

**DEPARTMENT OF THE AIR FORCE
HEADQUARTERS, 673D AIR BASE WING
JOINT BASE ELMENDORF-RICHARDSON, ALASKA**

1 May 2026

MEMORANDUM FOR: 673 CONS

FROM: 673 ABW/HO
10471 20th Street
Joint Base Elmendorf-Richardson, AK 99506

SUBJECT: Salient Characteristics List for 673D Air Base Wing Exercise 3D Model Gameboard

IAW with FAR 11.104(b), Use of Brand Name or Equal Purchase Descriptions, the following is a general description of salient physical, functional, or performance characteristics of the brand name item that an equal item must meet to be acceptable for award. Use brand name or equal descriptions when the salient characteristics are firm requirements.

1. The following item is needed to install the Requirements in the Location. Describe each item's physical, function, or performance characteristics.

1. The 673D Air Base Wing requires a detailed 3D model of JBER to enhance situational awareness and facilitate operational planning. The model will be used during exercises and real-world scenarios to visualize key geographical and manmade features.

1. The contractor shall design, construct, and deliver a 3D model of JBER, Alaska, split into four quadrants seamlessly connect to form the complete model totaling eight feet by five feet. The model shall include buildings, landscape features, roads, airfields, and other significant geographical and manmade elements. The model must meet dimensional and proportional accuracy requirements.

2. The contractor shall use high-density model foam or similar durable material for construction. Materials must be sturdy, lightweight, and suitable for detailed modeling. Materials must withstand shipping and handling without damage.

3. For detailing and finishing the contractor will include buildings, hills, roads, airfields, and other significant features. Apply laser markings, painted textures, and vegetation to enhance realism. Features must be clearly identifiable and proportionate to the model's scale. No more than 5% of features may lack clarity or detail.

4. The contractor will provide a stable base for each quadrant that allows seamless connection. Bases must support the model securely while maintaining a seamless appearance when assembled. The bases must align without visible gaps or instability.

6. The work shall be performed at the contractor's facility. The final product shall be shipped to the 673D Air Base Wing History Office at JBER, Alaska. Use shipping

containers that prevent damage during transit. The model must arrive undamaged and ready for assembly.

7. The contractor shall complete the project within six months of contract acceptance.

8. The 673D Air Base Wing History Office will provide guidance and clarification as needed.

9. The contractor shall not share any documents or information related to this project with any entity other than the 673D Air Base Wing.

Task	Performance Standard	AQL	Surveillance Method
Design and Construction	Accurate dimensions and proportions	100% compliance	Periodic design reviews
Material Selection	Durable and lightweight materials	100% compliance	Inspection of materials
Detailing and Finishing	Clear and identifiable features	No more than 5% lack clarity	Visual inspection of the model
Base Construction	Stable and seamless connection	100% compliance	Assembly testing
Shipping and Delivery	Model arrives undamaged	100% compliance	Inspection upon delivery

2. The item listed above purchased.
