Failure to comply with these clauses may result in disqualification or termination of the contract.

E. SAM Registration

The Government emphasized that registration in the System for Award Management (SAM) is mandatory for this contract. Prospective contractors must be fully registered in the SAM database at the time they submit their offer, in accordance with FAR 4.1102. Vendors are strongly encouraged to begin the SAM registration process as early as possible to avoid delays. If a vendor is unable to complete SAM registration, they must promptly notify the Procurement Office. In such cases, the requirements outlined in FAR 52.204-90 and FAR 52.204-91 will apply, providing alternate guidance for SAM registration.

Procurement Office can provide guidance documents for SAM registration (www.sam.gov).

F. Evaluation factors (per Section 4 – Evaluation (Summary for Minutes))

Offerors were informed that the Government plans to award a single Indefinite Quantity Contract (one base year plus four option years) using FAR Part 13 comparative evaluation procedures to the responsible offeror providing best value, considering technical factors, past performance, and price.

First, proposals will undergo a compliance review, including a **C-SCRM Go/No-Go check** based on a completed C-SCRM Questionnaire and, where applicable, a Secure Software Development Attestation (or equivalent). Proposals that fail to meet these requirements or otherwise do not conform to the solicitation will not be further evaluated.

Eligible proposals will then be **comparatively evaluated** against each other (not via LPTA or a formal trade-off) to identify overall best value. Technical evaluation will focus on quality and reliability of mobile services (coverage, equipment, data services, billing, support, and compliance with telecommunications restrictions). Past performance will be compared to gauge likelihood of successful performance. Price will be reviewed for fairness and reasonableness, and proposals that are unreasonably high or low may be rejected.

Before award, the Government will confirm the apparent awardee's **responsibility** (financial capacity, ability to perform, integrity, experience, and resources) in accordance with FAR 9.1.

G. Attachment 2 & 3

The C-SCRM Questionnaire and State Department Secure Software Development Attestation Form were explained in detail and emphasis was placed on the fact that this will be part of the compliance review process (**C-SCRM Go/No-Go Evaluation Factor**).

Questions:

Vendors were allowed to ask further questions up until Monday March 16, 1500, local time.

No question were received.

Conclusion

The conference concluded and attendees were thanked for their presence and expression of interest in serving the U.S. Government. The meeting was adjourned at 11:45.
