

PERFORMANCE WORK STATEMENT (PWS)

PROGRAM TITLE: Aircraft Rescue and Fire Fighting (ARFF) Commercial Training Services

1.0 BACKGROUND

The United States Marine Corps (USMC) has an annual requirement to provide its ARFF personnel with realistic, hands-on, live-fire training to meet operational, safety, and qualification mandates. Per NAVMC 3500.114 ARFF Training and Readiness (T&R) Manual (Short Title: ARFF T&R), this training is critical for maintaining core competencies. Historically, this training has been conducted organically at military facilities; however, a training gap during planning and construction of new facilities drives the need for commercial offsite training procured on an ad hoc basis. This Indefinite Delivery, Indefinite Quantity (IDIQ) contract is being established to create a streamlined, flexible, and responsive vehicle for procuring commercial ARFF training courses to ensure consistent quality and readiness.

2.0 OBJECTIVE

This vehicle will provide USMC units with a simple and efficient method to order "seats" in pre-established courses that meet all applicable certification standards from the Code of Federal Regulations (CFR), Department of War (DoW), Naval Air Training and Operating Procedures Standardization (NATOPS), and National Fire Protection Association (NFPA)..

3.0 SCOPE

The contractor shall provide all necessary personnel, equipment, materials, instruction, supervision, and other items required to deliver complete annual recurrent ARFF training courses at their facilities. The scope covers the specific training tasks listed in Section 4.0. This is a non-personal services contract for commercial services. The Government will not furnish any property or equipment. The cost for courses shall be inclusive of all materials required for student completion; however, the cost shall not include student travel, lodging, or per diem, which will be funded separately by the Government.

4.0 SPECIFIC TASKS

The contractor shall provide training courses that meet the requirements of the standards listed below and incorporate the specific training events from the USMC ARFF T&R and safety precautions outlined in NFPA 1403.

- 4.1 Core ARFF Certification Training: The contractor shall provide all training services and document completion of the following live fire recurrent training scenarios:
 - (1) Aircraft fuel spill fire.
 - (2) Three-dimensional aircraft running fuel fire.
 - (3) Aircraft interior fire.

- (4) Aircraft auxiliary power unit fire.
- (5) Aircraft engine fire.
- (6) Aircraft wheel well/brake fire.
- (7) Aircraft electronics and electrical compartment fire.
- (8) Aircraft incident/accident debris fire.
- **4.2 Fluorine-Free Foam (F3) Application Training:** The contractor shall provide a distinct course covering the principles and practical application of new F3 agents, consistent with the DoW's transition away from AFFF. This course shall meet the requirements outlined in FAA AC 150/5210-17C, NFPA 1010, or NFPA 460 for foam agent training.
- **4.3 Instructor and Course Certification:** The contractor shall provide documentation upon request verifying that their instructors are certified to the standards listed in this PWS, and course curricula is aligned with the relevant standards.
- **4.4 Training and Readiness (T&R) Compliance:** The training scenarios shall be sufficient to enable students to receive credit for the successful completion of annual recurrent live fire events outlined in the **ARFF T&R**.
- **4.5** In the event the Government furnished Scott AV 3000HD mask is incompatible with the contractor's provided SCBA packs, the contractor shall provide a compatible mask and perform fit testing in accordance with 29 CFR 1910.134.

5.0 PERIOD OF PERFORMANCE

The ordering period for this IDIQ shall be for five (5) years from the date of contract award.

6.0 LOCATION OF SERVICES

All training services shall be performed at the contractor's certified training facility. The specific location will be identified in individual Task Orders.

7.0 APPLICABLE DOCUMENTS

- DoWI 6055.06 DoW Fire and Emergency Services Program
- NAVAIR 00-80R-14 NATOPS US Navy ARFF Manual
- NAVMC 3500.114 ARFF T&R Manual
- NFPA 460, *Standard for Aircraft Rescue and Firefighting Services at Airports*
- NFPA 1010, *Standard on Professional Qualifications for Firefighters*
- NFPA 1403, *Standard on Live Fire Training Evolutions*
- FAA Advisory Circular 150/5210-17C

8.0 DELIVERABLES

DELIVERABLE	DUE DATE
Course Availability and Schedules	Provided upon request prior to Task Order award.
Certificates of Completion	Within 5 business days of successful course completion.

9.0 PERFORMANCE REQUIREMENTS SUMMARY

PERFORMANCE OBJECTIVE	STANDARD	ACCEPTABLE QUALITY LEVEL (AQL)	METHOD OF SURVEILLANCE
ARFF Training Course Delivery	Course meets the requirements of NFPA 460 and 1403 for annual ARFF training.	100% of courses delivered must be compliant.	Review of course curriculum;; student feedback, and announced inspection.
F3 Application Training	Course provides training on the principles and practical application of F3 agents.	100% of courses delivered must be compliant.	Review of course curriculum;; student feedback, and announced inspection.
Issue Timely and Accurate Certificates	Provide valid certificates to students upon successful completion.	Certificates issued to 100% of successful students within 5 business days, with a 98% accuracy rate on all data.	100% review of certificates issued under each Task Order.

10.0 Government Furnished Items and Services

Equipment: ARFF personnel will provide their own FFPPE and Scott AV 3000HD mask only.

Materials: The Government will provide, on demand, copies of student Fire Fighter Physicals and 29 CFR 1910.134 Respiratory Fit Tests.
