

**Bureau of Alcohol, Tobacco, Firearms and Explosives
National Center for Explosives Training and Research
Statement of Work
Seismograph Monitoring Services**

1 BACKGROUND

The Bureau of Alcohol, Tobacco, Firearms and Explosives (ATF) National Center for Explosives Training and Research (NCETR) is located on Redstone Arsenal in Huntsville, Alabama. NCETR staff conduct research in support of improving the safe storage and disposal of explosives and enhancing the prosecution of explosives cases to serve ATF and the larger law enforcement community. NCETR also develops and facilitates the delivery of basic and advanced explosives training courses for ATF personnel, U.S. and international law enforcement partners, the U.S. military, and other federal agencies. Explosives training programs that occur regularly at NCETR's range facilities are; Explosives Specialist Certification and Recertification (CES) Advanced Explosives Disposal Techniques (AEDT), Post Blast Investigation Techniques (PBIT), the Military Post Blast School (MPBIT), Advanced Explosives Training for Industry Operations (AETI), Explosives Safe Handlers Course (ESH), and the Homemade Explosives School (HME). Most of NCETR's range operations consist of surface shots ranging from 1 gram to 50 pounds net explosive weight. ATF is primarily interested in monitoring airblast, followed by vibration.

1.1 ORGANIZATION

The National Center for Explosives Training and Research (NCETR) is located on Redstone Arsenal, Huntsville, AL. (Madison County). NCETR's main facility is home to the Bureau of Alcohol, Tobacco, Firearms and Explosives (ATF) explosives training and research programs. The NCETR facility maintains proprietary control of approximately 1,000 acres of land that is comprised of three (3) explosive range complexes; these ranges possess assets that are a unique resource in the mission against explosive-related crime and the counter-improvised explosives device effort.

1.2 SCOPE

The objective of this contract is to lease three (3) seismographs to be installed, one each, on the three ATF NCETR explosive range facilities located on Redstone Arsenal and to subscribe to a seismograph monitoring service. The monitoring service should allow for both the ability to access the data by ATF designated users at any time, as well notify designated ATF users of

activities agreed upon by ATF and the contractor. The monitoring service will provide data in the form of charts and graphs and will store archived data in a cloud environment, accessible by ATF.

1.3 OBJECTIVE(S)

The objective of this requirement is to provide ATF with data regarding airblast and vibration generated by NCETR explosives range operations. The data will serve as a record and will aid in identifying any additional environmental controls that would minimize noise and vibration levels.

1.4 REQUIRED TASKS

- 1.4.1 The contractor shall provide lease of three portable seismograph systems with accessories, as notated in Deliverables 2.1.
- 1.4.2 The seismograph must meet the ISEE seismograph standards for 2026 - 2031.
- 1.4.3 The contractor shall provide monitoring service capability for an annual fee.
- 1.4.4 The contractor shall provide technical assistance for hardware, software, and data interpretation.
- 1.4.5 The contractor shall provide annual calibration services.

2.0 DELIVERABLES

The contractor shall ensure the accuracy, functionality, completeness, professional quality, and overall compliance with government guidelines/requirements of the deliverables. Written documents shall be concise, succinct and clearly written.

- 2.1 The contractor shall provide three seismograph systems with microphone rated to 148 dB and a triaxial geophone, a security enclosure with solar panel for power and a voltage regulator, cellular modem with required cables and antenna, any power and communication splitter cables. The seismograph systems must be capable of remote reporting to a monitoring service and the user. The seismograph must meet the ISEE seismograph standards for 2026 - 2031.
- 2.2 The contractor shall provide either an option for contractor installation for the three units or detailed instruction for installation procedures to be completed by the purchaser.
- 2.3 The contractor shall provide monitoring services for each seismograph unit/location. The monitoring service must include options for remote access to the data provided by the contractor. The service shall also provide an option for email notification of data and alerts for events that exceed pre-arranged limits for airblast and vibration.

2.4 Access to the data should be available 24 hours a day, 7 days a week. The data must provide a record of range events with vibration, velocity, and air-overpressure. The data must be able to generate charts and seismograph reports that are exportable to Microsoft Excel and/or PDF.

2.5 The contractor shall include an annual calibration service for a fee. The calibration service will be for any single unit or all three units at a time that is convenient for the purchaser. The contractor shall provide the calibration service and return the seismograph to the purchaser within 10 business days of receipt of the unit(s) submitted for calibration. Upon request, the contractor will provide a replacement “loaner” unit during the time that the “owned” unit is unavailable for the calibration.

2.6 Any requirement to relocate a seismograph will be fee based.

2.7 Any on-site service or technical assistance will be fee based.

3.1 DELIVERY SCHEDULE

Section	Title	Due Date	Distribution
2.0	PCR	Upon Request	BC/COR

4.0 CONTRACTOR PERSONNEL

It is the contractor’s responsibility to; provide sufficiently educated/trained staff to perform therequirements of this contract and; to ensure an adequate level of support is maintained at all times.

5.0 KEY PERSONNEL

Not Applicable

6.0 PLACE OF PERFORMANCE

The place of performance will be at ATF’s Capano Range, McKinley Range, and Corkern Rangelocated at Redstone Arsenal, Huntsville, AL.

7.0 PERIOD OF PERFORMANCE

The performance of this requirement is a one-year base period with four one-year option periods (for a total of 60 months if all options are exercised) as follows:

Base Period	August 1, 2026 – July 31, 2027
Option Period One	August 1, 2027 – July 31, 2028
Option Period Two	August 1, 2028 – July 31, 2029
Option Period Three	August 1, 2029 – July 31, 2030
Option Period Four	August 1, 2030 – July 31, 2031

8.0 OTHER CONSIDERATIONS

Not applicable.

8.1 TRAVEL

Not applicable.

8.2 SECURITY

No background investigations are required. However, any representative from the contractor company who is required to visit the NCETR facility will be subject to police records check to gain access to Redstone Arsenal and the ATF NCETR facilities.
