

NATIONAL AERONAUTICS AND SPACE ADMINISTRATION
NASA SHARED SERVICES CENTER

RECOMMENDATION AND DETERMINATION TO SOLICIT FROM ONE SOURCE
OR BRAND NAME

PICK ONE

Sole Source:

☒ I recommend that NASA, NASA Shared Services Center negotiate with MICROCHIP TECHNOLOGY INC. only for MPF300TS-FC784M. The total estimated cost of this effort is [REDACTED] and the estimated period of performance or lead-time for delivery is 16wks ARO.

OR

Brand Name Justification:

☐ I recommend that NASA, NASA Shared Services Center negotiate with only with vendors who can provide the subject brand name from Manufacture Name for Enter Supply or Service to be procured. The total estimated cost of this effort is Enter Dollar amount and the estimated period of performance or lead-time for delivery is Date.

This recommendation is for the acquisition of supplies or services determined to be reasonably available from only one source/only one manufacturer. Competition is impractical for the following reasons (please answer the questions below):

1. **What are the reasons for soliciting only the suggested source/suggested brand name?** Please provide the unique characteristics of the items or services along with the supporting rationale and the market research performed to substantiate your reason for the suggested source/brand name.

Upon evaluation, it was determined this is the only vendor capable of meeting the electrical/thermal/mechanical specifications for our current design within our project/mission timeline.

2. **What is the impact to the government if another vendor/brand is used?** Include any dollar, schedule, or compatibility impacts if possible.

This component is a key part in the SCALPSS MSE-Lite electronics system. Delaying the procurement through solicitation would cause delays in the development and testing of the digital subsystem which needs to be complete by the end of FY26. Selection of another part would require modifying the current hardware and software system which would incur a minimum of 6 months of development to the project. It will also require additional procurement of parts to properly integrate a different FPGA.
