Ordering System) application. It presents the functional capabilities and operational details of COSMOS and contains the procedures that users should follow to perform business tasks within this application.

The System Administration and Database Maintenance tasks have not been covered in this manual.

Intended Audience

This manual is intended for the COSMOS application users at Clinical Research Products Management Center (CRPMC), Westat, and National Institute of Health - Division of AIDS (NIH-DAIDS).

Section 1: Introduction

The CRPMC Online Site Management and Ordering System (COSMOS) is a web-based application system which serves the Clinical Research Products Management Center (CRPMC) with the goal of providing a secure and validated computer system. It will also facilitate printing and extracting various Microsoft Power BI reports for CRPMC and DAIDS user groups.

1.1 Features of COSMOS

A client-server-based web application that can be accessed by a web browser; COSMOS is a relational database management system with data stored on a central database server. As with any relational system, all the tables are related to one another through fields that serve as pointers to related tables.

COSMOS enables its users to order products, track the ordered products, manage receipts, manage inventory, and distribute products and process returned products for clients engaged in clinical trials. It also supports Investigator, site, protocol management and shipping processes.

Study Product Request Forms (SPRFs) are received at CRPMC. The protocol, the investigator requesting shipment and the receiving site are validated for each line item for each request. The Receiving and Inventory module also supports all activities involved in processing returned drugs including receipt, storage, and disposal of these drugs.

COSMOS is validated meaning each field in the forms will accept inputs in specific formats (such as all alphabetic characters, or numbers between 1 and 30 etc.). If the data entered is in an incorrect format, COSMOS will generate an error message.

1.2 Environment

This section describes the software and hardware environment required to run COSMOS application.

Software Environment – COSMOS is built using the latest web technologies as follows:

Software	Version
Windows/MAC	7 and above/ 10.12 and above
Browser – Chrome/IE/Safari/Firefox	62 and above/10 and above/11/55 and above
Java	V1.7 and above
Power BI (Reporting)	Power BI desktop with pro-licensing (To download power BI reports)

Hardware Environment – Requirements to run COSMOS.

Hardware	Version
Processor	Pentium 4 or newer processor that supports SSE2.
Hard Drive Space	Minimum 32 GB and above
RAM	Minimum 4GB and above

Section 2: Getting Started

The Home Page is a welcome page displayed to all users who access the COSMOS application. It gives a general overview of the CRPMC – explaining its functionalities, a brief on how to register and order products, Contact Us displaying the address, phone number, fax, and e-mail contact information for the CRPMC, FAQ and Login menu options prior to logging into the application.

This is a U.S. Government computer system, which may be accessed and used only for authorized Government business by authorized personnel. Unauthorized access or use of this computer system may subject violators to criminal, civil, and/or administrative action. All information on this computer system may be intercepted, recorded, read, copied, and disclosed by and to authorized personnel for official purposes, including criminal investigations. Such information includes sensitive data encrypted to comply with confidentiality and privacy requirements. Access or use of this computer system by any person, whether authorized or unauthorized, constitutes consent to these terms.

Access to COSMOS is limited to authorized users with an ID and password. On logging in, COSMOS allows users to launch any of the modules to which they have access rights.

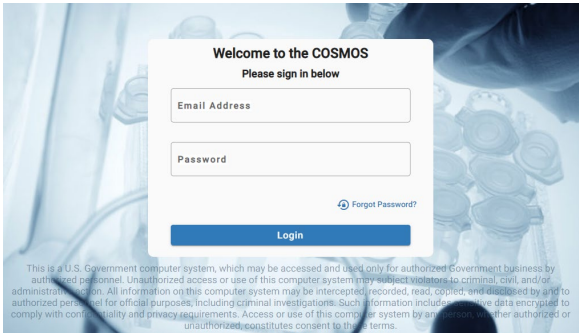

2.1 Create a New Account

Step	Action
1	For internal users, their existing ThermoFisher Scientific user ID and password will be used for login. For external users, a COSMOS system generated mail will be sent to their registered primary email with a link to access the application to create an account.
2	To create an account: Click the link provided in the email. On the New User page, create and enter a password in the Password and Confirm Password fields. Refer to the Password Policy requirements.
3	Select a security question from the Security Question drop-down. Enter a valid response for the security question into the Security Answer field. Use this security question and response to retrieve your password later. Click Change Password.

Section 2: Getting Started

2.2 Logging In

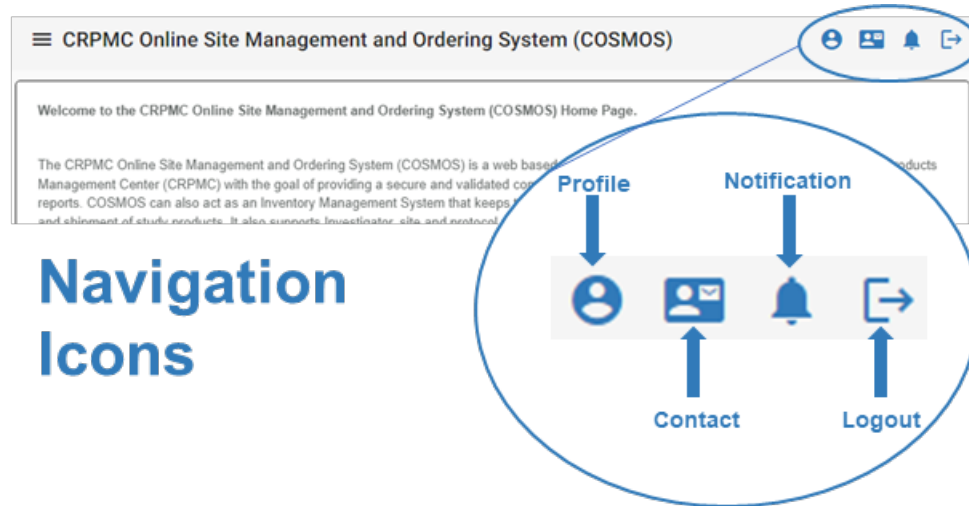

Note: There are two user types: (1) Internal Users are authorized users who are a part of CRPMC/ICRPMC user group and have ThermoFisher Scientific email IDs. (2) External Users are all other authorized users of COSMOS.

Step	Action
1	To Login: • Enter Email Address. • Enter Password. • Click Login. 
2	Upon successful login, based on user type: • External users have access to their Profile Page and Log Out menu options. In the Profile Page, users have access to Change Password, Set Security Questions, and View general information and role. • Internal users have access to the Log out menu option.
3	Upon successful login, based on user role: • Pharmacist of Record (PoR) and Associate Pharmacist have access to Drug Return and Destruction under Return Menu, Order Study Product module under Shipping menu, and Product Transfer under Inventory menu. • PoRs have additional menu options to acknowledge receipt and retest dates. • Westat users have access to Destruction module. • DAIDS (Division of AIDS) users have access to DAIDS Approval menu to approve CoA and batch labels. • CRPMC users have access to Home, Registration, Receiving, Return, Shipping, Inventory, and Reporting menu options. Note: Please refer to the User Role and Access Rights matrix (Section 1.3) for more details

Section 2: Getting Started

2.3 Landing Page

The Landing Page is a customized Home Page with menu options based on your role defined in COSMOS.

Profile

In the Profile Page, users have access to Change Password, Set Security Questions, and View general information and role.

Contact

Contact Info displaying the address, phone number, fax, and e-mail contact information for the CRPMC

Notification

This symbol can be viewed across all pages in COSMOS. Click the symbol to see the Welcome Message and any other notifications.

Logout of the system

Section 2: Getting Started

2.4 Password Management

Retrieve Password

- Click Forgot Password link.
- On the Forgot Password page, select security question and enter the response.
- Click Reset.
- Enter and confirm new password.

Change Password

- Select Profile icon from the top navigation bar.
- Under Change Password, enter the old password.
- Enter new password and confirm
- Select a security question and provide the answer.
- Click Change Password to complete.

Wrong Password

The system locks a user out for 5 minutes after 5 attempts with an incorrect password. Contact an administrator to unlock the account.

2.5 Using Menus and Toolbars

Menus display lists of commands, some with images next to them so users can quickly associate the command with the image. Most menus are located on the menu bar to the left of the application window.

Menu Name	Allows Users to
 Home	Access Home Page from any screen
 Registration	Access registration screens
 Receiving	Access menu for receiving products
 Batch Record	Access menu items related to production batch records
 Return	Access menu for returning study products and logger
 Shipping	Access shipping related sub menu items
 Inventory	Access menu items related to inventory management
 Reporting	Access Power BI reports

3.1 Investigator Registration

Open the Investigators Registration Page with a list of currently registered investigators.

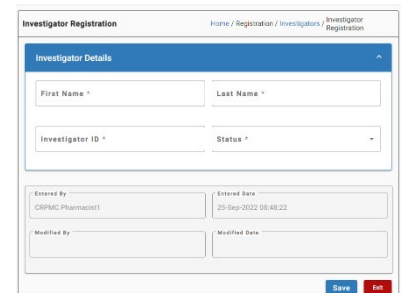

Left Navigation panel → Registration → Investigator Registration

Click Add New Investigator

Enter Investigator Details

- First Name
- Last Name
- Investigator ID. (must be unique)
- Select the Status (Active/Inactive)
- Click Exit to cancel
- Click Save to complete the registration

The form is titled "Investigator Registration" and has a breadcrumb trail: Home / Registration / Investigators / Investigator Registration. It contains a section for "Investigator Details" with the following fields: First Name *, Last Name *, Investigator ID *, and Status *. Below this, there are two rows of fields: Entered By (CRPMC Pharmacist1) and Entered Date (25-Sep-2022 08:48:22), and Modified By and Modified Date. At the bottom right, there are two buttons: Save and Exit.

To edit the investigator details

From the Investigator Registration Page

- Click the hyperlinked Investigator ID
- Enter the details to be changed
- Click Save.

4.2 Blinded Form

Step 1 of 2 – CRPMC/ICRPMC pharmacist performs primary inspection:

Open the Blinded Inspection Page with a list of blinded products.

Left Navigation panel → Receiving → Blinded Form or the link in Notification

To process a blinded inspection, click the hyperlinked Product Name

The following fields are auto populated from the receipt information

- Protocol #
- NSC Number
- Product Name
- Lot Number
- Sample#
- Strength/Dosage/U Issue/U Size
- Expiration Date

Click New Lot – Yes

Select a product for comparison

- NSC Number
- Product Name
- Lot Number
- Sample Number

Strength/Dosage/U Issue/U Size is auto populated.

The next 3 sections are Comparisons between the received sample and the sample selected: **Label, Product Description, Overall Appearance.**

For each section:

- Column 1, The property to be compared
- Column 2, A checkbox if the property from column 1 is the same for both
- Column 3, List differences if any
- Column 4, Date comparison was done, auto populated when saved
- Column 5, Person doing inspection, auto populated when saved

Additional Information:

- Comments if needed
- Click Exit to cancel
- Click Submit for Approval to complete inspection

The inspection workflow status moves from primary to secondary pharmacist.

- Partial case count
- Quantity partial case
- ID Specific Yes/No. **Select No.**
- Select ANSI Inspection Type (see below)

AQL 0.65 for all generic studies. 100% for ID specific, purchased and blinded products. Recommended inspection quantity auto populates. If product does not pass inspection criteria, place in Return/Reject area and notify CRPMC pharmacist and PD.

- Inspected Quantity $\geq$ Recommended quantity
- Inspection Date
- Order from Manufacturer Yes/No. If Yes, Select applicable Order Number
- Comments if needed

Subsection: Retention and Logger

- Retention Sample Required Yes/No. If Yes, enter retention quantity

Retain if label is investigational and product storage is ambient. Select No for commercial or ID specific / randomized study products

- Data logger Enclosed Yes/No. If Yes, select files to upload data if possible

If CRPMC **CAN** download the data from the loggers, download the data, and review for any temperature excursions. If no excursions observed, upload the downloaded data. If any excursion is observed, forward the data to manufacturer and request for written confirmation of the suitability of the product. Written communication from the manufacturer must be attached to the downloaded data and upload into COSMOS for CRPMC files.

If CRPMC **CANNOT** download the data, follow the instructions from the manufacturer to return the loggers back to manufacturer and request a copy of the data. In case the data cannot be provided, a written confirmation on suitability of product must be obtained for CRPMC files.

Step 3 of 4 – CRPMC/ICRPMC pharmacist reviews receipt:

Open the Receiving Dashboard Page with a list of existing receipts.
Left Navigation panel → Receiving → Receiving Dashboard

Via Submitted filter, click Review

Review

OR – Access a receipt workflow by clicking the hyperlinked Receipt #

Click the Pharmacist Review workflow circle to get a list of products in the receipt.

For each product listed, click Review button

The screenshot shows the 'Receiving Information' page. At the top, there's a 'Workflow Details' section with a progress bar showing five steps: 1. Package, 2. Product, 3. Pharmacist Review (highlighted), 4. QA Approval, and 5. Approved. Below this is a table with columns: ID, Product, Protocol, Type, Quantity, Pharmacist, and Actions. The table contains one row with ID 10016, Product 10016, Type 1, Quantity 1, and Pharmacist No. The Actions column has a 'Review' button. At the bottom right, it says '1 of 1 items'.

Make the required selections

- Product Blinded? Yes/No. If Yes, Blinded Inspection option available (see Blinded Form)
- Is COA Available? Yes/No. If No, Send email to Manufacturer available to request COA.
- COA Approval Required? Yes/No/Yes: Not applicable.

Select 'Yes' when CoA is required, 'Initiate CoA' button is enabled. Click button to initiate CoA process if CoA is not already available (refer to section 4.4 COA Approval for full details. Select 'No' for ancillary supplies, devices, and components etc.

Select 'Yes-Not Applicable' if CRPMC is not able to obtain COA from any source. CRPMC must try to obtain Pedigree in lieu of COA for CRPMC files. If Pedigree is also not obtainable, CRPMC must obtain a written confirmation from either PAB protocol pharmacist or COR that receipt can be processed and moves into active inventory for further distribution to clinical sites.

- SDS Present? Yes/No. If Yes, select file to upload
- Auxiliary Label Required? Yes/No. If Yes, select labeling type from dropdown to initiate the selected type of receiving batch record (WI-000774899)
- Is CTA Document Required? Yes/No
- SAHPRA quantity – Linked to the protocol/product/strength inventory (see WI-000774895)
- Is GMO required? Yes/No. If Yes, enter the GMO quantity and expiration date – Linked to the protocol/product/strength inventory (see WI-000774895)
- Comments if needed
- Click Exit to cancel
- Click Save to complete review of the product

The screenshot shows the 'Receiving Information' page with a form for product details. It includes fields for 'Product Blinded?' (Yes/No), 'Is COA Available?' (Yes/No), 'COA Approval Required?' (Yes/No/Yes: Not applicable), 'COA Approved Date', 'SDS Present?' (Yes/No), 'Auxiliary Label Required?' (Yes/No/No), 'Is CTA Document Required?' (Yes/No), 'SAHPRA Qty' (0), and 'Is GMO required?' (Yes/No). There is an 'Initiate CoA' button and a 'Send Email To Manufacturer' button.

Click Approve Receiving if all information is correct

Lot Status is updated to one of four possible values in COSMOS system

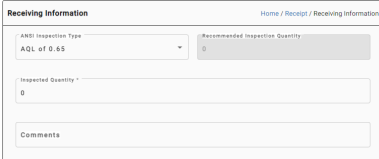

- Pre-released:** Lots with any pending process like COA approval or auxiliary labelling etc. remain in this status. This is the default status for any newly received lots of study products.
- Active:** Lots move to this status if there is no other active lot for the study product-protocol combination.
- Reserved:** If there is an existing lot for the study product and protocol combination with 'Active' status, the new lot is assigned this status at the end of QA approval.
- Quarantine:** Study product lots that have any outstanding discrepancies or issues related to quality, quantity or storage or any other regulatory issues. This is also the status for left over product quantities at the end of a study.

The receipt workflow status is Approved.

4.4 COA Approval

Steps 3 through 6 of 6 – DAIDS Reviewers approve COA:

Open the COA Dashboard Page with a list of existing COA approvals.

Left Navigation panel → Receiving → COA Approval or link in Notifications

Via Pending Reviewer Signature filter, click the hyperlinked Product to view

- Review COA
- Comments if needed
- Click Exit to Cancel
- Click Reject in case of discrepancies. Enter comments and return order to CRPMC pharmacist
- Click Approve to progress the workflow

Click the  at the top right of the screen to show comments entered by the approvers during the workflow.

Rejection Scenario 1

If a discrepancy is identified by one of the reviewers the COA is returned to the CRPMC pharmacist. Upon review of the comments, a new CoA document needs to be uploaded into the workflow. Since this new document has not been approved by any of the reviewers, the workflow reverts to the native state and requires that all reviewers once again review and approve the CoA.

Comments

Status: Submitted for Approval

testing COA initiation process

CRPMC QA3 23-Oct-2022 14:52:28

Status: Approved

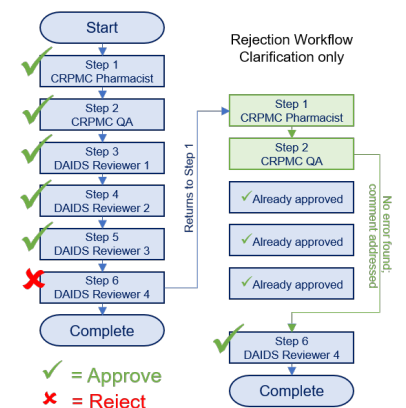

CRPMC QA approves COA

Show Comments

Rejection Scenario 2

A rejection returns the workflow to the CRPMC pharmacist to address, however, if it is determined that a discrepancy did not exist, a clarification can be added to the comments field and resubmitted.

CRPMC QA once again reviews and approves the COA with clarification, however, since the document did not change, and the first three reviewers had already approved, the workflow jumps all the way back to Reviewer 4 for the final approval

Once all reviewers have approved the workflow status is complete.

5.1 Production Batch Record

Step 1 of 8 The production batch record process is initiated by a CRPMC/ICRPMC Pharmacist.

Left Navigation panel → Batch Record → Production Batch Record

If editing an existing production batch record, filter the table results then click the Batch Record# hyperlink.

To generate a new production batch record, click New Batch Record.

 **New Batch Record**

Enter production batch Record Header Details

- Select Protocol# from dropdown
- Select NSC# from dropdown
- Select Product Name from dropdown
- Select Lot# from dropdown
- Select Sample Number from dropdown
- Strength/Dosage... is autogenerated
- Enter the number of labels required

Click Exit to cancel

Click Save and the system will autogenerate a Batch Record# and return to the production batch record dashboard.

The form is titled 'Batch Record Header'. It contains two main sections: 'Batch Record' and 'Label Request'. The 'Batch Record' section has dropdowns for 'Protocol#', 'NSC#', 'Product Name', 'Lot#', and 'Sample Number'. There is an 'Autogenerated' field for 'Strength / Dosage / U.Issue / U.Size'. The 'Label Request' section has a 'No. of Labels Required' field, a 'Labels Requested By' field (pre-filled with 'CRPMC Pharmacist'), and a 'Labels Requested Date' field. At the bottom right are 'Save' and 'Exit' buttons.

To progress the workflow, select the Batch Record# hyperlink to open the record. Edit information if required and click on Save & Submit. An email is sent to CRPMC Batch Record Team.

When submitting, enter password when prompted by popup.

The production batch record workflow status is updated to Operations.

5.2 Receiving Batch Record

Step 1 of 8 – A Receiving Batch Record is initiated during the pharmacist review step of a receipt. If either “Cautionary Statement Labeling Required” or “Other Auxiliary Labeling” is selected for the question “Auxiliary Label Required?” then a new batch record entry is made on the receiving batch record dashboard.

A CRPMC/ICRPMC Pharmacist opens the dashboard. Left Navigation panel → Batch Record → Receiving Batch Record

Two tiles are displayed at the top of the dashboard providing a count and the ability to quickly filter the table for either:

- Cautionary
- Other Auxiliary

Cautionary	Other Auxiliary
Total Count: 20	Total Count: 14

The Receiving Batch Record Dashboard displays the columns:

- Receiving Batch Record # (format will be RYYMXXXX where R is default, YY is the last two digits of the current year, M is the letter corresponding to the month i.e. A is January, B is February, etc., XXXX is the subsequent batch record i.e. first batch record of the year will be 0001)
- Receipt #
- Protocol #
- Product Name
- Strength
- Lot #
- Type of Batch Record (Cautionary Statement or Other Auxiliary)
- Status

- Reject to enter discrepancy comments and return to CRPMC/ICRPCM pharmacist
- Approve to progress the workflow

Click the  at the top right of the screen to show comments entered by the approvers during the workflow.

Rejection Scenario 1

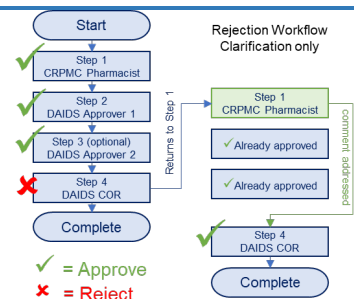

If a discrepancy is identified by one of the approvers, the label is returned to the CRPMC/ICRPCM pharmacist. Upon review of the comments, a new label document may be uploaded into the workflow. Since this new document has not been viewed by any of the approvers, the workflow reverts to the native state and requires that all approvers once again review and approve the label.

Comments	
CRPMC Pharmacist3	09-Dec-2024 10:38:32
Status: Submitted No comments	
DAIDS Pharmacist3	09-Dec-2024 10:44:49
Status: Approved absd	
DAIDS COR3	09-Dec-2024 10:46:06
Status: Rejected COR reject	

Rejection Scenario 2

A rejection returns the workflow to the CRPMC/ICRPCM pharmacist to address, however, if it is determined that a discrepancy did not exist, a clarification can be added to the comments field and resubmitted.

Since the document did not change, and the first two pharmacists had already approved, the workflow jumps all the way back to DAIDS COR for the final approval.

Once DAIDS Pharmacist(s)/COR have approved the workflow status is complete.

6.3 Recovery

A Recovery enables CRPMC to recover expired products from a site that has been de-registered from a protocol due to site de-activation or closure.

If the site is domestic, a return workflow is initiated and if the site is International then a destruction workflow is initiated.

Step 1 of 2 – CRPMC/ICRPMC pharmacist initiates a recovery:

Open the Recovery Page with a list of recovered products.

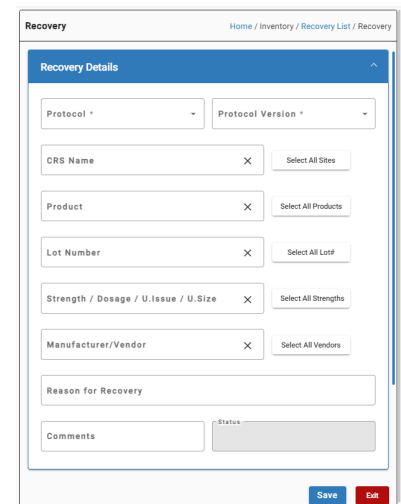

Left Navigation panel → Return → Recovery or select the link in Notification

Click Add New Recovery

Enter Recovery Details

- Protocol
- Protocol Version
- CRS Name
- Product
- Lot number
- Strength/Dosage/U Issue/U Size
- Manufacturer/Vendor
- Reason for recovery
- Comments if needed
- Click Exit to cancel
- Click Save to complete the new recovery

The screenshot shows the 'Recovery Details' form. It includes fields for Protocol (dropdown), Protocol Version (dropdown), CRS Name (text with 'X' icon and 'Select All Sites' button), Product (text with 'X' icon and 'Select All Products' button), Lot Number (text with 'X' icon and 'Select All Lots' button), Strength / Dosage / U Issue / U Size (text with 'X' icon and 'Select All Strengths' button), Manufacturer/Vendor (text with 'X' icon and 'Select All Vendors' button), Reason for Recovery (text), and Comments (text). There are 'Save' and 'Exit' buttons at the bottom right.

The recovery workflow status is initiated and considered to be in progress.

6.3 Recovery

Step 2 of 2 – Site pharmacist processes a recovery:

Open the Recovery Page with a list of recovered products.

Left Navigation panel → Return → Recovery or select the link in Notification

To acknowledge a recovery, click hyperlinked protocol name

Complete

- Enter comments if needed
- Products in Inventory Yes/No
- Check Acknowledge
- Click Exit to cancel
- Click save to complete the Acknowledgement

If product present in inventory is yes, then the workflow is Completed after the initiation of return or destruction workflow.

Note: Upon completion of recovery workflow, a recovery email notification is sent to the associated Site PoR. A reminder email is automatically sent every 24 hours until initiation of return or destruction workflow.

The screenshot shows a web form titled 'Recovery' with a breadcrumb trail 'Home / Inventory / Recovery List / Recovery'. The form contains a 'Comments' text area, a 'Status' dropdown menu currently set to 'Initiated', and a 'Products in Inventory' section with 'YES' and 'NO' radio buttons. There is an 'Acknowledge' checkbox and a red text label 'Acknowledge is Mandatory'. At the bottom right are 'Save' and 'Exit' buttons.

The recovery workflow status is completed.

Home	8.3 Inventory Management
Registration	Inventory is based on an item's Numbered Stock Code (NSC) and sample number combination. The NSC is a unique drug identifier number assigned to each agent in the inventory. Sample numbers are generated by COSMOS and assigned when entering receiving details. Every new shipment of a given drug received at the CRPMC is assigned the next sample number for that NSC.

8.3 Inventory Management

CRPMC/ICRPMC technician modifies product details:

Open the Inventory Management Page with a list of products in inventory.

Left Navigation panel→Inventory→Inventory Management or Link in Notification

To view or modify details of a product, click the hyperlinked Sample number.

Upload necessary documents

- Click Select files...
- Click Exit to cancel
- Click Save to save any changes

The screenshot shows the 'Inventory Information - Inventory Management Details' page. The 'Technician' section is expanded, showing a 'Location' field with the value 'W1-B1-- Qty: 0' and an 'Enter Locations' button. Below this is an 'Upload Doc' section with a 'Select files...' button. A 'Comments' section contains the text 'Batch Record Completed, moved to ACTIVE location.' At the bottom, there is a table with columns 'File Name', 'Uploaded D...', and 'Uploaded By', which is currently empty with the message 'No records available.' Below the table are 'Save' and 'Exit' buttons.

If Location Change is Yes, click Enter Location

Enter Location

Enter the Add Location Details

- Storage Location
- Rack
- Shelf
- Box
- Quantity
- Click cancel to leave the add location
- Click Save to complete the add location

The screenshot shows the 'Add Location' form. It has a title bar 'Add Location' with an 'Add' button. The form contains five input fields: 'Storage Location' (a dropdown menu), 'Rack', 'Shelf', 'Box', and 'Qty.' (with a 'Qty' label next to it). Below the fields are 'Save' and 'Cancel' buttons.

8.4 Logger Adjustment

Step 1 of 2 – CRPMC/ICRPMC technician initiates a logger adjustment:

Open the Logger Adjustment Page with a list of adjusted loggers.

Left Navigation panel → Inventory → Logger Adjustment

Click New Adjustment

Enter Logger Adjustment Details

- Adjustment Type – Adjustment/Destruction
- NSC Number
- Product Name
- Lot Number
- Sample Number
- Quantity to Adjust
- Select CRPMC QA to review
- Click Exit to cancel
- Click Save to submit the adjustment

The logger adjustment workflow status is submitted and waiting for approval.

8.4 Logger Adjustment

Step 2 of 2 – CRPMC QA completes logger adjustment:

Open the Logger Adjustment Page with a list of adjusted products.

Left Navigation panel → Inventory → Logger Adjustment or link in Notification

To review a submitted logger adjustment, click the hyperlinked NSC number

Review Logger Adjustment Details

- Enter comments if needed
- Click Exit to cancel
- Click Approve to complete the adjustment
- Click Reject in case of discrepancy. Enter rejection comments

Note: If Reject is selected the workflow is moved back to submitted status.

The screenshot shows the 'Logger Adjustment' form. The top section, 'Logger Adjustment Details', contains fields for Adjustment Type (set to 'Adjustment'), NSC Number (777001), Product Name (Sensitech Logger), Lot# (128554), Sample Number (1), Quantity Received (2), Quantity Shipped (2), Current Balance (2), Qty to Adjust (1), and Proposed Quantity. The bottom section, 'CRPMC QA Review', includes a Reviewer dropdown (set to 'CRPMC QA3') and a Review Comment text area. At the bottom right are buttons for 'Approve', 'Reject', and 'Exit'.

The logger adjustment workflow status is approved and completed

8.6 Re-pass

Step 1 of 2 CRPMC/ICRPMC PHARMACIST initiates the Re-Pass

Open the Re-pass Page with a list of products with updated repass dates.

Left Navigation panel → Inventory → Re-pass or select the link in Notification

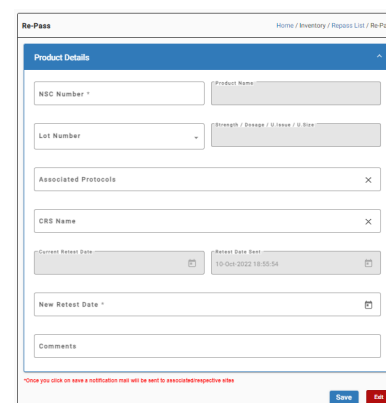

Click Add New Repass

Enter Product Details

- NSC Number
- Lot Number
- Select Associated Protocols, multiple protocols can be selected
- CRS Name, multiple names can be selected
- Select new Retest Date
- Enter comments if needed
- Click Exit to cancel
- Click Save to complete the Re-Pass

Note: A notification mail is sent to all the associated sites regarding the change in retest date. A reminder email is automatically sent every 2 days until the sites have acknowledged the retest date.

The screenshot shows the 'Re-Pass' form with the 'Product Details' section expanded. It includes fields for NSC Number, Lot Number, Associated Protocols (a multi-select dropdown), CRS Name (a multi-select dropdown), Current Retest Date, New Retest Date, and a Comments text area. There are 'Save' and 'Exit' buttons at the bottom right.

Step 2 of 2 SITE PHARMACIST acknowledges the Re-Pass

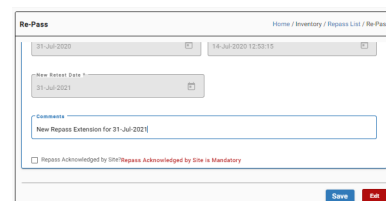

Open the Re-pass Page with a list of products with updated repass dates.

Left Navigation panel → Inventory → Re-pass or select the link in Notification

To view the details of a Re-pass, click the hyperlinked Protocol or Product name

Acknowledge Re-pass notification

- Click the Repass Acknowledged by Site checkbox
- Click Exit to cancel
- Click save to complete the acknowledgement

The screenshot shows the 'Re-Pass' form with the 'Acknowledgement' section expanded. It includes a 'New Retest Date' field, a 'New Repass Extension for 31-Jul-2021' text area, and a checkbox labeled 'Repass Acknowledged by Site/Repass Acknowledged by Site is Mandatory'. There are 'Save' and 'Exit' buttons at the bottom right.

This module is used to create new samples within an NSC number by transferring a given amount from the parent sample. The newly created sample is assigned the same characteristics as the parent, including lot number, dosage formulation, and expiration date.

Step 1 of 2 – CRPMC/ICRPMC pharmacist initiates a sample split:

Open the Sample Split Page with a list of sample split workflows.

Left Navigation panel → Inventory → Sample Split

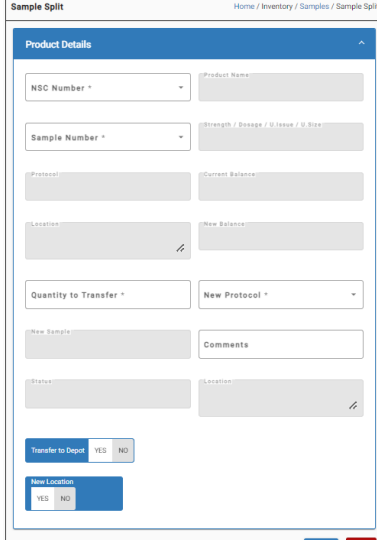

Click Add New Sample Split

 Add New Sample Split

Enter Product Details

- NSC Number
- Sample Number
- Quantity to Transfer
- New Protocol
- Enter comments if needed
- Transfer to Depot Yes/No, if Yes select depot
- New Location Yes/No
- Click Exit to cancel
- Click Save to initiate the sample split

Note: If both location and transfer to depot are selected as no, then the sample split workflow gets updated to Completed upon clicking save.

The screenshot shows the 'Sample Split' form with the following fields and controls:

- Product Details** (Section Header)
- NSC Number *** (Dropdown menu)
- Product Name** (Text input field)
- Sample Number *** (Dropdown menu)
- Strength / Dosage / U Issue / U Size** (Text input field)
- Protocol** (Text input field)
- Current Balance** (Text input field)
- Location** (Text input field)
- New Balance** (Text input field)
- Quantity to Transfer *** (Text input field)

Section 11: COSMOS – eTMF Integration

The management of the trial records in the electronic Trial Master File (eTMF) through the integration of the COSMOS data base is being powered by Veeva Vault. Veeva Vault shall be used for all registrational clinical studies to ensure Good Clinical Practices (GCP) compliant documentation in an audit-ready environment.

For each study in Veeva Vault, documents are separated by study-level, country-level, and site-level collectively allowing evaluation of study's conduct and quality of data collection. For documents to be ready in an audit environment, CRPMC must activate each tier of the 3 levels (Study, Country, Site) in the Veeva Vault to the "Active" Lifecycle State. Studies and countries are already entered in Veeva Vault, CRPMC is responsible for adding sites. In the event the Primary Investigator is not located in the system, ISIT form must be completed and submitted to InvestigatorDatabase.ManagementSM@ppd.com to create the respective PI in Veeva Vault.

Once each level is in the "Active" Lifecycle State, the CRPMC sets the Milestones of the "Required" expected documents as noted in the table below for the study level and study sites level as applicable. There are no documents filed at the country level.

Level	Document Type	Document Subtype	Document Classification
Study	IP and Trial Supplies	IP Release Process Documentation	Certificate of Analysis
Study	IP and Trial Supplies	IP Documentation	Receipt Documentation
Study	IP and Trial Supplies	IP Documentation	IP Re-labeling Documentation
Study	IP and Trial Supplies	IP Documentation	IP Sample Label
Study	IP and Trial Supplies	IP Documentation	IP Supply Plan
Study	IP and Trial Supplies	IP Documentation	IP Storage Condition Excursion Documentation
Site	Site Management	Site Set-up	IP Site Release Documentation
Site	IP and Trial Supplies	IP Documentation	IP Shipment Documentation
Site	IP and Trial Supplies	IP Documentation	IP Transfer Documentation
Site	IP and Trial Supplies	IP Documentation	IP Recall Documentation
Site	IP and Trial Supplies	IP Documentation	IP Retest and Expiry Documentation
Site	IP and Trial Supplies	IP Documentation	IP Return Documentation
Site	IP and Trial Supplies	IP Documentation	IP Certificate of Destruction
Site	IP and Trial Supplies	IP Documentation	IP Quality Complaint Form

For the "Required" expected document, the # Expected must be greater than zero. As documents are loaded and pushed daily, CRPMC is required to update the # Expected to equal the # of Final Documents on a weekly basis changing the Completeness status. The weekly task provides the metric of contemporaneous upload, reviews, and completeness of the documents collected. An email notification is generated and sent out by Veeva Vault as status is changed and documents are moved through the system providing the movement/changes which occurred.

Section 12: Appendix

12.1 Search and Filter Option in Grid

Grid Values can be sorted based on any of the information available in the grid in ascending or descending order by clicking the text in the column header. The arrowhead facing downwards  denotes descending order and vice versa.

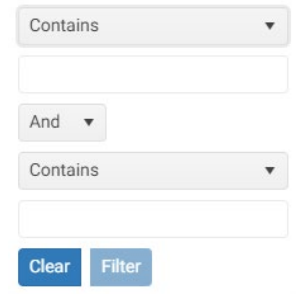

Grid Value details can also be filtered using the filter  option on the column header.

The filter option can be used to filter based on a single or two criteria. Select the parameters to filter and enter the data and Click filter. Click clear to clear filter.

The controls at the bottom of the grid can be used to navigate through the pages. The number of items displayed per page can be changed by selecting the number from the drop-down. The entire grid can be refreshed by clicking the refresh at the bottom right of the page.

Grid pagination controls showing page navigation (1, 2, 15 items per page) and a refresh button.

Filter controls showing two 'Contains' dropdown menus, an 'And' dropdown, and 'Clear' and 'Filter' buttons.

12.2 Workflow Details

Workflow Details box is present at the top of every page which involves a workflow. The step at which the lead line (blue line) ends is the step at which the current workflow is being executed/acted upon.

In case of rejection, then the step at which the workflow has been rejected is highlighted in red. Placing the cursor on the red words will display the Rejection Comments. The Leader line will terminate at the step to which the rejection has redirected the workflow.

About this Document

Purpose

This manual has been written to help users understand and use COSMOS (CRPMC Online Site Management and Ordering System) application. It presents the functional capabilities and operational details of COSMOS and contains the procedures that users should follow to perform business tasks within this application.

Intended Audience

This manual is intended for the clinical research site pharmacists approved by DAIDS.

Section 1: Introduction

The CRPMC Online Site Management and Ordering System (COSMOS) is a web-based application system which serves the Clinical Research Products Management Center (CRPMC) with the goal of providing a secure and validated computer system. It will also facilitate printing and extracting various Microsoft Power BI reports for CRPMC and DAIDS user groups.

1.1 Features of COSMOS

A client-server-based web application that can be accessed by a web browser; COSMOS is a relational database management system with data stored on a central database server. As with any relational system, all the tables are related to one another through fields that serve as pointers to related tables.

COSMOS enables its users to order products, track the ordered products, manage receipts, manage inventory, and distribute products and process returned products for clients engaged in clinical trials. It also supports Investigator, site, protocol management and shipping processes.

Study Product Request Forms (SPRFs) are received at CRPMC. The protocol, the investigator requesting shipment and the receiving site are validated for each line item for each request. The Receiving and Inventory module also supports all activities involved in processing returned drugs including receipt, storage, and disposal of these drugs.

COSMOS is validated meaning each field in the forms will accept inputs in specific formats (such as all alphabetic characters, or numbers between 1 and 30 etc.). If the data entered is in an incorrect format, COSMOS will generate an error message.

1.2 Environment

This section describes the software and hardware environment required to run COSMOS application.

Software Environment – COSMOS is built using the latest web technologies as follows:

Software	Version
Windows/MAC	7 and above/ 10.12 and above
Browser – Chrome/IE/Safari/Firefox	62 and above/10 and above/11/55 and above
Java	V1.7 and above

Section 2: Getting Started

The Home Page is a welcome page displayed to all users who access the COSMOS application. It gives a general overview of the CRPMC – explaining its functionalities, a brief on how to register and order products, Contact Us displaying the address, phone number, fax, and e-mail contact information for the CRPMC, FAQ and Login menu options prior to logging into the application.

This is a U.S. Government computer system, which may be accessed and used only for authorized Government business by authorized personnel. Unauthorized access or use of this computer system may subject violators to criminal, civil, and/or administrative action. All information on this computer system may be intercepted, recorded, read, copied, and disclosed by and to authorized personnel for official purposes, including criminal investigations. Such information includes sensitive data encrypted to comply with confidentiality and privacy requirements. Access or use of this computer system by any person, whether authorized or unauthorized, constitutes consent to these terms.

Access to COSMOS is limited to authorized users with an ID and password. On logging in, COSMOS allows users to launch any of the modules to which they have access rights.

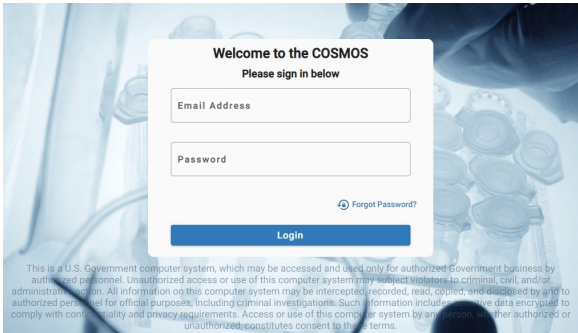

2.1 Create a New Account

Step	Action
1	For internal users, their existing ThermoFisher Scientific user ID and password will be used for login. For external users, a COSMOS system generated mail will be sent to their registered primary email with a link to access the application to create an account.
2	To create an account: Click the link provided in the email. On the New User page, create and enter a password in the Password and Confirm Password fields. Refer to the Password Policy requirements.
3	Select a security question from the Security Question drop-down. Enter a valid response for the security question into the Security Answer field. Use this security question and response to retrieve your password later. Click Change Password.

Section 2: Getting Started

2.2 Logging In

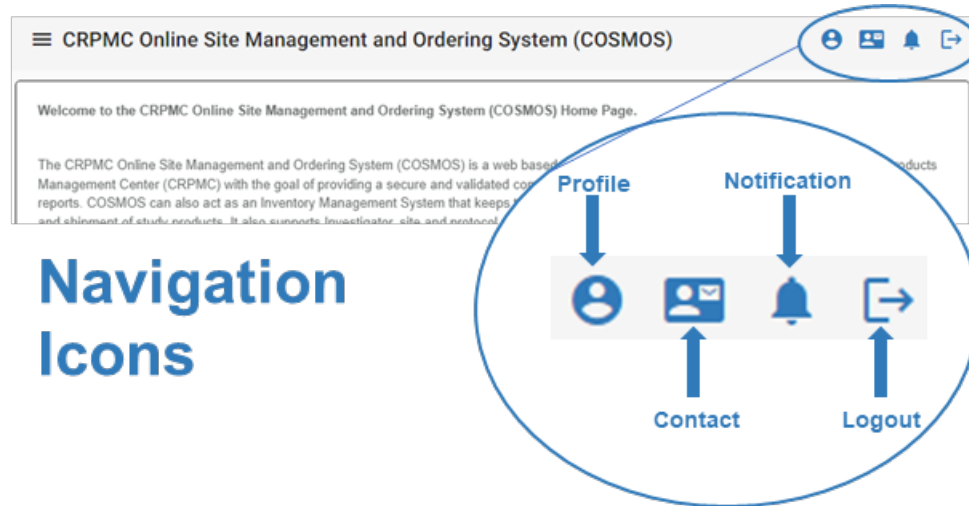

Note: There are two user types: (1) Internal Users are authorized users who are a part of CRPMC/ICRPMC user group and have ThermoFisher Scientific email IDs. (2) External Users are all other authorized users of COSMOS.

Step	Action
1	To Login: • Enter Email Address. • Enter Password. • Click Login. 
2	Upon successful login, based on user type: • External users have access to their Profile Page and Log Out menu options. In the Profile Page, users have access to Change Password, Set Security Questions, and View general information and role. • Internal users have access to the Log out menu option.
3	Upon successful login, based on user role: • Pharmacist of Record (PoR) and Associate Pharmacist have access to Drug Return and Destruction under Return Menu, Order Study Product module under Shipping menu, and Product Transfer under Inventory menu. • PoRs have additional menu options to acknowledge receipt and retest dates. • Westat users have access to Destruction module. • DAIDS (Division of AIDS) users have access to DAIDS Approval menu to approve CoA and batch labels. • CRPMC users have access to Home, Registration, Receiving, Return, Shipping, Inventory, and Reporting menu options. Note: Please refer to the User Role and Access Rights matrix (Section 1.3) for more details

Section 2: Getting Started

2.3 Landing Page

The Landing Page is a customized Home Page with menu options based on your role defined in COSMOS.

Profile

In the Profile Page, users have access to Change Password, Set Security Questions, and View general information and role.

Section 2: Getting Started

2.4 Password Management

Retrieve Password

- Click Forgot Password link.
- On the Forgot Password page, select security question and enter the response.
- Click Reset.
- Enter and confirm new password.

Change Password

- Select Profile icon from the top navigation bar.
- Under Change Password, enter the old password.
- Enter new password and confirm
- Select a security question and provide the answer.
- Click Change Password to complete.

Wrong Password

The system locks a user out for 5 minutes after 5 attempts with an incorrect password. Contact an administrator to unlock the account.

2.5 Using Menus and Toolbars

Menus display lists of commands, some with images next to them so users can quickly associate the command with the image. Most menus are located on the menu bar to the left of the application window.

Menu Name	Allows Users to
 Home	Access Home Page from any screen
 Registration	Access registration screens
 Receiving	Access menu for receiving products
 Return	Access menu for returning study products and logger
 Shipping	Access shipping related sub menu items
 Inventory	Access menu items related to inventory management
 Reporting	Access Power BI reports

3.3 Recovery

A Recovery enables CRPMC to recover expired products from a site that has been de-registered from a protocol due to site de-activation or closure.

If the site is domestic, a return workflow is initiated and if the site is International then a destruction workflow is initiated.

Site pharmacist processes a recovery:

Open the Recovery Page with a list of recovered products.

Left Navigation panel → Return → Recovery or select the link in Notification

To acknowledge a recovery, click hyperlinked protocol name

Complete section

- Enter comments if needed
- Products in Inventory Yes/No
- Check Acknowledge
- Click Exit to cancel
- Click save to complete the Acknowledgement

If product present in inventory is yes, then the Recovery workflow is Completed after the initiation of return or destruction workflow.

If product present in inventory is no, then the Recovery workflow is Completed.

Note: Upon completion of recovery workflow, a recovery email notification is sent to the associated Site PoR. A reminder email is automatically sent every 24 hours until initiation of return or destruction workflow.

The screenshot shows a web form titled 'Recovery' with a breadcrumb trail 'Home / Inventory / Recovery List / Recovery'. It contains a 'Comments' text area, a 'Status' dropdown menu set to 'Initiated', and a 'Products in Inventory' section with 'YES' and 'NO' radio buttons. There is an 'Acknowledge' checkbox with a red note 'Acknowledge is Mandatory' below it. At the bottom right are 'Save' and 'Exit' buttons.

The recovery workflow status is completed.

Section 4: Shipping

- Home

- Shipping
- Order Study Product
- Inventory

4.1 Order Study Product

Shipping starts when a Site Pharmacist places an order requesting materials. Once the order is submitted, CRPMC pharmacists and technicians process the order and ship the requested material to the site. The Site Pharmacist acknowledges the receipt of the order to complete the process.

SITE PHARMACIST places an Order:

Open the Order Study Product Page with a list of currently submitted orders.

Left Navigation panel → Shipping → Order Study Product

Click Request New Order

[+ Request New Order](#)

Enter Order Header details

- Protocol #
- Protocol Version
- CRS #
- Organization ID
- POR/Associate
- Date Required

Enter comments if needed

Scroll down to the Order Details section

Click Add New Products to Order

[+ Add New Products to Order](#)

Note: Use slide bar, there are more fields than will fit on the screen

- Select the Drug Name

The NSC number and shipping temperature will auto populate.

- Select the Strength/Dosage/U Issue/U Size
- No of Participants Ordering for
- Inventory at Site
- Quantity

Click the button to add the line to the order or the to delete the line
Repeat to add more products to the order

- Click on Submit Order to submit the order. **Note: Order cannot be edited or deleted after submitting the order.**
- Click Exit to cancel

Section 4: Shipping

Section 6: Appendix

6.1 Search and Filter Option in Grid

Grid Values can be sorted based on any of the information available in the grid in ascending or descending order by clicking the text in the column header. The arrowhead facing downwards  denotes descending order and vice versa.

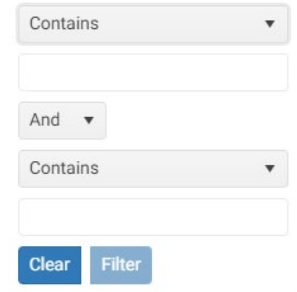

Grid Value details can also be filtered using the filter  option on the column header.

The filter option can be used to filter based on a single or two criteria. Select the parameters to filter and enter the data and Click filter. Click clear to clear filter.

The controls at the bottom of the grid can be used to navigate through the pages. The number of items displayed per page can be changed by selecting the number from the drop-down. The entire grid can be refreshed by clicking the refresh at the bottom right of the page.

Grid pagination controls showing page navigation (1, 2, 15 items per page) and a refresh button.

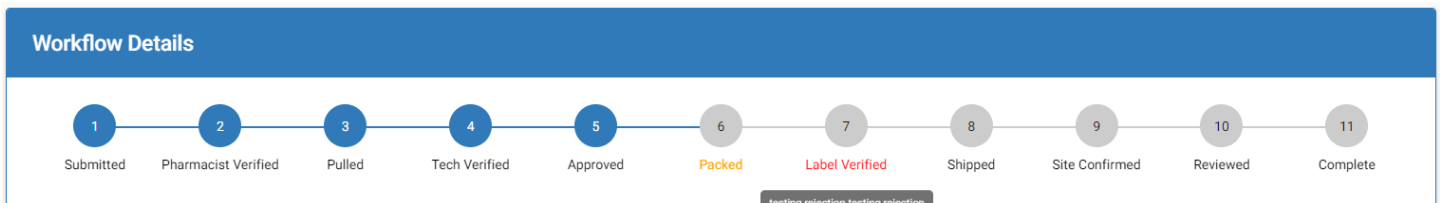

Filter controls showing two 'Contains' dropdown menus, an 'And' dropdown, and 'Clear' and 'Filter' buttons.

6.2 Workflow Details

Workflow Details box is present at the top of every page which involves a workflow. The step at which the lead line (blue line) ends is the step at which the current workflow is being executed/acted upon.

In case of rejection, then the step at which the workflow has been rejected is highlighted in red. Placing the cursor on the red words will display the Rejection Comments. The Leader line will terminate at the step to which the rejection has redirected the workflow.

3.0 Purpose

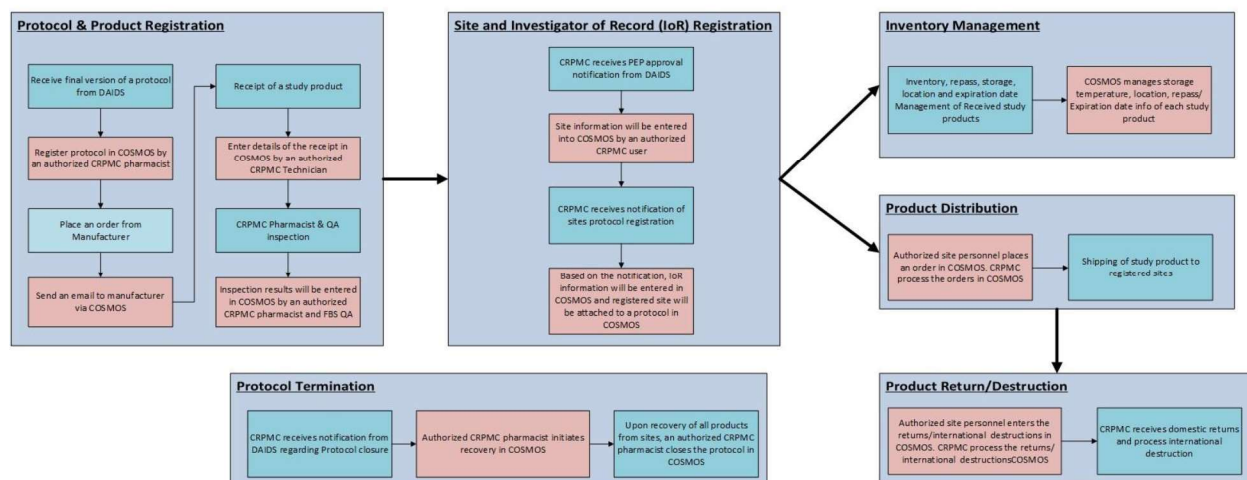

The purpose of this Configuration / Design Specification Document (DS) is to describe the configuration/design of the COSMOS solution for Clinical Research Products Management Center (NIAID-CRPMC) system.

4.0 CRPMC Business Summary

CRPMC supports the NIAID/DAIDS clinical research trials networks and programs in HIV/AIDS and its comorbidities, as well as tuberculosis and hepatitis C, carried out in the United States (U.S.) and international locations. The CRPMC provides cognitive pharmaceutical services including evaluating draft protocols, providing study product storage and stability information and study product management activities to clinical site pharmacists. Additionally, the CRPMC provides technical expertise for the receipt of study products, storage under cGMP, validate containers for the shipment of study products, evaluate orders, and distribute study products, design and labeling of study products and product kits, packaging and repackaging of study products under GMP, monitor product inventories and expiration dates, recall, and process of study product returns, and maintain a database to track study product activities.

CRPMC has the capabilities to carry out the scope of work defined by NIAID both domestically within the United States (U.S.) and internationally, including countries in Africa, Asia, South America, the Caribbean, and Europe. All functions are being conducted in accordance with federal, local, and international regulations governing study products. Below is high-level business process flow at CRPMC.

CRPMC High-Level Business Process

7.0 COSMOS –Notification Enhancement Overview

COSMOS was initially deployed on 22-OCT-2019 and the latest release will be deployed on 11thOctober 2025.

The new Cosmos notification feature is designed to send automated email reminders to both US and International study sites regarding the upcoming expiration dates of protocol products, based on their shipping distribution. These notifications will alert sites about products nearing expiration and prompt them to place an order for replacements through Cosmos if needed.

For **US sites**, email notifications will be sent 60 and 30 days prior to the expiration date of a protocol/product/strength/lot number combination. Once the expiration date has passed, notifications will cease. No acknowledgment from the site will be required. An audit trail will be available to track which sites received the notification and when it was sent.

For **International sites**, notifications will be sent 6 and 3 months before the expiration date for the same protocol/product/strength/lot number combinations. As with US sites, notifications will stop once the expiration date has passed, and no acknowledgment is required. An audit trail will also be available for proof of notification distribution.

This enhancement ensures timely communication with sites regarding critical product expiration dates while providing a reliable way to track and verify notification distribution.

An additional enhancement to the COSMOS notification service includes automated email alerts for GMO inventory. Sites holding Active or Reserved GMO inventory will receive notifications 90 days prior to the product's expiration date. Inventory-level notifications have also been introduced, triggering automated emails to pharmacists when inventory reaches 50%, 30%, 25%, and 20%. These updates further strengthen inventory oversight and ensure timely actions across all participating sites.

9.0 Software Description

The CRPMC Online Site Management and Ordering System (COSMOS) is a web-based application system which serves the Clinical Research Products Management Center (CRPMC) with the goal of providing a secure and validated computer system. It will also facilitate printing and extracting various reports.

COSMOS provides functionality including registration of drugs, sites, pharmacists, protocols manufacturers, receipt of study products and returned products, maintenance of inventory, product shipments, ordering study products, on-demand reports, DAIDS Label Approval, DAIDS COA Approval, Blinded Inspections, Batch Record Processing and Send Repass notifications.

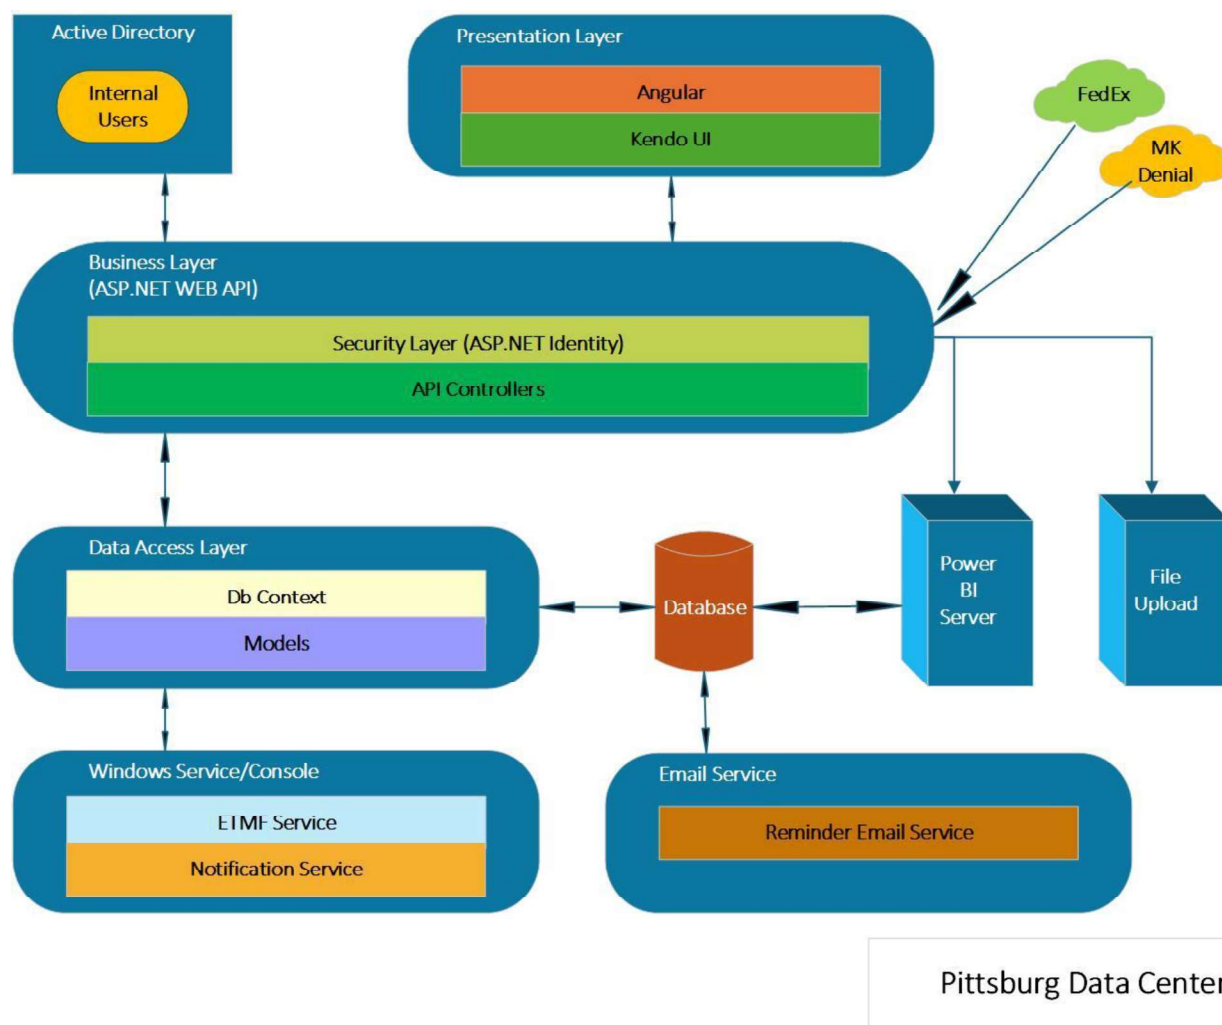

COSMOS can also act as an Inventory Management System that keeps track of distribution and returns of drugs, which involves receipt, storage, and shipment of study products. It also supports investigator, site, and protocol management. The protocol, the investigator requesting the shipment and the receiving site are validated for each line item on the study products requested on a web order by authorized site pharmacists. The returned drug module supports all activities involved with processing returned drugs including receipt, storage, and disposal of these drugs.

Below are the main modules associated with COSMOS:

1. Receiving
2. Registration
3. Order
4. Inventory
5. Shipping
6. Return
7. Batch Record
8. Metrics

Title: CRPMC Online Site Management and Ordering System (COSMOS) Configuration / Design Specification		Document ID: DS-012	Revision: V11.0
Document Type: Design Specification	Group: Pharma Services Group (PSG) / Clinical Trials Division (CTD)		Page: 21 of 124

10.0 Application Architecture

Description of the Architecture Diagram

COSMOS is a responsive web application developed using the following the major technologies and is hosted on Microsoft Windows 2019 Servers.

Front-End (UI)

Title: CRPMC Online Site Management and Ordering System (COSMOS) Configuration / Design Specification		Document ID: DS-012	Revision: V11.0
Document Type: Design Specification	Group: Pharma Services Group (PSG) / Clinical Trials Division (CTD)		Page: 22 of 124

- Angular
- Kendo UI

Back-End

- Web API (C#)
- Entity Framework (C#)

Database

- Microsoft SQL Server 2019

Reporting

- Microsoft Power BI

COSMOS is based on n-tier architecture with following tiers:

- Presentation Layer
- Business Layer
- Data Access Layer
- Database

COSMOS is a Single Page Application (SPA) which improves responsiveness and overall user experience. Reporting is developed using Microsoft Power BI, a business intelligence tool that makes it easier for users to create their own reports using data from COSMOS.

Presentation Layer

The presentation layer is where all the user views will reside. This layer determines how a page interacted by a user will look and behave.

The presentation layer or UI layer will be built with Angular to achieve SPA. Angular is a framework that provides out of the box functionality to build a single page application and a responsive UI. Kendo UI will be used to enhance the controls provided by Angular, both visually and functionally.

Business Layer

The Business layer contains the core functionality of the solution. All the business logic will be performed in this layer. This layer will decide what data needs to be passed to UI as well as accepts the data from the UI, manipulates it to store in the database. The security, exception handling and logging and auditing will be part of the business layer.

Title: CRPMC Online Site Management and Ordering System (COSMOS) Configuration / Design Specification		Document ID: DS-012	Revision: V11.0
Document Type: Design Specification	Group: Pharma Services Group (PSG) / Clinical Trials Division (CTD)		Page: 23 of 124

This layer will be built on ASP.NET WEB API 2 which is a framework that makes it easy to build HTTP services that serve a broad range of clients like desktops and mobiles.

The lists of services that will be built are:

1. Receiving
2. Registration
3. Order
4. Inventory
5. Shipping
6. Return
7. Batch Record
8. Metrics

Email Service

The Reminder Email Service scans COSMOS and sends reminder emails to site pharmacists for pending order and repass acknowledgements.

eTMF Service

The eTMF Service consists of a Windows Service and Console.

The Windows Service scans COSMOS database on a configurable frequency (default is daily), selects workflow records that have transitioned to completed status ('Complete', 'Completed' or 'Approved') during the configured period preceding the scan (default is previous day), processes these records and uploads to designated sFTP folders for the COSMOS-eTMF integration. The service also performs automated sFTP folder maintenance.

The Console provides administrator access to historical data and configuration parameters including the service scan period.

Notification Service

The new Cosmos notification feature sends automated email reminders to US and International study sites about upcoming product expiration dates.

For **US sites**, notifications are sent 60 and 30 days before expiration.

For **International sites**, notifications are sent 6 and 3 months before expiration. Notifications stop once the expiration date passes, and no site acknowledgment is required. An audit trail of notification distribution is available for tracking.

Title: CRPMC Online Site Management and Ordering System (COSMOS) Configuration / Design Specification		Document ID: DS-012	Revision: V11.0
Document Type: Design Specification	Group: Pharma Services Group (PSG) / Clinical Trials Division (CTD)		Page: 24 of 124

This feature ensures timely reminders for product replacements and provides verifiable proof of notification delivery.

The notification service now includes automated alerts for GMO expirations (90 days prior) and inventory thresholds (50%, 30%, 25%, 20%). Emails are sent to pharmacists, and real-time pop-ups are triggered during the Pharmacist Verified step in the Shipping Module to support timely inventory management.

Data Access Layer

The data access layer (DAL) is mainly responsible for communicating with the database. All the data flowing in and out of the database happens through the DAL.

DAL will be build using Microsoft Entity Framework 6.

Security

For security, the solution will be using ASP.NET Identity 2 as identity management framework with includes account management, role management, email confirmation, change password etc.

The UI will use token-based authentication to communicate with the WEB API.

The security framework will create a resource server that generates and provides the authentication token as well as authorization server, which will validate these tokens. The authentication server will use OAuth 2.0 authentication workflow.

Every Web API method used post authentication must be decorated with [Authorize] attribute so that only valid users with valid tokens can access these methods.

In COSMOS, when creating a user account each user is assigned a pre-defined user role. The user role determines the type of access (internal vs external) as well as the COSMOS functions to which the user will have access. Internal users (Thermo Fisher Scientific) are authenticated using the Thermo Fisher email account whereas external users (non Thermo Fisher Scientific) are authenticated using an email address and password of their choice.

COSMOS has 18 different pre-defined user roles including both internal and external, as listed by user roles and the permissions in Table 1 - User Roles.

Title: CRPMC Online Site Management and Ordering System (COSMOS) Configuration / Design Specification		Document ID: DS-012	Revision: V11.0
Document Type: Design Specification	Group: Pharma Services Group (PSG) / Clinical Trials Division (CTD)		Page: 27 of 124

Exception Handling and Logging

Exception handling and Logging in the solution will be achieved through log4net Nuget package and will be captured in a rolling file appender.

The logs and exceptions will be rolled every day with the help of datePattern attribute of the log4net configuration as follows

```
<appender name="RollingLogFileAppender"
type="log4net.RollingFileAppender">
<file value="logfile" />
<appendToFile value="true" />
<rollingStyle value="Date" />
<datePattern value="yyyyMMdd" />
</layout>
</appender>
```

The configuration for exception handling and logging will be done in the solution web.config.

Auditing

All modifications made to the solution, such as create, update, and delete will be audited. Auditing will be done using Entity Framework (EF) change tracking mechanism.

EF can track the changes happening to its model. This can be captured in the Db context and insert the records in the audit table.

The following details in the audit will be captured

1. Table being modified
2. Record being modified
3. Column being modified
4. Old value
5. New value
6. User modifying
7. Date of modification

Title: CRPMC Online Site Management and Ordering System (COSMOS) Configuration / Design Specification		Document ID: DS-012	Revision: V11.0
Document Type: Design Specification	Group: Pharma Services Group (PSG) / Clinical Trials Division (CTD)		Page: 28 of 124

11.0 Software Requirements

COSMOS will be built using the latest web technologies as follows:

Solution Tier	Technology	Version
Presentation layer	Angular Kendo UI	17 R3 2021
Business layer	ASP.NET WEB API ASP.NET Identity .NET Framework	2 2 4.5.1
Data Access Layer	Microsoft Entity framework	6
Reporting	Microsoft Power BI	2.49
Database	SQL Server	2019

Title: CRPMC Online Site Management and Ordering System (COSMOS) Configuration / Design Specification		Document ID: DS-012	Revision: V11.0
Document Type: Design Specification	Group: Pharma Services Group (PSG) / Clinical Trials Division (CTD)		Page: 29 of 124

12.0 Software Design

The following table maps the requirements to the software design specifications.

URS ID	DS ID	Description
7.1.1		The solution shall allow designated authorized users to add/change/deactivate the user roles in COSMOS.
	7.1.1.1	The solution shall provide the designated users to select from a list of roles to assign to a user as identified in Section 10.0 of this document.
7.1.2		Authorized users shall be able to access the User Registration module.
	7.1.2.1	The solution shall provide the following roles access to User Registration module CRPMC Pharmacist ICRPMC Pharmacist Site Admin
7.1.3		The solution shall provide user roles access based on internal or external user roles.
	7.1.3.1	The solution shall provide radio buttons to select Internal or External user role.
7.1.4		The solution shall provide ability to enter predefined attributes of the user roles.
7.1.5		The solution shall provide user roles access based on user job responsibility.
	7.1.4.1	The solution shall provide CRPMC, ICRPMC pharmacist to choose if a user is Site Admin.
	7.1.4.2	The solution shall provide CRPMC, ICRPMC pharmacist to choose if a user is Operation Supervisor
7.1.6		The solution shall prompt the authorized user role to enter their credentials to authorize any updates (Electronic Signature).
	7.1.6.1	The solution shall prompt the current user role to enter their password. This password will be authenticated against the user that is logged on to validate that the current user is the logged in user (Electronic Signature).
7.1.7		The solution shall provide a primary email field that is editable.
	7.1.7.1	The solution shall provide the CRPMC, ICRPMC Pharmacist, and Site Admin. The ability to edit the primary email field.
7.1.8		The solution shall provide fields for cell, office, phone and extension.
	7.1.8.1	The solution shall provide the CRPMC, ICRPMC Pharmacist, and Site Admin. The ability to edit the cell or office phone as well as extension.
7.1.9		The solution shall provide the following roles:

Title: CRPMC Online Site Management and Ordering System (COSMOS) Configuration / Design Specification		Document ID: DS-012	Revision: V11.0
Document Type: Design Specification	Group: Pharma Services Group (PSG) / Clinical Trials Division (CTD)		Page: 30 of 124

URS ID	DS ID	Description
		CRPMC Pharmacist DAIDS COR
		DAIDS Guest DAIDS Pharmacist Westat Visitor Site Pharmacy Technician Site Nurse Practitioner Site Non-Pharmacist Depot CRPMC Technician CRPMC QA Operations Supervisor Site PoR Site Associate Pharmacist ICRPMC Pharmacist ICRPMC Technician Site Admin
	7.1.9.1	The listed roles will be available in the Roles drop down menu.
7.1.10		The solution shall provide a comment field.
	7.1.10.1	The solution shall provide the CRPMC, ICRPMC Pharmacist, and Site Admin. The ability to add comments in the available field.
7.2.1		The solution shall offer means to register the Product data within COSMOS.
	7.2.1.1	The solution shall provide a Product Registration page.
7.2.2		The solution shall allow authorized users to have access to the Product Registration module.
	7.2.2.1	The solution shall allow the below users to edit the product details: CRPMC Pharmacist CRPMC Technician

Title: CRPMC Online Site Management and Ordering System (COSMOS) Configuration / Design Specification		Document ID: DS-012	Revision: V11.0
Document Type: Design Specification	Group: Pharma Services Group (PSG) / Clinical Trials Division (CTD)		Page: 31 of 124

URS ID	DS ID	Description
		ICRPMC Technician ICRPMC Pharmacist
	7.2.2.2	The solution shall allow the below users to read the product details: DAIDS Guest
7.2.3		The solution shall provide ability to authorized pharmacist user to enter the following: Product type Product name Product classification
	7.2.3.1	The solution shall provide ability to CRPMC pharmacist user role to select from the below product type: Drug Component Kit Device
	7.2.3.2	The solution shall provide ability to CRPMC pharmacist user role to enter the product name.
	7.2.3.3	The solution shall provide ability to CRPMC pharmacist user role to select the HTS number associated with the drug classification.
7.2.4		The solution shall have the ability to auto-generate the NSC in sequential order with defined prefix (Format for NSC: Device-999XXX, Component-800XXX, Product/Drug-900XXX, Logger-777XXX).
	7.2.4.1	The solution shall auto-generate the NSC for Device: 999XXX.
	7.2.4.2	The solution shall auto-generate the NSC for Component: 800XXX.
	7.2.4.3	The solution shall auto-generate the NSC for Product/Drug: 900XXX.
	7.2.4.4	The solution shall auto-generate the NSC for Logger: 777XXX.
7.3.1		The solution shall allow authorized user to register the manufacturer data within COSMOS.
	7.3.1.1	The solution shall provide a Manufacturer/Vendor Registration page.

Title: CRPMC Online Site Management and Ordering System (COSMOS) Configuration / Design Specification		Document ID: DS-012	Revision: V11.0
Document Type: Design Specification	Group: Pharma Services Group (PSG) / Clinical Trials Division (CTD)		Page: 32 of 124

URS ID	DS ID	Description
7.3.2		The solution shall allow authorized users to have access to the Manufacturer/Vendor Registration module.
	7.3.2.1	The solution shall provide the manufacturer registration page access to the following roles: CRPMC Pharmacist CRPMC Technician ICRPCM Pharmacist ICRPMC Technician
7.3.3		The solution shall provide ability to authorized technician users to select either manufacturer or vendor registration.
	7.3.3.1	The solution shall provide ability to CRPMC technician user role to select either manufacturer or vendor registration.
7.3.4		The solution shall provide ability to authorized technician users to enter details of the manufacturer or vendor.
	7.3.4.1	The solution shall provide ability to CRPMC technician user role to enter manufacturer code.
	7.3.4.2	The solution shall provide ability to CRPMC technician user role to enter manufacturer name.
	7.3.4.3	The solution shall provide ability to CRPMC technician user role to enter comments.
7.3.5		The solution shall provide ability to authorized technician users to add multiple contacts for each manufacturer or vendor.
	7.3.5.1	The solution shall provide ability to CRPMC technician user role to add multiple addresses
	7.3.5.2	The solution shall provide ability to CRPMC technician user role to add address lines
	7.3.5.3	The solution shall provide ability to CRPMC technician user role to add street name
	7.3.5.4	The solution shall provide ability to CRPMC technician user role to add city
	7.3.5.5	The solution shall provide ability to CRPMC technician user role to add state
	7.3.5.6	The solution shall provide ability to CRPMC technician user role to add zip code
	7.3.5.7	The solution shall provide ability to CRPMC technician user role to add country
	7.3.5.8	The solution shall provide ability to CRPMC technician user role to add multiple email IDs.
	7.3.5.9	The solution shall provide ability to CRPMC technician user role to add primary email ID.
	7.3.5.10	The solution shall provide ability to CRPMC technician user role to add secondary email ID

Title: CRPMC Online Site Management and Ordering System (COSMOS) Configuration / Design Specification		Document ID: DS-012	Revision: V11.0
Document Type: Design Specification	Group: Pharma Services Group (PSG) / Clinical Trials Division (CTD)		Page: 33 of 124

URS ID	DS ID	Description
	7.3.5.11	The solution shall provide ability to CRPMC technician user role to add multiple contact details
	7.3.5.12	The solution shall provide ability to CRPMC technician user role to add phone number.
	7.3.5.13	The solution shall provide ability to CRPMC technician user role to add fax number.
	7.3.5.14	The solution shall provide ability to CRPMC technician user role to add extension.
7.4.1		The solution shall allow authorized users to register the Protocol data within COSMOS
	7.4.1.1	The solution shall provide a page to register a new protocol
7.4.2		The solution shall allow authorized users to have access to the Protocol Registration module.
	7.4.2.1	The solution shall provide access to the following roles to create or edit the protocol registration data: CRPMC Pharmacist ICRPMC Pharmacist Site Admin
7.4.3		The solution shall provide ability to authorized pharmacist users to enter pre-defined protocol header attributes.
	7.4.3.1	The solution shall provide ability to CRPMC pharmacist user role to enter Protocol Number.
	7.4.3.2	The solution shall provide ability to CRPMC pharmacist user role to select protocol status from the following values: Active Pending Closed
	7.4.3.3	The solution shall provide ability to CRPMC pharmacist user role to enter IND number.
	7.4.3.4	The solution shall provide ability to CRPMC pharmacist user role to enter project accrual.
	7.4.3.5	The solution shall provide ability to CRPMC pharmacist user role to enter project duration.
	7.4.3.6	The solution shall display the protocol title (protocol number) in the header.
	7.4.3.7	The solution shall provide ability to CRPMC pharmacist user role to enter protocol description

Title: CRPMC Online Site Management and Ordering System (COSMOS) Configuration / Design Specification		Document ID: DS-012	Revision: V11.0
Document Type: Design Specification	Group: Pharma Services Group (PSG) / Clinical Trials Division (CTD)		Page: 34 of 124

URS ID	DS ID	Description
	7.4.3.8	The solution shall provide ability to CRPMC pharmacist user role to enter protocol start date
	7.4.3.9	The solution shall provide ability to CRPMC pharmacist user role to enter protocol end date
7.4.4		The solution shall offer means to authorized pharmacist users to enter details related to protocol versioning and capabilities required for the protocol product storage.
	7.4.4.1	The solution shall provide ability to CRPMC pharmacist user role to enter protocol version.
	7.4.4.2	The solution shall provide the ability to the CRPMC pharmacist user role to enter version status from the below options: Active Pending Closed
	7.4.4.3	The solution shall restrict the version status from being Active if the protocol status is not Active.
	7.4.4.4	The solution shall change all the version status to Closed if the protocol version is closed.
	7.4.4.5	The solution shall provide ability to CRPMC pharmacist user role to select protocol capabilities.
7.4.5		The solution shall provide the ability to the authorized pharmacist users to enter predefined product details related to protocol and upload document received from DAIDS in PDF format related to protocol.
	7.4.5.1	The solution shall provide the ability to the CRPMC pharmacist user role to associate a product with the protocol.
	7.4.5.2	The solution shall provide the ability to the CRPMC pharmacist user role to select products from a list of NSCs.
	7.4.5.3	The solution shall auto populate product names based on the selected NSCs.
	7.4.5.4	The solution shall provide the ability to the CRPMC pharmacist user role to enter product unit value.
	7.4.5.5	The solution shall provide the ability to the CRPMC pharmacist user role to select a list of manufacturers based on the products selected.
	7.4.5.6	The solution shall provide the ability to the CRPMC pharmacist user role to enter the DRL quantity.
	7.4.5.7	The solution shall provide the ability to the CRPMC pharmacist user role to enter DRL date.
	7.4.5.8	The solution shall provide the ability to the CRPMC pharmacist user role to upload DRL letter

Title: CRPMC Online Site Management and Ordering System (COSMOS) Configuration / Design Specification		Document ID: DS-012	Revision: V11.0
Document Type: Design Specification	Group: Pharma Services Group (PSG) / Clinical Trials Division (CTD)		Page: 35 of 124

URS ID	DS ID	Description
7.4.6		The solution shall offer means to authorized pharmacist users to access product registration page from protocol registration page.
	7.4.6.1	The solution shall provide a link to the product registration page in the protocol registration page.
7.4.7		The solution shall provide the ability to authorized users to select sites associated with a particular protocol.
	7.4.7.1	The solution shall provide the ability to CRPMC user role to add new sites to the protocol.
	7.4.7.2	The solution shall provide the ability to CRPMC user role to update sites for a protocol.
	7.4.7.3	The solution shall provide the ability to CRPMC user role to enter Site MTA date.
	7.4.7.4	The solution shall provide the ability to CRPMC user role to enter Site LOA date.
	7.4.7.5	The solution shall provide the ability to CRPMC user role to enter Site LOU date.
7.4.8		The solution shall restrict site and protocol linking if the site's capabilities do not match the protocol version capabilities.
	7.4.8.1	The solution shall restrict site and protocol linking if the site's capabilities do not match the protocol version capabilities.
7.4.9		The solution shall provide the ability for authorized users to select the Investigator for a particular site and protocol.
	7.4.9.1	The solution shall provide the ability for authorized users to select the Investigator for a particular site and protocol.
7.4.10		The solution shall provide the option to add new Additional Fields as free text fields.
	7.4.10.1	The solution shall provide the option to add new Additional Fields as free text.
7.4.11		The solution shall provide the option to enter details in information fields.
	7.4.11.1	The solution shall provide the Authorized users to enter details into the information field and information length.
	7.4.11.2	The information length will only be numeric.
7.4.12		The solution shall have the ability to initiate recovery workflow when: 1. The protocol is closed 2. Site is deregistered from any protocol
	7.4.12.1	The solution shall initiate recovery workflow for the site deregistered from the protocol.

Title: CRPMC Online Site Management and Ordering System (COSMOS) Configuration / Design Specification		Document ID: DS-012	Revision: V11.0
Document Type: Design Specification	Group: Pharma Services Group (PSG) / Clinical Trials Division (CTD)		Page: 36 of 124

URS ID	DS ID	Description
	7.4.12.2	The solution shall send a recovery notification for the site being deregistered.
	7.4.12.3	The solution shall initiate recovery workflow for all the sites if a protocol is closed.
	7.4.12.4	The solution shall send recovery notifications for all the sites associated with the protocol being closed.
7.4.13		The solution shall provide within Protocol Details a drop-down field for Networks which may be populated with multiple entries.
	7.4.13.1	The solution shall provide a drop-down field containing registered Networks where at least one selection is required.
	7.4.13.2	The solution shall provide the ability to apply more than one Network to the Protocol Details section.
7.4.14		The solution shall display IoR Number next to the investigator name, columns including: PoR, Pharmacist, Non-Pharmacist.
	7.4.14.1	The solution shall display the IoR Number next to the Investigator name once the Investigator has been added to the Sites line item.
	7.4.14.2	The solution shall display the Pharmacist and Non-Pharmacist in an un-editable display when PoR has been selected.
7.4.15		The solution shall provide email notification when protocol registration status is changed within the Sites grid.
	7.4.15.1	The solution shall provide an email notification when a particular Site's status has been changed from Inactive to Active.
7.4.16		The solution shall permit authorized users the ability to deregister a site.
	7.4.16.1	The solution shall prompt the authorized user to upload a 'CRS Dereg Upload' file upon selecting the Deregister Site button.
7.4.17		The solution shall initiate a recovery workflow when a site is deregistered and contains inventory.
	7.4.17.1	The solution shall initiate a recovery workflow when a site is deregistered and contains inventory.
7.4.18		The solution shall generate email notification when a recovery workflow is initiated.
	7.4.18.1	The solution shall generate email notification when a recovery workflow is initiated.
7.5.1		The solution shall allow user roles to register the site data within COSMOS.
	7.5.1.1	The solution shall provide a page for registering new sites with CRPMC.
7.5.2		The solution shall allow authorized users roles to have access to the Site Registration module.
	7.5.2.1	The solution shall provide the following role to add/edit sites:

Title: CRPMC Online Site Management and Ordering System (COSMOS) Configuration / Design Specification		Document ID: DS-012	Revision: V11.0
Document Type: Design Specification	Group: Pharma Services Group (PSG) / Clinical Trials Division (CTD)		Page: 37 of 124

URS ID	DS ID	Description
		CRPMC Pharmacist CRPMC Technician ICRPCM Pharmacist ICRPMC Technician Site Admin
7.5.3		The solution shall provide the ability to technician users to enter pre-defined site attributes.
	7.5.3.1	The solution shall provide the ability to the technician user role to enter Site number.
	7.5.3.2	The solution shall provide the ability to the technician user role to enter Org ID.
	7.5.3.3	The solution shall provide the ability to the technician user role to select status from the below values: Active Inactive
	7.5.3.4	The solution shall provide the ability to the technician user role to enter Inactive date in case site is inactive
	7.5.3.5	The solution shall provide the ability to the technician user role to enter the site name.
	7.5.3.6	The solution shall provide the ability to the technician user role to enter a phone number
	7.5.3.7	The solution shall provide the ability to the technician user role to enter a fax number
	7.5.3.8	The solution shall provide the ability to the technician user role to enter an extension
	7.5.3.9	The solution shall provide the ability to the technician user role to enter physical address of the site.
	7.5.3.10	The solution shall provide the ability to the technician user role to enter mailing address of the site.
	7.5.3.11	The solution shall provide the ability to the technician user role to enter the shipping address of the site.
7.5.4		The solution shall offer means to register new networks.
	7.5.4.1	The solution shall offer means to register a new network.
	7.5.4.2	The solution shall not allow to add a duplicate network.
	7.5.4.3	The solution shall allow to enter a status for the network.
	7.5.4.4	The solution shall allow to choose a pharmacist of record for a network.
7.5.5		The solution shall offer means to add one or many Associate Pharmacists for each Pharmacist of Record.

Title: CRPMC Online Site Management and Ordering System (COSMOS) Configuration / Design Specification		Document ID: DS-012	Revision: V11.0
Document Type: Design Specification	Group: Pharma Services Group (PSG) / Clinical Trials Division (CTD)		Page: 38 of 124

URS ID	DS ID	Description
	7.5.5.1	The solution shall provide a list of users that can be associated as Associate Pharmacist for each PoR.
	7.5.5.2	The solution shall provide a list of registered Depot users that can be associated as Associate Non-Pharmacist/Depot.
7.5.6		The solution shall offer means to register new capabilities.
	7.5.6.1	The solution shall provide a list of capabilities that can be associated with a site.
7.5.7		The solution shall prompt the authorized users to enter their credentials to authorize any updates (Electronic Signature).
	7.5.7.1	The solution shall prompt the current user role to enter their password. This password will be authenticated against the user that is logged on to validate that the current user is the logged in user (Electronic Signature).
7.5.8		The solution shall ensure the ORG ID and CRS # are unique within a site registration.
	7.5.8.1	The solution shall ensure the ORG ID and CRS # are unique within a site registration.
7.5.9		The solution shall allow entry of "Pharmacist of Record," "Associate Pharmacist" and "Associate Non-Pharmacist/Depot".
	7.5.9.1	The solution shall require the entry of a Pharmacist of Record for each Network entry for a CRS (Clinical Research Site).
7.6.1		The solution shall allow authorized users to register Investigator within COSMOS.
	7.6.1.1	The solution shall provide an Investigator Registration page.
7.6.2		The solution shall allow authorized users to have access to the Investigator Registration module.
	7.6.2.1	The solution shall provide the following users access to investigator registration page: CRPMC Pharmacist CRPMC Technician ICRPMC Pharmacist ICRPMC Technician Site Admin
7.6.3		The solution shall provide the ability to authorized users to enter pre-defined Investigator attributes.
	7.6.3.1	The solution shall provide the ability to CRPMC technician user roles to enter investigator ID.
	7.6.3.2	The solution shall provide the ability to CRPMC technician user roles to enter investigator first name.
	7.6.3.3	The solution shall provide the ability to CRPMC technician user roles to enter investigator last name.

Title: CRPMC Online Site Management and Ordering System (COSMOS) Configuration / Design Specification		Document ID: DS-012	Revision: V11.0
Document Type: Design Specification	Group: Pharma Services Group (PSG) / Clinical Trials Division (CTD)		Page: 39 of 124

URS ID	DS ID	Description
	7.6.3.4	The solution shall provide the ability to CRPMC technician user roles to select a status from the below values: Active Inactive
7.6.4		The solution shall display the Investigator attributes to authorized users: Pharmacist, technician, operations supervisor and site administrator.
	7.6.4.1	The solution shall display to the CRPMC pharmacist role the Investigator attributes
7.7.1		The solution shall offer means to enter receiving product details within COSMOS.
	7.7.1.1	The solution shall provide a page for entering received packaging details.
	7.7.1.2	The solution shall provide a page for entering received product details.
	7.7.1.3	The solution shall provide a page for Pharmacist to review the receiving details entered.
	7.7.1.4	The solution shall provide a page for QA to approve the receiving details entered.
7.7.2		The solution shall allow authorized users to have access to the Receiving module.
	7.7.2.1	The solution shall provide access to the receiving module for the following roles: CRPMC Pharmacist CRPMC Technician CRPMC QA CRPMC Operations Supervisor ICRPMC Pharmacist ICRPMs Technician
7.7.3		The solution shall provide ability to technician user role to enter pre-defined Receiving Header related data attributes.
	7.7.3.1	The solution shall provide ability to technician user role to select the receipt type from the below options for Logger receiving: New Receiving Logger Return NOTE: For regular product receipt the receipt type is always New Receiving.
	7.7.3.2	The solution shall auto-generate the receipt number with the following logic:

Title: CRPMC Online Site Management and Ordering System (COSMOS) Configuration / Design Specification		Document ID: DS-012	Revision: V11.0
Document Type: Design Specification	Group: Pharma Services Group (PSG) / Clinical Trials Division (CTD)		Page: 40 of 124

URS ID	DS ID	Description
		YYYYMMDD<counter> Where: YYYY – current year MM – current month DD – present day <counter> – auto-incremented number
	7.7.3.3	The solution shall provide ability to technician user role to select receiving location from the below options: CRPMC – USA ICRPMC – South Africa
	7.7.3.4	The solution shall provide ability to technician user role to enter the Receiving date.
	7.7.3.5	The solution shall provide ability to technician user role to enter number of full packages received.
	7.7.3.6	The solution shall provide ability to technician user role to enter number of partial packages received.
	7.7.3.7	The solution shall provide ability to technician user role to select the manufacturer of the received packages.
	7.7.3.8	If the manufacturer is not available, the solution shall provide ability to technician user role to register a new manufacturer from the same page.
	7.7.3.9	The solution shall provide ability to technician user role to select the courier services from the below options: FedEx World Courier DHL
	7.7.3.10	The solution shall automatically record the user ID.
	7.7.3.11	The solution shall automatically record the entry date.
	7.7.3.12	The solution shall automatically record the user ID if the record is modified.
	7.7.3.13	The solution shall automatically record the modification date if the record is modified.

Title: CRPMC Online Site Management and Ordering System (COSMOS) Configuration / Design Specification		Document ID: DS-012	Revision: V11.0
Document Type: Design Specification	Group: Pharma Services Group (PSG) / Clinical Trials Division (CTD)		Page: 41 of 124

URS ID	DS ID	Description
	7.7.3.14	The solution shall provide ability to technician user role to enter comments on the packaging condition and the ability to upload packaging list
7.7.4		The solution shall provide ability to technician user role to enter pre-defined Receiving Details related data attributes.
	7.7.4.1	The solution shall provide ability to technician user role to enter the NSC number.
	7.7.4.2	The solution shall provide ability to technician user role to enter the product name.
	7.7.4.3	The solution shall auto suggest the product names after typing 3 letters.
	7.7.4.4	The solution shall provide ability to technician user role to register a new product if the product does not exist.
	7.7.4.5	The solution shall provide ability to technician user role to enter the associated protocol
	7.7.4.6	The solution shall auto suggest the protocol name after typing 3 letters.
	7.7.4.7	The solution shall provide ability to technician user role to select one of the below product types Drug Component
	7.7.4.8	When Product Name is entered, and Product Type is “Drug” the system auto-fills the Strength/Dosage/Volume/Size fields.
	7.7.4.9	When Product Name is entered, and Product Type is “Component” the users will have the ability to select from a Unit of Issue/ Unit Size option: Unit of Issue Unit Size
	7.7.4.10	The solution shall provide ability to technician user role to select if the lot is new or not
	7.7.4.11	If the lot is new, the solution shall provide ability to technician user role to upload the COA document
	7.7.4.12	If the Lot is not new, the solution shall auto populate the previously approved COA date
	7.7.4.13	Sample number will be auto-generated by the solution.
	7.7.4.14	The solution shall provide ability to technician user role to add Expiration Date
	7.7.4.15	The solution shall provide ability to technician user role to add Manufacture Date
	7.7.4.16	The solution shall provide ability to technician user role to add Retest Date

Title: CRPMC Online Site Management and Ordering System (COSMOS) Configuration / Design Specification		Document ID: DS-012	Revision: V11.0
Document Type: Design Specification	Group: Pharma Services Group (PSG) / Clinical Trials Division (CTD)		Page: 42 of 124

URS ID	DS ID	Description
	7.7.4.17	The solution shall provide ability to technician user role to enter NDC number.
	7.7.4.18	The solution shall provide ability to technician user role to enter the number of full cases received.
	7.7.4.19	The solution shall provide ability to technician user role to enter the quantity in a full case.
	7.7.4.20	The solution shall provide ability to technician user role to enter the number of partial cases received.
	7.7.4.21	The solution shall provide ability to technician user role to enter the quantity in the partial case.
	7.7.4.22	The solution shall display total quantity received
	7.7.4.23	The solution shall provide ability to technician user role to select if the drug is already ordered from manufacturer
	7.7.4.24	The solution shall auto populate the quantity ordered if the drug is already ordered from the manufacturer.
7.7.5		The solution shall provide ability to technician user role to add multiple products under the same receiving form.
	7.7.5.1	The solution shall display list for products added to the receiving form.
	7.7.5.2	The solution shall provide an option to add new product to the receiving form.
	7.7.5.3	The solution shall provide an option to edit an existing product in the receiving form.
	7.7.5.4	The solution shall provide an option to delete a product from the receiving form.
7.7.6		The solution shall provide ability to technician user role to enter pre-defined storage location related data attributes.
	7.7.6.1	The solution shall provide ability to technician user role to enter freezer related data
	7.7.6.2	The solution shall provide ability to technician user role to enter rack related data.
	7.7.6.3	The solution shall provide ability to technician user role to enter shelf related data.
	7.7.6.4	The solution shall provide ability to technician user role to enter box related data.
	7.7.6.5	The solution shall provide ability to technician user role to select storage temperature
	7.7.6.6	The solution shall provide ability to technician user role to select shipping temperature
7.7.7		The solution shall provide ability to technician user role to enter pre-defined ANSI Inspection related data attributes

Title: CRPMC Online Site Management and Ordering System (COSMOS) Configuration / Design Specification		Document ID: DS-012	Revision: V11.0
Document Type: Design Specification	Group: Pharma Services Group (PSG) / Clinical Trials Division (CTD)		Page: 43 of 124

URS ID	DS ID	Description
	7.7.7.1	The solution shall provide ability to technician user role to enter the ANSI Inspection type
	7.7.7.2	The solution shall auto populate the recommended inspection quantity
	7.7.7.3	The solution shall provide ability to technician user role to enter the inspected quantity
	7.7.7.4	The solution shall capture the username of the inspecting technician
	7.7.7.5	The solution shall capture the inspection date
7.7.8		The solution shall provide ability to pharmacist user role to enter details in the predefined pharmacist section related data attributes
	7.7.8.1	The solution shall provide ability to pharmacist user role select if the product is blinded or not
	7.7.8.2	The solution shall provide ability to pharmacist user role to navigate to Blinded Inspection page if the product is blinded
	7.7.8.3	The solution shall provide ability to pharmacist user role to select if COA is required
	7.7.8.4	The solution shall provide ability to pharmacist user role to upload COA documents if COA is required
	7.7.8.5	The solution shall provide ability to pharmacist user role to email the manufacturer requesting for COA documents if COA is required
	7.7.8.6	The solution shall provide ability to pharmacist user role to select if SDS is required
	7.7.8.7	The solution shall provide ability to pharmacist user role to upload SDS documents if SDS is required
	7.7.8.8	The solution shall provide ability to pharmacist user role to select if the auxiliary label is required
	7.7.8.9	The solution shall provide ability to pharmacist user role to navigate to Batch record page
	7.7.8.10	The solution shall prompt the pharmacist user role if he wants to create or edit batch record
	7.7.8.11	The solution shall provide ability to pharmacist user role to enter the status
	7.7.8.12	The solution shall provide ability to pharmacist user role to enter general comments
7.7.9		The solution shall provide ability to pharmacist user role to initiate Blinded Inspection and/or COA workflows from receiving form.
	7.7.9.1	The solution shall provide the ability for an authorized user to initiate the Blinded Inspection workflow.
	7.7.9.2	The solution shall provide the ability for an authorized user to initiate the COA workflow.

Title: CRPMC Online Site Management and Ordering System (COSMOS) Configuration / Design Specification		Document ID: DS-012	Revision: V11.0
Document Type: Design Specification	Group: Pharma Services Group (PSG) / Clinical Trials Division (CTD)		Page: 44 of 124

URS ID	DS ID	Description
7.7.10		The solution shall provide ability to pharmacist user role to review and approve the receiving form
	7.7.10.1	The solution shall provide ability to pharmacist user role to view a list of the receiving forms to be reviewed for Receiving Drug Product
	7.7.10.2	The solution shall provide ability to pharmacist user role to approve a receiving form in the pharmacist review section for Receiving Drug Product.
7.7.11		The solution shall provide ability to QA user role to approve/reject the receiving form.
	7.7.11.1	The solution shall provide ability to QA user role to enter the ANSI Inspection type.
	7.7.11.2	The solution shall auto populate the recommended inspection quantity
	7.7.11.3	The solution shall provide ability to QA user role to enter the inspected quantity
	7.7.11.4	The solution shall capture the username of the inspecting QA
	7.7.11.5	The solution shall capture the QA inspection date
7.7.12		The solution shall prompt the authorized user role to enter their credentials to authorize any updates (Electronic Signature).
	7.7.12.1	The solution shall prompt the current user role to enter their password. This password will be authenticated against the user that is logged on to validate that the current user is the logged in user (Electronic Signature).
7.7.13		Authorized users shall be able to view and register product during a receipt
	7.7.13.1	Authorized users shall be able to view and register product during a receipt
7.7.14		The solution shall provide the ability to authorized pharmacist user role to send email to the manufacturer for COA product receipt
	7.7.14.1	The solution shall provide the ability to send an email to the Manufacturer when the 'Is COA Available' response is 'No'.
7.8.1		The solution shall allow authorized users to enter Product Blinded form details within the COSMOS
	7.8.1.1	The solution shall provide a page to Pharmacist user role for entering Product Blinded form details
	7.8.1.2	The solution shall provide a page for second Pharmacist user role to review and approve or reject the Product Blinded form.
7.8.2		The solution shall allow authorized users roles to have access to the Product Blinded form
	7.8.2.1	The solution shall provide access to the Blinded form module for the following roles CRPMC Pharmacist

Title: CRPMC Online Site Management and Ordering System (COSMOS) Configuration / Design Specification		Document ID: DS-012	Revision: V11.0

URS ID	DS ID	Description
		ICRPMC Pharmacist
7.8.3		The solution shall provide the ability for an authorized Pharmacist user role to enter pre-defined product related attributes.
	7.8.3.1	The solution shall display Product name.
	7.8.3.2	The solution shall display Product Strength.
	7.8.3.3	The solution shall display NSC number of the product
	7.8.3.4	The solution shall display Lot number of the product
	7.8.3.5	The solution shall display Expiry Date of the product
	7.8.3.6	The solution shall provide ability to Pharmacist user role to select check box whether the Comparison is done with New Lot or Previous Lot.
	7.8.3.7	The solution shall display Lot number if Previous lot is selected.
	7.8.3.8	The solution shall provide ability to Pharmacist user role to select Lot number from dropdown if New lot is selected.
	7.8.3.9	The solution shall provide ability to Pharmacist user role to select Sample number dropdown.
7.8.4		The solution shall provide the ability for an authorized pharmacist user role to enter details of product for comparison.
	7.8.4.1	The solution shall provide ability to Pharmacist user role to select Lot number.
	7.8.4.2	The solution shall provide ability to Pharmacist user role to select Sample number.
	7.8.4.3	The solution shall display Product name based on the Sample number selected.
	7.8.4.4	The solution shall display Product Strength based on the Sample number selected.
7.8.5		The solution shall provide the ability for an authorized user role to enter comparison details
	7.8.5.1	The solution shall provide ability to Pharmacist user role to compare Products overall appearance and enter comparison details for the following: Package Size and Shape
		Neck Size for Bottles Seal Closure

Title: CRPMC Online Site Management and Ordering System (COSMOS) Configuration / Design Specification		Document ID: DS-012	Revision: V11.0
Document Type: Design Specification	Group: Pharma Services Group (PSG) / Clinical Trials Division (CTD)		Page: 46 of 124

URS ID	DS ID	Description
		Cotton/Coil
	7.8.5.2	The solution shall provide ability to Pharmacist user role to compare Products Description and enter comparison details for the following: Appearance Markings Size Smell
	7.8.5.3	The solution shall provide ability to Pharmacist user role to compare Products Label and enter comparison details for the following: Appearance Dimensions Text Font size/style
	7.8.5.4	The solution shall provide ability to Pharmacist user role to compare Products for other differences and enter comparison details.
7.8.6		The solution shall display the blinded form to an authorized second Pharmacist
	7.8.6.1	The solution shall provide ability to second Pharmacist user role to verify the comparison details
7.8.7		The solution shall provide the ability for the authorized second pharmacist to approve or reject the form
	7.8.7.1	The solution shall provide ability to second Pharmacist user role to verify and approve the form. Upon approval the form is updated to Complete.
	7.8.7.2	The solution shall provide ability to second Pharmacist user role to verify reject the form. Upon rejection the form is returned to the Pharmacist.
7.8.8		The solution shall prompt the authorized user role to enter their credentials to authorize any updates (Electronic Signature).
	7.8.8.1	The solution shall prompt the current user role to enter their password. This password will be authenticated against the user that is logged on to validate that the current user is the logged in user (Electronic Signature).
7.9.1		The solution shall allow user to enter Batch Records details within COSMOS
	7.9.1.1	The solution shall provide a page to Pharmacist user role for creating label
	7.9.1.2	The solution shall provide a page to Pharmacist user role to send email to DAIDS for label approvals

Title: CRPMC Online Site Management and Ordering System (COSMOS) Configuration / Design Specification		Document ID: DS-012	Revision: V11.0
Document Type: Design Specification	Group: Pharma Services Group (PSG) / Clinical Trials Division (CTD)		Page: 47 of 124

URS ID	DS ID	Description
	7.9.1.3	The solution shall provide a page for DAIDS Pharmacist user role to verify and approve labels.
	7.9.1.4	The solution shall display total labeled quantity and remaining quantity to be labeled.
	7.9.1.5	The solution shall provide a page to Pharmacist user role to enter Label Inspection Details
	7.9.1.6	The solution shall provide a page to Pharmacist user role to approve batch record
	7.9.1.7	The solution shall provide a page to Technician user role to enter Operation Section details
	7.9.1.8	The solution shall provide a page to Operation Supervisor user role to enter Accountability Section details
	7.9.1.9	The solution shall provide a page to QA user role to approve batch record
7.9.2		The solution shall allow authorized users roles to have access to the Batch Record module
	7.9.2.1	The solution shall provide access to the Batch Record module for the following roles: CRPMC Pharmacist CRPMC Technician CRPMC QA Operation Supervisor ICRPMC Pharmacist ICRPMC Technician Site Admin
7.9.3		The solution shall have the ability to auto-populate the information from the receiving data in the header section when initiated from order receiving
	7.9.3.1	The solution shall display the NSC number from the receiving data in the header section
	7.9.3.2	The solution shall display the Product Name from the receiving data in the header section
	7.9.3.3	The solution shall display the Manufacturer from the receiving data in the header section
	7.9.3.4	The solution shall display the Lot number from the receiving data in the header section
	7.9.3.5	The solution shall display the Quantity Received from the receiving data in the header section

Title: CRPMC Online Site Management and Ordering System (COSMOS) Configuration / Design Specification		Document ID: DS-012	Revision: V11.0
Document Type: Design Specification	Group: Pharma Services Group (PSG) / Clinical Trials Division (CTD)		Page: 48 of 124

URS ID	DS ID	Description
	7.9.3.6	The solution shall display the Protocol Number from the receiving data in the header section
	7.9.3.7	The solution shall display the Batch Number from the receiving data in the header section
	7.9.3.8	The solution shall display the Sample Number from the receiving data in the header section
7.9.4		The solution shall provide ability to the authorized pharmacist to create the label
	7.9.4.1	The solution shall provide button option to the Pharmacist user to create the label
7.9.5		The solution shall disable label printing until DAIDS approval has been obtained
	7.9.5.1	The solution shall provide ability to the Pharmacist user to send label for DAIDS Approval
7.9.6		The solution shall provide the ability to authorized Pharmacist user role to select preexisting DAIDS approval from the available label approvals
	7.9.6.1	The solution shall provide the ability to the Pharmacist to select check box whether DAIDS Label Approval Available. Yes No
	7.9.6.2	The solution shall provide the ability to the Pharmacist to upload approval received from DAIDS, if available
	7.9.6.3	The solution shall provide the ability to the Pharmacist to get approval received from DAIDS if not available
7.9.7		The solution shall provide the ability to DAIDS Pharmacist to verify and approve the labels
	7.9.7.1	The solution shall provide the button option to DAIDS Pharmacist user role to verify and approve the labels. The final label approval is done by the DAIDS COR user role
7.9.8		The solution shall provide the ability to authorized Pharmacist user role to enter predefined details in the printing section.
	7.9.8.1	The solution shall provide the ability to the Pharmacist user to select Labels Provided details from dropdown Vendor In-house
	7.9.8.2	The solution shall provide the ability to the Pharmacist user to enter Quantity to Label. Quantity cannot exceed the quantity remaining (Total Received - Total Labelled = Total Remaining)

Title: CRPMC Online Site Management and Ordering System (COSMOS) Configuration / Design Specification		Document ID: DS-012	Revision: V11.0
Document Type: Design Specification	Group: Pharma Services Group (PSG) / Clinical Trials Division (CTD)		Page: 49 of 124

URS ID	DS ID	Description
	7.9.8.3	The solution shall provide display the Total Remaining Quantity.
	7.9.8.4	The solution shall provide the ability to the Operations Supervisor user to enter Start Date
	7.9.8.5	The solution shall provide the ability to the Operations Supervisor user to enter End Date
	7.9.8.6	The solution shall display Pharmacist username based on the user who has logged in automatically
	7.9.8.7	The solution shall display Current date as Label Date when it is submitted automatically.
	7.9.8.8	The solution shall provide the ability to the Pharmacist user to enter Total Labels Printed.
	7.9.8.9	The solution shall provide the ability to the Pharmacist user to select second CRPMC Pharmacist from dropdown to review and approve.
7.9.9		The solution shall offer means to second authorized pharmacist user role to enter Label Inspection details
	7.9.9.1	The solution shall provide the ability to the second Pharmacist to select ANSI Inspection Type from dropdown options: Tightened Inspection 100% Inspection
	7.9.9.2	The solution shall provide the ability to the second Pharmacist to enter Total Labels Inspected based on ANSI
	7.9.9.3	The solution shall provide the ability to the second Pharmacist to enter Total Labels Accepted
	7.9.9.4	The solution shall provide the ability to the second Pharmacist to enter Total Labels Rejected
	7.9.9.5	The solution shall provide the ability to the second Pharmacist to enter Verified Label Text. Label Printed is verified against the Label Format Approved by DAIDS
	7.9.9.6	The solution shall display second Pharmacist username as Inspected By based on the user who has logged in automatically
	7.9.9.7	The solution shall display Current date as Inspected Date when it is submitted automatically.
7.9.10		The solution shall provide the ability to second authorized pharmacist user role to approve the batch record
	7.9.10.1	The solution shall provide the ability to second Pharmacist user to review and approve the batch record
7.9.11		The solution shall provide the ability to authorized user role to enter data in Operation section

Title: CRPMC Online Site Management and Ordering System (COSMOS) Configuration / Design Specification		Document ID: DS-012	Revision: V11.0
Document Type: Design Specification	Group: Pharma Services Group (PSG) / Clinical Trials Division (CTD)		Page: 50 of 124

URS ID	DS ID	Description
	7.9.11.1	The solution shall provide the ability to Technician user role to enter Date Started in Operation section
	7.9.11.2	The solution shall provide the ability to Technician user role to enter Start time in Operation section
	7.9.11.3	The solution shall provide the ability to Technician user role to enter End time in Operation section
	7.9.11.4	The solution shall provide the ability to Technician user role to perform following labelling instructions. Room/area clearance: ensure area is free of product and labels from previous activity. Place the appropriate product and labels into the labeling area Affix the label on appropriate part of the existing label. Remove all product and labels from room; ensure area is free of material.
	7.9.11.5	The solution shall have ability to capture Technician username based on the user who has logged in automatically
	7.9.11.6	The solution shall have the ability to capture Start Date as Performed Date when instruction is performed.
	7.9.11.7	The solution shall have the ability to repeat Labelling operations if the labeling is not completed within one day.
	7.9.11.8	Upon completion of approve by second Pharmacist, the Solution shall notify Operation Supervisor automatically.
7.9.12		The solution shall provide the ability to Operation Supervisor to enter the pre-defined details in the Accountability section
	7.9.12.1	The solution shall auto populate the Total number of labels received for use from Total Labels Accepted
	7.9.12.2	The solution shall provide the ability to Operation Supervisor to enter Number of labels used in labeling operation.
	7.9.12.3	The solution shall provide the ability to Operation Supervisor to enter Number of labels destroyed during operation
	7.9.12.4	The solution shall provide the ability to Operation Supervisor to enter Number of labels returned from operation
	7.9.12.5	The solution shall provide the ability to Operation Supervisor to enter Number of labels accounted
	7.9.12.6	The solution shall provide the ability to Operation Supervisor to enter Percentage Accountability
	7.9.12.7	The solution shall provide the ability to the Pharmacist user to select Freezer/Storage Area details from dropdown.
	7.9.12.8	The solution shall provide the ability to the Pharmacist user to select Rack details from dropdown.
	7.9.12.9	The solution shall provide the ability to the Pharmacist user to select Shelf details from dropdown.

Title: CRPMC Online Site Management and Ordering System (COSMOS) Configuration / Design Specification		Document ID: DS-012	Revision: V11.0
Document Type: Design Specification	Group: Pharma Services Group (PSG) / Clinical Trials Division (CTD)		Page: 51 of 124

URS ID	DS ID	Description
	7.9.12.10	The solution shall provide the ability to the Pharmacist user to select Box details from dropdown.
7.9.13		The solution shall provide the ability to authorized QA users to approve the batch record
	7.9.13.1	The solution shall provide the ability to QA user roles to approve the batch record
	7.9.13.2	The solution shall have the ability to Capture Current date as Approval Date when it is approved automatically.
7.9.14		The solution shall prompt the authorized user role to enter their credentials to authorize any updates (Electronic Signature).
	7.9.14.1	The solution shall prompt the current user role to enter their password. This password will be authenticated against the user that is logged on to validate that the current user is the logged in user (Electronic Signature).
7.10.1		The solution shall allow users to complete COA process within COSMOS
7.10.2		The solution shall allow authorized users roles to have access to the COA Receiving module.
	7.10.1.1	The solution shall provide access to the COA module for the following roles CRPMC Pharmacist CRPMC QA DAIDS Pharmacist DAIDS COR Site Admin
7.10.3		The solution shall have the ability to auto populate the COA header section from details in the receiving form when COA is initiated from order receiving.
	7.10.3.1	The solution shall have the ability to auto populate the header section from the receiving form when COA is initiated from order receiving.
	7.10.3.2	The solution shall have the ability to auto populate the NSC number from the receiving form.
	7.10.3.3	The solution shall have the ability to auto populate the Product Name from the receiving form.
	7.10.3.4	The solution shall have the ability to auto populate the Manufacturer/Vendor from the receiving form.
	7.10.3.5	The solution shall have the ability to auto populate the Lot Number from the receiving form.
	7.10.3.6	The solution shall have the ability to auto populate the Quantity Received from the receiving form.

Title: CRPMC Online Site Management and Ordering System (COSMOS) Configuration / Design Specification		Document ID: DS-012	Revision: V11.0
Document Type: Design Specification	Group: Pharma Services Group (PSG) / Clinical Trials Division (CTD)		Page: 52 of 124

URS ID	DS ID	Description
	7.10.3.7	The solution shall have the ability to auto populate the Protocol Number from the receiving form.
	7.10.3.8	The solution shall provide the ability to Pharmacist user to select Certification Date from dropdown.
7.10.4		The solution shall provide the ability to authorized Pharmacist user role to upload the COA received from manufacturer in PDF format.
	7.10.4.1	The solution shall provide a page to Pharmacist user role to upload the COA received from manufacturer, assign the CRPMC QA and DAIDS reviewers 1-4, and then to initiate review of the record by those selected. DAIDS Reviewers 1-3 will allow for selection of any registered DAIDS pharmacists. DAIDS Reviewer 4 will allow for selection of any registered DAIDS pharmacists and DAIDS COR.
	7.10.4.2	The solution shall provide a page to specified CRPMC QA to view and approve or reject the COA upon being submitted to QA for approval.
	7.10.4.3	The solution shall provide a page to specified DAIDS reviewers to view and approve or reject the COA. Approvals will be routed in reviewer-order (Reviewer 1, Reviewer 2, etc.) as they are completed
	7.10.4.4	The solution shall provide a page to the CRPMC QA person selected to review the COA. CRPMC QA will then be able to view and approve or reject the COA.
	7.10.4.5	Upon approval by CRPMC QA, the system will automatically send an email to the first DAIDS Reviewer (DAIDS Reviewer 1) and the status will update to DAIDS Reviewer 1.
	7.10.4.6	Upon rejection by CRPMC QA the system will automatically send an email to the initiating pharmacist and the status will update to Pharmacist.
	7.10.4.7	The solution shall provide a page to DAIDS Pharmacists 1-3 user role, to view and approve or reject the COA, upon approval by the previous DAIDS Pharmacist.
	7.10.4.8	The solution shall provide a page to COR (DAIDS Pharmacist 4) user role to view and approve or reject the COA upon approval by the previous DAIDS Pharmacists.
7.10.5		The solution shall display the COA form to the authorized pharmacist user.
	7.10.5.1	The solution shall display the COA form to the authorized pharmacist user
7.10.6		The solution shall provide the ability to the authorized pharmacist user to approve the COA
	7.10.6.1	The solution shall provide the ability to the authorized pharmacist user to approve the COA
7.10.7		The solution shall display the COA form to the authorized Site Admin, CRPMC QA, or pharmacist user

Title: CRPMC Online Site Management and Ordering System (COSMOS) Configuration / Design Specification		Document ID: DS-012	Revision: V11.0
Document Type: Design Specification	Group: Pharma Services Group (PSG) / Clinical Trials Division (CTD)		Page: 53 of 124

URS ID	DS ID	Description
	7.10.7.1	The solution shall display the COA form to the authorized Site Admin, CRPMC QA, or pharmacist user
7.10.8		The solution shall provide the ability to the authorized user role to approve the COA.
	7.10.8.1	The solution shall provide the ability to the authorized user role to approve the COA
7.10.9		The solution shall provide the ability to the selected DAIDS users to approve COA.
	7.10.9.1	The solution shall provide the ability to the selected DAIDS users to approve COA.
7.10.10		The solution shall prompt the authorized user role to enter their credentials to authorize any updates (Electronic Signature).
	7.10.10.1	The solution shall prompt the current user role to enter their password. This password will be authenticated against the user that is logged on to validate that the current user is the logged in user (Electronic Signature).
7.11.1		The solution shall allow predefined users to enter Shipping data within COSMOS.
	7.11.1.1	The solution shall provide a page to Site pharmacist user role for entering order details.
	7.11.1.2	The solution shall provide the pharmacist user role the capability to select a Depot from which the product will be shipped.
	7.11.1.3	The solution shall provide a page for pharmacist user role to review the order.
	7.11.1.4	The solution shall provide a page for Pharmacist user role to run MKDenial validation.
	7.11.1.5	The solution shall provide a page for second technician user role to review the order details pulled by the pulling technician.
	7.11.1.6	The solution shall provide a page for packing technician user role to select carrier.
	7.11.1.7	The solution shall provide a page for technician user role to change status as shipped after the orders are picked up.
	7.11.1.8	The solution shall provide a page for Site pharmacist user role to acknowledge the receipt
7.11.2		The solution shall allow authorized users roles to have access to the Shipping module
	7.11.2.1	The solution shall provide access to the receiving module for the following roles CRPMC Pharmacist CRPMC Technician Site pharmacist CRPMC Operations Supervisor ICRPMC Pharmacist ICRPMC Technician

URS ID	DS ID	Description
		Site Admin
7.11.3		The solution shall provide the ability to Site pharmacist to enter pre-defined shipment related attributes
	7.11.3.1	The solution shall provide ability to Site pharmacist user role to enter Username.
	7.11.3.2	The solution shall provide ability to the Site pharmacist user role to enter password.
	7.11.3.3	The solution shall provide the ability to the Site pharmacist user role to choose the Protocol from dropdown
	7.11.3.4	The solution shall provide the dropdown based on the protocols associated with a particular user's name.
	7.11.3.5	The solution shall display the Investigator Name based on the protocol selected.
	7.11.3.6	The solution shall display the PoR/Associate based on the user accessing the system.
	7.11.3.7	The solution shall provide ability to Site pharmacist role to select the organization ID from a dropdown list.
	7.11.3.8	The solution shall provide the dropdown of the organization ID based on the site associated to the site user.
	7.11.3.9	The solution shall display the shipping address based on the organization ID.
	7.11.3.10	The solution shall provide the ability to the Site pharmacist to select the Date Required from a calendar dropdown.
	7.11.3.11	The solution shall display the order date automatically.
	7.11.3.12	The solution shall not display the status while the site is placing the order.
	7.11.3.13	The solution shall display status as submitted upon order submission by the site automatically.
	7.11.3.14	The solution shall provide ability to Site pharmacist user role to enter comments.
	7.11.3.15	The solution shall provide the ability to the Site pharmacist user role to enter details on number of participants
	7.11.3.16	The solution shall provide the ability to the Site pharmacist user role to enter quantity of inventory available at the site.
	7.11.3.17	The solution shall provide the ability to the Site pharmacist user role to select NSC number from dropdown
	7.11.3.18	The solution shall display NSC number associated to the protocol selected.
	7.11.3.19	The solution shall display the drug name based on the NSC number selected.
	7.11.3.20	The solution shall provide the ability to select the strength of the drug from the drop down

Title: CRPMC Online Site Management and Ordering System (COSMOS) Configuration / Design Specification		Document ID: DS-012	Revision: V11.0

URS ID	DS ID	Description
	7.11.3.21	The solution shall display the strength based on the NSC number selected
	7.11.3.22	The solution shall provide the ability to select the dosage of the drug from the drop down
	7.11.3.23	The solution shall display the dosage based on the NSC number selected
	7.11.3.24	The solution shall provide the ability to select the unit size of the drug from the drop down
	7.11.3.25	The solution shall display the unit size based on the NSC number selected
	7.11.3.26	The solution shall provide the ability to the Site pharmacist user role to enter quantity to be ordered.
	7.11.3.27	The solution shall display the shipping temperature based on the NSC number selected.
7.11.4		The solution shall provide the ability to Site pharmacist to enter multiple products within the same order.
	7.11.4.1	The solution shall provide ability to Site pharmacist user role to select multiple NSC numbers
7.11.5		The solution shall provide ability to the Site pharmacist to perform one or more of the following actions: Acknowledge order Submit the order
	7.11.5.1	The solution shall provide ability to the authorized Site pharmacist to view the summary page
	7.11.5.2	The solution shall display order entry screen to the authorized user.
	7.11.5.3	The solution shall provide ability to the authorized Site pharmacist to click on the Submit button.
7.11.6		The solution shall offer means to Site pharmacist to place the order for shipment
	7.11.6.1	The solution shall provide the ability to the Site pharmacist to click on the submit button to submit the order.
7.11.7		The solution shall display an order dashboard to the authorized pharmacist
	7.11.7.1	The solution shall display order dashboard based on site location: International Domestic
	7.11.7.2	The solution shall display order dashboard based on status of the order: Submitted Pharmacist Verified

URS ID	DS ID	Description
	7.11.14.15	The solution shall provide ability to the authorized user to enter Consignee in Certificate of Origin.
	7.11.14.16	The solution shall provide ability to the authorized user to enter Net weight in Certificate of Origin.
	7.11.14.17	The solution shall provide ability to the authorized user to enter Total Weight in Certificate of Origin.
	7.11.14.18	The solution shall provide ability to the authorized user to enter comments in Certificate of Origin.
	7.11.14.19	The solution shall provide ability to the authorized user to generate the Certificate of Origin
	7.11.14.20	The solution shall provide the ability to upload the COA
	7.11.14.21	The solution shall provide a link to authorized owner a link to the carrier website to generate Master Airway Bill.
7.11.15		The solution shall provide the ability to Pulling technician to pull the products.
	7.11.15.1	The solution shall provide the ability to the view the list of products to be pulled.
7.11.16		The solution shall display the order to all Pharmacists.
	7.11.16.1	The solution shall display the summary of details entered by pulling technician.
7.11.17		The solution shall provide the ability to Second Pharmacist to approve the order.
	7.11.17.1	The solution shall provide the ability to the second pharmacist to click on the approve button.
7.11.18		The solution shall offer means to Packing technician to select the carrier.
	7.11.18.1	The solution shall provide the ability to the packing technician to pick the carrier details from the drop down
	7.11.18.2	The solution shall provide the ability to the packing technician to enter new carrier details.
7.11.19		The solution shall offer means to enter the tracking number for each product on the order
	7.11.19.1	The solution shall offer means for the Packing technician user to select the ship date for the order.
	7.11.19.2	The solution shall provide the ability to the Packing technician the option to select multiple products and enter the tracking number and carrier.
7.11.20		The solution shall offer means to Packing technician to print the packing list
	7.11.20.1	The total packing slips printed is based on the total number of packages/shipping temperatures.

Title: CRPMC Online Site Management and Ordering System (COSMOS) Configuration / Design Specification		Document ID: DS-012	Revision: V11.0
Document Type: Design Specification	Group: Pharma Services Group (PSG) / Clinical Trials Division (CTD)		Page: 59 of 124

URS ID	DS ID	Description
	7.11.20.2	The solution shall offer means for the packing technician to enter the following details: Has the packing slip been included in the package? Yes No
7.11.21		The solution shall offer means to the Packing technician to send shipping details to FedEx courier system
	7.11.21.1	The solution shall provide the ability to the authorized technician to upload shipping documents in the FedEx courier page
7.11.22		The solution shall allow Packing technician to retrieve tracking number from FedEx
	7.11.22.1	The solution shall provide ability to the authorized user to view the FedEx label
	7.11.22.2	The solution shall provide the ability to the authorized user to download and generate the FedEx shipping label.
7.11.23		The solution shall provide the ability to authorized secondary technician to enter predefined details regarding the shipping labels verification attributes
	7.11.23.1	The solution shall provide the ability to the secondary technician to enter the following details: Has the label been verified? 1. Yes 2. No
	7.11.23.2	The solution shall restrict the user from proceeding further without completing the above checklist.
7.11.24		The solution shall provide the ability to the Site pharmacist to acknowledge the product received.
	7.11.24.1	The solution shall provide an acknowledge button to the Site pharmacist to acknowledge the product received.
	7.11.24.2	When the ship-from site is a Depot, the user acknowledging the order will be able to upload logger files.
7.11.25		The solution shall have the ability to send reminder emails to the Site pharmacist to acknowledge the product received.
	7.11.25.1	The solution shall automatically send reminder emails.
7.11.26		The solution shall prompt the authorized user role to enter their credentials to authorize any updates (Electronic Signature).
	7.11.26.1	The solution shall prompt the current user role to enter their password. This password will be authenticated against the user that is logged on to validate that the current user is the logged in user (Electronic Signature).

	7.13.5.1	The solution shall provide the ability to the Westat role to select check box whether study product destruction occurred during the destruction visit: Yes No
	7.13.5.2	The solution shall provide the ability to the Westat role to select check box whether study products were destroyed on site: Yes No
	7.13.5.3	The solution shall provide the ability to the Westat role to name the facility at which the study products were destroyed if no.
7.13.6		The solution shall provide the ability to contractor Westat user role to attach the SVR form.
	7.13.6.1	The solution shall provide the ability to the Westat role in the destruction company provide further documentation such as a certificate of destruction or a receipt of the study products for destruction: Yes - Copy attached No Yes - Will submit a copy upon receipt
7.13.7		The solution shall provide ability to Site pharmacist (PoR) user role to review destruction details and report
	7.13.7.1	The solution shall provide ability to Site pharmacist (PoR) user role to review destruction details and report
7.13.8		The solution shall provide ability to Site pharmacist (PoR) user role to attach destruction confirmation document
	7.13.8.1	The solution shall provide means to authorized user to attach document
7.13.9		The solution shall display the destruction page to the authorized user role to review destruction confirmation

Title: CRPMC Online Site Management and Ordering System (COSMOS) Configuration / Design Specification		Document ID: DS-012	Revision: V11.0
Document Type: Design Specification	Group: Pharma Services Group (PSG) / Clinical Trials Division (CTD)		Page: 68 of 124

URS ID	DS ID	Description
	7.13.9.1	The solution shall display a summary of the destruction page to the authorized user.
7.13.10		The solution shall prompt the authorized user role to enter their credentials to authorize any updates (Electronic Signature).
	7.13.10.1	The solution shall prompt the current user role to enter their password. This password will be authenticated against the user that is logged on to validate that the current user is the logged in user (Electronic Signature).
7.13.11		The solution shall have print functionality for completed destruction
	7.13.11.1	The solution shall have print functionality for completed destruction
7.14.1		The solution shall allow users to enter the sample split data within COSMOS
	7.14.1.1	The solution shall provide a page for Pharmacist user role to initiate the sample split.
	7.14.1.2	The solution shall provide a page for Technician user role to enter details of new storage location for sample
7.14.2		The solution shall provide authorized users roles to have access to the Sample Split module
	7.14.2.1	The solution shall provide access to the return module for the following roles: CRPMC Pharmacist CRPMC Technician ICRPMC Pharmacist ICRPMC Technician Site Admin
7.14.3		The solution shall provide the ability to authorized pharmacist user role to enter predefined attributes related to sample split
	7.14.3.1	The solution shall provide the ability to the Pharmacist user to select an NSC number from the dropdown
	7.14.3.2	The solution shall display the Product Name based on the NSC# selected.
	7.14.3.3	The solution shall provide the ability to the Pharmacist user to select a Sample number from the dropdown
	7.14.3.4	The solution shall display the Sample number dropdown as a combination of both Sample number and Protocol Name.
	7.14.3.5	The solution shall display Protocol based on the NSC number and Sample number selected.
	7.14.3.6	The solution shall display Dosage based on the NSC number and Sample number selected.
	7.14.3.7	The solution shall display Location based on the NSC number and Sample number selected.

Title: CRPMC Online Site Management and Ordering System (COSMOS) Configuration / Design Specification		Document ID: DS-012	Revision: V11.0
Document Type: Design Specification	Group: Pharma Services Group (PSG) / Clinical Trials Division (CTD)		Page: 69 of 124

URS ID	DS ID	Description
	7.14.3.8	The solution shall display Current balance.
	7.14.3.9	The solution shall provide the ability to the Pharmacist user to enter a Quantity to Transfer.
	7.14.3.10	The solution shall restrict the Pharmacist user to enter a Quantity to Transfer greater than current balance.
	7.14.3.11	The solution shall display New Balance as a difference between Current Balance and Quantity to Transfer (Current Balance - Quantity to Transfer).
	7.14.3.12	The solution shall provide the ability to the Pharmacist user to select a New Protocol from the dropdown.
	7.14.3.13	The solution shall display the New Protocol dropdown based on the available protocols.
	7.14.3.14	The solution shall provide ability to the Pharmacist user to enter comments.
	7.14.3.15	The solution shall display New Sample number based on next Sample number for the product.
	7.14.3.16	The solution shall provide the ability to the Pharmacist user to select check box whether the sample is moved to New Location: Yes No
	7.14.3.17	The solution shall provide the ability to the Pharmacist user to select check box whether the sample is 'Transfer to Depot': Yes No Upon selecting 'Yes', the user is supplied with a list of available Depot site.
	7.14.3.18	The solution shall display Status starting with Initiated.
	7.14.3.19	The solution shall display the Pharmacist user based on the user accessing the system.
	7.14.3.20	The solution shall display Current Date as Created Date.
7.14.4		The solution shall provide the ability to authorized technician user role to enter details of storage location for the new sample
	7.14.4.1	The solution shall provide the ability to authorized Technician user role to enter details of storage location only if it requires new Location.
	7.14.4.2	The solution shall provide ability to the Technician user to enter Freezer details.
	7.14.4.3	The solution shall provide ability to the Technician user to enter Rack details.
	7.14.4.4	The solution shall provide ability to the Technician user to enter Shelf details.
	7.14.4.5	The solution shall provide ability to the Technician user to enter Box details.

Title: CRPMC Online Site Management and Ordering System (COSMOS) Configuration / Design Specification		Document ID: DS-012	Revision: V11.0
Document Type: Design Specification	Group: Pharma Services Group (PSG) / Clinical Trials Division (CTD)		Page: 70 of 124

URS ID	DS ID	Description
	7.14.4.6	The solution shall display Status. It should change to Completed upon completion of details of new storage location.
	7.14.4.7	The solution shall display the Technician user based on the user accessing the system.
	7.14.4.8	The solution shall display Current Date as Created Date.
7.14.5		The solution shall have the ability to initiate a new product transfer workflow for sample transfer to Depot.
	7.14.5.1	The solution shall have the ability to initiate a new product transfer workflow for sample transfer to selected Depot upon Pharmacist user to select yes for the sample is Transfer to Depot.
7.15.1		The solution shall allow users to enter the repass data within COSMOS
	7.15.1.1	The solution shall provide a page for the authorized pharmacist to enter details regarding product new retest date
	7.15.1.2	The solution shall provide a page for the authorized Site pharmacist to acknowledge the new retest date.
7.15.2		The solution shall allow authorized users roles to have access to the Repass module
	7.15.2.1	The solution shall provide access to the repass module for the following roles CRPMC Pharmacist ICRPMC Pharmacist Site Pharmacist Site Admin
7.15.3		The solution shall offer means to authorized pharmacist user role to enter details regarding product new retest date
	7.15.3.1	The solution shall offer means to the authorized pharmacist to enter NSC number
	7.15.3.2	The solution shall auto populate the product name based on NSC number
	7.15.3.3	The solution shall provide ability to the authorized pharmacist to select the Lot from a dropdown associated with the NSC number
	7.15.3.4	The solution shall auto populate dosage based on the NSC number and Lot number.
	7.15.3.5	The solution shall auto populate current retest date
	7.15.3.6	The solution shall provide the ability to the authorized pharmacist to select new retest date from a calendar drop down.

Title: CRPMC Online Site Management and Ordering System (COSMOS) Configuration / Design Specification		Document ID: DS-012	Revision: V11.0
Document Type: Design Specification	Group: Pharma Services Group (PSG) / Clinical Trials Division (CTD)		Page: 71 of 124

URS ID	DS ID	Description
	7.15.3.7	The solution shall prompt the user for a confirmation when the user enters New Retest Date
	7.15.3.8	The solution shall provide the ability to the authorized user to enter comments
7.15.4		The solution shall have the ability to send notification to PoR of the sites who received a particular product
	7.15.4.1	The solution shall auto-record the date retest date was sent to the site
	7.15.4.2	The solution shall prompt the user for a confirmation before sending the notification to sites
	7.15.4.3	The solution shall offer means for the sites receiving the notification to be a consolidated list
7.15.5		The solution shall provide the ability to PoR of the site to acknowledge the new retest date
	7.15.5.1	The solution shall record the date of acknowledgement
	7.15.5.2	The solution shall record the name of the user acknowledging the new retest date
7.15.6		The solution shall offer means to send reminder e-mail to authorized pharmacist to acknowledge the retest date
	7.15.6.1	The solution shall automatically (through overnight processes) send reminder e-mails to authorized pharmacist to acknowledge the retest date.
7.15.7		The solution shall prompt the authorized user role to enter their credentials to authorize any updates (Electronic Signature).
	7.15.7.1	The solution shall prompt the current user role to enter their password. This password will be authenticated against the user that is logged on to validate that the current user is the logged in user (Electronic Signature).
7.15.8		The selected re-test date will be applied to the expiration date and re-test / extension date.
	7.15.8.1	The solution shall provide re-test / extension date for the associated lot in the Inventory module
7.15.9		The solution shall have print functionality for completed orders.
	7.15.9.1	The solution shall have print functionality for completed orders.
7.15.10		The solution shall allow Pharmacist to select the Protocol and CRS when sending Repass notifications.
	7.15.10.1	The solution shall allow authorized user to select the Protocol and CRS when sending Repass notifications
7.16.1		The solution shall allow users to view repass log data from within COSMOS

Title: CRPMC Online Site Management and Ordering System (COSMOS) Configuration / Design Specification		Document ID: DS-012	Revision: V11.0
Document Type: Design Specification	Group: Pharma Services Group (PSG) / Clinical Trials Division (CTD)		Page: 72 of 124

URS ID	DS ID	Description
	7.16.1.1	The solution shall provide a page to the authorize users to view the repass log based on filters.
7.16.2		The solution shall allow authorized users roles to have access to the Repass module
	7.16.2.1	The solution shall provide access to the repass-log module for the following roles CRPMC Pharmacist ICRPMC Pharmacist Site Pharmacist Site Admin
7.16.3		The solution shall offer means to filter on any field to view details of repass
	7.16.3.1	The solution shall provide ability to the authorized user to filter based on any of the following fields: Site # NSC # Protocol Date Notification Sent Date Accepted No of Notifications Sent Lot # Old Retest Date New Retest Date
7.16.4		The solution shall permit access to the protocols and sites based on the user role accessing the system
	7.16.4.1	The solution shall provide access to protocols and sites that are associated to the user who has logged into the system.
7.17.1		The solution shall allow users to enter Recovery data in COSMOS
	7.17.1.1	The solution shall provide page to the CRPMC user to enter details
7.17.2		The solution shall allow authorized users roles to have access to the Recovery module

Title: CRPMC Online Site Management and Ordering System (COSMOS) Configuration / Design Specification		Document ID: DS-012	Revision: V11.0
Document Type: Design Specification	Group: Pharma Services Group (PSG) / Clinical Trials Division (CTD)		Page: 73 of 124

URS ID	DS ID	Description
	7.17.2.1	The solution shall provide access to the recovery module for the following roles: CRPMC Pharmacist CRPMC Technician ICRPMC Pharmacist ICRPMC Technician Site Pharmacist Site Admin
7.17.3		The solution shall provide the ability to authorized pharmacist user role to enter predefined recovery request details
	7.17.3.1	The solution shall provide the ability to the CRPMC pharmacist to select protocol number from drop down.
	7.17.3.2	The solution shall provide the ability to the CRPMC pharmacist to select site number from drop down.
	7.17.3.3	The solution shall provide the ability to the CRPMC pharmacist to select Organization ID from drop down.
	7.17.3.4	The solution shall provide the ability to the CRPMC pharmacist to select lot number from drop down.
	7.17.3.5	The solution shall auto populate product name based on NSC number selected
	7.17.3.6	The solution shall provide the ability to the CRPMC pharmacist to select dosage from drop down.
	7.17.3.7	The solution shall provide the ability to the CRPMC pharmacist to select manufacturer from drop down.
	7.17.3.8	The solution shall provide ability to the authorized pharmacist to enter reasons for recovery
	7.17.3.9	The solution shall provide the ability to the authorized pharmacist to enter comments
	7.17.3.10	The solution shall record the date on which the form was created
	7.17.3.11	The solution shall record the name of the user who has logged in and created the form
	7.17.3.12	The solution shall provide the ability to the pharmacist user to select the status: Initiated In progress Completed
7.17.4		The solution shall provide the ability to enter multiple products and lots in one recovery

Title: CRPMC Online Site Management and Ordering System (COSMOS) Configuration / Design Specification		Document ID: DS-012	Revision: V11.0
Document Type: Design Specification	Group: Pharma Services Group (PSG) / Clinical Trials Division (CTD)		Page: 74 of 124

URS ID	DS ID	Description
	7.17.4.1	The solution shall provide an add button to the user to enter multiple products and lots
7.17.5		The solution shall offer means to initiate a return workflow for any site that is domestic
	7.17.5.1	The solution shall provide ability to the authorized user to check for shipping address within USA
	7.17.5.2	The solution shall provide ability to the authorized user to initiate return workflow if the product is available in the inventory
7.17.6		The solution shall offer means to initiate a destruction workflow for any site that is international
	7.17.6.1	The solution shall provide the ability to the authorized user to check for shipping address not within the USA
	7.17.6.2	The solution shall provide the ability to the authorized user to initiate destruction workflow if the product is available in the inventory
7.17.7		The solution shall have the ability to send email notification to the authorized site user to acknowledge the recovery request
	7.17.7.1	The solution shall provide the ability to the authorized user to send a mail to the site for recovery request
7.17.8		The solution shall have the ability to the site user role to acknowledge the receipt of the request
	7.17.8.1	The solution shall provide the ability to the authorized user to send an email to the site to acknowledge the request
7.17.9		The solution shall prompt the authorized user role to enter their credentials to authorize any updates (Electronic Signature).
	7.17.9.1	The solution shall prompt the current user role to enter their password. This password will be authenticated against the user that is logged on to validate that the current user is the logged in user (Electronic Signature).
7.17.10		The solution shall have print functionality for completed recovery.
	7.17.10.1	The solution shall have print functionality for completed recovery.
7.18.1		The solution shall offer means to enter product transfer details within COSMOS
	7.18.1.1	The solution shall provide a page for Site pharmacist to enter details for product transfer
	7.18.1.2	The solution shall provide a page for the authorized pharmacist to approve the transfer
7.18.2		The solution shall allow authorized users roles to have access to the Product Transfer module
	7.18.2.1	The solution shall provide access to the recovery module for the following roles: CRPMC Pharmacist

Title: CRPMC Online Site Management and Ordering System (COSMOS) Configuration / Design Specification		Document ID: DS-012	Revision: V11.0
Document Type: Design Specification	Group: Pharma Services Group (PSG) / Clinical Trials Division (CTD)		Page: 75 of 124

URS ID	DS ID	Description
		ICRPMC Pharmacist Site Pharmacist Site Admin
7.18.3		The solution shall restrict the Site pharmacist from entering in any details if DAIDS approval is not available
	7.18.3.1	The solution shall provide the ability to site pharmacist to select one of the below given options for DAIDS approval Yes No
	7.18.3.2	The solution shall restrict the authorized user from proceeding further if no has been selected
	7.18.3.3	The solution shall provide the ability to the user to proceed further if yes has been selected
7.18.4		The solution shall offer means to Site pharmacist to upload approval from DAIDS for product transfer
	7.18.4.1	The solution shall provide an upload functionality to upload approval document
	7.18.4.2	The solution shall provide the ability to the Site pharmacist to select date of DAIDS approval from drop down
7.18.5		The solution shall provide the ability to Site pharmacist (Destination) to enter details of from and to sites where the products are to be transferred
	7.18.5.1	The solution shall provide the ability to the Site pharmacist to select the date of transfer
	7.18.5.2	The solution shall auto-capture the date of the creation of the form
	7.18.5.3	The solution shall capture the name of user who has logged in and created the form
	7.18.5.4	The solution shall provide the ability to the authorized user to enter comments
	7.18.5.5	The solution shall provide the ability to the Site pharmacist to enter the details of "From Investigator"
	7.18.5.6	The solution shall provide the ability to the Site pharmacist to enter the details of "From CRS"
	7.18.5.7	The solution shall provide the ability to the Site pharmacist to enter the details of "From ORG ID"
	7.18.5.8	The solution shall provide the ability to the Site pharmacist to enter the details of "From Pharmacist"
	7.18.5.9	The solution shall auto-generate the "From Shipping Address" based on the investigator

Title: CRPMC Online Site Management and Ordering System (COSMOS) Configuration / Design Specification		Document ID: DS-012	Revision: V11.0
Document Type: Design Specification	Group: Pharma Services Group (PSG) / Clinical Trials Division (CTD)		Page: 76 of 124

URS ID	DS ID	Description
	7.18.5.10	The solution shall provide the ability to the Site pharmacist to select the details of “To Investigator” from dropdown list
	7.18.5.11	The solution shall provide the ability to the Site pharmacist to select the details of “To CRS” from dropdown list
	7.18.5.12	The solution shall provide the ability to the Site pharmacist to select the details of “To ORG ID” from dropdown list
	7.18.5.13	The solution shall provide the ability to the Site pharmacist to select the details of “To Pharmacist” from dropdown list
	7.18.5.14	The solution shall auto-generate the “To Shipping Address” based on the investigator
7.18.6		The solution shall provide the ability to Site pharmacist (Destination) to enter the details of the products to be received through the transfer.
	7.18.6.1	The solution shall provide ability to the Site pharmacist to enter the protocol number
	7.18.6.2	The solution shall provide ability to the Site pharmacist to enter the NSC number
	7.18.6.3	The solution shall display the product name based on the NSC number
	7.18.6.4	The solution shall provide the ability to the Site pharmacist to select a lot number from the drop-down list
	7.18.6.5	The solution shall provide the ability to the Site pharmacist to select a sample number from the drop-down list
	7.18.6.6	The solution shall auto-display the strength of the product
	7.18.6.7	The solution shall provide the ability to the Site Pharmacist to enter the quantity to be transferred.
7.18.7		The solution shall provide the ability to Site pharmacist (sender) to approve the product transfer workflow
	7.18.7.1	The solution shall provide an approve button to the Site pharmacist to approve
	7.18.7.2	The solution shall record the date on which the approval was done
	7.18.7.3	The solution shall capture the username who is logged in and has approved the form
7.18.8		The solution shall provide the ability to authorized pharmacist to approve the product transfer
	7.18.8.1	The solution shall provide the ability to authorized pharmacist to: Approve Reject

Title: CRPMC Online Site Management and Ordering System (COSMOS) Configuration / Design Specification		Document ID: DS-012	Revision: V11.0
Document Type: Design Specification	Group: Pharma Services Group (PSG) / Clinical Trials Division (CTD)		Page: 77 of 124

URS ID	DS ID	Description
7.18.9		Upon approval by the authorized pharmacist, the Solution shall have the ability to send a notification to both sites
	7.18.9.1	The solution shall have the ability to send notification to site pharmacist of the receiving and sending sites
7.19.1		The solution shall offer means for authorized users to modify inventory details within the COSMOS
	7.19.1.1	The solution shall provide a page to authorized pharmacist user to update details in the inventory
	7.19.1.2	The solution shall provide a page to authorized technician to update details in the inventory based on access
7.19.2		The solution shall allow authorized users roles to have access to the Inventory management module
	7.19.2.1	The solution shall provide access to the Inventory Management module for the following roles: CRPMC Pharmacist CRPMC Technician ICRPMC Pharmacist ICRPMC Technician Site Admin
7.19.3		The solution shall offer means to modify specific fields based on role permissions
	7.19.3.1	The solution shall restrict Technician user from modifying the following fields: Update lot status Manufacturer Expiration date Strength Specify minimum quantity in the inventory
7.19.4		The solution shall offer means to authorize pharmacist and technician user role to search the inventory for products based on NSC number or product name
	7.19.4.1	The solution shall offer means to the user to search for products by NSC number Product Name
7.19.5		The solution shall offer means to authorize pharmacist and technician user role to view all products

Title: CRPMC Online Site Management and Ordering System (COSMOS) Configuration / Design Specification		Document ID: DS-012	Revision: V11.0
Document Type: Design Specification	Group: Pharma Services Group (PSG) / Clinical Trials Division (CTD)		Page: 78 of 124

URS ID	DS ID	Description
	7.19.5.1	The solution shall provide access to authorized users to view all products in the inventory
7.19.6		The solution shall offer means to be able to limit the results based on the NSC number or product name
	7.19.6.1	The solution shall display all product and its details associated with: NSC number Product Name
7.19.7		The solution shall provide the ability to pharmacist user role group to update lot status, manufacturer, expiration date, and specify minimum quantity in the inventory
	7.19.7.1	The solution shall provide the ability to the pharmacist user to make changes in the following fields: Update lot status Manufacturer Expiration date Specify minimum quantity in the inventory
7.19.8		The solution shall provide the ability to technician user to upload document
	7.19.8.1	The solution shall provide the ability to the authorized technician to upload document
7.19.9		The solution shall provide the ability to technician and operations supervisor to update location
	7.19.9.1	The solution shall provide the ability to the authorized user to make location changes
7.19.10		The solution shall prompt the authorized user role to enter their credentials to authorize any updates (Electronic Signature).
	7.19.10.1	The solution shall prompt the current user role to enter their password. This password will be authenticated against the user that is logged on to validate that the current user is the logged in user (Electronic Signature).
7.20.1		The solution shall provide ability to user roles to adjust the inventory within the COSMOS
	7.20.1.1	The solution shall provide a page for the authorized user to make changes to the inventory
7.20.2		The solution shall allow authorized users roles to have access to the Inventory Adjustment module

Title: CRPMC Online Site Management and Ordering System (COSMOS) Configuration / Design Specification		Document ID: DS-012	Revision: V11.0
Document Type: Design Specification	Group: Pharma Services Group (PSG) / Clinical Trials Division (CTD)		Page: 79 of 124

URS ID	DS ID	Description
	7.20.2.1	The solution shall provide access to the Inventory Management module for the following roles: CRPMC Pharmacist ICRPMC Pharmacist Site Admin
7.20.3		The solution shall restrict the authorized user from entering destruction date and manifest before the Second Review is completed by a technician/pharmacist
	7.20.3.1	The solution shall allow the user to proceed after second pharmacist approval.
7.20.4		The solution shall provide the ability to authorize pharmacist user role to select increase or decrease in the quantity. The solution shall not display any default option
	7.20.4.1	The solution shall prompt the authorized user to enter the reason for destruction
	7.20.4.2	The solution shall provide means for the authorized user to upload destruction manifest in pdf format
	7.20.4.3	The solution shall provide means for the authorized pharmacist user to upload multiple documents in word, excel and pdf format
7.20.5		The solution shall update the inventory once the details are submitted by the authorized pharmacist
	7.20.5.1	The solution shall provide the ability to the authorized pharmacist to select protocol number from a drop-down list based on protocols shipped/transferred to the site
	7.20.5.2	The solution shall provide the ability to the authorized pharmacist to select NSC number from a drop-down list based on products shipped/transferred to the site
	7.20.5.3	The solution shall auto-populate product name based on NSC number
	7.20.5.4	The solution shall provide the ability to the authorized pharmacist to select lot number from a drop-down list based on lots shipped/transferred to the site
	7.20.5.5	The solution shall auto-populate sample number based on products shipped/transferred to the site
	7.20.5.6	The solution shall auto-populate received quantity based on NSC number
	7.20.5.7	The solution shall auto-populate total quantity shipped based on NSC number
	7.20.5.8	The solution shall auto-populate remaining quantity Remaining quantity = Received quantity - Total shipped quantity
	7.20.5.9	The solution shall allow the authorized pharmacist to add or subtract the quantity of product selected from the inventory

URS ID	DS ID	Description
	7.21.8.1	The solution shall prompt the current user role to enter their password. This password will be authenticated against the user that is logged on to validate that the current user is the logged in user (Electronic Signature).
7.22.1		The solution shall allow authorized users roles to have access to the Logger Adjustment module
	7.22.1.1	The solution shall allow authorized users roles to have access to the Logger Adjustment module: CRPMC Technician CRPMC Pharmacist CRPMC QA ICRPMC Technician ICRPMC Pharmacist Site Admin
7.22.2		The solution shall provide the ability to authorized pharmacist and technician users to enter logger adjustment or destruction
	7.22.2.1	The solution shall provide the ability to authorized pharmacist and technician users to enter logger adjustment or destruction
7.22.3		The solution shall provide the ability to authorize pharmacist and technician users to increase or decrease logger quantity
	7.22.3.1	The solution shall provide the ability to authorize pharmacist and technician users to increase or decrease logger quantity
7.22.4		The solution shall require authorized QA user role to approve or reject logger adjustment and destruction
	7.22.4.1	The solution shall require authorized QA user role to approve or reject logger adjustment and destruction
7.22.5		The solution shall update the logger inventory once the adjustment or destruction is approved by QA
	7.22.5.1	The solution shall update the logger inventory once the adjustment or destruction is approved by QA
7.22.6		The solution shall prompt the authorized user role to enter their credentials to authorize any updates (Electronic Signature).
	7.22.6.1	The solution shall prompt the current user role to enter their password. This password will be authenticated against the user that is logged on to validate that the current user is the logged in user (Electronic Signature).
7.23.1		The solution shall allow authorized users roles to have access to the Receiving Logger module
	7.23.1.1	The solution shall allow authorized users roles to have access to the Receiving Logger Module: CRPMC Technician CRPMC Pharmacist CRPMC QA

Title: CRPMC Online Site Management and Ordering System (COSMOS) Configuration / Design Specification		Document ID: DS-012	Revision: V11.0
Document Type: Design Specification	Group: Pharma Services Group (PSG) / Clinical Trials Division (CTD)		Page: 82 of 124

URS ID	DS ID	Description
		ICRPMC Technician ICRPMC Pharmacist Site Admin
7.23.2		The solution shall provide ability to technician user role to enter pre-defined Receiving Logger package related data attributes
	7.23.2.1	The solution shall provide ability to technician user role to enter pre-defined Receiving Logger package related data attributes
7.23.3		The solution shall provide ability to technician user role to enter pre-defined Receiving Logger product details related data attributes
	7.23.3.1	The solution shall provide ability to technician user role to enter pre-defined Receiving Logger product details related data attributes
7.23.4		The solution shall provide ability to technician user role to add logger product.
	7.23.4.1	The solution shall provide ability to technician user role to add logger product.
7.23.5		The solution shall provide ability to technician user role to enter pre-defined location related data attributes
	7.23.5.1	The solution shall provide ability to technician user role to enter pre-defined location related data attributes
7.23.6		The solution shall provide ability to technician user role to enter pre-defined ANSI Inspection related data attributes
	7.23.6.1	The solution shall provide ability to technician user role to enter pre-defined ANSI Inspection related data attributes
7.23.7		The solution shall provide ability to QA user role to approve the receiving logger form
	7.23.7.1	The solution shall provide ability to QA user role to approve the receiving logger form
7.23.8		The solution shall prompt the authorized user role to enter their credentials to authorize any updates (Electronic Signature).
	7.23.8.1	The solution shall prompt the current user role to enter their password. This password will be authenticated against the user that is logged on to validate that the current user is the logged in user (Electronic Signature).
7.24.1		COSMOS-Vault Clinical Operations (Veeva) - eTMF integration shall utilize an automated tool that pushes COSMOS content to sFTP location on a configurable frequency.
	7.24.1.1	The solution shall include an automated service that outputs data, metadata, and associated content for the TMF classifications after completion of the following associated COSMOS workflows: Shipment Receipt

Title: CRPMC Online Site Management and Ordering System (COSMOS) Configuration / Design Specification		Document ID: DS-012	Revision: V11.0
Document Type: Design Specification	Group: Pharma Services Group (PSG) / Clinical Trials Division (CTD)		Page: 83 of 124

URS ID	DS ID	Description
		Destruction Return Sample Label COA
	7.24.1.2	The automated service shall upload the output to specified sFTP locations, as specified in Appendix C – sFTP Structure for COSMOS – eTMF Integration.
	7.24.1.3	The automated service shall process content from the prior day at a configurable time each day.
	7.24.1.4	The automated service shall move content from the prior month to the sFTP archive on the first day of each month.
	7.24.1.5	The automated service shall purge content from the archive that is greater than 60 days old when the service runs.
7.24.2		COSMOS-Vault Clinical Operations (Veeva) - eTMF integration shall utilize automated tool to output designated study content as JSON file containing metadata and links to associated TMF content files.
	7.24.2.1	The automated service shall output data, metadata, and links to the associated content as JSON data interchange files for each TMF classification, as specified in Appendix D – Data Interchange File (JSON) Structure and Mapping.
	7.24.2.2	The automated service shall output a JSON file for each TMF classification.
	7.24.2.3	The automated service shall output completed data for the prior day.
	7.24.2.4	The automated service shall include the run date, run time, and TMF classification in each JSON filename
	7.24.2.5	The automated service shall output the content to the linked location written in each associated JSON file
	7.24.2.6	The automated service shall include mandatory placeholders for the following TMF classifications: Shipment Receipt Destruction Return
	7.24.2.7	The automated service shall include a placeholder for each of the following TMF classifications when no other content attachments are present: COA

Title: CRPMC Online Site Management and Ordering System (COSMOS) Configuration / Design Specification		Document ID: DS-012	Revision: V11.0
Document Type: Design Specification	Group: Pharma Services Group (PSG) / Clinical Trials Division (CTD)		Page: 84 of 124

URS ID	DS ID	Description
		IP Sample Label
	7.24.2.8	The automated service shall generate a unique identifier for output content that is maintained in a eTMF document table
	7.24.2.9	The automated service shall use the unique identifier for output of content revisions
7.24.3		COSMOS-Vault Clinical Operations (Veeva) - eTMF integration shall include a study table maintained in COSMOS that designates the studies to be processed by the automated tool.
	7.24.3.1	The solution shall include a study table that designates studies to be processed by the automated service.
	7.24.3.2	The solution shall restrict study table edits to the system or database administrator.
7.24.4		COSMOS-Vault Clinical Operations (Veeva) - eTMF integration shall utilize the automated tool to process only designated studies with "Complete", "Completed", or "Approved" status in COSMOS.
	7.24.4.1	The solution shall automatically process specified studies that have transitioned to "Complete", "Completed", or "Approved" status in COSMOS during the prior day.
7.24.5		COSMOS-Vault Clinical Operations (Veeva) - eTMF integration shall permit an administrator to manually trigger the automated tool on demand.
	7.24.5.1	The automated service shall provide a console to manually trigger output of study content to the specified sFTP folders on demand
	7.24.5.2	The console shall enable selection of a specific study to be processed
	7.24.5.3	The console shall enable selection of all studies to be processed
	7.24.5.4	The console shall enable selection of a specific date range to be processed
	7.24.5.5	The console shall enable selection of a specific module (TMF classification) to be processed
	7.24.5.6	The console shall enable selection of all modules (TMF classifications) to be processed
	7.24.5.7	The console shall enable processing of all historical data for study and protocol selections
	7.24.5.8	The console shall enable processing of historical data for the date range, study, and protocol selections
7.25.1		The Solution shall allow authorized users roles to have access to the DAIDS Label Approval (DLA) Module
	7.25.1.1	The solution shall allow authorized users roles to have access to the DLA Module:

Title: CRPMC Online Site Management and Ordering System (COSMOS) Configuration / Design Specification		Document ID: DS-012	Revision: V11.0

URS ID	DS ID	Description
		CRPMC Pharmacist ICRPMC Pharmacist DAIDS Pharmacist DAIDS COR Site Admin
7.25.2		The Solution shall have the ability to enter the details when DLA initiated
	7.25.2.1	The Solution shall allow authorized users to enter the details when DLA initiated: CRPMC Pharmacist ICRPMC Pharmacist
	7.25.2.2	The solution shall provide the ability to the pharmacist user to make changes in the following fields: Protocol # Label Details DAIDS Protocol Pharmacist 1 DAIDS Protocol Pharmacist 2 (Optional) DAIDS COR
	7.25.2.3	The Solution shall provide the ability to authorized pharmacist user role to upload the Label copy approval Memo in pdf format
	7.25.2.3	The solution shall prompt the current user role to enter their password. This password will be authenticated against the user that is logged on to validate that the current user is the logged in user (Electronic Signature).
7.25.3		The Solution shall provide the ability to review Label Copy Approval and have ability to approve or reject: DAIDS Protocol Pharmacist(s) DAIDS COR
7.25.4		The solution shall have the ability to send automatic email notification: "Label Copy Approval pending for review" to the DAIDS Protocol Pharmacist(s) and DAIDS COR
	7.25.4.1	The automatic email notification should contain:

Title: CRPMC Online Site Management and Ordering System (COSMOS) Configuration / Design Specification		Document ID: DS-012	Revision: V11.0
Document Type: Design Specification	Group: Pharma Services Group (PSG) / Clinical Trials Division (CTD)		Page: 86 of 124

URS ID	DS ID	Description
		- Subject line update to: "Label Copy Approval Request – Protocol # - Notification header: *****Label Copy Approval Required***** - Notification content: "Reminder, the following Label Copy Approval is pending for your review and approval in COSMOS:" - Protocol # XXXXXXXXXX
7.25.5		The solution shall have print functionality for completed DLA.
7.26.1		The Solution shall allow authorized users roles to have access to the Production Batch Record Module
	7.26.1.1	The solution shall allow authorized users roles to have access to the Production Batch Record Module: CRPMC Pharmacist ICRPMC Pharmacist CRPMC Technician ICRPMC Technician CRPMC Operations Supervisor CRPMC QA Site Admin
	7.26.1.2	The Solution shall enable the user roles to request, receive, process and verify the module from authorized user and get the approval from them.
7.26.2		The solution shall provide the ability to the pharmacist user to make changes in the following fields: Protocol # NSC# Sample # Product Name Strength
	7.26.2.1	The Solution shall have the ability to auto-populate Batch Record # and Lot#

Title: CRPMC Online Site Management and Ordering System (COSMOS) Configuration / Design Specification		Document ID: DS-012	Revision: V11.0
Document Type: Design Specification	Group: Pharma Services Group (PSG) / Clinical Trials Division (CTD)		Page: 87 of 124

URS ID	DS ID	Description
	7.26.2.2	The solution shall provide the ability to the pharmacist user to enter the Number of Labels Required.
	7.26.2.3	The solution shall provide ability to send email notification to (CRPMCBatchRecordTeam@thermofisher.onmicrosoft.com) after Production batch record submitted.
7.26.3		The solution shall provide Technician user the ability to upload sample label sheet documents in word/pdf/JPEG format
	7.26.3.1	The solution shall provide ability to accept number of labels
7.26.4		The solution shall provide ability to authorize CRPMC pharmacist to upload photo of label copy(pdf/JPEG) and temperature monitoring data(pdf/ttv/ttv4)
	7.26.4.1	The solution shall provide the ability to add instructions up to 20.
	7.26.4.2	The solution shall provide the ability to add components up to 10.
7.26.5		The solution shall provide the ability to CRPMC Operation Supervisor/Technician to add quantity Issued of each component.
7.26.6		The solution shall provide the ability to CRPMC pharmacist to verify information and able to approve, reject it and exit it.
7.26.7		The solution shall provide the ability to CRPMC Ops Supervisor/Tech to add: Quantity of each component, Quantity Used Quantity returned/destroy Quantity wasted/defective during batch record.
	7.26.7.1	The solution shall provide the ability to auto populate Percentage (%) accounted for each component and label, open comment field, submit and exit it.
7.26.8		The solution shall allow CRPMC pharmacist to verify information entered in Columns Quantity Used Quantity returned/destroy Quantity wasted/defective
	7.26.8.1	The solution shall allow CRPMC pharmacist to stamp date and sign for post-production accountability and exit it from the system.
7.26.9		The Solution shall allow QA to review and approve or reject module
	7.26.9.1	The solution shall allow QA to exit once label is approved or rejected.

Title: CRPMC Online Site Management and Ordering System (COSMOS) Configuration / Design Specification		Document ID: DS-012	Revision: V11.0
Document Type: Design Specification	Group: Pharma Services Group (PSG) / Clinical Trials Division (CTD)		Page: 88 of 124

URS ID	DS ID	Description
7.27.1		The solution shall able to send expiration date notification based on shipping distribution within COSMOS
	7.27.1.1	The solution shall able to disable notification once the expiration date for that Product/Strength/Lot# has passed.
	7.27.1.2	The solution shall able to collect proof for audit trail for received notification
7.28.1		The solution shall allow users to toggle between Active and Inactive Users on User Registration Dashboard and able to download it as per Users requirements.
	7.28.1.1	The solution shall allow users to select either active or inactive users on user registration dashboards
	7.28.1.2	The solution allows users to highlight tiles in red after selecting them.
	7.28.1.3	The solution allows users to get active and inactive numbers of users on tiles
	7.28.1.4	The solution allows users to toggle between active and inactive users tiles
	7.28.1.5	The solution is able to download a list of active users with the following columns: First Name, Last Name, Role, and Email ID (Primary Email).
	7.28.1.6	The solution should be able to download the active users' list based on their roles (only after selecting at least one role) in Excel format, allowing the selection of more than one role.
7.29.1		The solution allows to automate inventory calculations, display real-time alerts, and notify pharmacist teams when inventory levels reach critical thresholds.
	7.29.1.1	The solution should make the 'Min Quantity for Inventory' field non-editable in the Inventory Module.
	7.29.1.2	The solution allows to auto-populate Min quantity for inventory in percentage as per below formula. $\text{Percentage} = (\text{Received Qty} - (\text{Shipped Qty} + \text{Reserve Qty}) / \text{Received Qty}) * 100$ (Note-Round the result to the nearest whole number (ignore decimals like .05 or .06).
	7.29.1.3	The solution shall allow to add a new field - Reserve Quantity
	7.29.1.4	The solution able to send email notification when inventory "Min quantity for inventory" reaches 50%, 30%, 25%, or 20%
	7.29.1.5	The solution able to send email notifications to active CRPMC pharmacist users only when inventory receiving at is CRPMC USA
	7.29.1.6	The solution able to send email notifications to active ICRPMC pharmacist users only when inventory receiving at is ICRPMC-South Africa
	7.29.1.7	The solution able to send notifications to all active pharmacist users when inventory receiving neither at CRPMC USA nor ICRPMC-South Africa
	7.29.1.8	The solution able to pop-up display alert when pharmacist enters shipping quantity or any product line item.
	7.29.1.9	The solution able to do validation check for inventory percentage as per below formula: $(\text{Received Qty} - (\text{Shipping Qty}(\text{Shipping module}) + \text{Shipped Qty}(\text{Inventory}) + \text{Reserve Qty}) / \text{Received Qty}) * 100$.

Title: CRPMC Online Site Management and Ordering System (COSMOS) Configuration / Design Specification		Document ID: DS-012	Revision: V11.0
Document Type: Design Specification	Group: Pharma Services Group (PSG) / Clinical Trials Division (CTD)		Page: 89 of 124

URS ID	DS ID	Description
	7.29.1.10	The solution able to display below alert if percentage reaches 50%, 30%, 25%, or 20%, You can ship a quantity of up to [Qty] for this order based on the current inventory of the sample. Ship quantity reached [Percentage]% for this order based on the current inventory of the sample. This also includes any pending orders that are currently in progress.
	7.29.1.11	The solution able to provide an OK button for pharmacists to acknowledge alert and to proceed further.
7.30.1		The solution shall allow us to auto-select domestic shipping status as Yes or No as per order initiated and user log in
7.31.1		The solution shall allow us to manage SAHPRA and GMO quantities coming from approved receipts.
	7.31.1.1	The solution shall allow reflect SAHPRA/GMO module under inventory rule
	7.31.1.2	The solution shall allow to display GMO field as well to allow toggle between Yes/No
	7.31.1.3	The solution shall allow the GMO field and GMO expiration date field to be opened when 'Yes' is selected, with validation restricted to the current date and future dates only
	7.31.1.4	The solution shall allow only users with Pharmacist roles or Site Admin privileges to edit these fields.
	7.31.1.5	The solution allows access for only CRPMC Pharmacist; ICRPMC Pharmacist; Operation Supervisor; CRPMC/ICRPMC Technician; Site Admin
7.32.1		The solution shall enable the addition of a Metrics Menu under the Reporting Menu in the COSMOS project, ensuring accessibility for: •CRPMC/ICRPMC Pharmacists/Operation Supervisor •CRPMC/ICRPMC Technicians •CRPMC QA •Site Admin
	7.32.1.1	The solution shall enable access to the Metrics Menu through a dropdown, displaying the dashboard with a Module selection option.
	7.32.1.2	The solution shall allow users to select a module through a dropdown menu, with "Shipping" set as the default option.
7.32.2		The solution shall provide a "Based On" dropdown to enable users to select criteria, such as: • Username • Order Number
	7.32.2.1	If "Username" is selected, the solution shall display a user dropdown that allows: - Selection of at least one user or multiple users. - A "Select All" option, which includes only internal users (CRPMC/ICRPMC Pharmacists, Operation Supervisors, Technicians, Site Admins).
	7.32.2.2	The solution shall include a Country Selection feature with the following options:

Title: CRPMC Online Site Management and Ordering System (COSMOS) Configuration / Design Specification		Document ID: DS-012	Revision: V11.0
Document Type: Design Specification	Group: Pharma Services Group (PSG) / Clinical Trials Division (CTD)		Page: 90 of 124

URS ID	DS ID	Description
		• Domestic • International • Both (require at least one option to be selected).
	7.32.2.3	The solution shall enable the Date Range Selection for users to choose one or multiple days or months.
	7.32.2.4	The solution should offer a Report Type Selection dropdown that restricts users from selecting only one report at a time, with the following options: • Order Verifications • Order Pulled by • Pull to Tech Verified by • Table 2 Check by • Label Verified by • Tech Packed by • Shipped by • Site Confirmed by • All
	7.32.2.5	The solution should include a Submit button to generate reports based on the selected criteria.
7.32.3		The solution shall display the report in the following format: • For multiple users: The report shall include the usernames, quantities processed, and corresponding percentages. • For a single username: The report shall show the username and the quantity processed.
	7.32.3.1	The solution shall include Turnaround Time (TAT) for each step within the report.
	7.32.3.2	The solution shall allow the generation of a report based on the selections made by the user, ensuring the format aligns with the structure indicated in the provided screenshot
	7.32.3.3	The solution shall allow users to select an order number from a dropdown list. Multiple order selection shall be permitted, ensuring at least one order is chosen.
	7.32.3.4	The solution shall provide a Submit button to generate reports in the following format: Report Fields: • Order # • CRS # - ORG ID • CRS Name • Country • Protocol # • Products / Strength / Lot # / Sample # • Shipping Temperature • Turnaround Time (TAT) for each step, displayed in HH:MM (Hours:Minutes). Reports: - o Order Verifications

Title: CRPMC Online Site Management and Ordering System (COSMOS) Configuration / Design Specification		Document ID: DS-012	Revision: V11.0
Document Type: Design Specification	Group: Pharma Services Group (PSG) / Clinical Trials Division (CTD)		Page: 91 of 124

URS ID	DS ID	Description
		- o Order Pulled by - o Pull to Tech Verified by - o Table 2 Check by - o Label Verified by - o Tech Packed by - o Shipped by - o Site Confirmed by • Initial Time & End Time for each step • User associated with each action (Performed By)
7.32.4		The solution shall allow reports generated based on both Username and Order Number to be: • Displayed on-screen • Exported in CSV/Excel format
	7.32.4.1	The solution should provide Dashboard Graphs & Pie Charts to visually represent data based on selected report criteria.
	7.32.4.2	The solution shall improve visibility in shipping process performance.
	7.32.4.3	The solution shall enable data-driven decision-making through graphical and tabular reports.
	7.32.4.4	The solution shall facilitate efficient tracking of user-specific and order-specific activities.
7.33.1		The solution shall allow updating the Auxiliary Label Required button to enable CRPMC/ICRPMC pharmacists to select one of the following options: - Yes - No - Not Required - If "Yes" is selected, the solution shall allow the following options to open, requiring at least one selection: - Cautionary statement labeling - Other auxiliary labeling - If "Not Required" or "No" is selected, the receipt progresses to the next step of the Receipt Workflow.
	7.33.1.1	The solution shall send an auto-email notification to the CRPMC Technician Team and CRPMC QA with the subject: "Receipt Approval Request – Protocol # / Receipt # / Product Name / Strength / Lot #".
	7.33.1.2	The solution shall allow the following access: - View: CRPMC/ICRPMC Pharmacist roles - Read/Write: Operation Supervisor, CRPMC/ICRPMC Technicians, Site Admin
	7.33.1.3	The solution shall require the following fields: - Label Provider (Dropdown: "Vendor Supplied" / "Printed In-House") - Number of Labels (Numeric Input, No Limit)

Title: CRPMC Online Site Management and Ordering System (COSMOS) Configuration / Design Specification		Document ID: DS-012	Revision: V11.0
Document Type: Design Specification	Group: Pharma Services Group (PSG) / Clinical Trials Division (CTD)		Page: 92 of 124

URS ID	DS ID	Description
		- Number of Labels Printed (Auto-populated as "Number of Labels + 10%", non-editable, no decimal round off) - Sample Label Sheet (DOC Upload field) (File Types Allowed: Word/PDF/JPEG)
7.33.2		The solution shall allow the following access: - Read/Write: CRPMC/ICRPMC Pharmacist roles, Site Admin - View: Operation Supervisor, CRPMC/ICRPMC Technicians
7.33.3		The solution shall require the following fields: - Number of Labels Received (Numeric Input, No Limit) - Label Copy Approval (Dropdown: Yes/No/N/A) - If "Yes" upload a document (PDF only) - ANSI Inspection Type (Dropdown: AQL 0.65 / 100% Inspection) - Recommended Inspection Quantity (Auto-populated based on AQL selection) - Inspected Quantity (Numeric Input, Must Match Recommended Quantity) - Number of Labels Accepted (Numeric Input, $\leq$ Labels Received) - Number of Labels Rejected (Auto-populated as "Labels Received - Labels Accepted") - Label Inspected By (Auto-populated with submitted username) - Label Inspected Date (Auto-populated with submission date) - Submit (Move to next step) / Reject (Return to Label Printing Step) / Exit (Back to Dashboard without saving)
	7.33.3.1	The solution shall allow the following access: - View: CRPMC/ICRPMC Pharmacist roles - Read/Write: Operation Supervisor, CRPMC/ICRPMC Technicians, Site Admin
	7.33.3.2	The solution shall require the following fields: - Labeling Room Number/ID (Alphanumeric, Limit 5 Characters) - Start Time (Recorded in HH:MM AM/PM format when "Start" is clicked) - End Time (Recorded in HH:MM AM/PM format when "End" is clicked) - Label Instructions Approval Process (Performed & Checked by Users in Sequence) - Label Instructions - Performed By - Performed Date - Checked By - Checked Date - Comments
	7.33.3.4	The solution shall allow the following access: - Read/Write: CRPMC/ICRPMC Pharmacist roles / Site Admin - View: Operation Supervisor, CRPMC/ICRPMC Technicians/QA
	7.33.3.5	The solution shall allow the following actions: - Approve / Exit / Reject (Returns to Label Operation Step)

Title: CRPMC Online Site Management and Ordering System (COSMOS) Configuration / Design Specification		Document ID: DS-012	Revision: V11.0
Document Type: Design Specification	Group: Pharma Services Group (PSG) / Clinical Trials Division (CTD)		Page: 93 of 124

URS ID	DS ID	Description
7.33.4		The solution shall allow the following access: - View: CRPMC/ICRPMC Pharmacist roles/QA - Read/Write: Operation Supervisor, CRPMC/ICRPMC Technicians, Site Admin
	7.33.4.1	The solution shall require the following fields: - Total number of labels received for operation (Numeric field) - Number of labels attached to labeling record (Numeric field, max 5 digits) - Number of labels used in labeling operation (Numeric field, no limit) - Number of labels damaged during operation (Numeric field, no limit) - Number of labels remaining from operation (Numeric field, no limit) - Number of labels accounted for (Auto-populated: B + C + D + E) - % Accountability (Auto-populated: (F)/(A)x100) - Label Accountability Description - Submit (Enabled Only If Accountability is 100%) / Exit
	7.33.4.2	The solution shall allow the following access: - Read/Write: CRPMC/ICRPMC Pharmacist roles / Site Admin - View: Operation Supervisor, CRPMC/ICRPMC Technicians/QA
	7.33.4.3	The solution shall allow the following actions: - Approve / Exit / Reject (Returns to Label Accountability Step)
	7.33.4.4	The solution shall allow the following access: - Read/Write: Site Admin/ QA - View: Operation Supervisor, CRPMC/ICRPMC Technicians / CRPMC/ICRPMC Pharmacist roles
	7.33.4.5	The solution shall allow QA to review and either approve or reject the request: - If approved, the sample moves from "Pre-Release" to "ACTIVE" status in Inventory - If rejected, the request returns to the Label Accountability Step - Approve / Exit / Reject (Returns to Label Accountability Step)
	7.33.4.6	The solution shall apply the same steps and workflow, with the type changed to "Other Auxiliary Labeling."
7.34.1		The solution shall allow update Protocol Registration to Protocol Management.
	7.34.1.1	The solution allows users to update protocol details under the protocol management section
	7.34.1.2	The solution shall allow users to do selection for Pipeline Included, Blinded, Open Label, Placebo Study, Number of Sites, Sample Size, Domestic/International, Contact details for PAB Protocol Pharmacist; Clinical Trial Manager/Specialist; CRPMC Pharmacist; Network Leadership
	7.34.1.3	The solution allows users to save the updated details and exit from it
	7.34.1.4	The solution allow users to update below additional fields under Product Management Button, saved it and exit it- 1. Short Dated Product: Yes/No (Radio button)

Title: CRPMC Online Site Management and Ordering System (COSMOS) Configuration / Design Specification		Document ID: DS-012	Revision: V11.0
Document Type: Design Specification	Group: Pharma Services Group (PSG) / Clinical Trials Division (CTD)		Page: 94 of 124

URS ID	DS ID	Description
		2. Commercial/Investigational Product: Binary (Radio button) 3. Purchased/Donated: Binary 4. Weight-Based Dosing: Yes/No 5. First Shipment Expected Date at CRPMC/ICRPMC: Date 6. First Administration Expected Date: Date 7. Actual Shipment Date: Automated Date from the shipping module when first shipped 8. Last Administration Expected Date: Date 9. Final Disposition: Return/Destroy 10. Child Resistant Closure: Yes/No 11. Expiration/Retest: Expiration/Retest 12. If Retest - Stability Time Point: Integer (No limit) 13. Manufacturer Contact for Complaints: Email Address (Optional field) 14. Manufacturer Contact for Temp Excursions: Email Address (Optional field) 15. Pharmaceutical Manufacturer Representative: Email, Phone (Optional field) 16. Net Required: Integer (Default: 0) (No limit) 17. Average % Requested: Integer (Default: 0) (No limit) 18. Pipeline Requested: Integer (Default: 0) (No limit) 19. Total Calculation: Net + Average + Pipeline (Calculated) 20. Received Quantity: Integer (Default: 0) (No limit)
	7.34.1.5	The solution shall allow users to add new sites

13.0 Integration Requirement

The following table maps the requirements for integration with other solutions:

FRS ID	DS ID	Description
8.1		The solution shall provide means for COSMOS to be integrated with FedEx
	8.1.1	The solution integration shall employ FedEx API to obtain tracking number and shipping label details
8.2		The solution shall provide means for COSMOS to be integrated with MKDenial
	8.2.1	The solution shall provide URL to access MKDenial or equivalent tool.

Title: CRPMC Online Site Management and Ordering System (COSMOS) Configuration / Design Specification		Document ID: DS-012	Revision: V11.0
Document Type: Design Specification	Group: Pharma Services Group (PSG) / Clinical Trials Division (CTD)		Page: 95 of 124

14.0 Reporting Requirement

The following table maps the requirements to the Reporting (Power BI) specifications.

FRS ID	DS ID	Description
9.1		The solution shall provide a link for internal user roles to access reports
	9.1.1	The reporting solution shall provide link in page of COSMOS which will redirect the users to Microsoft Power BI cloud service.
9.2		The solution shall display pre-defined reports available in dashboards.
	9.2.1	The reporting solution shall provide predefined developed reports in dashboards.
	9.2.2	The reporting solution shall provide separate dashboards for each user groups.
	9.2.3	The reporting solution shall offer the ability to users to view reports and dashboards present in Microsoft Power BI cloud service.
	9.2.4	The reporting solution shall provide the access to users to run the predefined reports present in cloud service.
	9.2.5	The reporting solution shall provide access to the CRPMC users to view dashboards.
	9.2.6	The reporting solution shall provide access to the CRPMC users to share dashboards.
	9.2.7	The reporting solution shall provide access to the CRPMC users to build dashboards.
9.3		The reporting solution shall permit reports to the following modules: Batch Record Blinded Inspection COA Approval Destruction Return

Title: CRPMC Online Site Management and Ordering System (COSMOS) Configuration / Design Specification		Document ID: DS-012	Revision: V11.0
Document Type: Design Specification	Group: Pharma Services Group (PSG) / Clinical Trials Division (CTD)		Page: 96 of 124

FRS ID	DS ID	Description
		Inventory Adjustment
		Inventory Management
		Investigator Registration
		Label Approval
		Logger Adjustment
		Logger Management
		Manufacturer / Vendor Registration
		Order Study Product
		Product Registration
		Product Transfer
		Protocol Registration
		Receipts
		Receiving Dashboard
		Receiving Loggers
		Recovery
		Re-Pass
		Samples Split
		Shipping Dashboard

Title: CRPMC Online Site Management and Ordering System (COSMOS) Configuration / Design Specification		Document ID: DS-012	Revision: V11.0
Document Type: Design Specification	Group: Pharma Services Group (PSG) / Clinical Trials Division (CTD)		Page: 97 of 124

FRS ID	DS ID	Description
		Site Registration User Registration
	9.3.1	The reporting solution shall provide reports from Inventory module.
	9.3.1.1	The reporting solution shall provide the detail information of available products in Inventory.
	9.3.1.2	The reporting solution shall contain required fields to display products details.
	9.3.1.3	The reporting solution shall contain Fields from Inventory Management table.
	9.3.1.4	The reporting solution shall have filters of every field on right side of report.
	9.3.1.5	The reporting solution shall allow users to apply filters on fields to see their required data in report.
	9.3.1.6	The reporting solution shall allow users to apply filter on Product Name field to choose the product.
	9.3.1.7	The reporting solution shall provide edit access to users to the report as per requirement.
	9.3.1.8	The reporting solution shall allow users to select visualizations of data to be displayed by Power BI supported Formats only.
	9.3.1.9	The reporting solution shall allow user to edit the visualizations as per their requirement.
	9.3.2	The reporting solution shall provide reports from Protocols module.
	9.3.2.1	The reporting solution shall provide three reports as below from Protocol module. 1.Protocol Details 2.Protocol Site 3.Protocol Product
	9.3.2.2	The reporting solution shall provide details information of protocols in Protocol Details report.

Title: CRPMC Online Site Management and Ordering System (COSMOS) Configuration / Design Specification		Document ID: DS-012	Revision: V11.0
Document Type: Design Specification	Group: Pharma Services Group (PSG) / Clinical Trials Division (CTD)		Page: 98 of 124

FRS ID	DS ID	Description
	9.3.2.3	The reporting solution shall contain fields from Protocol table.
	9.3.2.4	The reporting solution shall have filters of every fields on right side of report.
	9.3.2.5	The reporting solution shall contain details of Sites associated with different protocols in Protocol Site report.
	9.3.2.6	The reporting solution shall have field from Protocol Site table.
	9.3.2.7	The reporting solution shall have filters of every field on right side of report.
	9.3.2.8	The reporting solution shall display list of sites having grouped by function used on protocol field.
	9.3.2.9	The reporting solution shall provide DRL details in Protocol Product report.
	9.3.2.10	The reporting solution shall contain fields from Protocol Product table.
	9.3.2.11	The reporting solution shall display list of products having grouped by function used on protocol field.
	9.3.2.12	The reporting solution shall provide filters of all fields.
	9.3.2.13	The reporting solution shall allow users to see data as per their requirement by applying filters on required field.
	9.3.2.14	The reporting solution shall provide the required visualizations of data to be displayed by Power BI supported Formats only.
	9.3.3	The reporting solution shall provide reports from Receiving module.
	9.3.3.1	The reporting solution shall provide three reports as below from Receiving module: 1.Receiving Header 2.Receiving Details 3.Receiving Storage
	9.3.3.2	The reporting solution shall provide details of package having products in Receiving Header report.

Title: CRPMC Online Site Management and Ordering System (COSMOS) Configuration / Design Specification		Document ID: DS-012	Revision: V11.0
Document Type: Design Specification	Group: Pharma Services Group (PSG) / Clinical Trials Division (CTD)		Page: 99 of 124

FRS ID	DS ID	Description
	9.3.3.3	The reporting solution shall contain fields from Receiving Header table.
	9.3.3.4	The reporting solution shall have filters of every field on right side of report.
	9.3.3.5	The reporting solution shall allow users to see data as per their requirement by applying filters on required field.
	9.3.3.6	The reporting solution shall contain details of each products in Receiving Details report.
	9.3.3.7	The reporting solution shall contain fields from Receiving Details table.
	9.3.3.8	The reporting solution shall allow users to see required data in report by applying filters on products.
	9.3.3.9	The reporting solution shall provide information on storages of products in Receiving Storage report.
	9.3.3.10	The reporting solution shall contain fields from Receiving Details table.
	9.3.3.11	The reporting solution shall have filters of every fields on right side of report.
	9.3.3.12	The reporting solution shall allow users to apply filters on fields to see their required data in report.
	9.3.3.13	The reporting solution shall provide edit access to users to the report as per requirement.
	9.3.3.14	The reporting solution shall provide the required visualizations of data to be displayed by Power BI supported Formats only.
	9.3.4	The reporting solution shall provide reports from Shipping module.
	9.3.4.1	The reporting solution shall provide information of orders in Shipping report.
	9.3.4.2	The reporting solution shall contain fields from Shipping table and Shipping Details table.
	9.3.4.3	The reporting solution shall allow users to see data as per their requirement by applying filters on required field.
	9.3.4.4	The reporting solution shall provide the required visualizations of data to be displayed by Power BI supported Formats only.
	9.3.5	The reporting solution shall provide reports from Sites module.

Title: CRPMC Online Site Management and Ordering System (COSMOS) Configuration / Design Specification		Document ID: DS-012	Revision: V11.0
Document Type: Design Specification	Group: Pharma Services Group (PSG) / Clinical Trials Division (CTD)		Page: 100 of 124

FRS ID	DS ID	Description
	9.3.5.1	The reporting solution shall provide details of registered sites in Registered Sites report.
	9.3.5.2	The reporting solution shall contain field from Site table.
	9.3.5.3	The reporting solution shall have filters of every field on right side of report.
	9.3.5.4	The reporting solution shall allow users to see data as per their requirement by applying filters on required field.
	9.3.5.5	The reporting solution shall provide the required visualizations of data to be displayed by Power BI supported Formats only.
	9.3.6	The reporting solution shall provide reports from Users module.
	9.3.6.1	The reporting solution shall provide all the required information of users in User Report.
	9.3.6.2	The reporting solution shall contain field from ASPNetUsers table.
	9.3.6.3	The reporting solution shall have filters of every field on right side of report.
	9.3.6.4	The reporting solution shall allow users to see data as per their requirement by applying filters on required field.
	9.3.6.5	The reporting solution shall provide the required visualizations of data to be displayed by Power BI supported Formats only.
	9.3.7	The reporting solution shall provide reports from Transfers module.
	9.3.7.1	The reporting solution shall provide all the required information of product in Product Transfer report.
	9.3.7.2	The reporting solution shall contain field from Product table.
	9.3.7.3	The reporting solution shall have filters of every field on right side of report.
	9.3.7.4	The reporting solution shall allow users to see data as per their requirement by applying filters on required field.
	9.3.7.5	The reporting solution shall provide the required visualizations of data to be displayed by Power BI supported Formats only.
	9.3.8	The reporting solution shall provide reports from Batch Records module

Title: CRPMC Online Site Management and Ordering System (COSMOS) Configuration / Design Specification		Document ID: DS-012	Revision: V11.0
Document Type: Design Specification	Group: Pharma Services Group (PSG) / Clinical Trials Division (CTD)		Page: 101 of 124

FRS ID	DS ID	Description
	9.3.8.1	The reporting solution shall provide three reports as below from Batch Record module: 1.Batch Record Details 2.DAIDS Approval 3.Operation Report
	9.3.8.2	The reporting solution shall provide details of labelling of products in Batch Record Details report.
	9.3.8.3	The reporting solution shall contain field from Batch Record table.
	9.3.8.4	The reporting solution shall have filters of every field on right side of report.
	9.3.8.5	The reporting solution shall allow users to see data as per their requirement by applying filters on required field.
	9.3.8.6	The reporting solution shall provide edit access to users to the report as per requirement.
	9.3.8.7	The reporting solution shall provide approval details of label in DAIDS Approval report.
	9.3.8.8	The reporting solution shall contain field from Batch Record Inspection table.
	9.3.8.9	The reporting solution shall have filters of every field on right side of report.
	9.3.8.10	The reporting solution shall allow users to see data as per their requirement by applying filters on required field.
	9.3.8.11	The reporting solution shall provide edit access to users to the report as per requirement.
	9.3.8.12	The reporting solution shall provide details of completed operations on labelling in Operation report.
	9.3.8.13	The reporting solution shall contain field from Batch Record Operation table.
	9.3.8.14	The reporting solution shall provide labelling operation having group by function on date.
	9.3.8.15	The reporting solution shall have filters of every field on right side of report.

Title: CRPMC Online Site Management and Ordering System (COSMOS) Configuration / Design Specification		Document ID: DS-012	Revision: V11.0
Document Type: Design Specification	Group: Pharma Services Group (PSG) / Clinical Trials Division (CTD)		Page: 102 of 124

FRS ID	DS ID	Description
	9.3.8.16	The reporting solution shall allow users to see data as per their requirement by applying filters on required field.
	9.3.8.17	The reporting solution shall provide edit access to users to the report as per requirement.
	9.3.9	The reporting solution shall provide reports from Sample Splits module.
	9.3.9.1	The reporting solution shall provide details of samples in Sample splits report.
	9.3.9.2	The reporting solution shall contain field from the Sample table.
	9.3.9.3	The reporting solution shall have filters of every field on right side of report.
	9.3.9.4	The reporting solution shall allow users to see data as per their requirement by applying filters on required field.
	9.3.9.5	The reporting solution shall provide edit access to users to the report as per requirement.
	9.3.10	The reporting solution shall provide reports from ANSI Inspections module.
	9.3.10.1	The reporting solution shall provide two reports as below from Receiving module. 1.Receiving ANSI Report (Technician) 2. Receiving ANSI Report (QA)
	9.3.10.2	The reporting solution shall provide details of inspection in Receiving ANSI Report (Technician) report.
	9.3.10.3	The reporting solution shall contain field from Receipt Details table and Batch Record Inspection table.
	9.3.10.4	The reporting solution shall have filters of every field on right side of report.
	9.3.10.5	The reporting solution shall allow users to see data as per their requirement by applying filters on required field.
	9.3.10.6	The reporting solution shall provide edit access to users to the report as per requirement.
	9.3.10.7	The reporting solution shall provide details of inspection in Receiving ANSI Report (QA) report.

Title: CRPMC Online Site Management and Ordering System (COSMOS) Configuration / Design Specification		Document ID: DS-012	Revision: V11.0
Document Type: Design Specification	Group: Pharma Services Group (PSG) / Clinical Trials Division (CTD)		Page: 103 of 124

FRS ID	DS ID	Description
	9.3.10.8	The reporting solution shall contain fields from the Receipt Details table and Batch Record Inspection table.
	9.3.10.9	The reporting solution shall have filters of every field on right side of report.
	9.3.10.10	The reporting solution shall allow users to see data as per their requirement by applying filters on required field.
	9.3.10.11	The reporting solution shall provide edit access to users to the report as per requirement.
	9.3.11	The reporting solution shall provide reports from Manufacturers module.
	9.3.11.1	The reporting solution shall provide details of the Manufacturer in Manufacturer report.
	9.3.11.2	The reporting solution shall contain field from the Vendor table.
	9.3.11.3	The reporting solution shall have filters of every field on right side of report.
	9.3.11.4	The reporting solution shall allow users to see data as per their requirement by applying filters on required field.
	9.3.11.5	The reporting solution shall provide edit access to users to the report as per requirement.
	9.3.12	The reporting solution shall provide reports from Vendors module.
	9.3.12.1	The reporting solution shall provide details of Vendors in the Vendors report.
	9.3.12.2	The reporting solution shall contain field from MFG Order table.
	9.3.12.3	The reporting solution shall have filters of every field on right side of report.
	9.3.12.4	The reporting solution shall allow users to see data as per their requirement by applying filters on required field.
	9.3.12.5	The reporting solution shall provide edit access to users to the report as per requirement.
	9.3.13	The reporting solution shall provide reports from Repass module.
	9.3.13.1	The reporting solution shall provide repass details of sites in Repass report.

Title: CRPMC Online Site Management and Ordering System (COSMOS) Configuration / Design Specification		Document ID: DS-012	Revision: V11.0
Document Type: Design Specification	Group: Pharma Services Group (PSG) / Clinical Trials Division (CTD)		Page: 104 of 124

FRS ID	DS ID	Description
	9.3.13.2	The reporting solution shall contain field from Repass table.
	9.3.13.3	The reporting solution shall have filters of every field on right side of report.
	9.3.13.4	The reporting solution shall allow users to see data as per their requirement by applying filters on required field.
	9.3.13.5	The reporting solution shall provide edit access to users to the report as per requirement.
	9.3.14	The reporting solution shall provide reports from Recovery module.
	9.3.14.1	The reporting solution shall provide details of recovery of products in Recovery report.
	9.3.14.2	The reporting solution shall contain field from Recovery table.
	9.3.14.3	The reporting solution shall provide drill down to return and destruction report from recovery report.
	9.3.14.4	The reporting solution shall have filters of every field on right side of report.
	9.3.14.5	The reporting solution shall allow users to see data as per their requirement by applying filters on required field.
	9.3.14.6	The reporting solution shall provide edit access to users to the report as per requirement.
	9.3.15	The reporting solution shall provide reports from Destructions module.
	9.3.15.1	The reporting solution shall provide details of destructions of products in Destructions report.
	9.3.15.2	The reporting solution shall contain field from Destruction Details table.
	9.3.15.3	The reporting solution shall have filters of every field on right side of report.
	9.3.15.4	The reporting solution shall allow users to see data as per their requirement by applying filters on required field.
	9.3.15.5	The reporting solution shall provide edit access to users to the report as per requirement.
	9.3.16	The reporting solution shall provide reports from Returns module.

Title: CRPMC Online Site Management and Ordering System (COSMOS) Configuration / Design Specification		Document ID: DS-012	Revision: V11.0
Document Type: Design Specification	Group: Pharma Services Group (PSG) / Clinical Trials Division (CTD)		Page: 105 of 124

FRS ID	DS ID	Description
	9.3.16.1	The reporting solution shall provide edit access to users to the report as per requirement.
	9.3.16.2	The reporting solution shall provide details of return of products in Return report.
	9.3.16.3	The reporting solution shall contain fields from Return Details table.
	9.3.16.4	The reporting solution shall have filters of every field on right side of report.
	9.3.16.5	The reporting solution shall allow users to see data as per their requirement by applying filters on required field.
	9.3.17	The reporting solution shall provide reports from Adjustments module.
	9.3.17.1	The reporting solution shall provide details of return products in Return report.
	9.3.17.2	The reporting solution shall contain field from Return Details table.
	9.3.17.3	The reporting solution shall have filters of every field on right side of report.
	9.3.17.4	The reporting solution shall allow users to see data as per their requirement by applying filters on required field.
	9.3.17.5	The reporting solution shall provide edit access to users to the report as per requirement.
	9.3.18	The reporting solution shall provide reports from Investigators module.
	9.3.18.1	The reporting solution shall provide details of list of site investigators in Investigator report.
	9.3.18.2	The reporting solution shall contain field from Investigator table.
	9.3.18.3	The reporting solution shall have filters of every field on right side of report.
	9.3.18.4	The reporting solution shall allow users to see data as per their requirement by applying filters on required field.
	9.3.18.5	The reporting solution shall provide edit access to users to the report as per requirement.
	9.3.19	The reporting solution shall provide reports from Audit module.

Title: CRPMC Online Site Management and Ordering System (COSMOS) Configuration / Design Specification		Document ID: DS-012	Revision: V11.0
Document Type: Design Specification	Group: Pharma Services Group (PSG) / Clinical Trials Division (CTD)		Page: 106 of 124

FRS ID	DS ID	Description
	9.3.19.1	The reporting solution shall provide Inventory Audit Report.
	9.3.19.2	The reporting solution shall contain fields from Inventory table and Audit log table.
	9.3.19.3	The reporting solution shall provide Protocol Details Audit Report.
	9.3.19.4	The reporting solution shall contain fields from Protocol table and Audit Log table.
	9.3.19.5	The reporting solution shall provide Protocol Sites Audit Report.
	9.3.19.6	The reporting solution shall contain fields from Protocol Site table and Audit Log table.
	9.3.19.7	The reporting solution shall provide Protocol Products Audit Report.
	9.3.19.8	The reporting solution shall contain fields from Protocol Product table and Audit Log table.
	9.3.19.9	The reporting solution shall provide Receiving Header Audit Report.
	9.3.19.10	The reporting solution shall contain fields from Receiving Header table and Audit Log table.
	9.3.19.11	The reporting solution shall provide Receiving Details Audit Report.
	9.3.19.12	The reporting solution shall contain fields from Receiving Details table and Audit Log table.
	9.3.19.13	The reporting solution shall provide Shipping Details Audit Report.
	9.3.19.14	The reporting solution shall contain fields from Shipping table and Audit Log table.
	9.3.19.15	The reporting solution shall provide Registered Sites Audit Report.
	9.3.19.16	The reporting solution shall contain fields from Site table and Audit Log table.
	9.3.19.17	The reporting solution shall provide User Audit Report.
	9.3.19.18	The reporting solution shall contain fields from ASP Net Users table and Audit Log table.

Title: CRPMC Online Site Management and Ordering System (COSMOS) Configuration / Design Specification		Document ID: DS-012	Revision: V11.0
Document Type: Design Specification	Group: Pharma Services Group (PSG) / Clinical Trials Division (CTD)		Page: 107 of 124

FRS ID	DS ID	Description
	9.3.19.19	The reporting solution shall provide Product Transfer Audit Report.
	9.3.19.20	The reporting solution shall contain fields from Product table and Audit Log table.
	9.3.19.21	The reporting solution shall provide Batch Record Details Audit Report.
	9.3.19.22	The reporting solution shall contain fields from Batch Record table and Audit Log table.
	9.3.19.23	The reporting solution shall provide Label Inspection Audit Report.
	9.3.19.24	The reporting solution shall contain fields from Batch Record Inspection table, Batch Record table and Audit Log table.
	9.3.19.25	The reporting solution shall provide Batch Record Operation Audit Report.
	9.3.19.26	The reporting solution shall contain fields from Batch Record Operation table and audit Log table.
	9.3.19.27	The reporting solution shall provide Sample Splits Audit Report.
	9.3.19.28	The reporting solution shall contain fields from Sample table and Audit Log table.
	9.3.19.29	The reporting solution shall provide Vendors Audit Report.
	9.3.19.30	The reporting solution shall contain fields from Vendor table and audit Log table.
	9.3.19.31	The reporting solution shall provide Repass Audit Report.
	9.3.19.32	The reporting solution shall contain fields from Repass table and Audit Log table.
	9.3.19.33	The reporting solution shall provide Recovery Audit Report.
	9.3.19.34	The reporting solution shall contain fields from Return table, Destruction table and Audit Log table.
	9.3.19.35	The reporting solution shall provide Destructions Audit Report.
	9.3.19.36	The reporting solution shall contain fields from Recovery table, Return table and Audit Log table.

Title: CRPMC Online Site Management and Ordering System (COSMOS) Configuration / Design Specification		Document ID: DS-012	Revision: V11.0
Document Type: Design Specification	Group: Pharma Services Group (PSG) / Clinical Trials Division (CTD)		Page: 108 of 124

FRS ID	DS ID	Description
	9.3.19.37	The reporting solution shall provide Return Audit Report.
	9.3.19.38	The reporting solution shall contain fields from Recovery table, Destructions table and Audit Log table.
	9.3.19.39	The reporting solution shall provide Adjustments Audit Report.
	9.3.19.40	The reporting solution shall contain fields from Adjustment table and Audit Log table.
	9.3.19.41	The reporting solution shall provide Investigators Audit Report.
	9.3.19.42	The reporting solution shall contain fields from Investigator table and Audit Log table.
	9.3.19.43	The reporting solution shall provide Manufacturer Order Audit Report.
	9.3.19.44	The reporting solution shall contain fields from Manufacturer Order table and Audit Log table.
	9.3.19.45	The reporting solution shall have filters of every field on right side of report.
	9.3.19.46	The reporting solution shall allow users to see data as per their requirement by applying filters on required field.
	9.3.19.47	The reporting solution shall provide edit access to users to the report as per requirement.
9.4		The reporting solution shall allow the users to copy the predefined reports.
	9.4.1	The reporting solution shall provide ability to users to export the reports in .pbix format.
	9.4.2	The reporting solution shall provide the users to import the exported report in Power BI desktop.
	9.4.3	The reporting solution shall provide ability authorized user to only modify the report with visualizations.
9.5		The reporting solution shall allow users to configure their own dashboards
	9.5.1	The reporting solution shall allow the users to edit the visualizations of the report, users should have the valid license version of Power BI desktop installed on their desktop or laptop.

Title: CRPMC Online Site Management and Ordering System (COSMOS) Configuration / Design Specification		Document ID: DS-012	Revision: V11.0
Document Type: Design Specification	Group: Pharma Services Group (PSG) / Clinical Trials Division (CTD)		Page: 109 of 124

FRS ID	DS ID	Description
	9.5.2	The reporting solution shall allow the users to download the reports in .pbix format.
	9.5.3	The reporting solution shall allow the users to import the Power BI report to Power BI desktop.
	9.5.4	The reporting solution shall allow the users to pin reports to create new dashboard as per their requirement.
9.6		The reporting solution shall allow the users to download reports in the below editable formats Excel CSV
	9.6.1	The reporting solution shall provide the users to download the reports in Power BI supported editable formats, ex: xlsx (Excel) and .csv formats.
	9.6.2	The reporting solution shall provide the users to download the reports in Power BI supportable formats only.
9.7		The reporting solution shall restrict users from editing or deleting predefined reports.
	9.7.1	The reporting solution shall allow the developer to set security for users while sharing dashboards.
	9.7.2	The reporting solution shall allow the applied security to prevent users from editing predefined reports.
	9.7.3	The reporting solution shall restrict the users from editing the base data in reports.
	9.7.4	The reporting solution shall restrict the users from deleting the base data in reports.
9.8		Report reporting solution shall provide the following pre-defined reports: 1. Destruction Report 2. Distribution Report 3. Inventory Report 4. Receiving Report

Title: CRPMC Online Site Management and Ordering System (COSMOS) Configuration / Design Specification		Document ID: DS-012	Revision: V11.0
Document Type: Design Specification	Group: Pharma Services Group (PSG) / Clinical Trials Division (CTD)		Page: 110 of 124

FRS ID	DS ID	Description
		5. Recovery Report 6. Repass Report 7. Returns Report
	9.8.1	Report reporting solution shall provide the following pre-defined reports that are not editable: 1. Destruction Report 2. Distribution Report 3. Inventory Report 4. Receiving Report 5. Recovery Report 6. Repass Report 7. Returns Report

15.0 Compliance Requirements

The following table maps requirements for security and GxP compliance:

FRS ID	DS ID	Description
10.1.1		The solution shall validate the users that enter the web application.
	10.1.1.1	The solution shall validate internal and external user access table
	10.1.1.2	The solution shall validate internal users via Active Directory
10.1.2		The solution shall require each user to have unique user ID and password combination.

Title: CRPMC Online Site Management and Ordering System (COSMOS) Configuration / Design Specification		Document ID: DS-012	Revision: V11.0
Document Type: Design Specification	Group: Pharma Services Group (PSG) / Clinical Trials Division (CTD)		Page: 111 of 124

FRS ID	DS ID	Description
	10.1.2.1	The solution shall require each user to have unique user ID and password combination.
10.2.1.2		The solution must provide the ability to generate accurate and complete copies of records in both human readable and electronic form suitable for inspection, review, and copying (21 CFR Part 11 Sec. 11.10(b)).
	10.2.1.2.1	The solution shall employ a relational database accessible to external queries for extraction of accurate and complete copies of records in both human readable and electronic form
10.2.1.3		The solution must provide the ability to use secure, computer-generated, timestamped audit trails to independently record the data, operator, date and time of operator entries and actions that create, modify, or delete electronic records (21 CFR Part 11 Sec. 11.10(e)).
	10.2.1.3.1	The solution shall employ secure, computer-generated, time-stamped audit trails to independently record the data, operator, date and time of operator entries and actions that create, modify, or delete electronic records
10.2.1.5		The solution shall prevent the modification or deletion of audit trail files.
	10.2.1.5.1	The solution shall prevent user modification or deletion of audit trail files.
10.2.1.6		The solution shall restrict users from disabling the audit trail function.
	10.2.1.6.1	The solution shall prevent users from disabling the audit trail function.
10.2.1.7		The Audit trail shall record: Username Date and time (h/min/sec), Date and Time will be recorded as per Universal Coordinated Time (UTC) Indication of record (or file) creation, modification, or deletion In case of modification or deletion: old value Reason of change (if applicable)

Title: CRPMC Online Site Management and Ordering System (COSMOS) Configuration / Design Specification		Document ID: DS-012	Revision: V11.0
Document Type: Design Specification	Group: Pharma Services Group (PSG) / Clinical Trials Division (CTD)		Page: 112 of 124

FRS ID	DS ID	Description
	10.2.1.7.1	The Audit trail shall record: Username Date and time (h/min/sec), Date and Time will be recorded as per Universal Coordinated Time (UTC) Indication of record (or file) creation, modification, or deletion In case of modification or deletion: old value Reason of change (if applicable)
10.2.1.8		The solution must provide the ability to activate, modify or disable a user's account (21 CFR Part 11 Sec. 11.10(d)).
	10.2.1.8.1	The solution must provide the ability to activate, modify or disable a user's account
10.2.1.9		The solution must provide the ability to automatically disable a user's account after a preconfigured number (e.g., 5) repeated attempts at unauthorized access (21 CFR Part 11 Sec. 11.10(d)) via the login screen.
	10.2.1.9.1	The solution must provide the ability to automatically disable a user's account after five (5) failed attempts.
10.2.1.10		The solution must provide the ability to perform operational checks to enforce sequencing of events, including detecting when an entry is performed out-of-sequence (21 CFR Part 11 Sec. 11.10(f)).
	10.2.1.10.1	The solution shall employ workflows to enforce sequencing of events.
10.2.1.11		Records produced by the system or records used as system input shall be kept in a readily retrievable electronic format.
	10.2.1.11.1	Records produced by the system or records used as system input shall be kept in a relational database in a readily retrievable electronic format.
10.2.1.12		The retained records shall be protected against intentional or accidental modification or deletion.
	10.2.1.12.1	The retained records shall be protected against intentional or accidental modification or deletion.
10.2.1.13		Record changes shall not obscure previously recorded information.

16.0 IT Environment and Controls

IT environment for COSMOS is only managed and controlled by authorized Thermo Fisher Scientific IT staff. The servers and network are managed by network engineers and administrators who monitor them in real-time for any unauthorized or suspicious activity while the application and database are monitored by the application team. Any changes to the infrastructure or code are governed by the established SOPs (SOP-000003242 Software Validation Lifecycle and SOP000233217, CTD GTW Change Control Management), these are documented and approved using a Quality Management System called TrackWise. The software code is hosted on a version control system which allows IT to track all changes made to the system and restore to a previous state if required. IT performs monthly scans of the environment for any potential vulnerabilities and generates a report with a summary of the findings. The application team evaluates the vulnerabilities on the reports and applies the patches to the test systems first to determine the quality of the patch. If the patch doesn't break any existing functionality of the system, the patch is then deployed to the production servers. In the event of a patch failing any tests, the team evaluates other means necessary to patch the system.

Title: CRPMC Online Site Management and Ordering System (COSMOS) Configuration / Design Specification		Document ID: DS-012	Revision: V11.0

17.0 COSMOS Transition Summary

COSMOS – Notification Enhancement does not impact the presentation or business layer. This enhancement updates a windows service that does not impact existing COSMOS functionality and ongoing operations. Existing data is also not impacted during implementation.

The new SAHPRA/GMO module automates the management of SAHPRA and GMO-specific inventory quantities which were earlier done manually. Integrated under the Inventory menu, it allows authorized roles to monitor and update quantities directly, with changes reflected across all applicable inventory records. This module includes automated email notifications for SAHPRA thresholds and GMO expirations.

The Metrics module provides role-based access to generate and view graphical and tabular reports, including dashboards with charts and exportable data. It enhances visibility into order and user-level activities, supporting data-driven decisions.

The Protocol Registration module has been renamed to Protocol Management. Protocol Management and Product Management buttons have been introduced to capture key clinical and product-related details. Validation logic and enhancements to the Sites section are also included to ensure data consistency.

The Receiving Batch Record module introduces a new workflow for batch records initiated upon receipt, with enhanced Auxiliary Label options and automated actions based on pharmacist selection. The process includes multi-step labeling, inspection, accountability, and QA approval to ensure compliance and traceability.

The User Registration Dashboard is enhanced with separate tiles for Active and Inactive users, improving clarity and navigation. A new "Download Active Users" feature allows users to export filtered user lists by role, streamlining user management and reporting.

Automated inventory thresholds and alerts have been implemented to notify pharmacists when stock drops to 50%, 30%, 25%, or 20%. Changes include email notifications, real-time shipping alerts, and a new Reserve Quantity field for better inventory tracking.

The addition of the new modules and enhancement of existing modules adds nine new database tables that does not impact existing COSMOS functionality and ongoing operations. Existing data is also not impacted during implementation.

Title: CRPMC Online Site Management and Ordering System (COSMOS) Configuration / Design Specification		Document ID: DS-012	Revision: V11.0
Document Type: Design Specification	Group: Pharma Services Group (PSG) / Clinical Trials Division (CTD)		Page: 116 of 124

18.0 Database Design

The solution database will be SQL Server 2019. The file containing the table design is stored in the following location.

(SharePoint Location: FBS Controlled Documents> Software Validations> Design Specifications
– DS> COSMOS> SQL Server 2019 COSMOS Table Design - 2025.xlsx)

Title: CRPMC Online Site Management and Ordering System (COSMOS) Configuration / Design Specification		Document ID: DS-012	Revision: V11.0
Document Type: Design Specification	Group: Pharma Services Group (PSG) / Clinical Trials Division (CTD)		Page: 117 of 124

19.0 ER Diagram

The file stored in the following location contains the ER diagram for the solution

(SharePoint Location: FBS Controlled Documents> Software Validations> Design Specifications
– DS> COSMOS> ER Diagram.pdf)

Document Type: Design Specification	Group: Pharma Services Group (PSG) / Clinical Trials Division (CTD)		Page: 118 of 124

20.0 Existing or New System Integration

This release implements one way integration of TMF content from COSMOS to CRG Veeva Vault eTMF. *Refer to section 12.0 elements, 7.24.x.*

22.0 Appendix A – Class Diagrams

Security class diagram

Title: CRPMC Online Site Management and Ordering System (COSMOS) Configuration / Design Specification		Document ID: DS-012	Revision: V11.0
Document Type: Design Specification	Group: Pharma Services Group (PSG) / Clinical Trials Division (CTD)		Page: 120 of 124

23.0 Appendix B – Sequence Diagrams

The Visio file stored in the following location contains important functionality sequence diagram:
(SharePoint Location: FBS Controlled Documents> Software Validations> Design Specifications – DS> COSMOS> COSMOS_SequenceDiagrams.vsd)

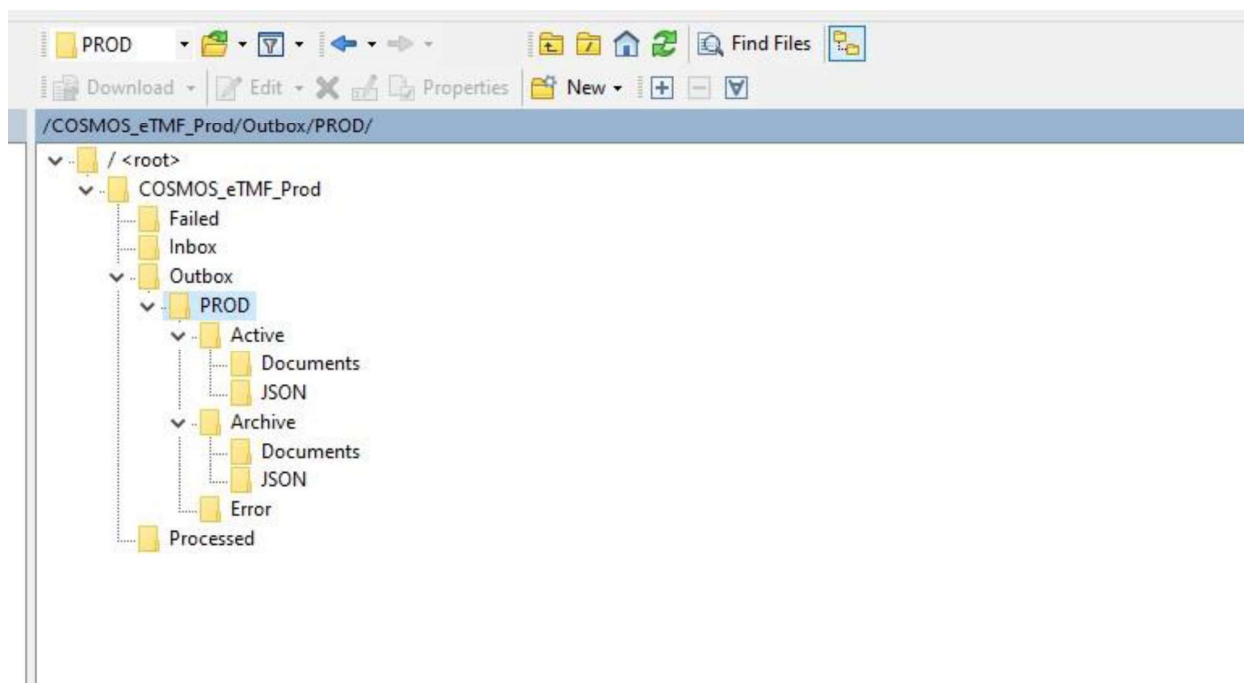

Title: CRPMC Online Site Management and Ordering System (COSMOS) Configuration / Design Specification		Document ID: DS-012	Revision: V11.0
Document Type: Design Specification	Group: Pharma Services Group (PSG) / Clinical Trials Division (CTD)		Page: 121 of 124

24.0 Appendix C – sFTP Structure for COSMOS - eTMF Integration

The sFTP Structure is shown in the following image.

JSON data interchange files and associated content files are pushed to sFTP Active/JSON and Active/Documents subfolders, respectively for eTMF middleware consumption and processing. Fully processed JSON files are moved to the sFTP Archive/JSON folder with error logs and daily logs written to the sFTP Error folder by the middleware. *Refer to CRG CC-116377 (C-REQ), System Design Specification_Cosmos Veeva Integration_V1.0 for the middleware design.*

Maintenance of the transient files in the sFTP Active/Documents, Archive/JSON and Archive/Documents is performed by the COSMOS eTMF Service. *Refer to Software Design for additional details.*

25.0 Appendix D – JSON Data Interchange File Structure and Field Mapping

A data interchange file exists to export COSMOS TMF content for each classification, as follows:
