

RFQ IHS1525595A – QUESTIONS AND ANSWERS

Based on the documents, it appears the solicitation is for a leased, turnkey alarm and surveillance system solution for the facility.

Could you please clarify whether the intent is for the contractor to provide and lease all required equipment, software, hardware, installation, monitoring, maintenance, and support services for the full contract term? Also, is the monitoring requirement limited to security system monitoring only, or should the contractor include broader surveillance system monitoring and support as part of the proposed solution?

Yes, fully leased for all elements of the overall system throughout entirety of the contract duration.

Yes, the requirement is limited-to and based on the two priorities: one, the alarm notification relaying information and alerts from the Ak-Chin site to Phoenix Indian Medical Center; and, two, the system including a basic CCTV-style surveillance that also relays information and alerts and viewing from the Ak-Chin site and Phoenix Indian Medical Center.
