

## Enclosure No. 5

### Evaluation Criteria

May 4, 2026

- I. Evaluation will be conducted in accordance with the Argonne National Laboratory approved Procurement policies based on the Evaluation Criteria set forth below:

II. **Overall Relative Importance of Proposal Parts**

The Technical Proposal is of greater importance to the Price Proposal and Business Management Proposal. While the Price Proposal and Business Management Proposal may not be the controlling factor for the award, they will be a significant part of the Laboratory's selection decision.

The Laboratory shall select for an award based on the principles of best value tradeoffs. The best value is expected to result from selection of the highest technical acceptable proposal with the lowest evaluated proposed cost. It may be in the best interest of the Laboratory to consider award to other than the offeror with the lowest evaluated proposed cost if the perceived technical advantages of a higher evaluated proposed cost proposal merit the additional higher proposed cost.

III. **Evaluation Criteria**

**A. Technical Proposal**

The Laboratory will use the following technical evaluation criteria, listed in Descending order of importance, to evaluate the merit of the Desirable Requirements:

**CRITERION 1 - Technical Ability of On-site Technicians**

*Basis for Evaluation:*

- Size & makeup of local technician workforce
- Experience level
- Technical training background
- Relevant qualifications

*Offeror to Provide for Evaluation:*

The vendor shall include the details of their technician workforce size, experience level (ex. Journeyman, apprentice, etc.), and technical training background description (EGSA or equivalent, OEM certifications, etc.)

## **CRITERION 2 - Engineering & Technical Support Resources**

### *Basis for Evaluation:*

- Technical expertise
- Qualifications
- Size & description of in-house (local office) support team

### *Offeror to Provide for Evaluation:*

The vendor shall include the details of their internal technical & engineering support teams in their technical bid. Technical expertise, qualifications, and experience should be included.

## **CRITERION 3 - Comparable Contracts & Experience**

### *Basis for Evaluation:*

- Relevance & scope of similar client accounts
- Range of OEM's serviced at accounts
- Range of equipment sizes serviced (kw) at accounts

### *Offeror to Provide for Evaluation:*

The vendor shall include, as part of their technical proposal, a list of at least five client accounts they currently service that are most compatible in size and scope to Argonne. Please include a summary of the equipment brands & sizes serviced under these contracts to demonstrate your capability to successfully support a broad range of generator & ATS OEM's.

## **CRITERION 4 - Load Bank Testing Equipment**

### *Basis for Evaluation:*

- Owned inventory of load bank equipment
- Maintenance standard of owned equipment
- Range of sizes of owned equipment (kw/mw)

### *Offeror to Provide for Evaluation:*

Detailed specifications of this equipment, along with the vendor's maintenance standard, shall be included in the technical part of their bid submission.
