

STATEMENT OF OBJECTIVES (SOO)

SonarQube FA830726RB030

Purpose:

The purpose of this Government purchase is to provide Platform One (P1) the ability to create and maintain software threat models and secure compliant code in support of the United States Air Force (USAF) Development Security Operations (DevSecOps) while utilizing the flexibility of the cloud. SonarQube is a Code Quality Assurance tool that collects and analyzes source code and provides reports for the code quality of P1.

Scope or Mission:

SonarQube is deployed on Impact Level 2 and Impact Level 4 in support of the P1 Party Value Stream. SonarQube combines static and dynamic analysis tools and enables quality to be measured continually over time. SonarQube ensures code reliability, Application security, and reduces technical debt by making the code base clean and maintainable in support of P1 Party Bus Value Stream customers. SonarQube Enterprise is a direct benefit to the Government in the interest of cost and time (development schedule). SonarQube improves productivity by enabling Development Security Operations (DevSecOps) teams to identify and muzzle redundancy and duplication of code inside the P1 software ecosystem.

Period and Place of Performance.

PoP:

Base: 15 May 2026-14 May 2027

OY1: 15 May 2027-14 May 2028

OY2: 15 May 2028-14 May 2029

Place of Performance: Platform One/HNCX
420 Broadway
San Antonio, TX 78205

Background:

P1 requires an application that provides the framework to track, collect and analyze source code for DevSecOps, directly supporting customers P1 works with.

Performance Objectives (required results):

SonarQube facilitates the Party Bus Value Stream engineers' requirements to decrease application size, code complexity, time and cost of maintenance, and make code easier to read and understand for all users. SonarQube is a critical piece of the Party Bus software

development to speed delivery of tested and approved code in DevSecOps in meeting the needs of the war-fighter.

This is an initial license purchase for P1.

The SonarQube contract shall provide:

Line Number	Part #	Description	QTY
		Base Year	
0001	SQS-EE5M	SonarQube Server Enterprise Edition up to 5M LOCs	1
0002	SQS-EE10M	SonarQube Server Enterprise Edition up to 10M LOCs	1
0003	SQS-EE10M w support	SonarQube Server Enterprise Edition up to 10M LOCs, with Support	1
		OY1	
1001	SQS-EE5M	SonarQube Server Enterprise Edition up to 5M LOCs	1
1002	SQS-EE10M	SonarQube Server Enterprise Edition up to 10M LOCs	1
1003	SQS-EE10M w support	SonarQube Server Enterprise Edition up to 10M LOCs, with Support	1
		OY2	
2001	SQS-EE5M	SonarQube Server Enterprise Edition up to 5M LOCs	1
2002	SQS-EE10M	SonarQube Server Enterprise Edition up to 10M LOCs	1
2003	SQS-EE10M w support	SonarQube Server Enterprise Edition up to 10M LOCs, with Support	1

- License keys shall be emailed to (Robert.mckeithan.1@us.af.mil, AFLCMC.HNCX.P1LicenseManagement@us.af.mil), and must be delivered within 5 business days After Receipt Of, ARO, Award.

Operating Constraints:

The Contractor shall have a single POC (Point of Contact) for coordination with the P1 Program/Acquisition Manager (PM/AM) and the Procurement Contracting Officer (PCO). Contractor shall provide necessary licenses / license keys, timely identification of issues, root cause remedies and effective communication of all licenses updated / timelines / expiration dates.
