

Carrier 20 Ton Chiller

Solicitation: FA469026Q0021

Questions and Answers

5 May 2026

Q1: Will you give your definition of start up?

A1: A chiller has a start-up sheet, which is a detailed checklist used to ensure proper commissioning, operational verification, and data recording for both air-cooled and water-cooled chillers. The sheet is in the back of the operator manual.

Q2: Please advise if you only need this delivered?

A2: Delivery and start up is required. The on base HVAC shop will install the chiller.
