Proposal/quote is defined to mean that ALL volumes or parts required in the solicitation are included in the electronic submission.

Note: There is no "expected" or "target" length of time for proposal submission; size and content may be factors, therefore offerors are strongly cautioned when submitting proposals to allow adequate time for submission. Solicitations may remain posted on sam.gov after the solicitation closing date. If the response deadline has passed for the solicitation, vendors will need to send any late quotes, if applicable, directly to the Contract Specialist identified on the cover page of this solicitation.

(e) Any awards issued as a result of this solicitation will be distributed electronically. In the event of a FOIA request for a copy of any award issued as a result of this solicitation, or any subsequent modifications to the contract, the contract and modifications will be released, including the awarded unit price. Unit price is defined as the contract price per unit or item purchased as it appears in Section B of the contract and is NOT referring to nor does it include Cost or Pricing data/information. If you object to such release in the base contract or contract modifications, and you intend to submit an offer, notify the Procuring Contracting Officer in writing prior to the closing date identified in this solicitation and include the rationale for your objection consistent with the provisions of FOIA. A release determination will be made based on rationale given.

Drawing Limitations

- (a) The drawings supplied with this contract are not shop or process drawings. They are engineering design drawings. They are adequate to permit manufacture, and:
 - (1) depict the completed item(s), and
 - (2) serve as the basis for inspection of the completed item(s).
- (b) These drawings DON'T cover intermediate drawings/specifications or steps in the manufacturing process. As a result, even if you meet all the dimensions and tolerances specified in the engineering design drawing for each individual part, a cumulative unacceptable fit for the contract item could result.
- (c) The Contractor is responsible for producing the shop or process drawings needed to cover intermediate steps in the manufacturing process.
- (d) The Contractor is responsible for obtaining all specifications and drawings necessary to manufacture the items being solicited in accordance with the TDP including all incorporated specifications and drawings. Delivery delays are not excusable where the Contractor asserts that it did not have a specification or drawing and has failed to request, in writing, the specification from either the Procuring Contracting Officer or Contract Specialist prior to the solicitation closing date.
- (e) If you fail to produce an end item with a cumulative fit that conforms to Government drawings, specifications or other supplemental manufacturing documentation, you'll be responsible for correcting this condition at no additional cost to the Government and no delivery schedule extension.

Configuration Control Engineering Changes

- (a) The Contractor may submit Engineering Change Proposal(s) (ECPs) and Request for Variance(s) (RFVs) for the requirements in the Governmental provided Technical Data Package (TDP). If a Value Engineering Change Proposal(s) (VECPs) clause is included on this contract, VECs shall be submitted in the same manner as ECPs.
 - (1) ECPs - The Contractor may request a permanent change to the requirements specified in the TDP or any other baseline documentation by submitting an ECP. ECPs shall be submitted to include all Notice of Revisions (NORs) necessary to completely define the requested change. Each ECP shall be accompanied with at least one NOR per affected document. The Contractor shall not present any production items for acceptance that incorporate any change to the TDP or other baseline documentation until notified by the Government the ECP has been approved and incorporated in the contract.
 - (i) Page 1 of DD Form 1692 (or equivalent) shall be submitted for all ECPs. Pages 2-7 of DD Form 1692 shall be submitted when required to properly explain all the potential logistics and technical impacts of the proposed change. DD Form 1695 NOR or DD Form 1695-1 Tabulated NOR (or equivalents) shall be submitted to completely describe the desired change on each affected document.
 - (ii) All ECPs submitted by the Contractor will be routine priority unless otherwise justified. If the Contractor considers the ECP to be emergency or urgent, they shall include justification within 48 hours of submittal of the ECP.
 - (2) RFVs - The Contractor may request to temporarily depart from a requirement specified in the TDP or any other baseline

documentation, by submitting an RFV. RFVs may be submitted either pre-production (formerly known as Request for Deviation (RFD)) or post-production and prior to acceptance by the Government (formerly known as Request for Waiver (RFW)). DD Form 1694 (or equivalent) shall be submitted for all RFVs. The Contractor shall not present any production items for acceptance with any nonconformance to the requirements in the TDP or other baseline documentation until notified by the Government the RFV has been approved and incorporated in the contract.

(b) Submission of requested changes - The submission of an ECP or RFV by the Contractor does not affect the required delivery dates specified within the contract, shall not constitute excusable delay in the performance of this Contract by the Contractor or in any way relieve the Contractor from compliance with the contract delivery schedule. If a delivery date change is needed, it must be negotiated with the Procuring Contracting Officer and documented via modification to the contract. The submission of an ECP and/or RFV by the Contractor shall not preclude the Government from exercising its rights under any clause of the Contract.

(c) Specifications - Permanent proposed changes to specifications which are part of the TDP or baseline documentation shall be requested with an ECP and NOR (i.e. Specification Change Notices (SCNs) are not required).

(d) Forms If any of the above listed forms are not included with the solicitation or contract, the Contractor may locate forms on the DOD Forms Website https://www.esd.whs.mil/Directives/forms/dd1500_1999/ or contact the Contract Specialist listed on page 1 of the solicitation or contract for copies of the forms.

Appointments for FOB Origin shipments should be coordinated with DCMA Transportation. For FOB Origin shipments, or for FOB Destination shipments outside of the Continental United States, Contractors performing under DCMA Administered contracts may request support with shipment and labeling via the Shipping Instructions Request (SIR) Module found at <https://www.dcmamil>. This module is available under the eTools tab and can be used by suppliers to send requests for shipping instructions to the DCMA Transportation Office. Contractor user permission is gained via the External Web Access Management (EWAM) within DCMA eTools at <https://www.dcmamil/aboutetools/> utilizing a commercial user account. Once registered, when preparing for shipment a contractor can use the SIR module to request shipping instruction assistance from the cognizant DCMA Transportation Officer (TO) at the responsible Contract Management Office (CMO). (a) Definition. Qualification requirement, as used in this clause, means a Government requirement for testing or other quality assurance demonstration that must be completed before award.

(b) One or more qualification requirements apply to the supplies or services covered by this contract. For those supplies or services requiring qualification, whether the covered product or service is an end item under this contract or simply a component of an end item, the product, manufacturer, or source must have demonstrated that it meets the standards prescribed for qualification before award of this contract. The product, manufacturer, or source must be qualified at the time of award whether or not the name of the product, manufacturer, or source is actually included on a qualified products list, qualified manufacturers list, or qualified bidders list. Offerors should contact the agency activity designated below to obtain all requirements that they or their products or services, or their subcontractors or their products or services, must satisfy to become qualified and to arrange for an opportunity to demonstrate their abilities to meet the standards specified for qualification.

Competition Management Office

By mail: 6501 E. 11 Mile Rd., ATTN: AMSTA-CSC-M, MS 309, Warren, MI 48397-5000

(c) If an offeror, manufacturer, source, product or service covered by a qualification requirement has already met the standards specified, the relevant information noted below should be provided.

Offerors Name

Manufacturers Name

Sources Name

Item Name

Service Identification

Test Number (to the extent known)

(d) Even though a product or service subject to a qualification requirement is not itself an end item under this contract, the product, manufacturer, or source must nevertheless be qualified at the time of award of this contract. This is necessary whether the Contractor or a subcontractor will ultimately provide the product or service in question. If, after award, the Contracting Officer discovers that an applicable qualification requirement was not in fact met at the time of award, the Contracting Officer may either terminate this contract for default or allow performance to continue if adequate consideration is offered and the action is determined to be otherwise in the Governments best interests.

(e) If an offeror, manufacturer, source, product or service has met the qualification requirement but is not yet on a qualified products list, qualified manufacturers list, or qualified bidders list, the offeror must submit evidence of qualification prior to award of this contract. Unless determined to be in the Governments interest, award of this contract shall not be delayed to permit an offeror to submit evidence of qualification.

(f) Any change in location or ownership of the plant where a previously qualified product or service was manufactured or performed requires reevaluation of the qualification. Similarly, any change in location or ownership of a previously qualified manufacturer or source requires reevaluation of the qualification. (1) __ Are, __ are not presently debarred, suspended, proposed for debarment, or declared ineligible for the award of contracts by any Federal agency;

(2) __ Have, --? have not, within a three-year period preceding this offer, been convicted of or had a civil judgment rendered against them for: commission of fraud or a criminal offense in connection with obtaining, attempting to obtain, or performing a Federal, state or local government contract or subcontract; violation of Federal or state antitrust statutes relating to the submission of offers; or commission of embezzlement, theft, forgery, bribery, falsification or destruction of records, making false statements, tax evasion, violating Federal criminal tax laws, or receiving stolen property;

(3) __ Are, __ are not presently indicted for, or otherwise criminally or civilly charged by a Government entity with, commission of any of these offenses enumerated in paragraph (h)(2) of this clause; and

(4) __ Have, __ have not, within a three-year period preceding this offer, been notified of any delinquent Federal taxes in an amount that exceeds the threshold at 9.104-5(a)(2) for which the liability remains unsatisfied.

(i) Taxes are considered delinquent if both of the following criteria apply:

(A) The tax liability is finally determined. The liability is finally determined if it has been assessed. A liability is not finally determined if there is a pending administrative or judicial challenge. In the case of a judicial challenge to the liability, the liability is not finally determined until all judicial appeal rights have been exhausted.

(B) The taxpayer is delinquent in making payment. A taxpayer is delinquent if the taxpayer has failed to pay the tax liability when full payment was due and required. A taxpayer is not delinquent in cases where enforced collection action is precluded.

(ii) Examples. (A) The taxpayer has received a statutory notice of deficiency, under I.R.C. \a76212, which entitles the taxpayer to seek Tax Court review of a proposed tax deficiency. This is not a delinquent tax because it is not a final tax liability. Should the taxpayer seek Tax Court review, this will not be a final tax liability until the taxpayer has exercised all judicial appeal rights. (B) The IRS has filed a notice of Federal tax lien with respect to an assessed tax liability, and the taxpayer has been issued a notice under I.R.C. \a76320 entitling the taxpayer to request a hearing with the IRS Office of Appeals contesting the lien filing, and to further appeal to the Tax Court if the IRS determines to sustain the lien filing. In the course of the hearing, the taxpayer is entitled to contest the underlying tax liability because the taxpayer has had no prior opportunity to contest the liability. This is not a delinquent tax because it is not a final tax liability. Should the taxpayer seek tax court review, this will not be a final tax liability until the taxpayer has exercised all judicial appeal rights.

(C) The taxpayer has entered into an installment agreement pursuant to I.R.C. \a76159. The taxpayer is making timely payments and is in full compliance with the agreement terms. The taxpayer is not delinquent because the taxpayer is not currently required to make full payment.

(D) The taxpayer has filed for bankruptcy protection. The taxpayer is not delinquent because enforced collection action is stayed under 11 U.S.C. \a7362 (the Bankruptcy Code).

(i) Certification Regarding Knowledge of Child Labor for Listed End Products (Executive Order 13126). Notwithstanding the foregoing, the Government expressly reserves to the Procuring Contracting Officer the right to waive the conditions set forth in paragraph (c)1 above in making an award when it is clearly established that written approval from Government Engineering of a non-listed part number can be obtained without delay in the anticipated date of award.

(2) When the foregoing conditions are met, the Government reserves the right to make an award for a non-listed item. In no other instance will award be made to any firm that does not agree to furnish one of the required part numbers listed in this solicitation.

(3) Any firm that manufactures or regularly sells an item which it views as equivalent in all respects to one of our required part numbers, but that has not initiated approved qualification testing in order to demonstrate that its part is totally equivalent to the required part, should see the notice entitled PART NUMBERS NOT CURRENTLY APPROVED, located elsewhere in this Section L.

(d) It is the responsibility of each Offeror to ensure the availability of sufficient quantities of source-controlled components before making an offer in response to this solicitation. Except as described in paragraph (e) below, offers that propose to substitute alternatives to the source-controlled components, even if the substitute items are represented as equivalent in all respects to the source-controlled components, will not be considered for contract award.

(e) Required Approval for Alternatives to the Source-Controlled Component:
 (1) By meeting the following conditions, a firm may submit an offer conditioned on acceptance by the Government of alternatives to the source-controlled component(s) listed in the Technical Data Package:

-- Prior to receipt of this solicitation, the firm must have received written Government Engineering approval of a test procedure on its proposed equivalent component.

-- The firm must indicate in its offer the date of the written Government Engineering approval, and the name and title of the approving official.

-- The firm must certify in its offer that it is in the process of having its item independently tested per the approved test procedure to demonstrate full physical, functional, and mechanical interchangeability of its part with an already-approved part cited in this solicitation, or that it is awaiting final Government Engineering approval of the summary report furnished at the conclusion of testing; and

-- The firm must have secured final written approval of its part from Government Engineering by the time of bid opening (in the case of formally advertised acquisitions) or by the time of contract award (in the case of negotiated acquisitions).

(2) Notwithstanding the foregoing, the Procuring Contracting Officer has the right to waive the above conditions in making an award when it is clearly established that written approval of a non-listed part from Government Engineering can be obtained without delay in the anticipated date of award.

When either of the foregoing conditions are met, the Government reserves the right to make an award where use of the equivalent item is authorized in lieu of the source-controlled item. Where the foregoing conditions are not met, Offeror will not be eligible for award unless agreeing to furnish the source-controlled item(s) from the indicated source(s).

(3) Any firm that manufactures or regularly sells an item which it views as equivalent in all respects to one of our required components, but that has not initiated approved qualification testing in order to demonstrate that its part is totally equivalent to the required component, should see the notice entitled PART NUMBERS NOT CURRENTLY APPROVED, located elsewhere in this Section L.

(f) If the drawings in the Technical Data Package for this requirement contain reference notes indicating one or more sources of supply have previously furnished the items depicted on the drawings, these notes also specify some sort of approval requirement, typically phrased in one of the following ways:

- (1) or equal
- (2) or approved substantial equal
- (3) Ordnance Corps approval required

(g) With the exceptions described in paragraph (h) below, and in the narrative entitled REPRESENTATION OF INTENT TO SUPPLY A SOURCE-CONTROLLED ITEM), the listing of sources of supply on drawings with such approval requirements means that only those listed sources may furnish the items depicted on such drawings. Thus, any Offeror responding to this solicitation and not meeting the exception criteria set forth herein will be deemed to have agreed to furnish the contract item from a listed source.

(h) Required Approval for Non-listed Part Number:

(1) When the following conditions are met, the Government reserves the right to consider and accept an offer conditioned on a manufacturer's part number not cited in the Technical Data Package. In order to be eligible for such consideration, any firm offering a non-listed part number must:

-- have received, prior to receipt of this solicitation, written TACOM approval of a test plan on its item, designed to demonstrate that the non-listed part is physically, functionally, and mechanically interchangeable with the listed part number(s) cited herein;

-- indicate in its offer the date of the formal Government Engineering approval of the test plan, and the name and title of the approving official;

-- be in the process of having its non-listed part number tested by an independent testing facility under the terms of the approved plan, or be awaiting final Government Engineering approval of the summary report furnished at the conclusion of testing; and

-- have secured final written approval of its part from Government Engineering by the time of bid opening (in the case of formally advertised acquisitions) or by the time of contract award (in the case of negotiated acquisitions).

(2) Notwithstanding the foregoing, the Procuring Contracting Officer has the right to waive the above conditions in making an award when it is clearly established that written approval from Government Engineering can be obtained without delay in the anticipated date of award.

(3) Any firm that cannot comply with conditions in paragraph (c) above upon submission of its offer under this solicitation, but that believes one of its part numbers to be equivalent to the approved part number(s) cited in this solicitation, is invited to begin the qualification procedure to gain approval of such non-listed part number for purposes of future acquisition action. Please see the narrative entitled PART NUMBERS NOT CURRENTLY APPROVED, which is located elsewhere in this Section L.

Acquisition of New Facilities, Special test Equipment or Special Tooling

It is not the intent of the Government to acquire, or to have acquired for its account, any facilities, special test equipment, or special tooling. The Government shall under no circumstances reimburse the Offeror for the cost of any new facilities, special test equipment, or special tooling as a separate item. An Offeror may, however, amortize the cost of any such facilities, special test equipment, or special tooling it may require in the submitted price of the items. Such facilities, special test equipment or special tooling shall not be subject to Government option rights to take title to the same except as specified in the DEFAULT, TERMINATION FOR THE CONVENIENCE OF THE GOVERNMENT, and/or PROGRESS PAYMENT clauses of this contract.

Part Numbers Not Currently Approved

As specified elsewhere in this solicitation, part or all of the contract item to be procured is restricted to certain approved manufacturer's part numbers as set forth in the Schedule and/or the Technical Data Package. Any firm that produces an item which it believes to be equivalent to one of these approved part numbers is encouraged to have such item tested and approved, so that the item will be eligible to be bought on future acquisitions. Please write to the attention of the Contract Specialist at the email address indicated on the cover page of this solicitation and request a statement of the procedures by which items can be tested and approved for

Reverse Auction

The Procuring Contracting Officer (PCO) may utilize on-line reverse auctioning as a means of conducting price discussions under this solicitation. If the PCO does not conduct a reverse auction, award may be made on the basis of initial offers or following discussions not using reverse auctioning as a pricing technique. If the PCO decides to use on-line reverse auctioning to conduct price negotiations, the PCO will notify offerors of this decision and the following provisions will apply.

(a) The award decision will be made in accordance with the evaluation factors as set forth in the solicitation. The reverse on-line auction will be used as a pricing technique during discussions to establish the final offered prices from each offeror. These prices will be used in conjunction with the evaluation factors stated elsewhere in the solicitation in order to make the award decision in accordance with the basis for award stated in the solicitation.

(b) Following the decision to conduct discussions using on-line reverse auctioning as a pricing technique, the PCO or his/her representative will provide offerors determined to be in the competitive range with information concerning the on-line auction process. The Government intends to use a commercial web-based product to conduct the reverse auction.

(c) Prior to or simultaneously with conducting the on-line reverse auction, the PCO may hold discussions with the offerors concerning matters appropriate for discussion, such as issues involving technical proposals or unbalanced pricing.

(d) The lowest offerors price(s) for each round of the reverse auction will be disclosed to other offerors and anyone else having authorized access to the on-line auction. This disclosure is anonymous, meaning that each offerors identity will be concealed from other offerors (although it will be known to the Government; only a generic identifier will be used for each offerors proposed pricing, such as Offeror A or lowest-priced offeror). By submitting a proposal in response to the solicitation, offerors agree to participate in the reverse auction and that their prices may be disclosed, including to other offerors, during the reverse auction.

(e) The reverse auction system currently in use designates offers as "Lead," meaning the current low price in that auction, or "Not Lead," meaning not the current low price in that auction. In the event of a tie offer, the reverse auction provider's system designates the first offer of that price as "Lead" and the second or subsequent offer of that price as "Not Lead." Offerors shall not submit a tie offer, since this is inconsistent with the purpose of the reverse auction. If a tie offer is submitted, the "Not Lead" offeror that submitted the tie offer must offer a changed price; it will be ineligible for award if the final price in the auction is the tie offer price.

(f) An offerors final auction price at the close of the reverse auction will be considered its final proposal revision. No price revisions will be accepted after the close of the reverse auction, unless the PCO decides that further discussions are needed and final proposal revisions are again requested in accordance with Federal Acquisition Regulation (FAR) 15.307, or the PCO determines that it would be in the best interest of the Government to re-open the auction.

(g) The following information is provided regarding the procedures to be followed if a reverse auction is conducted.

(1) Each offeror identified by the PCO as a participant in the reverse auction will be contacted by Defense Logistic Agencies commercial reverse auction service provider to advise the offeror of the event and to provide an explanation of the process.

(2) In order for an Offeror to participate in the reverse auction, such offeror must agree with terms and conditions of the entire solicitation, including this provision, and agree to the commercial reverse auction service providers terms and conditions for using its service. Information concerning the reverse auction process and the commercial service providers terms and conditions is embedded within the email notification sent by the on-line reverse auction pricing tool system administrator.

(3) Offerors shall secure the passwords and other confidential materials provided by the commercial reverse auction service provider or the Government and ensure they are used only for purposes of participation in the reverse auction. Offerors shall keep their own and other offerors pricing in confidence until after contract award.

(4) Any offeror unable to enter pricing through the commercial reverse auction service providers system during a reverse auction must notify the PCO or designated representative immediately. The PCO may, at his/her sole discretion, extend or re-open the reverse auction if the reason for the offerors inability to enter pricing is determined to be without fault on the part of the offeror and outside the offerors control.

Name of Offeror or Contractor:

(5) The reverse auction will be conducted using the commercial reverse auction service providers website as embedded in the email notification. Offerors shall be responsible for providing their own computer and internet connection.

(6) Training:

(i) The commercial reverse auction service provider will provide familiarization training to offerors employees; this training may be provided through written material, the commercial reverse auction service providers website, and/or other means.

(ii) An employee of an offeror who successfully completes the training shall be designated as a 'trained offeror.' Only trained offerors may participate in a reverse auction. The PCO reserves the right to request that offerors provide an alternate offeror employee to become a 'trained offeror.' The PCO also reserves the right to take away the 'trained offeror' designation from any trained offeror who fails to abide by the solicitations or commercial reverse auction service providers terms and conditions.

Agency Protests

Companies protesting this procurement may file a protest 1) with the Procuring contracting officer, 2) with the General Accounting Office, or 3) pursuant to Executive Order No. 12979, with the Agency for a decision by the Activity's Chief of the Contracting Office. Protests filed with the agency should clearly state that they are an "Agency Level Protest under Executive Order No. 12979." (Note: DLA procedures for Agency Level Protests filed under Executive Order No. 12979 allow for a higher level decision on the initial protest than would occur with a protest to the Procuring Contracting Officer; this process is not an appellate review of a Procuring Contracting Officer's decision on a protest previously filed with the Procuring Contracting Officer). Absent a clear indication of the intent to file an agency level protest, protests will be presumed to be protests to the Procuring contracting officer.

NOTE: DLA Agency Protests for DLA Warren shall be filed with:

Chief of the Contracting Office
DLA Land Warren

(6) "Residual Inventory" means inventory from a transferred or terminated Government or commercial contract.

(c) Used, reconditioned, remanufactured supplies, unused former Government surplus property, or residual inventory shall not be used unless the Contractor has proposed the use of such supplies, and the Procuring Contracting Officer has authorized their use.

(d) Offers to provide other than new material shall be submitted to the Procuring Contracting Officer for approval:

(1) Offerors of other than new material must provide sufficient information from which a determination of acceptability can be made. Contractors who intend to offer other than new material must contact the Contracting Office listed on the first page of this solicitation to obtain an Other Than New Material Worksheet. Form must be completely filled out and is to accompany your offer.

(e) If the use of used, reconditioned, remanufactured items, unused former Government surplus property, or residual inventory are approved by the Procuring Contracting Officer, we may require you to meet specific marking, inspection, and testing requirements beyond those found in this solicitation. We will negotiate these additional requirements with you before award and put them in any resulting contract.
