

**C-17 Metals Deck Loader  
AMENDMENT 004**

**Contractor Questions and Government Responses:**

**Contractor Question:**

1. What is the length you need on the 2nd line item?

**Government Response:**

The length for line item 2 can be 24 feet.

**Contractor Question:**

2. Line items 2 and 3 with identical item/description one has an unspecified length and the other requires 20' length. I need to know if you would like the 26 pieces required in line # 3 cut to 20' length or if you would prefer those at the full 24' length. Based on line item 2's listed weight in lbs, could I assume that you do want 36 of the 24' pieces. Also, line items 21 and 22 call for 48"x96" dimensions and industry standard availability to us is 48"x144" for both line items. Will this be acceptable or would we need to cut these to the required dimension. Lastly, the very last line item (in position only) has a description but nothing else required as far as qty, width, length or weight. We have a quote for quantity 1 at 48"x144" if you would like us to include it we will have it in our quote.

**Government Response:**

- Line items 2 and 3 can be 24 feet in length.
- Line item 21 and 22 can follow the industry standard of 48" x 144".
- The last line item (in position only). Yes, include it.

**Contractor Question:**

3. "Thank you for the response, I have included a copy of the last page of the required materials under 3.1 Tasks for reference, from what I see can I assume this is line item 28?. Could I get a quantity and the exact dimensions, Width and Length for this, 1/4" PLATE AL 7075-T7351. I have also included the page with reference to payment with WAWF information. I do not see FAR 52.213-1 included in this contract. If Fast Pay was included xxx would be able to include a discount. I just need clarification if this will be included and if my proposal would be appropriate."

**Government Response:**

Okay, for that particular item I need a quantity of 32 with a dimension of 60"x144".
