

SYNOPSIS FOR QUALIFIED A-E POOL – ARCHITECT-ENGINEERING (A-E) SERVICES (full and open) to support the planning, design and Title II services for construction, repairs, renovations, restorations and modernizations of facilities at Vance AFB, Oklahoma and Sheppard AFB, Wichita Falls, Texas.

THIS ANNOUNCEMENT IS NOT A REQUEST FOR PROPOSAL. NEITHER THE GOVERNMENT NOR ASRC FEDERAL (ASRC) WILL PAY OR REIMBURSE ANY COSTS ASSOCIATED WITH RESPONDING TO THIS REQUEST. THE GOVERNMENT AND ASRC IS UNDER NO OBLIGATION TO AWARD A CONTRACT AS A RESULT OF THIS ANNOUNCEMENT.

1. A-E POOL INFORMATION

This requirement is being procured in accordance with the Brooks Act as implemented in FAR 36.6. Firms will be selected for negotiation based on demonstrated competence and qualifications for the required work that may be offered, after being selected to be part of the A-E pool. Refer to section, "5. Selection Process", for general information on the A-E selection process.

A-E services are required for site investigation, engineering plans and studies, concept design, final design, or construction phase services. The applicable NAICS code is 5413, Architectural, Engineering, and Related Services. This announcement is open to all businesses regardless of size. ASRC is contemplating creating a pool of qualified architectural and engineering firms from which future service contracts may be offered. Only firms in the pool will be considered for opportunities that may result in awarding a firm fixed priced contracts. The initial service contract is anticipated to be awarded in the summer of 2026 and completed in the spring of 2027.

All firms will be required to submit SF330 for this Request for Qualifications Notice. Only A-E Teams responding to this solicitation and found to be qualified will be considered for inclusion in the A-E pool. Being part of the A-E pool is not a guarantee of being offered future contract opportunities. No contract will result in being selected to participate in the A-E pool, only firms found to be the most highly qualified, after interviewing will be offered a statement of work (SOW) on specific projects.

2. PROJECT INFORMATION

Possible contract opportunities may include work related to: existing mission assets such as airfield pavement repairs, utility system repairs or facility repairs. Some projects may be related to the bed-down mission of the future T-7A aircraft.

Airfield pavement repairs may commonly include geotechnical investigations, repair-in-kind pavement distresses and construction ordering considerations.

Utility system repairs may commonly include replacement of pipes or electrical conductors.

Renovation scopes may commonly include site, building envelope, building interiors, and engineering systems.

Environmental scope of work may require preparation of criteria to address the abatement of ACM, PFAS/PFOA or other hazardous materials.

Project management scope and project inspection scope may commonly result in on-site construction submittal coordination and on-site construction inspection. Offices may be provided in government facilities, as well as access to the government computer network.

Projects may require sustainability design and compliance with either the GBCI “Guiding Principles Assessment for Department of Defense” program or the GBI “Department of Defense Guiding Principles Compliance for New Construction & Comprehensive Replacement” program.

The estimated construction costs for possible contract opportunities will not be disclosed at this time. Generally, projects will have a construction value of between approximately \$750,000 and \$7,500,000. Cost estimates must be prepared using the Corps of Engineers Micro Computer Aided Cost Estimating System (MCACE) – Second Generation (MII) and Estimated MILCON Replacement Cost (ERC) must be prepared with Parametric Aided Cost Estimating System (PACES). The A-E is responsible for accomplishing designs and preparing drawings using computer-aided design (CAD) and delivering a BIM model in Autodesk Revit software as well as Autodesk ACAD or Civil 3D, current edition as appropriate. Drawings shall be compliant with the current A/E/C CAD standard available from the CAD/BIM Technology Center and the BIM guideline available at (<https://cadbimcenter.erdcdren.mil/Default.aspx>).

3. RESPONSE TO SOLICITATION SUBMISSION REQUIREMENTS:

A-E Teams will be selected in accordance with FAR section 36.602-1. A-E Teams must submit a SF330 package of qualifications for review by ASRC and approved by Vance AFB Government Personnel.

The selection criteria for this request are listed below in descending order of importance. ASRC shall evaluate each potential A-E Team in terms of its:

1. Specialized experience and technical competence in (a) the design of military renovation projects, per applicable codes and UFC criteria, (b) experience in energy conservation, pollution prevention, waste reduction, and use of recovered materials and demonstrated familiarity with either the GBCI “Guiding Principles Assessment for Department of Defense” program or the GBI “Department of Defense Guiding Principles Compliance for New Construction & Comprehensive Replacement” program, and (c) producing quality designs based on evaluation of a firm’s design quality management plan (DQMP). The evaluation will consider the management approach, coordination of disciplines and subcontractors, quality control procedures, and prior experience of the prime firm and any significant subcontractors on similar projects.
2. Qualified professional personnel in these key disciplines: project management (architect or engineer), architecture, interior design, fire protection engineering, mechanical engineering, electrical engineering, structural engineering, civil engineering, construction manager and construction inspector. The lead architect or engineer in each discipline must be registered to practice in the appropriate professional field. The evaluation will consider education, certifications, training, registration, overall and relevant experience, and longevity with the firm. Final deliverables must be stamped and signed by professionals registered in the State of

Oklahoma or Texas, as appropriate.

3. Past performance on contracts with Government agencies and private industry with respect to cost control, quality of work, and compliance with performance schedules.
4. Capacity to complete Air Force planning charrettes (PCR-1 or CCRs), design documents in various disciplines related to common Air Force facilities, title II services (construction management and inspection). ASRC Local purchase office will contract services.
5. Knowledge of the Vance and Sheppard AFB installation.

4. SOLICITATION SUBMISSION REQUIREMENTS

The SF330, parts A thru G should be limited to 40 numbered pages (8.5"x11") of easily readable text (size 11 font), graphics and pictures. Part H may also be included, is not limited in length, and is not required, but is encouraged to provide the review committee additional insight into the capabilities of the firm.

5. SELECTION PROCESS

The intent of the ASRC and A-E Team arrangement is to facilitate the timely, transparent, and efficient teaming between the A-E Team and ASRC to meet the various needs of Vance and Sheppard AFB during the remainder of calendar year 2026 and 2027. This opportunity may be extended to last for a total of 5 years, if ASRC (or subsidiary) is successful in being awarded the next base operations service contract(s).

After receiving the SF330 packages, a committee comprised of ASRC staff architects, engineers, and leadership will review the SF330 packages according to FAR 36.602-2 thru 36.602-4.

Submissions will be evaluated based on stated services in the SF330.

1. Each committee member will independently review the SF330s and evaluate the suitability of each A-E Team for inclusion in the AE pool on the submission requirements listed above.
2. The committee will meet, and by consensus agree to a short-list of the most qualified A-E Teams, based solely on the SF300 data. These teams will be notified of their status as part of the qualified pool of A-E contractors.
3. When a contract opportunity arises, the review committee will review the SF330s in the pool and select at least three firms to interview for the specific opportunity.
4. The most qualified teams will be notified of the opportunity and then invited to an telephone/virtual interview for the purpose of answering clarifying questions related to their SF 330 submission. Depending on the nature of the opportunity, the notified firms may present specifics related to the opportunity. Details will be provided as required by ASRC.
5. Upon conclusion of the interviews, the committee will rank the most qualified teams. The rankings will be shared with the 71st ISS/CE Flight representatives. With concurrence, ASRC Local Purchase will provide the highest rank team the Statement of Work in order to begin negotiating a fee for the project.

Upon successful conclusion of the fee negotiations, the A-E Team will proceed with the design process in accordance with the Statement of Work and at the direction of the ASRC managing Architect or Engineer.
