

NATIONAL AERONAUTICS AND SPACE ADMINISTRATION
NASA SHARED SERVICES CENTER

RECOMMENDATION AND DETERMINATION TO SOLICIT FROM ONE SOURCE
OR BRAND NAME

PICK ONE

Sole Source:

☒ I recommend that NASA, NASA Shared Services Center negotiate with Green Hills Software LLC only for FY26 Green Hills Annual Support Renewal. The total estimated cost of this effort is [REDACTED] and the estimated period of performance or lead-time for delivery is 07/01/2026 - 06/30/2027.

OR

Brand Name Justification:

☐ I recommend that NASA, NASA Shared Services Center negotiate only with vendors who can provide the subject brand name from Manufacture Name for Product being purchased. The total estimated cost of this effort is \$Dollar Amount and the estimated period of performance or lead-time for delivery is Date.

This recommendation is for the acquisition of supplies or services determined to be reasonably available from only one source/only one manufacture. Competition is impractical for the following reasons (please answer the questions below):

1. **What are the reasons for soliciting only the suggested source/suggested brand name?** Please provide the unique characteristics of the items or services along with the supporting rationale and the market research performed to substantiate your reason for the suggested source/brand name.

The renewal of the requested software is being used for test and analysis in the JSC/Kedalion lab. It does not result in the production of flight software products. It is used for developmental testing in local integration and test labs. This purchase is a result of extensive research conducted by the Orion prime contractor, Lockheed Martin. Part of the Kedalion charter is to evaluate the hardware and software tool chains that have been proposed by the Orion prime contractor. Kedalion is the place where the NASA Orion Avionics team will perform hands on evaluation and utilization of all hardware and software tools as part of its insight and oversight responsibilities and integration activities. In order to execute that independent evaluation, Kedalion must procure the identical tools as defined in the Lockheed Martin Orion Tool chain. The use of these tools in Kedalion allows the government to understand issues and at the same time offer potential solutions, thus potentially saving money over the project life cycle.

2. **What is the impact to the government if another vendor/brand is used?** Include any dollar, schedule, or compatibility impacts if possible.

This acquisition is for the purchase of a safety and security critical product. The introduction of a new vendor/product to meet this functional requirement would have repercussions on project timelines, budgets, and staff. Time delays would result from evaluating different products and transitioning to a potentially unfamiliar product. Furthermore, there is a possibility that project team members would need training to become proficient with the alternative product. The overall impact of such a change would be considerable. To pursue the evaluation or procurement of an alternate software service would be both operationally cost and time prohibitive.
