

Notice of Intent: EmulsiFlex-C3 Homogenizer

(75N98026Q00319)

The National Institutes of Health intends to award a Firm-Fixed-Price Purchase Order to Avestin Inc.

In accordance with FAR Part 6.302-1, Avestin Inc is the only known responsible source who can provide the products/services that meet our standards. No other source has been identified who can provide the requirements listed below.

The National Institute of Diabetes and Digestive and Kidney Diseases requires an EmulsiFlex homogenizer with a heat exchanger and heat exchange coil for the Laboratory of Molecular Biology. The system is required for high-pressure cell disruption to support protein extraction and purification from biological samples. Reliable protein purification is essential for studying biological processes and disease mechanisms. The instrument will improve processing efficiency and support ongoing research activities. Without this system, sample preparation will be delayed, reducing research productivity and impacting experimental timelines.

This notice is not a request for competitive quotes. Avestin Inc is the service provider. However, any available small businesses (e.g., 8(a), service-disabled veteran owned small business, HUBZone small business, small disadvantaged business, veteran-owned small business, and women-owned small business) as stated herein may submit a written capability statement that clearly supports and demonstrates their ability to perform the requirement. A determination by the Government to compete this proposed award based upon responses to this notice is solely within the discretion of the Government.

It is anticipated that an award will be issued approximately five (5) days after the date of this notice unless the Government determines that another vendor has the capability to meet this requirement.

Please email responses to david.shen@nih.gov no later than 7:00 a.m. EDT on May 15, 2026.
