

N6264926RL004 A0009

SPECIFICATION ITEM NO.: 634-21-001

PARA. NO.: N6264926RL004 A0008

TITLE: Flight Deck Nonskid; replace

QUESTION:

Please see the response of our QP-1 vendor, for your reference.

Our Coating Inspector are certified AMPP Basic Coatings Inspector (BCI) not as QP1. Altrad FRP as a company is certified QP1 contractor to execute field works.

Please confirm if this is acceptable or not.

ANSWER: While Altrad FRP is a certified QP1 they have no marine ships experience and a review of the training program and other executable processes would be needed prior to stating or approving this company to work on critically coated areas on US Navy ship. As for the AMPP Basic coating, inspectors do not meet the critically coated area requirements as called out in NAVSEA Standard Item 009-032.
