

STATEMENT OF WORK

1. Objective/Requirements

One (1) Benchtop Network Analyzer, ZNLE6, is required for signal and power integrity analysis for Wallops Arc-Second Pointer (WASP) System avionics circuits and electronics starting CY 2026.

2. Characteristics, Scope, and Specs

The Benchtop Network Analyzer's requirements are as follows:

- Communication & Electrical characteristics must be:
 - Communication:
 - Ethernet/LAN*: 10/100/1000BASE-T
 - USB*: 3.0 or C
 - Signal and Electrical:
 - Frequency range*: 1MHz-6GHz with possibility of extension of lower end of the frequency to 100KHz
 - Dynamic range*: greater or equal to 110 dB
 - Number of test ports*: 2
 - Noise Floor*: less or equal to -120 dBm (1 Hz)
 - *Capability*: Time domain analysis & distance-to-fault measurements (or option to add these two capabilities.)
- Physical characteristics must be:
 - Net Weight: less than 13.5lb
 - Width: less than 16.5"
 - Height: less than 7.5"
 - Length: less than 9.5"

3. Place of Performance

No Requirement

4. Period of Performance

Delivery is required 5 weeks after acceptance of the contract.
