

PERFORMANCE WORK STATEMENT (PWS)

SECURITY AND SAFETY SUPPORT SERVICES

SECTION A: GENERAL

A.1 SCOPE

The Contractor shall provide non-personal services to support security, administrative, and safety operations across the Aberdeen Proving Ground (APG) footprint. This includes comprehensive support for the Aberdeen Test Center (ATC) and the Army Test and Evaluation Command (ATEC) Headquarters (HQ).

The Contractor shall be responsible for the complete, independent execution and management of the following functional areas:

1. ATC Visitor Control Center (VCC): Full-time security support and access control operations.
2. ATEC Headquarters (HQ): Full-time security and command support services.
3. ATC Access Control Point (Gate 13): Full-Time Access Control Guard Support
4. ATC Test Ranges: As needed Range (SURGE) Guard Support
5. ATC Safety Directorate: Part-time safety support services.

Note: ALL Contractor personnel performing duties on this contract remain under the exclusive supervision and direction of the Contractor. ATC designated Government representatives will provide technical oversight and evaluate deliverables.

Services shall be performed In Accordance With (IAW) Army Regulation (AR) 190-13, ATEC regulations and policies (accessible at: [ATEC-Publications](#); access provided post-award), ATC regulations and policies (accessible at: [ATEC-ATC](#); access provided post-award), and all governing regulations detailed in Technical Exhibit 1, page 11-12. The Contractor is responsible for maintaining currency with these regulations to ensure compliant service delivery.

A.2 BACKGROUND

ATEC's primary mission is to plan, integrate, and conduct experiments, developmental testing, independent operational testing, independent evaluations and assessments; and provide essential information to acquisition decision makers and commanders. ATC is a subordinate organization to ATEC HQs.

A.3 PERIOD OF PERFORMANCE

The period of performance shall include a one-year base period plus two, one-year option periods.

A.4 PLACE OF PERFORMANCE

Performance will take place in and around APG North and South (Edgewood Area).

PERFORMANCE WORK STATEMENT (PWS) **SECURITY AND SAFETY SUPPORT SERVICES**

SECTION B. GENERAL REQUIREMENTS

B.1 Security Support Requirements.

The Contractor shall perform comprehensive security and safety support functions. Administrative duties include, but are not limited to, acquiring information, tracking action statuses, maintaining operational supply inventories, and utilizing systems such as Microsoft Office (Word, Excel, Access, PowerPoint), SharePoint (ASPECT, Task Tracker), and similar data programs.

Core access control duties include tracking badge applications, verifying security clearance information in the Defense Information System for Security (DISS), processing access authorizations, and printing/encoding Common Access Cards (CAC) and Restricted Area (RA) Entry Control Badges. The Contractor shall also conduct badging accountability, process retrieval requests, and manage foreign visit requests.

The Contractor shall provide physical access control support at designated Restricted Area (RA) gates, primarily Gate 13 (APG North). The Contractor shall review access credentials and expedite and coordinate visitor and delivery entries during prescribed duty hours. Additional surge or alternate gate support (e.g., Gate 24, Gate 25, or Edgewood Post 10) shall be provided only in accordance with established surge CLINs (Contract Line Item Numbers) or as formally coordinated through the Contracting Officer's Representative (COR).

System Familiarization and Procedural Compliance:

The Contractor is expected to provide personnel who possess baseline proficiency in standard security systems (e.g., DISS). However, the Government recognizes that local configurations for systems such as Lenel and specific ATC workflows require site-specific familiarization. Therefore, the Government will provide the ATC VCC Internal Operating Procedure (IOP) and associated system user guides as Government-Furnished Information (GFI) to serve as the baseline security standard and technical reference.

Upon contract award, the Government will provide initial site orientation and system familiarization exclusively to the Contractor's Program Manager (PM) or designated Lead. Utilizing a "Train-the-Trainer" methodology, the Contractor's PM/Lead assumes sole responsibility for training all subsequent Contractor personnel on ATC-specific system configurations, ensuring all data entry and access control actions comply with the provided GFI.

Furthermore, the Contractor shall develop, implement, and maintain a comprehensive Contractor Standard Operating Procedure (SOP). The Contractor's SOP shall detail how the Contractor will independently manage workflows, delegate daily tasks, and conduct internal quality control to achieve the security outcomes established in the Government's IOP.

B.2 Personnel.

For the purpose of this PWS, the term "Contractor" applies to all prime contractor employees, subcontractor employees, and any other persons acting on behalf of the Contractor to perform work. Contractor employees shall be trained, qualified, certified, and licensed IAW requirements specified in this PWS prior to starting work. The Contractor shall maintain records of all qualifications and ensure the workforce remains fully qualified. All

PERFORMANCE WORK STATEMENT (PWS)

SECURITY AND SAFETY SUPPORT SERVICES

Contractor personnel shall be United States citizens, possess a High School Diploma or General Educational Development (GED) equivalent, and be able to fluently speak, read, write, and understand English.

Staffing Execution:

The Contractor shall provide a qualified workforce and manage staffing schedules to ensure continuous, compliant performance across the following functional support areas. To assist with Service Contract Act (SCA) mapping, the functional areas generally align with the following labor categories:

- Access Control and Range (Surge) Guard Support (e.g., Security Tech I equivalent)
- ATC Visitor Control Center (VCC) Support (e.g., Security Tech II equivalent)
- ATEC Headquarters Administrative Support (e.g., Security Tech II equivalent)
- ATC S2 Security Support Services (e.g., Security Tech III equivalent)
- Risk Management Test SME Safety Specialist

The Contractor shall provide a staffing plan that guarantees operational coverage for all designated facilities and functions. The Contractor's PM is exclusively responsible for workforce management, shift scheduling, and addressing employee performance, ensuring no Government direction of individual Contractor employees occurs.

B.3 Validation of Qualifications.

The Contractor is solely responsible for hiring personnel who meet or exceed the labor qualifications required to perform the tasks in this PWS. Prior to a contract employee's start date, the Contractor shall submit documentation (e.g., resumes, training certificates) to the COR to validate that the individual meets the minimum requirements. The Government will review the documentation same day. The Government reserves the right to reject any Contractor personnel who do not meet the established qualifications or security requirements.

B.4 Hazardous Conditions and Personal Protective Equipment (PPE).

While VCC and HQ support personnel operate in a standard office environment, Gate Access and Range Support technicians operate in exposed areas subject to road traffic, inclement weather, and hours of darkness. While the Contractor shall not participate directly in active range operations, hazards associated with proximity to range areas are possible.

The Contractor is responsible for ensuring the occupational safety of its employees. The Contractor shall furnish all required Personal Protective Equipment (PPE) at no additional cost to the Government. At a minimum, Contractor personnel working Gate and Range areas are required to wear ANSI-compliant reflective vests, safety shoes, and appropriate cold/wet weather gear. Contractor personnel working in Risk Management and Safety are required to wear safety shoes, hard hat, and eye protection.

B.5 Government Personnel.

The Contracting Officer's Representative (COR) is the primary Government liaison with the Contractor. The ATC S2

PERFORMANCE WORK STATEMENT (PWS)

SECURITY AND SAFETY SUPPORT SERVICES

Deputy Chief and the ATEC Secretary of the General Staff (SGS) serve as Technical Points of Contact (TPOC). TPOCs are authorized to provide technical oversight, clarify regulatory intent, and inspect deliverables for their respective areas. TPOCs are *not* authorized to direct Contractor personnel, alter the work schedule, or modify the scope of the contract. The Contractor's Program Manager shall limit formal contract execution and scope discussions to the COR.

B.6 Facility Hours of Operation and Coverage.

The Government operates under an alternative work schedule (8 workdays of 9 hours, 1 workday of 8 hours, and every other Friday as a Regular Day Off/RDO). The Contractor shall align their staffing plan to ensure continuous, fully qualified coverage during the following facility Hours of Operation:

- ATC VCC desk support: Monday through Thursday, 0600 to 1600; Friday, 0600 to 1500.
- ATC S2 Security Support Specialist: Monday through Thursday, 0630 to 1600; every other Friday, 0630 to 1500
- Access Control Guard Support: Monday through Friday, 0530 to 1700 for Gate 13.
- ATEC Headquarters: Monday through Friday, 0730 to 1600.
- “SURGE” Guard Support: typically consists of 12-hour night shifts (1800-0600), requires 2 guards and occurs as needed per test mission. There will be a minimum of 4 hours’ notice for these requests.
- Risk Management Test SME Safety Specialist: Typically, 2 days / week, 9 hours / day and additional days as needed with advance notice and concurrence of availability.

Coverage and Relief: The Contractor is solely responsible for managing employee work schedules, meal periods, and breaks. In the event of scheduled or unscheduled Contractor absences, or the need for physical relief at a post, the Contractor shall execute their internal staffing plan (e.g., cross-utilizing trained VCC and Gate staff) to maintain uninterrupted operations. The Government will *not* provide personnel to cover Contractor breaks or absences. Contractor employees shall not work overtime or on Federal holidays unless explicitly approved in advance by the COR.

B.7 Inclement Weather and Installation Closures.

Inclement weather or emergencies may force a modification of ATC operating hours. The Contractor shall monitor the ATC DoD Alert System for operational status.

- Delayed Opening: Contractor personnel shall report thirty (30) minutes prior to the announced ATC opening time.
- Installation Closed: Contractor personnel shall not report to work.
- Early Closure: If ATC closes early during the duty day, Contractor personnel operating Gate 13 shall immediately close the inbound gate. The Contractor shall man the outbound Gate 13 for thirty (30) minutes

PERFORMANCE WORK STATEMENT (PWS)

SECURITY AND SAFETY SUPPORT SERVICES

after the official closure time to facilitate traffic exiting the installation, after which they shall secure the gate and depart. All other Contractor personnel shall depart at the time of official closure.

B.8 Recognized Federal Holidays.

The Contractor is not required to provide standard daily coverage on recognized Federal Holidays. When a holiday falls on a Saturday, the preceding Friday is observed. When a holiday falls on a Sunday, the succeeding Monday is observed. Recognized holidays include:

- New Year's Day (January 1)
- Martin Luther King Jr.'s Birthday (Third Monday in January)
- Washington's Birthday (Third Monday in February)
- Memorial Day (Last Monday in May)
- Juneteenth National Independence Day (June 19)
- Independence Day (July 4)
- Labor Day (First Monday in September)
- Columbus Day (Second Monday in October)
- Veterans Day (November 11)
- Thanksgiving Day (Fourth Thursday in November)
- Christmas Day (December 25)

C. SECURITY AND ADMINISTRATIVE REQUIREMENTS

C.1 Facility Clearance.

The Contractor shall possess and maintain a minimum of a SECRET Facility Clearance (FCL) as prescribed by the DD Form 254, Contract Security Classification Specification. The ATC Security and Intelligence Division (S2) will verify the active FCL with the Defense Counterintelligence and Security Agency (DCSA) via the appropriate system of record (e.g., NISS/DISS) prior to contract execution.

C.2 Personnel Security Clearances.

All Contractor personnel performing work under this PWS shall possess and maintain a minimum of a SECRET personnel security clearance. Contractor personnel shall not begin work until at least an interim SECRET clearance is granted and verified.

The Contractor's Facility Security Officer (FSO) shall establish and maintain a servicing relationship via the Defense Information System for Security (DISS) to the ATC Security Management Office (SMO) code W4QUAA. The Contractor shall provide an updated personnel roster to the COR monthly, or within 48 hours of any change in

PERFORMANCE WORK STATEMENT (PWS)

SECURITY AND SAFETY SUPPORT SERVICES

personnel status (e.g., resignations, terminations, or clearance suspensions). Contractor personnel whose security clearances are suspended or revoked shall be immediately removed from contract duties until the clearance is formally reinstated.

C.3 Reports of Adverse Information.

The Contractor shall immediately report to the Contracting Officer (KO) and the COR any adverse information concerning Contractor personnel that may impact their security clearance or suitability for installation access. This includes, but is not limited to, security violations, arrests, bankruptcy, wage garnishments, or the suspension/revocation of a security clearance. Based on this information, the Government (via the S2/Installation Commander) may exercise its right to deny the employee access to APG Restricted Areas.

C.4 Common Access Card (CAC) and Network Access.

Contractor employees require computer and network access and shall be issued a Department of Defense Common Access Card (CAC). The Contractor shall ensure all personnel comply with the Trusted Associate Sponsorship System (TASS) procedures for CAC issuance. The COR will serve as the Trusted Agent (TA). Additionally, all Contractor personnel shall obtain an army.mil email address and register to receive ATC DoD Alert System messages.

C.5 Security Training.

The Contractor shall ensure all personnel complete all Government-mandated annual training (e.g., Cyber Awareness, OPSEC, AT Level 1, TARP). The Contractor shall maintain all training records and make them available for inspection by the COR upon request.

C.6 Departing Employees and Debriefings.

The Contractor is responsible for the immediate retrieval of all Government-issued items upon an employee's departure, termination, or transfer from this contract. The Contractor shall ensure departing employees return all photographic security identification badges, Government property, and keys no later than 24 hours after their departure.

The Contractor shall notify the COR to terminate Local Area Network (LAN)/email access and revoke the CAC. The Contractor shall ensure all departing employees receive a security debriefing and sign the appropriate sections of the SF 312 (Classified Information Nondisclosure Agreement). If departure occurs after normal business hours, the Contractor FSO/Lead shall collect the badge and turn it in to the ATC/ATEC HQ Security Division on the next business day.

C.7 Job Training.

IAW Section B of this PWS, the Contractor is solely responsible for ensuring all employees are fully trained and certified on all relevant tasks and security procedures prior to independent performance. The Contractor shall maintain internal training records for COR inspection.

PERFORMANCE WORK STATEMENT (PWS)

SECURITY AND SAFETY SUPPORT SERVICES

C.8 Work Attire.

Contractor personnel shall maintain a professional appearance commensurate with their operational environment. The Contractor shall ensure personnel adhere to the following minimum attire standards:

- ATEC Headquarters: Business Casual attire.
- ATC VCC: Business Casual attire.
- Gate / Range Support: Clean, serviceable utility attire appropriate for outdoor conditions, worn in conjunction with the required high-visibility safety PPE outlined in Section B.4.
- Safety Support Specialist: Business Casual, with safety PPE outlines in Section B.4.

D. GOVERNMENT-FURNISHED SPACE

The Government will provide the following workspace necessary to perform the requirements of this PWS:

- ATC Visitor Control Center (VCC): Multiple person desk in the lobby area of Building 324.
- ATC S2 Security Support: One cubicle located in the office area of Building 324.
- ATEC Headquarters: Office space located on the 3rd floor, of Building 2202.
- Access Control Guard Support: Gate 13 Guardhouse
- Risk Management Test SME Safety Specialist: One cubicle located in the office area of Building 360.

E. CONTRACT DELIVERABLES

The Contractor shall provide the following deliverables in accordance with the associated Contract Data Requirements List (CDRL) (DD Form 1423).

E.1 Monthly Status Report (CDRL A001).

The Contractor shall deliver a monthly status report to the COR and S2 Technical Point of Contact (TPOC) detailing work accomplished during the reporting period, problems encountered and mitigation strategies, and work projected for the upcoming month.

E.2 Monthly VCC Metrics and Inventory Report (CDRL A002).

The Contractor shall deliver a monthly statistical report to the COR and S2 TPOC detailing visitor control processing metrics and a current inventory of VCC supplies utilized for daily operations.

E.3 Monthly Employee Roster (CDRL A003).

The Contractor shall deliver a comprehensive monthly employee roster to the COR and S2 TPOC no later than the 5th calendar day of each month. The roster shall be submitted in Microsoft Excel format and must include the current email address and contact phone number for all Contractor personnel performing on this contract.

PERFORMANCE WORK STATEMENT (PWS)

SECURITY AND SAFETY SUPPORT SERVICES

E.4 Weekly Labor Report (CDRL A004).

The Contractor shall compile and submit a Weekly Labor Report in Microsoft Excel format. This report shall be submitted electronically to the CIMS inbox at usarmy.apg.atec.mbx.apgr-atc-cims@army.mil , with the COR carbon copied (CC'd) on the submission.

E.5 Safety and Risk Management Documents (CDRL A005).

The Contractor shall generate and deliver professionally written audit results, incident reports & presentation briefs that may include workplace inspection results, survey results, deficiency notification memorandums, incident investigation results and photographs, and safety guidance slides for workforce awareness. Delivery of draft to Safety TPOC within 2 days of inspection or incident, final within 1 day of TPOC feedback on draft.

F. SPECIFIC TASKS

F.1 Contractor Employee Management. The Contractor shall provide a fully qualified workforce and is solely responsible for all internal management of its employees, including shift scheduling, task assignments, and performance management. All Contractor employees shall remain under the exclusive supervision and direction of the Contractor's Program Manager (PM) at all times.

F.2 Contractor Program Manager (PM) Designation. The Contractor shall designate a Program Manager (PM) or designated Lead to serve as the primary point of contact for all matters pertaining to the execution of this contract. The PM shall act as the sole Contractor liaison to the Government's Contracting Officer's Representative (COR).

G. DETAILED TASKS

G.1 ATC Visitor Control Center (VCC) Operations. The Contractor shall be responsible for the complete and independent operation of the ATC VCC. The Contractor shall manage its workforce to ensure continuous, efficient visitor processing (particularly during peak Monday morning periods). Operations must achieve the security standards and vetting thresholds established in the Government's ATC VCC Internal Operating Procedure (IOP) through the execution of the Contractor's own approved Standard Operating Procedure (SOP).

G.2 ATC S2 Security Support Services. The Contractor shall provide comprehensive security program support across all designated security disciplines (e.g., physical, industrial, personnel security). The Contractor shall independently execute tasks and generate deliverables to support the ATC security mission, as further defined in the performance requirements for the Security Tech III labor category (See Technical Exhibit).

G.3 Access Control and Range (SURGE) Guard Support. The Contractor's primary responsibility is to control physical access to designated Restricted Areas. The Contractor shall ensure all access control actions achieve the security outcomes mandated by applicable Government-provided Guard Orders and IOPs.

PERFORMANCE WORK STATEMENT (PWS)

SECURITY AND SAFETY SUPPORT SERVICES

G.4 ATEC Headquarters Administration and Security Support. The Contractor shall provide dedicated, independent administrative and security support services at the ATEC Headquarters. Expected deliverables and outcomes are further defined in the duties for the ATEC Security Tech II (See Technical Exhibit).

G.5 Risk Management Test SME Safety Specialist.

The Contractor shall provide Safety and Occupational

Health Compliance and Program support with work products to include professionally- written documents such as accident investigation reports, required periodic briefings, and be certified to conduct OSHA 10-Hour General Industry training.

TECHNICAL EXHIBIT 1: LABOR CATEGORY QUALIFICATIONS AND SUPPORT DUTIES

1. Security Technician II – ATC VCC Support (Full-Time and Part-Time)

- **Qualifications:** Minimum of four (4) years of work experience in a physical security environment, or an Associate's Degree in a security-related discipline (e.g., Security Operations, Criminal Justice, Intelligence). Must possess strong attention to detail, computer proficiency, and the capacity to strictly enforce security protocols. Requires expertise in access control software, data entry systems, Microsoft Office Suite, and proficiency in the Defense Information System for Security (DISS). Must possess excellent written and verbal communication skills to interact professionally with visitors, verify identities, de-escalate situations with frustrated individuals, and facilitate emergency security procedures.
- **Service Duties:** The Contractor shall process, screen, and badge all visitors entering the Restricted Area (RA). The Contractor shall manage the Visitor Control Mailbox (usarmy.apg.atec.mbx.apgr-atc-visitorcontrol@army.mil) and the DOD Safe Repository, processing all access requests within 24 hours of receipt. Duties include verifying security clearances in DISS, maintaining visitor access databases/SharePoint repositories, and fabricating (photographing, encoding, and printing) RA badges and CAC enrollments. All VCC operations shall achieve the security thresholds outlined in the ATC VCC Internal Operating Procedure (IOP). VCC support shall be fully operational each duty day from 0630 until 1600.

2. Security Technician III – ATC S2 Security Support Specialist (Full-Time)

- **Qualifications:** Minimum of four (4) years of work experience in an industrial or personnel security environment, or an Associate's Degree in a security-related discipline. Proficiency with data entry, handling sensitive/classified information, database management systems, and personnel security investigation tools (e.g., DISS, PSIP) is required. Must demonstrate strong analytical skills to review documents for potential security concerns and possess thorough knowledge of DoD security regulations.

PERFORMANCE WORK STATEMENT (PWS)

SECURITY AND SAFETY SUPPORT SERVICES

- Service Duties: The Contractor shall provide programmatic security support to the S2. Duties include managing the Credentialing Mailbox (usarmy.apg.atec.mbx.atc.ra.credentialing@army.mil) and processing permanent ATC badge requests within 24 hours. The Contractor shall execute in/out-processing procedures for ATC personnel, process outgoing TDY visit requests via DISS, and maintain monthly mission support contractor rosters. The Contractor shall prepare purchase request documentation via GFEBs for Government review and execution. Additional support includes analyzing and recommending updates to ATC security policies, maintaining S2 SharePoint files, and providing physical security oversight during special events, site visits, or exercises as requested by the COR.

3. Security Technician II – ATEC HQ Security & Office Support Specialist (Full-Time)

- Qualifications: Minimum of four (4) years of work experience in a professional, corporate, or military headquarters setting. Must possess excellent verbal and written communication skills to effectively interact with General Officers and Senior Executives. Requires the ability to handle sensitive information with strict discretion, manage multiple complex schedules, and prioritize visitor management tasks. Expertise in Microsoft Office Suite (Outlook, Word, Excel) and document handling systems is required.
- Service Duties: The Contractor shall provide physical access control and administrative support for the ATEC Command Group suite. Duties include greeting and screening visitors, monitoring senior leader calendars to anticipate visitor arrivals, and enforcing check-in procedures. The Contractor shall manage classified container operations (opening/securing safes) and conduct daily end-of-workday security checks utilizing Standard Forms 701 and 702 IAW local security protocol. The Contractor shall provide office support including answering/routing controlled area phone lines, receiving off-post deliveries, and tracking the suspense of critical documents and awards (via the Aurora system or internal tracking spreadsheets).

4. Security Technician I – ATC Access Control Guard Support (Full-Time)

- Qualifications: Minimum of two (2) years of work experience in a security guard, access control, or similar physical security role; or an Associate's Degree in a security-related discipline. Must possess keen attention to detail to identify potential security risks, the physical ability to stand for extended periods and patrol designated areas, and the capacity to make informed decisions during high-pressure situations or emergencies.
- Service Duties: The Contractor shall conduct access control at Gate 13 (primary) and assist at Gates 10, 18, 24, and 25 as directed. The Contractor shall control access to the ATC RA in strict compliance with ATC Access Policy and Guard Orders. Duties include verifying RA badges, cross-referencing special event Visit Access Rosters, and controlling the flow of traffic to ensure safe threshold operations. The Contractor shall facilitate the expedited entry of emergency responders (Police/Fire) and execute elevated Force Protection Condition (FPCON) measures when directed. The Contractor shall monitor automated gate

PERFORMANCE WORK STATEMENT (PWS)

SECURITY AND SAFETY SUPPORT SERVICES

equipment/barrier arms and immediately report malfunctions or facility issues to the COR and the designated ATC Security Watch Desk.

5. Security Technician I – Range (SURGE) Guard Support

- **Qualifications:** Identical to Security Technician I (Gate 13 Guard Support).
- **Service Duties:** The Contractor shall provide physical security guards to support after-hours range operations. Range (SURGE) guard support requires a two-person team per shift, typically executing 12-hour night shifts. The Government will provide a minimum of four (4) hours' notice for required support, including date and range location. Contractor personnel shall report directly to the designated range to enforce physical perimeter security during testing events.

6. Risk Management Test SME Safety Specialist (Part-Time)

- **Qualifications:** Certified to conduct OSHA 10-Hour General Industry training. Risk Management Test SME Safety Specialist shall have at least a bachelor's degree from an accredited college or school and a minimum of 23 years work experience in the test environment at a Major Range Test and Base Facility (MRTBF) and at least 23 years of experience with automotive testing or weapon and ammunition testing.
- **Service Duties:** The Contractor shall provide support to the overall ATC Safety and Occupational Health Program which includes, Explosives Safety, System Safety, Hazard Analysis Working Group Participation, Risk Assessment, and Occupational Safety and Health Administration (OSHA) compliance, including Lock Out / Tag Out, Confined Space, Fall Prevention, Electrical Safety, Material Handling Equipment, Hazardous Materials, Fire and Emergency Response, Accident Investigation, Power Tools and Equipment, Personal Protective Equipment requirements, Ergonomics, Noise Monitoring, Air Monitoring and Respiratory Protection Program administration. Contractor duties may include supporting workplace inspections and preparing reports identifying deficiencies; developing and conducting safety briefings or safety training for the workforce; conducting incident investigations and developing report of findings; conducting or assisting in conducting technical analysis of hazardous conditions or operations; monitoring the safety program for compliance with safety regulations; preparing hazard analyses of ATC operations.

7. Applicable Regulations for Security and Access Control

The Contractor shall ensure all operational procedures, deliverables, and performance outcomes comply with the most current versions of the following U.S. Codes, Department of Defense Instructions (DoDI), and Army Regulations (AR).

Authority Type	Reference	Title / Description	Applicability to PWS
-------------------	-----------	---------------------	----------------------

PERFORMANCE WORK STATEMENT (PWS) **SECURITY AND SAFETY SUPPORT SERVICES**

U.S. Code	18 U.S.C. § 1382	Entering military, naval, or Coast Guard property	Provides foundational legal authority for enforcing physical security and access control to restricted areas.
U.S. Code	50 U.S.C. § 797	Penalty for violation of security regulations and orders	Authorizes DoD regulations for the protection of property and places under military jurisdiction.
DoD Instruction	DoDI 5200.08	Security of DoD Installations and Resources	Establishes core DoD policy for protecting installations, resources, and personnel; governs restricted area designation.
Army Regulation	AR 190-13	The Army Physical Security Program	Primary regulation detailing requirements for physical security planning, barrier systems, and access control execution.
Army Regulation	AR 190-16	Physical Security	Provides broader physical security policies and requirements to be used in conjunction with AR 190-13.
Army Regulation	AR 190-56	The Army Civilian Police and Security Guard Program	Outlines baseline standards, vetting, and training requirements for contracted security personnel operating on Army installations.
Army Pamphlet	DA PAM 190-51	Risk Analysis for Army Property	Provides the methodology for assessing risks to assets, justifying the security posture of restricted areas.
Army Regulation	AR 385-10	The Army Safety Program	General safety requirements for operations on the installation. (Particularly relevant to the Safety Support position).
Army Pamphlet	DA PAM 385-64	Ammunition and Explosives Safety Standards	Dictates access control, training, and hazard briefing requirements for entry into areas
