
Statement of Work (SOW)

- **INTRODUCTION:** 5,000lb capacity stand-up electric forklift, pallet truck scale with printer, and electric pallet truck.
- **BACKGROUND:** Our unit requires the procurement of one (1) 5,000 lb. capacity stand-up electric forklift to support the material handling operations for the newly formed Munitions Squadron, in addition to a pallet truck scale with a printer and an electric pallet truck. This equipment is essential for personnel in the 2T0X1 Traffic Management career field to safely and efficiently handle the movement of cargo and munitions.

The recent activation of the new Munitions Squadron has led to an increase in the volume of cargo and munitions that must be processed, loaded, and offloaded onto carriers' equipment. The 2T0X1 Traffic Management personnel are tasked with the safe and efficient execution of these duties, which are critical to the wing's operational readiness. Currently, the squadron lacks the appropriate material handling equipment to manage the onload and offload of heavy crates and pallets. The acquisition of a 5,000 lb. electric forklift, a pallet truck scale with a printer, and an electric pallet truck is a critical first step to establishing safe and effective initial operations for the squadron. This forklift will be the primary workhorse for moving heavy assets off and on carriers during shipping and receiving. The primary responsibilities of the 2T0X1 career field include managing traffic management activities, utilizing military and commercial transport, and properly packaging and arranging cargo. The requested forklift and pallet trucks are a foundational tool that will enable our personnel to perform these core duties in a safe, efficient, and timely manner. Failure to procure this essential piece of equipment will have the following negative impacts:

- **Increased Safety Risks:** Requiring personnel to manually lift and move heavy munitions and cargo will dramatically increase the risk of serious injury and compromise workplace safety.
 - **Mission Inefficiency:** Without the proper equipment, the time required for loading and unloading operations will be significantly longer, creating bottlenecks in the supply chain and negatively impacting the operational tempo and readiness of the wing.
 - **Potential for Damaged Assets:** Improper handling of sensitive munitions and valuable government assets increases the likelihood of damage, which can lead to costly replacements, mission delays, and potential safety hazards.
- **REQUIREMENTS:** The contractor shall provide the following:

Description	Quantity
5,000 lb. stand-up electric forklift	1
Pallet Truck Scale with Printer (Fork Size 48 x 27") Capacity 5K lbs. x 1lb, Shipping labels 380 – Fork Height 3 1/3" lowered, 7 1/2" raised 220-degree steering arc.	1
Electric Pallet Truck (Fork Size 45 x 27") Load Capacity 4.5K lbs. Rechargeable Battery 224Ah, Drive Motor .90 kw AC, Wheel Diameter 9 2/3" – 180-degree steering arc, Maintenance free batteries w/ built in charger, 3 to 7 1/2" lift range.	1
2-year preventative maintenance warranty	1
Shipping	1

- **Salient Features:** The equipment must meet the following specifications:
 - 10ft mast lift
 - Non-marking tires
 - Safety lights and horn
 - Lithium-ion battery
 - Stand-up operator type
 - Side Shifter

 - **DELIVERY POINT:** 137 SOLRS Attn: SMSgt Dishon, Kimberly 5612 Air Guard Dr. Bldg. 1047 Oklahoma City, OK, 73179 kimberly.dishon@us.af.mil Telephone: (405) 686-5447
